No. MC 110589 (sub-No. 26), filed June 14, 1973. Applicant: J. E. LAMMERT TRANSFER, INC., 317 North Oak Street, Grand Island, Nebr. 68801. Applicant's representative: Kenneth F. Dudley, 611 Church Street, P.O. Box 279, Ottumwa, Iowa 52501. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Cheese, cheese products, and cheese byproducts*, and *pizza toppings*, from Denver, Colo., Hutchinson, and Wichita, Kans., and Superior, Nebr., to points in Alabama, Florida, Georgia, Illinois, Mississippi, Nebraska, North Carolina, South Carolina, Tennessee, and Wisconsin.

NOTE: Common control may be involved. Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Kansas City, Mo., or Lincoln, Nebr.

No. MC 110659 (sub-No. 18), filed June 25, 1973. Applicant: COMMERCIAL CARRIERS, INC., 975 Virginia Street West, Charleston, W. Va. 25302. Applicant's representative: John M. Friedman, 2930 Putnam Avenue, Hurricane, W. Va. 25526. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Window glass*, from Charleston, W. Va., to points in the lower peninsula of Michigan (except Detroit and points in the Detroit, Michigan Commercial Zone).

Note: Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Charleston, W. Va., Columbus, Ohio, or Washington, D.C.

No. MC 110683 (sub-No. 95), filed June 7, 1973. Applicant: SMITH'S TRANSFER CORP., P.O. Box No. 1000, Staunton, Va. 24401. Applicant's representative: Francis W. McInerny, 1000 16th Street NW., Washington, D.C. 20036. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities* (except those of unusual value, Classes A and B explosives, household goods as defined by the Commission, commodities in bulk and those requiring special equipment), serving Frankfort, Ind., as an off-route point in connection with applicant's existing authority between Indianapolis, Ind., and Morocco, Ind.

Note: Common control may be involved. If a hearing is deemed necessary, applicant requests it be held at Indianapolis, Ind. or Washington, D.C.

No. MC 111170 (sub-No. 205), filed June 21, 1973. Applicant: WHEELING PIPE LINE, INC., P.O. Box 1718, El Dorado, Ark. 71730. Applicant's representative: Don A. Smith, P.O. Box 43, Fort Smith, Ark. 72901. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Petoleum and petroleum products*, in bulk, in tank vehicles, as set forth in Appendix XIII of the report in "Descriptions in Motor Carrier Certificates", 61 M.C.C. 209, from the refinery and loading facilities of AMSCO/Union Oil Company of California located at Nederland (Smiths Bluff), Tex., to points in Alabama, Arkansas, Florida, Georgia, Louisiana, Mississippi, North Carolina, South Carolina, and Tennessee.

Note: Applicant states that the requested authority cannot be tacked with its existing authority. Applicant further states no duplicating authority sought. If a hearing is deemed necessary, applicant requests it be held at Little Rock, Ark., or Memphis, Tenn.

No. MC 112304 (sub-No. 69), filed June 21, 1973. Applicant: ACE DORAN HAULING & RIGGING CO., a corporation, 1601 Blue Rock Street, Cincinnati, Ohio 45223. Applicant's representative: A. Charles Tell, 100 East Broad Street, Columbus, Ohio 43215. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Electrical substations, circuit breakers and switches, and related parts, attachments, and accessories* used in the assembly and construction thereof, from Springdale, Ark. to points in Illinois, Wisconsin, Missouri, Michigan, Ohio, Indiana, Kentucky, Tennessee, North Carolina, Virginia, West Virginia, Delaware, Maryland, Pennsylvania, New York, New Jersey, Connecticut, Rhode Island, Massachusetts, New Hampshire, Vermont, Maine, and the District of Columbia, and (2) *equipment, materials and supplies* (except commodities in bulk), used in the manufacture and assembly of articles in (1) above, from points in the destination states named in (1) above to Springdale, Ark.

NOTE.—Common control may be involved. Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at St. Louis, Mo. or Washington, D.C.

No. MC 112750 (sub-No. 298), filed June 8, 1973. Applicant: PUROLATOR COURIER CORP., 2 Nevada Drive, Lake Success, N.Y. 11040. Applicant's representative: John M. Delany (same address as applicant). Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Commercial papers, documents, written instruments and business records* (except currency, and negotiable securities) as are used in the business of banks and banking institutions, (1) between points in Hartford County, Conn., on the one hand, and, on the other, points in Hampden and Hampshire Counties, Mass.; and (2) from Greenfield, Mass., to Windsor Locks, Conn., under contract with banks and banking institutions.

NOTE.—Applicant holds common carrier authority under MC 111729 and subs, therefore dual operations may be involved. Also common control may be involved. If a hearing is deemed necessary, applicant requests it be held at Washington, D.C. or Boston, Mass.

No. MC 112822 (sub-No. 279), filed June 13, 1973. Applicant: BRAY LINES, INC., P.O. Box 1191, 1401 N. Little Street, Cushing, Okla. 74023. Applicant's representative: Marion F. Jones, Suite 1600 Lincoln Center, 1660 Lincoln Street, Denver, Colo. 80203. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Foodstuffs, and powdered whey*, when in mixed shipments with foodstuffs, in vehicles equipped with mechanical refrigeration (except commodities in bulk, in tank vehicles), from the plantsites and public warehouse facilities of vendors or suppliers of Kraft Foods located in Minnesota (except the Minneapolis and St. Paul, Minn., Commercial Zone), and Wisconsin, to the plantsites and public warehouse facilities of Kraft Foods at Springfield, Mo., and Dallas and Garland, Tex., restricted to traffic originating at the named origins and destined to the named destination points.

NOTE.—Applicant states that the requested authority cannot or will not be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Chicago, Ill., or St. Paul, Minn.

No. MC 112822 (sub-No. 280), filed June 25, 1973. Applicant: BRAY LINES, INC., P.O. Box 1191, 1401 North Little, Cushing, Okla. 74023. Applicant's representative: Marion F. Jones, suite 1600, Lincoln Center, 1660 Lincoln Street, Denver, Colo. 80203. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Liquid wax*, in bulk, in tank vehicles, from Ponca City, Okla., to Lakeland, Fla., and Springhill, La.

NOTE.—Applicant states that the requested authority cannot or will not be tacked with its existing authority. If a hearing is deemed

V 38-148 AUG 2 73 XUM

necessary, applicant requests it be held at Houston or Fort Worth, Tex.

No. MC 112822 (sub-No. 281), filed June 25, 1973. Applicant: BRAY LINES, INC., P.O. Box 1191, 1401 North Little, Cushing, Okla. 74023. Applicant's representative: J. R. Gardner (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Confectioneries*, from Montrose, Colo., to points in California and Texas.

NOTE.—Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Kansas City, Mo., or St. Louis, Mo.

No. MC 114457 (Sub-No. 152), filed June 11, 1973. Applicant: DART TRANSIT CO., a corporation, 780 North Prior Avenue, St. Paul, Minn. 55104. Applicant's representative: Michael P. Zell (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Artificial Christmas trees and accessories*, (a) from the plantsite and warehouse facilities of Gordon Industries, Inc., located at Chicago, Ill., to points in the United States (except Alaska and Hawaii); and (b) from the plantsite and warehouse facilities of Gordon Industries, Inc., located at Newburgh, N.Y., to points in Connecticut, Delaware, the District of Columbia, Florida, Georgia, Illinois, Indiana, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, North Carolina, Ohio, Pennsylvania, Rhode Island, South Carolina, Vermont, Virginia, and West Virginia; and (2) *returned or rejected shipments* from those destination points named in (b) above, to the plantsite and storage facilities of Gordon Industries, Inc. located at Chicago, Ill. and Newburgh, N.Y.; and (3) *polyvinyl chloride* (except in bulk), from Ramsey, N.J. to the plantsite and storage facilities of Gordon Industries, Inc., located at Chicago, Ill.

NOTE: Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, aplicant requests it be held at St. Paul, Minn. or Chicago, Ill.

No. MC 115904 (sub-No. 30), filed June 11, 1973. Applicant: LOUIS GROVER, 1710 West Broadway, Idaho Falls, Idaho 83401. Applicant's representative: Irene Warr, 430 Judge Building, Salt Lake City, Utah 84111. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Flakeboard, particle board and lumber mill products and gypsum products*, from points in California, to points in Idaho, Montana, Wyoming, Colorado, North Dakota, and South Dakota.

NOTE: Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Salt Lake City, Utah, or Idaho Falls, Idaho.

No. MC 119406 (sub-No. 7), filed June 18, 1973. Applicant: ROBERT J. GRALL, 2901 Calumet Avenue, P.O. Box 313, Manitowoc, Wis. 54220. Applicant's representative: Edward Solie, Executive Building, suite 100, 4513 Vernon Boulevard, Madison, Wis. 53705. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Plywood*, boards or sheets, *veneer, wood paneling, hardboard, construction board, and wood particle board*, from Oshkosh, Wis., to points in Illinois, Indiana, Iowa, Michigan, Minnesota, and Ohio, restricted to traffic originating at the plant site and warehouse facilities of Pluswood. Inc., at Oshkosh, Wis., and destined to points in the above described destination States.

NOTE: Applicant states that the requested authority cannot be tacked with its existing authority. Applicant further states no duplicating authority sought. If a hearing is deemed necessary, applicant requests it be held at Madison, Wis.

No. MC 113651 (sub-No. 157), filed May 8, 1973. Applicant: INDIANA REFRIGERATOR LINES, INC., 2404 North Broadway, Muncie, Ind. 47303. Applicant's representative: Henry A. Dillon (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Meat, meat products, meat by-products, and articles distributed by meat packinghouses* (except hides and commodities in bulk), and *dressed rabbits* when shipped in mixed shipments with meat, meat products, meat by-products and articles distributed by meat packinghouses, from Denver, Colo., to points in California, Arizona, New Mexico, Washington, and Oregon.

NOTE.—Common control may be involved. Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Denver, Colo., or Washington, D.C.

No. MC 113678 (sub-No. 503), filed June 21, 1973. Applicant: CURTIS, INC. 4810 Pontiac Street, Commerce City, Colo. 80022. Applicant's representative: Richard A. Peterson, P.O. Box 80806, Lincoln, Nebr. 68501. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Cleaning compounds*, from Omaha, Nebr., Kansas City, Kans., Southbridge, Mass., Sycamore, Ill.; Elizabeth, N.J.; Atlanta, Ga., and Oklahoma City, Okla., to points in the United States (except Alaska and Hawaii).

NOTE.—Common control may be involved. Applicant states that the requested authority cannot or will not be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at either Omaha, Nebr., Denver, Colo. or Lincoln, Nebr.

No. MC 113843 (sub-No. 194), filed June 4, 1973. Applicant: REFRIGERATED FOOD EXPRESS, INC., 316 Summer Street, Boston, Mass. 02210. Applicant's representative: William J. Boyd, 29 South La Salle Street, Chicago, Ill. 60603. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Dairy products* (except commodities in bulk, in tank vehicles), from Owenton and Lawrenceburg, Ky., to the plantsite and warehouse facilities utilized by Kraft Food Division of Kraftco Corp. at Lehigh County, Pa., restricted to the transportation of traffic originating at the named origin points and destined to the named destination.

NOTE.—Common control may be involved. Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Chicago, Ill.

No. MC 113843 (sub-No. 195), filed June 13, 1973. Applicant: REFRIGERATED FOODS EXPRESS, INC., 316 Summer Street, Boston, Mass. 02210. Applicant's representative: Francis P. Barrett, 60 Adams Street, Milton, Mass. 02187. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, tranporting: *Bakery goods*, from Westbury, N.Y., to points in Ohio, Michigan, Virginia, Illinois, Missouri, and Pennsylvania.

NOTE.—Common control was approved in MC-F-6781. Applicant states that the requested authority cannot or will not be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at New York, N.Y.

No. MC 114045 (sub-No. 386), filed June 20, 1973. Applicant: TRANS-COLD EXPRESS, INC., P.O. Box 5842, Dallas, Tex. 75222. Applicant's representative: J. B. Stuart (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Meats, meat products, meat by-products, and articles distributed by meat packinghouses* as described in Sections A and C of Appendix I to the report in "Descriptions in Motor Carrier Certificates," 61 M.C.C. 209 and 766 (except hides and commodities in bulk), from Chino, Calif., to points in Massachusetts, Rhode Island, Connecticut, New York, New Jersey, Pennsylvania, Maryland, and the District of Columbia, restricted to products originating at the plant site and storage facilities of Swift Fresh Meats Co. and destined to the named States.

NOTE.—Common control may be involved. Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Chicago, Ill., or Washington, D.C.

No. MC 114211 (sub-No. 195) (clarification), filed April 27, 1973, published in the FEDERAL REGISTER issue of May 17, 1973, republished, as corrected, in the FEDERAL REGISTER issue of June 1, 1973, and in third publication, as clarified, this issue. Applicant: WARREN TRANSPORT, INC., 324 Manhard Street, P.O. Box 420, Waterloo, Iowa 50704. Applicant's representative: Daniel Sullivan, 327 South La Salle Street, Chicago, Ill. 60604. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Agricultural machinery and implements, loaders, platforms, feeders, trailers, wagons, augers, spreaders, buckets, hoists, accessories, attachments, and parts*, from points in Wright County, Minn., to points in the United States (except Alaska and Hawaii), and (2) *equipment, materials, and supplies*, used in the manufacture or distribution of the above described commodities (except commodities in bulk), from points in the United States (except Alaska and Hawaii) to points in Wright County, Minn.

NOTE.—Applicant states that taking possibilities exist at points in the United States, to provide service to points in the United States; but indicates that tacking is not intended. Persons interested in the tacking possibilities are cautioned that failure to oppose the application may result in an unrestricted grant of authority. Applicant further states no duplicating authority sought. If a hearing is deemed necessary, applicant requests it be held at Minneapolis, Minn., or Chicago, Ill.

No. MC 114273 (sub-No. 143), filed June 11, 1973. Applicant: CEDAR RAPIDS STEEL TRANSPORTATION, INC., P.O. Box 68, Cedar Rapids, Iowa 52406. Applicant's representative: Robert E. Konchar, suite 315, Commerce Exchange Building, 2720 First Avenue Northeast, P.O. Box 1943, Cedar Rapids, Iowa 52406. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Petroleum products*, from Toledo, Ohio to Butler, Wis.

NOTE.—Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Washington, D.C.

No. MC 114457 (sub-No. 154), filed June 18, 1973. Applicant: DART TRANSIT CO., a corporation, 780 N. Prior Avenue, St. Paul, Minn. 55104. Applicant's representative: Michael P. Zell (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *New furniture*, in cartons, from the plantsite and storage facilities of the Simmons Co. at Kansas City, Kans., to St. Louis, Mo., restricted to traffic originating at the plantsite and storage facilities of Simmons Co., at Kansas City, Kans.

NOTE.—Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at St. Paul, Minn.

No. MC 114457 (sub-No. 155), filed June 21, 1973. Applicant: DART TRANSIT CO., a corporation, 780 North Prior Avenue, St. Paul, Minn. 55104. Applicant's representative: Michael P. Zell (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Meats, meat products, and meat by-products, articles distributed by meat packinghouses*, and *such commodities* as are used by meat packers in the conduct of their business when destined to and for use by meat packers as described in Sections A, C, and D of Appendix I to the report in "Descriptions in Motor Carrier Certificates," 61 M.C.C. 209 and 766 (except commodities in bulk and hides), from the plantsite and warehouse facilities utilized by Yankton Sioux Industries at Wagner, S. Dak., to points in Arkansas, Connecticut, Delaware, District of Columbia, Illinois, Indiana, Iowa, Kansas, Kentucky, Lousiana, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Nebraska, New Hampshire, New Jersey, New York, North Dakota, Ohio, Oklahoma, Pennsylvania, Tennessee, Texas, Vermont, Virginia, West Virginia, Wisconsin, and Maine; and (2) *meats meat products, and meat by-products*, as described in Section A, of Appendix I to the report in "Descriptions in Motor Carrier Certificates," 61, M.C.C. 209 and 766 (except commodities in bulk and hides), *and materials, supplies, and equipment* used by meat packers in the conduct of their business, from points in Arkansas, Illinois, Indiana, Iowa, Kansas, Kentucky, Michigan, Minnesota, Missouri, Nebraska, North Dakota, Oklahoma, Texas, and Wisconsin, to the plantsite and warehouse facilities utilized by Yankton Sioux Industries at Wagner, S. Dak.

NOTE: Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Minneapolis, Minn., or Chicago, Ill.

No. MC 114552 (sub-No. 86), filed June 25, 1973. Applicant: SENN TRUCKING CO., a corporation, P.O. Box 333, Newberry, S.C. 29108. Applicant's representative: Frank A. Graham, Jr., 707 Security Federal Building, Columbia, S.C. 29201. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Composition board, plywood, and veneer*, from the plant site and warehouse facilities of International Paper Co., located in Greenwood County, S.C. to points in Georgia, North Carolina, and Virginia.

NOTE: Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Columbia, S.C., Charlotte, N.C. or Washington, D.C.

No. MC 115491 (sub-No. 126), filed June 11, 1973. Applicant: COMMERCIAL CARRIER CORP., 502 East Bridgers Avenue, P.O. Drawer 67, Auburndale, Fla. 33823. Applicant's representative: Tony G. Russell (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Building materials*, from the plant sites and facilities of United States Gypsum Co., located at or near Chamblee and Morrow, Ga., to points in Florida and Georgia, restricted to traffic originating at the above described facilities and destined to points in the above-named territory.

NOTE: Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Tampa, Fla.

No. MC 115793 (sub-No. 16), filed June 28, 1973. Applicant: CALDWELL FREIGHT LINES, INC., U.S. Highway 321 South, P.O. Box 672, Lenoir, N.C. 28645. Applicant's representative: Theodore Polydoroff, suite 600, 1250 Connecticut Avenue NW., Washington, D.C. 20036. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *New furniture and furniture stock*, from the plant site of Singer Furniture Co. at or near Trumann, Ark., to the plant sites of Singer Furniture Co. at or near Lenoir and Bryson City, N.C.

Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Atlanta, Ga., or Miami, Fla.

No. MC 118468 (sub-No. 37), filed May 31, 1973. Applicant: UMTHUN TRUCKING CO., a corporation, 910 South Jackson P.O. Box 236, Eagle Grove, Iowa 50533. Applicant's representative: Patrick E. Quinn, 605 South 14th Street, P.O. Box 82028, Lincoln, Nebr. 68501. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Lumber and lumber products*, from points in Washington, Oregon, Montana, Idaho, Wyoming, Colorado, North Dakota, and Nebraska, to points in Iowa, Minnesota, Nebraska, Missouri, Wisconsin, Illinois, Kansas, North Dakota and South Dakota, under a continuing contract or contracts with Emmer Bros., Inc. and its affiliates.

NOTE: Applicant also holds common carrier authority in MC 12483 and subs thereunder, therefore dual operations may be involved. If a hearing is deemed necessary, applicant requests it be held at Minneapolis, Minn., or Chicago, Ill.

No. MC 119400 (sub-No. 12), filed June 22, 1973. Applicant: SIMANEK, INC., 150 West Seventh Street, Wahoo, Nebr. 68066. Applicant's representative: Patrick E. Quinn, 605 South 14th Street, P.O. Box 82028, Lincoln, Nebr. 68501. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Liquid fertilizer solutions*, from Doniphan, Nebr., and Kansas City, Mo., to points in Kansas.

NOTE: Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Omaha, Nebr.

No. MC 119547 (sub-No. 35), filed June 6, 1973. Applicant: EDGAR W. LONG, INC., Route 4, Zanesville, Ohio 43701. Applicant's representative: Richard H. Brandon, 79 East State Street, Columbus, Ohio 43215. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Malt beverages*, (1) from Columbus, Ohio, to Buffalo, N.Y.; (2) from Milwaukee, Wis., Louisville, Ky., and Columbus, Ohio, to Mabscott, W. Va.; (3) from Ft. Wayne, Ind., Louisville, Ky., St. Louis, Mo., and Columbus and Cleveland, Ohio, to Beckley, W. Va.; (4) from Cleveland, Ohio, and Peoria, Ill., to Wheeling, W. Va.; and (5) from Bensonville, Ill., and Milwaukee, Wis., to Zanesville, Ohio.

NOTE: Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Columbus, Ohio.

No. MC 119726 (sub-No. 33), filed May 24, 1973. Applicant: N. A. B. TRUCKING CO., INC., 2502 West Howard Street, Indianapolis, Ind. 46221. Applicant's representative: James L. Beattey, 130 East Washington Street, suite 1000, Indianapolis, Ind. 46204. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Glass containers, caps, covers, tops, and corrugated boxes*, knocked down, from Indianapolis, Ind., to points in Tennessee.

NOTE.—Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Indianapolis, Ind.

No. MC 119774 (sub-No. 69), filed June 22, 1973. Applicant: EAGLE TRUCKING CO., a corporation, 301 East Main Street, P.O. Box 471, Kilgore, Tex. 75662. Applicant's representative: Bernard H. English, 6270 Firth Road, Fort Worth, Tex. 76116. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Cable and wire*, from the plantsite of Kaiser Alluminum and Chemical Corp. at or near Bay Minette, Ala., to points in the United States in and east of North Dakota, South Dakota, Nebraska, Kansas, Oklahoma, and Texas; and (2) *materials and supplies* used in the manufacture of cable and wire, from points in the destination territory described in (1) above, to the plantsite of Kaiser Aluminum and Chemical Corp. at or near Bay Minette, Ala.

NOTE.—Common control may be involved. Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Mobile, Ala., Pensacola, Fla., or New Orleans, La.

No. MC 119792 (sub-No. 36), filed June 14, 1973. Applicant: CHICAGO SOUTHERN TRANSPORTATION CO., INC., 3215 South Hamilton, Chicago, Ill. 60608. Applicant's representative: William J. Boyd, 29 South La Salle Street, suite 330, Chicago, Ill. 60603. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Foods, foodstuffs, food products and food ingredients*, from points in Minnesota and Wisconsin, to points in Indiana, Ohio, Kentucky, Tennessee, South Carolina, North Carolina, Georgia, Florida, Alabama, Mississippi and Louisiana.

NOTE: Applicant states that the requested authority cannot or will not be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Chicago, Ill.

No. MC 123048 (sub-No. 265), filed June 28, 1973. Applicant: DIAMOND TRANSPORTATION SYSTEM, INC., 1919 Hamilton Avenue, Racine, Wis. 53403. Applicant's representative: Paul C. Gartzke, 121 West Doty Street, Madison, Wis. 53703. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Metal buildings*, knocked down, (2) *iron or steel conduit*, (3) *iron or steel conduit fittings;* and (4) *material, equipment and supplies* used in the manufacture, sale or distribution of the commodities named in (1), (2) and (3) above, from Parkersburg, W. Va., to points in the United States (except Alaska and Hawaii).

NOTE: Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Parkersburg, W. Va., or Washington, D.C.

No. MC 123048 (sub-No. 266), filed June 29, 1973. Applicant: DIAMOND TRANSPORTATION SYSTEM, INC., 1919 Hamilton Avenue, Racine, Wis. 53403. Applicant's representative: Paul C. Gartzke, 121 West Doty Street, Madison, Wis. 53703. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Welded steel tubing and pressured tubing*, from Gerald, Mo., to points in Illinois, Indiana, Iowa, Michigan, Minnesota, North Dakota, Ohio, South Dakota, and Wisconsin.

NOTE: Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at St. Louis, Mo., Chicago, Ill., or Washington, D.C.

No. MC 123233 (sub-No. 46), filed June 11, 1973. Applicant: PROVOST CARTAGE INC., 7887 Second Avenue, Ville d'Anjou 437, Quebec, Canada. Applicant's representative: J. P. Vermette (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Caustic soda*, in bulk, in tank vehicles, from the port of entry on the international boundary line between the United States and Canada located at or near Rooseveltown, N.Y., to Massena, N.Y., restricted to traffic moving in foreign commerce originating in Ontario, Canada.

NOTE: Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Washington, D.C. or Albany, N.Y.

No. MC 123233 (sub-No. 47), filed June 10, 1973. Applicant: PROVOST CARTAGE, INC., 7887 Second Avenue, Ville d'Anjou 437, Quebec, Canada. Applicant's representative: J. P. Vermette (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Caustic soda and sodium chlorate*, in bulk, in tank vehicles, from the ports of entry on the international boundary line between the United States and Canada located at or near Highgate Springs and Derby Line, Vt., to Jay, Maine, restricted to traffic having a prior movement in foreign commerce.

NOTE: Applicant states that the requested authority cannot or will not be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Washington, D.C. or Albany, N.Y.

No. MC 123993 (sub-No. 26) filed June 6, 1973. Applicant: FOGLEMAN TRUCK LINE, INC., 1724 West Mill Street, P.O. Box 1504, Crowley, La. 70526. Applicant's representative: Austin L. Hatchell, 1102 Perry Brooks Building, Austin, Tex. 78701. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Chemicals*, in bulk, from the plant site of Commercial Solvents Corp., at Sterlington, La., to points in Alabama, Arkansas, Louisiana, Mississippi, Oklahoma, Tennessee, and Texas, restricted to traffic originating at the plant site of Commercial Solvents Corp.

NOTE: Applicant holds a motor contract carrier permit in No. MC 41116 and subs thereunder, therefore dual operations may be involved. Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at New Orleans or Baton Rouge, La.

No. MC 124071 (sub-No. 8), filed May 31, 1973. Applicant: LIVESTOCK SERVICE, INC., 1413 Second Avenue South, St. Cloud, Minn. 46301. Applicant's representative: Bruce E. Mitchell, 1600 First Federal Building, Atlanta, Ga. 30303. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Cocks, valves and related parts*, from Sartell, Minn., and McMinnville, Tenn., to points in the United States (except Alaska and Hawaii), under contract with De Zurik Corp.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Minneapolis or St. Paul, Minn.

No. MC 124211 (sub-No. 229), filed June 4, 1973. Applicant: HILT TRUCK LINE, INC., P.O. Box 988, Downtown Station, Omaha, Nebr. 68101. Applicant's representative: Thomas L. Hilt (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Beverages and foodstuffs*, from points in Idaho, Oregon, and Washington, to points in the United States on and east of U.S. Highway 83, and to Rapid City, S. Dak., and Scottsbluff, Nebr.

No. MC 133178 (sub-No. 2), filed May 29, 1973. Applicant: PAPER CARGO CORPORATION, 3260 Chicago Drive, Grandville, Mich. 49418. Applicant's representative: Ronald J. Mastej, 900 Guardian Building, Detroit, Mich. 48226. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Corrugated fiberboard and corrugated fiberboard boxes* between Grand Rapids, Mich., on the one hand, and, on the other, Muncie, Goshen, and La Porte, Ind. Restriction: The authority sought

V 38-148 AUG 2 73 XUM

above is restricted to a service to be performed under a continuing contract or contracts with Corco, Inc., and is further restricted to traffic originating at or destined to the plant or facilities utilized by Corco, Inc.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Detroit or Lansing, Mich.

No. MC 133490 (sub-No. 8), filed June 6, 1973. Applicant: LEE'S TRUCKING, INC., 122 Cedar Avenue, Minneapolis, Minn. 55404. Applicant's representative: Samuel Rubenstein, 301 North Fifth Street, Minneapolis, Minn. 55403. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Pre-cut houses*, knocked down, from Minneapolis, Minn., to points in Colorado and Wyoming, under contract with President Homes Division-Harvey Builders, Inc.

NOTE: Applicant holds common carrier authority under MC 135299 (sub-No. 1), therefore dual operations may be involved. If a hearing is deemed necessary, applicant requests it be held at Minneapolis, Minn.

No. MC 133566 (sub-No. 25), filed June 15, 1973. Applicant: GANGLOFF AND DOWNHAM TRUCKING CO., INC., Box 676, Logansport, Ind. 46947. Applicant's representative: William L. Slover, 1224 17th Street NW., Washington, D.C. 20036. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Frozen foods*, from the plantsite and storage facilities of the Kitchens of Sara Lee at Deerfield and Chicago, Ill., to points in Maine, Vermont, New Hampshire, Rhode Island, and Massachusetts, restricted to traffic originating at Deerfield and Chicago, Ill., and destined to the named States.

NOTE: Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Fort Wayne, Ind., or Washington, D.C.

No. MC 133689 (sub-No. 28), filed May 16, 1973. Applicant: OVERLAND EXPRESS, INC., 651 First Street SW., P.O. Box 2667, New Brighton, Minn. 55112. Applicant's representative: Daniel C. Sullivan, 327 South La Salle Street, Chicago, Ill. 60604. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Potatoes, potato products, and potato byproducts* (except commodities in bulk), from Grafton, N. Dak., to points in Maine, Vermont, New Hampshire, Connecticut, Massachusetts, New York, Maryland, Virginia, West Virginia, Pennsylvania, Delaware, New Jersey, Illinois, Indiana, North Dakota, Kansas, Wisconsin, Ohio, Michigan, Missouri, Minnesota, Iowa, South Dakota, Kentucky, North Carolina, and South Carolina.

NOTE: Applicant holds contract carrier authority under MC 76025 and subs thereunder, therefore dual operations may be involved. Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Chicago, Ill.

No. MC 133802 (sub-No. 1), filed June 25, 1973. Applicant: EMPAK TRANSPORTATION COMPANY, a corporation, 20th and William Streets, Omaha, Nebr. 68108. Applicant's representative: Patrick E. Quinn, 605 South 14th Street, P.O. Box 82028, Lincoln, Nebr. 68501. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: (1) *Lubricants, oils, petroleum products, antifreezes, windshield washer solvent, paint, concrete form release agents and dispensers*, from Bakerstown, Pa., Wichita and Olathe, Kans., Kansas City, Mo., and Compton, Calif., to points in the United States (except Alaska and Hawaii), and (2) *the commodities* named in (1) above and *materials and supplies* used in the production, sale, and distribution thereof, from points in the United States (except Alaska and Hawaii), to Bakerstown, Pa., Wichita and Olathe, Kans., Kansas City, Mo., and Compton, Calif., restricted in (1) and (2) above to traffic originating at or destined to the plantsites and storage facilities utilized by Southwest Petro-Chem, Inc., and its subsidiaries, and further restricted to a transportation service to be performed under a continuing contract or contracts with Southwest Petro-Chem, Inc., and its subsidiaries.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Omaha, Nebr.

No. MC 134145 (sub-No. 35), filed June 11, 1973. Applicant: NORTH STAR TRANSPORT, INC., P.O. Box 51, Thief River Falls, Minn. 56701. Applicant's representative: Robert P. Sack, P.O. Box 6010, West St. Paul, Minn. 55118. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Abrasive paper or cloth*, from the port of entry on the international boundary line between the United States and Canada located at or near Detroit, Mich., to Ames, Iowa; Alexandria and St. Paul, Minn.; and Cumberland, Wis., under contract with Minnesota Mining & Manufacturing Co. (3M Company).

NOTE: If a hearing is deemed necessary, applicant requests it be held at Minneapolis, Minn., or Detroit, Mich.

No. MC 134400 (sub-No. 7), filed June 11, 1973. Applicant: MILLER'S TRUCKING AND RENTAL, INC., 200 Southern Avenue, Dubuque, Iowa 52001. Applicant's representative: Carl E. Munson, 469 Fischer Building, Dubuque, Iowa 52001. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Ornamental iron products including, bars, columns, fencing, pipe, posts, railings and parts, rods, roofing sockets; also cement compounds, gates, lamps, plastic articles, posts, lamp and mailbox, and promotional materials*, (1) from Mount Carroll, Ill., to points in Arkansas, Colorado, Kansas, Iowa, Michigan, Minnesota, Missouri, Montana, Nebraska, New Mexico, North Dakota, Oklahoma, South Dakota, Wisconsin, and Wyoming; and (2) from Lodi, Ohio, to Mount Carroll, Ill., under contract with Leslie-Locke Building Products Co., Lodi, Ohio.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Chicago, Ill., or Cleveland, Ohio.

No. MC 134426 (sub-No. 5), filed June 4, 1973. Applicant: McCORT DRIVEAWAY, INC., 7032 Barkwood Drive, Jacksonville, Fla. 32211. Applicant's representative: Sol H. Proctor, 2501 Gulf Life Tower, Jacksonville, Fla. 32207. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Trailers* (other than commercial) *setup and assembled parts and accessorics*, between points in the United States, including Alaska and Hawaii.

NOTE: Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Jacksonville, Fla.

No. MC 134449 (sub-No. 8), filed June 6, 1973. Applicant: LESTER V. MOZNIK, 3753 Grandview Highway, Burnaby, British Columbia, Canada. Applicant's representative: Joseph O. Earp, 411 Lyon Building, 607 Third Avenue, Seattle, Wash. 98104. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Plastic camper canopies and parts thereof*, from San Leandro and Paramount, Calif., and Portland, Oreg., to the ports of entry on the international boundary line between the United States and Canada at or near Blaine and Sumas, Wash., under contract with King of the Road Enterprises, Ltd.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Seattle, Wash.

No. MC 134599 (sub-No. 80), filed June 4, 1973. Applicant: INTERSTATE CONTRACT CARRIER CORPORATION, P.O. Box 748, Salt Lake City, Utah 84110. Applicant's representative: Richard A. Peterson, P.O. Box 80806, Lincoln, Nebr. 68501. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Games and toys and advertising and promotional matter*, when moving at the same time and in the same vehicle with games and toys; *aquariums and aquarium accessories; household pet cages, supplies and equipment; brine shrimp, dried; tape, magnetic, sound or video, blank, in cassettes, on reels or as components, accessories and supplies; playground equipment, play ground furniture, bar stools and hobby kits and equipment, materials, and supplies* used in the manufacture and production of the above items (except commodities in bulk and those which because of size and weight, require special handling or special equipment), between City of Industry, Hawthorne, Gardena, and Compton, Calif., on the one hand, and, on the other, points in the United States (except Alaska and Hawaii), under a continuing contract with Mattel, Inc.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Lincoln, Nebr., or Salt Lake City, Utah.

No. MC 134599 (sub-No. 81), filed June 11, 1973. Applicant: INTERSTATE CONTRACT CARRIER CORPORATION, P.O. Box 748, Salt Lake City, Utah 84110. Applicant's representative: Richard A. Peterson, P.O. Box 80806, Lincoln, Nebr. 68501. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *New furniture*, crated, *and parts, materials, equipment, and supplies*, used in the manufacture, sale and distribution of such commodities, between the plantsite of Steelcase, Inc. located in Henderson County, N.C., on the one hand, and, on the other, points in the United States (except Alaska and Hawaii), under contract with Steelcase, Inc.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Lincoln, Nebr., or Salt Lake City, Utah.

No. MC 134734 (sub-No. 12), filed June 1, 1973. Applicant: NATIONAL TRANSPORTATION INC., Box 31, Norfolk, Nebr. 68701. Applicant's representative: Lanny N. Fauss, Box 37096, Omaha, Nebr. 68137. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Cranberry products*, (except in bulk), from Kenosha, Wis., to points in Louisiana, Mississippi, Alabama, and Georgia, under contract with Ocean Spray Cranberries, Inc.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Chicago, Ill., or Milwaukee, Wis.

No. MC 135124 (sub-No. 6), filed June 8, 1973. Applicant: DRESSING TRANSPORT, INC., Lake Street, Wilson, N.Y. 14172. Applicant's representative: Kenneth T. Johnson, Bankers Trust of Jamestown Building, Jamestown, N.Y. 14701. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Empty glass containers*, from Port Allegany, Pa., to points in Indiana, Michigan, Illinois, Iowa, and Missouri, under contract with Pierce Glass Co. of Port Allegany, Pa.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Buffalo, N.Y.

No. MC 135306 (sub-No. 2), filed June 20, 1973. Applicant: DAN'S TRANSIT, INC., 239 Woodmont Road, Milford, Conn. 06460. Applicant's representative: A. Charles Tell, 100 East Broad Street, Columbus, Ohio 43215. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Iron and steel, and iron and steel articles*, between points in that part of Connecticut west of the Connecticut River on the one hand, and, on the other, points in Vermont, New Hampshire, Massachusetts, Rhode Island, New York, New Jersey, and Pennsylvania.

NOTE: Applicant states it presently holds heavy hauling authority coextensive with the territory sought and files this application as a result of the Commission's decision in *Ace Doran Hauling & Rigging Co.*, Investigation of Operations, 108 M.C.C. 717. Applicant further states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Columbus, Ohio.

No. MC 135760 (sub-No. 12), filed June 12, 1973. Applicant: COAST REFRIGERATED TRUCKING CO., INC., P.O. Box 188, Holly Ridge, N.C. 28445. Applicant's representative: Herbert Alan Dubin, 1819 H Street NW., Washington, D.C. 20006. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Meats, meat products, meat byproducts, packinghouse products, and commodities* used and distributed by meat packinghouses, in vehicles equipped with mechanical refrigeration, between Baltimore, Md., and Wilmington, N.C., on the one hand, and, on the other, points in Connecticut, Massachusetts, New York, New Jersey, North Carolina, Pennsylvania, Rhode Island, Maryland, and the District of Columbia, under a continuing contract with H. G. Parks, Inc.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Washington, D.C.

No. MC 135760 (sub-No. 13), filed June 12, 1973. Applicant: COAST REFRIGERATED TRUCKING CO., INC., P.O. Box 188, Holly Ridge, N.C. 28445. Applicant's representative: Herbert Alan Dubin, 1819 H Street NW., Washington, D.C. 20006. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: (1) *Frozen foods*, in vehicles equipped with mechanical refrigeration, from Kansas City, Kans., to points in Illinois, Indiana, Michigan, Ohio, Wisconsin, Alabama, Florida, Georgia, Mississippi, Louisiana, North Carolina, South Carolina, Tennessee, Texas, Virginia, New York, New Hampshire, Pennsylvania, New Jersey, Minnesota, and Iowa; and (2) *frozen citrus juices*, in vehicles equipped with mechanical refrigeration, from points in Florida, to Kansas City, Kans., and points in New York, under a continuing contract with Rich Plan Corp., Food and Freezer Division.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Washington, D.C.

No. MC 136220 (sub-No. 6), filed June 14, 1973. Applicant: ROY SULLIVAN, doing business as SULLIVAN TRUCKING CO., 1705 Northeast Woodland, Ponca City, Okla. 74601. Applicant's representative: Dean Williamson, 280 National Foundation Life Building, 3535 Northwest 58th Street, Oklahoma City, Okla. 73112. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Petroleum coke*, in bulk, in dump vehicles, from the refining and storage facilities of Continental Oil Co. at Ponca City, Okla., to the facilities of the Char-Lite Briquettes Divisions of Pine O' Pine, Inc., at Lewisville, Ark., and Jacksonville, Tex.

NOTE: Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Oklahoma City or Tulsa, Okla.

No. MC 136343 (sub-No. 11), filed May 3, 1973. Applicant: MILTON TRANSPORTATION, INC., P.O. Box 207, Milton, Pa. 17847. Applicant's representative: George A. Olsen, 69 Tonnele Avenue, Jersey City, N.J. 07306. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Paper bags, plastic bags, paper boxes, and wrapping paper*, (1) from the facilities of Equitable Bag Co., Inc., at Long Island City, N.Y., and Moonachie, N.J., to points in Pennsylvania, New Jersey, Maryland, Delaware, Ohio, Indiana, Illinois, Michigan, Kentucky, Tennessee, New York, Connecticut, Rhode Island, Massachusetts, Alabama, Florida, and the District of Columbia, and (2) from the facilities of Equitable Bag Co., Inc., at or near Florence, Ky., to points in Ohio, Illinois, Michigan, Pennsylvania, New York, New Jersey, Maryland, Delaware, Massachusetts, Rhode Island, Connecticut, Florida, Alabama, and the District of Columbia.

NOTE: Applicant also holds contract carrier authority under MC 96098 and subs, therefore dual operations may be involved. Common control may also be involved. Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at New York, N.Y., or Washington, D.C.

No. MC 136343 (sub-No. 14), filed June 5, 1973. Applicant: MILTON TRANSPORTATION, INC., P.O. Box 207, Milton, Pa. 17847. Applicant's representative: George A. Olsen, 69 Tonnele Avenue, Jersey City, N.J. 07306. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Foodstuffs and other commodities* used or useful in the manufacture, sale, and distribution of products manufactured or sold by Diamond Crystal Salt Co., between points in the United States in and east of North Dakota, South Dakota, Nebraska, Kansas, Texas, and Oklahoma (including the District of Columbia).

NOTE: Applicant holds contract carrier authority under MC 96098 and subs thereunder, therefore dual operations may be involved. Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Detroit, Mich., or Washington, D.C.

No. MC 136378 (sub-No. 3), filed June 11, 1973. Applicant: R & L TRUCKING CO., INC., 105 Rocket Avenue, Opelika, Ala. 36801. Applicant's representative: Robert E. Tate, P.O. Box 517, Evergreen, Ala. 36401. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: (1) *Malt beverages*, from St. Louis, Mo., to points in Talladega County, Ala., under a continuing contract with Coosa Valley Budweiser Co., Inc.; (2) *athletic equipment*, from points in Lee County, Ala., to points

V38-148 AUG 2 73 XUM

in Florida, under a continuing contract with Abco Industries, Inc.; and (3) *meters and accessories* used in the installation thereof, from Tallassee, Ala., to points in Georgia, Kentucky, and California under a continuing contract with Neptune Meter Co.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Montgomery or Birmingham, Ala.

No. MC 136451 (sub-No. 4), filed June 6, 1973. Applicant: HUBBARD CARTAGE, INC., 3737 North Lincoln, Chicago, Ill. 60613. Applicant's representative: James C. Hardman, 127 North Dearborn Street, Chicago, Ill. 60602. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Paper and paper products*, between Chicago, Ill., on the one hand, and, on the other, points in Wisconsin pursuant to a continuing contract or contracts with Norwood Papers, Division of B & J Supply, Inc.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Chicago, Ill.

No. MC 136786 (sub-No. 5), filed May 17, 1973. Applicant: ROBCO TRANSPORTATION, INC., 3033 Excelsior Boulevard, Minneapolis, Minn. 55416. Applicant's representative: Val M. Higgins, 1000 1st National Bank Building, Minneapolis, Minn. 55402. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *New furniture and furniture parts*, from the plantsites and warehouse facilities utilized by Broyhill Industries at or near: (1) Rutherfordton, N.C., to points in Illinois north of Illinois Highway 15, those in Wisconsin on and south of Wisconsin Highway 64, and points in the Upper Peninsula of Michigan; (2) Newton, Conover, Marion, and Taylorsville, N.C., to points in Illinois, Iowa, Missouri, Arkansas, those in Wisconsin on and south of Wisconsin Highway 64, points in the Omaha, Nebr., and Minneapolis-St. Paul, Minn., commercial zones, and the Upper Peninsula of Michigan; (3) Lenior, N.C., to points in Iowa, Missouri, and Arkansas, those in Illinois north of Illinois Highway 15, those in Wisconsin on and south of Wisconsin Highway 64, points in the Omaha, Nebr., and Minneapolis-St. Paul, Minn., commercial zones, and the Upper Peninsula of Michigan; and (4) at or near Rutherfordton, Lenoir, Newton, Conover, Marion, and Taylorsville, N.C., to points in Louisiana, Texas, New Mexico, Colorado, Wyoming, Montana, Idaho, Utah, Arizona, California, Nevada, Oregon, and Washington.

NOTE: Common control may be involved. Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Charlotte, N C , or St. Paul, Minn.

No. MC 136786 (sub-No. 7), filed May 18, 1973. Applicant: ROBCO TRANSPORTATION, INC., 3033 Excelsior Boulevard, Minneapolis, Minn. 55416. Applicant's representative: K. O. Petrick (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Macaroni, noodles, spaghetti, or vermicelli*, prepared with or without cheese, meat, vegetables, of sauce, (1) from Minneapolis, Minn., to points in Alabama, Florida, Georgia, North Carolina, South Carolina, Tennessee, Idaho, Nevada, and Utah; and (2) from Carnegie, Pa., to points in Montana, Idaho, Washington, Oregon, California, Nevada, Arizona, Utah, and Minneapolis, Minn.

NOTE: Common control may be involved. If a hearing is deemed necessary, applicant requests it be held at St. Paul, or Minneapolis, Minn

No. MC 136831 (sub-No. 1), filed June 7, 1973. Applicant: GEORGE HUSACK, 167 Locust Drive, Schnecksville, Pa. Applicant's representative: John W. Frame, Box 626, 2207 Old Gettysburg Road, Camp Hill, Pa. 17011. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Lamps, lampshades, flocked paper, plastic lampshades, and parts and accessories* for lamps and lampshades, and *materials, supplies, and equipment* used or useful in the production, storage, distribution, or use of lamps and lampshades, between the plantsite of Keystone Lamp Manufacturing Corp., Washington Township (Lehigh County), Pa., on the one hand, and, on the other, points in New York, New Jersey, Delaware, Maryland, the District of Columbia, Virginia, West Virginia, Pennsylvania, Connecticut, Massachusetts, Rhode Island, Maine, New Hampshire, Vermont, Ohio, North Carolina, South Carolina, Michigan, Indiana, Illinois, Wisconsin, Texas, Florida, Alabama, Tennessee, and Georgia.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Harrisburg, Pa.

No. MC 138134 (sub-No. 1) (Amendment), filed June 1, 1973, published in the FEDERAL REGISTER issue of July 20, 1973, as MC–138830, and republished, as amended, this issue. Applicant: DONALD HOLLAND TRUCKING, INC., 1300 Main Street, Keokuk, Iowa 52632. Applicant's representative: Kenneth F. Dudley, 611 Church Street, P.O. Box 279, Ottumwa, Iowa 52501. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: (1) *Silicon metal, manganese metal, ferro alloys* and *pig iron* in dump vehicles and flatbed trailers, from Keokuk, Iowa, to points in Illinois, Kansas, Minnesota, Missouri, Nebraska, and Wisconsin; and (2) *Scrap metal*, from points in Illinois, Kansas, Minnesota, Missouri, Nebraska, and Wisconsin, to Keokuk, Iowa, under a continuing contract with Foote Mineral Co. at Exton, Pa.

NOTE: The purposes of this republication are: (1) To indicate applicant's request for contract carrier authority in lieu of common carrier authority; (2) to reflect the assignment of docket No. MC–138134 (sub-No. 10) to this proceeding; and (3) to indicate the contracting shipper of Foote Mineral Co. at Exton, Pa. Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Chicago, Ill.

No. MC 138144 (sub-No. 2), filed June 21, 1973. Applicant: FRED OLSON CO., INC., 6022 West State Street, Milwaukee, Wis. 53213. Applicant's representative: Eugene L. Cohn, One North La Salle Street, Room 2255, Chicago, Ill. 60602. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Iron and steel articles*, between Chicago, Joliet, and Waukegan, Ill., and Gary, Ind., on the one hand, and, on the other, points in Iowa, Missouri, Nebraska, and Kansas.

NOTE: Common control may be involved. Applicant states that the requested authority can be tacked with its existing authority at Chicago, Ill., to serve presently authorized points in Indiana, Illinois, and Wisconsin. If a hearing is deemed necessary, applicant requests it be held at Chicago, Ill., or Washington, D.C.

No. MC 138148 (sub-No. 1), filed June 4, 1973. Applicant: JOSEPH J. SCHMIDT, 7499 Montevideo Court, Jessup, Md. 20794. Applicant's representative: William J. Little, 1110 W. R. Grace Building, 10 East Baltimore Street, Baltimore, Md. 21202. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Beer and malt beverages*, from Granston, R.I., and Fort Wayne, Ind., to points in Maryland, and (2) *empty beer and malt beverages containers*, from points in Maryland to Cranston, R.I., and Fort Wayne, Ind.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Baltimore, Md., or Washington, D.C.

No. MC 138380 (sub-No. 2), filed June 14, 1973. Applicant: DEAN ZABEL, P.O. Box 325, Minnesota Lake, Minn. 56068. Applicant's representative: F. H. Kroeger, 2288 University Avenue, St. Paul, Minn. 55114. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Materials, supplies, parts, and accessories* used in the building of custom homes and garages (except commodities in bulk, in tank vehicles), between Minnesota Lake and Wells, Minn., on the one hand, and, on the other, points in Illinois, Iowa, Minnesota, Nebraska, North Dakota, South Dakota, and Wisconsin under contract with A Home of Your Own, Inc.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Minneapolis, Minn.

No. MC 138621 (sub-No. 2), filed June 13, 1973. Applicant: MOUW TRANSPORTATION, INC., 307 Maple Drive, Sibley, Iowa 51249. Applicant's representative: Robert G. Planansky, 605 South 14th Street, P.O. Box 82028, Lincoln, Nebr. 68501. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Butter*, in bulk or print form, (1) from points in Nebraska, South Dakota, and Minnesota, to points in Iowa; and (2) from points in Nebraska, South Dakota, and Iowa, to points in Minnesota, under a continuing contract or contracts with Associated Milk Producers, Inc.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Omaha, Nebr.

No. MC 138635 (sub-No. 4), filed June 6, 1973. Applicant: CAROLINA-WESTERN EXPRESS, INC., 650 Eastwood Drive, Gastonia, N.C. 28052. Applicant's representative: John R. Sims, Jr., suite 600, 1707 H Street NW., Washington, D.C. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Electric heat* in panels and/or strips, *circuit breakers, panels, switches, controllers, transformers weighing less than 1,000 pounds each and parts thereof*, from points in Mecklenburg County, N.C., to points in California and Denver, Colo., restricted to traffic moving in logistic trailers.

NOTE: Applicant states that the requested authority cannot or will not be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Charlotte, N.C.

No. MC 138668 (sub-No. 2), filed May 31, 1973. Applicant: MERCHANTS DELIVERY & WAREHOUSE CORPORATION, 1307 Baur Road, St. Louis, Mo. 63132. Applicant's representative: Austin C. Knetzger, 722 Chestnut Street, St. Louis, Mo. 63101. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *All home care products*, sold and distributed by Amway Corp., consisting principally of soaps, detergents, and toiletries, from points in the St. Louis-East St. Louis commercial zone, and Blue Springs, Mo., to points in Missouri, under contract with Amway Corp.

NOTE: If a hearing is deemed necessary, applicant requests it be held at St. Louis, Mo.

No. MC 138783, filed May 16, 1973. Applicant: M & M TRUCKING COMPANY, INC., P.O. Box 1743, Auburn, Ala. 36830. Applicant's representative: Jack R. McAnally (same address as applicant). Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Agricultural limestone*, from Auburn, Ala., to those points in that part of Georgia in a territory beginning at the intersection of Interstate Highway 20 with the Alabama-Georgia State line, thence along Interstate Highway 20 to intersection Interstate Highway 75 at Atlanta, Ga., thence along Interstate Highway 75 to intersection U.S. Highway 84 at Valdosta, Ga., thence along U.S. Highway 84 to the Alabama-Georgia State line, under a continuing contract, or contracts, with Georgia Marble Co., Willingham-Little Stone Division.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Auburn, Opelika, or Montgomery, Ala.

No. MC 138809, filed June 8, 1973. Applicant: CROSS COUNTRY EXPRESS, INC., 1912 East Wensley Street, Philadelphia, Pa. 19134. Applicant's representative: John M. Musselman, P.O. Box 1146, 410 North Third Street, Harrisburg, Pa. 17108. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Cocoa powder, kibbled chocolate liquor, cocoa pressed cake and related cocoa products*, from Camden, N.J., to points in California, Illinois, Indiana, Iowa, Kansas, Kentucky, Missouri, New York, North Carolina, Ohio, Pennsylvania, South Carolina, Virginia, West Virginia, Wisconsin, and the District of Columbia, under a continuing contract with Intercontinental Cocoa Products, Ltd.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Philadelphia, Pa., or Washington, D.C.

No. MC 138814, filed June 1, 1973. Applicant: WILLIAM A. ADDISON AND L. O. McCULLOUGH, a partnership, doing business as AD–MAC TRUCKING CO., 854 Forest Lake Drive South, Macon, Ga. 31204. Applicant's representative: William A. Addison (same address as applicant). Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Box and crate material,* woodwired, knocked down, *lumber, hardboard, particle board, masonite, plywood and other manufactured building material* from forest products, *pipe*, rail and track, *piling, highway products and construction material* (except liquid or bulk commodities), restricted against transportation in tank vehicles, between points in Georgia, Florida, Alabama, North Carolina, South Carolina, Tennessee, Kentucky, Virginia, Maryland, Pennsylvania, Ohio, Minnesota, Illinois, Indiana, and Michigan, under contract with Gillespie-Deka Corp., Maxwell Wirebound Box Co., and Southern Crate & Veneer Co.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Atlanta, Ga.

No. MC 138820 (Sub-No. 1), filed June 13, 1973. Applicant: PATTON'S, INC., 2300 Canyon Road, Ellensburg, Wash. 98926. Applicant's representative: James T. Johnson, 1610 IBM Building, Seattle, Wash. 98101. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Meat, meat products and meat byproducts*, from Ellensburg, Wash., to points in Oregon, under a continuing contract with Schaake Packing Co., Inc.

NOTE: Applicant currently holds common carrier authority in MC 129516 and subs thereunder, therefore dual operations may be involved. If a hearing is deemed necessary, applicant requests it be held at Seattle, Wash., or Portland, Oreg.

No. MC 138831, filed June 5, 1973. Applicant: JOHNNY JOHNS, doing business as J & J HAULING, 3 Midland Avenue, Elmwood Park, N.J. 07407. Applicant's representative: George A. Olsen, 69 Tonnele Avenue, Jersey City, N.J. 07306. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Bicycles, outdoor furniture, and materials, equipment, and supplies* used and useful in the manufacture and sale thereof, from points in the New York, N.Y., commercial zone as defined by the Commission, to points in Delaware, New Jersey, New York, Pennsylvania, Ohio, Connecticut, Rhode Island, and Massachusetts, under a continuing contract with Raleigh Bicycles of America and Kettler of America.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Newark, N.J., or New York, N.Y.

No. MC 138851, filed June 18, 1973. Applicant: M & H FABRICATING COMPANY, a corporation, 725 Mound Street, Springfield, Ohio 45505. Applicant's representative: Charles D. Ross, 367 West Second Street, Dayton, Ohio 45402. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Metal decking, bar joists, and structural steel*, from Rankin and Heidelberg, Pa., and Beech Bottom, W. Va., to points in Ohio, under contract with Cheugh and Schlegel of Dayton, Inc.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Washington, D.C.

No. MC 138854, filed May 24, 1973. Applicant: HORSE TRANSPORTATION, INC., Rural Delivery No. 3, Harrington, Del. 19952. Applicant's representative: William J. Little, Suite 1110, W. R. Grace Building, 10 East Baltimore Street, Baltimore, Md. 21202. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Horses* (other than ordinary livestock) and *equipment, supplies, and paraphernalia* incidental to the transportation, care, display, and racing of such horses, between points in South Carolina, North Carolina, Virginia, Maryland, Delaware, Pennsylvania, New Jersey, New York, Connecticut, Rhode Island, Massachusetts, New Hampshire, Vermont, West Virginia, Ohio, Florida, and Georgia.

NOTE: If a hearing is deemed necessary, applicant does not state a location.

No. MC 138855, filed June 18, 1973. Applicant: FISCHER FAST FREIGHT, INC., 31207 Arrowhead, St. Clair Shores, Mich. 48082. Applicant's representative: William B. Elmer, 21635 East Nine Mile Road, St. Clair Shores, Mich. 48080. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Malt beverages*, from St. Louis, Mo. Columbus, Ohio, and Milwaukee, Wis., to Mount Clemens and Port Huron, Mich., and *empty containers and damaged, rejected, or refused shipments*, on return, under contract with Petitpren, Inc., Mount Clemens, Mich.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Detroit or Lansing, Mich.

No. MC 138858, filed June 5, 1973. Applicant: CHARLES M. SHIRK, 205 East Main Street, Terre Hill, Pa. 17581. Applicant's representative: Christian V.

V 38-148 AUG 2 73 XUM

Minnesota, to points in Iowa; and (2) from points in Nebraska, South Dakota, and Iowa, to points in Minnesota, under a continuing contract or contracts with Associated Milk Producers, Inc.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Omaha, Nebr.

No. MC 138635 (sub-No. 4), filed June 6, 1973. Applicant: CAROLINA-WESTERN EXPRESS, INC., 650 Eastwood Drive, Gastonia, N.C. 28052. Applicant's representative: John R. Sims, Jr., suite 600, 1707 H Street NW., Washington, D.C. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Electric heat* in panels and/or strips, *circuit breakers, panels, switches, controllers, transformers weighing less than 1,000 pounds each and parts thereof*, from points in Mecklenburg County, N.C., to points in California and Denver, Colo., restricted to traffic moving in logistic trailers.

NOTE: Applicant states that the requested authority cannot or will not be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Charlotte, N.C.

No. MC 138668 (sub-No. 2), filed May 31, 1973. Applicant: MERCHANTS DELIVERY & WAREHOUSE CORPORATION, 1307 Baur Road, St. Louis, Mo. 63132. Applicant's representative: Austin C. Knetzger, 722 Chestnut Street, St. Louis, Mo. 63101. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *All home care products*, sold and distributed by Amway Corp., consisting principally of soaps, detergents, and toiletries, from points in the St. Louis-East St. Louis commercial zone, and Blue Springs, Mo., to points in Missouri, under contract with Amway Corp.

NOTE: If a hearing is deemed necessary, applicant requests it be held at St. Louis, Mo.

No. MC 138783, filed May 16, 1973. Applicant: M & M TRUCKING COMPANY, INC., P.O. Box 1743, Auburn, Ala. 36830. Applicant's representative: Jack R. McAnally (same address as applicant). Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Agricultural limestone*, from Auburn, Ala., to those points in that part of Georgia in a territory beginning at the intersection of Interstate Highway 20 with the Alabama-Georgia State line, thence along Interstate Highway 20 to intersection Interstate Highway 75 at Atlanta, Ga., thence along Interstate Highway 75 to intersection U.S. Highway 84 at Valdosta, Ga., thence along U.S. Highway 84 to the Alabama-Georgia State line, under a continuing contract, or contracts, with Georgia Marble Co., Willingham-Little Stone Division.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Auburn, Opelika, or Montgomery, Ala.

No. MC 138809, filed June 8, 1973. Applicant: CROSS COUNTRY EXPRESS, INC., 1912 East Wensley Street, Philadelphia, Pa. 19134. Applicant's representative: John M. Musselman, P.O. Box 1146, 410 North Third Street, Harrisburg, Pa. 17108. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Cocoa powder, kibbled chocolate liquor, cocoa pressed cake and related cocoa products*, from Camden, N.J., to points in California, Illinois, Indiana, Iowa, Kansas, Kentucky, Missouri, New York, North Carolina, Ohio, Pennsylvania, South Carolina, Virginia, West Virginia, Wisconsin, and the District of Columbia, under a continuing contract with Intercontinental Cocoa Products, Ltd.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Philadelphia, Pa., or Washington, D.C.

No. MC 138814, filed June 1, 1973. Applicant: WILLIAM A. ADDISON AND L. O. McCULLOUGH, a partnership, doing business as AD-MAC TRUCKING CO., 854 Forest Lake Drive South, Macon, Ga. 31204. Applicant's representative: William A. Addison (same address as applicant). Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Box and crate material*, woodwired, knocked down, *lumber, hardboard, particle board, masonite, plywood and other manufactured building material* from forest products, *pipe*, rail and track, *piling, highway products and construction material* (except liquid or bulk commodities), restricted against transportation in tank vehicles, between points in Georgia, Florida, Alabama, North Carolina, South Carolina, Tennessee, Kentucky, Virginia, Maryland, Pennsylvania, Ohio, Minnesota, Illinois, Indiana, and Michigan, under contract with Gillespie-Deka Corp., Maxwell Wirebound Box Co., and Southern Crate & Veneer Co.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Atlanta, Ga.

No. MC 138820 (Sub-No. 1), filed June 13, 1973. Applicant: PATTON'S, INC., 2300 Canyon Road, Ellensburg, Wash. 98926. Applicant's representative: James T. Johnson, 1610 IBM Building, Seattle, Wash. 98101. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Meat, meat products and meat byproducts*, from Ellensburg, Wash., to points in Oregon, under a continuing contract with Schaake Packing Co., Inc.

NOTE: Applicant currently holds common carrier authority in MC 129516 and subs thereunder, therefore dual operations may be involved. If a hearing is deemed necessary, applicant requests it be held at Seattle, Wash., or Portland, Oreg.

No. MC 138831, filed June 5, 1973. Applicant: JOHNNY JOHNS, doing business as J & J HAULING, 3 Midland Avenue, Elmwood Park, N.J. 07407. Applicant's representative: George A. Olsen, 69 Tonnele Avenue, Jersey City, N.J. 07306. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Bicycles, outdoor furniture, and materials, equipment, and supplies* used and useful in the manufacture and sale thereof, from points in the New York, N.Y., commercial zone as defined by the Commissioin, to points in Delaware, New Jersey, New York, Pennsylvania, Ohio, Connecticut, Rhode Island, and Massachusetts, under a continuing contract with Raleigh Bicycles of America and Kettler of America.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Newark, N.J., or New York, N.Y.

No. MC 138851, filed June 18, 1973. Applicant: M & H FABRICATING COMPANY, a corporation, 725 Mound Street, Springfield, Ohio 45505. Applicant's representative: Charles D. Ross, 367 West Second Street, Dayton, Ohio 45402. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Metal decking, bar joists, and structural steel*, from Rankin and Heidelberg, Pa., and Beech Bottom, W. Va., to points in Ohio, under contract with Cheugh and Schlegel of Dayton, Inc.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Washington, D.C.

No. MC 138854, filed May 24, 1973. Applicant: HORSE TRANSPORTATION, INC., Rural Delivery No. 3, Harrington, Del. 19952. Applicant's representative: William J. Little, Suite 1110, W. R. Grace Building, 10 East Baltimore Street, Baltimore, Md. 21202. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Horses* (other than ordinary livestock) and *equipment, supplies, and paraphernalia* incidental to the transportation, care, display, and racing of such horses, between points in South Carolina, North Carolina, Virginia, Maryland, Delaware, Pennsylvania, New Jersey, New York, Connecticut, Rhode Island, Massachusetts, New Hampshire, Vermont, West Virginia, Ohio, Florida, and Georgia.

NOTE: If a hearing is deemed necessary, applicant does not state a location.

No. MC 138855, filed June 18, 1973. Applicant: FISCHER FAST FREIGHT, INC., 31207 Arrowhead, St. Clair Shores, Mich. 48082. Applicant's representative: William B. Elmer, 21635 East Nine Mile Road, St. Clair Shores, Mich. 48080. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Malt beverages*, from St. Louis, Mo. Columbus, Ohio, and Milwaukee, Wis., to Mount Clemens and Port Huron, Mich., and *empty containers and damaged, rejected, or refused shipments*, on return, under contract with Petitpren, Inc., Mount Clemens, Mich.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Detroit or Lansing, Mich.

No. MC 138858, filed June 5, 1973. Applicant: CHARLES M. SHIRK, 205 East Main Street, Terre Hill, Pa. 17581. Applicant's representative: Christian V.

Graf, 407 North Front Street, Harrisburg, Pa. 17101. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Prestressed concrete products*, from the plantsite of Terre Hill Concrete Products, Inc. at Terre Hill, Pa., to points in New York, New Jersey, Maryland, West Virginia, Delaware, Virginia, and the District of Columbia.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Harrisburg, Pa., or Washington, D.C.

No. MC 138861, filed June 19, 1973. Applicant: C-LINE, INC., Tourtellot Hill Road, Chepachet, R.I. 02814. Applicant's representative: Ronald N. Cobert, 1730 M Street NW., Suite 501, Washington, D.C. 20036. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Cinder blocks*, from Warwick, R.I., to points in Connecticut, Maine, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, and Vermont.

NOTE: Applicant also holds contract carrier authority in MC 128343 and subs, therefore dual operations may be involved. Applicant states that the requested authority cannot be tacked with its existing authority. If a hearing is deemed necessary, applicant requests it be held at Providence, R.I.

MOTOR CARRIER OF PASSENGERS

No. MC 1515 (Sub-No. 185), filed June 7, 1973. Applicant: GREYHOUND LINES, INC., 1400 West Third Street, Cleveland, Ohio 44113. Applicant's representative: L. C. Major, Jr., Suite 301, Tavern Square, 421 King Street, Alexandria, Va. 22314. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *Passengers and their baggage, and express and newspapers* in the same vehicle with passengers, between Greensboro, N.C., and Richmond, Va. serving the intermediate points of Durham, N.C., Henderson, N.C., and the junction of Interstate Highway 85 with U.S. Highways 1 and 58, near South Hill, Va.: From Greensboro over Interstate Highway 85 to junction Interstate Highway 95 at Petersburg, Va., thence over Interstate Highway 95 to Richmond, and return over the same route. Restriction: Service at Durham and Henderson, N.C. is restricted against the pickup or discharge of traffic moving to or from Greensboro, N.C., or points west of Greensboro.

NOTE: Common control may be involved. Applicant seeks authority under section 1042.1 of part 1042-Superhighway and Deviation Rules, by the instant application.

No. MC 124817 (Sub-No. 1), filed June 20, 1973. Applicant: SANDWICH, WINDSOR, & AMHERSTBURG, RAILWAY COMPANY, a corporation, 1570 Kildare Road, Windsor, Ontario, Canada. Applicant's representative: Robert D. Gunderman, Suite 710, Statler Hilton, Buffalo, N.Y. 14202. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Passengers and their baggage*, in charter operations and in sightseeing and pleasure tours, from ports of entry on the international boundary line between the United States and Canada, to points in the United States (including Alaska, but excluding Hawaii) and return.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Detroit, Mich.

No. MC 135738 (Sub-No. 2), filed June 11, 1973. Applicant: DONALD DeGRAFF, doing business as ACE LIMOUSINE SERVICE, Brick Plaza Shopping Center, Brick Township, N.J. 08723. Applicant's representative: Charles J. Williams, 47 Lincoln Park, Newark, N.J. 07102. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Passengers and their baggage*, limited to the transportation of not more than 11 passengers in any one vehicle, not including the driver thereof, in special operations, between points in Ocean and Monmouth Counties, N.J., on the one hand, and, on the other, Philadelphia International Airport, Phialdelphia, Pa.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Newark, N.J.

No. MC 138730 (sub-No. 1), filed May 11, 1973. Applicant: CARAVAN TOURS, INC., doing business as CARAVAN TOWNE CARS, 707 Route 46, Parsippany, N.J. 07054. Applicant's representative: L. C. Major, Jr., Suite 301, Tavern Square, 421 King Street, Alexandria, Va. 22314. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Passengers and their baggage and express*, in the same vehicle with passengers, in one-way and round-trip charter operations, beginning and ending at points in Morris, Bergen, Passaic, Sussex, Essex, Union, Hudson, Middlesex, Monmouth, Warren, Hunterdon, and Somerset Counties, N.J., and extending to points in New Jersey, New York, and Pennsylvania, restricted to the transportation of not more than six passengers in any one vehicle (not including the driver).

NOTE: If a hearing is deemed necessary, applicant requests it be held at Newark N.J., or New York, N.Y.

APPLICATION OF FREIGHT FORWARDERS

No. FF-441, filed July 17, 1973. Applicant: HARLE LAND & SEA FORWARDERS (HARLE-THRU) a division of J. P. Harle Forwarding Co., P.O. Box 52908, 614 Cotton Exchange Building, Houston, Tex. 77052. Applicant's representative: Mr. J. P. Harle (same as above). Authority sought to engage in operation, in interstate commerce, as a *freight forwarder*, through use of the facilities of common carriers by railroad, motor vehicle, and water, in the transportation of *general commodities* (except explosives and hazardous articles, perishables, and unusual value articles), principally export and import shipments, between points in Oklahoma, Texas, and Louisiana.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Tulsa, Okla., or Dallas or Houston, Tex.

By the Commission.

[SEAL] ROBERT L. OSWALD, *Secretary.*

Title 21—Food and Drugs

SUBCHAPTER A—GENERAL

CHAPTER I—FOOD AND DRUG ADMINISTRATION DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

PART 1—REGULATIONS FOR THE ENFORCEMENT OF THE FEDERAL FOOD, DRUG, AND COSMETIC ACT AND THE FAIR PACKAGING AND LABELING ACT

Imitation Foods; Application of the Term "Imitation"

In the FEDERAL REGISTER of January 19, 1973 (38 FR 2138), the Commissioner of Food and Drugs proposed under Title 21 a new § 1.8(e), defining the term "imitation" for purposes of enforcing section 403(c) of the Federal Food, Drug, and Cosmetic Act.

A total of 236 comments were received in response to the proposal from consumers, consumer organizations, state agencies, manufacturers, and trade and agricultural associations. Seventy-six comments favored the proposal and 101 opposed it. Ten comments did not directly address its contents. The remaining comments requested modification, clarification, or additional requirements. The points raised and the Commissioner's conclusions are as follows:

1. Five State agencies, a manufacturer, and a consumer group questioned the correctness of the Commissioner's interpretation of section 403(c) of the Act. The comments questioned the Commissioner's authority to establish a definition for the term "imitation" which was asserted to be more restricted than the interpretation adopted in earlier court cases (62 Cases * * * Jam v. United States, 340 U.S. 593 (1951) and United States v. 651 Cases * * * Chocolate Chil-Zert, 114 F. Supp. 430 (N.D. N.Y. 1953)). One industry association urged that this proposed definition be given more careful consideration before it is finally promulgated, but did not state opposition to it. Two comments suggested that the Food and Drug Administration consider recommending legislation to repeal section 403(c) of the Act. One based this recommendation on the premise that if new products are to be marketed under their own names, section 403(c) is not needed. The other suggested that FDA should obtain data on what "imitation" means to the consumer, and that if consumer interpretation has changed, section 403(c) should be repealed and all products should compete under common or usual names.

The Commissioner concludes that the definition of "imitation" set forth in this regulation is fully consistent with the court opinions in the Jam and Chil-Zert cases, cited above, both of which discussed factors of resemblance, substitution, and inferiority in concluding that the products involved were imitations. There have been several State court cases in the past 10 years holding that a vegetable oil substitute for cream, which looks like, tastes like, and is intended to replace cream, is not an "imitation cream" but rather is a separate and distinct product that should bear its own common or usual name. See, e.g., Coffee-Rich, Inc. v. Kansas State Board of Health, 388 P.2d 582 (Kan. 1964); Coffee-Rich, Inc. v. Michigan Department of Agriculture, 135 N.W. 2d 594 (Mich. 1965). These cases represent the most current and definitive judicial interpretation of the term "imitation."

Several consumers stated that "All imitation foods should be labeled as such." Section 403(c) so requires. This regulation is intended to provide a clear and reasonable definition of "imitation" so that section 403(c) can be enforced consistently and fairly.

The Commissioner also concludes that section 403(c) should not be repealed. As interpreted in this regulation it constitutes a valuable consumer protection measure by protecting against nutritionally inferior substitute foods.

2. Some comments asserted that the proposal would cause difficulty in enforcement of some State laws, and that the proposal does not give the manufacturer of a food a clear explanation of how he can meet the nutritional equivalence requirement before he markets his product. These comments contended that leaving the determination of nutritional equivalence to the ad hoc determination of the Commissioner would make the regulation vague, indefinite, and invalid.

The Commissioner concludes that a clear definition of the term "imitation" for the purposes of section 403(c) of the act should not create difficulty in the enforcement of State laws, since this definition follows the most recent State court judicial decisions.

The Commissioner also concludes that the definition of "imitation" promulgated in this order is sufficiently clear for a manufacturer of a substitute food to determine prior to marketing whether or not such a product is an imitation, and indeed is much more helpful than the current absence of any definition. In order to clarify this matter further, the final regulation provides a clearer definition of nutritional inferiority and no longer provides for "ad hoc" determinations of nutritional inferiority by the Commissioner on the basis of criteria not stated in a regulation.

3. One comment stated that nutritional inferiority should not be the only criterion for defining "imitation." Two comments stated that the criteria for authorizing omission of the term "imitation" from the label of a substitute food should be based on consumer understanding of the overall impression conveyed by the food, the labeling, and the container. Another comment requested that additional labeling requirements be established so that consumers can better differentiate between new and traditional foods. Still other comments recommended labeling foods according to actual food value, irrespective of their imitation status.

Nutritional inferiority is not the only criterion involved in the defining "imitation" status. An evaluation of the overall impression conveyed by the food must first establish that the food is a substitute for and resembles another food.

No comment was able to articulate or even suggest objective standards constituting inferiority in addition to nutritional inferiority. Whenever the Commissioner or any other interested person concludes that a substitute food is inferior for reasons other than those set forth in the present regulation, he may propose appropriate revisions to this regulation or a separate regulation governing the particular food. The Commissioner concludes that the only objective factors defining inferiority that can be quantitated at this time relate to nutritional inferiority. Other factors of comparison, such as taste, texture, origin and cost, are too subjective and uncertain to be appropriate for inclusion in this regulation.

Additional labeling requirements already exist which help the consumer to distinguish between foods, including new and traditional foods. For example, the principal display panel of a food in package form must bear as one of its principal features a statement of the identity of the commodity, § 1.8(a) and (b). The Commissioner has recently promulgated a procedure which can be utilized to establish a common or usual name for a new food product, to prevent consumer confusion with a traditional product, 21 CFR Part 102 published in the FEDERAL REGISTER on March 14, 1973 (38 FR 6964), and new § 1.8(e) specifically refers to this procedure as one means of providing informative labeling. The nutritional value of a food is also required to be labeled under § 1.17 whenever a nutrient is added or a nutrition claim is made for the product. All ingredients in a nonstandardized food must be included on the label, and new § 1.8(d) requires uniform placement and a minimum type size for this information. Finally, section 402(b) of the act prohibits any economic adulteration and section 403(a) of the act prohibits use of any labeling which is false or misleading in any particular. In view of all of this informative labeling, the existence of other statutory provisions to prevent deception, and the clear requirement of inferiority in section 403(c) of the act, the Commissioner concludes that it would be contrary to the statute and the public interest to interpret section 403(c) as a trade barrier against the introduction of nutritious new food products.

4. Numerous comments were concerned with the effect of the regulation on standardized foods.

a. Several comments from trade associations and manufacturers of standardized foods suggested that Food and Drug Administration approval of a common or usual name be required for products which are substitutes for standardized foods, but that such approval remain optional for substitutes for non-standardized foods. Several other manufacturers stated that any new products resembling standardized foods should be labeled "imitation."

This regulation will not reduce in any way the protection afforded by standards of identity to the consumer, or to persons who manufacture standardized foods. Any food which purports to be or is represented as a standardized food but which does not conform to the standard of identity is deemed to be misbranded under section 403(g) of the act. See, e.g. 62 cases * * * Jam v. United States, 340 U.S. 593 (1951). A substitute for a standardized food may properly be labeled with a distinctive common or usual name or a descriptive term or phrase if it is sufficiently informative to prevent confusion with the standardized product. The Commissioner finds that it is neither necessary nor practical to require prior approval of all such common or usual names. The present way by which common or usual names may be established, under § 102.1(d) published in the FEDERAL REGISTER on March 14, 1973 (38 FR 6966) provides adequate consumer protection.

b. Two consumers, two manufacturers, and an agricultural association recommended that new standards of identity be required for all new products. One trade association requested that standards be required for new table spread products.

The Commissioner has concluded that there is no need to require standards of identity for all new food products, just as there has been no need for standards for all existing products. Interested parties may submit petitions to establish standards of identity for any food products, new or existing. Standards will be proposed and adopted whenever this is in the public interest.

c. One trade association suggested that the regulation should preclude the use of a standardized name in connection with the name of a nonstandardized product.

The Commissioner rejects this suggestion because in some cases it may be necessary to include a standardized name in the name of a substitute food in order to provide the consumer with accurate, descriptive, and fully informative labeling.

d. A trade association asserted that the proposed regulation would constitute a "short cut procedure to product standards," which may not be valid.

This regulation does not establish a procedure for standardizing the identity or the name of a food product, other than use of the name "imitation." The establishment of a common or usual name for a non-standardized food product is governed by Part 102 (38 FR 6964), and standards of identity are governed by Part 10. Section 1.8(e) interprets only section 403(c) of the act.

5. The following requests for clarification were received relative to labeling requirements under the proposed regulation:

a. May a food be labeled "imitation" if it is not nutritionally inferior to the food for which it is a substitute?

b. Is a common or usual name required for a food which is nutritionally inferior and labeled as an imitation?

c. Is a fanciful name optional or is it required in addition to a common or usual name?

d. What is the difference between "common or usual name," and "appropriately descriptive term"?

A manufacturer or distributor may label a substitute food which is not nutritionally inferior to the traditional food as an imitation if he concludes that the product is inferior in some other way and if use of the term is not misleading. A substitute food which is nutritionally inferior and labeled as an imitation will in most cases thereby bear a sufficient statement of identity, but "imitation" may not be used as the sole common or usual name if it is misleading to the consumer. In some cases an additional informative term or phrase will be necessary to avoid a misleading label. If there is an established common or usual name for a substitute product, use of "imitation" labeling for that product would inherently be misleading and thus prohibited.

The use of fanciful names in food labeling is optional, and the regulation has been revised to state this fact.

A common or usual name is an established term identifying a particular food. The common or usual name of a food may be established by regulation (e.g., by a standard of identity promulgated pursuant to section 401 of the act, in a common or usual name regulation pursuant to Part 102, or in a regulation establishing a nutritional quality guideline pursuant to Part 100), or by common everyday usage. Where a common or usual name exists, it must be used. For a food, especially a new product, for which there is no established common or usual name, an appropriately descriptive term must be used, and there may be more than one such descriptive term in use for a food until a common or usual name is established. Widespread, consistent use of a descriptive or fanciful term for a sufficient time period will result in such term being established as the common or usual name. An appropriately descriptive term may also be established as a common or usual name by petition pursuant to Part 102 eliminating the time required for common usuage.

6. One comment stated that the regulation should require manufacturers of substitute foods to demonstrate equivalent consumer acceptance of such foods to traditional foods through consumer and market acceptability studies. The Commissioner rejects this suggestion. The purpose of the act and of this regulation is to provide the consumer with sufficient information on food labels so that he can choose intelligently among the various products before him, not to limit choices to those products which have previously obtained consumer acceptance.

7. For foods which resemble other foods and are not nutritionally inferior to them, one individual suggested that "ana" (an abbreviation for analog) be considered as a prefix or suffix to the name of the traditional food which the analog product resembles, e.g., anabacon, anabeef, or cheesecana. The Commissioner agrees that in some cases a term such as "ana", or an alternative uniform system of identification might be a practical element of a common or usual name. However, considerable care would have to be taken to insure that such terminology is used in conjunction wth a descriptive term so as to provide fully informative labeling which would not be confusing or misleading to the consumer. Adoption of any such terminology should be pursuant to the procedures established in § 102.1(d) published in the FEDERAL REGISTER on March 14, 1973 (38 FR 6966).

8. A number of comments were related to the definition of nutritional inferiority. Some comments, predominantly from industry, requested a stricter definition of "nutritionally inferior." One suggested that nutritional inferiority be based on 10 percent of the amounts of the essential nutrients present in the traditional food for which a new product is a substitute. Other comments suggested requiring equal amounts of nutrients for a substitute food to avoid imitation status. While one of these comments suggested that the total profile of available nutrients be considered, another suggested that all essential nutrients present in a significant amount be considered, and that such significant amounts should be based on caloric content of the food as well as percentages of the U.S. Recommended Daily Allowance (RDA) present per serving.

The Commissioner agrees that the proposed criterion for nutritional inferiority (ten percent of the U.S. RDA) would allow foods with less than ten percent of the U.S. RDA of essential nutrients to be substituted for by similar products which might contain none of these nutrients and yet not be labeled as imitations. In order to prevent such occurrences and in response to comments, the definition of nutritional inferiority has been revised to include any reduction in the content of an essential vitamin or mineral or of protein that is present in a "measurable amount." A "measurable amount" of an essential nutrient is defined as two percent or more of the U.S. RDA of that nutrient per serving or portion of the food, as set out in § 1.17. Protein and those vitamins and minerals listed under § 125.1(b) will be considered essential nutrients for all substitute foods. The regulation is modified accordingly.

Other comments regarding the definition of nutritional inferiority included arguments that such a concept should include the quality of nutrients as well as their quantity, especially protein quality. One comment requested that bioavailability of nutrients be considered, and another requested consideration of maximum limits on the amounts of various nutrients in foods subject to this regulation. The U.S. RDA of protein is already related to quality, under § 1.17(c)(7)(ii), and there are no meaningful distinctions of quality for those nutrients listed in § 125.1(b).

There is at this time no apparent need for bioavailability requirements. Bioavailability is significant for certain drugs because of the need to deliver the drug to the body in precise, consistent amounts. Nutrients in foods exist in widely varying concentrations and there is not the same need for a precise, consistent amount to be delivered. However, if problems of bioavailability of specific added nutrients should be discovered in

V 38-148 AUG 2 73 XUM

the future, the Food and Drug Administration will establish regulations governing bioavailability requirements for such added nutrients.

Excessive nutrient fortification will be effectively prohibited by § 80.1, which would apply to any substitute food product to which nutrients listed under § 125.1(b) are added in amounts greater than necessary to prevent inferiority as compared to the food for which it substitutes, if any such nutrients are present in the food at a level higher than the lower limit established by § 80.1(f)(1).

One manufacturer felt that nutritional inferiority should not be defined until a committee of experts appointed by the National Academy of Sciences (NAS) has reviewed and recommended guidelines for such a definition.

The Commissioner recognizes the significance of the definition of nutritional inferiority as well as the benefits derived from NAS expert committees. However, the Commissioner concludes that there is no need for such a committee at this time.

9. One comment stated that if there are circumstances which would result in a food being nutritionally inferior for reasons other than that stated in the definition, such specific circumstances should be named in the regulation.

The proposal recognized the possibility that a food might be found to be nutritionally inferior for additional reasons not stated in the regulation, and authorized notice from the Commissioner to the manufacturer or distributor in such cases. The final regulation has been revised to eliminate any reference to regulatory action for violation of section 403(c) of the act based on standards of inferiority not promulgated in a regulation. The final regulation provides that if the Commissioner concludes that a food is a substitute for and resembles another food but is inferior to the food initiated for reasons other than those set forth he may propose appropriate revisions to the regulation or he may propose a separate regulation governing the particular food.

10. One comment suggested that a specific type size be required for any "imitation" designation, in relation to the type used for the brand name. Since existing regulations require that any such designation be conspicuous, the Commissioner concludes that this is unnecessary. Any such requirement should be the subject of a separate proposal dealing with the relationship between the brand name and the common or usual name.

11. In response to other concerns expressed in the comments, the Commissioner advises that:

a. While this regulation will affect competition between distributors of new food products and those of traditional foods, this is not a valid objection to a measure otherwise appropriate for avoiding confusion concerning the meaning of "imitation."

b. The nutritional adequacy of substitute foods, i.e., their place in the total diet, is not a subject of this regulation. The consumer is free to determine the place each food will have in his diet, and the labeling required by this regulation will help him to make informed choices.

c. This regulation does not affect the food additive status of any ingredient of the foods herein regulated.

12. The Commissioner is aware of the Resolution adopted June 21, 1973, by the Association of Food and Drug Officials of the United States at this year's annual conference in Rapid City, South Dakota in which opposition to his January 19, 1973, proposal is set forth. The views of that organization as well as the views of the State officials which were individually expressed through their own response to the proposal have been thoroughly considered in arriving at this final order.

Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (secs. 403, 701(a), 52 Stat. 1047–1048, as amended, 1055; 21 U.S.C. 343, 371(a)) and under authority delegated to the Commissioner (21 CFR 2.120), Part 1 is amended by adding a new paragraph (e) to § 1.8 to read as follows:

§ 1.8 Food in package form, labeling; identity.

* * * * * *

(e) Under the provisions of section 403(c) of the Federal Food, Drug and Cosmetic Act, a food shall be deemed to be misbranded if it is an imitation of another food unless its label bears, in type of uniform size and prominence, the word "imitation" and, immediately thereafter, the name of the food imitated.

(1) A food shall be deemed to be an imitation and thus subject to the requirements of section 403(c) of the act if it is a substitute for and resembles another food but is nutritionally inferior to that food.

(2) A food that is a substitute for and resembles another food shall not be deemed to be an imitation provided it meets each of the following requirements:

(i) It is not nutritionally inferior to the food for which it substitutes and which it resembles.

(ii) Its label bears a common or usual name that complies with the provisions of § 102.1 of this chapter and that is not false or misleading, or in the absence of an existing common or usual name, an appropriately descriptive term that is not false or misleading. The label may, in addition, bear a fanciful name which is not false or misleading.

(3) A food for which a common or usual name is established by regulation (e.g., in a standard of identity pursuant to section 401 of the act, in a common or usual name regulation pursuant to part 102 of this chapter, or in a regulation establishing a nutritional quality guideline pursuant to Part 100 of this chapter), and which complies with all of the applicable requirements of such regulation(s), shall not be deemed to be an imitation.

(4) Nutritional inferiority includes: (i) Any reduction in the content of an essential nutrient that is present in a measurable amount, but does not include a reduction in the caloric or fat content provided the food is labeled pursuant to the provisions of § 1.17, and provided the labeling with respect to any reduction in caloric content complies with the provisions applicable to caloric content in Part 125 of this chapter.

(ii) For the purpose of this section, a measurable amount of an essential nutrient in a food shall be considered to be 2 percent or more of the U.S. RDA of protein or any vitamin or mineral listed under § 125.1(b) per average or usual serving, or where the food is customarily not consumed directly, per average or usual portion, as established in § 1.17.

(iii) If the Commissioner concludes that a food is a substitute for and resembles another food but is inferior to the food imitated for reasons other than those set forth in this paragraph, he may propose appropriate revisions to this regulation or he may propose a separate regulation governing the particular food.

Effective date. Labeling may be changed to comply with this regulation beignning on August 2, 1973. All labeling ordered after December 31, 1973, and all labeling used on products shipped in interstate commerce after December 31, 1974, shall comply with this regulation.

(Secs. 403, 701(a), 52 Stat. 1047–1048, as amended, 1055; 21 U.S.C. 343, 371(a))

Dated: July 25, 1973.

A. M. SCHMIDT,
Commissioner of Food and Drugs.

[FR Doc.73-15701 Filed 8-1-73;8:45 am]

INCIDENTAL ADDITIVES

Exemptions From Food Labeling Requirements

In the FEDERAL REGISTER of January 19, 1973, (38 FR 2141), the Commissioner of Food and Drugs proposed to clarify the Agency's policy with regard to the label declaration of incidental additives and to consolidate into one place regulations currently found in 21 CFR Parts 1, 3, and 5 establishing exemptions from certain labeling requirements.

The comments received and the Commissioner's responses are as follows:

1. Several comments opposed labeling exemptions for incidental additives, particularly the provisions of proposed § 1.10a (a)(4)(i) and (a)(4)(ii)(c) These comments asserted that:

(a) The proposed exemption for incidental additives is not predicated on impracticability, deception or unfair competition as required by section 403(i)(2) of the act.

(b) Any possible incentive to reduce the use of additives is destroyed by not requiring industry to list incidental additives.

(c) Faulty calibration or malfunction of machines used in food manufacturing may result in unnecessary amounts of additives in foods.

(d) Substances that migrate from processing equipment and packaging material should be eliminated rather than exempted from label declaration.

(e) Additives that do not serve a technical or functional effect should not remain in food.

It was also asserted that consumers have an "undeniable right" to know what is in the food they eat so that they may make informed choices among foods. It was noted that, for medical or religious reasons, consumers may wish to restrict their diets and thus need to be aware of the ingredients in foods. It was also contended that the proposed exemptions are contrary to the policy of the Food and Drug Administration stated by the Commissioner at hearings in which he said, "We believe that consumers should be aware of the ingredients in the foods they consume."

The Commissioner concludes that to require label declaration of all incidental additives which may be present in a finished food product in nonfunctional trace amounts would be impracticable. In many cases there may be no feasible way to determine whether nonfunctional trace amounts of some particular substances remain in particular lots of a finished food, and label declaration of such ingredients would be false and misleading for those lots which do not contain any remaining traces of such incidental substances. Furthermore, to require lengthy listings of such substances might cause consumers to give undue attention to the essentially meaningless compilations resulting in deception and unfair competition from competing products whose manufacturers fail to do as thorough a job of imagining all possible substances which may be present in some trace amount.

The Commissioner is not aware of evidence that industry is using food additives without valid technological reasons. A food additive, including a substance migrating from packaging material or equipment, must be approved for safety by the Food and Drug Administration before it can appear in food, and the food additive regulations do not permit use of an additive in an amount greater than necessary to achieve a valid technical or functional effect. Faulty calibration or malfunctioning of machinery, or any other manufacturing practices which result in illegal levels of additives, and any insanitary manufacturing conditions whereby food may have become contaminated with filth or rendered injurious to health, would cause the finished food to be adulterated and subject to regulatory action. Labeling rules are not appropriate to govern such situations.

Section 403(i) of the act specifically provides for regulations establishing exemptions from declaration of ingredients, to the extent that such declaration would be impracticable or result in deception or unfair competition. The insignificant, nonfunctional substances which may be present in a food fall within that exemption provision. The Commissioner is, however, committed to a policy that foods should bear informative labeling listing all ingredients which have any nutritive or other technical or functional effect. The provisions of this regulation are not inconsistent with that policy, but rather apply a rule of reason to prevent lengthy, meaningless listings of insignificant ingredients which may be present in trace amounts.

The Commissioner is not aware of any evidence that any substance omitted from a declaration of ingredients because of this regulation would have any medical, religious or dietary significance. He concludes that these general rules are necessary in the interest of practicality and to avoid deception and unfair competition.

2. It was suggested that the provisions dealing with incidental additives be expanded to cover standardized foods as well as nonstandardized foods.

The Commissioner concludes that there is no reason to exempt standardized foods from this regulation and advises that these rules apply to all foods. All labeling requirements in 21 CFR Part 1 apply equally to standardized and nonstandardized food except where a specific standard establishes a different requirement.

3. One comment requested clarification of the regulations with regard to food products manufactured under the Meat Inspection Act or the Poultry Products Inspection Act, administered by the United States Department of Agriculture.

The Commissioner advises that this regulation is not in conflict with the aforementioned acts or any regulation of the Department of Agriculture.

4. One comment was opposed to the exemption in proposed § 1.10a(a)(1) for "assortment" packages which contain varying ingredients.

Section 1.10a(a)(1) has been modified to require the labels of such assortments to list by name those ingredients that may be present.

5. One comment from a consumer group opposed the exemption in proposed § 1.10a(a)(3) for propylene glycol and glycerin in quiescently frozen confections. The comment also stated that the proposed exemption appears to be in violation of section 403(i)(2) of the act in that it is not based on impracticability, deception or unfair competition.

This provision was proposed as a transfer to this regulation of § 1.10(g) (21 CFR 1.10). Propylene glycol and glycerin used as carriers for stabilizers and emulsifiers in quiescently frozen confections were exempted from label declaration by § 1.10(g) because these ingredients are used in small amounts, are generally recognized as safe and are exempt from label declaration when used in ice cream and other frozen desserts by the standards of identity for those competing products.

The Commissioner concludes that this exemption should not be continued and that proposed § 1.10a(a)(3) should be deleted. The Commissioner republished in the FEDERAL REGISTER of January 19, 1973 a statement of policy favoring label declaration of all optional ingredients in standardized foods and announcing that food standards will be amended to require such declaration (38 FR 2137). It would be inconsistent, under these circumstances, to continue labeling exemptions for analogous ingredients in nonstandardized foods.

6. One comment interpreted proposed § 1.10a(b) to mean that a food repackaged in a retail establishment would be exempt from listing ingredients.

The exemptions of proposed § 1.10a(b) do not apply to listing of ingredients other than optional ingredients in standardized foods. As specified, this paragraph pertains only to exemptions from subsections 403(e)(1), (g)(2), and (i)(1) of the act. A standardized food, repackaged in a retail establishment, is exempt from label declaration of optional ingredients which would otherwise be required to be declared on the label only if the food is displayed to the consumer with its interstate labeling or other sign, card, etc., clearly in view listing the optional ingredients. The same alternate methods for providing ingredient information for nonstandardized foods retailed from bulk containers are authorized by proposed § 1.10a(a)(2).

7. One comment proposed that if an open container of a fresh fruit or vegetable is displayed at retail without labeling then it should be required to bear its interstate label or a counter card, sign or other device listing the ingredients.

The Commissioner advises that If fresh fruits or vegetables retailed from bulk containers contain additional ingredients within the meaning of 403(i)(2) of the act, for example waxed fruits, they are required to be labeled in accordance with section 403(i)(2) of the act or the exemption provisions of § 1.10a(a)(2).

8. One comment asserted that the provisions of proposed § 1.10a(b), insofar as they apply to "delicatessen products" offered for retail sale in open trays, are not authorized by the fair packaging and labeling powers of the Commissioner.

The Commissioner advises that § 1.10a(b) is authorized by the various sections of the Federal Food, Drug, and Cosmetic Act specified in that paragraph, and that it does not purport to be promulgated pursuant to the Fair Packaging and Labeling Act.

9. The Commissioner does not agree with a comment that the use of counter cards, signs, or other devices required by § 1.10a(b) would necessarily hinder and obscure a customer's view. Such cards, signs, etc. may be above, below, or otherwise adjacent to a food display if they are conspicuous. The Commissioner further advises that § 1.10a(b)(3) specifically provides that a food subject to section 403(i)(1) of the act need not have such a card or sign "if the common or usual name of the food is clearly revealed by its appearance."

10. In response to a request for clarification, the Commissioner advises that containers of fresh fruits and vegetables which otherwise comply with § 1.10a(c) and which are covered with clear uncolored overwrap through which the contents of the container are clearly visible are "open" within the meaning of § 1.10a(c). The regulation has been revised to so state.

11. One trade association requested confirmation of its interpretation that the exemption in proposed § 1.10a(d)(2)

V 38-148
AUG 2 73
XUM

(for a shipment of food which is, in accordance with the practice of the trade, to be processed, labeled, or repacked in substantial quantity at an establishment other than that where originally processed or packed) covers not only shipments intended to be processed, labeled, or repacked as the same food but also ingredients for use in the manufacture of other foods.

The Commissioner advises that the regulation does not apply to food to be used as an ingredient in the manufacture of other foods.

12. One comment opposed the proposal to exempt the use of harmless markers in food on the basis that some people may be allergic to the markers used. The comment proposed that if a marker is present in a food then the label of such food indicate the presence of an unidentified ingredient.

Markers cannot be added to a food without prior approval by the Food and Drug Administration and such approval is not given unless the marker will be safe and suitable for use. To require a manufacturer to state that an unidentified ingredient is present would nullify the purpose for which such markers are used. The Commissioner is not aware that any markers currently in use have caused any allergic reaction in consumers, and no such evidence was submitted. Accordingly, § 1.10a(g) of the proposed regulation has been retained.

13. It was asserted that the statement required to appear on wrapped fish fillets and wrapped banana clusters specifying weighing of the package "at the time of sale" conflicts with both common practice and the provisions of these sections since the product may be weighed and have its weight marked prior to or at the time of sale. It was proposed in one comment that as an alternative to showing the wrapper tare weight on the individual packages of fish, the tare weight along with instructions should be permitted to be shown on the shipping containers only. One manufacturer asserted that the wording in proposed § 1.10a(h) and (i) is confusing since the term "wrapper tare ——— ounce" appearing in paragraph (h) does not appear in paragraph (i).

The Commissioner agrees that in practice these products may be weighed prior to time of sale, and the affected proposed § 1.10 a(h)(1)(ii) and (i)(1)(ii) are revised to read "to be weighed at or before time of sale". The Commissioner does not agree with the suggestion to permit the wrapper tare weight to appear on the shipping containers only. This could increase the possibility of misbranding of the individual packages once they are removed from the cartons, should the weighing and weight marking not be done immediately or should tare weights differ from shipment to shipment. The example wrapper tare weight statement appearing in paragraph (h) has been added to paragraph (i).

14. In response to a request for clarification, the Commissioner advises that the wrapper tare weight statement must appear on the wrappers used by the fish packer in the shipment to the retailer.

15. The Commissioner is aware of the Resolution adopted June 21, 1973, by the Association of Food and Drug Officials of the United States at this year's annual conference in Rapid City, South Dakota in which opposition to his January 19, 1973, proposal is set forth. The views of that organization as well as the views of the State officials which were individually expressed through their own response to the proposal have been thoroughly considered in arriving at this final order.

Accordingly, having considered the comments received, and other relevant information, the Commissioner concludes that proposed § 1.10a with the changes noted above, should be adopted.

Therefore, pursuant to the provisions of the Federal Food, Drug and Cosmetic Act (secs. 403, 405, 701(a), 52 Stat. 1047–1049, 1055; 21 U.S.C. 343, 345, 371(a)) and under authority delegated to the Commissioner (21 CFR 2.120), Parts 1, 3, and 5 are amended as follows:

PART 1—REGULATIONS FOR THE ENFORCEMENT OF THE FEDERAL FOOD, DRUG, AND COSMETIC ACT AND THE FAIR PACKAGING AND LABELING ACT

§ 1.10 [Amended]

1. In § 1.10 paragraphs (e), (f), and (g) are hereby revoked, and paragraph (h) is redesignated as paragraph (e).

2. A new § 1.10a is added to Part 1, to read as follows:

§ 1.10a Food; labeling; exemptions from labeling requirements.

(a) The following foods are exempt from compliance with the requirements of section 403(i)(2) of the act (requiring a declaration on the label of the common or usual name of each ingredient when the food is fabricated from two or more ingredients).

(1) An assortment of different items of food, when variations in the items that make up different packages packed from such assortment normally occur in good packing practice and when such variations result in variations in the ingredients in different packages, with respect to any ingredient that is not common to all packages. Such exemption, however, shall be on the condition that the label shall bear, in conjunction with the names of such ingredients as are common to all packages, a statement (in terms that are as informative as practicable and that are not misleading) indicating by name other ingredients which may be present.

(2) A food having been received in bulk containers at a retail establishment, if displayed to the purchaser with either (i) the labeling of the bulk container plainly in view or (ii) a counter card, sign, or other appropriate device bearing prominently and conspicuously the information required to be stated on the label pursuant to section 403(i)(2) of the act.

(3) Incidental additives that are present in a food at insignificant levels and do not have any technical or functional effect in that food. For the purposes of this subparagraph, incidental additives are:

(i) Substances that have no technical or functional effect but are present in a food by reason of having been incorporated into the food as an ingredient of another food, in which the substance did have a functional or technical effect.

(ii) Processing aids, which are as follows:

(*a*) Substances that are added to a food during the processing of such food but are removed in some manner from the food before it is packaged in its finished form.

(*b*) Substances that are added to a food during processing, are converted into constituents normally present in the food, and do not significantly increase the amount of the constituents naturally found in the food.

(*c*) Substances that are added to a food for their technical or functional effect in the processing but are present in the finished food at insignificant levels and do not have any technical or functional effect in that food.

(iii) Substances migrating to food from equipment or packaging or otherwise affecting food that are not food additives as defined in section 201(s) of the act; or if they are food additives as so defined, they are used in conformity with regulations established pursuant to section 409 of the act.

(b) A food repackaged in a retail establishment is exempt from the following provisions of the act if the conditions specified are met.

(1) Section 403(e)(1) of the act (requiring a statement on the label of the name and place of business of the manufacturer, packer, or distributor).

(2) Section 403(g)(2) of the act (requiring the label of a food which purports to be or is represented as one for which a definition and standard of identity has been prescribed to bear the name of the food specified in the definition and standard and, insofar as may be required by the regulation establishing the standard the common names of the optional ingredients present in the food), if the food is displayed to the purchaser with its interstate labeling clearly in view, or with a counter card, sign, or other appropriate device bearing prominently and conspicuously the information required by these provisions.

(3) Section 403(i)(1) of the act (requiring the label to bear the common or usual name of the food), if the food is displayed to the purchaser with its interstate labeling clearly in view, or with a counter card, sign, or other appropriate device bearing prominently and conspicuously the common or usual name of the food, or if the common or usual name of the food is clearly revealed by its appearance.

(c) An open container (a container of rigid or semirigid construction, which is not closed by lid, wrapper, or otherwise other than by an uncolored transparent wrapper which does not obscure the contents) of a fresh fruit or fresh vegetable, the quantity of contents of which is not more than 1 dry quart, shall be exempt from the labeling requirements of sec-

tions 403(e), (g)(2) (with respect to the name of the food specified in the definition and standard), and (i)(1) of the act; but such exemption shall be on the condition that if two or more such containers are enclosed in a crate or other shipping package, such crate or package shall bear labeling showing the number of such containers enclosed therein and the quantity of the contents of each.

(d) Except as provided by paragraphs (e) and (f) of this section, a shipment or other delivery of a food which is, in accordance with the practice of the trade, to be processed, labeled, or repacked in substantial quantity at an establishment other than that where originally processed or packed, shall be exempt, during the time of introduction into and movement in interstate commerce and the time of holding in such establishment, from compliance with the labeling requirements of section 403 (c), (e), (g), (h), (l), (j), and (k) of the act if:

(1) The person who introduced such shipment or delivery into interstate commerce is the operator of the establishment where such food is to be processed, labeled, or repacked; or

(2) In case such person is not such operator, such shipment or delivery is made to such establishment under a written agreement, signed by and containing the post office addresses of such person and such operator, and containing such specifications for the processing, labeling, or repacking, as the case may be, of such food in such establishment as will insure, if such specifications are followed, that such food will not be adulterated or misbranded within the meaning of the act upon completion of such processing, labeling, or repacking. Such person and such operator shall each keep a copy of such agreement until 2 years after the final shipment or delivery of such food from such establishment, and shall make such copies available for inspection at any reasonable hour to any officer or employee of the Department who requests them.

(3) The article is an egg product subject to a standard of identity promulgated in Part 42 of this chapter, is to be shipped under the conditions specified in paragraph (d)(1) or (d)(2) of this section and for the purpose of pasteurization or other treatment as required in such standard, and each container of such egg product bears a conspicuous tag or label reading "Caution—This egg product has not been pasteurized or otherwise treated to destroy viable Salmonella microorganisms." In addition to safe and suitable bactericidal processes designed specifically for Salmonella destruction in egg products, the term "other treatment" in the first sentence of this paragraph shall include use in acidic dressings in the processing of which the pH is not above 4.1 and the acidity of the aqueous phase, expressed as acetic acid, is not less than 1.4 percent, subject also to the conditions that:

(i) The agreement required in paragraph (d)(2) of this section shall also state that the operator agrees to utilize such unpasteurized egg products in the processing of acidic dressings according to the specifications for pH and acidity set forth in this paragraph, agrees not to deliver the acidic dressing to a user until at least 72 hours after such egg product is incorporated in such acidic dressing, and agrees to maintain for inspection adequate records covering such processing for 2 years after such processing.

(ii) In addition to the caution statement referred to above, the container of such egg product shall also bear the statement "Unpasteurized ——— for use in acidic dressings only," the blank being filled in with the applicable name of the eggs or egg product.

(e) Conditions affecting expiration of exemptions. (1) An exemption of a shipment or other delivery of a food under paragraph (d) (1) or (3) of this section shall, at the beginning of the act of removing such shipment or delivery, or any part thereof, from such establishment become void ab initio if the food comprising such shipment, delivery, or part is adulterated or misbranded within the meaning of the act when so removed.

(2) An exemption of a shipment or other delivery of a food under paragraph (d) (2) or (3) of this section shall become void ab initio with respect to the person who introduced such shipment or delivery into interstate commerce upon refusal by such person to make available for inspection a copy of the agreement, as required by paragraph (d) (2) or (3) of this section.

(3) An exemption of a shipment or other delivery of a food under paragraph (d)(2) or (3) of this section shall expire:

(i) At the beginning of the act of removing such shipment or delivery, or any part thereof, from such establishment if the food comprising such shipment, delivery, or part is adulterated or misbranded within the meaning of the act when so removed; or

(ii) Upon refusal by the operator of the establishment where such food is to be processed, labeled, or repacked, to make available for inspection a copy of the agreement, as required by such paragraph.

(f) The word "processed" as used in this paragraph shall include the holding of cheese in a suitable warehouse at a temperature of not less than 35° F. for the purpose of aging or curing to bring the cheese into compliance with requirements of an applicable definition and standard of identity. The exemptions provided for in paragraph (d) of this section shall apply to cheese which is, in accordance with the practice of the trade, shipped to a warehouse for aging or curing, on condition that the cheese is identified in the manner set forth in one of the applicable following paragraphs, and in such case the provisions of paragraph (e) of this section shall also apply:

(1) In the case of varieties of cheese for which definitions and standards of identity require a period of aging whether or not they are made from pasteurized milk, each such cheese shall bear on the cheese a legible mark showing the date at which the preliminary manufacturing process as been completed and at which date curing commences, and to each cheese, on its wrapper or immediate container, shall be affixed a removable tag bearing the statement "Uncured ——— cheese for completion of curing and proper labeling," the blank being filled in with the applicable name of the variety of cheese. In the case of swiss cheese, the date at which the preliminary manufacturing process had been completed and at which date curing commences is the date on which the shaped curd is removed from immersion in saturated salt solution as provided in the definition and standard of identity for swiss cheese, and such cheese shall bear a removable tag reading, "To be cured and labeled as 'swiss cheese,' but if eyes do not form to be labeled as 'swiss cheese for manufacturing.'"

(2) In the case of varieties of cheeses which when made from unpasteurized milk are required to be aged for not less than 60 days, each such cheese shall bear a legible mark on the cheese showing the date at which the preliminary manufacturing process has been completed and at which date curing commences, and to each such cheese or its wrapper or immediate container shall be affixed a removable tag reading, "——— cheese made from unpasteurized milk. For completion of curing and proper labeling," the blank being filled in with the applicable name of the variety of cheese.

(3) In the case of cheddar cheese, washed curd cheese, colby cheese, granular cheese, and brick cheese made from unpasteurized milk, each such cheese shall bear a legible mark on the cheese showing the date at which the preliminary manufacturing process has been completed and at which date curing commences, and to each such cheese or its wrapper or immediate container shall be affixed a removable tag reading "——— cheese made from unpasteurized milk. For completion of curing and proper labeling, or for labeling as ——— cheese for manufacturing," the blank being filled in with the applicable name of the variety of cheese.

(g) The label declaration of a harmless marker used to identify a particular manufacturer's product may result in unfair competition through revealing a trade secret. Exemption from the label declaration of such a marker is granted, therefore, provided that the following conditions are met:

(1) The person desiring to use the marker without label declaration of its presence has submitted to the Commissioner of Food and Drugs full information concerning the proposed usage and the reasons why he believes label declaration of the marker should be subject to this exemption; and

(2) The person requesting the exemption has received from the Commissioner of Food and Drugs a finding that the marker is harmless and that the exemption has been granted.

(h) Wrapped fish fillets of nonuniform weight intended to be unpacked and marked with the correct weight at or before the point of retail sale in an establishment other than that where originally packed shall be exempt from

V 38-148 AUG 2 73 XUM

the requirement of section 403(e)(2) of the act during introduction and movement in interstate commerce and while held for sale prior to weighing and marking:

(1) *Provided*, That:

(i) The outside container bears a label declaration of the total net weight; and

(ii) The individual packages bear a conspicuous statement "To be weighed at or before time of sale" and a correct statement setting forth the weight of the wrapper: *And*

(2) *Provided further*, That it is the practice of the retail establishment to weigh and mark the individual packages with a correct net-weight statement prior to or at the point of retail sale. A statement of the weight of the wrapper shall be set forth so as to be readily read and understood, using such term as "wrapper tare — ounce," the blank being filled in with the correct average weight of the wrapper used.

(3) The act of delivering the wrapped fish fillets during the retail sale without the correct net-weight statement shall be deemed an act which results in the product's being misbranded while held for sale. Nothing in this paragraph shall be construed as requiring net-weight statements for wrapped fish fillets delivered into institutional trade provided the outside container bears the required information.

(l) Wrapped clusters (consumer units) of bananas of nonuniform weight intended to be unpacked from a master carton or container and weighed at or before the point of retail sale in an establishment other than that where originally packed shall be exempt from the requirements of section 403(e)(2) of the act during introduction and movement in interstate commerce and while held for sale prior to weighing:

(1) *Provided*, That:

(i) The master carton or container bears a label declaration of the total net weight; and

(ii) The individual packages bear a conspicuous statement "To be weighed at or before the time of sale" and a correct statement setting forth the weight of the wrapper; using such term as "wrapper tare ——— ounce," the blank being filled in with the correct average weight of the wrapper used;

(2) *And provided, further*, That it is the practice of the retail establishment to weigh the individual packages either prior to or at the time of retail sale.

(3) The act of delivering the wrapped clusters (consumer units) during the retail sale without an accurate net weight statement or alternatively without weighing at the time of sale shall be deemed an act which results in the product's being misbranded while held for sale. Nothing in this paragraph shall be construed as requiring net-weight statements for clusters (consumer units) delivered into institutional trade, provided that the master container or carton bears the required information.

PART 3—STATEMENTS OF GENERAL POLICY OR INTERPRETATION

§ 3.1 [Revoked]

3. The provisions of § 3.1 are hereby revoked.

§ 3.26 [Revoked]

4. The provisions of § 3.26 are hereby revoked.

PART 5—[REVOKED]

5. The provisions of Part 5 are hereby revoked.

Effective date. This order shall become effective on September 4, 1973.

(Secs. 403, 405, 701(a), 52 Stat. 1047–1049, 1055; 21 U.S.C. 343, 345, 371(a))

Dated: July 25, 1973.

A. M. SCHMIDT,
Commissioner of Food and Drugs.

[FR Doc.73-15702 Filed 8-1-73;8:45 am]

LABEL STATEMENTS; FINDINGS OF FACT, CONCLUSIONS, AND FINAL ORDER

In the matter of revising the regulations for food for special dietary uses:

The Commissioner of Food and Drugs published Proposed Findings of Fact, Proposed Conclusions, and a Tentative Order in the FEDERAL REGISTER of January 19, 1973 (38 FR 2143), and allowed 60 days for the filing of written exceptions by any interested person whose appearance was filed at the hearing. The published document also included a history of the proceedings in the matter and an explanation of the scope of this action. Time for the filing of exceptions was subsequently extended through April 20, 1973 by notice published in the FEDERAL REGISTER on March 9, 1973 (38 FR 6396).

Exceptions to the order and the Findings of Fact were received from 35 persons whose appearance was filed at the hearing and one person who did not file such an appearance. In addition, approximately 790 postcards, form letters, and individual letters representing 1200 persons were received by the Hearing Clerk, objecting to the order. Over 20,000 similar letters objecting to the order, submitted to other government offices, were forwarded to the agency. None of these letters provided any substantive reasons for modifying the order. All exceptions filed have been considered and have been the basis of modification in the findings and in the order as set forth below. The Commissioner is aware of the Resolution adopted June 21, 1973, by the Association of Food and Drug Officials of the United States at this year's annual conference in Rapid City, South Dakota, in which opposition to his January 19, 1973, tentative order is set forth. The views of that organization, as well as the views of the State officials which were individually expressed through their own responses to the tentative order, have been thoroughly considered in arriving at this final order.

1. Exceptions were received stating that defining the term "special dietary use" to include dietary supplements was not within the province of the Federal Food, Drug, and Cosmetic Act. The Commissioner finds no merit in this exception. The agency as well as the courts have long recognized that dietary supplements which possess a label or labeling indicating the presence of various vitamins or minerals do in fact represent that the product has a special dietary use for man, by reason of its vitamin and mineral properties. 21 CFR 125.3; *V. E. Irons* v. *United States*, 244 F.2d 34 (C.A. 1, 1957), cert denied 354 U.S. 923 (1957).

2. An exception was received stating that the words "pathological" and "disease" should have been included in the definition of "special dietary use" in § 125.1(a) (21 CFR 125.1). The Commissioner reiterates the general principle that the labeling of foods for special dietary uses may not represent, suggest, or imply that the food is adequate or effective in the prevention, cure, mitigation, or treatment of any disease or symptom. Such products are defined as drugs under the act. The Commissioner also points out that, under specific sections of Part 125, provisions are made for appropriate labeling of foods for special dietary use for use solely under medical supervision to meet nutritional requirements in specific medical conditions. Such foods are intended to provide sound nutrition to sick persons rather than to treat a disease. The Commissioner concludes that the deletion of the words "pathological" and "disease" from the definition of foods for special dietary use is proper and supported by the Hearing Record and therefore no change is warranted.

3. In order to clarify the derivation of U.S. Recommended Daily Allowances (U.S. RDA's) and to indicate his intent to amend them at appropriate times, the Commissioner adds a new subparagraph to § 125.1(b). It is made clear in the regulation that as new information on nutrient needs of humans is obtained and becomes generally adopted as authoritative by experts in nutritional science, comparable changes will be made in the table of U.S. RDA's when such changes will serve to better inform users of the nutrient value of a food for special dietary use. This action is supported by paragraph 9 of the Proposed Findings of Fact.

4. Exceptions were received objecting to the use of the new term "U.S. RDA" on the basis that the term was not used in the 1962 and 1966 proposals and therefore was not a subject of the hearings.

One of the purposes of the hearings was to develop a set of recommended dietary allowances which reflect the nutrient requirements of consumers, and which can also be used in the labeling of foods to fully inform the consumer regarding nutrient content. Paragraphs 9, 10 and 13 of the Proposed Findings of Fact for Part 125 support the use of publication No. 1694 of the National Academy of Sciences, including the table entitled "Recommended Daily Dietary Allowances", to develop such a new set of recommended dietary allowances. Because the term "RDA", standing alone, refers specifically to the values found in the table entitled "Recommended Daily Dietary Allowances", it would be improper to use the identical term in referring to a new set of recommended dietary allowances not identical in all instances to those appearing in the aforementioned table. The Commissioner therefore concludes that a new term is needed which will convey the sense of recommended dietary allowances without being confused with the already existing RDA's, and finds "U.S. RDA" to be such a term. The Commissioner further concludes that the development of such a new term falls within the mandate of the hearings to develop a new set of recommended dietary allowances, and therefore finds no merit in the exception.

5. An exception was received suggesting that the U.S. RDA's for biotin and folic acid were too high, since experience with naturally-occurring lower levels in milk-based weight control dietaries had not resulted in any observations of deficiency in either humans or experimental animals consuming these products.

The Commissioner again notes his reliance upon the information contained in "Recommended Dietary Allowances," (Seventh Revised Ed., 1968), published by the Food and Nutrition Board of the National Academy of Sciences-National Research Council, as being authoritative for the development of the U.S. RDA's. This is clearly indicated in paragraphs 9, 10 and 13 of the Proposed Findings of Fact for Part 125, as well as in § 125.1(b)(1), which also indicates that the U.S. RDA's "are subject to amendment from time to time as more information on human nutrition becomes available." As noted in paragraph 9 of the Proposed Findings of Fact for Part 125, the Commissioner considers revisions in subsequent editions of "Recommended Dietary Allowances" to be the principal indicator for any need for revisions of U.S. RDA's. There presently is inadequate scientific evidence to justify changing the folic acid and biotin levels. The Commissioner therefore concludes that changes in the U.S. RDA's for biotin and folic acid at this time are unwarranted.

6. Exceptions were received recommending that the quantity of tryptophan present in a food for special dietary use be taken into consideration in terms of niacin equivalents when calculating the amount of niacin in that food. The Commissioner has carefully reviewed the Hearing Record and notes the discussion of the matter in "Recommended Dietary Allowances," (Seventh Revised Ed., 1968), published by the Food and Nutrition Board, National Academy of Sciences-National Research Council.

The Commissioner considers the quantitative contribution of tryptophan to total niacin activity in foods to be variable and the quantitative determination of niacin equivalents derived from tryptophan subject to serious practical limitations of analytical methodology. The Commissioner notes that, although the conversion of a portion of tryptophan intake to niacin is a well-established nutrition principle, there is currently inadequate knowledge of the magnitude of such conversion resulting from the consumption of specific individual foods. Therefore, for the present, the use of niacin equivalents derived from tryptophan is rejected for declaring total niacin activity. As further knowledge accumulates and improved analytical procedures become available, the Commissioner will re-examine the matter.

7. Exceptions were received stating that the U.S. RDA's for the specific consumer groups failed to insure that the special dietary requirements of infants (i.e., persons not more than 12 months of age) are properly identified and recognized. Noting the numerous exceptions concerning this issue, at the urging of the American Academy of Pediatrics, and after review of the Hearing Record and the Hearing Examiner's Report, the Commissioner concludes that, although the U.S. RDA's for infants and children under four years of age can safely be used by infants and one- to two-year-olds, as stated in paragraph 14 of the Proposed Findings of Fact, there is a need to establish infant U.S. RDA's for the labeling of those foods intended for use primarily or solely by infants. (WD–3A–Sebrell, Q&A 15; Lowe, Tr. 12568–70) The major concern expressed by the American Academy of Pediatrics dealt with the nutrition labeling of food products, e.g., strained vegetables, fruits, and meat mixtures. In their opinion, the higher U.S. RDA levels could result in mothers feeding their infants large quantities of food in order to provide the higher vitamin and mineral levels, and thus causing excessive caloric intake and obesity. By separate action the Commissioner is proposing to revise Nutrition Labeling § 1.17(h)(1) (21 CFR 1.17) to reflect this change by requiring that when nutrition labeling is used on baby foods expressly labeled for use by infants less than twelve months of age, the U.S. RDA's established in § 125.1(b) for infants shall be used. A reasonable and scientifically accurate derivation of infant U.S. RDA values from "Recommended Dietary Allowances," (Seventh Revised Ed., 1968), published by the Food and Nutrition Board of the National Academy of Sciences-National Research Council reads as follows: (WD–3A–Sebrell, Q&A 15)

Vitamins & minerals	Unit of measurement	U.S. RDA for infants
Vitamin A	International units.	1,500
Vitamin D	do	400
Vitamin E	do	5
Vitamin C	Milligrams	35
Folic acid	do	0.1
Thiamine	do	0.5
Riboflavin	do	0.6
Niacin	do	8
Vitamin B_6	do	0.4
Vitamin B_{12}	Micrograms	2
Biotin	Milligrams	0.05
Pantothenic acid	do	3
Calcium	Grams	0.6
Phosphorus	do	0.5
Iodine	Micrograms	45
Iron	Milligrams	15
Magnesium	do	70
Copper	do	0.9
Zinc	do	5

Therefore, the Commissioner concludes that paragraph 13 of the Proposed Findings of Fact and § 125.1(b) should be amended by including the above U.S. RDA's for infants as a separate column entitled "Infants" and revising the heading for the group entitled "Infants and children under 4 years of age" to read "Children under 4 years of age".

8. Exceptions were received pointing out that the units of measurement for vitamins A and D in the tentative order for § 125.1 are International Units, which is in conflict with the final order published for § 125.5(c)(5) (21 CFR 125.5) which uses U.S.P. Units as the units of measurement for vitamins A and D.

The Commissioner concurs that the units of measurement for these sections should be uniform and elsewhere in this issue of the FEDERAL REGISTER is publishing a proposed amendment to change the units of measurement for vitamins A and D in § 125.5 to International Units.

9. Exceptions were received to the effect that there is a need to describe the proper uses of the essential nutrients listed in § 125.1(c) for which no U.S. RDA's have been established. The Commissioner recognizes that there are certain foods for special dietary uses where the inclusion of one or more of these nutrients is appropriate, as determined by other regulations. Therefore, for purposes of clarification, the following sentences are added to paragraph (c): "These nutrients are not appropriate for addition to general purpose foods or dietary supplements of vitamins and minerals, but may be added to such foods for special dietary uses as infant formulas and foods represented for use solely under medical supervision to meet nutritional requirements in specific medical conditions, when permitted by other regulations."

The Codex Alimentarius is presently preparing food standards on two types of infant formulas, one with a milk base and one without. The Commissioner has concluded that it is appropriate to await the availability of those standards before proceeding with similar regulations in this country. In the interim, the Food and Drug Administration will monitor the use of nutrients listed in § 125.1(c) in infant formula products to make cer-

V 38-148 AUG 2 73 XUM

tain that they are safe and appropriate on the basis of a sound nutritional rationale.

Similarly, it is premature at this time to promulgate regulations setting definitive standards on the use of these nutrients in so-called "medical foods" represented solely for use under medical supervision to meet nutritional requirements in specific medical conditions. Pending promulgation of such regulations the Commissioner will continue a close surveillance of these products to prevent improper use of any nutrient listed in § 125.1(c).

The Commissioner is unable to anticipate exactly when such regulations will be promulgated. Accordingly, the restriction in § 125.1(c), that such ingredients may be used in those products only in accordance with specific regulations, is being held in abeyance until further notice.

10. Exceptions were received recommending the recognition of choline, inositol, selenium and chromium as appropriate for inclusion in certain foods for special dietary uses. The Commissioner has carefully reviewed the Hearing Record and the current state of scientific knowledge concerning these substances and their role in the human diet. The Commissioner reiterates that the Food and Drug Administration relies heavily on "Recommended Dietary Allowances." (Seventh Revised Ed., 1968), published by the National Academy of Sciences as a basic guide to the inclusion or exclusion of nutrient substances from regulations concerned with nutrient composition. (WD–3A–Sebrell Q&A 4) On the basis of the review and the present position of the National Academy of Sciences, the Commissioner concludes as follows:

There is now sufficient evidence of the essentiality of choline in the human for it to be appropriate to include choline in infant formulas, especially those designed for the premature, and in chemically defined diets to be used as the sole source of nutrition under the supervision of physicians to provide good nutrition to critically ill patients. Because any diet of general purpose food contains sufficient chloine, however, it is not appropriate to include choline in other forms of foods for special dietary uses.

There is insufficient evidence to show that inositol is an essential nutrient for humans, and it is therefore inappropriate for this substance to be included in foods for special dietary uses. There is also inadequate knowledge at this time to determine the essentiality of chromium, and therefore it is not appropriate to include chromium in foods for special dietary uses. The Food and Drug Administration will follow new scientific information on the nutritional role of inositol and chromium, and amend these regulations if they are shown to be essential.

The information on selenium is equivocal at this time. It has been clearly shown to be essential in animals and thus is widely regarded as also essential in humans, but there is as yet no evidence of a possible deficiency in man. Because there is presently no known justification for the addition of selenium to any type of food product the Commissioner has concluded that this ingredient should not be added to § 125.1(c) at this time.

The Commissioner therefore concludes that the paragraph 11 of the Proposed Findings of Fact should be amended by including the words "and choline" after the word "biotin" and that § 125.1(c) should be amended to include the word "choline" following the words "vitamin K".

11. Exceptions were filed concerning § 125.1(h) setting forth the need to clarify the meaning of the terms "product", "upper limit of the U.S. RDA", and "food represented for use solely under medical supervision." The Commissioner recognizes the need for clarification of this paragraph, and it is therefore reworded as follows: "Any product containing more than the upper limit of the U.S. RDA per serving or, where appropriate, per daily recommended quantity of a vitamin or mineral as specified in § 80.1(f)(1) is a drug, except for conventional foods which contain naturally occurring amounts in excess of these upper limits, and except for foods provided for in Part 125, such as infant formulas or foods which are represented for use solely to meet nutritional requirements in specific medical conditions."

12. Exceptions were also filed concerning § 125.1(h) stating that the Commissioner had exceeded his authority in classifying products containing a vitamin or mineral in excess of the upper limits of the U.S. RDA's as drugs. The basis for such exceptions was the claim that the term "drug" is defined by the Federal Food, Drug, and Cosmetic Act, which should be controlling in this matter. The Commissioner recognizes that the act is controlling, and, upon further review of the hearing record and the findings of fact for Parts 80 and 125, concludes that those products which contain vitamins or minerals in excess of the upper limits of the U.S. RDA's are in fact articles intended for use in the cure, mitigation, treatment, or prevention of disease in man and therefore, pursuant to the definition contained in 21 U.S.C. 321(g)(1)(B), are properly classified as drugs, with the exceptions noted above in Exception number 11. The hearing record discloses no known food or nutrition use of nutrients at such high levels, and no such uses were shown in the exceptions.

13. Exceptions were received stating that the agency has no authority to promulgate regulations which prohibit certain claims as provided for in § 125.2(b) (21 CFR 125.2). The Order Staying the Effective Date of the Regulations published in the FEDERAL REGISTER on December 14, 1966 (31 FR 15730), as well as the tentative final order published in the FEDERAL REGISTER on January 19, 1973 (38 FR 2149), as they pertained to § 125.2(b), relies on sections 201(n), 403(a), and 403(j) of the act for authority to prohibit false and misleading statements on foods represented to be for special dietary uses. The Commissioner has reviewed these exceptions and finds ample authority for these prohibitions in sections 201(n), 403(a) and 403(j).

14. Exceptions were received concerning the prohibition in § 125.2(b)(1) against labeling claims that the vitamin or mineral properties of a food are adequate or effective in the prevention or treatment of any disease or symptom. Some exceptions erroneously interpreted this as prohibiting virtually any discussion of nutritional usefulness of all vitamins and minerals.

The hearing record establishes and the Commissioner recognizes that all vitamins and minerals inherently assist in preventing nutrient deficiencies and thus, in that sense, prevent disease. The prohibition in no way prohibits truthful representation that a given nutrient is essential to human nutrition and good health and well-being. At the same time it must be recognized that explicit claims related to prevention or treatment of specific disease conditions render a product a drug under section 201(g)(1)(B) of the act. The statutory definitions of "food" and "drug" are not mutually exclusive in this respect.

This prohibition was required because the hearing record, as noted in paragraphs 29, 30, 32 and 35 of the Proposed Findings of Fact, demonstrated widespread promotional practices stating or implying that a vitamin or mineral should be consumed in order to prevent a specific disease. As evidenced by paragraph 35 of the Proposed Findings of Fact, it has been common practice to promote nutrients by stating that a deficiency of a particular vitamin or mineral leads to a specific disease, thus implying that a consumer who fails to purchase the product in question may suffer from that disease or that the vitamin or mineral in question will prevent that disease.

The Commissioner concludes that reliance upon scare promotional claims, designed to panic the public into believing that nutrient supplementation is necessary to prevent the onset of severe deficiency diseases, neither is supported by the Hearing Record nor fosters good nutritional practices. Informative labeling designed to educate the public about the need for basic nutrition planning, and to emphasize the importance of essential nutrients to good health, is truthful, supported by the Hearing Record, and encouraged by the agency. The Commissioner concludes that no change in § 125.2(b)(1) is warranted.

15. Exceptions were received objecting to § 125.2(b)(2), which prohibits the use of labeling claims suggesting that ordinary foods in the diet are inadequate to meet nutritional needs, as being contrary to the Hearing Examiner's findings. No evidence, except for testimony which related to specific segments of the population, such as that contained in paragraph 45 of the Proposed Findings of Fact, is contained in the Hearing Record to establish that a diet of ordinary foods cannot satisfy all nutrition needs.

Since the early 1940's, and continuing to the present time, certain labeling, promotion, advertising, and lay literature concerning dietary supplements of

vitamins and minerals and other foods offered for special dietary use based on their vitamin and/or mineral qualities has repeatedly represented that ordinary foods are incapable of supplying adequate amounts of vitamins and minerals to meet human needs. (Weissenberg, Tr. 6560–61, 6571–72, 6304, 6358, 6375, 6447–50, 6579). Individual case determinations have shown that the use of this theme in the labeling of foods for special dietary uses is false and misleading. (Exhibit P–670, 670(a), 671).

To clarify this issue, the Commissioner concludes that a Finding of Fact 46 should be added to the Findings of Fact for Part 125 as published on January 19, 1973 (38 FR 2145), to read as follows:

> Since the early 1940's, and continuing to the present time, certain labeling, promotion, advertising, and lay literature concerning dietary suppiments of vitamins and minerals and other foods offered for special dietary use based on their vitamin and/or mineral qualities has repeatedly represented that ordinary foods are incapable of supplying adequate amounts of vitamins and minerals to meet human needs. (Weissenberg, Tr. 6560–61, 6571–72, 6304, 6358, 6375, 6447–50, 6579). Individual case determinations have shown that the use of this theme in the labeling of foods for special dietary uses is false and misleading. (Exhibit P–670, 670(a), 671).

To further clarify this prohibition, the phrase "balanced diet" will be substituted for "diet", since it is obvious that an unbalanced or poor diet could be deficient in nutrients. The Commissioner concludes that § 125.2(b)(2) should be modified to read "That a balanced diet of ordinary foods cannot supply adequate amounts of nutrients".

16. Exceptions were received expressing concern that the labeling prohibitions in § 125.2(b)(3) and (4) would preclude factual supportable statements that certain losses may be due to improper handling or that certain products may be lower in nutrient content due to the soil upon which the food was grown. This is not the intent of these prohibitions, nor are they so worded. Any truthful claims, supported by adequate scientific data, relating to the specific nutrient value of a product will be permitted.

These prohibitions are intended to prohibit unsupported generalization that there is a general deficiency in the daily diet because of soil in which the food was grown, or transportation, or processing methods used in preparing food. These prohibitions are clearly supported by paragraphs 37, 39, 40, and 41 of the Proposed Findings of Fact.

For clarification purposes and uniformity, § 125.2(b)(4) is amended by substituting the phrase "the daily diet" for the word "diets".

17. Exceptions were received objecting to those provisions which prohibit the inclusion of certain ingredients in dietary supplements and other forms of foods for special dietary uses which have not been shown to be essential in human nutrition, such as rutin, other bioflavonoids, para-aminobenzoic acid, inositol and similar ingredients, products and compounds. No evidence was submitted to show that these ingredients are of nutritional value. This matter was discussed in detail in paragraph B of the proposed Conclusions of Law with respect to § 125.2 supported by paragraph 4 of the Proposed Findings of Fact in respect to Part 125 and paragraphs 8, 19, 21, and 32 of the Proposed Findings of Fact in respect to Part 80.

The Commissioner has carefully reconsidered the Hearing Record, and reiterates his conclusion that it is not nutritionally sound, and results in false or misleading labeling, to permit inclusion of these ingredients in dietary supplements or other forms of foods for special dietary uses. Such ingredients may properly be marketed as separate foods.

18. Exceptions were received stating that § 125.2(b)(5), concerning unacceptable labeling and marketing practices, requires clarification. The Commissioner concurs with the need for clarification of this paragraph. Therefore, the last sentence of § 125.2(b)(5) is replaced with the following:

> Ingredients or products of this type may be marketed as individual products or mixtures thereof: *Provided*, That the possibility of nutritional, dietary or therapeutic value is not stated or implied. Examples of false or misleading statements or implications are: (i) label statements to the effect that the products' need or usefulness in human nutrition has not been established; (ii) label statements which otherwise disclaim nutritional, dietary or therapeutic value. (paragraphs 3, 4 and 33 of the Proposed Findings of Fact)

19. Exceptions were received objecting to § 125.2(b)(6) which prohibits any suggestion that a natural vitamin is superior to a synthetic vitamin. The basis for such objection is the allegation that the consumer will know the source (natural or synthetic) of the vitamin.

This is not the intent of the prohibition nor is it so worded. A factual and true statement of the origin of a nutrient is permitted, and only a claim of superiority is prohibited. This prohibition was included because of widespread claims that nutrients of natural origin are superior to synthetic nutrients. Paragraphs 26 and 27 of the Proposed Findings of Fact clearly establish that there is no valid scientific evidence to support such claims of superiority. The required list of ingredients will also in all instances enable the consumer to determine the source of the nutrient. The Commissioner concludes that no changes are warranted.

20. Exceptions were received pointing out that there is a need to specify that a synthetic vitamin must be in a form equivalent to the naturally occurring compound. The Commissioner notes that within a family of compounds exhibiting a specific vitamin's activity, there may be differences in biological activity for equal weights of the various compounds. For the purpose of declaring potency of a vitamin in a uniform manner, the Commissioner concludes that it is necessary to express the potency in terms of the weight of a specific reference compound equivalent in biological activity to the amount of the vitamin form actually present in the product. Therefore a list of appropriate reference forms has been added as a new paragraph § 125.1(b)(2).

21. Exceptions were received objecting to paragraph 34 of the Proposed Findings of Fact which states that vitamin or mineral deficiencies are unrelated to the great majority of symptoms like tiredness, nervousness, and a rundown condition. The Commissioner has reviewed this finding of fact and the hearing record concerning this issue and concludes that the evidence clearly establishes that over the years there have been widespread promotional practices stating or implying that a vitamin or mineral should be consumed in order to prevent tiredness, nervousness, etc.

The Commissioner concludes that reliance upon promotional claims designed to induce the public into believing that nutrient fortification or supplementation will prevent such physical conditions, is neither supported by the hearing record nor fosters good nutritional practices. The Commissioner concludes that paragraph 34 of the Proposed Findings of Fact is fully supported by the record and therefore no change is warranted.

22. Exceptions were filed stating that the proposed regulations were invalid as the agency had failed to follow the requirements as set forth in 21 U.S.C. 371(e) for amending a regulation because no notice of proposal to revise the regulations was ever published prior to the order revising the regulations for foods for special dietary use published in the FEDERAL REGISTER on June 18, 1966 (31 FR 8521).

In the FEDERAL REGISTER on June 20, 1962, (27 FR 5815), under the heading "Food and Drug Administraton, (21 CFR Parts 1, 125), Dietary foods, Notice of Proposal to Revise Regulation," the Commissioner of Food and Drugs published a proposal to amend the regulations dealing with special dietary foods in general and dealing specifically with food supplements or dietary supplements. The Commissioner therefore finds no merit in the exception.

23. Several exceptions stated that the Hearing Examiner, David Harris, was improperly appointed because he was not assigned to the hearing in rotation from a designated group of Food and Drug Administration hearing examiners as required by the Administrative Procedures Act, 5 U.S.C. 3105. Further exceptions were expressed to the fact that he was appointed hearing examiner on April 2, 1968 and then sworn in as a hearing examiner on April 15, 1968.

Review of these exceptions reveals that in early 1967 it became apparent that the hearing on the regulations would take at least a year to complete because of the numerous parties involved. In view of the scope of the hearing and the matters to be covered therein, and in light of the fact that the Food and Drug Administration's only Hearing Examiner was otherwise engaged, it became apparent that another Hearing Examiner would be needed. Because the Civil Service Commission discouraged the borrowing of examiners from other agencies for hearings ex-

V 38-148 AUG 2 73 XUM

pected to exceed a period of six months, the Commission, pursuant to the Food and Drug Administration's request on June 6, 1967, certified a list of eligible candidates for the position. Of the seven recommended, four indicated that they were not interested in the appointment and one failed to respond. Following personal interviews with the two remaining candidates, David H. Harris was offered the position, which he accepted on February 23, 1968. On April 2, 1968, a Notice of Hearing and Prehearing Conference published in the FEDERAL REGISTER announced his designation as the Hearing Examiner for the dietary foods proceeding (33 FR 5268). Mr. Harris was formally sworn in on April 15, 1968. On May 4, 1968 a notice confirming that Mr. Harris had been appointed as a Food and Drug Hearing Examiner effective April 15, 1968, was published in the FEDERAL REGISTER (33 FR 6828).

During the prehearing conference which began on May 7, a motion to set aside Mr. Harris' assignment and designation was denied. A subsequent request that the motion be certified to the Commissioner was similarly denied.

This exception has been previously ruled on in the case of National Dietary Foods Assn. v. Cohen, 68 Civ. 2368 (S.D. N.Y. 1968), wherein the court said:

> Considering the increased caseload before the FDA, the scope of the present proceedings, the fact that FDA had only one Hearing Examiner, and the degree of discretion permissible under 5 U.S.C. 3105 regarding the selection process, it is the opinion of this Court that the FDA acted in consonance with the statutory mandate. To require the application of the mechanical rotation method where the agency employs but one examiner would not be at all "practicable".

The Commissioner, having reviewed the facts and the ruling of the court, is of the opinion that the Agency acted within the bounds of its statutory authority and that no prejudice or harm was suffered by any participant in the hearings.

24. Exceptions were filed stating that the rights of certain participants in the hearing were violated in that, following the termination of the government's case, the Hearing Examiner precluded cross-examination of the opponent witnesses by any other opponent unless a request in writing was filed stating the subject matter the party intended to go into on cross-examination. It is further asserted that the Hearing Examiner, as a matter of course, refused any further cross-examination from certain opponents, and that such denials were precipitated by pressure to speed up the hearing, exerted upon the Hearing Examiner by the Commissioner's Office and the General Counsel's Office.

The Commissioner recognizes that each participant in a hearing is entitled to a full and fair hearing and that such a hearing occurs when ample opportunity is afforded to all parties to make, by evidence and oral presentation, a sufficient record and to be heard in support of its issues. Boston & M.R.R. v. United States, 208 F. Supp. 661 (D.C. Mass., 1962), affirmed 371 U.S. 26 (1962).

The question of whether a hearing officer's actions are arbitrary, and thus constitute a denial of due process, depends upon the circumstances. Shachtman v. Dulles, 225 F.2d 938 (C.A. D.C., 1955). Determination of what cross-examination is necessary and proper is with the sound judicial discretion of the Hearing Examiner. N.L.R.B. v. Miami Coca-Cola Bottling Co., 360 F.2d 569 (C.A. 5, 1966).

The Commissioner, having reviewed the record, is of the opinion that the Hearing Examiner acted within the scope of discretion provided for in 5 U.S.C. 556 in restricting the cross-examination, in view of the fact thata each of the opponents was given the opportunity to present his views, and make a full and complete record, by whatever direct oral and written testimony he wished to present.

25. Exceptions were received stating that fresh fruits and vegetables should not be subject to the provisions of Part 125, as foods for special dietary use. The Commissioner agrees and has so stated in the preamble to the tentative order on nutrition labeling published in the FEDERAL REGISTER on January 19, 1973 (38 FR 2125) that it is inappropriate to label conventional general purpose foods such as fresh fruits and vegetables under Part 125. When a claim with respect to nutritional properties of such foods is included in labeling, the full nutrition labeling established in § 1.17 (21 CFR 1.17) must be utilized.

26. Exceptions were received stating that failure to include § 125.6, relating to low caloric foods, in the tentative orders of January 19, 1973, makes it difficult to plan labeling of such foods that would not be in conflict with Part 125 or §§ 1.17 and 1.18. The Commissioner recognizes the need to finalize regulations related to claims based upon the caloric content of food. Section 125.6 is presently under review, and the Commissioner intends to publish a tentative order later this year related to the issue of claims based upon the caloric content of a food, in the context of the proposals which were the subject of the Special Dietary Food Hearings.

27. Exceptions were received objecting to Proposed Findings of Fact in paragraphs 31, 35, 36, and 44 on the ground that these findings indicate the appropriate uses of therapeutic formulations of vitamins and minerals. The exceptions argued that the appropriate uses of therapeutic formulations should be determined during the course of the OTC drug review and not in this proceeding. The Commissioner has reviewed each of the Findings of Fact in question and concludes to change or modification is required. None of those findings relate to drug products. To clarify this issue, an additional finding of fact 47 will be added which provides that it is the intent of the Commissioner that the appropriate uses of therapeutic formulations of vitamins and minerals (i.e., those defined as a drug under § 125.1(h)), are to be determined during the course of the OTC drug review:

> These regulations interpret and apply sections 403(a) and (j), by prescribing requirements for label information necessary in order fully to inform purchasers of the value of foods for special dietary uses, and to prevent false or misleading labeling for foods. Neither the findings of fact nor the regulations relate to or affect vitamin-mineral products which are classified as "drugs". It is the intent of the Food and Drug Administration that the safety, effectiveness, and labeling of OTC vitamin-mineral drugs be determined through the separate OTC drug review for vitamin-mineral drugs as provided in 21 CFR 130.301. The OTC vitamin-mineral drug review panel will make its own independent inquiry on these matters.

28. Certain exceptions were filed to various findings of fact stating that said findings were improper interpretations of the hearing testimony and were otherwise contrary to the evidence presented in the Hearing Examiner's Findings of Fact. The Commissioner has reviewed the Findings of Fact and is of the opinion that, except where modified, they are a proper interpretation and application of the hearing testimony. The Commissioner further points out that it is the Agency's function, not the Examiner's, to develop findings of fact and make the ultimate selection, and where there is substantial evidence in the record, it is the agency's choice that governs. Greater Boston Television Corp. v. F.T.C. 444 F.2d 841, (C.A. D.C. 1970), cert. denied 403 U.S. 923 (1970).

29. A number of the exceptions and letters raised general questions about the Food and Drug Administration's overall policy on vitamin-mineral products. These general questions were also the subject of an inquiry from five members of Congress, the response to which has been reprinted in the Congressional Record of July 12, 1973 (119 Cong. Rec. S13214–S13220). In lieu of reiterating the lengthy discussion in that response, the Commissioner hereby incorporates it by reference and advises that it accurately reflects the basis for and his interpretation and application of these regulations.

Having considered the evidence received at the hearing, the hearing examiner's report, and all the exceptions and written arguments which were filed, the Commissioner, pursuant to the Federal Food, Drug, and Cosmetic Act (secs. 201(n), 401, 403(a) and (j), 701(a) and (e), 52 Stat. 1046, 1048, 1055, 1056, as amended by 70 Stat. 919; 21 U.S.C. 321(n), 341, 343(a) and (j), 371(a) and (e)) and under authority delegated to him (21 CFR 2.120), issues the following Findings of Fact, Conclusions, and Final Order:

FINDINGS OF FACT [1]

1. Since enactment, in 1941, of the currently effective regulations concerning foods for special dietary uses, the definition of special dietary use contained therein (21 CFR 1.11) has proved inadequate, in certain respects, to meet the needs of the Food and Drug Administration in its regulatory activity. (Swain, Tr. 115, 116, 125–127, 153–155, 168, 169)

2. The term "special dietary use," as applied to food including dietary supplements used by man, means a particular use for which a product purports or is represented to be used, including but not limited to the following uses:

(a) Supplying a special dietary need that exists by reason of a physical, physiological, or other condition, including but not limited to the conditions of convalescence, pregnancy, lactation, infancy, allergic hypersensitivity to food, underweight, overweight, diabetes mellitus, or the need to control the intake of sodium;

(b) Supplying a vitamin, mineral, or other dietary property for use by man to supplement his diet by increasing the total dietary intake.

(c) Supplying a special dietary need by reason of being a food for use as the sole item of the diet. (Mickelsen, Tr. 2508; WD–G–Ross, Q&A 55, 56; WD–G–Moses, Q&A 17–19)

3. To fully inform the purchaser of the product's value for such use, the label of a food for a special dietary use should bear a statement of usefulness consisting of a list of the dietary properties upon which the special use is based. (Grollman, Tr. 1766; Hodges, Tr. 2969–70; Mickelsen, Tr. 2518–19; WD–G–Moses, Q&A 33) Many dietary supplements include named ingredients which are of no value as supplements to the human diet. (Grollman, Tr. 1626, 1675–77, 1707, Exhibit P–125, Mickelsen, Tr. 2464–65, Exhibit P–172, 2469, Exhibit P–173, Hodges, Tr. 2933, Exhibit P–179, 2936, Exhibit P–180, Herbert, Tr. 9891, Exhibit P–113, 9899, Exhibit P–468, Swain, Tr. 185–191, 213, 220, 221, 223, 229–231, 255, 264, 269, 336, 397, 442, 447, 455, 469, 475, 476, 487, Weissenberg, Tr. 8761, 6402, 5949, Exhibit P–576, P–591) However, many consumers will purchase such products with long lists of ingredients, believing them to be of better value than products with a lesser number of ingredients. (WD–G–Perloff, Q&A 38–41; Exhibit P–1151, page B9). Such consumers believe that if an ingredient is listed, it must significantly contribute to the value of the product as a dietary supplement. (WD–G–Perloff, Q&A 18, 19; Exhibit P–737) The label of a dietary supplement, as a food for special dietary use, should bear a statement of usefulness consisting of a list of the nutrient ingredients which provide the special use characteristics. The list of such ingredients should be limited to those which are of significant value and need in human nutrition as components of dietary supplements. (Grollman, Tr. 1766; Hodges, Tr. 2969–2970; Mickelsen, Tr. 2518–2520; WD–G–Moses, Q&A 33; WD–C–Ross, Q&A 59–61)

4. It is scientifically inaccurate to list a dietary property of a food for special dietary use that is of no significance in human nutrition, and listing of dietary properties should be limited to ingredients of significant value and need in human nutrition. (WD–G–Ross, Q&A 59–61; Grollman, Tr. 1766; Mickelsen, Tr. 2518–19; Hodges, Tr. 2969–70)

5. In addition to statements on the container label of a food for special dietary use it is necessary to consider the label in its entire setting including statements made in the labeling, promotional material, and advertising for such food, to determine whether the label bears a statement concerning properties of the food which are of no significance in human nutition. (WD–G–Perloff, Q&A 10, 16, 17; WD–G–Swanson, Q&A 50; WD–G–Ross, Q&A 61; Section 201(n), FDCA)

6. The term "minimum daily requirement" was adopted by the Food and Drug Administration in 1940 as a means of fully informing consumers about vitamins and minerals in food for special dietary uses. (Boehne, Tr. 2702–03; Swain, Tr. 170) The term "minimum daily requirements," as it has been used since 1940, in the labeling and promotional material for foods with special dietary uses has led to some confusion among consumers. Consumers believe that the "minimum" requirements may be, or may nearly be, inadequate in terms of the nutrient content provided. (Boehne, Tr. 2704; Weissenberg, Tr. 5891, 7734, 8783; WD–G–Gullberg, Q&A 20; WD–G–Perloff, Q&A 35, 37; Exhibit P–737) The continued existence of the term "minimum daily requirement" has led to the production, promotion, and sale of a variety of dietary supplements, that contain large multiples of the minimum daily requirements for vitamins and minerals, and by far exceed the adequate human total daily dietary requirements for these nutrients. (Boehne, Tr. 2739; Grollman, Tr. 1682 (Exhibit P–84), 1685 (Exhibit P–85); Hodges, Tr. 2933–37 (Exhibit P–181), 2939–40; Herbert, Tr. 9898 (Exhibit P–232), 9899–9901 (Exhibit P–468); Mickelsen, Tr. 2448 (Exhibit P–167); Hodges, Tr. 2942 (Exhibit P–183); Swain, Tr. 171–175, 180–182; Weissenberg, Tr. 8760 (Exhibit P–575, P–583))

7. It will prove beneficial to consumers and simplify the task of consumer education to provide for use of the term "recommended daily allowance" (RDA) as a substitute for "minimum daily requirement" (MDR). (Sebrell, Tr. 26181; WD–G–Gullberg, Q&A 21)

8. The "Recommended Dietary Allowances," revised periodically by the Food and Nutrition Board of the National Research Council, National Academy of Sciences, represent established nutrient levels that are quantitatively high enough to provide for the adequate intake of essential nutrients under the wide variety of conditions that exist in this country for essentially all of the normal healthy persons in the United States. Furthermore, these levels are reviewed, discussed, and accepted by numerous scientists and, therefore, are considered to be extremely reliable. (Hodges, Tr. 2880, 2919, 2964–65; Grollman, Tr. 1670, 1763; Mickelsen, Tr. 2438–39; Herbert Tr. 9865–67; WD–G–Harrison, Q&A 23; Schweigert, Tr. 8257, 8260; WD–G–Gullberg, Q&A 19; Exhibit P–651; Sebrell, Tr. 26, 181)

9. Publication No. 1694 of the National Academy of Sciences entitled "Recommended Dietary Allowances, Seventh Revised Edition, 1968, A Report of the Food and Nutrition Board, National Research Council," and subsequent editions, should be used as the source of authentic and reliable information on which to base recommended daily allowances of nutrients. (WD–3A–Sebrell, Q&A 9, 10, 18, 19, Tr. 26181; Hodges, Tr. 2917; Herbert, Tr. 9865; WD–G–Harrison, Q&A 14, 23, 26, 27; WD–G–Ross, Q&A 65)

10. Recommended dietary allowances adapted from publication No. 1694 of the National Academy of Sciences are sufficiently above the average requirement for particular nutrients to cover the needs of between 95 percent and 99 percent of the normal healthy population. (Hodges, Tr. 7083; WD–46–Olsen, page 7, Tr. 29466–67; Jukes, Tr. 28688; Briggs, Tr. 28761; Mayer, Tr. 28865–66; Stokstad, Tr. 26742; Goodhart, Tr. 30169–70; Stare, Tr. 29280; WD–G–Ross P–5)

11. The essential vitamins are: Vitamins A, C (ascorbic acid), D, E, K, B_1 (thiamine), B_2 (riboflavin), niacin, vitamin B_6, folic acid (folacin), pantothenic acid, vitamin B_{12}, biotin, and choline. (WD–3A–Sebrell, Q&A 4; WD–G–Harrison, Q&A 20)

12. The essential mineral nutrients are: Calcium, chlorine, iron, magnesium, phosphorus, potassium, sodium, sulfur, copper, fluorine, iodine, manganese, and zinc. (WD–3A–Sebrell, Q&A 4)

13. The values for vitamins and minerals in the table entitled "Recommended Daily Dietary Allowances," in publication No. 1694 of the National Academy of Sciences, and values for essential nutrients derived from sections in the text when no values are given in the aforementioned table, may be used as a basis for fully informing the purchaser of the nutrient value of a food for special dietary use. A reasonable and scientifically accurate adaptation of the table and text referred to above reads as follows:

[1] The abbreviations in the citations are:
Tr.—For transcript pages of the hearing.
P.—For exhibits introduced by the Government, the proponent.
O.—For exhibits introduced by opponents.
WD–G—For written direct testimony by a witness for the Government.
WD–3A—For written direct testimony by a witness for the designated opponent (e.g., "3A").
Q. & A.—Question and answer.

V 38-148 AUG 2 73 XUM

Vitamins & minerals	Unit of measurement	Infants	Children under 4 years of age	Adults and children 4 or more years of age	Pregnant or lactating women
Vitamin A	International units.	1,500	2,500	5,000	8,000
Vitamin D	do	400	400	400	400
Vitamin E	do	5	10	30	30

Zinc	do	5	8	15	15

(WD-3A-Sebrell, Q&A 15; Lowe, Tr. 1256-70)

14. There are scientific and medical justifications for selecting an age separation at under 4 years of age for the purpose of establishing a basis for dietary supplements. (WD–33–Krehl, pages 5–8; WD–33–Emerson, pages 4–5; WD–43–Filer, page 21) The recommended daily dietary allowance of the Food and Nutrition Board, NAS–NRC, for 2- to 3-year olds can safely be used by infants and 1- to 2-year olds, and the maximum values for the under-4-years-old group can be used for all infants and children under 4 years of age. (WD–33–Krehl, pages 6–7; Tr. 2, 877–8, Hodges; WD–43–Graham; and WD–43–Filer, page 21)

15. There are demonstrable distinctions among the nutritional requirements of infants and young children, and pregnant or lactating women, as compared to the nutritional requirements of adults. (Michelsen, Tr. 2424–2427; Grollman, Tr. 1665; Hodges, Tr. 2877–2878; Herbert, Tr. 9944; WD–3A–Sebrell, Q&A 15, 16, 19, and 28; WD–G–Ross, Q&A 23, Boehne, Tr. 2741–2759)

16. The label of a food purported or represented to be for special dietary use by reason of its vitamin or mineral properties, should bear a statement revealing the proportion or percentage of the recommended daily allowance of the particular vitamins or minerals contained in a specified quantity of the product when consumed during a period of 1 day. This is both reasonable and necessary for an intelligent scientific evaluation of the article. (Herbert, Tr. 9944–5; Grollman, Tr. 1762; Hodges, Tr. 2964–6; WD–G–Ross, Q&A 63; Michelsen, Tr. 2635–7)

17. When a food is purported or represented to be for special dietary use because of certain vitamin or mineral properties, and is offered for use by more than one of the groups for which the recommended daily allowances for the vitamins and minerals are set, it then becomes necessary to state the percent or proportion of the recommended daily allowances for each group separately. (Herbert, Tr. 9945–6; WD–G–Gullberg, Q&A 17; Hodges, Tr. 2966–7)

18. It makes no difference from a scientific point of view when the proportion of the recommended daily allowance amounts to a whole number and a fraction, if the fraction is discarded. (Herbert, Tr. 9946)

19. The term "artificial sweetener" means a sweetening substance not used in normal metabolism as a source of calories. (WD–G–Levine, Q&A 75–77, 81; WD–G–Ricketts, Q&A 34–35, 39)

20. Occasionally, in the manufacturing of foods not intended for special dietary uses, it is possible to achieve certain food characteristics only through the use of an artificial sweetener as a constituent of the food. When this situation exists, it is reasonable to consider the use of the artificial sweetener in such a food not to be for the purpose of reducing or maintaining body weight, or for use in the diet of diabetics: *Provided*, That no label reference is made to the caloric reduction or presence of the artificial sweetener in the food, other than the simple listing of the artificial sweetener as an ingredient. (WD–G–Moses, Q&A 21, 23–31; WD–G–Levine, Q&A 213, 214)

21. For the purposes of dietary evaluation and nutritional characteristics an infant should be considered to be a person 12 months of age or less. (Mickelsen, Tr. 2511; Lowe, Tr. 12, 568–70)

22. The term "serving" means that reasonable quantity of food suitable for or practicable of consumption as a part of a meal by an adult male engaged in light physical activity, or by an infant or child when the article purports or is represented to be for infant feeding or child consumption. (WD–G–Dawson, Q&A 17–20; Mickelsen, Tr. 2514, Exhibit P–718, P–723; WD–G–Gullberg, Q&A 42, 43; WD–G–Ross, Q&A 57)

23. Among dietitians and nutritionists it is customary to describe quantities of foods in units of measure thought to be readily understood by consumers such as teaspoonfuls, tablespoonfuls, cupfuls, and slices. (WD–G–Dawson, Q&A 21; WD–G–Gullberg, Q&A 42; WD–G–Ross, Q&A 58; Mickelsen, Tr. 2514)

24. The standard measuring cup is 8 fluid ounces or approximately 240 milliliters. A tablespoonful is the equivalent of 3 teaspoonfuls, approximately one-half fluid ounce, or about 15 milliliters. A teaspoon holds one-sixth fluid ounce or about 5 milliliters. (WD–G–Dawson, Q&A 22–25; WD–G–Gullberg, Q&A 44–47, 49)

25. Persons suffering from diabetes mellitus are known as "diabetics." (WD–G–Ricketts, Q&A 85; WD–G–Levine, Q&A 171; Exhibit P–1082)

26. There is no nutritional difference between a vitamin provided by a synthetic source and the same vitamin provided by a natural source, but the natural source may contain other ingredients which may limit the absorbability of the vitamin provided by the natural source. (Herbert, Tr. 9937–38, 9984, 10050)

27. A large number of dietary supplements on our domestic market advertise or otherwise call attention to the claim that their ingredients are "natural" or derived from "natural sources." (Swain, Tr. 234–477; Weissenberg, Tr. 6554–56, 8757–58; Exhibit P–35, P–40–43, P–54, P–66–68, P–70, P–74)

28. More than half of the people in the United States are likely to choose foods for special dietary uses that contain ingredients described as "natural" or derived from "natural sources" in the belief that "natural" foods are superior to "synthetic foods." (P–1151, pages B10–11, Q 16, Q 16a, Q 16b; WD–G–Perloff, A 44, 45, 46, 49)

29. For a considerable time, the labeling, promotion, and advertising of various foods offered for special dietary uses have contained statements claiming or suggesting that these products were adequate or effective, by virtue of their vitamin or mineral content, for the treatment, prevention, or mitigation of a large variety of diseases and symptoms. (Swain, Tr. 153, 157–8, 192–3, 199–200, 212–3, 224–5, 239, 254, 255, 264–72, 276–7, 286, 288–9, 314, 352, 354–6, 379, 385, 394, 396, 443–6, 453, 469–71, 478, 487–9; Weissenberg, Tr. 5819, 5980, 6017, 6027, 6049, 6152, 6193, 6347, 6416, 6436, 6443, 6450)

30. There is no rationale for allowing or encouraging the promotion and sale of dietary supplements of vitamins and/or minerals to the general American population for the purpose of treating, preventing, or curing diseases or symptoms. To the contrary, there is ample reason to discourage such methods of promoting foods for special dietary use. (Grollman, Tr. 1771–2; Mickelsen, Tr. 2520; Schweigert, Tr. 8233–4; Herbert, Tr. 9961; WD–G–Ross, Q&A 62; Hodges, Tr. 2994–5; Thiessen, Tr. 26,755–6; Briggs, Tr. 28,750–1; Unglaub, Tr. 28,942–3; Wallerstein, Tr. 28,986–90; Mayer, Tr. 28,868, 28,892–8; Gershoff, Tr. 29,108–9)

31. Lay persons are incapable of determining, by themselves, whether they have, or are likely to develop, vitamin or mineral deficiencies. (Grollman, Tr. 1771–2, 1782; Herbert, Tr. 9961, 9979–80, 10,029; Unglaub, Tr. 28,942; Wallerstein, Tr. 28,989; Hodges, Tr. 2994–5; Mickelsen, Tr. 2520; Mayer, Tr. 28,892–3)

32. Since there are persons in the United States who are receptive to the suggestions that human ailments, to a great degree, can be prevented, treated, and cured by using vitamins and minerals, it is clear that representations or suggestions that certain symptoms, ailments, or diseases result from failure to ingest adequate amounts of vitamins and minerals will lead substantial numbers of the population to conclude that they must buy dietary supplements or other foods promoted for their vitamin or mineral qualities in order to prevent, cure, or treat certain diseases or symptoms. (WD–G–Perloff, Q&A 23–5; Weissenberg, Tr. 7738–9, 8474–7; WD–G–Gullberg; Q&A 14)

33. Literally true and scientifically accurate statements concerning the ultimate physiological result of vitamin or mineral deficiencies can mislead when made in connection with foods offered for special dietary use based upon their vitamin or mineral content. (Mayer, Tr. 28892–3; Gershoff, Tr. 29120)

34. Vitamin or mineral deficiencies are unrelated to the great majority of symptoms like tiredness, nervousness, and rundown condition. (Herbert, Tr. 10029)

35. When consumers read a label, promotional material, or advertising wherein a literally true statement is made, e.g., "Night blindness is caused by a lack of vitamin A," they may frequently conclude that the symptom will appear in them unless they use the product being promoted, or, on the basis that, even though they may not suffer from the specific symptoms described, the product will be generally good for improving their vision. (WD–G–Perloff, Q&A 30–31)

36. Vitamin and mineral deficiency are considered to be abnormal conditions resulting from inadequate consumption, absorption, transport, or utilization of one or more essential vitamins or minerals. The conditions are characterized by specific clinical signs, symptoms, and/or abnormalities observed in biochemical tests, and used together by physicians to establish the diagnosis. The term "subclinical" and similar ill-defined terms when used to refer to vitamin or mineral deficiencies, in the labeling of foods for special dietary use, are neither informative nor meaningful to consumers. (Mickelsen, Tr. 2537–9; WD–G–Schaefer, Q&A 23, 32–7; Herbert, Tr. 9880–5, 9984–5; Hodges, Tr. 2993–4, 3025; Grollman, Tr. 2023, 2252)

37. Scientifically it is inaccurate to state that the quality of soil in the United States causes abnormally low concentrations of vitamins or minerals in the food supply produced in this country. (Allaway, Tr. 12, 109; Herbert, Tr. 10,003)

38. There is no relationship between the vitamin content of foods and the chemical composition of the soil in which they are grown. (Allaway, Tr. 12,061, 10–063; Mickelsen, Tr. 2620)

39. Mineral nutrients in foods are not significantly affected by storage, transportation, cooking, and other processing. (Schweigert, Tr. 8200, 8223–4; Mickelsen, Tr. 2621)

40. While some vitamins are susceptible to partial destruction through the effects of heat, light, oxidation, and other physical and chemical reactions (Schweigert, Tr. 8200–8223), loss of nutrients from the ordinary effects of cooking, processing, transportation, and storage have not significantly impaired the nutritional qualities of food in the United States. There is no need or scientific justification for recommending, for example, the routine use of dietary supplements of vitamins and minerals to offset losses that occur as a result of these processes. (Schweigert, Tr. 8227–8, 8231; Mickelsen, Tr. 2527, 2642; Herbert, Tr. 9869–70)

41. It is reasonable to prohibit representation or suggestions in labeling, promotional material, or advertising of foods offered for special dietary use based on vitamin and mineral qualities, that imply that a dietary deficiency of vitamins or minerals exists or is threatened in the United States by virtue of loss of nutrients which occur from processing, transportation, storage, and cooking. (Schweigert, Tr. 8233–4)

42. Table salt has been fortified with iodine in the United States for many years. The usual level of fortification with potassium iodide is 0.01 percent by weight, which is equivalent to 0.0076 percent iodine (or about 0.01 percent iodine). This is commonly known as iodized salt. (Boehne, Tr. 2777–8; Herbert, Tr. 9948)

43. There is no necessity for iodized salt to contain on its label a statement of the percent or proportion of the recommended daily allowance for iodine provided in a specified serving, particularly since there is no specific serving size for salt and it is used in widely varying quantities. (Herbert, Tr. 9948; WD–G–Dawson, Q&A 29)

44. The use of dietary supplements of vitamins and minerals to ensure against a specific inadequacy of intake of these nutrients is a function clearly distinguished from the use of vitamin and mineral preparations for therapeutic purposes by the administration of large amounts of specific nutrients for the correction of disorders in humans, and the same product should not be used for both functions. (Grollman, Tr. 1680–82; Herbert, Tr. 9896; Hodges, Tr. 2937–40, 2970–71; WD–G–Harrison, Q&A 22; WD–3A–Sebrell, Q&A 44; WD–G–Schaefer, Q&A 36, 37).

45. It is often impractical to supply the iron needs of adult women with conventional foods, and iron supplementation is often advisable. (WD–3A–Sebrell, p. 17, Tr. 26088–89; Hodges, Tr. 3068–69; WD–46–Olson, pp. 10–11; WD–46–Wallerstein, pp. 12–13; WD–46–White, pp. 13–14; WD–46–Schwartz, pp. 6–7; WD–46–Margen, p. 7, Tr. 28713–14; Exhibit P–651, p. 59). Many women of childbearing age, particularly including those who are pregnant, ingest inadequate amounts of iron in the diets which they consume (WD–46–Mayer, pp. 14–17; Hodges, Tr. 6738; WD–65–Vitale, p. 5, Tr. 31914; WD–46–Unglaub, p-30; WD–46–Schwartz, pp. 6–10; WD–46–Wallerstein, pp. 9, 11–12, Tr. 28976; WD–46–Olson, p. 11; WD–46–Margen, p. 10; Goodhart, Tr. 30179; WD–46–Briggs, p. 27; WD–46–White, pp. 12–14; Krehl, Tr. 27218–19; Exhibit P–651, pp. 58–59). The iron intake of many adolescent girls and menstruating women is 10 milligrams or less each day. This value is consistent with the 1,500 to 2,000 calorie diet of sedentary women. In addition, the iron requirements of infancy and of the latter half of pregnancy are clearly in excess of what may be obtained from a conventional unfortified diet. (Exhibit 0–612–46, pp. 120–121).

46. Since the early 1940's, and continuing to the present time, certain labeling, promotion, advertising, and lay literature concerning dietary supplements of vitamins and minerals and other foods offered for special dietary uses based on their vitamin and/or mineral qualities has repeatedly represented that ordinary foods are incapable of supplying adequate amounts of vitamins and minerals to meet human needs. (Weissenberg, Tr. 6560–61, 6571–72, 6304, 6358, 6375, 6447–50, 6579) Individual case determinations have shown that the use of this theme in the labeling of foods for special dietary uses is false and misleading. (Exhibit P–670, 670(a), 671)

47. These regulations interpret and apply sections 403 (a) and (j), by prescribing requirements for label information necessary in order fully to inform purchasers of the value of foods for special dietary uses, and to prevent false or misleading labeling for foods. Neither the findings of fact nor the regulations relate to or affect vitamin-mineral products which are classified as "drugs". It is the intent of the Food and Drug Administration that the safety, effectiveness, and labeling of OTC vitamin-mineral drugs be determined through the separate OTC drug review for vitamin-mineral drugs as provided in 21 CFR 130.301. The OTC vitamin-mineral drug review will make its own independent inquiry on these matters.

CONCLUSIONS OF LAW

A. With respect to § 125.1 *Definitions and interpretations of terms:*

The Commissioner has carefully reviewed the history of the "special dietary" designation for foods to which nutrients have been added. At the time the original regulations relating to "special dietary" foods were being developed, it appeared reasonable, on the basis of nutrition knowledge, to classify fortified foods as special, and to require labeling under 21 CFR Part 125. Over the years the science of nutrition has moved forward, and the general requirement for nutrients, on a daily basis, have been better established. In addition, foods of all kinds are recognized as the preferred source of nutrients. The majority of those foods categorized as "special dietary foods" in the past for purposes of requiring nutrient labeling are in fact intended for consumption by the general population as conventional foods.

The development of general nutrition labeling regulations, available for use on all foods, has become of primary concern to all consumers, because of the ever increasing complexity of the conventional food supply. The use of the special dietary labeling under 21 CFR Part 125 for conventional foods with added nutrients can no longer be considered adequate to provide the consumer with a complete understanding of proper use of such foods in the diet. The Commissioner has, therefore, established that nutrition labeling (21 CFR 1.17) is the

V 38-148 AUG 2 73 XUM

required form of labeling for foods with added nutrients, or for which the manufacturer makes nutritional claims or provides nutrition information on the label or in the labeling or advertising.

It is recognized that high levels of nutrient additions may occur for which labeling for special dietary uses is appropriate. Thus, a relationship between nutrition labeling (21 CFR 1.17) and the standard of identity for dietary supplements (21 CFR 80.1) has been established, providing that food with nutrients added up to levels of 50 percent of the U.S. Recommended Daily Allowance (U.S. RDA) will be labeled under 21 CFR 1.17, and that food with nutrients added at levels between 50 percent and 150 percent of the U.S. RDA or greater will be subject to the provisions of 21 CFR 80.1 and labeled under 21 CFR 1.17.

Within 4 broadly defined groups (infants, children under 4 years of age, adults and children 4 or more years of age, and pregnant or lactating women) values can be selected from the almost 390 RDA values, as well as information on the needs of each group for 4 nutrients for which there are no RDA's. In order to provide the consumer meaningful labeling it is necessary to provide a single level of RDA values for each of the above groups.

Selection of reasonable values for labeling purposes was done primarily by choosing the highest RDA value for each of the three groups. This was done so that the needs of all individuals in the age group would be included, recognizing that the needs of many would be surpassed by the selected value. Since there is no danger to health inherent in this approach, and it does not significantly affect the traditional concept of teaching consumers about the nutrient contribution of specific foods, the selection which is made is reasonable for the purpose stated.

The Commissioner realizes that legal challenge may be brought against the new approach to nutrition labeling in 21 CFR 1.17. If 21 CFR 1.17 is found invalid for any reason it will be necessary to resume the labeling of foods with added nutrients, or for which nutritional claims are made, under 21 CFR Part 125. The Commissioner is therefore keeping the record on this portion of the hearing open, for this limited purpose, in the event that it becomes necessary to amend this final order or to issue a supplemental final order to provide for labeling of this type pursuant to 21 CFR Part 125 in lieu of 21 CFR 1.17.

Accordingly, the Commissioner concludes, based on the foregoing statement in conjunction with the findings of facts herein published, that:

1. It is reasonable and necessary, in order to fully inform purchasers of the value of foods for special dietary uses, to define "special dietary use" as set forth in § 125.1(a).

2. It is reasonable and necessary, in order to fully inform purchasers of the value of foods for special dietary uses, to establish "recommended daily allowances" for essential nutrients as set forth in § 125.1(b).

3. The "recommended daily allowances" as set forth in § 125.1(b) are reasonable.

4. The definition of "artificial sweetener," as set forth in § 125.1(c), is reasonable.

B. With respect to § 125.2 *General label statements; dietary properties; value; placement:*

Over the years there have been a number of ingredients or products marketed as nutrients and nutritional supplements, which have not been shown to be essential in human nutrition. This point was discussed in considerable detail during the 1968-70 special dietary hearings held by the Food and Drug Administration. Among ingredients or products of this type are rutin, other bioflavonoids, paraaminobenzoic acid, inositol, and similar ingredients, products, and compounds. These ingredients or products have frequently been combined with vitamins and minerals or otherwise represented as a type of nutritional supplement. In these situations there is a false representation that these ingredients or products have nutritional value. The Commissioner has concluded that ingredients or products of this type may not properly make direct or implied nutritional claims, and that in no instances can these be represented in any way that suggests a nutritional value. Combining these products with added vitamins and/or minerals in any food, or adding these ingredients to any food for which nutrition labeling is used, or calling attention to these products in any manner which would be considered to imply some nutritional benefit, is inherently misleading. See, e.g., United States v. Vitasafe, 226 F. Supp. 266 (D.N.J. 1964), aff'd 345 F. 2d 864 (3d Cir. 1965), cert. denied 382 U.S. 918 (1965); United States v. Nuclomin, No. 71 C 585 (E.D. Mo. 1972), aff'd No. 72-1626 (8th Cir. 1973).

Labeling of such ingredients or products may not state that their usefulness in human nutrition has not been established, or otherwise disclaim dietary or therapeutic value, since such statements are also misleading and fail to correct an otherwise false or misleading statement or implication. See, e.g., the Vitasafe and Nuclomin cases; United States v. 47 Bottles, . . Jenasol RJ Formula, 320 F.2d 564 (3d Cir. 1963), cert. denied 375 U.S. 953 (1963); United States v. Millpox, Inc., 313 F.2d 152 (7th Cir. 1963), cert. denied 373 U.S. 903 (1963); United States v. 3 Cartons . . . No. 26 Formula GM, 132 F. Supp. 569 (S.D. Cal. 1952); United States v. Nutrition Service, Inc., 227 F. Supp. 375 (W.D. Pa. 1964), aff'd 347 F.2d 233 (3d Cir. 1965). The Commissioner recognizes that there are individuals who desire to purchase ingredients or products of this type for various reasons. These individuals have a right to obtain these ingredients or products as long as they are truthfully labeled. Thus, ingredients or products of this type may properly be marketed as individual ingredients, or products, or mixtures thereof, provided no nutritional or dietary supplement claims are made.

Accordingly, the Commissioner further concludes, based on the foregoing statement in conjunction with the finding of facts herein published, that it is reasonable and necessary, in order to fully inform purchasers of the value of foods for special dietary uses, to require that the labels of such foods bear a statement as required and limited by § 125.2 as set forth in this final order.

C. With respect to § 125.3 *Label statements relating to vitamins and minerals:*

With the development of nutrition labeling (21 CFR 1.17) the use of special dietary labeling under 21 CFR Part 125 will be for all practical purposes limited to those articles which purport or are represented to supply a special dietary need that exists by reason of a physical or physiological condition, food represented for use as the sole item of the daily diet, and dietary supplements as provided for in 21 CFR 80.1.

The Commissioner recognizes there are foods which by their nature may contain nutrients in excess of 100 percent of the U.S. RDA per serving or reasonable daily intake. The Commissioner further recognizes the need for reasonable ranges for individual nutrients in dietary supplements above and below the U.S. RDA. The Commissioner further recognizes that departures from the U.S. RDA are appropriate for certain types or classes of foods for special dietary uses, e.g., chemically defined diets used to provide sound nutrition to critically ill patients.

Accordingly, the Commissioner concludes, having considered the findings of fact and other relevant information, that it is reasonable and necessary, in order to fully inform purchasers of the value of foods for special dietary uses, to require that the labels of such foods, by reason of their vitamin or mineral content, bear a statement of the percentages of the recommended daily allowances for such vitamins and minerals. Nutrition labeling under 21 CFR 1.17 is not sufficiently precise for these special types of food.

FINAL ORDER

Therefore, on the basis of the foregoing findings of fact and conclusions of law drawn therefrom: *It is ordered*, That the stay of effective date of §§ 125.1 through 125.3, promulgated December 14, 1966 (31 FR 15730), be ended, and that Parts 1, 3, and 125 of Title 21 of the Code of Federal Regulations be amended as follows:

PART 1—REGULATIONS FOR THE ENFORCEMENT OF THE FEDERAL FOOD, DRUG, AND COSMETIC ACT AND THE FAIR PACKAGING AND LABELING ACT

§ 1.11 [Revoked]

1. The provisions of § 1.11 *Special dietary uses* are hereby revoked.

PART 3—STATEMENTS OF GENERAL POLICY OR INTERPRETATION

§ 3.9 [Revoked]

2. The provisions of § 3.9 *Label declaration of vitamin E in food for special dietary use* is hereby revoked.

§ 3.32 [Revoked]

3. The provisions of § 3.32 *Label declaration of vitamin B_{12} and folic acid in food for special dietary uses* is hereby revoked.

§ 3.46 [Revoked]

4. The provisions of § 3.46 *Interpretations of orders relating to dietary supplements; vitamin and mineral-fortified foods; foods for special dietary use* are hereby revoked.

PART 125—LABEL STATEMENTS CONCERNING DIETARY PROPERTIES OF FOOD PURPORTING TO BE OR REPRESENTED FOR SPECIAL DIETARY USES

5. The provisions of §§ 125.1, 125.2, and 125.3 are revised to read as follows:

§ 125.1 Definitions and interpretations of terms.

The definitions and interpretations of terms contained in section 201 of the Federal Food, Drug, and Cosmetic Act shall be applicable with the following additions:

(a) The term "special dietary use" as applied to food (including dietary supplements) used by man means a particular use for which an article purports or is represented to be used, including but not limited to the following:

(1) Supply a special dietary need that exists by reason of a physical, physiological, or other condition, including but not limited to the conditions of convalescence, pregnancy, lactation, infancy, allergic hypersensitivity to food, underweight, overweight, diabetes mellitus, or the need to control the intake of sodium. The use of an artificial sweetener in a food, except when specifically and solely used for achieving a physical characteristic in the food which cannot be achieved with sugar or other nutritive sweetener, shall be considered a use for regulation of the intake of calories and available carbohydrate, or for use in the diets of diabetics.

(2) Supplying a vitamin, mineral, or other dietary property for use by man to supplement his diet by increasing the total dietary intake, except for foods for which nutrition labeling is used as required pursuant to § 1.17 of this chapter.

(3) Supplying a special dietary need by reason of being a food for use as the sole item of the diet.

(b) The term "U.S. Recommended Daily Allowance (U.S. RDA)" means the following daily amounts of the following vitamins and minerals:

Vitamins & minerals	Unit of measurement	Infants	Children under 4 years of age	Adults and children 4 or more years of age	Pregnant or lactating women
Vitamin A	International units.	1,500	2,500	5,000	8,000
Vitamin D	do	400	400	400	400
Vitamin E	do	5	10	30	30
Vitamin C	Milligrams	35	40	60	60
Folic acid	do	0.1	0.2	0.4	0.8
Thiamine	do	0.5	0.7	1.5	1.7
Riboflavin	do	0.6	0.8	1.7	2.0
Niacin	do	8	9	20	20
Vitamin B_6	do	0.4	0.7	2.0	2.5
Vitamin B_{12}	Micrograms	2	3	6	8
Biotin	Milligrams	0.15	0.15	0.30	0.30
Pantothenic acid	do	3	5	10	10
Calcium	Grams	0.6	0.8	1.0	1.3
Phosphorus	do	0.5	0.8	1.0	1.3
Iodine	Micrograms	45	70	150	150
Iron	Milligrams	15	10	18	18
Magnesium	do	70	200	400	450
Copper	do	0.6	1.0	2.0	2.0
Zinc	do	5	8	15	15

[1] The following synonyms may be added in parentheses immediately following the name of the vitamin:

Vitamin	*Synonym*
Vitamin C	Ascorbic acid
Folic acid	Folacin
Riboflavin	Vitamin B_2
Thiamine	Vitamin B_1

(1) The U.S. Recommended Daily Allowances (U.S. RDA's) have been derived by the Food and Drug Administration from "Recommended Dietary Allowances", published by the Food and Nutrition Board, National Academy of Sciences-National Research Council, and are subject to amendment when new authentic and reliable information on human nutrient needs appears in new editions of the above publication.

(2) For determining the percentage of the U.S. RDA's of vitamins in a quantity of food, as required in § 125.3(a), the quantitative content of the following vitamins shall be calculated in terms of the following chemically identifiable reference forms:

REFERENCE FORM

Vitamin	Name	Empirical formula	Molecular weight
Vitamin C	*L*-Ascorbic acid	$C_6H_8O_6$	176.12
Folic acid	Pteroyl mono-*L*-glutamic acid	$C_{19}H_{19}N_7O_6$	441.41
Niacin	Nicotinic acid	$C_6H_5NO_2$	123.11
Riboflavin	Riboflavin	$C_{17}H_{20}N_4O_6$	376.37
Thiamine	Thiamine chloride hydrochloride	$C_{12}H_{17}ClN_4OS.HCl$	337.28
Vitamin B_6	Pyridoxine	$C_8H_{11}NO_3$	169.18
Vitamin B_{12}	Cyanocobalamin	$C_{63}H_{88}CoN_{14}O_{14}P$	1,355.40
Biotin	*D*-Biotin	$C_{10}H_{16}N_2O_3S$	244.31
Pantothenic acid	*D*-Pantothenic acid	$C_9H_{17}NO_5$	219.23

(c) In addition to the vitamins and minerals listed in paragraph (b) of this section, vitamin K, choline, and the minerals chlorine, potassium, sodium, sulfur, fluorine, and manganese are recognized as essential in human nutrition, but no U.S. Recommended Daily Allowance (U.S. RDA) has been established for these nutrients. These nutrients are not appropriate for addition to general purpose foods or dietary supplements of vitamins and minerals but may be added to such other foods for special dietary use as infant formulas, and foods represented for use solely under medical supervision to meet nutritional requirements in specific medical conditions.

(d) The term "artifical sweetener" means a sweetening substance not used in normal metabolism as a source of calories.

(e) The term "infant" means a person not more than 12 months of age.

(f) The term "serving" means that reasonable quantity of food suited for or practicable of consumption as part of a meal either by an adult male engaged in light physical activity, or by an infant or child when the article purports or is represented to be for infant feeding or child consumption. A label statement regarding a serving, as used in this part, shall be in terms of a convenient unit of such food or a convenient unit of measure that can be readily understood by purchasers of such food, e.g., a serving may be expresed in terms of slices, cookies, or wafers, or in terms of ounces, fluid ounces, teaspoonfuls, tablespoonfuls, or cupfuls. A teaspoonful shall be considered to mean 5 milliliters (approximately $\frac{1}{6}$ fluid ounce) in volume; a tablespoonful shall be considered to mean 15 milliliters (approximately $\frac{1}{2}$ fluid ounce) in volume; and a cupful shall be considered to mean 240 milliliters (approximately 8 fluid ounces) in volume.

(g) The term "diabetic" means a person having diabetes mellitus.

(h) Any product containing more than the upper limit of the U.S. RDA per serving (or, where appropriate, per daily recommended quantity) of a vitamin or mineral as specified in § 80.1(f)(1)(i) of

V 38-148 AUG 2 73 XUM

this chapter is a drug, except for conventional foods which contain naturally-occurring amounts in excess of these limits or which contain added amounts in excess of these limits pursuant to § 1.8 (e) of this chapter so that it is not nutritionally inferior to the food for which it substitutes and which it resembles, and except as provided for in a specific regulation for such special dietary foods as infant formulas or foods which are represented for use solely under medical supervision to meet nutritional requirements in specific medical conditions.

§ 125.2 General label statements; dietary properties; value; placement.

(a) If a food purports or is represented to be for any special dietary use, covered by other regulations, the principal display panel of its label shall bear a conspicuous statement of the usefulness of the food, limited to a listing of the dietary properties upon which such use is based: *Provided, however*, That if insufficient space is available on the principal display panel, the information panel may be used (21 CFR 1.8d), if such use is consistent with § 1.9 of this chapter. Such statement shall show the presence or absence of any substance, any alteration of the quantity or character of any constituent, and any other special dietary property of such food upon which such use is based.

(b) A food which purports or is represented to be a food for special dietary use shall be deemed to be misbranded under sections 201(n), and 403(a) and (j) of the act (21 U.S.C. 321(n), 343(a) and (j)), if its labeling bears any statement, vignette, or other printed graphic matter that represents, suggests or implies:

(1) That the food, because of the presence or absence of certain vitamins and/or minerals, is adequate or effective in the prevention, cure, mitigation, or treatment of any disease or symptom, except that the label may state that the food is a source of an essential nutrient and that this nutrient is important for good nutrition and health, and except that this provision shall not apply to foods represented for use solely under medical supervision in the dietary management of specific diseases and disorders.

(2) That a balanced diet of ordinary foods cannot supply adequate amounts of nutrients.

(3) That the lack of optimum quality of a food, by reason of the soil on which that food is grown, is or may be responsible for an inadequacy or deficiency in the quality of the daily diet.

(4) That the storage, transportation, processing, or cooking of a food is or may be responsible for an inadequacy or deficiency in the quality of the daily diet.

(5) That the food has dietary properties when such properties are of no significant value or need in human nutrition. Ingredients or products such as rutin, other bioflavonoids, para-aminobenzoic acid, inositol, and similar substances which have in the past been represented as having nutritional properties but which have not been shown to be essential to human nutrition may not be combined with vitamins and/or minerals, added to food labeled in accordance with this section, or otherwise used or represented in any way which states or implies nutritional benefit. Ingredients or products of this type may be marketed as individual products or mixtures thereof: *Provided*, That the possibility of nutritional, dietary or therapeutic value is not stated or implied. Examples of false or misleading statements or implications are:

(i) Label statments to the effect that their need or usefulness in human nutrition has not been established.

(ii) Label statements which otherwise disclaim nutritional, dietary or therapeutic value.

(6) That a natural vitamin in a food is superior to an added or synthetic vitamin, or that there is a difference between vitamins naturally present and those that have been added.

§ 125.3 Label statements relating to vitamins and minerals.

(a) If a food purports or is represented to be for special dietary use because of vitamin or mineral properties, the label shall bear a statement of the percentage of the U.S. RDA of such vitamins and minerals, as set forth in § 125.1(b), supplied by such food when consumed in a specified quantity during a period of 1 day. The quantity specified shall be a reasonable quantity suitable for and practicable of consumption within 1 day. The order in which the nutrients appear on the label shall be in the order listed in § 125.1(b), except when other regulations indicate otherwise. Immediately preceding the declaration of vitamin and mineral content, the following heading shall be stated, "Percentage of U.S. Recommended Daily Allowances (U.S. RDA)". If such purported or represented special dietary use is for persons within one or more groups for which the recommended daily allowance is set, such statement shall include the percentage for each age group. When such proportion or percentage is a whole number and a fraction or a whole number and a decimal, it shall be expressed as the whole number disregarding the fraction or decimal. The total quantity of vitamins or minerals in a food shall be no less than the amount declared, and no more than a reasonable amount above the declared quantity. Reasonable variations caused by heat, light, oxidation, storage, transportation, or unavoidable deviations in good manufacturing practice are recognized.

(b) The requirements of this section shall not apply to iodized salt, when the declared content of the iodine compound in the salt is equivalent to 0.01 percent by weight iodine.

Effective date. Labeling may be changed to comply with this regulation beginning on August 2, 1973. All labeling ordered after December 31, 1973, and all labeling used on products shipped in interstate commerce after December 31, 1974, shall comply with this regulation; *Provided*, That infant formulas and foods represented for use solely under medical supervision to meet nutritional requirements in specific medical conditions shall not be subject to § 125.1(c) until a further FEDERAL REGISTER order so provides.

(Secs. 201(n), 401, 403(a) and (j), 701(a) and (e), 52 Stat. 1046, 1048, 1055, 1056, as amended by 70 Stat. 919; 21 U.S.C. 321(n), 341, 343(a) and (j), 371(a) and (e))

Dated: July 25, 1973.

A. M. SCHMIDT,
Commissioner of Food and Drugs.

[FR Doc.73-15690 Filed 8-1-73;8:45 am]

PART 1—REGULATIONS FOR THE ENFORCEMENT OF THE FEDERAL FOOD, DRUG, AND COSMETIC ACT AND THE FAIR PACKAGING AND LABELING ACT

PART 3—STATEMENTS OF GENERAL POLICY OR INTERPRETATION

Food Labeling; Spices, Flavorings, Colorings and Chemical Preservatives

In the FEDERAL REGISTER of January 19, 1973 (38 FR 2139), the Commissioner of Food and Drugs published a proposal to revoke §§ 3.10, 3.23(b), and 3.201 (21 CFR 3.10, 3.23(b), and 3.201) and to amend § 1.12 (21 CFR 1.12). Fifty-seven comments were received from industry, trade associations, consumer and professional groups, individual consumers and government agencies (Federal and city). One consumer and two trade associations agreed with the proposal in its entirety. Other comments suggested modifications or requested clarification. The points raised and the Commissioner's responses are as follows:

1. One comment requested clarification about the relationship between the proposal and the standard of identity for soda water (21 CFR 31.1). Another comment suggested that the regulation should apply to the labeling of ice cream, since it improves upon the flavor labeling provisions in the standard of identity for that food (21 CFR 20.1(g)(2)).

The Commissioner advises that this regulation will apply to all foods, including standardized foods. The Commissioner intends to propose revisions in all standards with different flavor labeling requirements to incorporate the provisions of this regulation. In the interim, all standardized foods with different labeling provisions may voluntarily be labeled to conform to the labeling requirements of § 1.12.

2. Several comments were received requesting modification of the definition for "artificial flavor" or "artificial flavoring:"

(a) Eggs and dairy products should be considered sources of natural flavors.

(b) One comment stated that under the present wording a chemical derivative of one of the materials listed could be used to imitate natural vanilla without being considered artificial and suggested that the definition be amended as follows: "* * * derived from the spice * * * or poultry it seeks to imitate." Another comment proposed that the definition should be modified to exclude substances

listed under §§ 121.101(g) and 121.1164 (b) (21 CFR 121.101 and 121.1164) since some of these substances are "natural" as defined in § 1.12(a)(3).

(c) It was suggested that the definition provide a classification of synthesized "nature-identical" flavors and that such a classification also be included in § 1.12(g)(4). It was further suggested that such action would be consistent with the Food and Drug Administration's practice of equating synthetic and natural vitamins.

The Commissioner agrees that eggs and dairy products are properly considered a source of natural flavor, and the definitions of artificial and natural flavor are amended accordingly. The Commissioner does not agree that the definition of artificial flavor should be expanded to include flavors derived from natural sources but used to simulate foods other than their source. Such flavors, derived from natural sources, are properly identified as natural flavors in a list of ingredients. The term "artificial" connotes a synthetic source. However, labeling concerning the presence of such natural flavor in a food cannot be misleading to the consumer. When a natural flavor is used in a food product to simulate a flavor of a food, other than the one from which the flavor is derived, the food to which the flavor is added must be labeled as "artificially flavored". Thus a "lemon" type pie made with natural flavor derived predominantly from other citrus fruits could not be identified simply as "lemon pie" without misleading the consumer. It must be labeled as "citrus" pie or as "artificially flavored lemon pie."

The Commissioner agrees that some of the flavors listed in §§ 121.101(g) and 121.1164(b) could be derived from natural sources. However, the concern is whether a particular flavor is in fact derived from a natural or a synthetic source. If the flavor originates from a natural source, it is considered a natural flavor. Section 1.12(a)(1) has therefore been changed to reflect this.

The Commissioner does not agree with the comment which suggests that the definition for "artificial flavor" provide for a classification of "nature-identical" flavors. Such substances are synthetic products and properly classified as artificial. Section 403(k) of the Federal Food, Drug, and Cosmetic Act requires that when a food bears or contains artificial flavoring it must bear labeling stating that fact.

3. One comment requested clarification of § 1.12(a)(2) on the basis that horseradish and parsley may have been erroneously listed as spices under § 121.101(e) of this chapter. The Commissioner disagrees. These substances are well known and commonly used as spices in foods, and the Commissioner concludes that they are properly listed in § 121.101(e) of this chapter and in § 1.12(a)(2).

4. One comment requested that § 1.12(a)(2) be amended to coincide with the policy of the Department of Agriculture with regard to the use of paprika. It was asserted to be the policy of that Department that paprika in cured and smoked meats need not be declared as such, or as a coloring, provided it is used at a level which does not impart color.

The Commissioner advises that this regulation is not in conflict with any regulation of the United States Department of Agriculture (USDA). Paprika is widely used for its colorant and mild spice properties in foods other than meats. When so used in sufficient quantities to impart flavor, the Commissioner is not aware of any situation where the paprika would not also impart color. If it is declared as "spice and coloring" it need not be declared by name. The Commissioner concludes that there is no reason to modify § 1.12(a)(2).

5. One comment requested clarification with regard to the definition for "spice" as "* * * any aromatic vegetable substance in the whole, broken, or ground form; * * *" whose significant function in food is seasoning rather than nutritional. The comment states that there is an apparent conflict with § 1.12 (h)(3) which states that powdered or granulated onion, garlic powder and celery powder are foods rather than flavor. In addition, clarification was requested with regard to listing of seeds such as celery, cumin, fennel, caraway, and dill, etc., as spices while celery powder is listed as a food.

Several comments suggested changes under § 1.12(h)(3) with respect to the declaration of powdered onions, powdered garlic, powdered celery, and juices of onions or garlic. Most objected to their declaration by common or usual name and suggested that these substances be declared as "flavoring," "spices," or "other seasoning materials." They reasoned that these substances are used as "flavorings" and that there is no significant nutritional contribution. One comment did not object to declaring onions and garlic by their common name because of individual dislikes and allergies.

The commissioner has amended the regulation so that there is no conflict between § 1.12(a)(2) and (h)(3) with regards to onions, garlic, and celery. These products are commonly regarded by consumers to be vegetables, in addition to providing seasoning, and thus must be labeled by their common or usual names. The Commissioner advises that juices of onions and garlic are "natural flavors" as defined under § 1.12(a)(3) and that seeds such as celery seeds, cumin seed, fennel seed, etc. are commonly understood to be spices.

6. Uncertainty was expressed as to the scope of the phrase "hydrolysate, distillate, or other reaction product," and the propriety of including this phrase in the definition of "natural flavor" was questioned.

The phrase has been retained to assure that all flavors derived from natural sources are classified as "natural flavor."

7. One comment suggested the addition of a new § 1.12(a)(6) defining the word "flavor."

The Commissioner does not consider it necessary to define "flavor" as used in this regulation because its meaning is no different than the accepted meaning commonly understood and found in standard dictionaries.

8. One comment objected to the proposed mutually exclusive definitions of "spices" and "natural flavors." It was stated that the term "natural flavor" has long been used by food processors as a generic term including both spices and natural flavorings and that current regulations of the Department of Agriculture permit a manufacturer of meat or meat products to include spices within the declaration of "natural flavor."

Spices and flavorings are treated as distinct substances in Section 403(i)(2) of the Federal Food, Drug, and Cosmetic Act. The Commissioner therefore rejects this comment.

9. The United States Department of Agriculture opposed the provision in the definition of "natural flavor" which would allow meat extracts to be labeled as flavors. The USDA stated that "meat extract" and "fluid extract of meat" are standardized by USDA's meat inspection regulations and must bear names as specified by the regulations. The Commissioner concludes that there is no conflict between the USDA regulations and this regulation, since these substances when sold as such must still be labeled as "meat extract" and "fluid extract of meat." Only when these substances are used as ingredients without significant nutritional function, but rather to impart flavor, may they be declared as "natural flavor."

10. Several comments stated that the word "vital" in the definition of "natural flavor" does not have a clear meaning. The Commissioner agrees and the term has been deleted.

11. The Commissioner rejects suggestions for deletion of the last sentence in § 1.12(a)(3). The reference in that sentence to §§ 121.101(e) and 121.1163 provides useful and accurate listings of substances properly classified as natural flavorings.

12. Four respondents commented on the definition of artificial color in § 1.12 (a)(4) of the proposal. It was asserted that a dye or natural pigment extracted from a plant or other material in which such dye or natural pigment is naturally produced is properly classified as a natural and not an artificial coloring. One respondent objected to natural colors such as annatto, curcumin, and beet being designated as artificial colors asserting that it is not the colors that are artificial but the products that are artificially colored with natural colors. Another comment stated that the distinction between coal tar colors and natural colors was eliminated by the Color Additive Amendments of 1960, and pink lemonade is just as artificially colored by beet juice as by a synthetic dye. One comment stated that under the proposed definition, oleoresins of spices are artificial colors whereas turmeric, paprika and saffron are considered natural colorings and their oleoresins are considered natural flavors.

The Commissioner agrees that substances such as beet juice, paprika, tur-

V 38-148
AUG 2 73
XUM

meric, and saffron are not artificial colors per se. The Commissioner also agrees that when such substances are used to color articles of food of which the substance used is not naturally present as a constituent, such food is artificially colored.

Similarly, the designation "spice and coloring" in § 1.12(a)(2) for paprika, turmeric and saffron is not intended to indicate that foods colored by these spices are not artificially colored. Even though oleoresins of these spices are artificial colors, it is not inconsistent to consider them as natural flavors. When used as ingredients in foods, oleoresins of spices may be designated as natural flavors in accordance with the provision of § 1.12 (h) of the regulation.

The Commissioner agrees that the Color Additive Amendments of 1960 does not make a distinction between coal tar colors and natural colors. Therefore, the regulation has been amended by redefining the terms "artificial color" or "artificial coloring" to mean any "color additive" as this term is defined in § 8.1 (f) of this chapter.

13. Comments concerning § 1.12(g) were as follows:

(a) The labeling requirements for flavors shipped to manufacturers and processors should also apply to flavors sold at retail. Another comment suggested that all reference to "retail sale" be deleted because the phrase implies that manufacturers of flavoring must determine the end use of their products, which they cannot do.

(b) This paragraph should be revised to specifically provide that a flavor must be labeled such that a food manufacturer using the flavor as an ingredient can properly label his products with regard to flavor.

(c) An exemption from the labeling requirements of this section was requested in those cases where a firm manufactures a flavor and ships it to another of its own plants to be used in manufacturing other products.

(d) The alternative label statement authorized by § 1.12(g)(2) should be expanded to include those flavor ingredients listed in an industry association list of ingredients.

(e) The terminology "• • • shall be so labeled" in § 1.12(g)(4) should be made more specific.

(f) The word "flavor" should be reserved for artificial flavors or combinations of natural and artificial flavors, on the premise that there would be difficulty in applying and enforcing the criterion of predominance between "natural" and "artificial" flavors as proposed in the regulations.

(g) A definition for "predominates" was suggested, as follows: "The natural flavor from the source(s) named shall be deemed to predominate, if when used by itself in the same amount as is present in the blend, it provides a characterizing flavor in the finished food." Another comment stated that the distinction made on the basis of natural or artificial flavor predominating is not meaningful to the consumer and is detrimental to the manufacturer. A number of comments stated that a predominance test is unenforceable.

The Commissioner concludes that the provisions of § 1.12(g) should not be extended to flavors intended for retail sale. Those provisions are intended to protect trade secrets concerning flavor formulas, and the Commissioner is not aware of any flavor sold as such to consumers for which the qualitative formula could be shown to be a trade secret.

The reference to "retail sale" in § 1.12 (g) has been deleted.

The Commissioner concludes that the labeling authorized by § 1.12(g) as revised in the final regulation will provide the manufacturer who uses flavor ingredients with sufficient information for the proper labeling of his finished products in virtually all situations. If further information is necessary in a particular instance it may be obtained from the manufacturer.

Where a firm manufactures a flavoring and ships it to another of its own plants for use in manufacture of a food product, the Commissioner advises that the labeling authorized by § 1.12(g) may be used.

The Commissioner concludes that the label statement authorized by § 1.12(g)(2) should not be expanded to include flavor ingredients listed in an industry association list of ingredients. Only ingredients which have been reviewed for safety by the Food and Drug Administration and approved for use in a regulation after an opportunity for public comment are properly exempted from specific label declaration.

However, the effective date of this provision has been extended to December 31, 1974, provided that the label of the product bears a statement certifying that the ingredients are listed as being generally recognized as safe on a reliable published industry association list. This will provide the industry sufficient time to file petitions seeking the affirmation of GRAS status or a food additive regulation covering the safe use of any ingredient not covered by a Food and Drug Administration regulation. Consideration of these petitions will be expedited.

Section 1.12(g)(4) has been redesignated as § 1.12(g)(3) and has been revised to provide examples of appropriate labeling.

The Commissioner agrees that there would be great difficulty in enforcing the criteria for "predominance" necessary to determine the proper labeling of a combination of natural and artificial flavors as contained in § 1.12(i)(2) of the proposal. The absence of chemical analytical methodology to distinguish a natural flavor from its synthetic counterpart makes the enforcement of the criteria for predominance wholly dependent on organoleptic determination, and thus on inspection of company records. It would be impossible for the Food and Drug Administration to review all of the records of food manufacturers and flavor suppliers to determine compliance. Enforcement of the provision as proposed would therefore not be feasible.

The Commissioner is also aware that the term "flavored" does not explicitly convey to consumers the incorporation of artificial flavor in a product. This term might, indeed, be misconstrued to imply the presence solely of natural flavor. The purpose of flavor labeling is to distinguish between the use of natural and artificial flavoring in as clear and concise terminology as is possible. A number of comments specifically objected to the three-fold system of flavor designation contained in the proposal on the ground that it would not readily be understood by consumers, in addition to being unenforceable.

The Commissioner has therefore concluded that the proposal should be revised to eliminate the concept of "predominates," and to require that any food containing any amount of artificial flavor shall be labeled "artificially flavored." In the event that natural flavor is included in the product at some level, the presence of such natural flavor will be shown in the statement of ingredients. The Commissioner believes that this two-fold system of flavor designation will be more enforceable as well as more readily understandable by consumers. It will also more accurately reflect the statutory mandate to inform consumers of the presence of artificial flavor.

The Commissioner recognizes that there will continue to be situations where, because of analytical and enforcement difficulties, the addition of artificial flavors to natural flavors will remain undetected. However, this problem will be substantially reduced by the two-fold flavor designation system adopted in the final regulation. The Commissioner urges the industry to apply this regulation with honesty, and advises that violations will be the subject of severe regulatory action. Many food manufacturers regularly cooperate with the Food and Drug Administration by providing sufficient records to document the truthfulness of label statements.

14. Several consumers suggested that spices, flavorings, and colorings be declared by individual common name rather than by the generic terms. A manufacturer suggested that spices be declared under the term "natural flavor." One comment suggested that the source be declared when sweeteners are used as flavors. Another suggested that the term "MSG" be used as an alternative designation for monosodium glutamate.

Section 403(i) of the act specifically provides that spices, flavorings, and colorings, other than those sold as such, may be designated as spices, flavorings and colorings without naming each. Section 403(i) also makes a specific distinction between spices and flavors. Sweeteners are not spices or flavors, and when used as an ingredient in a food must be declared by common or usual name. Similarly monosodium glutamate is not a spice or flavor, and it must be declared by its common or usual name. The Commissioner does not agree that "MSG" used alone to designate monosodium glutamate as an ingredient would be recognized by consumers as a designation for monosodium glutamate. However, there is no objection to its being used parenthetically immediately following the words "monosodium glutamate."

15. Several comments were received concerning the proposed labeling of incidental additives which originate in a spice or flavor ingredient used in manufacture of a food but which have no functional effect in the finished food.

The Commissioner concludes that incidental additives in a food, originating in a spice or flavor ingredient used in manufacture of the food, should be labeled in the same manner as incidental additives originating in any other ingredient. A proposal to provide general rules governing this situation was published in the FEDERAL REGISTER of January 19, 1973 (38 FR 2141), and a final order establishing 21 CFR 1.10a(a)(4) is published elsewhere in this issue of the FEDERAL REGISTER. Section 1.12(h)(2) has been revised to incorporate by reference this general rule.

16. Several comments objected to the label declaration of pyroligneous acid. The comments also observed that the proposal failed to consider the labeling of smoke flavorings other than pyroligneous acid.

The Commissioner has amended the regulation to provide that pyroligneous acid and other artificial smoke flavors may be declared as "artificial flavor" or "artificial flavoring." There is no reason to treat the labeling of these flavor substances differently than any other artificial flavor. Of course, where a manufacturer chooses to characterize a product containing any of these substances with labeling references to smoke, the labeling must prominently state that the smoke flavor is artificial. Failure to do so would make the label false or misleading.

The Commissioner advises that when true smoke is absorbed in a liquid or other medium, and that medium is added to a food to provide a smoke flavor, such a flavor ingredient may be identified as "natural flavor" or natural smoke flavor." It would be misleading, however, to characterize such a food as "smoked," although a label statement such as "with added smoke flavor" or with "natural smoke flavor" would be permissible.

17. Several comments objected to the labeling requirements under § 1.12(i). These comments and the Commissioner's responses are as follows:

(a) Several comments objected to the provision of § 1.12(i)(1) requiring use of the term "flavored" whenever a product contains natural flavor in addition to the characterizing ingredient because this implies that the product may be merely flavored and does not contain, or contains only a small amount of, the characterizing ingredient.

The Commissioner recognizes that there may be situations where a food contains a characterizing ingredient and the manufacturer adds natural flavoring to maintain consistent flavor characteristics. In such instances it is not appropriate to require such food to be labeled as "flavored," e.g., "strawberry flavored shortcake," when in fact the food contains the expected amount of the characterizing ingredient. The regulation has been revised to require that in such cases the phrase "flavor added" follow the name of the food, e.g., "strawberry shortcake, flavor added." However, if such product does not contain the expected amount of the characterizing ingredient, the regulation requires that the word "flavored" must follow the name of the characterizing flavor.

(b) One comment urged the prohibition of vignettes and depictions for a characterizing ingredient not present in a food. The Commissioner concludes that the labeling requirements of § 1.12(i) of the regulation are sufficient to inform the consumer of the nature of a characterizing flavor.

(c) One comment urged application of the labeling requirements of the ice cream standard to all other food products. The Commissioner concludes that the present regulation substantially adopts and improves upon the labeling rules for ice cream. The three-fold flavor designation system adopted for ice cream has been enforceable because of minimum standards for characterizing ingredients and the analytical methods to enforce them. The lack of such standards and methods precludes the adoption of that system for all foods. In order to achieve consistent labeling, the Commissioner will propose to amend the ice cream standard to conform to this regulation.

(d) One comment asked that the provision of the standard of identity for ice cream which defines when artificial vanilla flavor predominates be added to this regulation. The Commissioner concludes that this is unnecessary in view of the deletion of the criteria of "predominates."

(e) One comment contended that the proposal failed to provide for appropriate labeling of foods containing a characterizing flavor predominantly of natural origin but not derived from the food simulated, e.g., a textured vegetable protein food containing a beef-like flavor derived from a natural source other than beef. Several comments favored a labeling category for natural flavor derived only from the simulated food.

The Commissioner advises that section 403(i) of the act allows flavor ingredients to be declared generically as "flavoring," except that, pursuant to section 403(k), artificial (synthetic) flavors are to be declared as "artificial flavoring." Thus a flavor of natural origin may be declared in the statement of ingredients as "flavoring" or "natural flavoring" even though that flavor may simulate a food other than the one from which it is derived.

However, section 403(a) of the act prohibits labeling which is false or misleading in any respect. Where a natural flavor is used in a food to simulate a flavor of a product other than the one from which the flavor is derived, the food to which the flavor is added must be labeled either with the flavor of the product from which it is derived or as "artificially flavored." Failure to include such information in a conspicuous manner on the principal display panel would result in a violation of section 403(a) of the act in that the label would be false and misleading for failure to reveal a material fact within the meaning of section 201(n) of the act.

(f) One comment suggested that chewing gum be excluded from the proposal, even though it is defined as a "food" under the act. It was reasoned that this product is not intended to be ingested as food, but merely serves as a delivery system for an organoleptically satisfying flavor sensation. In addition, it was claimed that difficulties would be encountered in the labeling requirements because of type size and package size.

Section 201(f)(2) of the act defines chewing gum as a food. The Commissioner concludes that there is insufficient justification for exempting chewing gum or other similar products from the labeling requirements of the regulation.

(g) Several other comments suggested additional terms or different meanings for proposed terms.

The Commissioner recognizes that there are many possible variations that could be used in prescribing the manner by which natural and artificial flavors are to be designated in the labeling of foods. However, he concludes that the terminology of § 1.12(i) as revised in the final regulation can be applied by industry, that the required labeling will be informative to consumers, and that the terminology employed is otherwise fair, reasonable, and as enforceable as can reasonbly be achieved. Accordingly, changes other than those discussed above are not necessary.

18. The Commissioner is aware of the Resolution adopted June 21, 1973, by the Association of Food and Drug Officials of the United States at this year's annual conference in Rapid City, South Dakota in which opposition to his January 19, 1973, proposal is set forth. The views of that organization as well as the views of the State officials which were individually expressed through their own response to the proposal have been thoroughly considered in arriving at this final order.

19. The Commissioner has decided to adhere to the proposed effective dates for the regulation. Accordingly, all labeling ordered on or after December 31, 1973, and all other products shipped in interstate commerce on or after December 31, 1974, shall comply with these rules. Although one trade association objected to these dates, the Commissioner concludes that they provide a reasonable time for compliance by industry and that further delay would not be in the interest of the consumer.

Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (secs. 403, 701(a), 52 Stat. 1047, 1055; 21 U.S.C. 343, 371(a)) and under authority delegated to the Commissioner (21 CFR 2.120), Parts 1 and 9 are amended as follows:

1. In Part 1 by amending § 1.12 by revising the section title, by revising paragraph (a)(1), by redesignating existing paragraphs (a)(2) and (a)(3) as new paragraphs (a)(5) and (a)(6), by adding new paragraphs (a)(2), (a)(3) and (a)(4) and by adding new paragraphs (g), (h), and (i) to read as follows:

V 38-148 AUG 2 73 XUM

§ 1.12 Food labeling; spices, flavorings, colorings and chemical preservatives.

(a)(1) The term "artificial flavor" or "artificial flavoring" means any substance, the function of which is to impart flavor, which is not derived from a spice, fruit or fruit juice, vegetable or vegetable juice, edible yeast, herb, bark, bud, root, leaf or similar plant material, meat, fish, poultry, eggs, dairy products, or fermentation products thereof. Artificial flavor includes the substances listed in §§ 121.101(g) and 121.1164(b) of this chapter except where these are derived from natural sources.

(2) The term "spice" means any aromatic vegetable substance in the whole, broken, or ground form, except for those substances which have been traditionally regarded as foods, such as onions, garlic and celery; whose significant function in food is seasoning rather than nutritional; that is true to name; and from which no portion of any volatile oil or other flavoring principle has been removed. Spices include the spices listed in § 121.101(e) of this chapter, such as the following:

Allspice	Marjoram
Anise	Mustard flour
Basil	Nutmeg
Bay leaves	Oregano
Caraway seed	Paprika
Cardamon	Parsley
Celery seed	Pepper, black
Chervil	Pepper, white
Cinnamon	Pepper, red
Cloves	Rosemary
Coriander	Saffron
Cumin Seed	Sage
Dill seed	Savory
Fennel seed	Star aniseed
Fenugreek	Tarragon
Ginger	Thyme
Horseradish	Turmeric
Mace	

Paprika, turmeric, and saffron are also colors which, under § 1.10(c), shall be declared as "spice and coloring" unless declared by their common or usual name.

(3) The term "natural flavor" or "natural flavoring" means the essential oil, oleoresin, essence or extractive, hydrolysate, distillate, or other reaction products which contains the flavoring constituents derived from a spice, fruit or fruit juice, vegetable or vegetable juice, edible yeast, herb, bark, bud, root, leaf or similar plant material, meat, fish, poultry, eggs, dairy products, or fermentation products thereof, whose significant function in food is flavoring rather than nutritional. Natural flavors include the natural essence or extractives obtained from plants listed in § 121.101(e) and the substances listed in § 121.1163 of this chapter.

(4) The term "artificial color" or "artificial coloring" means any "color additive" as defined in § 8.1(f) of this chapter.

(5) The term "chemical preservative" means any chemical that, when added to food, tends to prevent or retard deterioration thereof, but does not include common salt, sugars, vinegars, spices, or oils extracted from spices, substances added to food by direct exposure thereof to wood smoke, or chemicals applied for their insecticidal or herbicidal properties.

• • • • •

(g) A flavor shall be labeled in the following way when shipped to a food manufacturer or processor (but not a consumer) for use in the manufacture of a fabricated food, unless it is a flavor for which a standard of identity has been promulgated, in which case it shall be labeled as provided in the standard:

(1) If the flavor consists of one ingredient, it shall be declared by its common or usual name.

(2) If the flavor consists of two or more ingredients, the label either may declare each ingredient by its common or usual name or may state "All flavor ingredients contained in this product are approved for use in a regulation of the Food and Drug Administration." Any flavor ingredient not contained in one of these regulations, and any nonflavor ingredient, shall be separately listed on the label.

(3) In cases where the flavor contains a solely natural flavor(s), the flavor shall be so labeled, e.g., "strawberry flavor," "banana flavor," or "natural strawberry flavor." In cases where the flavor contains both a natural flavor and an artificial flavor, the flavor shall be so labeled, e.g., "natural and artificial strawberry flavor." In cases where the flavor contains a solely artificial flavor(s), the flavor shall be so labeled, e.g., "artificial strawberry flavor."

(h) The label of a food to which flavor is added shall declare the flavor in the statement of ingredients in the following way:

(1) Spice, natural flavor, and artificial flavor may be declared as "spice," "natural flavor," or "artificial flavor," or any combination thereof, as the case may be.

(2) An incidental additive in a food, originating in a spice or flavor used in the manufacture of the food, need not be declared in the statement of ingredients if it meets the requirements of § 1.10a(a)(4).

(3) Substances obtained by cutting, grinding, drying, pulping, or similar processing of tissues derived from fruit, vegetable, meat, fish, or poultry, e.g., powdered or granulated onions, garlic powder, and celery powder, are commonly understood by consumers to be food rather than flavor and shall be declared by their common or usual name.

(4) Any salt (sodium chloride) used as an ingredient in food shall be declared by its common or usual name "salt."

(5) Any monosodium glutamate used as an ingredient in food shall be declared by its common or usual name "monosodium glutamate."

(6) Any pyroligneous acid or other artificial smoke flavors used as an ingredient in a food may be declared as artificial flavor or artificial smoke flavor. No representation may be made, either directly or implied, that a food flavored with pyroligneous acid or other artificial smoke flavor has been smoked or has a true smoked flavor, or that a seasoning sauce or similar product containing pyroligneous acid or other artificial smoke flavor and used to season or flavor other foods will result in a smoked product or one having a true smoked flavor.

(i) If the label, labeling, or advertising of a food makes any direct or indirect representations with respect to flavor, by word, vignette, e.g., depiction of a fruit, or other means, or if for any other reason the manufacturer or distributor of a food wishes to designate the type of flavor in the food other than through the statement of ingredients, the flavor of the product shall be declared in the following way:

(1) If the food contains no artificial flavor, the name of the food on the principal display panel or panels of the label shall be accompanied by the common or usual name of the characterizing flavor, e.g., "vanilla," in letters not less than one-half the height of the letters used in the name of the food, except that:

(i) If the food is one that is commonly expected to contain a characterizing food component e.g., strawberries in "strawberry shortcake," and the food contains a sufficient quantity of that ingredient to characterize the food independent of any added natural characterizing flavor derived from such ingredient and the food contains added natural flavors derived from such ingredient, the name of the food shall be immediately followed by the words "flavor added" in letters not less than one-half the height of the characterizing ingredient, or

(ii) If the food is one that is commonly expected to contain a characterizing food component, e.g., strawberries in "strawberry shortcake," and the food contains natural flavor derived from such ingredient and an amount of characterizing ingredient insufficient to independently characterize the food, or the food contains no such ingredient, the name of the characterizing flavor shall be immediately followed by the word "flavored" in letters not less than one-half the height of the letters in the name of the characterizing flavor.

(iii) If a natural flavor is used in a food to simulate a flavor of a product other than the one from which the flavor is derived, the food in which the flavor is used shall be labeled either with the flavor of the product from which the flavor is derived or as "artificially flavored."

(2) If the food contains any artificial flavor, the name of the food on the principal display panel or panels of the label shall be accompanied by the common or usual name of the characterizing flavor, in letters not less than one-half the height of the letters used in the name of the food preceded by the word(s) "artificial" or "artificially flavored," in letters not less than one-half the height of the letters in the name of the characterizing flavor, e.g., "artificial vanilla," or "artificially flavored strawberry."

(3) Wherever the name of the characterizing flavor appears on the label (other than in the statement of ingredients) so conspicuously as to be easily seen under customary conditions of purchase, the words prescribed by this paragraph shall immediately and conspicuously precede or follow such name, except:

(i) Where the characterizing flavor and a trademark or brand are presented together, other written, printed, or graphic matter that is a part of or is associated with the trademark or brand may intervene if the required words are in such relationship with the trademark or brand as to be clearly related to the characterizing flavor; and

(ii) If the finished product contains more than one flavor subject to the requirements of this paragraph, the statements required by this paragraph need appear only once in each statement of characterizing flavors present in such food, e.g., "artificially flavored vanilla and strawberry."

PART 3—STATEMENTS OF GENERAL POLICY OR INTERPRETATION

§ 3.10 [Revoked]

2. The provisions of § 3.10 are hereby revoked.

§ 3.23(b) [Revoked]

3. The provisions of § 3.23(b) are hereby revoked.

§ 3.201 [Revoked]

4. The provisions of § 3.201 are hereby revoked.

Effective date. Labeling may be changed to comply with this regulation beginning August 2, 1973. All labeling ordered on or after December 31, 1973, and all labeling used for products shipped in interstate commerce on or after December 31, 1974, shall comply with this regulation; provided, that the label of a flavor need not conform to paragraph (g)(2) of this regulation prior to December 31, 1974, if it bears a statement certifying that the ingredients are listed as being generally recognized as safe on a reliable published industry association list.

(Secs. 403, 701(a), 52 Stat. 1047, 1055; 21 U.S.C. 343, 371(a))

Dated: July 25, 1973.

A. M. SCHMIDT,
Commissioner of Food and Drugs.

[FR Doc.73-15700 Filed 8-1-73;8:45 am]

PART 3—STATEMENTS OF GENERAL POLICY OR INTERPRETATION

Status of Vitamin A and Vitamin D

In the FEDERAL REGISTER of December 14, 1972 (37 FR 26618) the Commissioner of Food and Drugs proposed that preparations containing vitamin A in excess of 10,000 international units (IU) per dosage unit and preparations containing vitamin D in excess of 400 IU per dosage unit shall be dispensed on prescription. A correction, which did not alter the intent of the proposal, was published in the FEDERAL REGISTER of January 4, 1973 (38 FR 799). Sixty days were allowed for comment.

Approximately 2,500 comments and 1,000 signatures on petitions were received in response to the proposal. Comments were received from a wide segment of the public, including individual consumers, physicians, nurses, pharmacists, dietitians, home economists, nutritionists, nine pharmaceutical manufacturers, a number of vitamin preparation distributors, and health food store operators. Comments from the medical profession were presented by the American Academy of Pediatrics and the American Medical Association. Organized consumer groups that responded were the National Health Federation, Oregon Student Public Interest Research Group, Committee Against Health Fraud, Inc., Committee for the Cessation of "Fortification" of Food Products with Calciferol Hormones, Virginia Citizens Consumer Council, Inc., Consumers Cooperative of Berkeley, Inc. Comments were also submitted by the Wisconsin Alumni Research Foundation, The Ann Arbor Dietetic Association, the American Dietetic Association, and five trade associations: The Pharmaceutical Manufacturers Association, East Coast Health Food Corporation, the National Food, Drug and Cosmetic Association of Manufacturers and Distributors, Inc., the National Nutritional Foods Association and the National Association of Pharmaceutical Manufacturers.

GENERAL COMMENTS

The proposal was controversial and generated widely ranging comments regarding broad issues raised by the use of vitamins in foods and drugs. Many of these comments are not appropriate for consideration of the more limited issues raised in the proposed regulation regarding vitamin A and vitamin D. With respect to the broad issues of vitamin and mineral use the Commissioner notes that several regulations including comprehensive discussion of these issues have been published in the FEDERAL REGISTERS of January 19 and March 14, 1973 (38 FR 2124, 6950) and elsewhere in this issue of the FEDERAL REGISTER.

The majority of responses from individual consumers were opposed to the proposal. In reviewing such comments, the Commissioner is concerned that the public is not fully aware of the provisions and medical basis of the proposal: For example, the tenor of many comments was that vitamin A and vitamin D would be available only on prescription. Form letters and several petitions, which were submitted with a number of signatures, contained key statements, presumably the basis on which the signatures were obtained, that bear very little, if any, resemblance to the actual provisions of the proposal. It is clear that the majority of individual consumers responding had been improperly or inadequately informed.

The comments fall into three general categories:

(1) Those who agree that the action proposed by the Food and Drug Administration is necessary and that the prescription levels proposed for vitamin A and vitamin D are suitable. Those who agreed included the American Academy of Pediatrics, the American Medical Association, the American Dietetic Association, five consumer groups, a number of physicians, dietitians, nutritionists, home economists and other professionals in the scientific and health care community, and a few individual consumers.

(2) Those who agree that such vitamins can be toxic, but only at levels higher than those levels proposed by the Food and Drug Administration. The majority of the drug manufacturers and trade associations, and some consumers, made responses that were in this category.

(3) Those who disagree with the proposal entirely, stating that such vitamins are foods and that individuals should have the right to ingest any amount desired. The comments from most individual consumers, operators of health food establishments and a consumer group, were in this category.

SPECIFIC COMMENTS

1. A number of comments contended that "natural" vitamins (including vitamin A and vitamin D) and minerals are foods rather than drugs and should not be treated as drugs. Some viewed "natural" vitamins as safe whereas synthesized vitamins may be (or are) toxic.

The question regarding whether a vitamin is a food or drug generated considerable discussion. The tentative and final orders promulgating §§ 80.1, 125.1, and 125.3 (21 CFR 80.1, 125.1 and 125.3), published in the January 19, 1973 FEDERAL REGISTER (38 FR 2143, 2152) and elsewhere in this issue of the FEDERAL REGISTER discuss this matter in detail. The Commissioner concludes, on the basis of all the available evidence, that vitamins between the upper and lower limits as specified in § 80.1 are adequate for all known nutritional needs for normal individuals and that nutrients at these levels are dietary supplements which are foods for special dietary use. No evidence was submitted in the comments to establish a food or nutritional use of vitamin A or vitamin D at higher levels, except for a limited number of persons with poor vitamin D absorption who need up to 1000 IU of this vitamin for nutritional purposes under medical supervision. With that one exception, which is recognized in the revised regulation, intake of vitamins at levels exceeding the upper limits as specified in § 80.1 are therefore appropriate only for therapeutic purposes and thus are properly classed as drugs.

This position is entirely consistent with the Food and Drug Administration's long-standing interpretation and application of the act. See, e.g., Kordel v. United States, 335 U.S. 345 (1948), in which the Supreme Court upheld the conviction of an individual for marketing "health food products" consisting of "various vitamins, minerals, and herbs" on the ground that they were misbranded drugs. See also United States v. 3 Cartons • • • "No. 26 Formula GM etc.," 132 F. Supp. 569 (S.D. Calif. 1952).

Alleged differences in vitamins based on their source is also discussed in the

V 38-148
AUG 2 73
XUM

tentative and final orders promulgating §§ 80.1 and 125.1–125.3. There is no scientific evidence to suggest that there is a difference in the metabolic actions or toxic effects of synthetically produced vitamins as compared with those from natural sources.

2. Several manufacturers and trade associations objected to the proposal on the ground that the proper classification of OTC drug levels of vitamins would be made in the near future by the appropriate OTC drug advisory review panel and that levels established now by the Food and Drug Administration would only be on interim measure. These comments expressed the opinion that deferring action on this proposal would not result in any signficant hazard to the public health.

In the preamble of the proposal the Commissioner stated his reasons for separating vitamin A and vitamin D from the other vitamins at this time and establishing levels above which these vitamins are limited to prescription distribution. The continuing information available to the Commissioner regarding the toxicity of vitamin A and vitamin D and the continuing reports of promotion of large amounts of these vitamins for a variety of purposes makes this action necessary at this time in the public interest.

3. A number of comments from individual consumers and those representing the vitamin industry agreed that vitamin A and vitamin D are toxic in amounts in excess of known requirements, but stated that such levels are much higher than the limitations proposed. Some comments offered a level of 25,000 IU of Vitamin A and 1,000 IU of Vitamin D as providing a sufficient safety margin for known toxicity. Other comments contended that the proposed levels were suitable for children, but higher levels would be more appropriate for adults. A number of comments felt the proposed levels were arbitrary and without scientific merit or support. Several of the comments had made a review and provided their own analysis of the bibliography prepared by the Food and Drug Administration at the time the proposal was published in the FEDERAL REGISTER. Generally, these comments stated that toxicity below 50,000 IU daily for vitamin A was rare and that vitamin D toxicity reports would not support the vitamin D level proposed.

Several other comments recommended lower levels than those proposed. A comment from a physician at a university School of Medicine, Department of Biochemistry, supported the proposal, but stated that 5,000 IU for vitamin A would be a more judicious level. Another comment from the Department of Chemical Pathology, the United Liverpool Hospitals, Liverpool, England, included a reference to a paper written by the respondent regarding self-medication with multivitamin preparations and recommended that 100 IU of vitamin D per dosage unit be the limit for non-prescription marketing.

The Commissioner has carefully reviewed the comments and analysis regarding the medical/scientific justification for establishing the proposed vitamin A and vitamin D limits and finds that such comments do not sufficiently support a revision of the proposed limits. No evidence refuted the toxicity findings on which the proposal was based, and further reports of toxicity continue to accumulate. Based on consultation with the most knowledgeable experts available, the Commissioner finds that the scientific consensus is that the proposed limits are appropriate at this time.

The Commissioner of Food and Drugs will soon publish in the FEDERAL REGISTER a request for submission of all data and information relevant to the safety and effectiveness of vitamins and minerals for OTC drug use, pursuant to the procedures established in 21 CFR 130.301, published in the FEDERAL REGISTER on May 11, 1972 (37 FR 9464). The members of the OTC drug review panel for vitamin-mineral drugs are presently being selected. This panel will have full authority to review and re-evaluate the proper dividing line between OTC and prescription levels of vitamin A and vitamin D, and to recommend to the Commissioner any changes in the regulations promulgated by this order, in its report. Thus, the levels of vitamin A and vitamin D for prescription use in this regulation are established on an interim basis only. These regulations will be revoked upon promulgation of a final OTC drug monograph for vitamin-mineral drugs incorporating final prescription levels for these two vitamins.

4. A number of comments, particularly those from individual consumers, state that it is not logical to require a prescription for dosage levels of vitamins that may be lower than the vitamin content of an average serving of certain foods. A few comments expressed concern that normal diets with or without appropriate vitamin supplementation may lead to toxic conditions.

The Commissioner recognizes that many common foods contain a variety of vitamins and minerals in widely ranging amounts, and that some common foods contain vitamin A in excess of 10,000 IU per serving. It is also recognized, however, that these foods particularly rich in vitamin A are rarely consumed daily in sufficient quantity over the long periods of time required to lead to toxic manifestations. The concern of the Food and Drug Administration is the availability of vitamin A and vitamin D in large dosage units in medicinal forms, i.e. capsules and tablets, particularly in view of the multiplicity of other sources of this vitamin in the daily diet. The convenience of ingestion in this form on a routine basis encourages excessive intake of these vitamins far beyond the average amounts ingested in normal diets of conventional food over extended periods of time. Adequate amounts of vitamin A and vitamin D will continue to be available as dietary supplements and are not being removed from the market place. The margins of safety provided in the levels established by this proposal were developed to take into account the wide ranges of vitamin content in foods and the dosage levels of vitamin A and vitamin D preparations that are usually implicated in toxic conditions.

5. Comment was received that consumers would be able to ingest as many dosage units as they desired and therefore the proposed limits would have no effect. The Commissioner cannot agree with this concept. Today's consumers are increasingly knowledgeable and are concerned about the health and safety of themselves and their family. The Commissioner believes that most consumers will carefully consider the advisability of taking dosage units in excess of suitable recommended daily dosages. Conscientious consumers will have a basis upon which to make a judgment as to their intake of these vitamins. The fact that a small number of consumers will abuse their health by excessive intakes of drugs, regardless of regulatory and other approaches to curtail such abuse, is no reason to forego a reasonable regulation that will afford appropriate public health protection for the vast majority of the public.

6. The Committee on Nutrition, American Academy of Pediatrics, and several other respondents commented on the special needs for vitamin D in foods for special dietary use in specific medical conditions. Foods designed to provide sound nutrition to individuals with poor vitamin D absorption require higher than normal levels of vitamin D. Such individuals may require dietary intakes up to 1000 IU as part of their overall dietary management.

The Commissioner recognizes that foods represented solely for use under medical supervision to meet nutritional requirements in specific medical conditions have a place in medical care of a select group of individuals who have diagnosed conditions that will benefit from the use of complete foods containing up to 1000 IU of vitamin D. The marketing of such foods is permitted in compliance with § 125.1(h) being published elsewhere in this issue of the FEDERAL REGISTER. The regulation for vitamin D has been revised to allow this limited use of a higher amount of vitamin D without a prescription.

7. Comments received from the Council on Foods and Nutrition, American Medical Association, endorse the proposal and include reference to the possible relationship between excess vitamin D and hypercholesterolemia, in addition to the classic form of vitamin D toxicity. The Council also commented that the proposal fails to mention that there is no recommended dietary allowance for vitamin D for adults, since their needs are considered to be met by ordinary mixed diets and exposure to sunlight. The Council, along with other respondents, raised a question regarding a controlled "overage" to assure compliance with label declarations of the amounts present.

The Food and Drug Administration recognizes that there is no recommended dietary allowance for vitamin D in adults except during pregnancy and lactation and therefore considers vitamin D as an optional component of dietary supplements of vitamins and minerals for adults and older children (21 CFR 80.1). The Commissioner notes that within good manufacturing practices reasonable overages are permissible in formulating drugs and these are recognized in the specification ranges used in determining whether or not a product meets its labeled potency.

8. In response to the proposal, the Wisconsin Alumni Research Foundation resubmitted comments directed to a proposal regarding vitamin D published in the FEDERAL REGISTER of August 28, 1965 (30 FR 11140). The previous proposal was more restrictive than the present one and contained several provisions not currently being considered. Of significance in this comment was concern by the Wisconsin Alumni Research Foundation that the requirements as proposed in 1965 would have the effect of decreasing the vitamin D intake by the general public to a level below their nutritional needs.

The Commissioner concludes that such a situation is clearly not possible as a result of the current proposal, which is directed only at the use of vitamin D as a drug. As a result of the vitamin D content of milk and other foods, and the availability of vitamin D in dietary supplements, the national food supply provides ample vitamin D.

9. Several manufacturers commented that the effective date of any final order with respect to vitamin A and vitamin D should be the same uniform effective date established for recent food labeling revisions. Such an effective date would permit interstate shipments of existing high potency products through December 31, 1974. Several comments also requested that those vitamin A and vitamin D preparations already in commercial channels be allowed continued marketing until existing supplies are exhausted.

Because of the known toxicity and continuing reports of toxic conditions resulting from large dosages over a period of time, the Commissioner concludes that protracted continuation of manufacture and marketing of preparations that do not meet the requirements of this order is not justified. However, a reasonable period of time to allow for orderly reformulation and relabeling, where necessary, is in the public interest to assure continued availability of vitamin A and vitamin D preparations. Therefore, this order shall become effective for products labeled beginning October 1, 1973. No recall of existing stocks is deemed necessary.

10. One comment from a manufacturer stated that the proposal conflicts with the limits for vitamin A established by the food labeling regulations published in the January 19, 1973 FEDERAL REGISTER (38 FR 2124). The Commissioner finds no conflict between this drug regulation and the food regulations. Those vitamin A preparations within the ranges specified in § 80.1 are considered foods and must be labeled as dietary supplements. Those preparations containing vitamin A in excess of the upper limit of these ranges, but less than the proposed prescription drug level, are OTC drugs. Those preparations containing in excess of 10,000 IU of vitamin A per dosage unit are prescription drugs.

11. Several comments requested that a public hearing be held to consider the issues and objections. A hearing on these matters is not mandatory under section 701(a) of the act. The Commissioner concludes that a hearing is inappropriate at this time and that any further delay in promulgation of these regulations is not in the public interest. A hearing on this issue will be available before both the advisory drug panel and the Commissioner under the OTC drug review procedures.

Having considered the comments received, the Commissioner concludes that the proposed regulations are in the public interest and should be adopted as set forth below.

Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (secs. 502(a), (f), and (j), 503(b), 701(a), 52 Stat. 1050–1052, as amended, 1055; 21 U.S.C. 352(a), (f), and (j), 353(b), 371(a)) and under authority delegated to the Commissioner (21 CFR 2.120), Part 3 is amended by adding thereto the following new sections:

§ 3.94 Vitamin A preparations for oral use as drugs.

(a) Vitamin A is an essental nutrient for humans. It is widely recognized that large amounts of vitamin A can cause adverse effects, some of which are serious. The U.S. Recommended Daily Allowance (U.S. RDA) for vitamin A is 1500 International Units, (IU) for infants, 2500 IU for children under 4 years of age, 5000 IU for adults and children 4 or more years of age, and 8000 IU for pregnant or lactating women.

(b) In view of the toxicity of excessive consumption of vitamin A, the Food and Drug Administration finds that, in order to protect the public health, oral preparations containing vitamin A in excess of 10,000 IU per dosage unit or recommended daily intake are drugs subject to section 503(b)(1) of the Federal Food, Drug, and Cosmetic Act and shall be restricted to prescription sale. Such products will be regarded as misbranded if at any time prior to dispensing the following conditions are not met:

(1) The label bears the legend, "Caution: Federal law prohibits dispensing without a prescription"; and

(2) The labeling bears full disclosure information as required by § 1.106(b)(3)(i) of this chapter, and especially appropriate warnings regarding vitamin A toxicity.

(c) Preparations containing 10,000 or less IU of vitamin A per dosage unit will be regarded as misbranded if their recommended daily intake exceeds 10,000 IU.

§ 3.95 Vitamin D preparations for oral use as drugs.

(a) Vitamin D is an essential nutrient for humans. It is widely recognized that vitamin D, when ingested daily in large amounts, is toxic. The U.S. Recommended Daily Allowance (U.S. RDA) for vitamin D is 400 International Units (IU).

(b) In view of the toxicity of the excessive consumption of vitamin D, the Food and Drug Administration finds that, in order to protect the public health, oral preparations containing vitamin D in excess of 400 IU per dosage unit or recommended daily intake are drugs subject to section 503(b)(1) of the Federal Food, Drug, and Cosmetic Act and shall be restricted to prescription sale. Such products will be regarded as misbranded if at any time prior to dispensing the following conditions are not met:

(1) The label bears the legend, "Caution: Federal law prohibits dispensing without a prescription"; and

(2) The labeling bears full disclosure information as required by § 1.106(b)(3)(i) of this chapter, and especially appropriate warnings regarding vitamin D toxicity.

(c) Preparations containing 400 or less IU of vitamin D per dosage unit will be regarded as misbranded if their recommended daily intake exceeds 400 IU.

(d) Foods which are represented for use solely under medical supervision to meet nutritional requirements of persons with poor vitamin D absorption may contain vitamin D not in excess of 1000 IU per dosage unit or recommended daily intake.

Effective date. This order shall become effective on October 1, 1973 for products labeled on or after that date.

(Secs. 502(a), (f), and (j), 503(b), 701(a), 52 Stat. 1050–1052, as amended, 1055; 21 U.S.C. 352(a), (f), and (j), 353(b), 371(a))

Dated: July 25, 1973.

A. M. SCHMIDT,
Commissioner of Food and Drugs.

[FR Doc.73-15703 Filed 8-1-73;8:45 am]

PART 3—STATEMENTS OF GENERAL POLICY OR INTERPRETATION

SUBCHAPTER B—FOOD AND FOOD PRODUCTS

PART 121—FOOD ADDITIVES

Folic Acid, Potassium Iodide and Kelp

In the FEDERAL REGISTER of January 19, 1973, the Commissioner of Food and Drugs published tentative orders revising regulations for food for special dietary uses and establishing a definition and standard of identity for dietary supplements of vitamins and minerals (38 FR 2143, 2152). In the preamble to the tentative order revising the regulations for foods for special dietary uses, the Commissioner stated that other regulations governing the levels of the food additives folic acid and iodine would be revised at a later date to make them consistent with the levels of these nutrients permitted in foods for special dietary uses and in dietary supplements of vitamins and minerals (38 FR 2145).

No exceptions were received objecting to the provisions of the two tentative orders relating to the levels for folic acid and iodine. Elsewhere in this issue of the FEDERAL REGISTER the Commissioner is publishing a final order promulgating those new regulations with the levels for folic acid and iodine unchanged.

V38-148 AUG 2 73 XUM

The Commissioner, having evaluated the Hearing Record in the proceeding that led to adoption of the new regulations, the Recommended Dietary Allowances established by the National Academy of Sciences, and other relevant information, concludes that the applicable regulations should be amended to provide for the safe use of folic acid and iodine.

The statement of policy on the status of folic acid contained in § 3.42 (21 CFR 3.42) was adopted in 1964 in order to emphasize that incorporation of any level of folic acid in excess of the permitted food additive level would require the sale of the product as a prescription drug. Pending review of the status of folic acid by the OTC vitamin-mineral drug panel pursuant to the procedures established in § 130.301 (21 CFR 130.301), the Food and Drug Administration will continue this policy. Thus, any product containing more than the levels of folic acid established in this regulation in the daily dosage recommended or suggested will be classified as a prescription drug on an interim basis until a final OTC drug monograph on this ingredient becomes effective. In order to make it clear that the OTC vitamin-mineral drug panel is entirely free to reexamine the status of folic acid at levels greater than those established in this regulation, however, the Commissioner has concluded that § 3.42, which is now obsolete, should be revoked.

Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (secs. 409, 701(a), 52 Stat. 1049, 1055; 21 U.S.C. 348, 371(a)) and under authority delegated to the Commissioner (21 CFR 2.120), Parts 3 and 121 are amended as follows:

§ 3.42 [Revoked]

1. In Part 3 existing § 3.42 is hereby revoked.

2. In Part 121:

a. Section 121.1134 is revised to read as follows:

§ 121.1134 Folic acid (folacin).

Folic acid (folacin) may be safely added to a food for its vitamin property, provided the maximum intake of the food as may be consumed during a period of one day, or as directed for use in the case of a dietary supplement, will not result in daily ingestion of the additive in excess of 0.4 milligram for foods labeled without reference to age or psysiological state; and when age or the conditions of pregnancy or lactation are specified, in excess of 0.1 milligram for infants, 0.3 milligram for children under 4 years of age, 0.4 milligram for adults and children 4 or more years of age, and 0.8 milligram for pregnant or lactating women.

b. Section 121.1073 is amended by revising paragraph (a) to read as follows:

§ 121.1073 Potassium iodide.

• • • • •

(a) Potassium iodide may be safely added to a food as a source of the essential mineral iodine, provided the maximum intake of the food as may be consumed during a period of one day, or as directed for use in the case of a dietary supplement, will not result in daily ingestion of the additive so as to provide a total amount of iodine in excess of 225 micrograms for foods labeled without reference to age or physiological state; and when age or the conditions of pregnancy or lactation are specified, in excess of 45 micrograms for infants, 105 micrograms for children under 4 years of age, 225 micrograms for adults and children 4 or more years of age, and 300 micrograms for pregnant or lactating women.

• • • • •

c. Section 121.1149 is amended by revising the first sentence to read as follows:

§ 121.1119 Kelp.

Kelp may be safely added to a food as a source of the essential mineral iodine, provided the maximum intake of the food as may be consumed during a period of one day, or as directed for use in the case of a dietary supplement, will not result in daily ingestion of the additive so as to provide a total amount of iodine in excess of 225 micrograms for foods labeled without reference to age or physiological state; and when age or the conditions of pregnancy or lactation are specified, in excess of 45 micrograms for infants, 105 micrograms for children under 4 years of age, 225 micrograms for adults and children 4 or more years of age, and 300 micrograms for pregnant or lactating women. • • •

Any person who will be adversely affected by the foregoing order may at any time on or before September 4, 1973, file with the Hearing Clerk, Food and Drug Administration, Rm. 6–88, 5600 Fishers Lane, Rockville, MD 20852, written objections thereto. Objections shall show wherein the person filing will be adversely affected by the order, specify with particularity the provisions of the order deemed objectionable, and state the grounds for the objections. If a hearing is requested, the objections shall state the issues for the hearing, shall be supported by grounds factually and legally sufficient to justify the relief sought, and shall include a detailed description and analysis of the factual information intended to be presented in support of the objections in the event that a hearing is held. Objections may be accompanied by a memorandum or brief in support thereof. Six copies of all documents shall be filed. Received objections may be seen in the above office during working hours, Monday through Friday.

Effective date. This order shall become effective on August 2, 1973.

(Secs. 409, 701(a), 52 Stat. 1049, 1055; 21 U.S.C. 348, 371(a))

Dated: July 25, 1973.

A. M. SCHMIDT,
Commissioner of Food and Drugs.

[FR Doc.73-15704 Filed 8-1-73;8:45 am]

PART 11—STANDARDS OF QUALITY FOR FOODS FOR WHICH THERE ARE NO STANDARDS OF IDENTITY

A notice of proposed rulemaking was published in the FEDERAL REGISTER of September 23, 1972 (37 FR 20038) which set forth general principles for the establishment of microbiological quality standards for foods. The notice also contained proposed microbiological quality standards for frozen ready-to-eat banana, coconut, chocolate, or lemon cream-type pies and food grade gelatin. Interested persons were invited to submit coments on the proposal within 60 days.

A total of 25 comments were received. In support of the proposal were 6 consumer comments, and one comment each from a consumer organization, a health association, a State official and a food consultant. In opposition to the proposal were 12 comments from industry and industry associations, and one comment each from a consumer organization, a university research organization, and a food bacteriologist.

1. One comment stated it would be confusing to establish a standard of quality without defining the product in a standard of identity. Another comment considered it unreasonable to establish a standard of quality without establishing a standard of identity because of the close interrelationship between identity and quality. One comment questioned the establishment of microbiological quality standards only for foods having no standard of identity.

The Commissioner of Food and Drugs concludes that section 401 of the act authorizes the promulgation of a standard of quality for a food without establishing a standard of identity. The Commissioner also concludes that the product descriptions of cream-type pies and food grade gelatin in the regulations setting microbiological quality standards for those foods are sufficient to describe the foods subject to the standards. No comment indicated any confusion as to the foods to be subject to these first quality standards.

Creation of new Part II standards of quality for foods for which there are no standards of identity does not limit establishment of microbiological or other quality standards to nonstandarized foods. When a standard of identity exists for a food a microbiological quality standard for that food will be codified in the same part of the Code of Federal Regulations as the standard of identity. In the absence of a standard of identity, a microbiological or other quality standard will be included in the new Part II established by this order.

2. Comments opposing the proposal contended that microbial levels are not indicators of food quality because of the absence of a perceptible difference in organoleptic quality between a food with a microbial content within the proposed limits and a food having a microbial content in excess of the limits.

The Commissioner does not agree with these comments. The courts have long recognized that the proper scope of the act in regulating the quality of food is not limited to factors which are organoleptically perceptible to the consumer. Thus, for example, the Commissioner has established defect action levels for unavoidable filfth in food in the FEDERAL REGISTER of January 5, 1973 (38 FR 854), although organoleptically imperceptible to the consumer and posing no health risk. Indeed, those factors which a consumer cannot detect for himself, but which are important to him, are perhaps most deserving of attention by the Food and Drug Administration. The Commissioner concludes that it is reasonable and in the interest of consumers to establish microbiological quality standards for foods so that the consumer may have some assurance, where such standards have been promulgated, that only reasonable levels of microorganisms exist in the food. Microbial levels in foods are indicative of such elements of quality as the excellence of the raw materials and ingredients used, the degree of control present at the time of processing, and the distribution and storage conditions experienced by the food.

3. One comment suggested listing, for each food, bacteria that are considered pathogenic. One comment suggested that the proposal include the microbial level at which the product is considered adulterated. One comment considered certain statements in the preamble concerning pathogenic microorganisms inappropriate and inaccurate because the proposal does not pertain to public health matters. Two comments considered the reference to the Grade A milk standard as misleading and inappropriate for the reason that the Grade A milk standard was designed to protect the public health.

Pathogens in food are covered under the adulteration provisions of the act, and are not within the scope of these regulations which are limited to quality factors not involving adulteration. The purpose of statements in the proposal concerning pathogenic microorganisms is to draw the distinction between pathogenic microorganisms and microbiological quality standards. The reference made in the proposal to the Grade A milk standard was intended only to point out an existing microbial limit for a food.

4. A common suggestion of most of the opposing comments was that microbial limits should be established as guidelines under the good manufacturing practices (GMP) regulations (Part 128 of this chapter) in lieu of being promulgated as quality standards. The comments stressed that the establishment of microbial limits as GMP guidelines would place the emphasis and responsibility for microbial levels in food on the manufacturing process and the manufacturer.

The Commissioner concludes that mircobiological quality standards should be promulgated separately from the GMP regulations for several reasons. The GMP regulations are promulgated for the efficient enforcement of the adulteration provisions of the act, while the microbiological quality standards are not based on consideration of adulteration. The GMP regulations are generally limited to manufacturing procedures and usually do not extend to distribution and retail sale, while the consumer is entitled to be informed of excessive levels of microbial organisms regardless whether they result from manufacturing, distribution, or retailing practices. Where the need and sufficient data exist for the promulgation of a quality standard, it would not be in the interest of consumers to delay promulgation until an appropriate GMP could also be developed.

As stated in the proposal, compliance with the microbiological quality standards does not excuse failure to observe either the requirements of section 402(a)(4) of the act or the GMP regulations. Evidence obtained through a factory inspection indicating a violation of the GMP regulations renders the food unlawful, even though the food contains levels of microorganisms lower than those promulgated in a microbiological quality standard. Conversely, compliance with the GMP regulations and other requirements of the act does not excuse failure of a product to meet the microbiological quality standards.

5. Most of the comments opposing the proposal objected to the microbiological quality standards being applicable to a food after it leaves the direct control of the manufacturer. It was stated that a food in compliance with the standards when it leaves the manufacturer's control may subsequently experience an increase in microbial level causing it to fail to meet the standards.

The Commissioner is aware this situation could occur, as a result of abuse during shipping, storage, or retail sale. However, restricting application of the standards to the limited time the product is under the manufacturer's control would not assure that the product would be in compliance with the standards when it reached the consumer, and therefore, would not be in the interest of the consumer. The consumer rightly expects the quality of food to be adequately and continuously protected through the point of retail sale. Regulatory action can and will be taken against a product that is substandard in quality and which fails to bear the label statement of substandard quality, regardless whether the product deterioration occurred during manufacture or subsequently during distribution or retailing. This will provide incentive to manufacturers, distributors, and retailers to take positive measures to insure that foods are handled properly.

6. All but two of the opposing comments objected to the label statement of substandard quality. Many comments stated that a product so labeled would be unsaleable to the consumer. Some comments stated substandard food would be sold only in salvage stores and institutions to be used only by the underprivileged or unaware consumers. Several comments indicated that manufacturers would destroy substandard food rather than use the proposed label statement resulting in the loss of wholesome food, the cost of which would ultimately be borne by the consumer. Objections were made to the use of the word "bacteria" in the proposed label statement of substandard quality because it suggests a danger to health to the consumer. Suggestions were made that the statement of substandard quality provided for by § 10.7 (21 CFR 10.7) be used. One comment suggested use of the statement "This product does not meet the bacteria standards but is considered safe for human consumption."

The Commissioner agrees that many consumers will choose not to buy a substandard quality food labeled as such. Past experience indicates that few manufacturers destroy large lots of substandard quality food. Substandard quality food, when properly labeled as such, is a legitimate article of commerce and has been marketed for years. The marketing of food substandard in microbiological quality would be likely to follow the marketing patterns that already exist for substandard quality food. It is in the interest of consumers that an explicit informative label statement of substandard quality be required.

The statement of substandard quality provided in § 10.7 is not considered appropriate for foods substandard in microbiological quality for the reasons stated in the proposal. The Commissioner agrees that some consumers may relate the term "excessive bacteria" with danger to health. However, it is not possible to state that excess bacteria cannot create a health hazard. Therefore, the Commissioner concludes that this statement of substandard quality should not be changed.

7. Several comments objected that no reference was made to the fact that in certain foods microorganisms are deliberate, desirable ingredients. One comment stated that microbiological quality standards should not apply to canned foods.

The Commissioner recognizes that certain microorganisms are deliberate, desirable ingredients in some foods and in such instances cannot be considered as inverse factors of quality. The controlled use of microorganisms is useful and desirable to impart a particular flavor, odor or other desirable characteristic to food such as cheese and other dairy products. The proposal was not intended to effect any change in current good manufacturing practices in such controlled use of microorganisms, and microbiological quality standards would not be established which would prohibit the use of such desirable microorganisms. Microbiological quality standards would not be appropriate for sterilized foods or food processed and packaged to maintain commercial sterility, such as canned foods.

8. One of the opposing comments objected to the concept of microbiological quality because it does not conform to the definitions of "condition" and "quality" contained in the United States Department of Agriculture (USDA) regulations for food grades.

The terms "quality" and "condition" as used by USDA usually pertain to factors that are noticeable to the consumer. New Part 11 concerns factors of

V 38-148
AUG 2 73
XUM

quality which will usually be imperceptible to the consumer. Therefore, the Commissioner concludes that there is no conflict between the proposal and USDA regulations concerning food grades.

9. One comment indicated that microbiological quality standards could prevent a manufacturer currently using artificial ingredients from using natural flavors and spices that usually have higher microbial levels. Several comments questioned the proposal on the basis that the microbial level increases in some foods and decreases in others during storage. However, no data were submitted supporting the concept that the microbiological quality standards would limit the choice of ingredients and none were submitted concerning the change in microbial content during storage or distribution.

The Commissioner is aware that the microbial level in foods can be changed by storage and other conditions and is aware of variations in microbial levels of different ingredients. The existence of such variables was considered and is reflected in the microbial limits contained in the proposal. The existence of variations in microbial levels does not, however, justify excessive microbial levels above the quality standards, without a label statement advising consumers.

10. One comment questioned the application of microbiological quality standards for a food, such as food grade gelatin, which is often used as an ingredient of another food.

The Commissioner concludes that a standard of quality applies regardless whether the food is intended to be used or sold as such or is intended for use as an ingredient in another product. The standard of quality applies only to the food described in the standard and does not apply to another food solely on the basis that it contains the standardized food as an ingredient.

11. One comment suggested the use of a limit for enterococci in place of the coliform organism limit in the proposed standards because coliform organism counts are sharply reduced by freezing.

A limit for enterococci cannot be used at this time for frozen cream-type pies and food grade gelatin since the study providing the basis for the proposed standards did not include data on enterococci. Although coliform organisms may be more susceptible than enterococci to freezing temperatures, the level of coliforms is nevertheless a reasonable indicator of quality. The Food and Drug Administration has not used enterococcus determinations routinely because of limitations in determination procedures. Recent information indicates the methodology has improved and the routine use of enterococcus determinations is being studied.

12. Several comments claimed that the time required for microbial testing, production delays pending the test results, and the relabeling of a packaged lot would increase the cost of the food and could potentially cause higher microbial levels in the food. It was stated that it is impractical to delay the production process until the microbial test results of a lot in production are completed. It was further stated that if production was not delayed and the tests subsequently revealed a lot to be in excess of a microbial standard, each package in the lot would have to be uncased and relabeled.

Microbiological quality control testing of foods is not new or unique and the Commissioner concludes that such testing by food manufacturers is practicable. Adequate processing controls should make it unnecessary to delay production of a lot pending test results since the use of adequate quality controls would make the production of a substandard quality lot an infrequent occurrence. The time required for microbial tests does not exceed 96 hours and will not cause a serious problem for the manufacturer in holding a finished lot under his control until the test results are completed. The labeling of packaged lots is impractical on a routine basis but is a common method of correcting infrequent labeling errors. Although there will be some additional cost in establishing quality control procedures for those firms that do not now have adequate quality control procedures, it is not expected that significant increased costs would result from implementation of the proposal.

13. One industry comment suggested that the proposal allow the manufacturer to reprocess substandard quality lots for food use or to divert them to non-food use. No specific reprocessing procedures were suggested in the comment.

The Commissioner will not agree to any reprocessing procedure to bring substandard quality food into compliance with these standards unless it is clearly evident that such procedure will not cause the reprocessed food to be inferior in any respect. The diversion of substandard quality food to non-food use is not precluded by the regulation.

14. Some of the comments objected to the sampling and testing procedures of the proposal, stating that they were inflexible and required excessive testing. One comment suggested the terms "lot" and "unit" be defined.

The sole purpose of the sampling plan contained in the proposal is to specify the plan that will be used by the Food and Drug Administration to determine whether a lot is in compliance with the standard. The proposal does not require manufacturers or others to use the sampling plan. Manufacturers and others may use any type of sampling and testing plan they choose, but they should make certain that any plan used to check compliance with the standards will produce results compatible with those of the compliance plan contained in the regulation. Failure to institute adequate quality control procedures may substantially increase a manufacturer's risk of producing foods not in compliance with the proposed standards.

The terms used in the sampling and testing procedures of the proposal have been defined. For purposes of determining quality factors related to manufacture, processing, or packing, a lot is defined as a collection of primary containers or units of the same size, type, and style produced under conditions as nearly uniform as possible and usually designated by a common container code or marking, or in the absence of any common container code or marking a day's production. For purposes of determining quality factors related to distribution and storage, a lot is defined as a collection of primary containers or units transported, stored, or held under conditions as nearly uniform as possible. Examples of a "lot" are containers or units produced during the same shift or day, transported or stored as a single item of trade. A "sample" is a composite of 10 subsamples (consumer units), taken one from each of 10 different randomly chosen shipping cases, to be representative of a given lot. An "analytical unit" is defined as a portion of food taken from a subsample of a sample for the purpose of analysis.

15. One comment objected that the use of a microbial count limit does not allow the occasional high count lots to meet the standard. Another comment objected to the microbial limits being expressed as geometric means because this allows a sample with some very high count units to meet the standard. One comment stated that insufficient data were provided to properly evaluate the proposed microbial limits. One comment stated that it is not clear if the microbial limits apply to each individual unit or to the 10 units totally. Another comment suggested the proposal provide for a resampling of the lot to confirm the initial test.

Complete assurance that every container or unit of a lot is in compliance with the proposed standards would of course require destructive analysis of the entire lot. Therefore, a statistical approach involving analysis of a representative sample from the lot is appropriate. The Commissioner concludes that the proposed microbial limits, when applied to a lot sampled and tested in the manner set forth in the regulation, afford a reasonable basis for judgment of the microbiological quality of the lot and that it is not necessary or appropriate to conduct confirmatory resampling and retesting.

The sampling and analytical procedure requires that the microbiological quality of a lot be determined on the basis of the "geometric mean" (rather than a simple arithmetic average) of the analytical results derived from the ten analytical units. Microbial growth increases according to geometric progression. The most appropriate method of expressing the average of a group of data representing a geometric progression such as microbial levels is by the geometric mean. Also the geometric mean is less subject to distortion by the occasional high or low extreme encountered in microbial counts than is the more common arithmetic average. The Commissioner concludes that the sampling and testing procedures contained in the proposal have been evaluated statistically and judged to be satisfactory. Additional information in this regard may be obtained from the statistical staff of the Food and Drug Administration's Bureau of Foods. Should additional information become available that justifies any change in these procedures the standard will be amended.

16. Two comments questioned the disparity between the 5,000 grams aerobic plate count (APC) limit for pharmaceutical gelatin contained in the United States Pharmacopoeia (U.S.P.), 18th revision, and the 3,000 grams APC that is contained in the proposal for food grade gelatin.

These values cannot be compared directly since (a) the standard for food grade gelatin is based upon a geometric mean of the aerobic plate counts of the 10 units tested per sample, whereas the standard for pharmaceutical gelatin is based upon a count obtained from a dry composite of 1 gram portions from not less than 10 packages or containers of gelatin; (b) the bacterial growth medium used for pharmaceutical gelatin is not the same as that used for food grade gelatin, and (c) the incubation temperature specified for pharmaceutical grade gelatin is 30–35° C, whereas, 35° C is specified for food grade gelatin.

Both the plating medium and the incubation temperature used to determine the aerobic plate count will affect the apparent count. The selection of an aerobic plate count done using Standard Methods Agar and an incubation period of 35° C was made for food grade gelatin so that the methodology used for this food would be similar to that commonly used for other foods. The data on food grade gelatin used to create the proposed standard included aerobic plate count values for all manufacturers of food grade gelatin in the United States at the time of the survey and the data are based upon aerobic plate counts using Standard Methods Agar at 35° C. The Commissioner concludes that there is no conflict with the U.S.P. standard and that no change in the proposal is warranted.

17. One comment stated that the 3,000 APC is not feasible because of wide variability of plate counts on gelatin.

The data on food grade gelatin fully support the 3,000 grams APC level of the proposal. A higher APC level cannot be statistically justified based on the food grade gelatin data. The variability of plate count values was considered in establishing the proposed microbial levels.

18. One comment inquired if the microbial tests for cream-type pies are to be made on the entire pie including the crust or only on the pie filling.

The Commissioner advises that tests are to be made on the entire pie including the crust.

19. A comment from a food consultant recommended significantly lower microbial limits for frozen ready-to-eat cream-type pies and food grade gelatin.

Data were not submitted and the recommendation cannot be accepted without adequate supporting data.

20. After publishing this proposal, the Commissioner published an additional proposal for a standard of quality covering bottled water, for a food for which there is no standard of identity, in the FEDERAL REGISTER of January 8, 1973 (38 FR 1019). That proposed standard of quality relates to both microbiological and other quality factors. The Commissioner concluded that new Part 11 should be utilized for all standards of quality for foods for which there is no standard of identity, regardless whether the quality factors involve microbiological or other considerations. Accordingly, the term "microbiological" has been deleted from the heading of the new Part and Subpart A has been revised accordingly. The standard of quality for bottled water will be published in the FEDERAL REGISTER in the near future.

All comments and other relevant material have been carefully considered by the Commissioner and, where deemed to be appropriate, have been incorporated in the final regulation. Accordingly, the Commissioner concludes that standards should be promulgated as set forth below.

Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (secs. 401, 403, 701, 52 Stat. 1046, 1047, and 1055–1056, as amended by 70 Stat. 919 and 72 Stat. 948; 21 U.S.C. 341, 343, 371) and under the authority delegated to the Commissioner (21 CFR 2.120), Chapter I of Title 21 of the Code of Federal Regulations is amended by establishing a new Part 11 as follows:

Subpart A—General

Sec.
11.1 General principles.
11.2 Definitions.

Subpart B—Standards of Quality

11.5 Frozen ready-to-eat banana, coconut, chocolate, or lemon cream-type pies.
11.6 Food grade gelatin.

AUTHORITY: Secs. 401, 403, 701, 52 Stat. 1046, 1047, and 1055–1056, as amended by 70 Stat. 919 and 72 Stat. 948; 21 U.S.C. 341, 343, 371.

Subpart A—General

§ 11.1 General principles.

(a) The quality of a food depends upon numerous characteristics including but not limited to the levels of microorganisms and such physical factors as turbidity, color, flavor, and odor. Such characteristics are indicative of the quality of the raw materials and ingredients, the degree of quality control used in manufacture, processing, and packing, and the conditions of distribution and storage. The diversity of raw materials, food processing, and distribution practices, as well as the variation in quality factors important to consumers, requires that individual standards of quality be established for different types of food.

(b) A food which fails to meet the requirements of an applicable standard of quality promulgated pursuant to this Part shall be labeled as follows:

(1) The label shall bear the following statement of substandard quality: "Below Standard in Quality— _____", the blank to be filled in with whichever of the following are applicable:

(i) "Contains Excessive Bacteria".
(ii) "Excessively Turbid".
(iii) "Abnormal Color".
(iv) The phrase specified in the applicable standard of quality to describe any other quality deviation.

(2) The statement of substandard quality shall appear on the principal display panel or panels and shall immediately and conspicuously precede or follow, without intervening written, printed or graphic matter, the name of the food. The statement shall be printed in two lines of Cheltenham bold condensed caps. The words "Below Standard in Quality" constitute the first line and the specific quality deviation(s) constitutes the second and subsequent line(s) which immediately follows. The words shall be in letters which are not less in height than those required for the declaration of the net quantity of contents as specified in § 1.8b of this chapter. The statement shall be enclosed within lines, not less than one-sixteenth inch in width, forming a rectangle. The statement with enclosing lines, shall be printed on a strongly contrasting, uniform background.

(3) The general statement of substandard quality provided for by § 10.7 of this chapter may not be used to designate a food which fails to meet the requirements of an applicable standard of quality promulgated pursuant to this Part unless the applicable standard specifically provides for such use.

(c) Product descriptions included in a standard of quality promulgated pursuant to this Part are intended only to designate the class of foods to which the standards apply, and are not standards of identity for the products involved. Should a standard of identity later be established for any of these foods, the standard of quality will be recodified to appear in the same part of the regulations.

(d) The food characteristics included in a standard of quality published in this Part relate only to the quality of the food and not to compliance with any of the adulteration provision of section 402 of the act. Compliance with a standard of quality promulgated pursuant to this Part does not excuse failure to observe either the requirement of section 402(a)(4) of the act that food may not be prepared, packed, or held under insanitary conditions, or the provisions of Part 128 of this chapter requiring that food manufacturers must observe current food manufacturing practices. For example, evidence obtained through factory inspection indicating such a violation renders the food unlawful, even though the food contains levels of microorganisms lower than those prescribed by an applicable standard.

(e) The Commissioner of Food and Drugs, either on his own initiative or on behalf of any interested person who has submitted a petition, may publish a proposal to establish, amend, or repeal, under Subpart B of this Part, a regulation prescribing a standard of quality for a food. Any such petition shall include a proposed regulation together with an adequate factual basis to support the petition in the form set forth in § 2.65 of this chapter and will be published in the FEDERAL REGISTER for comment if it contains reasonable grounds for the proposed regulation.

V 38-148
AUG 2 73
XUM

§ 11.2 Definitions.

(a) A "lot" is:

(1) For purposes of determining quality factors related to manufacture, processing, or packing, a collection of primary containers or units of the same size, type, and style produced under conditions as nearly uniform as possible and usually designated by a common container code or marking, or in the absence of any common container code or marking, a day's production.

(2) For purposes of determining quality factors related to distribution and storage, a collection of primary containers or units transported, stored, or held under conditions as nearly uniform as possible.

(b) A "sample" is a composite of 10 subsamples (consumer units), taken one from each of 10 different randomly chosen shipping cases, to be representative of a given lot, unless otherwise specified in a specific quality standard in this Part.

(c) An "analytical unit" is a portion of food taken from a subsample of a sample for the purpose of analysis.

Subpart B—Standards of Quality

§ 11.5 Frozen ready-to-eat banana, coconut, chocolate, or lemon cream-type pies.

(a) For the purposes of this section a frozen ready-to-eat banana, coconut, chocolate, or lemon cream-type pie is a frozen ready-to-eat pie that is labeled as and/or has the physical and compositional characteristics of a cream-type pie, including but not limited to semi-solid filling and/or topping, and contains flavoring and/or fruit ingredients corresponding to the banana, coconut, chocolate, or lemon flavor representation made for such pie. It is made with or without a crust.

(b) A sample of a frozen ready-to-eat banana, coconut, chocolate, or lemon cream-type pie, as defined § 11.2(b) when examined by the methods described in sections 41.015 and 41.016 of the "Official Methods of Analysis of the Association of Official Analytical Chemists" 11th Ed. (1970),[1] shall meet standards of microbiological quality as follows:

(1) Aerobic plate count (geometric mean) ≤50,000 per gram.

(2) Coliform count (geometric mean) ≤50 per gram, MPN.

(c) If the microbiological quality of the cream-type pies described in paragraph (a) of this section falls below the standard prescribed by paragraph (b) of this section, the label shall bear the statement of substandard quality specified in § 11.1(b)(1)(i).

§ 11.6 Food grade gelatin.

(a) For the purposes of this section food grade gelatin is the high quality edible ground product that is labeled as and/or has the physical and compositional characteristics of gelatin. It is extracted from animal bones and tissues in accordance with current good manufacturing practices. In hot solution it does not have a foreign odor, is clear and of light color.

(b) A sample of food grade gelatin, as defined in § 11.2(b), when examined in accordance with the methods described in sections 41.015 and 41.016 of the "Official Methods of Analysis of the Association of Official Analytical Chemists," 11th Ed. (1970),[1] shall meet standards of microbiological quality as follows:

(1) Aerobic plate count (geometric mean) ≤30,000 per gram.

(2) Coliform count (geometric mean) ≤ 10 per gram, MPN. In the preparation for examination of an analytical unit, as defined in § 11.2(c), 10 grams are weighed out aseptically into a 90 milliliter sterile water blank containing glass beads held at 45° C., with intermittent shaking for not more than 15 minutes.

(c) If the microbiological quality of gelatin falls below the standard as prescribed by paragraph (b) of this section, the label shall bear the statement of substandard quality specified in § 11.1(b)(1)(i).

Any person who will be adversely affected by the foregoing order may at any time on or before September 4, 1973 file with the Hearing Clerk, Food and Drug Administration, Room 6–88, 5600 Fishers Lane, Rockville, MD 20852, written objections thereto. Objections shall show wherein the person filing will be adversely affected by the order, specify with particularity the provisions of the order deemed objectionable, and state the grounds for the objections. If a hearing is requested, the objections shall state the issues for the hearing, shall be supported by grounds factually and legally sufficient to justify the relief sought, and shall include a detailed description and analysis of the factual information intended to be presented in support of the objections in the event that a hearing is held. Objections may be accompanied by a memorandum or brief in support thereof. Six copies of all documents shall be filed. Received objections may be seen in the above office during working hours, Monday through Friday.

Effective date. This order shall be effective on February 4, 1974.

(Secs. 401, 403, 701, 52 Stat. 1046, 1047, and 1055–1056, as amended by 70 Stat. 919 and 72 Stat. 948; 21 U.S.C. 341, 343, 371)

Dated: July 25, 1973.

NOTE. Incorporation by reference provisions approved by the Director of the Federal Register March 26, 1973.

A. M. SCHMIDT,
Commissioner of Food and Drugs.

[FR Doc.73-15705 Filed 8-1-73;8:45 am]

PART 80—DEFINITIONS AND STANDARDS OF IDENTITY FOR FOOD FOR SPECIAL DIETARY USE

Dietary Supplements of Vitamins and Minerals

In the matter of establishing a definition and standard of identity for dietary supplements of vitamins and minerals:

The Commissioner of Food and Drugs published proposed findings of fact, proposed conclusions, and a tentative order in the FEDERAL REGISTER of January 19, 1973 (38 FR 2152), and allowed 60 days for the filing of written exceptions by any interested person whose appearance was filed at the hearing. The published document also included a history of the proceedings in the matter and an explanation of the scope of this action. Time for the filing of exceptions was subsequently extended through April 20, 1973 by notice published in the FEDERAL REGISTER on March 9, 1973 (38 FR 6396).

Exceptions to the order and the findings of fact were received from 35 persons whose appearance was filed at the hearing and one person who did not file such an appearance. In addition, approximately 790 postcards, form letters, and individual letters representing 1200 persons were received by the Hearing Clerk, objecting to the order. Over 20,000 similar letters objecting to the order, submitted to other government offices, were forwarded to the agency. None of these provided any substantive reasons for modifying the order. All exceptions filed have been considered and have been the basis of modification in the findings and in the order as set forth below. The Commissioner is aware of the Resolution adopted June 21, 1973, by the Association of Food and Drug officials of the United States at this year's annual conference in Rapid City, South Dakota, in which opposition to his January 19, 1973, tentative order is set forth. The views of that organization, as well as the views of the State officials which were individually expressed through their own response to the tentative order have been thoroughly considered in arriving at this final order.

1. Exceptions were received stating that the Commissioner was without authority to establish a standard of identity under section 401 of the act because standards of identity may be established only for individual food items and not for a class of foods, and because the authority to regulate foods for special dietary uses is limited to the authority expressly granted by section 403(j) of the act, which provides only for the use of informative labeling of this class of foods.

Section 401 of the act provides for the establishment of standards of identity for "any food". A full reading of the section reveals that the term "any food" includes a class of food, and is not limited to one specific food item. The section refers to a class of food as follows: "In prescribing a definition and standard of identity for any food or class of food . . .". In particular, this section specifically authorizes the establishment of a standard of identity for "citrus fruits" and "melons" both of which are classes of foods and not a specific food. It is also clear that the regulation of dietary supplements is not limited to the use of informative labeling as required by 21 U.S.C. 343(j). As was stated in Federal Security Administrator v. Quaker Oats Co., 318 U.S. 218, 230 (1943):

> Both the text and legislative history of the present statute plainly show that its purpose was not confined to a requirement of truthful and informative labeling. False and misleading labeling had been prohibited by the Pure Food and Drug Act of 1906, 21 U.S.C.A. 1 et seq. But it was found that such a prohibition was inadequate to protect the consumer from "economic adulteration", by which less expensive ingredients were substituted, or the proportion of more expensive ingredients diminished, so as to make the product, although not in itself deleterious, inferior to that which the consumer expected to receive when purchasing a product with the name under which it was sold. • • • The remedy chosen was not a requirement of informative labeling. Rather it was the purpose to authorize the Administrator to promulgate definitions and standards of identity "under which the integrity of food products can be effectively maintained" • • •

The Commissioner concludes that the establishment of a standard of identity is necessary to insure that rational dietary supplements, containing essential vitamins and minerals at proper levels and in scientifically justified combinations, are provided to the consumer. Paragraphs 1, 8, 9, 11, 12, and 13 of the Proposed Findings of Fact clearly demonstrate that informative labeling standing alone is not sufficient to protect the consumer from the deception referred to by the supreme Court in the *Quaker Oats* Case. Therefore, the Commissioner considers the exception to be unfounded and unwarranted.

2. Exceptions were received stating that the standard of identity for dietary supplements of vitamins and minerals will impede further research and development of new knowledge relative to dietary supplementation, including recognition of the possible essentiality of additional nutrients in human nutrition. The Commissioner is of the opinion that the standard of identity in no way impedes such research and development. Changes in the regulation will be proposed as more information on human nutrition becomes available, as provided in §§ 80.1(f)(2) and 80.1(b)(4). The Commissioner concludes that no changes are justified on this basis.

3. Exceptions were received stating that combinations of vitamins and minerals other than those specifically provided for in § 80.1(b) should be allowed. The Commissioner points out that this possibility was previously recognized in the discussion published in the FEDERAL REGISTER on January 19, 1973 (38 FR 2158), and that § 80.1(b)(4) of the tentative order specifically provided for petitions to be filed for addition to or amendment of the permissible combinations of vitamins and minerals contained in § 80.1(b)(1). The Commissioner has reviewed the record of the hearing and finds no persuasive justification for additional combinations at this time. The evidence strongly supports the inclusion of all vitamins and/or minerals in a dietary supplement as a means of eliminating the bewildering combinations now found in the market place. (Paragraph 10 of the Proposed Findings of Fact.) No evidence was submitted with the exceptions to support a sound scientific rationale for additional combinations. Therefore, no change in the final order is warranted.

4. Exceptions were received stating that the specific combinations provided for in § 80.1(b) are too restrictive in that certain persons may have allergies to one or more vitamins and thus would have to purchase and ingest each nonallergenic vitamin separately to adequately supplement the diet with a full complement of such vitamins. The exception is without merit. Allergies to certain vitamin preparations are not caused by a vitamin per se, but rather are due to constituents other than the vitamin in the source or ingredient which provides the vitamin. Section 80.1 requires full disclosure of the ingredients of each supplement, and thus the source of each vitamin or mineral supplied by a given product will be indicated to the consumers. Therefore, the consumer will be able to determine if the product contains any ingredient to which he may be allergic.

5. Exceptions were filed to the requirement that optional vitamins or optional minerals must be included as a group if present at all. The stated basis for these exceptions was the absence of the issue in the stayed regulation subject to public hearing, or the lack of testimony on the matter. The Commissioner notes that the concept of optional ingredients was a part of the stayed regulation published in the FEDERAL REGISTER December 14, 1966 (31 FR 15732), and that extensive testimony was received on the importance of completeness of formulation (paragraph 10 of the Proposed Findings of Fact) and on minimizing the multiplicity of formulations available to the public (paragraphs 3, 7, 10, 23, and 29 of the Proposed Findings of Fact). On the basis of these findings of fact and related information, the Commissioner concludes that no change is justified.

6. A request was received for clarification as to whether phosphorus may be omitted when zinc and copper are included in dietary supplements for pregnant or lactating women. As stated in the discussion on § 80.1 (38 FR 2159), "Phosphorus is not mandatory in dietary supplements for pregnant or lactating women because of evidence that supplemental phosphorus may increase the problem of leg cramps during pregnancy." It was thus intended that phosphorus may be omitted when zinc and copper are included in dietary supplements for pregnant or lactating women. For purposes of clarification, § 80.1(b)(1)(v) has been rewritten as follows:

"Inclusion of the optional ingredients vitamin D and/or phosphorus in a multivitamin, multimineral, or multivitamin and multimineral supplement does not require inclusion of any additional optional ingredients. Inclusion of the optional ingredients biotin and pantothenic acid and/or copper and zinc in such products does not require inclusion of vitamin D and/or phosphorus when the latter two nutrients are optional. The inclusion of any of the other optional ingredients (biotin or pantothemic acid for vitamins and copper or zinc for minerals) requires the inclusion of both such optional ingredients if the product is a multivitamin or multimineral supplement, and requires the inclusion of all four such ingredients if the product is a multivitamin and multimineral supplement."

7. Review of § 80.1(b)(5) has revealed that reference to § 125.1(c) was inconsistent with § 80.1(b)(5)(i) in that no U.S. Recommended Daily Allowances (RDA's) or compositional limits have been established for the nutrients listed in § 125.1(c). The Commissioner therefore finds that the words "and/or (c)" should be deleted from the first sentence of § 80.1(b)(5).

8. Exceptions were filed pointing out the inconsistency between § 80.1(b)(5)(i), which exempts foods containing nutrients at levels below the lower limits established pursuant to § 80.1(f)(1), and § 1.17(a)(2) (nutrition labeling), which provides that foods to which nutrients have been added that contain 50 percent or more of the U.S. RDA per serving of one or more of the added nutrients are dietary supplements and subject to the provisions of § 80.1. Since the lower limits do not equal 50 percent of the U.S. RDA's in all cases, the Commissioner concurs, and therefore § 80.1(b)(5)(i) is reworded as follows: "No such nutrient is contained at a level of 50 percent or more of the adult U.S. RDA per serving for that nutrient."

9. Review of § 80.1(b)(5)(iii) concerning foods in other than conventional forms reveals that such a provision is unnecessary. The Agency is unaware of any food other than dietary supplements which should exist in unconventional food forms. Therefore, § 80.1(b)(5)(iii) is deleted, and § 80.1(b)(5)(iv) is renumbered as § 80.1(b)(5)(iii).

10. Exceptions were received stating that the U.S. RDA's for specific consumer groups failed to insure that the special dietary requirements of infants (i.e., persons not more than 12 months of age) are properly identified and recognized. Noting the numerous exceptions concerning this issue, at the urging of the American Academy of Pediatrics, and after review of the Hearing Record and the Hearing Examiner's Report, the Commissioner concludes that, although the U.S. RDA's for infants and children under four years of age can safely be used by this entire group, as stated in paragraph 14 of the Proposed Findings of Fact for Part 125 and paragraph 15 of the Proposed Findings of Fact for § 80.1, there is a need to establish infant U.S. RDA's for the labeling of those foods intended for use primarily or solely by infants. (WD–3A–Sebrell Q&A 15, Lowe Tr. 12568–70). Therefore the Commissioner concludes that § 80.1(d) should be amended by including a separate group designation for infants and revising the designation for the group entitled "Infants and children under 4 years of age" to read "Children under 4 years of age". Elsewhere in this issue of the FEDERAL REGISTER appropriate U.S. RDA's for infants are being added to § 125.1(b), for the reasons stated. There-

[1] Copies may be obtained from: Association of Official Analytical Chemists P.O. Box 540, Benjamin Franklin Station Washington, DC 20044

V 38-148 AUG 2 73 XUM

fore, beginning with the third line, § 80.1 (d) is amended to read as follows:

For labeling purposes:
(1) Infants,
(2) Children under 4 years of age,
(3) Adults and children 4 or more years of age,
(4) Pregnant or lactating women.

11. Exceptions were received which stated that it was unclear how to classify a food which naturally contains one or more nutrients at a level of 50 percent or more of the applicable U.S. RDA's. Section 80.1(e) presently provides that any food which contains vitamins and minerals which are naturally occurring in the food at any level may be labeled as a conventional food. Such foods shall meet the requirements of § 80.1 or the drug labeling requirements only in the event that the food is represented as a dietary supplement or as a drug product for the treatment or prevention of disease. The Commissioner concludes that no change is warranted in § 80.1(e).

12. Exceptions were received requesting exemption of infant cereals fortified at levels equal to or in excess of 50 percent of the U.S. RDA's per serving. Review of the Hearing Record provides no support for such an exemption. The Commissioner reiterates that it is inappropriate to provide for fortification of conventional foods at nutrient levels which would result in gross overconsumption of vitamins and minerals in the diet, and that, with certain exceptions, any conventional food fortified in a way that any nutrient achieves a level of 50 percent or more of its U.S. RDA per serving will be regarded as a dietary supplement. No change in this provision is justified.

13. As a result of the establishment of separate U.S. RDA's for nutrients for infants in § 125.1(b), and the concommitant recognition that it is appropriate to provide for a dietary supplement designated for infants, either as a specified single user group or as one of several groups intended to be users of the product, the Commissioner amends the table in paragraph 36 of the Proposed Findings of Fact and in § 80.1(f)(1) by revising the heading for the group entitled "Infants and children under 4 years of age" to read "Children under 4 years of age", and by inserting the superscript "1" after this column heading. The footnote designated by this superscript reads:

When labeled for use by infants, a dietary supplement shall contain not less than the lower limit designated for a nutrient in this column nor more than 100% of the infant U.S. RDA for a nutrient as prescribed in § 125.1(b), except that the level of biotin, when used, shall be 0.05 mg per daily recommend quantity.

In effecting this amendment, the superscripts appearing in the table as previously published are changed to the next higher number. In addition, for the purpose of expanding the provisions of this section as indicted above, the Commissioner is further amending § 80.1(h)(3) to read as follows:

(3) The phrases used to designate the group(s) for which a dietary supplement is intended shall be as follows: (i) "For infants"; (ii) "For children under 4 years of age"; (iii) "For adults and children 4 or more years of age"; and (iv) "For pregnant and lactating women".

14. Exceptions were filed to the effect that the upper limits of nutrient content permitted for dietary supplements of vitamins and minerals were inadequate to meet the requirements of a proportion of the population for whom dietary supplements are intended. The primary basis of this objection was that the Recommended Daily Dietary Allowances (RDA's) of the Food and Nutrition Board, National Academy of Sciences—National Research Council, upon which most of the U.S. RDA's are based, are considered by those objecting to be inadequate to meet all of the vitamin and mineral requirements of this population segment. However, no evidence was presented at the hearing or with the exceptions to show that 150 percent of the U.S. RDA's is inadequate to meet the nutritional needs of all healthy individuals.

The Commissioner concurs with the conclusion of the Food and Nutrition Board that the RDA's represent levels that will provide for the adequate intake of essential nutrients in practically all normal healthy persons in the United States (paragraph 16 of the Proposed Findings of Fact). In order to provide for those few healthy individuals whose requirements may be higher, the upper limits were set at 150 percent of the U.S. RDA's except for those nutrients known to have significant toxic properties or side-effects.

The Commissioner notes that dietary supplements of vitamins and minerals are intended, as the name states, to be taken to supplement the diet as insurance in the event that an individual's diet may not include a full complement of essential vitamins and minerals, are not intended to be the sole source of vitamins and minerals, and are not intended for medicinal or therapeutic purposes. (Paragraph 4 of the Proposed Findings of Fact and discussion of proposed findings.) Thus, the 150 percent of the U.S. RDA for a nutrient available from a dietary supplement at the upper limit is in addition to the usually adequate amount of that nutrient available from a balanced diet of ordinary foods. Drugs containing higher levels of vitamins and minerals are also available without a prescription. It is therefore apparent that the nutritional needs of all normal healthy persons are quite adequately met.

15. Exceptions were filed objecting to the permissible ranges of nutrient content of dietary supplements, and to the permissible variability between nutrients in the same product. Statements were made recommending that all dietary supplements be limited to 100 percent of the U.S. RDA's, or that, if ranges are permitted, all nutrients in the same product should be present at the same U.S. RDA levels. The Commissioner refers to this matter in the discussion of the proposed findings for the tentative order published in the FEDERAL REGISTER January 19, 1973 (38 FR 2158) relating to paragraph 36 of the Proposed Findings of Fact. The Commissioner concludes that it is reasonable to permit up to 150 percent of the U.S. RDA's (except for vitamins A and D and folic acid) in order to cover the nutritional needs of all healthy persons and to provide a degree of flexibility in the composition of dietary supplements to exist at this time within the limits of modern nutrition knowledge. If abuses occur, changes in the regulation will be proposed.

16. Exceptions were received recommending that the nomenclature of certain of the water-soluble vitamins be changed to reflect the newer nomenclature accepted by the American Institute of Nutrition and the International Union of Nutrition Sciences, e.g., spelling thiamine without the "e", and writing "Vitamin B,", as "Vitamin B–1". The Commissioner recognizes that it is highly desirable ultimately to standardize nomenclature for all of the vitamins. The Food and Drug Administration uses the nomenclature of the United States Pharmacopeia and of the National Academy of Sciences. The Commissioner welcomes the continuing efforts to standardize nomenclature, but concludes that, for the present, the nomenclature should remain as stated.

17. Exceptions regarding folic acid requested clarification of nomenclature, levels set for the U.S. RDA's, the reference form, and analytical methodology. In regard to nomenclature, the Commissioner recognizes that the nutrition and biochemical scientific communities do not have a system of standard nomenclature for the family of compounds with folic acid activity. Review of the Hearing Record reveals considerable interchangeability in the use of terms relative to "folic acid" and "folacin". Until such time as the nomenclature matter is resolved by the scientific community, the Commissioner concludes that it is appropriate to continue the primary use of the most familiar term, "folic acid", and the optional additional use of the synonym, "folacin". In regard to the levels set for the U.S. RDA's, the Commissioner understands that the Recommended Daily Dietary Allowances (upon which most of the U.S. RDA's are based) set by the National Academy of Sciences are based upon the human requirements for pteroylmonoglutamic acid as the standard reference form. In regard to analytical methodology for folic acid, the method described in "Official Methods of Analysis of the Association of Official Analytical Chemists", Eleventh Ed., 1970 (pages 785–786) is an acceptable method for measurement of free forms of folic acid. Other methods are more appropriate for conjugated forms, an example of which is Ford, J. E. and Scott, K. J., *Journal of Dairy Research 35*, 85–90 (1968).

18. Exceptions were filed relative to the quantitative content of biotin, not on the basis of the U.S. RDA for the nutrient but upon the fact that there exists a limited supply of the nutrient available to manufacturers as well as a limited production capacity. The Commissioner recognizes the existence of a temporary shortage in commercial production of the nutrient, and therefore concludes that, until December 31, 1976, biotin when present in the product may be present in quantities down to a lower limit of 0.05 milligram per daily recommended quantity. Therefore, § 80.1(f)(1) is modified by adding the following footnote relative to biotin in the table in the paragraph: "'Lower limit may be 0.05 milligram until December 31, 1976."

19. Exceptions were filed recommending changes as to which nutrients are included in the mandatory and optional groups specified in the table in § 80.1(f)(1), e.g., the inclusions of zinc and copper in the mandatory group of minerals, the inclusion of pantothenic acid in the mandatory group of vitamins, and the inclusion of manganese in the optional group of minerals. As discussed in paragraphs 10 and 23 of the Proposed Findings of Fact (38 FR 2154–55) and in the discussion of the proposed findings, the mandatory and optional categories are based upon the presence or absence of specific quantitative requirements in human nutrition established by the National Academy of Sciences. The Commissioner reiterates, as stated in the tentative order for § 80.1(f)(2), that the components of the quantitative levels in the mandatory and optional groups of nutrients are subject to amendment from time to time as more information on human nutrition becomes available. At this time the Hearing Record and the exceptions provide no scientific basis of a change in these provisions.

20. Exceptions were received recommending that, for technological purposes, the lower permissible limits for calcium, phosphorus, and magnesium be set at 10 percent of the respective U.S. RDA's, on the basis that individual units might otherwise be excessively large for consumption and that 10 percent of the U.S. RDA has been recognized by the Food and Drug Administration as a significant contribution to the daily intake of a given nutrient. The Commissioner has reexplored the technological matters and concludes that the quantitative amounts established are reasonable, and that the Hearing Record and exceptions present no technological problems of significance likely to be encountered with these lower limits. The Commissioner reemphasizes that dietary supplements should contain a minimum of 50 percent of the U.S. RDA's of the essential vitamins and/or minerals per recommended daily quantity wherever possible. The lower limits for calcium, phosphorous, and magnesium are already at 12.5, 12.5, and 25 percent respectively, for purely technological reasons. The Commissioner concludes that no changes are warranted relative to this matter.

21. Exceptions were received recommending that the ratio of calcium to phosphorus in dietary supplements be equal to or greater than 1.0. The primary basis for this recommendation was the desirability of avoiding a situation wherein dietary supplements could adversely effect the calcium-to-phosphorus ratio of the daily diet. This is in accord with the basic nutrition principle that the dietary calcium-to-phosphorus ratio should be equal to or greater than 1.0, as pointed out in the discussion of the Proposed Findings of Fact. The Commissioner concurs that this is a reasonable adaptation of the 1968 Recommended Daily Dietary Allowances as published by the NAS–NRC (WD–3A–Sebrell, Q&A 15). Therefore, § 80.1(f)(1) is modified by adding the following sentence to footnote 5 relative to both mandatory and optional phosphorus in the table in the paragraph: "When present, the quantity of phosphorus may be no greater than the quantity of calcium."

22. Exceptions were received stating that the requirement for the common name of a dietary supplement to include a phrase or phrases designating the specific group(s) for which the supplement is represented was not at issue during the hearings and is not supportable by the published findings of fact. The Commissioner notes that one of the primary functions of the Hearing was to develop a fully informative labeling system for dietary supplements. Paragraphs 3, 14, 15 and 29 of the Proposed Findings of Fact clearly establish the need for a common or usual name which includes both the general composition of the supplement and the consumer group(s) for which the product is represented as suitable. Unless the specific group is designated it will be impossible for consumers to choose the correct product. Therefore, the Commissioner concludes that no changes in § 80.1(h)(1) are required or justified.

23. Exceptions were received stating that the Agency did not have authority to require a complete listing of all of the vitamins and minerals on the label if the product in fact meets the standard of identity. The exceptions specifically referred to recent Agency opinions which state that the Federal Food, Drug, and Cosmetic Act contains no authority to require the listing of mandatory ingredients in the standardized food.

Under section 401 of the act, all optional ingredients in the product may be required to be named on the label. Section 80.1(b) clearly states that the manufacturer at his option may include all vitamins, all minerals, all vitamins and minerals, all vitamins and the mineral iron, or any single vitamin or mineral. Because each of the combinations of vitamins and/or minerals chosen to be included in a dietary supplement is optional, all such nutrients in the combination chosen may be required to be named on the label pursuant to section 401 of the act. Section 403(j) of the act specifically provides that, as determined by the Secretary to be necessary, all foods for special dietary uses must bear on the label the vitamin, mineral, and other dietary properties which are necessary to fully inform purchasers of their nutritive value. Such a need has long been recognized in § 125.3, and paragraphs 3 and 16 of the Proposed Findings of Fact clearly demonstrate the need to continue such a requirement. The Commissioner therefore concludes that no change in the requirement for the listing of the vitamins and minerals is warranted.

24. Exceptions were received that, because of the small package size of many dietary supplements, use of both principal display and information panels for the listing of vitamins, minerals and ingredients should be allowed. The Commissioner points out that § 80.1(i)(1), as well as § 1.8d, provides for use of the information panel for such a listing if insufficient space is available on the principal display panel. Therefore, the requirement remains unchanged.

25. Exceptions were received stating that there was no evidence at the hearing to support the incorporation of § 1.8d requirements into § 0.1(i) and (1). The Commissioner concludes that paragraphs 31, 32, and 34 of the Proposed Findings of Fact support the need to require that dietary supplements be labeled in compliance with § 1.8d.

The information required to appear on the label or labeling could be misleading and lack sufficient prominence and conspicuousness to render it likely to be read and understood unless it appears in compliance with the requirement of § 1.8d. The Commissioner again wishes to emphasize that he recognizes that type size is only one element which determines conspicuousness (38 FR 6950). Section 1.8d specifically provides that any interested person may petition for a smaller type size or an alternative means of disseminating mandatory label information to the consumer, based on a showing of impracticability or economic hardship. Therefore, no modification is appropriate.

26. Exceptions were received indicating a need to clarify the intent of the first sentence in § 80.1(i)(4), and stating that the hearing evidence did not support any requirement to repeat the listing of the nutrients in the ingredient statement required in this paragraph.

The label for dietary supplements must contain a list of nutrients and a full statement of ingredients. The Commissioner recognizes that, by using the term "nutrient ingredients" exclusively in § 80.1(i)(4) and in § 80.1(l)(2), there may be a misunderstanding as to what substances are to be listed on the label pursuant to these provisions. It is the Commissioner's intent that all ingredients, i.e., those which are nutrients or the source of nutrients as well as those which serve only a technological function, be stated together in order of predominance in one ingredient statement. The natural source or chemical form of each individual nutrient present in the product must be stated rather than the nutrients themselves. To clarify this matter, the Commissioner amends the first sentence in both §§ 80.1(i)(4) and 80.1(l)(2) by deleting the word "nutrient".

27. Exceptions were made to § 80.1(k), which requires the product to contain not

V 38-148 AUG 2 73 XUM

less than the quantity of each vitamin and/or mineral as set forth in its label when consumed. It is contended that such a requirement fails to recognize variances due to manufacturing and storage practices. Such exception is without exception is without merit. The total quantity of vitamins or minerals in a supplement when consumed should be no less than the amount declared. The manufacturer will be allowed reasonable overages to insure that the vitamin and mineral content of a product does not fall below the declared amount due to heat, light, oxidation, storage, transportation, or unavoidable deviation in good manufacturing practices (paragraph 35 of the Proposed Findings of Fact). The Commissioner concludes no change is warranted.

28. Exceptions were received concerning § 80.1(m) which states that the labeling for a dietary supplement shall be subject to the prohibitions contained in § 125.2(b). All of these exceptions have been fully discussed in the final order on Part 125 which is published elsewhere in this issue of the FEDERAL REGISTER. The Commissioner, in addition to the findings of fact relied upon there, relies also upon paragraphs 8, 21, 32 and 33 of the Proposed Findings of Fact for Part 80 as hearing evidence which clearly demonstrates the necessity of retaining § 80.1(m).

29. Exceptions were received objecting to paragraphs 4, 8 and 11 of the Proposed Findings of Fact on the ground that these findings indicate the appropriate uses of therapeutic formulations of vitamins and minerals. The exceptions argued that the appropriate uses of therapeutic formulation should be determined during the course of the OTC drug review and not in this proceeding. The Commissioner has reviewed each of the findings of fact in question and concludes no change or modification is required. None of these findings relate to drug products. To clarify this issue, an additional Finding of Fact 37 will be added which provides that it is the intent of the Commissioner that the appropriate uses of therapeutic formulations of vitamins and minerals (i.e., those defined as a drug under § 125.1(h) are to be determined during the course of the OTC drug review):

These regulations interpret and apply sections 403 (a) and (j) of the act, by prescribing requirements for label information necessary in order fully to inform purchasers of the value of dietary supplements, which are foods for special dietary use, and to prevent false or misleading labeling of such foods. Neither the findings of fact nor the regulations relate to or affect vitamin-mineral products which are classified as "drugs". It is the intent of the Food and Drug Administration that the safety, effectiveness, and labeling of OTC vitamin-mineral drugs be determined through the separate OTC drug review for vitamin-mineral drugs as provided in 21 CFR 130.301. The OTC vitamin-mineral drug review panel will make its own independent inquiry on these matters.

30. A number of the exceptions and letters raised general questions about the Food and Drug Administration's overall policy on vitamin-mineral products. These general questions were also the subject of an inquiry from five members of Congress, the response to which has been reprinted in the Congressional Record of July 12, 1973 (119 Cong. Rec. S13214–S13220). In lieu of reiterating the lengthy discussion in that response, the Commissioner hereby incorporates it by reference and advises that it accurately reflects the basis for and his interpretation and application of these regulations.

Having considered the evidence received at the hearing, the Hearing Examiner's Report, and all the exceptions and written arguments which were filed, the Commissioner, pursuant to the Federal Food, Drug, and Cosmetic Act (secs. 201(n), 401, 403(a) and (j), 701(a) and (e), 52 Stat. 1046, 1048, 1055, as amended by 70 Stat. 919; 21 U.S.C. 321(n), 341, 343(a) and (j), 371(a) and (e)) and under authority delegated to him (21 CFR 2.120), issues the following findings of fact, conclusions and final order:

FINDINGS OF FACT[1]

1. The hearings have shown that there is a need to establish a definition for dietary supplements, and to describe what is a rational composition for dietary supplements in terms of the vitamins and minerals present, and the quantities allowed.

2. The apparent appeal to consumers which results from the addition of vitamins and minerals to food articles, with concurrent promotion calling attention to this fact, has resulted in ever increasing amounts, qualitatively and quantitatively, of these nutrients being added to various foods (Weissenburg, Tr. 8569–8570; Exhibit P–1151, page C1). In many cases, foods, particularly some cereal products, have become the equivalent of multivitamin/multimineral dietary supplements in terms of their added nutrient contents (Weissenberg, Tr. 8584; WD–G–Gullberg, Q&A 35).

3. The establishment of a standard of identity and quantitative limits for the nutrient ingredients in dietary supplements will reduce consumer confusion concerning choice of dietary supplements by insuring a basically rational formula for all products (Mayer, Tr. 28868; WD–G–Gullberg, Q&A 31).

4. Dietary supplements are articles purporting to be or represented for special dietary use by man to supplement his diet by increasing the total dietary intake of vitamins and/or minerals. They may be prepared as tablets, capsules, pills, wafers, or similar uniform units, and/or in powder, granular, flake or liquid form (Grollman, Tr. 1660; Mickelsen, Tr. 2421–2424; Hodges, Tr. 2874; Herbert, Tr. 9859; Garrett, Tr. 10943; WD–G–Ross, Q&A 14). The proper use of dietary supplements of vitamins and/or minerals is for short-term correction of specific inadequacy of intake (Hodges, Tr. 2874–2875; Herbert, Tr. 9860, 9922–9923). They are not intended for therapeutic use for the correction of disorders in humans by the administration of large amounts of specific nutrients (Grollman, Tr. 1680–1682; Herbert, Tr. 9896; Hodges, Tr. 2937–2940, 2970–2971; WD–G–Harrison, Q&A 22; WD–3A–Sebrell, Q&A 44; WD–G–Schaefer, Q&A 36, 37).

5. Vitamins are organic substances, present in foods, which are essential for the maintenance of human life and the activity of the cells of the body (Grollman, Tr. 1624–1625; WD–3A–Sebrell, Q&A 4). These include vitamins A, D, E, K, C (ascorbic acid), B_1 (thiamine), B_2 (riboflavin), B_6, and B_{12}, niacin, folic acid (folacin), biotin, and pantothenic acid (Exh. P–651; Grollman, Tr. 1625–1627).

6. Essential mineral nutrients include the inorganic elements calcium, phosphorus, iodine, iron, magnesium, copper, zinc, sodium, potassium, and manganese. They are needed by the human body in varying amounts, and are utilized in a variety of metabolic processes (WD–3A–Sebrell, Q&A 4).

7. The sale and use of vitamin/mineral preparations in the United States are extensive, running into hundreds of millions of dollars annually in wholesale bulk value, and involve three-fourths of American households (Exh. P–735; Exh. P–1151, pages B1 and B2). The majority of such preparations differ qualitatively and quantitatively from each other, presenting a bewildering variety to the consumer (Weissenberg, Tr. 5998, 6551–6552, 8752–8756; WD–G–Gullberg, Q&A 14, 26; Exhibits P–2, P–3, P–8, P–9, P–40–42, P–47, P–51–54, P–57–59, P–61–70, P–72–74, P–76–78, P–80–153, P–156–163, P–165–174, P–188, P–194–349, P–398, P–399, P–400, P–402–404, P–468, P–471, P–564, P–567, P–575–579, P–582–594, P–596–597, P–599, P–600, P–613).

8. Many dietary supplements are nutritionally irrational, in that they provide quantitative levels and qualitative combinations of nutrients for which no human individual need could possibly exist, if the products are used only as dietary supplements (Grollman, Tr. 1683 (Exhibit P–84), 1686 (Exhibit P–89), 1688 (Exhibit P–94), 1691 (Exhibit P–95), 1696 (Exhibit P–102), 1699 (Exhibit P–113), 1701–1702 (Exhibit P–113), 1707–1709 (Exhibit P–124), 1713 (Exhibit P–157), 1714 (Exhibit P–158); Mickelsen, Tr. 2447–2447A (Exhibit P–166), 2448–2450 (Exhibit P–168), 2451–2452 (Exhibit P–169), 2455–2457 (Exhibit P–171); Hodges, Tr. 2942 (Exhibit P–183); Herbert, Tr. 9898–9899 (Exhibit P–232); Weissenberg, Tr. 6553–6554; WD–G–Gullberg, Q&A 26; Exhibits P–588, P–595). Lay persons are incapable of determining, by themselves, whether they have or are likely to develop vitamin or mineral deficiencies (Grollman, Tr. 1771–2, 1782; Herbert, Tr. 9961, 9979–80, 10,029; Unglaub, Tr. 28,942; Wallerstein, Tr. 28,989; Hodges, Tr. 2994–5; Mickelsen, Tr. 2520; Mayer, Tr. 28,892–3).

9. Although approximately 20 percent of the users of dietary supplements of vitamins and minerals actually use those articles to supplement or balance their diet, more than 40 percent of those persons admit they have no idea which vitamins or minerals, if any, are not sufficiently supplied by their diet (Exhibit P–1151, page B4, Q&A 4b).

10. Certain basic vitamins and/or minerals should be included in all articles offered as multivitamin and/or multimineral supplements. The remaining group of appropriate vitamins and/or minerals are considered to be scientifically optional for inclusion (Herbert, Tr. 9880–9882). The mandatory group of vitamins and/or minerals found in multivitamin and/or multimineral supplements should include all those listed in the table entitled "Recommended Daily Dietary Allowances, Revised 1968" in publication 1694 of the National Academy of Sciences (WD–43–Filer, pp. 19–20; WD–33–Coursin, p. 23; WD–33–Emerson, p. 9; WD–33–Brin, pp. 23–24; WD–33–Krehl, pp. 8–9, Tr. 27216–27217, 27255–27256; WD–33–Horwitt, pp. 12–14; Hodges, Tr. 2878–2879, 2945–2946, 6813, 7007).

11. Many dietary supplements contain such high amounts of nutrients that they are appropriate only for therapeutic use, for persons already in a deficiency state (Hodges, Tr. 2939–40). Some of these contain potentially toxic amounts of certain vitamins (Herbert, Tr. 9891; Grollman, Tr. 1711; Exhs. P–113, P–183, P–594). There is a sound scientific basis for establishing quantitative maximums on the nutrient ingredients in a dietary supplement (Herbert, Tr. 9900–9904; WD–G–Ross, Q. & A. 17, 18; WD–G–Harrison, Q. & A. 22). This is based on the rapid excretion of excesses of certain nutrients without benefit to the consumer, as well as on the potential problems of toxicity or nutritional imbalances due to excessive ingestion of certain nutrients (Grollman, Tr. 1666–1669; Herbert, Tr. 9861–9862; Mickelsen, Tr. 2433–2434; WD–3A–Sebrell, Q. & A. 24, 25; Polack, Tr. 4954–4955; Exh. P–1142).

12. Some dietary supplements contain so little of a named nutrient as to be insignificant in human nutrition (Swain, Tr. 233, 488; Grollman, Tr. 1695–1696 (Exh. P–102); Mickelsen, Tr. 2448 (Exh. P–167), 2451 (Exh. P–169), 2456 (Exh. P–171), 2469 (Exh. P–173); Hodges, Tr. 2935 (Exh. P–180); WD–G–Gullberg, Q&A 26). There is a sound scientific basis for establishing quantitative minimums on the nutrient ingredients for dietary supplements since only substantial amounts of nutrients should be represented for purposes of dietary supplementation (Herbert, Tr. 9867; WD–G–Harrison, Q&A 24; Boehne, Tr. 2764; WD–3A–Sebrell, Q&A 26, 27, 39).

13. Certain dietary supplements are objectionable because they must be taken in large numbers of units for the user to get the designated amounts of the nutrients involved (Grollman, Tr. 1685 (Exhibit P–89); Hodges, Tr. 2936 (Exhibit P–180); Exhibits P–179, P–359, P–368, P–383, P–395). In establishing a standard of identity for dietary supplements it is medically and pharmacologically sound to establish a standard of identity for dietary supplements on the basis of units suitable for and practical of consumption in one day (Grollman, Tr. 1661; Hodges, Tr. 2956).

14. There are demonstrable distinctions among the nutritional requirements of infants and young children, and pregnant or lactating women, as compared to the nutritional requirements of adults (Michelsen, Tr. 2424–2427; Grollman, Tr. 1665; Hodges, Tr. 2877–2878; Herbert, Tr. 9944; WD–3A–Sebrell, Q&A 15, 16, 19 and 28; WD–G–Ross, Q&A 23; Boehne, Tr. 2741–2759).

15. There is scientific or medical justification for selecting an age separation at 4 years of age for the purpose of establishing a basis for dietary supplements (WD–33–Krehl, pp. 5–8; WD–33–Emerson, pp. 4–5; WD–43–Filer, p. 21). The recommended daily dietary allowances of the Food and Nutrition Board, NAS–NRC, for 2- to 3-year-olds can safely be used by infants and 1- to 2-year-olds, and the maximum values for the under 4-year-old group can be used for all infants and children under 4 years of age (WD–33–Krehl, pp. 6–7; Hodges, Tr. 2, 877–8; WD–43–Graham; and WD–43–Filer, p. 21).

16. The "Recommended Dietary Allowances," revised periodically by the Food and Nutrition Board of the National Research Council, National Academy of Sciences, represent established nutrient levels that are quantitatively high enough to provide for the adequate intake of essential nutrients under the wide variety of conditions that exist in this country for essentially all of the normal healthy persons in the United States. Furthermore, these levels are reviewed, discussed, and accepted by numerous scientists and, therefore, are considered to be extremely reliable. (Hodges, Tr. 2880, 2919, 2964–65; Grollman, Tr. 1670, 1763; Mickelsen, Tr. 2438–39; Herbert, Tr. 9865–67; WD–G–Harrison, Q&A 23; Schweigert, Tr. 8257, 8260; WD–G–Gullberg, Q&A 19; Exhibit P–651; Sebrell, Tr. 26, 181).

17. Publication No. 1694 of the National Academy of Sciences entitled "Recommended Dietary Allowances, Seventh Revised Edition, 1968, A Report of the Food and Nutrition Board, National Research Council," and subsequent editions, should be used as the source of authentic and reliable information on which to base recommended daily allowances of nutrients (WD–3A–Sebrell, Q&A 9, 10, 18, 19, Tr. 26181; Hodges, Tr. 2917; Herbert, Tr. 9865; WD–G–Harrison, Q&A 14, 23, 26, 27; WD–G–Ross, Q&A 65).

18. Recommended dietary allowances adapted from publication 1694 of the National Academy of Sciences are sufficiently above the average requirement for particular nutrients to cover the needs of between 95 percent and 99 percent of the normal healthy population (Hodges, Tr. 7083; WD–46–Olsen, page 7, Tr. 29466–67; Jukes, Tr. 28688; Briggs, Tr. 28761; Mayer, Tr. 28865–66; Stokstad, Tr. 26742; Goodhart, Tr. 30169–70; Stare, Tr. 29280; WD–G–Ross p. 5).

19. The identity and levels of nutrients in the NAS–NRC Recommended Dietary Allowances are extremely reliable since they are reviewed and discussed by large numbers of scientists and brought up for revision approximately every 5 years (Mickelsen, Tr. 2438–2439); Hodges, Tr. 2880; Sebrell, Tr. 26181). They are the best basis on which to establish a standard of identity for dietary supplements of vitamins and minerals in the United States (Grollman, Tr. 1670; Mickelsen, Tr. 2438; Herbert, Tr. 9864–9865; WD–3A–Sebrell, Q&A 5–7; Sebrell, Tr. 26181; WD–G–Ross, Q&A 19). Publication 1694 of the National Academy of Sciences, entitled "Recommended Dietary Allowances, Seventh Revised Edition, 1968, A Report of the Food and Nutrition Board, National Research Council", should be used as the source of authentic and reliable information on which to base a standard of identity for dietary supplements of vitamins and minerals (Exhibit P–651). Values for essential nutrients (to be designated as "U.S. Recommended Daily Allowances (U.S. RDA's)") may reasonably be derived from the table and sections in the text of this publication (WD–3A–Sebrell, Q&A 15).

20. The human body has the capacity to store varying amounts of almost all vitamins as reserves to be drawn upon when needed (Mickelsen, Tr. 2436). Fat-soluble vitamins, particularly vitamins A and D, are readily stored for relatively long periods of time, while excesses of the water-soluble vitamins are excreted more rapidly (Grollman, Tr. 1628–1629; Mickelsen, Tr. 2645; WD–3A–Sebrell, Q&A 4). The excessive ingestion of the fat-soluble vitamins A and D, because of their relatively high retention by the human body, poses a potential danger of toxicity (Mickelsen, Tr. 2644–2645; Hodges, Tr. 2956; WD–G–Ross, Q&A 18; WD–G–Harrison, Q&A 22; Herbert, Tr. 9891).

21. The nutrients which are scientifically appropriate for inclusion in dietary supplements in the United States are (1) the vitamins A, C, D, E, folic acid, niacin, riboflavin, thiamine, B_6, B_{12}, biotin, and pantothenic acid; and (2) the minerals calcium, phosphorus, iodine, iron, magnesium, copper, and zinc (Hodges Tr. 2879; Grollman, Tr. 1662; Mickelsen, Tr. 2427–2430; Herbert, Tr. 9861, 9868, 9881; Krehl, Tr. 27, 216–27, WD–G–Ross, Q. & A. 15, 16; WD–G–Harrison, Q. & A. 20; Exhibit P–651).

22. The establishment of qualitative and quantitative limits on the composition of dietary supplements will reduce consumer confusion concerning choice of dietary supplements by ensuring a basically rational formula for all products (WD–G–Gullberg, Q. & A. 31, Weissenberg, Tr. 7737).

23. From among these nutrients, appropriate for inclusion in dietary supplements, certain basic vitamins and/or minerals should be included in all articles offered as multivitamin and/or multimineral supplements (Herbert, Tr. 9880–81). Conversely, certain vitamins and minerals are, scientifically, optional in

[1] The abbreviations in the citations are:

P.—For exhibits introduced by the Government, the proponent.
O.—For exhibits introduced by opponents.
WD–G—For written direct testimony by a witness for the Government.
WD–3A—For written direct testimony by a witness for the designated opponent (e.g. "3A").
Q&A—Question and answer.

V38-148 AUG 2 73 XUM

terms of whether or not they should be included in a multivitamin and/or multimineral supplement (Herbert, Tr. 9882).

24. A gross excess of folic acid intake on the part of human beings can interfere with the diagnosis of pernicious anemia as it masks the hematological manifestations of vitamin B_{12} deficiencies. (Herbert, Tr. 9872–73.)

25. While people in the United States appear to have some understanding of the comparatively greater requirements for iron experienced by many women during their child-bearing years, this appears to have affected opinion about other nutrients, since well over a third of the population believes that women need more vitamins than men (Exhibit P–1151, page B13, questions 20, 20a, 21, 21a). However, when iron is not named, only 16 percent of the population expresses an opinion that there is any difference in the mineral requirements of men and women (Exhibit P–1151, page B14, question 22).

26. All vitamins are specific chemical compounds. Each has the same composition and effect whether it is synthetically produced or derived from natural sources. (Grollman, Tr. 1758–1759; Mickelsen, Tr. 2471; Hodges, Tr. 2958–2959, 2962; Herbert, Tr. 9937–9938; WD–G–Harrison, Q&A 36).

27. It is pharmacologically necessary to allow, in a standard of identity for dietary supplements, for the inclusion of preservatives, stabilizers, colors, sweeteners, seasoning, carriers, bases, vehicles, and other substances which facilitate preparation of the product. However, no greater quantity of any such substances should be allowed to be included than is necessary to establish the desired physical or technical effect. Furthermore, the biological availability of the nutrients in the dietary supplement should not be impaired by the presence of such substances. (Grollman, Tr. 1752; Garrett, Tr. 11039).

28. Lack of a common language for identifying nutrients in dietary supplements has resulted in use of highly inappropriate names, having no or imprecise scientific meaning. The resultant wide variation in the manner of qualitatively naming and quantitatively declaring the nutrients in a dietary supplement on its label also extends to artificial colors, artificial flavors, and preservatives used in producing the supplement. (Grollman, Tr. 1698–1699, 1724; Herbert, Tr. 9891, 9896–9897; Weissenberg, Tr. 6623–6626, 8763–8764, 8789–8791; Exhs. P–113, P–161, P–311, P–95, P–152).

29. The use of standardized common names for various forms of dietary supplements will aid in more fully informing purchasers of the nature and value of these articles. The following common names are scientifically meaningful and accurate designations for the various supplements involved:

(a) "Multivitamin and multimineral supplement", for a dietary supplement which contains all of the mandatory vitamins and mandatory minerals listed in the table under § 80.1(f).

(b) "Multivitamin supplement", for a dietary supplement which contains all of the mandatory vitamins listed in the table under § 80.1(f).

(c) "Multimineral supplement", for a dietary supplement which contains all of the mandatory minerals listed in the table under § 80.1(f).

(d) "Multivitamin and iron supplement" or "multivitamin supplement with iron", for a dietary supplement which contains all of the mandatory vitamins listed in the table under § 80.1(f) plus the mineral iron.

(e) "_____ supplement", for a dietary supplement which contains a single vitamin or mineral listed in the table under § 80.1(f), the blank to be filled in with the name of the vitamin or mineral which the supplement purports or is represented to contain. (Grollman, Tr. 1753; Hodges, Tr. 2945–54; Mickelsen, Tr. 2487; Herbert, Tr. 9882, 9884–91; WD–G–Ross, Q&A 28–33; WD–G–Harrison, Q&A 30–33.

30. It is scientifically correct and necessary for the purpose of determining the value of a dietary supplement as a food which is purported to be or is represented for a special dietary use that the label thereof bear a statement stating the amount and percentage of the recommended daily allowance of each vitamin and/or mineral which the supplement contains in a specified daily quantity, such a statement being given for each consumer group for which the supplement is offered (Herbert, Tr. 9944–9946; Grollman, Tr. 1762; Hodges, Tr. 2964–2967; WD–G–Ross, Q&A 63; Mickelsen, Tr. 2685–2687). It is also necessary that clear directions for frequency of ingestion be stated on the label (Grollman, Tr. 1758; Hodges, Tr. 2955–2956; Herbert, Tr. 9937).

31. Reasons for a consumer desiring to know the sources of the nutrients in a dietary supplement include: (1) A medical need to have exact knowledge of all potential allergens encountered by a patient (WD–23–Kailin, Q&A 22; Lowe, Tr. 12579); and (2) religious or philosophical needs to know the components of one's total diet (WD–58–Morgan; WD–58–Prazenka; WD–58–Pietz; WD–23–Desmone; WD–23–Singer; WD–58–Pelc; WD–58–Curtis; WD–58–Taylor; WD–32–Hill).

32. Many dietary supplements include named ingredients which are of no value as supplements to the human diet (Grollman, Tr. 1626, 1675–77, 1707, Exhibit P–125; Mickelsen, Tr. 2464–65 (Exhibit P–172), 2469 (Exhibit P–173); Hodges, Tr. 2933 (Exhibit P–179), 2936, (Exhibit P–180); Herbert, Tr. 9891 (Exhibit P–113), 9899 (Exhibit P–468; Swain, Tr. 185–191, 213, 220, 221, 223, 229–231, 255, 264, 269, 336, 397, 442, 447, 455, 469, 475, 476, 487; Weissenberg, Tr. 8761, 6402, 5949, Exhibits P–576, P–591). However, many consumers will purchase such products with long lists of ingredients, believing them to be of better value than products with a lesser number of ingredients (WD–G–Perloff, Q&A 38–41; Exh. P–1151, page B9, questions 13, 14). Such consumers believe that if an ingredient is listed, it must significantly contribute to the value of the product as a dietary supplement (WD–G–Perloff, Q&A 18, 19; Exh. P–737). The label of a dietary supplement, as a food for special dietary use, should bear a statement of usefulness consisting of a list of the nutrient ingredients which provide the special use characteristics. The list of such ingredients should be limited to those which are of significant value and need in human nutrition as components of dietary supplements (Grollman, Tr. 1766; Hodges, Tr. 2969–2970; Mickelsen, Tr. 2518–2520; WD–G–Moses, Q&A–33; WD–G–Ross, Q&A 59–61).

33. A large proportion of the population of the United States is likely to choose dietary supplements, the ingredients of which are described as "natural" or from "natural sources", on the basis that "natural" constituents are superior to "synthetic" constituents (WD-G-Perloff, Q&A 44–46; Exhibit P–1151, pages B–10 and B–11, questions 16, 16a, 16b). There are many dietary supplements on the market which stress the "natural" source of their constituents (Swain, Tr. 234, 477; Weissenberg, Tr. 6554–6556, 8757–8758; Exhibits P–6, P–35, P–40–43, P–54, P–66–68, P–70, P–74), although this fact is of no nutritional significance (Grollman, Tr. 1758–1759; Mickelsen, Tr. 2471; Hodges, Tr. 2933, 2958–2959, 2962; Herbert, Tr. 9937–9938; WD-G-Harrison, Q&A 36).

34. It is medically and nutritionally appropriate to identify, on the label, chemical preservatives used in a dietary supplement, as well as to indicate on the label that artificial sweetener, artificial coloring, or artificial flavoring has been added to the article, if such is the case. In addition to these and the identification of the nutrients in the supplement, there is also the necessity for identifying alcohol, if present (Grollman, Tr. 1758; Hodges, Tr. 2956–2957; Herbert, Tr. 9941–9942). When alcohol is included as an ingredient in a dietary supplement, it is necessary, from a medical point of view, that the amount of alcohol contained in the dietary supplement by expressed on the label as a percent by volume (Grollman, Tr. 1705, 1760–1761; Hodges, Tr. 2956; Herbert, Tr. 9942).

35. Dietary supplements have been found on the market containing levels of vitamins below declared strength (Weissenberg, Tr. 8769–8770; Deutsch, Tr. 11147–11151; Garrett, Tr. 10986). Under certain ordinary and usual conditions of shipment, storage, and shelf-life, some vitamins and minerals in dietary supplements deteriorate, affecting the nutritional quality of the supplement (Grollman, Tr. 1761; Mickelsen, Tr. 2489; Hodges, Tr. 2963–2964; Herbert, Tr. 9942–9943; Garrett, Tr. 10943 et seq.). Based upon known rates of deterioration, it is technologically feasible to determine an appropriate expiration date for dietary supplements beyond which they should not be sold in the event deterioration actually occurs (Garrett, Tr. 10981 et seq.; Exhs. P–659, P–660). In the interest of consumers, it is reasonable and necessary to require that a manufacturer, packer, or distributor of dietary supplements containing vitamins and/or minerals determine an appropriate expiration date for his product, based on deterioration data under specified or customary conditions of handling and storage as indicated on the label, and that the expiration date be indicated when the supplement is offered for sale. (Garrett, Tr. 10978–10981, 11013–11015; Grollman, Tr. 1762; Hodges, Tr. 2963–2964; Mickelsen, Tr. 2489–2490; Herbert, Tr. 9943; WD–G–Gullberg, Q&A 17, 33; WD–G–Ross, Q&A 40–42; WD–G–Harrison, Q&A 34, 35).

36. The following table represents a reasonable and scientifically accurate adaptation of the 1968 Recommended Dietary Allowances as published by the Food and Nutrition Board of the National Academy of Sciences-National Research Council (WD–3A–Sebrell, Q&A 15). Upper and lower limits for the listed nutrients are appropriate for dietary supplements of vitamins and minerals (Herbert, Tr. 9900–04, 9867; WD–G–Ross, Q&A 17, 18; WD–G–Harrison, Q&A 22, 24; Boehne, Tr. 2764; WD–3A–Sebrell, Q&A 26, 27, 39).

U.S. GOVERNMENT RECOMMENDED DAILY ALLOWANCES (U.S. RDA's) AND PERMISSIBLE COMPOSITIONAL RANGES FOR DIETARY SUPPLEMENTS OF VITAMINS AND MINERALS

	Unit of Measurement	Children under 4 years of age[1]—U.S. RDA		Adults and children 4 or more years of age—U.S. RDA		Pregnant or lactating women—U.S. RDA

Magnesium	Do	100	450
Optional			
Phosphorus[5]	Grams	0.125	1.300
Copper	Milligrams	1.0	2.0
Zinc	Do	7.5	15.0

[1] When labeled for use by infants, a dietary supplement shall contain not less than the lower limit designated for a nutrient in this column nor more than 100% of the infant U.S. RDA for a nutrient as prescribed in § 125.1(b) except that the level of biotin, when used shall be 0.05-mg per daily recommended quantity.
[2] Optional for adults and children 4 or more years of age.
[3] Optional for liquid products.
[4] Lower limit may be 0.05 milligram until December 31, 1976.
[5] Optional for pregnant or lactating women. When present, the quantity of phosphorus may be no greater than the quantity of calcium.

37. These regulations interpret and apply sections 403(a) and (j) of the act, by prescribing requirements for label information necessary in order fully to inform purchasers of the value of dietary supplements, which are foods for special dietary use, and to prevent false or misleading labeling of such foods. Neither the findings of fact nor the regulations relate to or affect vitamin-mineral products which are classified as "drugs". It is the intent of the Food and Drug Administration that the safety, effectiveness, and labeling of OTC vitamin-mineral drugs be determined through the separate OTC drug review for vitamin-mineral drugs as provided in 21 CFR 130.301. The OTC vitamin-mineral drug review panel will make its own independent inquiry on these matters.

CONCLUSIONS OF LAW

Based on the foregoing statements in conjunction with the findings of fact herein published the Commissioner concludes, that:

1. It will promote honesty and fair dealing in the interest of consumers, and will assist in carrying out the purpose of the law of providing full information to consumers as to the value of such foods for special dietary use, to promulgate a standard of identity for dietary supplements of vitamins and minerals as hereinafter set forth in § 80.1.

2. Such standard should limit the nutrients contained therein to those listed in § 80.1(f).

3. Such standard should limit the lower and upper amounts of nutrients supplied, to those listed in § 80.1(f).

4. The label of the dietary supplement should bear the statement as hereinafter prescribed by § 80.1(h), "multivitamin and multimineral supplement", "multivitamin supplement", "multimineral supplement", "multivitamin and iron supplement", or "multivitamin supplement with iron", or "_____ supplement" (the blank to be filled in with the name of the vitamin or mineral which the supplement purports or is represented to contain). In addition, such standard should specify the nutrients which shall comprise "multivitamin and multimineral supplements", "multivitamin supplements", "multimineral supplements", " multivitamin and iron supplements", or "multivitamin supplements with iron", and single nutrient supplements as hereinafter prescribed by § 80.1(b).

5. The label of the dietary supplement should bear the name and amount of each vitamin and mineral supplied by the supplement as prescribed by § 80.1(f).

6. The label of the dietary supplement also should name the natural source or chemical form of the nutrient ingredients used.

7. The label of a dietary supplement containing one or more nutrients subject to deterioration should bear an expiration date which will assure that the supplement contains the full declared level of the nutrients when consumed.

FINAL ORDER

Therefore, on the basis of the foregoing findings of fact, discussion, and conclusions of law drawn therefrom: *It is ordered,* That the stay of effective date of § 80.1, which stay was promulgated December 14, 1966 (31 FR 15730), be ended and that § 80.1 be modified to read as follows:

PART 80—DEFINITIONS AND STANDARDS OF IDENTITY FOR FOOD FOR SPECIAL DIETARY USES

§ 80.1 Dietary supplements of vitamins and minerals; definition, identity, label statements.

(a) The dietary supplements of vitamins and/or minerals for which definitions and standards of identity are prescribed by this section are prepared and offered as tablets, capsules, wafers, or other similar uniform units; in powder, granular, flake, or liquid form; or in the physical form of conventional foods; and purport to be or are represented for special dietary use by man to supplement his diet by increasing the total dietary intake of one or more of the essential vitamins and/or minerals specified in paragraph (f) of this section. The dietary supplements of vitamins and/or minerals are henceforth referred to as "dietary supplements" in this section.

(b) Classifications of dietary supplements.

(1) A dietary supplement shall contain only those vitamins and/or minerals listed in paragraph (f) of this section and shall be offered for its vitamin and/or mineral content only in the following combinations, with the provision that any vitamin or mineral defined as optional in paragraph (f) of this section may be omitted:

(i) All vitamins and minerals.

(ii) All vitamins.

(iii) All minerals.

(iv) All vitamins and the mineral iron.

(v) Inclusion of the optional ingredients vitamin D and/or phosphorus in a multivitamin, multimineral, or multivitamin and multimineral supplement does not require inclusion of any additional optional ingredients. Inclusion of the optional ingredients biotin and pan-

V 38-148 AUG 2 73 XUM

tothenic acid and/or copper and zinc in such products does not require inclusion of vitamin D and/or phosphorus when the latter two nutrients are optional. The inclusion of any of the other optional ingredients (biotin or pantothenic acid for vitamins and copper or zinc for minerals) requires the inclusion of both such optional ingredients if the product is a multivitamin or multimineral supplement, and requires the inclusion of all four such ingredients if the product is a multivitamin and multimineral supplement.

(2) A dietary supplement may also be composed of any single vitamin or mineral listed in paragraph (f) of this section.

(3) Folic acid is optional for liquid dietary supplements because of instability of the vitamin in liquid preparations. Liquid dietary supplements containing multivitamins but not containing folic acid shall bear the following statement on the label, "This product does not contain the essential vitamin folic acid" which shall immediately follow the listing of vitamins, and minerals as prescribed in paragraph (i) of this section.

(4) Addition to or amendment of the list of permissible combinations of vitamins and/or minerals contained in paragraph (b)(1) of this section may be proposed by the Commissioner of Food and Drugs, on his own initiative, or upon petition by an interested person in accordance with the procedures set forth in Part 2 of this chapter. Any such petition shall be submitted in the form set forth in § 2.65 of this chapter, and shall include scientific data of a human nutritional and/or technological nature to support such addition or amendment as being consistent with the definition and purpose of dietary supplements as described by this section. The Commissioner, upon request, may extend the effective date of this section with respect to any particular product or class of products pending consideration and any administrative or court proceedings relating to any such petition, and may set a new effective date upon completion of the matter.

(5) The provisions of this section shall not apply to any food which contains or consists of any vitamin or mineral listed in § 125.1(b) of this chapter, or any combination thereof, provided that all of the following requirements are met: (i) No such nutrient is contained at a level of 50 percent or more of the adult U.S. RDA per serving for that nutrient, (ii) No direct or implied representation is made on the label, in labeling, or in advertising that the product is a dietary supplement or is adequate or appropriate for supplementing the daily diet with essential nutrients, and (iii) The product is labeled pursuant to the provisions of § 1.17 of this chapter.

(c) General definitions.

(1) Subject to good manufacturing practices, dietary supplements described in this section shall contain in the specified daily quantity no less than the lower limit nor more than the upper limit of any nutrient specified in paragraph (f) of this section for the group(s) for which the supplement is offered.

(2) For the purposes of this section, the term "daily quantity" means the quantity of a dietary supplement that shall be specified in the labeling of the dietary supplement for consumption in a period of 1 day, and which shall be an amount or number of units reasonably suitable for and practicable of consumption in 1 day.

(3) In the event a dietary supplement is offered for more than one specific group, the specified daily quantity for each group shall be stated separately on the label.

(d) The different groups described in § 125.1(b) of this chapter shall be designated as follows: For labeling purposes:

(1) Infants,

(2) Children under 4 years of age,

(3) Adults and children 4 or more years of age,

(4) Pregnant or lactating women.

(e) Section 80.1 does not apply to:

(1) Other standardized foods.

(2) Foods the composition of which is defined by other regulations or statutes.

(3) Any food represented for use as the sole item of a meal or of the diet.

(4) Foods represented for use solely under medical supervision to meet nutritional requirements in specific medical conditions.

(5) Raw agricultural commodities (including marine products) and fabricated and other conventional foods to which single or multiple vitamins and/or minerals are added to improve nutritional quality, unless the total level (including any naturally occurring amounts) of any added vitamin or mineral per single serving attains or exceeds 50 percent of the U.S. Recommended Daily Allowance (U.S. RDA) for adults and children 4 years or more of age as specified in § 125.1(b) of this chapter, in which case the provisions of both this section and § 1.17 of this chapter shall apply. If the provisions of both this section and § 1.17 apply to a food, the labeling of such food shall conform to the labeling established in this section except that the labeling established in paragraph (c) of § 1.17 of this chapter, including the order for listing vitamins and minerals established in paragraph (c)(7)(iv) of that section, shall be used in lieu of the labeling established in paragraph (i)(1) of this section.

(6) Raw agricultural commodities (including marine products) which by their nature are sources of a specific vitamin(s) and/or mineral(s) at a level that, if it had been added, would have brought them within the definition of a dietary supplement. Such shall meet all the requirements of this section if they are represented as dietary supplements. Such foods may also be used as a source of specific vitamins and/or minerals in dietary supplements meeting the requirements of this section.

(7) A food with nutrients restored to pre-processing levels or added pursuant to § 1.8(e) of this chapter so that it is not nutritionally inferior to the food for which it substitutes and which it resembles.

(f) Permissible qualitative and quantitative composition of dietary supplements.

(1) The following table sets forth the permissible qualitative and quantitative composition of dietary supplements of vitamins and/or minerals:

U.S. GOVERNMENT RECOMMENDED DAILY ALLOWANCES (U.S. RDA'S) AND PERMISSIBLE COMPOSITIONAL RANGES FOR DIETARY SUPPLEMENTS OF VITAMINS AND MINERALS

	Unit of Measurement	Children under 4 years of age[1]—U.S. RDA		Adults and children 4 or more years of age—U.S. RDA		Pregnant or lactating women—U.S. RDA	
		Lower Limit	Upper Limit	Lower Limit	Upper Limit	Lower Limit	Upper Limit
Vitamins							
Mandatory							
Vitamin A	International Units	1,250	2,500	2,500	5,000	5,000	8,000
Vitamin D	do	200	400	400		400	400
Vitamin E	do	5	10	15	30	45	60
Vitamin C	Milligrams	20	40	60	120	90	150
Folic acid[2]	do	0.1	0.2	0.3	0.4	0.4	0.8
Thiamine	do	0.35	0.70	1.05	0.75	1.50	2.25
Riboflavin	do	0.4	0.8	1.2	0.8	1.7	2.6
Niacin	do	4.5	9.0	13.5	10.0	20.0	30.0
Vitamin B_6	do	0.35	0.70	1.05	1.00	2.00	3.00
Vitamin B_{12}	Micrograms	1.5	3.0	4.5	3.0	6.0	9.0
Optional							
Vitamin D	International Units				200	400	400
Biotin	Milligrams	0.075	0.150	0.225	0.150	0.300	0.450
Pantothenic acid	do	2.5	5.0	7.5	5.0	10.0	15.0
Minerals Mandatory							
Calcium	Grams	0.125	0.800	1.200	0.125	1.000	1.500
Phosphorus[3]	Do	0.125	0.800	1.200	0.125	1.000	1.500
Iodine	Micrograms	35	70	105	75	150	225
Iron	Milligrams	5	10	15	9	18	27

Optional							
Phosphorus[4]	Grams						
Copper	Milligrams	0.5	1.0	1.5	1.0	2.0	3.0
Zinc	Do	4.0	8.0	12.0	7.5	15.0	22.5

[1] When labeled for use by infants, a dietary supplement shall contain not less than the lower limit designated for a nutrient in this column nor more than 100% of the infant U.S. RDA for a nutrient as prescribed in §125.1(b) except that the level of biotin, when used, shall be 0.05 mg per daily recommended quantity.
[2] Optional for adults and children 4 or more years of age.
[3] Optional for liquid products.
[4] Lower limit may be 0.05 milligram until December 31, 1976.
[5] Optional for pregnant or lactating women. When present, the quantity of phosphorus may be no greater than the quantity of calcium.

(2) The U.S. Recommended Daily Allowances (U.S. RDA's) have been derived by the Food and Drug Administration from the "Recommended Dietary Allowances," published by the Food and Nutrition Board, National Academy of Sciences—National Research Council, and are subject to amendment from time to time as more information on human nutrition becomes available.

(g) Acceptable ingredient sources for dietary supplements:

(1) A vitamin or mineral used in a dietary supplement may be supplied by any suitable chemically synthesized or naturally produced substance which is not a food additive as defined in section 201(s) of the act; or if it is a food additive as so defined, it shall be used in conformity with regulations established pursuant to section 409 of the act.

(2) Any safe and suitable substance may be used as a preservative, stabilizer, flavor, sweetener, color, seasoning, carrier, base, or vehicle, or to facilitate preparation of the vitamin and mineral substances. A dietary supplement shall be prepared so that any such substance contained therein does not exceed the amount reasonably required to accomplish its intended physical or technical effect, and so that the biological availability of the vitamin(s) or mineral(s) is not impaired by the presence of such substance. Any such substance shall not be a food additive or color additive as defined in section 201 (s) or (t) of the act; or if it is a food additive or color additive as so defined, it shall be used in conformity with regulations established pursuant to section 409 or 706 of the act.

(h) Nomenclature.

(1) The common name of a dietary supplement shall consist of a term descriptive of the vitamin and/or mineral composition of the product, as established in paragraph (h)(2) of this section, together with a phrase or phrases designating the group(s) for which the supplement is represented, as established in paragraph (h)(3) of this section (e.g., "multivitamin and multimineral supplement for children under 4 years of age"). The name of the dietary supplement shall appear prominently and conspicuously on the principal display panel(s) of the label. The letters of the phrase(s) designating the consumer group(s) for which the product is represented shall be no less than one-third the size of those used in the term descriptive of the composition of the product. In addition to the common name prescribed by this paragraph, a dietary supplement may be labeled with a proprietary name: *Provided*, That it is not false or misleading in any particular.

(2) The terms used to describe the vitamin and/or mineral composition of dietary supplements listed in paragraphs (b) (1) and (2) of this section shall be as follows: (i) "Multivitamin and multimineral supplement" for a dietary supplement containing all vitamins and minerals, (ii) "multivitamin supplement" for a dietary supplement containing all vitamins, (iii) "multimineral supplement" for a dietary supplement containing all minerals, (iv) "multivitamin and iron supplement" or "multivitamin supplement with iron" for a dietary supplement containing all vitamins and the mineral iron, (v) "———supplement" for a dietary supplement containing a single vitamin or mineral listed as a mandatory or optional ingredient in the table contained in paragraph (f)(1) of this section (the blank to be filled in with the name of the vitamin or mineral).

(3) The phrases used to designate the group(s) for which a dietary supplement is intended shall be as follows: (i) "For infants"; (ii) "For children under 4 years of age"; (iii) "For adults and children 4 or more years of age"; and (iv) "For pregnant or lactating women".

(i) Format for listing vitamins and minerals, and ingredients: (1) Immediately following the name and group designation on the principal display panel, as required by paragraph (h) of this section, or on the information panel (21 CFR 1.8d) if insufficient space is available on the principal display panel, the label shall bear a listing in tabular form of each of the vitamins and/or minerals supplied by the specified daily quantity of the dietary supplement, such daily quantity being specified at the top of the list. The vitamins and/or minerals shall be described by the names appearing in paragraph (f) of this section, shall appear in the order listed in paragraph (f) of this section, and shall be grouped and identified separately as "vitamins" and/or "minerals" without reference to "mandatory" or "optional." The quantity of each vitamin and/or mineral present in a specified daily quantity of the dietary supplement shall be stated as a part of this list and expressed in percentage of the U.S. RDA for each specific group for which the supplement is offered. The quantity of each vitamin and/or mineral present in the specified daily quantity of the dietary supplement shall also appear in the tabular listing in terms of the units of measure specified in paragraph (f) of this section.

(2) For determining the percentage contents of the U.S. RDA's present in the dietary supplement, the quantitative content of the following vitamins shall be calculated in terms of the following chemically identifiable reference forms:

REFERENCE FORM

Vitamin	Name	Empirical formula	Molecular weight
Vitamin C	*L*-Ascorbic acid	$C_6H_8O_6$	176.12
Folic acid	Pteroyl mono-*L*-glutamic acid	$C_{19}H_{19}N_7O_6$	441.41
Niacin	Nicotinic acid	$C_6H_5NO_2$	123.11
Riboflavin	Riboflavin	$C_{17}H_{20}N_4O_6$	376.37
Thiamine	Thiamine chloride hydrochloride	$C_{12}H_{17}ClN_4OS.HCl$	337.28
Vitamin B_6	Pyridoxine	$C_8H_{11}NO_3$	169.18
Vitamin B_{12}	Cyanocobalamin	$C_{63}H_{88}CoN_{14}O_{14}P$	1,355.40
Biotin	*D*-Biotin	$C_{10}H_{16}N_2O_3S$	244.31
Pantothenic acid	*D*-Pantothenic acid	$C_9H_{17}NO_5$	219.23

(3) The following synonyms may be added in parentheses immediately following the name of the vitamin in the statement described in paragraph (i)(1) of this section:

Vitamin	*Synonym*
Vitamin C	Ascorbic acid.
Folic acid	Folacin.
Riboflavin	Vitamin B_2.
Thiamine	Vitamin B_1.

(4) A separate list of ingredients in the product shall be included on the label pursuant to the requirements of Part 1 of this chapter. Such list shall include the natural source or chemical form of each individual nutrient present in the dietary supplement.

(j) When the dietary supplement is in liquid form and contains alcohol, the label shall state the percent-by-volume of alcohol present.

(k) A dietary supplement containing one or more nutrients, subject to deterioration below the labeled value before consumption shall bear on its outside wrapper or container, as well as on the label of its immediate container, the statement: "Expiration date ———", the blank to be filled in by the month and year. The expiration date shall be the date selected by the manufacturer, packer, or distributor of the dietary supplement on the basis of tests or other information showing that the dietary supplement, until that date, under the conditions of handling, storage, and use prescribed by directions appearing on its label, or, in the absence of such prescribed directions, under customary or usual conditions of handling, storage, and use will contain not less than the quantity of each vitamin and/or mineral, as set forth on its label, when consumed.

(l) All labeling information required by this section shall comply with the conspicuousness required by section 403(f) of the act and § 1.8d of this chapter. In addition, the following labeling requirements shall be met.

(1) The list of nutrients required by paragraph (i)(1) of this section shall appear in uniform type size.

(2) The synonyms permitted by paragraph (i)(3) of this section, if used, and the list of ingredients required by paragraph (i)(4) of this section shall appear in uniform type size, and in type size no larger than that used for the list of nutrients required by paragraph (i)(1) of this section.

(m) In addition to the requirements of this section, the labels and labeling for a dietary supplement is subject to the prohibitions contained in § 125.2(b) of this chapter.

Effective date. Labeling may be changed to comply with this regulation beginning August 2, 1973. All labeling for dietary supplements that is ordered after

V 38-148
AUG 2 73
XUM

December 31, 1973, and all labeling used for such products shipped in interstate commerce after December 31, 1974, shall comply with the provisions of this section; and if not so labeled, such product shall be deemed to be misbranded under section 403(a), (g) and (j) of the act.

(Secs. 201(n), 401, 403(a) and (j), 701(a) and (e), 52 Stat. 1046, 1048, 1055–1056, as amended by 70 Stat. 919; 21 U.S.C. 321(n), 341, 343(a) and (j), 371(a) and (e))

Dated: July 25, 1973.

A. M. SCHMIDT,
Commissioner of Food and Drugs.

[FR Doc.73-15706 Filed 8-1-73;8:45 am]

PART 100—NUTRITIONAL QUALITY GUIDELINES FOR FOOD

General Principles

In the FEDERAL REGISTER of March 14, 1973 (38 FR 6969) the Commissioner of Food and Drugs published a new Part 100 which included new § 100.1 *General principles* for the establishment by regulation of nutritional quality guidelines for foods.

Paragraph (c)(1) of § 100.1 states that "The label of the product shall bear the common or usual name of the food in accordance with the provisions of the guideline and §§ 1.8 and 102.1 of this chapter".

Based on comments received the Commissioner of Food and Drugs concludes that the reference to § 102.1 in paragraph (c)(1) should be amended as set forth below for the purpose of clarification.

Therefore, pursuant to provisions of the Federal Food, Drugs, and Cosmetic Act (secs. 201, 403, 701(a), 52 Stat. 1040–1042, as amended, 1047–1048, as amended, 1055; 21 U.S.C. 321, 343, 371(a)), and under authority delegated to the Commissioner (21 CFR 2.120) § 100.1 is amended in paragraph (c)(1) to read as follows:

§ 100.1 General principles.

* * * * *

(c) * * *

(1) The label of the product shall bear the common or usual name of the food in accordance with the provisions of the guideline and §§ 1.8 and 102.1(a) of this chapter.

* * * * *

As this amendment merely clarifies an existing regulation, notice and public procedure and a delayed effective date are not necessary prerequisites to the promulgation of this order.

Effective date. This order shall become effective on August 2, 1973.

(Secs. 201, 403, 701(a), 52 Stat. 1040–1042, as amended, 1047–1048, as amended, 1055; 21 U.S.C. 321, 343, 371(a))

Dated: July 25, 1973.

A. M. SCHMIDT,
Commissioner of Food and Drugs.

[FR Doc.73-15686 Filed 8-1-73;8:45 am]

PART 102—COMMON OR USUAL NAMES FOR NONSTANDARDIZED FOODS

Foods Packaged for Use in Preparation of "Main Dishes" or "Dinners"

In the FEDERAL REGISTER of March 14, 1973 (38 FR 6975) the Commissioner of Food and Drugs proposed a new § 102.12, defining the common or usual name for foods packaged and represented for use in the preparation of a "dish," "dinner," or other food serving, and to which meat or other valuable characterizing ingredients or components, not included in the package, must be added.

A total of fourteen comments were received in response to the proposal. Eleven of the comments were from manufacturers and trade associations, two were from consumer groups, and one was from a professional association. Twelve of the fourteen comments supported the proposal, although nine of these requested modification, clarification, or additional requirements. Two comments opposed the proposal.

The comments and the Commissioner's conclusions are as follows:

1. A manufacturer and a trade association recommended that the proposal be withdrawn and replaced by a statement of policy. One comment based this recommendation on the contention that there is no evidence of consumer confusion resulting from present labeling practices for "add meat" dinners, and the other comment questioned the authority of the Food and Drug Administration to establish common or usual names.

The Commissioner rejects the recommendations to withdraw the proposal. The Food and Drug Administration has already found it necessary to take regulatory action against certain products of this type whose labeling was misleading. This regulation is intended to assure the consumer of informative labeling regarding the product and to provide manufacturers with objective criteria for compliance. The Commissioner has discussed the legal authority for establishing common or usual names in the preamble to the order promulgating Part 102 of this Chapter, published in the FEDERAL REGISTER of March 14, 1973 (38 FR 6964). As the Supreme Court recently stated in upholding the Food and Drug Administration's rule making authority under section 701(a) of the act, "A decision that FDA lacks authority to determine in its own proceedings the coverage of the Act it administers, subject of course to judicial review, would seriously impair FDA's ability to discharge the responsibilities placed on it by Congress." CIBA Corp. v. Weinberger, No. 72-394 (decided June 18, 1973).

2. Several comments requested revision of the regulation so that it would apply only to products intended for use as "main dishes" and "dinners," not to such products as seasoning mixes, sauce or gravy mixes, or cake mixes. This was the intent of the proposal, and the term "dish" has been revised to read "main dish."

3. Two manufacturers stated that the common or usual name for the products involved should not be required to contain all three elements of the name described in § 102.12(a)(1), (2) and (3) of the proposal. One stated that the common or usual name should be limited to the name that it is reasonably expected that consumers will use. However, both comments acknowledged that all the information described in § 102.12(a)(1), (2) and (3) of the proposal should appear prominently on the principal display panel.

Including all three elements in the common or usual name should not cause difficulty for manufacturers of main dishes or dinners. The regulation as modified in this order permits the separate elements of the name to be placed in different locations on the principal display panel, and the comments did not find difficulty with the prominence requirements in the proposal. As for the name that consumers might use, the regulation does not preclude use of fanciful names for such products, in addition to the required common or usual name, as long as such fanciful names are not false or misleading.

4. One comment stated that the name of the dish to be prepared by use of the package contents is unnecessary if the vignette on the principal display panel shows the food as prepared, accompanied by the statement described in § 102.12(a)(3), indicating that the food as shown contains a characterizing ingredient not contained in the package. The comment contended that such a vignette is more informative than the written name of the dish.

The Commissioner disagrees. A picture of the type of food to be prepared would be insufficient to meet the requirements of the act that the product bear a common or usual name and fully informative labeling.

5. Some manufacturers requested that § 102.12(a)(3) be reworded so that the requirement for a statement that additional ingredient(s) or component(s) must be added would be limited to "major" or "important" or "characterizing" missing ingredient(s). These comments stated that the proposed regulations could be interpreted as requiring the listing of such ingredients as salt or water, while the preamble refers to "valuable characterizing" or "significant characterizing" ingredients.

The Commissioner agrees with this suggestion and § 102.12(a)(3) of the final regulation is limited to "characterizing" ingredients.

6. One manufacturer suggested that it would be in the consumer's interest to permit the designation of the finished product to be in a type size slightly larger and more prominent than the list of the components in the package.

The Commissioner rejects this suggestion because it could result in misleading labeling. Such a presentation would tend to draw the consumer's eye to the name of the finished food and may mislead him to expect the package to contain all components necessary to prepare the finished food.

7. Several manufacturers requested that the prominence requirements in § 102.12(b)(2) be stated in that paragraph and not incorporated by reference to § 102.1 (21 CFR 102.1). They also disagreed with the requirement that all of the elements of the common or usual name appear in a prescribed order on the principal display panel. The manufacturers stated that they should have the option to arrange the elements of the common or usual name anywhere on the principal display panel.

The Commissioner has concluded that a prescribed order for the elements of the common or usual name for these food products is not necessary for informative labeling. Manufacturers may arrange such elements as they choose, provided the prominence requirements of the regulation are met and provided the resulting overall presentation on the principal display panel is not misleading. The regulation has been modified accordingly. In the interest of clarity, the full prominence requirements are stated in § 102.12(b)(2).

8. Several manufacturers objected to the requirement in § 102.12(c) that any vignette which shows any food or characterizing ingredient(s) not included in the package shall be accompanied either by the statement required by § 102.12(a)(3) or by a similar statement that such item is not included. Their objections and suggestions were:

a. The statement required in § 102.12(a)(3) might be required to appear twice on the principal display panel, in the common or usual name and with the vignette.

b. Section 102.12(c) would require listing of such unimportant missing ingredients as garnishments.

c. Section 102.12(c) should be revised to permit use of "serving suggestion," as is current practice, in lieu of its present requirement.

d. The statement required by § 102.12(a)(3) should not be required to accompany a vignette on the principal display panel where such statement in the common or usual name is in type as large as that used for the name of the finished "dish."

The Commissioner has considered these points and has concluded that the requirement as stated in this order is reasonable and appropriate. The arrangement of the elements of the common or usual name is no longer prescribed, and thus the part of the common or usual name required by § 102.12(a)(3) can be placed in sufficient proximity to a vignette that the requirement in § 102.12(c) will also be met.

The Commissioner also concludes that use of the term "serving suggestion" is not sufficient to inform the consumer that depicted foods or components are not included in the package. Use of such a term without indicating which foods or components are included or must be added would indicate, indeed, that everything shown in the vignette is in the package.

9. Comments also objected to the requirement in § 102.12(d) that wherever the name of the finished food appears other than on the principal display panel, the entire common or usual name must be used. The objections and suggestions were as follows:

a. Repetition of the entire common or usual name on panels other than the principal display panel is unnecessarily restrictive to package design.

b. This provision should be limited to the requirement that the elements of the common or usual name in § 102.12(a)(2) and (a)(3) appear on other panels.

c. The entire common or usual name should be required only once on each panel, and should appear with the most prominent reference to the "dish" name.

d. Section 102.12(d) should apply only when the "dish" name is used as a product identification statement on other panels.

The Commissioner accepts the suggestion that the entire common or usual name should be required on panels other than the principal display panel only when the name of the finished "dish" is used as a product identification on such panels. For example, a statement identifying the food to be prepared appearing on a side panel in the text of directions for use of the package, or in a suggested recipe, would not require use of the entire common or usual name on that panel. However, such a statement in bold type likely to be read by consumers at the point of purchase must be accompanied on the same panel by the full common or usual name. This should provide fully informative labeling without undue restriction of manufacturers. The Commissioner further advises that the entire common or usual name need appear only once on a panel unless for some particular reason failure to repeat the entire name would result in false or misleading labeling.

10. Another manufacturer suggested the additional requirement that when a brand name of a product specifies the missing ingredient, such name should not be more conspicuous than the part of the common or usual name required in § 102.12(a)(1) of the proposal, i.e., the names of all important ingredients or components in the package.

The Commissioner concurs in the intent of this comment. Prominent emphasis of a missing ingredient or component in a brand name would constitute false or misleading labeling in violation of section 403(a) of the act. The Commissioner believes that it is sufficient to require that the explanatory element of the common or usual name required by § 102.12(a)(3) be labeled next to, and in at least half the type size used for, the brand name under these circumstances. The regulation has been modified accordingly.

11. A consumer group asked whether a survey or other data would be used in determining whether a missing ingredient is emphasized in a misleading manner in a brand name. In view of the type size requirement for the explanatory element of the common or usual name required by § 102.12(a)(3) in the final regulation, the Commissioner believes that this will not be a problem. If survey data show that any label is misleading or confusing, however, the Commissioner will consider revision of the regulation. Survey data are helpful but are not required for the Food and Drug Administration to determine that labeling is misleading.

12. The Commissioner has concluded that the same effective date should be adopted for this regulation as for all of the other food labeling regulations adopted at this time. The Commissioner is also concerned, however, that there is currently a serious problem of misleading labeling among the foods subject to this regulation, as shown by the regulatory action already taken against several of these products. Accordingly, the adoption of the uniform effective date for this regulation does not authorize continued use of existing labeling that is false or misleading. It is recommended that manufacturers adopt the labeling established in this regulation as quickly as possible in order to avoid further regulatory action.

Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (secs. 201(n), 403, 701(a), 52 Stat. 1041, as amended, 1047–1048, as amended, 1055; 21 U.S.C. 321(n), 343, 371(a)) and under authority delegated to the Commissioner (21 CFR 2.120), Part 102 is amended by adding thereto a new section to read as follows:

§ 102.12 Foods packaged for use in the preparation of "main dishes" or "dinners".

(a) The common or usual name of a packaged food which is represented on the principal display panel by word or vignette to be used in the preparation of a "main dish", "dinner", or other such food serving, and to which some other important characterizing ingredient(s) or component(s) not present in the package must be added, consists of all the following:

(1) The common or usual name of each important ingredient or component in the package, in descending order of predominance by weight (e.g., "noodles and tomato sauce").

(2) An appropriate informative statement identifying the food to be prepared by use of the package contents (e.g., "for preparation of chicken casserole").

(3) An appropriate informative statement that additional characterizing ingredient(s) or component(s) must be added and which names the additional characterizing ingredient(s) or component(s) (e.g., "you must add _____ to complete the recipe," the blank to be filled in with the name(s) of the important characterizing ingredient(s) or component(s) that must be added).

(b) The labeling required by paragraph (a) of this section shall appear on the principal display panel.

(1) No word in the statement required by paragraph (a)(2) of this section may appear on the principal display panel more conspicuously or in larger type than the smallest and least conspicuous type employed on the panel for any word, phrase or statement within the scope of paragraph (a)(1) of this section.

V 38-148 AUG 2 73 XUM

(2) Every word in the statement required by paragraph (a)(3) of this section shall appear on the principal display panel in easily legible bold face print or type in distinct contrast to other printed or graphic matter, and in a height not less than the larger of the following alternatives:

(i) Not less than one-sixteenth inch in height on packages having a principal display panel with an area of 5 square inches or less and not less than one-eighth inch in height if the area of the principal display panel is greater than 5 square inches; or

(ii) Not less than one-half the height of the largest type appearing in the part of the common or usual name of the food required by paragraphs (a)(1) and (a)(2) of this section.

(c) Any vignette which shows any food or characterizing ingredient(s) or component(s) not included in the package shall be accompanied either by the statement required by paragraph (a)(3) of this section or by a separate statement specifying the food or characterizing ingredient(s) or component(s) shown in the vignette but not included in the package.

(d) If the statement specified in paragraph (a)(2) of this section is used on any panel in addition to the principal display panel as a product identification statement, the complete common or usual name shall appear on such panel in the manner specified in paragraph (b) of this section.

(e) When a brand name or other prominent product designation contains a word or words that includes or suggests an important characterizing ingredient(s) or component(s) that must be added, or otherwise states or implies that the package contains a complete main dish, dinner, or other food serving, the part of the common or usual name of the food required by paragraph (a)(3) of this section shall appear in direct conjunction with such brand name or other designation and in type size not less than one-half the height of the largest type appearing in such brand name or other designation.

Effective date. Labeling may be changed to comply with this regulation beginning August 2, 1973. All labeling ordered after December 31, 1973, and all labeling used for products shipped in interstate commerce after December 31, 1974, shall comply with this regulation.

(Secs. 201(n), 403, 701(a), 52 Stat. 1041, as amended, 1047–1048, as amended, 1055; 21 U.S.C. 321(n), 343, 371(a))

Dated: July 25, 1973.

A. M. SCHMIDT,
Commissioner of Food and Drugs.

[FR Doc.73-15689 Filed 8-1-73;8:45 am]

PART 102—COMMON OR USUAL NAMES FOR NONSTANDARDIZED FOODS

Noncarbonated Beverages Containing No Fruit or Vegetable Juice

In the FEDERAL REGISTER of March 14, 1973 (38 FR 6974) the Commissioner of Food and Drugs published a proposal to establish a common or usual name for noncarbonated beverages containing no fruit or vegetable juice.

Five responses were received in response to the proposal. The comments and the Commissioner's conclusions are as follows:

1. One comment from a consumer and three comments from consumer associations favored the proposal, stating that the regulation is a vital and appropriate step toward providing the consumer sufficient information to make rational decisions at the point of purchase.

2. A manufacturer of powdered beverage mixes opposed the proposal on the ground that the regulation will saddle the entire food industry with negative labeling requirements. This comment opposed particularly the inclusion of powdered beverage products within the scope of the regulation.

The Commissioner concludes that the regulation as proposed is a reasonable and appropriate measure for the prevention of consumer confusion and deception in the purchase of beverages which contain no fruit or vegetable juice. The Commissioner also concludes that there is no reason to treat powdered beverage products differently from other forms of beverage base to which water is added. Informative labeling is as necessary for accurate identification of this product as it is for any other type of beverage product. The comment offered no other more appropriate means of accurately informing the consumer about the nature of the product.

Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (secs. 201, 403, 701(a), 52 Stat. 1040–1042, as amended, 1047–1048, as amended, 1055; 21 U.S.C. 321, 343, 371(a)) and under authority delegated to the Commissioner, the following new section is added to Part 102 of this chapter.

§ 102.10 Non-carbonated beverage products containing no fruit or vegetable juice.

(a) The common or usual name of noncarbonated beverage products (including a concentrated, dehyrated, powdered, or other counterpart) containing no fruit or vegetable juice shall include the following:

(1) A decriptive name for the product meeting the requirements of § 102.1(a); and

(2) When the labeling or the color and flavor of the beverage represents, suggests, or implies that any fruit or vegetable juice may be present (e.g., the product label bears the name or a variation of the name or any pictorial representation of any fruit or vegetable, or the product contains color and flavor which give the beverage the appearance and taste of containing a fruit or vegetable juice) the statement "Containing (or contains) no _____ juice", or "no _____ juice", or "does not contain _____ juice", the blank to be filled in with the name of the fruit(s) or vegetable(s) represented, suggested, or implied, in the manner set forth in § 102.1(c). If a nonspecific fruit or vegetable juice content is represented, suggested, or implied, the blank shall be filled in with the word "fruit" or "vegetable" as applicable.

Effective date. Labeling may be changed to comply with this regulation beginning on August 2, 1973. All labeling ordered after December 31, 1973, and all labeling used for products shipped in interstate commerce after December 31, 1974, shall comply with this regulation.

(Secs. 201, 403, 701(a), 52 Stat. 1040–1042, as amended, 1047–1048, as amended, 1055; 21 U.S.C. 321, 343, 371(a))

Dated: July 25, 1973.

A. M. SCHMIDT,
Commissioner of Food and Drugs.

[FR Doc.73-15688 Filed 8-1-73;8:45 am]

PART 102—COMMON OR USUAL NAMES FOR NONSTANDARDIZED FOODS

Frozen "Heat and Serve" Dinners

In the FEDERAL REGISTER of March 14, 1973 (38 FR 6974), the Commissioner of Food and Drugs proposed to establish a common or usual name for frozen "heat and serve" dinners.

Seven comments were received in response to this proposal, three from manufacturers, two from trade associations, one from a consumer group and one from a dietetic association. The consumer organization agreed with the proposed regulation in its entirety. The other comments opposed it or suggested modification. The comments received and the Commissioner's conclusions are as follows:

1. It was asserted in all of the responses submitted by food producers that the Federal Food, Drug, and Cosmetic Act does not authorize the Food and Drug Administration to establish common or usual names. The Commissioner has concluded that authority is provided by sections 201(n), 403, and 701(a) of the Federal Food, Drug, and Cosmetic Act to establish common or usual names for foods. This matter is discussed in the preamble to the final order promulgating a procedure for the establishment of a common or usual name published in the FEDERAL REGISTER on March 14, 1973 (38 FR 6964). As the Supreme Court recently stated in upholding rule making authority of the Food and Drug Administration under section 701(a) of the act, "A decision that FDA lacks authority to determine in its own proceedings the coverage of the Act it administers, subject of course to judicial review, would seriously impair FDA's ability to discharge the responsibilities placed on it by Congress. CIBA Corp. v. Weinberger, No. 72–394 (decided June 18, 1973).

2. One respondent contended that the term "dinner" is not sufficiently defined and is so vague as to violate the due process clause of the United States Constitution. The Commissioner concludes that the meaning of the term "dinner," as applied to frozen "heat and serve" dinners, is understood both by manufacturers and by consumers, and that it is not unconstitutionally vague.

3. Two comments stated that since the United States Department of Agriculture has jurisdiction over meat and poultry there is no need for additional regulations by the Food and Drug Administration.

The Food and Drug Administration and the United States Department of Agriculture have cooperated in the development of this regulation. It would be inappropriate to have different labeling requirements for frozen dinners depending upon whether, for example, they contain meat or fish as a principal component. The Commissioner concludes that uniformity of labeling to prevent consumer confusion is in the public interest.

4. One comment suggested that compositional standards for an entire class of products should be the subject of a standard of identity under section 401 of the act. The Commissioner has concluded that standards of identity are appropriate and useful, and will continue to be promulgated where there is a need to prescribe the entire compositional requirements for a food, in addition to the name of the food. However, in this case there is a need simply to establish a uniform and informative name for the frozen dinner type of food product and consequently a standard of identity is neither necessary nor appropriate.

5. One comment objected to the fact that the proposal does not guarantee a nutritionally balanced meal. The purpose of the proposal was to establish a uniform and informative name for frozen dinner products, not to establish nutritional requirements. A regulation establishing a nutritional quality guideline for frozen dinners, § 100.5 (21 CFR 100.5), was published in the FEDERAL REGISTER of March 14, 1973 (38 FR 6972).

6. Two comments objected to what one manufacturer termed the "compositional approach" of paragraph (a) of the proposed regulation. It was stated that the proposal requires certain foods to be included in the dinner, thereby limiting selection and precluding certain products, such as ethnic dinners or vegetarian dinners.

There appears to have been some misinterpretation of the requirements of this regulation. The regulation would allow the term "frozen heat and serve dinner" to be used for any product meeting the minimal identifying criteria set forth in § 102.11(a)(1). Essentially, the effect of this regulation is to provide that a product may not be called a "frozen heat and serve dinner" unless it contains at least three traditional dinner components. The nutritional quality guideline in § 100.5 prescribes minimum nutritional requirements which must be met for a frozen dinner to be allowed to bear the statement: "This product provides nutrients in amounts appropriate for this class of food as determined by the U.S. Government."

Certain traditional frozen heat and serve dinner products may not be able to bear the guideline statement because of nutritional insufficiencies. However, compliance with the guideline is not required to use the name "frozen heat and serve dinner."

The question was raised whether three vegetable dishes could constitute a dinner. The Commissioner has concluded that, while such a product might well be designated as a "vegetable platter," it is not commonly regarded as a "dinner." The regulation has therefore been revised to require that one of the components be a significant source of protein.

The question was also raised whether any of the three dishes could be combined with each other. The Commissioner concludes that such combinations are reasonably expected by consumers, e.g., a Chinese dinner combining rice, chicken, and vegetables. The regulation has therefore been revised to refer to "components" rather than "separate" and different dishes (recipes)."

7. It was suggested by one manufacturer that the proposed regulation has the indirect effect of making producers comply with the nutritional quality guidelines. As previously stated, this is not the case. The manufacturer may prepare a dinner of any combination of three dishes as prescribed in § 102.11(a)(1) and sell it as a "frozen heat and serve dinner." As long as no guideline claim is made, the dinner may be sold without meeting the nutritional guideline requirements.

8. It was suggested in one comment that the regulation should distinguish between frozen products considered "dinners" and those described as "entrees" or "breakfasts." The Commissioner concludes that the present regulation provides a reasonable and appropriate description of "frozen heat and serve dinner," sufficient to distinguish the product from "breakfasts" or products containing only part of a dinner. The proper name of an "entree" or a "breakfast" is beyond the scope of the proposal.

9. An objection was raised by one respondent that fruit was excluded from the foods listed in § 102.11(a)(1). The Commissioner concludes that because of the established practice and consumer acceptance of the use of apples and other fruit as components of frozen dinners, the list of foods prescribed in § 102.11(a)(1) should be expanded to include fruit, and it is so amended.

10. One manufacturer argued that the words "frozen" in § 102.11(b)(1) and "containing" in § 102.11(b)(2) should be made optional. The Commissioner has concluded that the regulation should be amended to allow optional use of the word "frozen" in the common or usual name, provided that the words "Keep Frozen" or the equivalent are placed prominently and conspicuously on the principal display panel in type size not less than that specified in § 102.1(b)(2)(i) (21 CFR 102.1). The Commissioner has also determined that the word "containing" (or "contains") should be made optional. The regulation has been so revised.

11. The United States Department of Agriculture and other respondents requested that the proposal allow use of a term indicating the primary or principal component of the dinner in the common or usual name, as "Beef Dinner" or "Cheese Enchilada Dinner." The Commissioner has concluded that such designations or other appropriately descriptive terms should be permitted and has amended § 102.11(b)(1) to so provide.

12. Two manufacturers suggested that the proposal be modified to allow use of a vignette to substitute for the list of the contents of the dinner as required by § 102.11(b)(2). The Commissioner is of the opinion that a vignette which depicts the contents of the dinner would not be sufficient clearly to inform the consumer of the contents. To be fully informative, the Commissioner concludes that a listing of the components of the dinner must be included in the common or usual name.

13. One manufacturer commented that all components of the dinner should be listed in order of descending predominance, instead of the proposed requirement that the components listed in § 102.11(a)(1) be listed in order of descending predominance, followed by a listing, also in order of descending predominance, of any servings specified in § 102.11(a)(2). The Commissioner concludes that the proposed requirement is preferable, since it highlights the principal dinner components expected to be present by placing them first. A complete listing of all ingredients in descending order of predominance by weight will also be present on the label, as required by section 403(i)(2) of the act and § 1.10(h) (21 CFR 1.10).

14. The United States Department of Agriculture and other respondents expressed opposition to paragraph (b)(3) of the proposal, requiring a statement that other foods must be consumed to obtain a complete meal when the package contains less than two of the servings set forth in § 102.11(a)(2). After considering these objections, the Commissioner has concluded that such a requirement relates more to nutritional quality than to a statement of the identity of the dinner, and that the intent and purpose of that part of the proposal is adequately satisfied by requiring the prominent listing of the major components of the product. Consumers will be able readily to compare the components of one dinner with those in another. The Commissioner has therefore deleted this provision from the proposal. However, since one reason for the use of common or usual names is to prevent consumer deception, the Commissioner is amending § 102.11(b)(3) to provide that if the labeling implies that the package contains any servings of food which are not included in the pacakage, e.g., a "serving suggestion" vignette depicting foods not present in the package, the principal display panel must bear a prominent statement that such servings are not present, in type size not less than that specified in § 102.1(b)(2)(i).

Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (secs. 201(n), 403, 701(a), 52 Stat. 1041 as amended, 1047–1048, as amended, 1055; 21 U.S.C. 321(n), 343, 371(a)) and

V 38-148 AUG 2 73 XUM

under authority delegated to the Commissioner (21 CFR 2.120), Part 102 of Title 21 of the Code of Federal Regulations is amended by adding thereto the following new section:

§ 102.11 Frozen "heat and serve" dinner.

(a) A frozen "heat and serve" dinner:

(1) Shall contain at least three components, one of which shall be a significant source of protein and each of which shall consist of one or more of the following: meat, poultry, fish, cheese, eggs, vegetables, fruit, potatoes, rice, or other cereal based products (other than bread or rolls).

(2) May also contain other servings of food (e.g., soup, bread or rolls, beverage, dessert).

(b) The common or usual name of the food consists of all of the following:

(1) The phrase "frozen 'heat and serve' dinner," except that the name of the predominant characterizing ingredient or other appropriately descriptive term may immediately precede the word "dinner" (e.g., "frozen chicken dinner" or "frozen heat and serve beef dinner"). The words "heat and serve" are optional. The word "frozen" is also optional, provided that the words "Keep Frozen" or the equivalent are prominently and conspicuously placed on the principal display panel in type size not less than that specified in § 102.1(b)(2)(i).

(2) The phrase "containing (or contains) ————" the blank to be filled in with an accurate description of each of the three or more dish components listed in paragraph (a)(1) of this section in their order of descending predominance by weight (e.g., ham, mashed potatoes, and peas), followed by any of the other servings specified in paragraph (a)(2) of this section contained in the package (e.g., onion soup, enriched white bread, and artificially flavored vanilla pudding) in their order of descending predominance by weight. This part of the name shall be placed immediately following or directly below the part specified in paragraph (b)(1) of this section in the manner set forth in § 102.1(c)(3). The words "contains" or "containing" are optional.

(3) If the labeling implies that the package contains other foods and these foods are not present in the package, e.g., if a vignette on the package depicts a "serving suggestion" which includes any foods not present in the package, the principal display panel shall bear a statement that such foods are not present, in type size not less than that specified in § 102.1(b)(2)(i).

Effective date. Labeling may be changed to comply with this regulation beginning on August 2, 1973. All labeling ordered after December 31, 1973 and all labeling used on products shipped in interstate commerce after December 31, 1974, shall comply with this regulation.

(Secs. 201(n), 403, 701(a), 52 Stat. 1041 as amended, 1047–1048 as amended, 1055; 21 U.S.C. 321(n), 343, 371(a))

Dated: July 25, 1973.

A. M. SCHMIDT,
Commissioner of Food and Drugs.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Food and Drug Administration

[21 CFR Part 1]

LABELING OF CHEMICAL PRESERVATIVES IN FOOD

Notice of Proposed Rule Making

Section 403(i) of the Federal Food, Drug, and Cosmetic Act requires the common or usual name of each ingredient used in a fabricated food to be listed on the label, and section 403(k) of the act requires that any food containing a chemical preservative bear labeling stating that fact. The Food and Drug Administration has consistently interpreted these requirements to mean that a preservative ingredient contained in a food must be designated in the statement of ingredients by both the common or usual name of the ingredient and a separate designation of that ingredient as a preservative (e.g., "BHA (a preservative)" or "calcium proprionate (to retard spoilage)").

At one time, the United States Department of Agriculture permitted the label designation of preservatives in meat and poultry products by the use of such general designations as "oxygen interceptor" and "freshness preserver," without the specific name of the ingredient. The USDA regulations have now been changed, and require that the label designation of preservatives in meat and poultry products identify the substance by both its common name and its purpose (9 CFR 317.2(f)(1), (j)(10), (12) published in the FEDERAL REGISTER on October 3, 1970 (35 FR 15551, 15581, 15583)).

The Food and Drug Administration is therefore aware of no exception to the rule that every preservative in food must be labeled both by its common or usual name and its function. Because some food labels presently do not comply with these requirements, and because new food labels are now being prepared for compliance with food labeling regulations published in the FEDERAL REGISTERS of January 19 and March 14, 1973, and elsewhere in this issue of the FEDERAL REGISTER, the Commissioner of Food and Drugs has concluded that it is appropriate to propose a specific regulation covering this matter.

Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (secs. 403, 701(a), 52 Stat. 1047–1048, 1055; 21 U.S.C. 343, 371(a)) and under authority delegated to the Commissioner (21 CFR 2.120), it is proposed that Part 1 be amended in § 1.12 by adding thereto a new paragraph (j) to read as follows:

§ 1.12 Food; labeling; spices, flavorings, colorings and chemical preservatives.

* * * * *

(j) A food to which a chemical preservative(s) is added shall, except when exempt pursuant to § 1.10a, bear a label declaration stating both the common or usual name of the ingredient(s) and a separate description of its function, e.g., "preservative," "to retard spoilage," "a mold inhibitor," "to help protect flavor," or "to promote color retention."

Interested persons may, on or before, September 4, 1973, file with the Hearing Clerk, Food and Drug Administration, Rm. 6–88, 5600 Fishers Lane, Rockville, MD 20852, written comments (preferably in quintuplicate) regarding this proposal. Comments may be accompanied by a memorandum or brief in support thereof. Received comments may be seen in the above office during working hours, Monday through Friday.

Dated: July 25, 1973.

A. M. SCHMIDT,
Commissioner of Food, and Drugs.

[FR Doc.73-15692 Filed 8-1-73;8:45 am]

[21 CFR Part 1]

FOOD; NUTRITION LABELING

Proposed U.S. Recommended Daily Allowances for Infants

In paragraph 38 of the preamble to the order on nutrition labeling (21 CFR 1.17) published in the FEDERAL REGISTER of March 14, 1973 (38 FR 6951), the Commissioner of Food and Drugs concluded that the U.S. Recommended Daily Allowances (U.S. RDA) for infants and children under four years of age were reasonable interim standards for use in labeling food represented for use by infants. He recognized that the U.S. RDA for infants and children under four years of age were not wholly adequate for the labeling of foods marketed solely for infants under 12 months of age, however, and invited interested persons to consider appropriate new U.S. RDA's for this age level for incorporation into § 1.17 and Part 125.

The Commissioner received comments on this matter in relation to the tentative order for §§ 125.1 and 125.3, published in the FEDERAL REGISTER of January 19, 1973 (38 FR 2143). The American Academy of Pediatrics provided considerable information supporting their view that such a separate U.S. RDA should be established at this time. A review of the comments and information provided is presented in the preamble to the order on Part 125. On the basis of these comments and information the Commissioner has concluded that it is reasonable to establish a separate U.S. RDA for infants under 12 months of age. Elsewhere in this issue of the FEDERAL REGISTER the final order promulgating §§ 125.1 and 125.3 is published, establishing a separate U.S. RDA for infants.

Accordingly, as anticipated in paragraph 38 of the preamble to the order promulgating § 1.17, the Commissioner is revising § 1.17(h)(1) to utilize the U.S. RDA for infants established in § 125.1(b) for the nutrition labeling of foods marketed solely for infants, except for those formula products expressly covered by § 125.5.

Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (secs. 201, 403, 701(a), 52 Stat. 1040–1042 as amended, 1047, 1055; 21 U.S.C. 321, 343, 371(a)) and under authority delegated to him (21 CFR 2.120), the Commissioner proposes to amend § 1.17(h)(1) to read as follows:

§ 1.17 Food; nutrition labeling.

* * * * *

(h) * * *

(1) Except where expressly covered by § 125.5 of this chapter, infant, baby, and junior-type food marketed and promoted primarily for infants shall include nutrition information on the label and in labeling in compliance with this section except that the U.S. RDA levels for infants contained in § 125.1(b) of this chapter shall be used in lieu of the U.S. RDA contained in paragraph (c)(7)(iv) of this section. For the purposes of labeling these foods with a percent of the U.S. RDA for protein, a value of 20 grams of protein shall be the U.S. RDA value for protein with a protein efficiency ratio (PER) equal to or greater than casein, and 28 grams if the PER of the protein is less than the PER of casein but greater than 20 percent of casein.

* * * * *

Interested persons may, on or before September 4, 1973, file with the Hearing Clerk, Food and Drug Administration, Rm. 6–88, 5600 Fishers Lane, Rockville, MD, 20852, written comments (preferably in quintuplicate) regarding this proposal. Comments may be accompanied by a memorandum or brief in support thereof. Received comments may be seen in the above office during working hours, Monday through Friday.

Dated: July 25, 1973.

A. M. SCHMIDT,
Commissioner of Food and Drugs.

[FR Doc.73-15961 Filed 8-1-73;8:45 am]

[21 CFR Part 20]

PROPOSED STANDARDS OF IDENTITY FOR MELLORINE AND PAREVINE

Extension of Time for Filing Comments

In the matter of establishing identity standards for mellorine, a vegetable fat frozen dessert made in semblance of ice cream, and for parevine, a food resembling ice cream but containing no milk, meat, or ingredients derived from milk or meat:

A notice of proposed rule making in the above-identified matter published in the FEDERAL REGISTER of January 19, 1973 (38 FR 2150), provided for the filing of comments within 60 days following its publication date.

Eight comments were received on the proposal. Some comments were of the opinion that the 6 percent minimum fat level proposed for mellorine should be raised. These comments believed that the minimum fat requirements should parallel those for ice cream, but with substitution of other fats for the milk fat of ice cream.

Other comments stated that mellorine sold best in those states where compositional requirements resulted in a product more closely resembling ice milk, and

V 38-148 AUG 2 73 XUM

requested that the 6 percent minimum fat requirement of the proposal be lowered still further to permit continued marketing of a lower fat content mellorine.

Available information indicates that the compositional range for the vegetable fat frozen desserts now available in various states is too wide to be encompassed by a single identity standard, and that separate identity standards, parallel to those that now exist for ice cream and ice milk, may be required. Some states have established regulations to provide for the marketing of a mellorine-like product having a lower fat and total solids content. Another alternative would be to establish only one standard, and require declaration of the fat content as a part of the name of food so that consumers could choose between high and low fat mellorine.

The Commissioner of Food and Drugs concludes that this issue is of such importance that further comments on the alternative ways of handling matter (including proposed names for an ice milk counterpart) should be invited. Therefore, the period for filing comments is reopened until September 4, 1973. This extension will not affect the common effective date proposed in the FEDERAL REGISTER of January 19, 1973 (38 FR 2163) for compliance with various new labeling requirements for packaged food.

This notice is issued pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (Secs. 401, 701, 52 Stat. 1046, 1055–1056 as amended by 70 Stat. 919 and 72 Stat. 948; 21 U.S.C. 341, 371) and under authority delegated to the Commissioner (21 CFR 2.120).

Dated: July 25, 1973.

A. M. SCHMIDT,
Commissioner of Food and Drugs.

[FR Doc.73-15693 Filed 8-1-73;8:45 am]

[21 CFR Part 102]

RESTRUCTURED FOODS

Proposal To Establish Common or Usual Names

A number of convenience foods recently introduced on the market have the appearance of the traditional foods whose names they often carry, but are manufactured by new processes. One such group of foods is made by chopping, grating, or otherwise reducing a food substance into small units which are then formed or extruded into a uniform shape. In many cases, the restructured food resembles a product which traditionally has been made from either the whole product or a slice or segment of the product and not comminuted. For example, onion rings traditionally made from ringed slices of onions are now often composed of fresh chopped onions extruded into a ring. Dehydrated potatoes are now formed into the shape of potato chips traditionally made from potato slices. Fried clams traditionally made by breading a whole clam are now sometimes made from chopped clam pieces in semblance of whole fried clams. Fish sticks are often made not from segments of fish fillets, but from minced fish pieces formed into the shape of sticks.

Unless the labeling of foods constructed in this manner clearly specifies that the product is made from chopped food or small units of a food, the consumer may be led to believe that the product is made in the traditional manner. The Commissioner of Food and Drugs has concluded that any confusion and deception resulting from such new products can be prevented by adoption of informative common or usual names pursuant to 21 CFR Part 102. He proposes that such names include a qualifying statement describing the composition of the product in words which are not less than half the type size of the rest of the product name, in order to make this portion of the name sufficiently prominent and conspicuous.

The Commissioner believes that in establishing common or usual names for these products only one term should be used for the comminuted form in the name to avoid further consumer confusion resulting from the use of more than one term for the same comminuted form in the names of products on the market. For example, it is proposed that the term "minced" be designated as the comminuted form from which fried clams, nonstandardized breaded shrimp, fish sticks, and portions are made and that "diced" be used as the name for the comminuted form used in the ringed onion product.

The standard of identity for Frozen Raw Breaded Shrimp (21 CFR 36.30) does not provide for "minced" shrimp to be used in composite units of shrimp. Therefore, in addition to proposing a common or usual name for nonstandardized breaded shrimp products, a proposal to amend the standard to provide for minced shrimp will be published at a future date to avoid any inconsistency between the proposed common or usual name and the names prescribed by the standard.

The Commissioner proposes that a common or usual name be established for comminuted forms of the following products: onion rings, fish sticks or portions, fried clams, breaded shrimp and potato chips.

ONION RINGS MADE FROM DICED ONIONS

Traditionally, the food product known as "onion rings" has been made from ringed slices of onion. Some processors are now producing a product which is composed of fresh chopped onions which are breaded and extruded into a ring. The Food and Drug Administration is informed that the comminuted products contain as much, if not more, onion than the product composed of sliced whole onions.

The Commissioner proposes that onion products which are made from diced fresh or dehydrated onions which are breaded and shaped into a ring may be labeled as "Onion Rings" provided that this designation is immediately followed by a qualifying statement indicating the composition of the product. The words "Made from Diced Fresh (or Dehydrated) Onions" must be in type size no less than half that of the words "Onion Rings."

A proposal to establish a common or usual name for onion rings has been submitted to the Commissioner by Mrs. Paul's Kitchens, Inc., 5830 Henry Ave., Philadelphia, PA 19128, a frozen food processing company. Petitioner proposes the following common or usual name for onion rings:

Section ------ *Onion rings.* The common or usual name for a food product prepared from fresh onion bulbs, sliced and separated into rings coated with batter or breading and fried in a suitable fat or oil bath.

In its statement of grounds, petitioner maintains that products made with diced fresh onions should not be labeled or sold as onion rings, whether or not there is a qualifying statement. It is stated that the United States Department of Agriculture and other technical and cookbook references define onion rings as fresh onion bulbs, sliced and separated into rings, coated with batter and breading and fried in a fat or oil bath, and that this is also the understanding of the consumer.

Petitioner contends that the statement that the product is made from fresh chopped onions is inconsistent with the term "onion rings" and that this leads to consumer deception, which is not rectified by a statement that the product is made from fresh chopped onions.

Petitioner states that until 1972, it was Food and Drug Administration policy to consider a product mislabeled if it was made from fresh chopped onions and labeled "onion rings," whether or not there was a qualifying statement accompanying the term. It is argued that the change in policy made by the Food and Drug Administration in November 1972, allowing comminuted onions formed into rings to be labeled "onion rings" provided that these words were followed by the statement "Made from Diced Fresh Onions" in the same type size, color and prominence, was contrary to the requirements of the Administrative Procedure Act and is a nullity. As grounds for this conclusion, petitioner states that this policy change had a substantive, not merely procedural, effect on an entire industry, thus requiring consultation with or opportunity for comment by the onion ring industry, which was not afforded it when the change was made.

The full petition submitted by Mrs. Paul's Kitchens, Inc. is available at the Office of the Hearing Clerk, Food and Drug Administration, Rm. 6–88, 5600 Fishers Lane, Rockville, MD 20852.

FISH STICKS OR PORTIONS MADE FROM MINCED FISH

Traditionally, fish sticks or fish portions have been made from segments of fish fillets. These products are now sometimes made by forming minced fish into the desired shape. The Commissioner proposes to allow use of the terms "Fish Sticks" or "Fish Portions" for this type of product provided that these words are immediately followed by the statement "Made From Minced Fish." These qualifying words must be in type size no less than half that of the words "Fish Sticks" or "Fish Portions."

On December 21, 1972, a notice was published in the FEDERAL REGISTER (37 FR 28189) by the National Marine Fisheries Service of the National Oceanic and Atmospheric Administration (NOAA), Department of Commerce, proposing label designations for fish sticks and fish portions made from mechanically separated fish flesh. The Food and Drug Administration submitted a comment on the proposal, stating that the qualifying statement should be in the same type size as the words "Fish Sticks" or "Fish Portions." This view was reiterated in a letter to NOAA commenting on a draft of the final order, and as a result of this suggestion the final order, published in the FEDERAL REGISTER on May 11, 1973 (38 FR 12334), requires the same type size for all words in the name. This policy has been reconsidered and the Commissioner is now proposing that the qualifying statement should be in type size not less than half that of the words "Fish Sticks" or "Fish Portions." Except for the inconsistency in type size requirements, the regulation now proposed by the Commissioner conforms with the NOAA regulation.

FRIED CLAMS MADE FROM MINCED CLAMS

The traditional fried clam has been made by breading a whole clam and frying it. This food product is now sometimes made by combining chopped clam pieces, breading, forming into a clam shape and frying. The Commissioner proposes to allow this new product to be labeled "Fried Clams," provided that this term is followed by the words "Made From Minced Clams" in type that is no less than half the size of the words "Fried Clams."

NONSTANDARDIZED BREADED COMPOSITE SHRIMP UNITS

Section 36.30(c)(6) (21 CFR 36.30) prescribes a standard of identity for frozen raw breaded shrimp which consists of two or more whole shrimp or pieces of shrimp formed into composite units. This standard does not provide for "minced" shrimp nor does it cover any type of shrimp other than frozen raw shrimp. The Commissioner now proposes to designate a common or usual name for comminuted breaded shrimp units not included under § 36.30(e)(6), and to provide that the name to be used must be one prescribed under § 36.30(e)(6), either "Breaded Shrimp Sticks," "Breaded Shrimp Cutlets," depending upon the shape of the product, or if prepared in a shape other than that of sticks or cutlets, "Breaded Shrimp ------", the blank to be filled by a word or phrase that accurately describes the shape, but which is not misleading. The words "Made From Minced Shrimp" must follow in type size not less than half that of the words chosen to name the product.

The common or usual names proposed are intended to cover shrimp products that are not frozen raw. In order to avoid any inconsistency between this proposed common or usual name and the names prescribed by the standard, a proposal to amend the standard to include minced shrimp will be published at a future date.

POTATO CHIPS MADE FROM DEHYDRATED POTATOES

Traditionally, the name "potato chips" has been applied to thin slices of potato fried in deep fat. In recent years products have been introduced into the market which are made not from potato slices but from dehydrated potatoes, combined with small amounts of other ingredients and formed into the traditional potato chip shape.

Since 1969, the Food and Drug Administration has allowed use of the term "potato chips" for products made from dehydrated potatoes as long as the term is accompanied by a prominent declaration that it is made from dehydrated potatoes. The Commissioner proposes to establish a common or usual name for potato chips made from dehydrated potatoes formed into the shape of traditional potato chips. The words "Made From Dehydrated Potatoes" must follow the term "Potato Chips" and must be in type size not less than half the size of the largest type used in the words "Potato Chips."

Three petitions have been submitted to the Commissioner proposing to establish a common or usual name for potato chips. The following proposal has been received by the Commissioner from General Mills, Inc., 9200 Wayzata Blvd., Minneapolis, MN 55440.

Section 102. ------. The common or usual name of "potato chips" shall include the type of potatoes from which the chips are made. In the case of potato chips made from raw potatoes the statement shall be "Made from Raw Potatoes." In the case of potato chips made from dried or dehydrated potatoes the statement shall be "Made from Dried Potatoes." The statement shall follow the words "Potato Chips" and shall be in type not less than 25 percent the size of the largest type used in the words "Potato Chips."

As grounds for its proposal, petitioner cites both a July 1969 Food and Drug Administration compliance policy guideline and a court ruling that "potato chips" accompanied by a qualifying statement indicating the type of potatoes used is an appropriate name, Potato Chip Institute v. General Mills, Inc., 333 F. Supp. 173 (D. Neb. 1971), aff'd 461 F.2d 1088 (8th Cir. 1972). Petitioner also argues that consumer acceptance of the new product is indicated by the estimate that has been made that in markets where both types of potato chips are sold, the product made from dehydrated potatoes has as much as 25 percent of the market. It is in the interest of the consumer, petitioner maintains, that both subclasses of potato chips are identified.

A petition to establish separate common or usual names for potato chips and for potato snacks has also been submitted by the Potato Chip Institute International (PCII), 940 Hanna Building, Cleveland, OH 44115:

Section ------. *Potato chips.* The common or usual name for a food consisting of thin slices of raw potato fried until crisp shall be potato chips.

Section ------. *Potato snacks.* The common or usual name for a food resembling potato chips, made from dried or dehydrated potatoes or dried or dehydrated potato granules, shall be potato ---------, the blank to be filled in with a word or words such as "snacks" or "bites" but not with any word or words containing the word "chip" or "chips."

In support of its proposal that products made from dried potatoes or potato granules not be sold or labeled as potato chips, with or without a qualifying statement, petitioner argues that by dictionary definition and common consumer understanding, potato chips are thin slices of raw potatoes, fried until crisp. Consequently, PCII maintains, it is deceptive and misleading to call products made from dried potatoes "potato chips." This deception, it is contended, cannot be rectified by the addition of a qualifying statement.

PCII argues that the Compliance Policy Guideline issued in July 1969 by the Food and Drug Administration, was a complete reversal of previous policy and that the decision to change the policy was made without consultation with or opportunity for comment by the potato chip industry. The petition alleges that since the action had a substantive and not merely procedural effect on an entire industry, the provisions of the Administrative Procedure Act were violated and the guideline is a nullity.

The Procter & Gamble Company, Cincinnati, OH, has also submitted to the Commissioner a proposal establishing a common or usual name for potato chips. The proposal states:

Section 102. ---------. The common or usual name for a product made from potatoes which are thinly-formed and deep-fat fried shall be "potato chips." The name shall be accompanied (a) in the case of potato chips made from raw potatoes, by a prominent declaration that the product is "made from raw potatoes"; and (b) in the case of potato chips made from dried or dehydrated potatoes, by a prominent declaration that the product is "made from dried potatoes." In either case, the declaration shall immediately follow the words "potato chips" on any principal display panel and shall be in type size not less than that required for the product's net content declaration pursuant to the Fair Packaging and Labeling Act.

Petitioner initially states that it does not concede the validity of 21 CFR Part 102 or the authority of the Commissioner to establish regulations under it. It is argued that Part 102 seems to authorize substantive regulations that are tantamount to standards of identity for food products, and that this is an impermissible attempt to extend the Commissioner's authority to set such standards beyond the authority accorded to him under section 401 of the act.

Procter & Gamble asserts that the establishment of a common or usual name is unnecessary since the Food and Drug Administration in its Compliance Policy Guideline and the court in the Potato

V 38-148 AUG 2 73 XUM

Chip Institute case, concluded that the name "potato chips" includes chips made from dried or dehydrated potatoes provided that a prominent declaration that the product is made from dried potatoes accompanies the name "potato chips."

In its statement of grounds supporting its proposed regulation, petitioner maintains that there is no qualitative difference between the two types of potato chips, since potato is the raw material for both, with one less processing step involved with raw potatoes. Procter & Gamble contends that if the product made from dried potatoes were called something other than "potato chips" it would mislead the consumer into thinking that this product was significantly different from the traditional product.

Petitioner cites research done by an independent firm which showed that the great majority of consumers voluntarily recognize as "potato chips" the product made from dried potatoes, even when put on notice of the processing difference. It was also noted in the petition that many other food products, standardized and nonstandardized, such as ice cream and corn flakes, use alternate physical forms of their basic ingredients without any prominent labeling declaration.

In support of its proposal that the qualifying statement should be no less than the size of the net content declaration for foods under the Fair Packaging and Labeling Act, Procter & Gamble argues that the declaration need only be large enough to be read at a distance of about three or four feet. There is no reason, petitioner argues, that compels the size of the qualifying statement to bear any specific relation to the size of the words "potato chips," and an excessively large declaration would be unnessary and would unduly emphasize the form of the ingredients used.

The full petitions submitted by General Mills, Inc., Potato Chip Institute International, and the Procter & Gamble Co. are available for inspection at the Office of the Hearing Clerk, Food and Drug Administration, Rm. 6-88, 5600 Fishers Lane, Rockville, MD 20852.

Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (secs. 201(n), 403, 701(a), 52 Stat. 1041, as amended, 1047-1048, as amended, 1055; 21 U.S.C. 321(n), 343, 371(a)) and under authority delegated to him (21 CFR 2.120), the Commissioner proposes to amend Part 102 of Chapter I of Title 21 of the Code of Federal Regulations, by adding thereto the following new sections:

§ 102.13 Onion rings made from diced onion.

The common or usual name of a food product consisting of diced fresh or dehydrated onion products which are mixed with binders and formed, shaped or extruded into rings, shall be: "Onion Rings Made From Diced Onions," the blank to be filled in by the word "Fresh" when diced fresh onions are used or with the word "Dehydrated" when dehydrated onions are used. The words "Made From Diced Onions" shall appear on the label in type size that complies with § 102.1(b)(2)(i) and (ii). Such food product shall contain a quantity of onions not less than the quantity present in the similar product made from rings of sliced whole onion.

§ 102.14 Fish sticks or portions made from minced fish.

The common or usual name of a food product manufactured from fish blocks composed entirely of mechanically separated fish flesh combined with binders shaped in the form of fish sticks or portions and breaded shall be "Fish Made From Minced Fish" the blank to be filled in by the word "Sticks" or "Portions" as the case may be. The words "Made From Minced Fish" shall appear on the label in type size that complies with § 102.1(b)(2)(i) and (ii). Such food product shall contain a quantity of fish not less than the quantity present in the similar product made from cut whole fish.

§ 102.15 Fried clams made from minced clams.

The common or usual name of a food product consisting of breaded comminuted clams shall be "Fried Clams Made From Minced Clams." The words "Made From Minced Clams" shall appear on the label in type size that complies with § 102.1(b)(2)(i) and (ii). Such food product shall contain a quantity of clams not less than the quantity present in the similar product made from whole clams.

§ 102.16 Nonstandardized breaded composite shrimp units.

The common or usual name for breaded composite shrimp units that do not conform to the definition and standard of identity prescribed by § 36.30(c)(6) of this chapter by reason that the food is not marketed in the frozen, raw form shall be "_____ Made From Minced Shrimp," the blank to be filled with the words prescribed for the shape of the product by § 36.30(e)(6) of this chapter, either "Breaded Shrimp Sticks," "Breaded Shrimp Cutlets," depending upon the shape of the product, or if prepared in a shape other than that of sticks or cutlets, "Breaded Shrimp _____ Made From Minced Shrimp" the blank to be filled by a word or phrase that accurately describes the shape, but which is not misleading. The words "Made From Minced Shrimp" shall appear on the label in type size that compiles with § 102.1(b)(2)(i) and (ii). Such food product shall contain a quantity of shrimp not less than the quantity present in the similar frozen, raw breaded composite shrimp unit product made in accordance with provisions of the standard of identity.

§ 102.17 Potato chips made from dehydrated potatoes.

The common or usual name of a food product consisting of dehydrated potatoes combined with other ingredients formed into the shape of traditional potato chips shall be "Potato Chips Made From Dehydrated Potatoes." The words "Made From Dehydrated Potatoes" shall appear on the label in type size that complies with § 102.1(b)(2)(i) and (ii). Such food product shall contain a quantity of onions not less than the quantity present in the similar product made from rings of sliced whole onion.

Interested persons may, on or before October 1, 1973, file with the Hearing Clerk, Food and Drug Administration, Rm. 6-88, 5600 Fishers Lane, Rockville, MD 20852, written comments (preferably in quintuplicate), regarding the petitions and the Commissioner's proposal. Comments may be accompanied by a memorandum or brief in support thereof. Received comments may be seen in the above office during working hours, Monday through Friday.

Dated: July 25, 1973.

A. M. SCHMIDT,
Commissioner of Food and Drugs.

[FR Doc. 73-15695 Filed 8-1-73;8:45 am]

[21 CFR Part 102]

FILLED MILK PRODUCTS

Proposed Common or Usual Name

On November 9, 1972, the United States District Court for the Southern District of Illinois handed down a decision in *Milnot Co. v. Richardson*, 350 F. Supp. 221 (S.D. Ill. 1972), holding the Filled Milk Act unconstitutional. The Filled Milk Act of 1923 (42 Stat. 1486), 21 U.S.C. 61-64, prohibits the shipment of any filled milk in interstate commerce. A filled milk is defined as a combination of any milk, cream or skimmed milk (whether or not condensed, evaporated, concentrated, powdered, dried or desiccated) with any fat or oil other than milk-fat, so that the resulting product is in imitation or semblance of milk, cream, or skimmed milk.

The court in the *Milnot* case concluded that, since other substitute milk and dairy products may lawfully be shipped in interstate commerce, the prohibition against interstate shipment of filled milk products was an unconstitutional discrimination against these products. The White House Conference on Food, Nutrition and Health recommended in 1969 that the Filled Milk Act be repealed, and the Food and Drug Administration has concurred in that recommendation. Accordingly, it has been concluded that the decision in the *Milnot* case will not be appealed. On February 1, 1973, a protective notice of appeal filed in the case was withdrawn, and the appeal was dismissed.

This notice will serve to inform the public that, pursuant to the court decision in this case, the Filled Milk Act will no longer be enforced. Henceforth, filled milk products may lawfully be shipped in interstate commerce and will be regulated under the provisions of the Federal Food, Drug, and Cosmetic Act, just as any other foods.

In view of these developments, the Commissioner of Food and Drugs concludes that appropriate labeling for filled milk products should promptly be considered. The Food and Drug Administration is now studying the possibility of establishing a standard of identity for these products. In the interim, the Commissioner has concluded that a regulation should be promulgated governing the common or usual name of these products.

During this interim the Commissioner invites interested persons to comment on the suitability and meaning to them of the word "filled" in the name of the food. Alternate words or phrases which are more meaningful and are not deceptive and misleading may be suggested.

Milk products are a major source of nutrients in the diet. Pursuant to § 1.8(e) of this chapter, published elsewhere in this issue of the FEDERAL REGISTER, any filled milk product which is not nutritionally equivalent to the product that it resembles and for which it is intended as a substitute shall be labeled as an "imitation". The proposed regulation set out below provides that if a product as defined in paragraph (a) is made nutritionally equivalent to a counterpart milk or cream product by meeting the nutrient specifications in paragraph (b), the common or usual name of the product will be "filled_____", the blank to be filled in with the name of the counterpart milk product (e.g., milk, cream, skimmed milk, and so forth).

The significant nutritional qualities of milk which should be preserved in a milkfat-replaced product are vitamin A, vitamin E, and polyunsaturated fatty acids of the linoleic acid series. An additional quality which should be provided is vitamin D because beverage milk products are recognized as the preferred food vehicle for this vitamin in the American diet. The terminology used for polyunsaturated fatty acids of the linoleic acid series in the recently published regulation on fat labeling, § 1.18 of this chapter (38 FR 6961) is *cis, cis*-methylene-interrupted polyunsaturated fatty acids. Some vegetable fats or fat blends which may be used to replace milkfat in producing filled milk have a fatty acid pattern which is deficient in this fatty acid group. Providing for a level equivalent to 4 percent of the fat in the product will correct this deficiency.

Labeling requirements of § 1.17 of this chapter (38 FR 6951) apply to all filled milk products to which descrete nutrients are added or for which a claim or information with respect to nutritional properties (including the nature or content of the fat and fatty acids, in which case the requirements of § 1.18 also apply) is made.

Accordingly, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (secs. 201(n), 403, 701(a), 52 Stat. 1041, as amended, 1047-1048, as amended, 1055; 21 U.S.C. 321(n), 343, 371(a)), and under authority delegated to the Commissioner (21 CFR 2.120), it is proposed that a new § 102.18 be added to Part 102, as follows:

§ 102.18 Filled milk products.

(a) The common or usual name of the food made from milk, cream, or skimmed milk, whether or not condensed, evaporated, concentrated, powdered, dried, or desiccated, from which all or part of the fat has been removed and to which has been added, or which has been blended or compounded with, any fat or oil other than milkfat, shall be "filled_____", the blank being filled in with the name of the counterpart milk product as defined in Part 18 of this chapter.

(b) A product meeting the definition of paragraph (a) of this section but which is nutritionally inferior to the counterpart milk product shall be labeled as an imitation pursuant to § 1.8(e) of this chapter. For purposes of § 1.8(e) of this chapter, a filled milk product shall be considered nutritionally equivalent to its counterpart milk product if it meets all of the following requirements:

(1) It contains the minimum milk solids not fat required for the counterpart milk product as prescribed in Part 18 of this chapter.

(2) If it is filled milk, filled lowfat milk, filled skim milk, or the condensed, evaporated, concentrated, powdered, dried or desiccated form of these fluid products:

(i) Vitamin A shall be present in such quantity that each quart (or reconstituted quart, in the case of the condensed or dried products) of the food contains 2,000 International Units thereof.

(ii) Vitamin D shall be present in such quantity that each quart (or reconstituted quart, in the case of the condensed or dried products) of the food contains 400 International Units thereof.

(iii) *Cis,cis* - methylene - interrupted polyunsaturated fatty acids (as glycerides) shall be present at a level equivalent to 4 percent of the fat in the product.

(iv) Vitamin E shall be present at a level equivalent to 1 International Unit per gram of total polyunsaturated fatty acids (as glycerides) in the product.

(3) If it is filled half-and-half, filled light cream, filled light whipping cream, filled heavy cream, or the condensed, evaporated, concentrated, powdered, dried or desiccated form of these fluid products;

(i) Vitamin A shall be present at a level equivalent to 40 International Units per gram of fat.

(ii) *Cis,cis* - methylene - interrupted polyunsaturated fatty acids (as glycerides) shall be present at a level equivalent to 4 percent of the fat in the product.

(iii) Vitamin E shall be present at a level equivalent to 1 International Unit per gram of total polyunsaturated fatty acids (as glycerides) in the product.

(c) This section shall not apply to an infant formula that is labeled as such and that is represented for feeding infants and young children.

Interested persons may, on or before October 1, 1973, file with the Hearing Clerk, Food and Drug Administration, Rm. 6-88, 5600 Fishers Lane, Rockville, MD 20852, written comments (preferably in quintuplicate) regarding this proposal. Comments may be accompanied by a memorandum or brief in support thereof. Received comments may be seen in the above office during working hours, Monday through Friday.

Dated July 25, 1973.

A. M. SCHMIDT,
Commissioner of Food and Drugs.

[FR Doc.73-15694 Filed 8-1-73;8:45 am]

[21 CFR Part 125]

USE OF INTERNATIONAL UNITS FOR VITAMINS A AND D

Notice of Proposed Rule Making

Elsewhere in this issue of the FEDERAL REGISTER the Commissioner of Food and Drugs is promulgating final regulations for food for special dietary uses. Exceptions filed to the tentative order in that proceeding pointed out that § 125.5(c)(5) uses "U.S.P. Units" as the units of measurement for vitamins A and D, whereas the tentative order used "International Units" for these vitamins.

The Commissioner has concluded that International Units should be used as the standard units of measurement for vitamins A and D. Accordingly, it is proposed that § 125.5(c)(5) (21 CFR 125.5) be revised to refer to "International Units" rather than "U.S.P. Units" for vitamins A and D.

The Commissioner recognizes that this is a technical change and that there will be no need to require immediate label changes to reflect this revision. The Commissioner therefore proposes that, when adopted, this revision may be reflected in labeling when other labeling changes are made, in order to prevent any unnecessary costs to consumers.

Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (secs. 403, 701, 52 Stat. 1047-1048, 1055; 21 U.S.C. 343, 371) and under authority delegated to him (21 CFR 2.120), the Commissioner proposes to amend Part 125 in § 125.5(c)(5) to insert "International Units" in lieu of "U.S.P. Units" as the units of measurement for vitamins A and D.

Interested persons may, on or before September 1, 1974, file with the Hearing Clerk, Food and Drug Administration, Rm. 6-88, 5600 Fishers Lane, Rockville, MD 20852, written comments (preferably in quintuplicate) regarding this proposal. Comments may be accompanied by a memorandum or brief in support thereof. Received comments may be seen in the above office during working hours, Monday through Friday.

Dated: July 25, 1973.

A. M. SCHMIDT,
Commissioner of Food and Drugs.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Food and Drug Administration

[DESI 5897]

FOLIC ACID PREPARATIONS, ORAL AND PARENTERAL FOR THERAPEUTIC USE

Drugs for Human Use; Drug Efficacy Study Implementation; Amendment

In the FEDERAL REGISTER of April 9, 1971 (36 FR 6843), the Commissioner of Food and Drugs published conclusions concerning the effectiveness of folic acid for therapeutic use pursuant to reports received from the National Academy of Sciences-National Research Council.

It was concluded that there is no evidence that doses of folic acid greater than 1 mg. daily have greater efficacy than do those of 1 mg., and that the usual therapeutic dose, oral or parenteral, should be 0.25 mg. to 1.0 mg. daily, and the maintenance dose should ordinarily be 0.1 to 0.25 mg. daily. The notice allowed 180 days for manufacturers and distributors to reformulate products of higher strength than 1.0 mg.

That notice also stated, in accord with regulations then in effect (21 CFR 3.42), that oral preparations supplying more than 0.1 mg. folic acid per dosage unit would be restricted to prescription dispensing and that a dietary supplement furnishing 0.1 mg. could be prescribed when a maintenance level of 0.1 mg. per day was indicated.

Elsewhere in this issue of the FEDERAL REGISTER the Commissioner of Food and Drugs has published orders revising regulations for foods for special dietary use and promulgating a standard of identity for dietary supplements and an order revoking § 3.42 and amending the food additive regulations as they apply to folic acid. The effect of these orders is to increase the amount of folic acid which may be added to a food or used in a dietary supplement above the level previously allowed. The maximum daily amount of folic acid now permitted for such use is 0.1 mg. for infants, 0.3 mg. for children under 4 years of age, 0.4 mg. for adults and children 4 or more years of age, and 0.8 mg. for pregnant or lactating women.

Pending review of the status of folic acid by the OTC vitamin-mineral drug panel pursuant to procedures established in § 130.301, the Food and Drug Administration will continue on an interim basis its previous policy of regarding any preparation containing folic acid in excess of the permitted food additive level as a prescription drug.

Therefore, the Commissioner finds it appropriate to amend certain parts of the previous DESI notice for folic acid and republish it as follows:

The Food and Drug Administration has evaluated reports of the National Academy of Sciences-National Research Council, Drug Efficacy Study Group, as well as other available evidence, and concludes that folic acid administered orally or parenterally:

1. Is effective for the treatment of megaloblastic anemias of tropical and nontropical sprue, nutritional origin, pregnancy, infancy, and childhood.

2. Lacks substantial evidence of effectiveness in "macrocytic anemias associated with pellagra and similar deficiency states" and such vague, unspecific conditions as "macrocytic anemia of gastrointestinal origin" and "megaloblastic anemias other than pernicious anemia."

The Food and Drug Administration also concludes that there is no evidence that doses of folic acid greater than 1 mg. daily have greater efficacy than do those of 1 mg. The maintenance level of folic acid permitted in food and dietary supplements is up to 0.1 mg. for infants, 0.3 mg. for children under four years of age, 0.4 mg. for adults and children four or more years of age, and 0.8 mg. for pregnant or lactating women. The usual therapeutic dose, oral or parenteral, is up to 1.0 mg. daily.

Dietary supplement preparations are available without a prescription (21 CFR 121.1134). Levels higher than dietary supplement amounts are available only with a prescription.

Parenteral drug products and those oral dosage form products which by reason of containing in excess of 0.8 mg. per dosage unit or per recommended daily dosage or because of a recommended use are limited to prescription dispensing, are regarded as new drugs (21 U.S.C. 321(p)). The Food and Drug Administration is prepared to approve abbreviated new-drug applications and abbreviated supplements to previously approved applications providing for these articles under the conditions described herein.

A. *Form of drug.* Folic acid preparations are in (1) tablet form suitable for oral administration and contain no more than 1.0 mg. folic acid per tablet or (2) solution form suitable for parenteral administration in the dosages recommended in the labeling guidelines below.

B. *Labeling conditions.* 1. The label bears the statement "Caution: Federal law prohibits dispensing without prescription."

2. The drug is labeled to comply with all requirements of the Act and regulations promulgated thereunder, and those parts of its labeling indicated below are substantially as follows: (Optional additional information applicable to the drug, may be proposed under other appropriate paragraph headings and should follow the information set forth below.)

FOLIC ACID

DESCRIPTION

(To be supplied by the manufacturer. This is to be confined to an appropriate description of the physical and chemical properties of the drug, and the formulation.)

ACTIONS

(To be supplied by the manufacturer. This is to be confined to an appropriate statement of the demonstrated pharmacologic/physiologic actions of the active ingredients of the drug in humans. When the mode of action has not been determined, this should be clearly indicated.)

INDICATIONS

Folic acid is effective in the treatment of megaloblastic anemias due to a deficiency of folic acid as may be seen in tropical or nontropical sprue, in anemias of nutritional origin, pregnancy, infancy, or childhood.

WARNINGS

Folic acid alone is improper therapy in the treatment of pernicious anemia and other megaloblastic anemias where vitamin B_{12} is deficient.

PRECAUTIONS

Folic acid especially in doses above 1.0 mg. daily may obscure pernicious anemia in that hematologic remission occur while neurological manifestations remain progressive.

ADVERSE REACTIONS

Allergic sensitization has been reported following both oral and parenteral administration of folic acid.

DOSAGE AND ADMINISTRATION

Oral administration. Folic acid is well absorbed and may be administered orally with satisfactory results except in severe instances of intestinal malabsorption.

Parenteral administration. Intramuscular, intravenous, and subcutaneous routes may be used if the disease is exceptionally severe, or if gastrointestinal absorption may be, or is known to be, impaired.

Usual therapeutic dosage—In adults and children (regardless of age) up to 1.0 mg. daily. Resistant cases may require larger doses.

Maintenance level. When clinical symptoms have subsided and the blood picture has become normal, a maintenance level should be used, i.e., 0.1 mg. for infants and up to 0.3 mg. for children under four years of age, 0.4 mg. for adults and children four or more years of age, and 0.8 mg. for pregnant and lactating women, per day, but never less than 0.1 mg. per day. Patients should be kept under close supervision and adjustment of the maintenance level made if relapse appears imminent.

In the presence of alcoholism, hemolytic anemia, anticonvulsant therapy, or chronic infection, the maintenance level may need to be increased.

Holders of new-drug applications and abbreviated new-drug applications approved for folic acid-containing preparations limited to prescription sale shall submit supplements by October 1, 1973 to provide for revised labeling in accord with that given in paragraph B.2, above.

Any identical, related, or similar product, not the subject of a new drug application, is covered by the new drug applications reviewed and is subject to this notice. See 21 CFR 130.40 (37 FR 23185, October 31, 1972). Any person who wishes to determine whether a specific product is covered by this notice should write to the Food and Drug Administration, Bureau of Drugs, Office of Compliance (BD-300), 5600 Fishers Lane, Rockville, MD 20852.

This notice is issued pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (secs. 502, 505, 52 Stat. 1050-53, as amended; 21 U.S.C. 352, 355) and the Administrative Procedure Act (5 U.S.C. 554) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 2.120).

Dated: July 26, 1973.

A. M. SCHMIDT,
Commissioner of Food and Drugs.

AIR QUALITY STANDARDS

Approval and Promulgation of Implementation Plans

V 38-148 AUG 2 73 XUM

ENVIRONMENTAL PROTECTION AGENCY

[40 CFR Part 52]

COLORADO; APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

Notice of Proposed Rule Making

On May 31, 1972 (37 FR 19842), pursuant to section 110 of the Clean Air Act and 40 CFR Part 51, the Administrator approved, with specific exceptions, State plans for implementation of the National Ambient Air Quality Standards. On that date, the Governor of Colorado was advised that in order to complete the requirements of §§ 51.11(b) and 51.14, a transportation and/or land use control strategy for the Metropolitan Denver Intrastate Air Quality Control Region (hereinafter, the Metropolitan Denver Region) was to be submitted to the Administrator by February 15, 1973.

On January 31, 1973, the U.S. Court of Appeals for the District of Columbia Circuit (Natural Resources Defense Council, Inc., et al. v. Environmental Protection Agency (civil action No. 72-1522) found that the Administrator did not conform to the strict requirements of the Clean Air Act of 1970 in permitting several States to delay submission of transportation control portions of their implementation plans until February 15, 1973, and in granting extensions until mid-1977 for attainment of the national primary ambient air quality standards without following the procedures established in section 110, 42 U.S.C. 1857c-5 (e). Accordingly, the court ordered that the Administrator rescind the extension granted the States for implementation of the transportation and/or land use control portion of their implementation plans. The affected States, including Colorado, were required to submit a control plan by April 15, 1973. The plan was to show attainment of the National Ambient Air Quality Standards for photochemical oxidants (hydrocarbons) and carbon monoxide as expeditiously as practicable but no later than May 31, 1975.

This proposal is a result of certain deficiencies which have been noted by the Administrator in his preliminary review of the Colorado Transportation Control Plan. Following the expiration of the 21-day comment period on the supplemental information submitted by the Governor of Colorado on July 16, 1973, the Administrator will announce a decision on the approvability of the Colorado Plan prior to the public hearings scheduled on September 10, 1973. Additional proposals by EPA may be submitted to the public in the FEDERAL REGISTER or portions of this proposal deleted if appropriate.

POLLUTION IN THE METROPOLITAN DENVER REGION

The Metropolitan Denver Region lies within the South Platte River drainage basin. Pollution problems associated with motor vehicle generated carbon monoxide and photochemical oxidants (hydrocarbons) occur during periods of stable atmospheric conditions with light winds. The South Platte River flows from southwest to northeast through the center of Denver, with land elevation generally decreasing toward the northeast. The mountains rise to about 8,000 ft. above sea level to the west and 6,000 to 7,000 ft. to the southwest. This topographic pattern results in downslope or drainage winds from the south through the southwest during the night and into the morning hours. As daytime heating takes effect, upslope or toward-the-mountains wind flow occurs, and maybe over a considerably wider range from north-northeast to south-southeast. This local wind regime is strongest when the general weather situation is quiet and under the influence of a weak pressure gradient.

The Primary National Ambient Air Quality Standard for photochemical oxidants is 160 $\mu g/m^3$ (0.08 part per million (ppm) average) maximum 1-hour concentration, not to be exceeded more than once per year. The standard, promulgated on April 30, 1971 (36 FR 8186), is intended to avoid adverse effects on human visual and respiratory systems that have been observed on days when estimated hourly average concentration of photochemical oxidants reach 0.10 ppm. A level of 0.08 ppm was therefore judged necessary by the Administrator to protect public health with an adequate margin of safety, as required by the Act.

The second highest recorded 1-hour average concentration of oxidants in the Metropolitan Denver Region was 0.18 ppm. This concentration was recorded in 1971 and using the relationship between hydrocarbons emissions and ambient photochemical oxidant concentration, as defined in Appendix J, 40 CFR 51, a 60 percent reduction in hydrocarbon emissions is required.

The Primary National Ambient Air Quality Standards for carbon monoxide are 35 ppm maximum 1-hour concentration and 9 ppm maximum 8-hour concentration, each not to be exceeded more than once per year. These standards are intended to prevent adverse effects caused by the absorption of carbon monoxide by blood hemoglobin.

The second highest 1-hour and 8-hour carbon monoxide concentrations were recorded in 1971 in the Metropolitan Denver Region. The concentrations are 51 ppm and 24.7 ppm respectively. Control measures adequate to ensure meeting the 8-hour carbon monoxide standard will also ensure meeting the 1-hour carbon monoxide standard. Utilizing a proportional rollback technique a 64 percent reduction in carbon monoxide emissions is required.

Colorado faces a unique situation. The high altitude provokes and intensifies the air pollution problem, particularly that associated with mobile sources. Because of Colorado's high altitude (an average elevation of 6,800 ft. above sea level) problems are compounded between pollutant levels, density of atmosphere, and effects on human health. Acquiring data which accurately reflects true emissions at Denver's altitude creates problems in selection of appropriate control strategies for the Metropolitan Denver Region.

SUMMARY OF CONTROL REQUIREMENTS

The best information available to the Administrator indicates that the anticipated decrease in motor vehicle emissions from the Federal Motor Vehicle Control Program (FMVCP) will be insufficient to permit meeting the National Standards by May 31, 1975. This information indicates further that the degree of control of hydrocarbon emissions necessary to meet the 1-hour photochemical oxidant standard is greater than the degree of control necessary to meet either the 1-hour or 8-hour carbon monoxide standards. Stationary sources of hydrocarbons contribute significantly to the photochemical oxidant problem in the Metropolitan Denver Region, and control of these sources will contribute to the necessary emissions reductions for hydrocarbons. The balance of reduction necessary will come from controls on mobile source emissions. The same amount of control necessary to meet the photochemical oxidants standards will ensure meeting the 8-hour standard for carbon monoxide.

The State of Colorado submitted to the Environmental Protection Agency on June 4, 1973 a plan for attainment of the standards and a request for an extension of 2 years. EPA is currently reviewing this plan. The strategies in the Colorado submittals appear to be approvable in concept. Colorado's strategies together with those proposed here should assure attainment of the standard. The Administrator, however, is withholding approval at this time pending the evaluation of supplemental information which has been received from the State of Colorado and the expiration of the public comment period.

Should the Administrator approve the Colorado plan, such approval would represent EPA sanction of a plan which is less specific as to individual strategies than would be acceptable from a sea level region. The altitude of the Denver area precludes the arbitrary selection of a retrofit device or a particular inspection/maintenance program. Data to justify such a selection does not exist. Accordingly, the Administrator is considering approval of the Colorado plan to develop those strategies for high altitude areas. A firm commitment from the State has been received to undertake this development effort and has now been mandated by Colorado Senate Bill 893 which is submitted to the Administrator as part of the supplemental information received on July 16, 1973. Because of the lack of data at high altitude, EPA development of these strategies would require essentially the levels of effort and amount of time required in the State plan. EPA is now cooperating in the effort to develop a suitable retrofit device for pre-1968 vehicles, high altitude modification and tuning specifications, and a high altitude inspection/maintenance program.

The commitment expressed by the Colorado legislature in Senate Bill 393 allocates resources to the Colorado pollution control program at a level which is reasonable and proper.

Prior to the submission of the supplemental information, this commitment did not exist nor was a commitment to implement compliance schedules included in the original submittal. Even though the combined State of Colorado plan and the proposed EPA plan have considered all reasonable strategies, the standards can not be met by 1975. Accordingly, an extension will be required for the Metropolitan Denver Region.

The transit improvements, bikeway development, and bus/carpool lanes proposed by the state will provide a nonautomotive increase in mobility for residents of the Metropolitan Denver Region. This increase will be absorbed by a shift away from the private automobile due to the vehicle restraints to be imposed by the State and the measures being proposed by EPA.

The supplemental information includes three additional strategies together with information which relates to the specific methods or techniques by which the strategies proposed by the State of Colorado will be implemented. The strategies which are being proposed here represent those additional strategies which are necessary to achieve and maintain the standards by May 31, 1977. Control plans will not be promulgated in final form until the opportunity for public participation, including public hearings, has taken place. The measures being proposed represent EPA's best judgment of the most reasonable methods currently available to meet air quality standards. However, they may be amended, others may be added, or entirely new measures may be chosen in their place if the comments received on this notice or EPA's own reexamination of the problem indicates that such action would be warranted.

The State of Colorado has in its plan a proposed regulation for the control of stationary hydrocarbon emissions. Only transportation and land use controls may be submitted in proposed form (40 CFR 51.22). EPA must, therefore, propose stationary hydrocarbon emission control regulations. If the State of Colorado adopts suitable regulations in the future, the EPA regulations can be withdrawn.

The stationary source hydrocarbon regulations proposed herein are for the stationary hydrocarbon emission. Only control of hydrocarbon emissions from a variety of sources. The regulations limit emissions in the areas of transportation manufacturing and processing. Regulations are also provided for control of gasoline sales and marketing operations.

The emissions of carbon monoxide affecting ambient concentration within the areas of concern come almost entirely from motor vehicle sources, so that reductions required beyond those provided by the FMVCP will need to be effected by transportation controls that reduce total motor vehicle emissions. The two general types of transportation controls available are those that reduce the average emission per mile of vehicle travel and those that reduce the number of vehicle miles traveled (VMT). The Colorado control plan together with the EPA proposal set forth here includes strategies selected from both these major categories.

SUMMARY OF THE TRANSPORTATION CONTROL PLAN

Of the strategies listed below, the first three were proposed in the original Colorado transportation control plan submitted on June 4, 1973. The second three were proposed in the submittal of supplemental information on July 16, 1973. The strategies are:

(1) Semi-annual inspection and maintenance program using the idle test mode to be fully implemented by December 1, 1975.

(2) Air bleed retrofit for pre-1968 vehicles to be fully implemented by July 1, 1976.

(3) High altitude modification and tuning specifications for 1968–1975 vehicles to be fully implemented by July 1, 1976.

The following strategies are to be implemented by December 1, 1974:

(4) Designation of mandatory bus/carpool lanes.

(5) Limitation on the construction of future parking facilities.

(6) Removal of on-street parking in the core area.

The State of Colorado has also included improvements in public transit and expanded bikeway development and use to reduce the number of vehicle miles traveled. EPA has determined that an additional measure to reduce VMT is necessary. Accordingly, EPA is proposing a limitation on gasoline sales at fiscal year 1973 levels to be effective on July 1, 1974, and a 31 percent reduction in VMT attained by the same method to be effective on May 31, 1977.

The 31 percent reduction is not mandated in the proposed regulations. The State is required by January 1, 1977 to evaluate the reductions in VMT achieved through other strategies prior to that date, and project the necessary VMT reduction to be achieved through gasoline sales limitation. The 31 percent represents EPA's best estimate of this required reduction based on current data.

The statement of a requirement for a 31 percent VMT reduction is somewhat misleading when viewed in the context of the gasoline sales limitations to be imposed earlier. The 31 percent is a reduction from projected 1977 levels rather than 1971 levels. The sales limitation on gasoline should effectively stop growth in VMT, hence the actual reduction from current levels should be somewhat less than 31 percent.

Gasoline limitation was selected because it was originally included in the Colorado submittal as one of the State's strategies and seemed most practical particularly in view of its low cost of implementation. Furthermore, implementation of the strategy to account for a significant VMT reduction might not be necessary. The required VMT reduction may be achieved by the State through other means such as mass improvements. The relative ease of implementation of gas limitation compared to many other strategies makes it attractive in a situation such as Colorado's where there is a significant chance that it may not have to be implemented. Eight of the alternative strategies would probably require more cost and capital expenditure prior to implementation than gas limitation and similarly would require more lead time.

A system for the limitation of auto use by means of colored license plates or stickers is one alternative to the limitation of gasoline. In such a system, the vehicle population would be divided randomly into five groups. Each group would be assigned a colored sticker or license plate. One working day each week one color group would be excluded from the Denver core area. Such a limitation would lessen congestion in the downtown area, and serve to encourage carpooling, bicycle utilization and the use of transit. In other areas where such a system has been proposed by EPA, however, the period of operation of the system has been limited to that part of the annual season when air quality is worse. If instituted in Denver, preliminary indications reflect that poor air quality is somewhat less seasonal than in other cities. Accordingly, the license plate or sticker system could be required throughout the year.

The second alternative to gasoline limitation involves the use of catalytic converter retrofit. This retrofit package is applicable to controlled (post 67) cars, and is estimated to have a cost of $100 to $200. Reductions which can be achieved through this retrofit are substantial, but longer lead times for the development of the program would require institution of other control measures prior to the retrofit. One of the primary reasons for the initial rejection of this approach is that there is considerable uncertainty surrounding the effectiveness of a catalyst in a high altitude environment. Current indications are that the catalysts would be available in sufficient quantity by the necessary time to allow retrofitting the affected vehicle population in the Metropolitan Denver Region. Comments are particularly solicited from the public regarding the desirability of gasoline sales limitations versus the alternatives of auto use limitation by stickers or license plate and the catalytic retrofit.

As shown in Table I, the proposed EPA regulations, together with the strategies proposed by the State of Colorado in their Transportation Control Plan, ensure attainment of the National Ambient Air Quality Standards for carbon monoxide and photochemical oxidants (hydrocarbons) by May 31, 1977. If the reductions for the hardware devices, as determined by actual investigation, are found to be less than those claimed by the State of Colorado, a plan revision will be necessary to implement strategies to compensate for the loss.

The three strategies proposed by the Governor of Colorado in the submission of supplemental information are de-

V 38-148 AUG 2 73 XUM

signed to reduce vehicle miles of travel in the Region. These proposals are similar to those that have been proposed by EPA in other areas.

Economic and Social Impact of the Transportation Control Plan

Congress recognized that the achievement of the goals of the Clean Air Act would have a significant impact on many urban areas A thorough quantitative assessment of the impact of the plan on the economic and social fabric of the community has not been possible due to the lack of time and the innate complexity of the issues. In the judgment of the Administrator, the following impact may occur. First, vehicle owners may have to assume the direct cost of emission abatement equipment required to bring their vehicle into compliance. Second, reduction in the mobility of workers and consumers could have some impact on the economic fabric of the community. Third, interferences with the ability of citizens to move as freely as before may slightly alter the life style of the region. Obviously, the severity of the impact depends on the degree of vehicle use restriction, the manner in which direct costs of abatement equipment is financed, and the degree to which the effects can be ameliorated by improvement of the transit system.

TABLE I

COMPILATION OF CONTROL STRATEGY EFFECTS ON CARBON MONOXIDE AND HYDROCARBON EMISSIONS

Control Strategy	Emission Reduction in Addition to the Federal Motor Vehicle Control Program (FMVCP)							
	Carbon Monoxide Tons Per Year				Hydrocarbons Tons Per Year			
	1974	1975	1976	1977	1974	1975	1976	1977
State Strategies								
1. Inspection-Maintenance			1,342	1,350			1,512	1,812
2. Air Bleed (Pre-1968)			3,217	2,306			756	670
3. High Altitude Modification (1968-1971)			8,521	8,907			2,159	3,071
4. VMT Reductions								
a. bus/car pool lanes								
b. parking lot construction limitation		3,301	1,766	1,765		1,729	1,221	969
c. limitation of construct parking								
d. gasoline limitation								
EPA Proposal								
5. Stationary Hydrocarbon control						10,339	10,339	10,339
6. Gasoline limitation		826	589	646		132	108	462
Uncontrolled Emissions (includes FMVCP)	51,106	16,183	42,513	37,105	13,307	38,219	35,903	33,445
Total Reduction from strategies		1,130	18,138	17,401		12,500	16,698	17,353
Remaining Emissions	51,106	12,353	21,075	19,911	13,307	25,719	19,205	16,092
Allowable Emissions	19,802	19,802	19,802	19,802	17,378	17,378	17,378	17,378

Any direct or indirect effects of the plan on the economy of the area are primarily dependent on the extent of the necessary reduction in VMT. Since the degree of restriction is relatively small, it is expected that the principal effects will be more a matter of social adjustment than of serious economic consequences.

EPA Efforts to Mitigate the Effects of Proposed Regulations

Together with the Colorado Implementation Plan, the effect of these proposed regulations will eliminate the air pollution danger to human health and welfare that exists in the Metropolitan Denver Region. They may, however, have adverse economic and social impacts, and the Administrator will make every effort possible to mitigate the effects of his final promulgation. He will be in contact with the Department of Transportation and with other departments as necessary. The Administrator of EPA will request that the departments and agencies give special attention to the need for funding adequate mass transit to replace the automobile travel eliminated by any promulgated control measures.

Public Comments Solicited

The Administrator intends that the finally adopted plans be as responsive as possible to the needs of the Metropolitan Denver Region. He therefore desires to obtain the comments and suggestions of the public on the problems of achieving the Ambient Air Quality Standards. Comments are particularly invited pertaining to other measures that may be taken by Federal, State or local authorities to support or supplement these measures, and pertaining to the comparative social and economic effects of alternative pollution control measures. A public hearing will be held on September 10, 1973, at 10:00 a.m., Denver Post Office Auditorium, Denver, Colorado.

The Administrator's final promulgation of transportation controls for the Metropolitan Denver Region will be influenced by the comments and testimony he receives, as well as by the supplemental information which has been submitted by the State of Colorado, and by any further approvable strategies which are submitted by the State as part of the Colorado Implementation Plan. These influences, and the additional analysis of alternative strategies that can be made in the time between this proposal and final promulgation, may lead the Administrator to adopt final regulations that differ in important ways from this proposal.

Submittal of Comments

Interested persons may participate in this rule making by submitting written comments, preferably in triplicate, to the Regional Administrator, EPA, Region VIII, Suite 900, 1860 Lincoln Street, Denver, Colorado 80203. All relevant comments received on or before September 4, 1973 will be considered. Comments on the supplemental information submitted by the State will also be accepted during the same time period. Receipt of comments will be acknowledged, but substantive responses to individual comments will not be provided. Comments received will be available for public inspection during normal business hours at the EPA Region VIII Office and at the Freedom of Information Center, EPA, 401 M Street, SW., Washington, D.C. 20460. The changes proposed by this notice with appropriate modification will be effective as noted. This notice of proposed rule making is issued under the authority of section 110(c) and 301(a) of the Clean Air Act.

(42 U.S.C. 1857c et seq.)

Dated: July 24, 1973.

ROBERT W. FRI,
Acting Administrator.

It is proposed to amend Part 52 of Chapter I, Title 40, of the Code of Federal Regulations as follows:

Subpart G—Colorado

1. Subpart G is amended by adding §§ 52.329 through 52.338 as follows:

§ 52.329 Gasoline limitations.

(a) Definitions:

(1) "Base year" means the consecutive 12-month period commencing on July 1, 1972, and ending June 30, 1973.

(2) "Distributor" means any corporation, partnership, or sole proprietorship which transports or stores or causes the transportation or storage of gasoline between any refinery and any retail outlet.

(3) "Retail outlet" means any establishment at which gasoline is sold or offered for sale to the public, or introduced into any vehicle.

(b) This section is applicable within the Metropolitan Denver Intrastate Air Quality Control Region (hereafter referred to as the Region) to all distributors of gasoline, to any retail outlet in this area, and to the owners or operators of all retail outlets in this area.

(c) Beginning July 1, 1974, the State of Colorado shall implement regulations limiting the total gallonage of gasoline delivered to retail outlets in the Region to the amount delivered to such outlets during the base year.

(d) Beginning May 31, 1977, the State of Colorado shall implement regulations limiting the total gallonage of gasoline delivered to retail outlets to that amount which, when combusted, will not result in the ambient air quality standard being exceeded. The State shall by January 1, 1977, submit to the Administrator regulations to accomplish this limitation. The amount of limitation required shall also be specified.

(e) In order for the State to determine the amount of gasoline delivered during the base year and years during which control is in effect, all distributors to which this section applies shall provide the State with a detailed accounting of

the amount of gasoline delivered to each retail outlet in the Region during the base year and years during which control is in effect. For each year during which control is in effect, the owner or operator of each retail outlet to which this section applies shall provide the State with a detailed accounting of gasoline received from each distributor, the total amount of gasoline sold during the year, and the amount of gasoline on hand at the beginning and end of the year. The State may require any other reports as it may deem necessary for the implementation of this section.

(f) The State of Colorado shall submit no later than November 1, 1973, a detailed compliance schedule showing steps it will take to establish and enforce the limitation program specified in paragraphs (c) and (d) of this section including:

(1) The text of needed statutory proposals and needed regulations which it will propose for adoption.

(2) A date by which the State shall adopt procedures to ensure that no more than the amount of gasoline specified in paragraph (c) of this section is delivered to retail outlets in the Region. Such date shall be no later than March 30, 1974.

(3) A date by which the State shall determine the total gallonage deliverable to limit the vehicle miles traveled in the Region by light duty gasoline fueled vehicles to that amount specified in paragraph (d) of this section. Such date shall be no later than March 1, 1977.

(4) A date by which any report necessary for establishing such procedures will be furnished to the State by the distributors. Such date shall be no later than January 1, 1974.

(5) Designation of an agency responsible for implementation and monitoring of this program.

(g) Failure to comply with any provision of this section shall render the person or governmental entity so failing to comply in violation of a requirement of an applicable implementation plan and subject to enforcement under section 113 of the Clean Air Act. With regard to compliance schedules, a State will be considered to have failed to comply with the requirements of this section if it fails to timely submit any required compliance schedule, or if the compliance schedule when submitted does not contain in satisfactory form each of the elements it is required to contain.

§ 52.330 Control of dry cleaning solvent evaporation.

(a) "Drycleaning operation" means that process by which an organic solvent, as defined in § 52.332(k), is used in the commercial cleaning of garments and other fabric material.

(b) This section is applicable in the Metropolitan Denver Intrastate Air Quality Control Region.

(c) No person shall operate a drycleaning operation unless the uncontrolled organic emissions from such operation have been reduced at least 85 percent except that drycleaning operations emitting less than 3 pounds per hour and less than 15 pounds per day of uncontrolled organic materials are exempt from the requirements of this section.

(d) If incineration is used as a control technique, 90 percent or more of the carbon in the organic compounds being incinerated must be oxidized to carbon dioxide. Compliance with this requirement shall be in accordance with the provisions of § 52.338.

(e) Any owner or operator of a stationary source subject to this section shall achieve compliance with the requirements of paragraph (c) of this section by discontinuing the use of photochemically reactive solvents as defined by § 52.332(l) no later than January 31, 1974, or by controlling emissions in accordance with the requirements of § 52.338.

§ 52.331 Degreasing Operations.

(a) "Degreasing" means the operation of using an organic solvent as a surface cleaning agent prior to fabricating, surface coating, electroplating, or any other process.

(b) This section is applicable in the Metropolitan Denver Intrastate Air Quality Control Region.

(c) No person shall use for degreasing any organic solvent other than perchloroethylene or saturated halogenated hydrocarbons after January 31, 1974.

§ 52.332 Organic solvent usage.

(a) This section is applicable in the Metropolitan Denver Intrastate Air Quality Control Region. Compliance with the requirements of paragraphs (b) through (i) of this section shall be in accordance with the provisions of § 52.338.

(b) A person shall not discharge more than 15 pounds of organic materials into the atmosphere in any one day from any article, machine, equipment or other contrivance in which any organic solvent or any material containing organic solvent comes into contact with flame or is baked, heat-cured or heat polymerized, in the presence of oxygen, unless all organic materials discharged from such article, machine, equipment or other contrivance have been reduced either by at least 85 percent overall or to not more than 15 pounds in any one day.

(c) A person shall not discharge more than 40 pounds of organic material into the atmosphere in any one day from any article, machine, equipment or other contrivance used under conditions other than described in paragraph (b) of this section for employing, applying, evaporating or drying any photochemically reactive solvent, as defined in paragraph (l) of this section, or material containing such solvent, unless all organic materials discharged from such article, machine, equipment or other contrivance have been reduced either by at least 85 percent overall or to not more than 40 pounds in any one day.

(d) Any series of articles, machines, equipment or other contrivances designed for processing a continuously moving sheet, web, strip or wire which is subjected to any combination of operations described in paragraphs (b) or (c) of this section involving any photochemically reactive solvent, as defined in paragraph (l) of this section, or material containing such solvent, shall be subject to compliance with paragraph (c) of this section. Where only non-photochemically reactive solvents or material containing only non-photochemically reactive solvents are employed or applied, and where any portion or portions of said series of articles, machines, equipment or other contrivances involves operations described in paragraph (b) of this section, said portions shall be collectively subject to compliance with paragraph (b) of this section.

(e) Emissions of organic materials to the atmosphere from the cleanup with photochemically reactive solvent, as defined in paragraph (l) of this section, of any article, machine, equipment or other contrivance described in paragraphs (b), (c) or (d) of this section shall be included with the other emissions of organic materials from that article, machine, equipment or other contrivance for determining compliance with this section.

(f) Emissions of organic materials to the atmosphere as a result of spontaneously continuing drying of products for the first 12 hours after their removal from any article, machine, equipment or other contrivance described in paragraphs (b), (c), or (d) of this section shall be included with other emissions of organic materials from that article, machine, equipment or other contrivance for determining compliance with this section.

(g) Emissions of organic materials into the atmosphere required to be controlled by paragraphs (b), (c), or (d) of this section shall be reduced by:

(1) Incineration: *Provided*, That 90 percent or more of the carbon in the organic material being incinerated is oxidized to carbon dioxide, or

(2) Adsorption, or

(3) Processing in a manner determined by the Administrator to be not less effective than the methods described in paragraphs (g) (1) or (2) of this section.

(h) A person incinerating, adsorbing, or otherwise processing organic materials pursuant to this section shall provide, properly install and maintain in calibration, in good working order and in operation, devices as specified in the authority to construct or the permit to operate, or as specified by the Administrator, for indicating temperatures, pressures, rates of flow or other operating conditions necessary to determine the degree and effectiveness of air pollution control.

(i) Any person using organic solvents or any materials containing organic solvents shall supply the Administrator, upon request and in the manner and form prescribed by him, written evidence of the chemical composition, physical properties and amount consumed for each organic solvent used.

(j) The provisions of this section shall not apply to:

(1) The manufacture of organic solvents, or the transport or storage of or-

V 38-148 AUG 2 73 XUM

ganic solvents or materials containing organic solvents.

(2) The spraying or other employment of insecticides, pesticides or herbicides.

(3) The employment, application, evaporation or drying of saturated halogenated hydrocarbons or perchloroethylene.

(4) The use of any material, in any article, machine, equipment or other contrivance described in paragraphs (b), (c), (d), or (e) of this section, if:

(i) The volatile content of such material consists only of water and organic solvents, and

(ii) The organic solvents comprise not more than 20 percent by volume of said volatile content, and

(iii) The volatile content is not photochemically reactive as defined in paragraph (l) of this section, and

(iv) The organic solvent or any material containing organic solvent does not come into contact with flame.

(5) The use of any material, in any article, machine, equipment or other contrivance described in paragraphs (b), (c), (d), or (e) of this section, if:

(i) The organic solvent content of such material does not exceed 20 percent by volume of said material, and

(ii) The volatile content is not photochemically reactive as defined in paragraph (l) of this section, and

(iii) More than 50 percent by volume of such volatile material is evaporated before entering a chamber heated above ambient application temperature, and

(iv) The organic solvent or any material containing organic solvent does not come into contact with flame.

(6) The use of any material, in any article, machine, equipment or other contrivance described in paragraphs (b), (c), (d), or (e) of this section, if:

(i) The organic solvent content of such material does not exceed 5 percent by volume of said material, and

(ii) The volatile content is not photochemically reactive as defined in paragraph (l) of this section, and

(iii) The organic solvent or any material containing organic solvent does not come into contact with flame.

(k) For the purposes of this section, organic solvents include diluents and thinners and are defined as organic materials which are liquids at standard conditions and which are used as dissolvers, viscosity reducers or cleaning agents.

(l) For the purpose of this section, a photochemically reactive solvent is any solvent with an aggregate or more than 20 percent of its total volume composed of the chemical compounds classified below or which exceeds any of the following individual percentage composition limitations, referred to the total volume of solvent:

(1) A combination of hydrocarbons, alcohols, aldehydes, esters, ethers or ketones having an olefinic or cyclo-olefinic type of unsaturation: 5 percent;

(2) A combination of aromatic compounds with eight or more carbon atoms to the molecule except ethylbenzene: 8 percent;

(3) A combination of ethylbenzene, ketones having branched hydrocarbon structures, trichloroethylene or toluene: 20 percent.

(m) Whenever any organic solvent or any constituent of an organic solvent may be classified from its chemical structure into more than one of the above groups of organic compounds, it shall be considered as a member of the most reactive chemical group, that is, that group having the least allowable percent of the total volume of solvents.

(n) For the purpose of this section, organic materials are defined as chemical compounds of carbon excluding carbon monoxide, carbon dioxide, carbonic acid, metallic carbides, metallic carbonates and ammonium carbonate.

(o) This section shall be effective on the date of its adoption as to any article, machine, equipment or other contrivance not then completed and put into service. As to all other articles, machines, equipment or other contrivances, this section shall be effective in accordance with § 52.338.

§ 52.333 Storage of petroleum products.

(a) This section is applicable in the Metropolitan Denver Intrastate Air Quality Control Region. Compliance with the requirements of paragraph (b) of this section shall be in accordance with the provisions of § 52.338.

(b) A person shall not place, store or hold in any stationary tank, reservoir or other container of more than 40,000 gallons capacity any gasoline or any petroleum distillate having a vapor pressure of 1.5 pounds per square inch absolute (psia) or greater under actual storage conditions, unless such tank, reservoir or other container is a pressure tank maintaining working pressures sufficient at all times to prevent hydrocarbon vapor or gas loss to the atmosphere, or is designed and equipped with one of the following vapor loss control devices, properly installed, in good working order and in operation:

(1) A floating roof, consisting of a pontoon type or double deck type roof, resting on the surface of the liquid contents and equipped with a closure seal, or seals, to close the space between the roof edge and tank wall. The control equipment provided for in this paragraph shall not be used if the gasoline or petroleum distillate has a vapor pressure of 11.0 pounds per square inch absolute or greater under actual storage conditions. All tank gauging and sampling devices shall be gas-tight except when gauging or sampling is taking place.

(2) A vapor recovery system, consisting of a vapor gathering system capable of collecting the hydrocarbon vapors and gases discharged and a vapor disposal system capable of processing such hydrocarbon vapors and gases so as to prevent their emission to the atmosphere and with all tank gauging and sampling devices gas-tight, except when gauging or sampling is taking place.

(3) Other equipment of equal efficiency, provided such equipment is approved by the Administrator.

§ 52.334 Organic liquid loading.

(a) This section is applicable in the Metropolitan Denver Intrastate Air Quality Control Region. Compliance with the requirements of paragraphs (b) through (d) of this section shall be in accordance with the provisions of § 52.338.

(b) No person shall load organic liquids having a vapor pressure of 1.5 psia or greater under actual loading conditions into any tank truck, trailer, or railroad tank car from any loading facility unless the loading facility is equipped with a vapor collection and disposal system or its equivalent approved by the Administrator.

(c) Loading shall be accomplished in such a manner that all displaced vapor and air will be vented only to the vapor collection system. Measures shall be taken to prevent liquid drainage from the loading device when it is not in use or to accomplish complete drainage before the loading device is disconnected.

(d) The vapor disposal portion of the vapor collection and disposal system shall consist of one of the following:

(1) An absorber system or condensation system which processes all vapors and recovers at least 90 percent by weight of the organic vapors and gases from the equipment being controlled.

(2) A vapor handling system which directs all vapors to a fuel gas system.

(3) Other equipment of an efficiency equal to or greater than subparagraph (1) or (2) of this paragraph if proved by the Administrator.

(e) This section shall apply only to the loading of organic liquids having a vapor pressure of 1.5 psia or greater under actual loading conditions at a facility from which at least 20,000 gallons of such organic liquids are loaded in any one day.

(f) "Loading facility" means any aggregation or combination of organic liquid loading equipment which is both possessed by one person, and located so that all the organic liquid loading outlets for such aggregation or combination of loading equipment can be encompassed within any circle of 300 feet in diameter.

§ 52.335 Gasoline transfer vapor control.

(a) "Gasoline" means any petroleum distillate having a Reid vapor pressure of 4 pounds or greater.

(b) This section is applicable in the Metropolitan Denver Intrastate Air Quality Control Region.

(c) No person shall transfer gasoline from any delivery vessel into any stationary storage container with a capacity greater than 250 gallons unless such container is equipped with a submerged fill pipe and unless the displaced vapors from the storage container are processed by a system that prevents release to the atmosphere of no less than 95 percent by weight of organic compounds in the said vapors displaced from the stationary container location.

(1) The vapor recovery portion of the system shall include one or more of the following:

(i) A vapor-tight vapor return line from the storage container to the delivery vessel and a device that will ensure that the vapor return line is connected

before gasoline can be transferred into the container.

(ii) Refrigeration-condensation system or equivalent designed to recover no less than 95 percent by weight of the organic compounds in the displaced vapor.

(2) The vapor-laden delivery vessel shall be subject to the following conditions:

(i) The delivery vessel must be so designed and maintained as to be vapor-tight at all times.

(ii) The vapor-laden delivery vessel may be refilled only at facilities equipped with a vapor recovery system or the equivalent, which can recover at least 90 percent by weight of the organic compounds in the vapors displaced from the delivery vessel during refilling.

(d) The provisions of paragraph (c) of this section shall not apply to the following:

(1) Stationary containers having a capacity of less than 550 gallons used exclusively for agricultural operations, provided, however, said containers are equipped with submerged fill pipes.

(2) Any container having a capacity of less than 2,000 gallons installed prior to promulgation of this section.

(3) Transfer made to storage tanks equipped with floating roofs or their equivalent.

(e) Compliance with this section shall be in accordance with the provisions of § 52.338.

§ 52.336 Control of evaporative losses from the filling of vehicular tanks.

(a) "Gasoline" means any petroleum distillate having a Reid vapor pressure of 4 pounds or greater.

(b) This section is applicable in the Metropolitan Denver Intrastate Air Quality Control Region.

(c) No person shall transfer gasoline to an automotive fuel tank from gasoline dispensing systems unless the transfer is made through a fill nozzle designed to:

(1) Effect a vapor-tight fit between the fill nozzle and filler neck of the automotive fuel tank so as to prevent discharge of hydrocarbon vapors to the atmosphere.

(2) Direct vapor displaced from the automotive fuel tank to a system wherein at least 95 percent by weight of the organic compounds in the displaced vapors are recovered.

(3) Prevent automotive fuel tank overfills or spillage on fill nozzzle disconnect.

(d) The system referred to in paragraph (c) of this section can consist of a vapor-tight vapor return line from the fill nozzle-filler neck interface to the dispensing tank or to an adsorption, absorption, incineration, or refrigeration-condensation system or equivalent.

(e) Components of the systems required by § 52.335(c) can be used for compliance with paragraph (c) of this section.

(f) If demonstrated to the satisfaction of the Administrator that it is impractical to comply with the provisions of paragraph (c) of this section as a result of fill neck configuration, location, or other design features, the provisions of this paragraph shall not apply to tanks on vehicles existing at the time of promulgation of this regulation.

(g) Compliance with this section shall be as follows:

(1) Contracts for emission control systems or process modifications must be awarded or orders must be issued for the purchase of component parts to accomplish emission control or process modification not later than March 31, 1975.

(2) Initiation of on-side construction or installation of emission control equipment or process change must begin not later than July 31, 1975.

(3) On-site construction or installation of emission control equipment or process modification must be completed not later than March 31, 1976.

(4) Final compliance is to be achieved not later than May 31, 1976.

(5) Any owner or operator of stationary sources subject to the compliance schedule in this paragraph shall certify to the Administrator, within 5 days after the deadline for each increment of progress, whether or not the required increment of progress has been met.

(h) Paragraph (g) of this section shall not apply:

(1) To a source which is presently in compliance with paragraph (c) of this section and which has certified such compliance to the Administrator by September 15, 1973. The Administrator may request whatever information he considers necessary for proper certification.

(2) To a source for which a compliance schedule is adopted by the State and approved by the Administrator.

(3) To a source whose owner or operator submits to the Administrator, by September 15, 1973, a proposed alternative schedule. No such schedule may provide for compliance after May 31, 1976. If promulgated by the Administrator, such schedule shall satisfy the requirements of this paragraph for the affected source.

(i) Nothing in this section shall preclude the Administrator from promulgating a separate schedule for any source to which the application of the compliance schedule in paragraph (g) of this section fails to satisfy the requirements of § 51.15(b) and (c) of this chapter.

§ 52.337 Paint and varnish manufacturing.

(a) This section is applicable in the Metropolitan Denver Intrastate Air Quality Control Region. Except as provided in paragraph (b)(1) of this section, compliance with paragraphs (b) and (c) of this section shall be in accordance with the provision of § 52.338.

(b) All persons engaged in the manufacturing of paints shall fulfill one of the following requirements:

(1) Reformulate paint to replace a photochemically reactive (§ 52.332(l)) solvent with a non-photochemically reactive solvent by January 31, 1974.

(2) Produce water-base coatings.

(3) Condense and absorb by scrubbing with alkali or acid washes.

(4) Scrub and adsorb by activated charcoal or other adsorbants.

(5) Combust organic emissions.

(c) Any manufacturer engaged in the production of varnish shall not engage in such activity unless the manufacturer fulfills the following requirements:

(1) Remove copal vapors through installation of a condensation unit which has been approved by the Administrator.

(2) Remove varnish vapors through installation of a combustion unit which has been approved by the Administrator.

§ 52.338 Federal compliance schedules.

(a) Except as provided in paragraph (c) of this section, the owner or operator of any stationary source subject to the requirements of §§ 52.330, 52.332, 52.333, 52.334, 52.335, and 52.337 shall comply with the compliance schedule in paragraph (b) of this section.

(b) Compliance Schedule:

(1) September 17, 1973—Submit to the Administrator a final control plan, which describes at a minimum the steps which will be taken by the source to achieve compliance with the regulations cited in paragraph (a) of this section.

(2) November 16, 1973—Negotiate and sign all necessary contracts for emission control systems or process modifications, or issue orders for the purchase of component parts to accomplish emission control or process modification.

(3) April 1, 1974—Initiate on-site construction or installation of emission control equipment or process modification.

(4) April 1, 1975—Complete on-site construction or installation of emission control equipment or process modification.

(5) May 31, 1975—Final compliance with the regulations cited in paragraph (a) of this section.

(6) Any owner or operator of stationary sources subject to the compliance schedule in this paragraph shall certify to the Administrator, within 5 days after the deadline for each increment of progress, whether or not the required increment of progress has been met.

(c) Paragraph (b) of this section shall not apply:

(1) To a source which is presently in compliance with the regulations cited in paragraph (a) of this section and which has certified such compliance to the Administrator by September 15, 1973. The Administrator may request whatever supporting information he considers necessary for proper certification.

(2) To a source for which a compliance schedule is adopted by the State and approved by the Administrator.

(3) To a source whose owner or operator submits to the Administrator, by September 15, 1973, a proposed alternative schedule. No such schedule may provide for compliance after May 31, 1975. If promulgated by the Administrator such schedule shall satisfy the requirements of this paragraph for the affected source.

(d) Nothing in this paragraph shall preclude the Administrator from promulgating a separate schedule for any source to which the application of the compliance schedule in paragraph (b) of this section fails to satisfy the requirements of § 51.15 (b) and (c) of this chapter.

V 38-148 AUG 2 73 XUM

[40 CFR Part 52]

DISTRICT OF COLUMBIA; APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

Notice of Proposed Rule Making

The transportation control plan submitted by the District of Columbia for attainment of the primary National ambient air quality standards for carbon monoxide (CO) and photochemical oxidants for the District of Columbia portion of the National Capital Interstate Region was disapproved in part on June 15, 1973 (38 FR 16556). This Notice of Proposed Rulemaking sets forth regulations which in the Administrator's judgment could be implemented in addition to the approvable portions of the District of Columbia plan to attain and maintain the National standards for carbon monoxide and photochemical oxidants in the District of Columbia portion of the National Capital Interstate Region.

If revisions to the District plan are submitted and determined to be approvable prior to Federal promulgation, these proposed regulations will be withdrawn. If revisions to the District plan are submitted and determined to be approvable after Federal promulgation, then those Federal regulations will be rescinded. It is the desire of the Environmental Protection Agency that the plan to attain and maintain the carbon monoxide and photochemical oxidant standards in the District of Columbia portion of the National Capital Interstate Region be a Regional plan carried out by the District or its designated representative.

Transportation Control Alternatives

Analysis of the air quality problems in the National Capital Interstate Region, of which the District of Columbia is a part, reveals that both photochemical oxidants and carbon monoxide exhibit unacceptably high levels in the region, with the former being the pacing pollutant.

Since a substantial proportion of the photochemical oxidant problem and almost all of the carbon monoxide problem are the result of automotive vehicle emissions, measures to reduce emissions from individual vehicles and measures to reduce vehicular travel can be effective in improving air quality. Since a significant percentage of the oxidant-producing hydrocarbon emissions stem from the vehicle-related sources associated with gasoline handling operations, measures to reduce these operational losses can also provide a measurable improvement in the regional air quality.

Reductions in emissions from vehicles can be obtained through inspection and maintenance programs, and from incorporation of various retrofit devices. Reductions in Vehicle Miles Traveled (VMT) can be achieved through various pricing and taxing schemes for road use, adoption of parking restrictions, and/or limitations of available number of parking spaces, restrictions on idling or cruising of fleet vehicles, selective control of goods movement, the establishment of vehicle-free zones, establishment of a four-day week, and programs promoting the use of carpools or alternative modes of transportation and limitations on gasoline usage. It must be emphasized that, in order to be effective, each VMT control measure proposed or adopted by the District of Columbia must be reflected by identical or equivalent measures in the neighboring jurisdictions of Maryland and Virginia for their portions of the National Capital Interstate Region.

In effecting substantial improvements in air quality, improvements in and expansion of public transportation facilities are a necessary and effective complement facilitating use of this alternative to the private automobile. Clearly, public transit improvements must be implemented in concert with the appropriate level of vehicle restraints, as determined by the regional characteristics of the private automobile use demand elasticity. Such improvements as greater coverage, increased frequency of service, improved reliability, increased comfort and convenience, a reasonable cost, and adequate personal security will further encourage the use of public transit alternatives to the private automobile.

Summary

The District of Columbia plan, as amended by the July 9, 1973 and July 16, 1973 submissions, in its demonstration of the attainment of the photochemical oxidant and carbon monoxide air quality standards, utilizes the following general measures: the Federal Motor Vehicle Control Program, a Motor Vehicle Inspection Program for all gasoline powered vehicles, improvements in public transportation, increased "terminal" (or parking) charges, a bus/car pool locator program, selective control of goods movement, restrictions on aircraft ground operations, and increased control of stationary source emissions.

According to the District of Columbia plan, which utilizes data compiled by the Metropolitan Washington Council of Governments for the entire National Capital Interstate Region, peak period hydrocarbon emissions were 63.3 tons for the Region as a whole and peak period carbon monoxide emissions were 1133.5 tons in 1972. In order to demonstrate attainment of standards, the Council of Government calculations indicate that hydrocarbon emissions must be reduced by 67 percent of the 1972 emissions in the National Capital Interstate Region to a level of 20.9 tons/peak period, and that carbon monoxide emissions must be reduced by 55.6 percent of the 1972 emissions in the Region to a level of 501 tons/peak period.

Including projected increases in vehicle miles of travel the Federal Motor Vehicle Control Program will reduce hydrocarbon peak period emissions by 47 percent to 33.6 tons and will reduce carbon monoxide emissions by 49 percent to 576 tons/peak period by 1977. These estimates are adjusted to reflect the 1975 interim motor vehicle emission standards as announced on April 11, 1973.

Since the 21-day period for public comment on the additional submissions has not been completed, it is impossible for the Administrator to make a final decision on approval or disapproval of the strategies included in the District of Columbia plan at this time. This decision must take into consideration all comments received during this time. However, preliminary review by EPA indicates that certain strategies are likely to be approvable. Accordingly, the Agency is proposing only those items which, when added to the approvable measures, are necessary to attain the National Ambient Air Quality Standards.

If an apparently approvable strategy is determined not to be approvable additional measures will be proposed.

The information contained in the additional submissions by the District appears to remedy many of the deficiencies on which the Administrator's June 15 decision was based.

The following is a summary of the actions EPA is proposing to take with respect to the District of Columbia Plan:

Federal Motor Vehicle Control Program—Reductions appear to be approvable, based on projected vehicle populations and emission factors.

Motor Vehicle Inspection Program—Appears to be approvable based upon proposed regulation and supporting data.

Improvements in Public Transit—(a) District participation in the area wide addition of 750 buses to current fleet—appears to be approvable, contingent upon clarification of certain administrative details.

(b) Exclusive Bus Lanes—appears to be approvable.

(c) System Improvements (i.e., shelters, fringe parking, improved scheduling)—appears to be approvable.

Increased Terminal Charges—(a) Elimination of free employee parking for District of Columbia Government employees and private employees in certain areas—appears to be approvable.

(b) Elimination of on-street long-term parking in certain areas—appears to be approvable.

(c) $2.00 parking surcharge (or an equivalent measure)—appears to be approvable.

Bus/Carpool Locator Program—Appears to be approvable.

Selective control of goods movement (heavy duty gasoline powered vehicle use ban 6:00–9:30 a.m. and 4:00–6:30 p.m.)—Appears to be approvable.

Restrictions on aircraft ground operations—Partial reductions are allowable; appears to be partially approvable.

Increased Control of Stationary Source Emissions—Not approvable at this time due to lack of adopted regulations.

Since full reductions claimed for aircraft emissions do not appear to be allowable, and the controls over stationary sources cannot be approved at this time, EPA is proposing the following measures:

Retrofit by 1975 of all pre-1968 vehicles with a vacuum spark advance disconnect kit.

Retrofit of light-duty 1971–1975 fleet vehicles (including federal government vehicles) and taxicabs and certain 1975 model light-duty vehicles with an oxidizing catalyst retrofit—beginning in mid-1976 to be completed by mid-1977.

Further controls over emissions of hydrocarbons due to gasoline handling; both from delivery truck to underground tank, and from the pump to the vehicle. Implementation begins in 1974 and is fully completed by 1977.

Further controls over drycleaning operations beginning in 1974.

The District plan also indicated that the elimination of free Federal employee parking was essential to the success of their transportation control strategy. It further encouraged the Federal Government to take direct action to implement this portion of the strategy.

Accordingly, EPA is also proposing to institute commercial type parking rates or reduce by 12 percent the available spaces at any federal facility which is in a high density employment area and which is well serviced by public transit. The commercial rates would go into effect January 1, 1975, and the reduction would be phased, beginning November 30, 1974 and ending on May 31, 1975.

Finally, since the $2.00 surcharge proposed by the District is integral to the success of this plan, EPA is proposing contingency strategies to be implemented if appropriate steps are not taken to implement the surcharge. These contingency measures are:

A ban on the construction, modification or enlargement of any parking facility without having first obtained a permit from the Administrator.

A phased 15 percent reduction in the number of off-street parking spaces.

The Administrator invites comments on these and any other measures which may be used to achieve the national ambient air quality standards for photochemical oxidants and carbon monoxide.

Two-Year Extension to Achieve Standards

The Administrator proposes to give a two-year extension for the attainment of the standard in the District of Columbia. To attain the standards in 1975 would require stringent restraints on vehicle miles traveled which could not be considered to be "reasonably available" within the meaning of section 110(e) of the Clean Air Act, or the implementation of a widespread catalytic retrofit program which could not be implemented due to technological problems before 1977. Although some measures have not been proposed here which have appeared in some other proposals, such as gasoline limitations and a selective vehicle exclusion program involving colored tags, the reduction in vehicle miles traveled expected from measures contained herein appears to be substantial and adequate to fulfill the requirement that reasonably available alternative measures be employed before an extension is given for any strategy. The plan proposed herein, along with the apparently approvable measures submitted by the District of Columbia, apply the reasonably available alternative means of control at the earliest possible dates. Comment is invited on any measures which have not been considered and applied and which can be considered to be reasonably available.

Summary of Effects

The following table is a summary of the effect of the proposed strategies on the total reductions required.

Compilation of Control Strategy Effects for the National Capital Interstate Region on May 31, 1977

	Carbon Monoxide		Hydrocarbons	
	Tons per Peak Period	Percent of Total Reduction Required	Tons per Peak Period	Percent of Total Reduction Required
Stationary Source Emissions Without Control Strategy	78		11.3	
Expected Reductions From:				
(a) Dry Cleaning Vapor Recovery	0	0	1.1	8.7
(b) Gasoline Handling Vapor Recovery	0	0	5.0	39.4
(c) Other Stationary Source Rule Strengthening	0	0	0	
Stationary Source Emissions Remaining	78		8.2	
Mobile Emissions from Highway Light and Heavy Duty Vehicles without Control Strategy	498		19.3	
Expected Reductions From:				
(a) Inspection and Maintenance	26	31.6	1.5	11.8
(b) VSAD Retrofit, pre-'68 cars	3	4.0	0.4	3.2
(c) Catalytic Retrofit of Fleet LDV's	5	6.7	0.2	1.6
(d) Mass Transit Improvements	21	28	2.7	21.2
(e) HDV Peak Hour Delivery Ban	27	36	1.0	7.9
(f) Aircraft Ground Operations		12	0.8	6.4
Mobile Emissions Remaining	416		12.7	
Total Emissions without Strategy (FMVCP Included)	576		33.6	
Total Reductions	82	100.3	12.7	100.2
Total Emissions Remaining	494		20.9	

Proposed Controls on Stationary Sources

The major stationary sources of hydrocarbon emissions which have been identified in the District of Columbia's plan, are the gas handling losses which occur in the distribution system for gasoline fuel, and the emission losses from dry cleaning establishments. Since present regulations are inadequate to effect any substantial control on the resultant emissions, the District of Columbia has proposed regulations and compliance schedules which would reduce gasoline handling losses by 90 percent and dry cleaning losses by 85 percent.

The regulation proposed by the District of Columbia for control of hydrocarbon emissions through vapor recovery during service station and automobile tank refueling operations requires the installation by May 31, 1975 of a vapor collection and disposal system which is 90 percent effective, on all loading facilities for tank trucks or trailers, railroad tank cars, locomotives, aircraft, or stationary storage tanks with a capacity of more than 250 gallons; and for boat or motor vehicle fuel tank filling equipment applied to facilities with a capacity greater than five gallons. The proposed regulation further requires provision for a means to prevent liquid organic compound drainage from the loading device when it is removed from the hatch. It is estimated that installation of 90 percent effective vapor recovery devices on all installations throughout the Region will result in a total reduction of hydrocarbon emissions of 5.0 tons/peak period by 1977.

The regulation proposed by the District of Columbia for elimination of dry cleaning losses require that all dry cleaning operations emitting more than three pounds per hour or 15 pounds per day of photochemically reactive hydrocarbons shall install, prior to January 1, 1975, control devices to reduce such emissions by at least 85 percent of the uncontrolled emissions. It is estimated that the effect of the proposed 85 percent control of dry cleaning losses throughout the National Capital Interstate Region will result in a total reduction in hydrocarbon emissions of 1.1 tons per peak period.

The foregoing regulations as proposed by the District of Columbia appear to be adequate to achieve the anticipated reduction in hydrocarbon emissions. However, the Administrator cannot approve these proposed regulations at this time, since 40 CFR Part 51 requires that all regulations dealing with the control of emissions from stationary sources be adopted at the time of submittal of the plan. EPA is therefore proposing to promulgate similar regulations which will be rescinded upon submission of equivalent regulations as adopted by the District of Columbia.

The Environmental Protection Agency has also examined the District of Columbia's regulations governing emissions of organic solvents resulting from degreasing operations and from evaporation from surface and architectural coatings. For degreasing operations, there are no specific requirements that non-reactive material be used such as perchlorethylene or saturated hologenated hydrocarbons. Comments are solicited on whether degreasing operations in the National

V 38-148 AUG 2 73 XUM

Capital Interstate Region are a significant source of reactive hydrocarbon emissions for which a specific regulation should be promulgated.

Emissions of other solvents in the National Capital Interstate Region were also investigated. It has been determined that technology does exist to control more efficiently the emissions of a number of the smaller heating (15 to 200 lb. per day category) involving organic solvents.

Comments are solicited as to whether it is feasible or practicable to require additional controls on these sources, many of which are presumably located on premises of small sized firms. If these comments indicate that further controls are needed, then the Administrator proposes to promulgate regulations equivalent to those currently adopted by the County of Los Angeles Air Pollution Control District as Rule 66. L.A. Rule 66 contains minor exceptions involving evaporative emissions from gallon (or smaller) sized containers of architectural coating compounds, and from the allowable disposal limits of waste solvent materials. There are no data presently available to the Administrator on the atmospheric burden that may be created by such evaporative emissions though they are presently believed to be very small.

PROPOSED CONTROLS ON MOBILE SOURCES (NON-AIRCRAFT)

The District of Columbia, in its submissions proposes a loaded emissions inspection program in conjunction with its existing annual safety inspection program. The July 9, 1973 submission proposes a 13% reduction in hydrocarbon emissions from private and commercial vehicles. Therefore, this part of the District of Columbia plan appears to be approvable. Anticipated emissions reductions from the inspection/maintenance program as proposed throughout the National Capital Interstate Region, are 1.5 tons per peak period for hydrocarbons and 26 tons per peak period for carbon monoxide.

In order to comply with the requirements of the Clean Air Act that primary standards be achieved as expeditiously as practicable, the Administrator proposes to promulgate a regulations requiring that on or before January 1, 1975, all pre-1963 light duty vehicles be retrofitted with a vacuum spark advance disconnect device which will reduce hydrocarbon emissions from such vehicles by 25 percent and carbon monoxide emissions by 9 percent. If implemented throughout the National Capital Interstate region, installation of these devices will result in a total reduction of hydrocarbon emissions of 0.4 tons per peak period and a reduction of 3.0 tons per peak period of carbon monoxide emissions.

In order to attain the primary air quality standard by May 31, 1977 additional measures are required beyond those proposed by the District of Columbia. Since catalytic retrofit devices for light duty vehicles are expected to be readily available by 1977, it is proposed to require installation of these devices on selected segments of the light duty vehicle population. These segments include all 1971–1975 LDV fleet vehicles (e.g., taxis, GSA vehicles, rental cars, fleet delivery vehicles), capable of operating on 91 RON gasoline. The regulation proposed by the Administrator will require that the above motor vehicles be equipped with catalytic retrofit devices by May 31, 1977, effecting a 50% hydrocarbon emission reduction for each vehicle. Exemptions will be allowed for all 1975 vehicles originally equipped with the oxidizing catalytic converter or those vehicles which are certified to meet the original statutory federal emission standards for 1975. Based on information currently available to him, the Administrator estimates that:

Fleet vehicles account for 6 percent of total mobile source emissions. Under the assumptions that one-third of the fleet vehicles will be older than two years (pre-1976), and catalytic retrofits can reduce automotive emission by 50 percent, it is apparent that this measure, when applied on a Region-wide basis, will result in a hydrocarbon emission reduction of 0.2 tons/peak period.

In the event that the measures proposed herein prove to be inadequate, the Administrator is required by law to apply additional reasonably available alternatives, such as catalytic retrofit of other segments of 1968–1975 light duty vehicle population. Candidate segments include all light duty trucks, or passenger vehicles of specified model years. The public is urged to comment on these or any other type of control measure that may help to achieve the National Ambient Air Quality Standards.

PROPOSED REDUCTION IN VMT

According to computer printouts provided by the Metropolitan Washington Council of Governments, the District of Columbia's transportation package (including participation in the area wide expansion of transit by 750 buses, exclusive bus/carpool lanes, a carpool locator service, and extensive parking restrictions) will result in a 12 percent reduction in 6–9 a.m. VMT and a corresponding reduction in total trips during those hours.

The total commitment of the District of Columbia to the transportation package is demonstrated by submission of proposed regulations for the following supportive measures:

1) Participation in the area wide improved transit system, including the addition of 750 buses to the current area fleet and the establishment of exclusive bus lanes, bus shelters, and fringe parking facilities.

2) Increased terminal cost, including the elimination of free parking and the establishment of a $2.00 parking surcharge for long-term commuter parking in all areas served adequately by mass transit, and strict enforcement of reciprocal parking agreements.

3) Establishment of a computerized carpool locator service.

This portion of the plan is central to the District of Columbia's plan for reduction of HC and CO emissions. Therefore, to avoid confusion and expedite comments, a discussion of the elements that make up this portion of the plan shall be included.

a. *Elimination of Free Parking*—The District of Columbia proposes to eliminate free parking for the District of Columbia government employees, and for employees of private businesses located in the District of Columbia. A portion of this shall be achieved by the elimination of street commuter parking (in major arterials) and by requiring all District of Columbia government employees and all privately operated lots which are providing free employee parking to establish charges for this parking.

These measures will be imposed in high density employment areas which are adequately served by mass transit. These areas will be more specifically described by the District within the next 10 months, upon completion of studies of the matter.

Additionally, the District proposes to enter into a reciprocal enforcement program for parking violations. Thus, enforcement of the existing parking regulations will be facilitated.

On the basis of the information submitted by the District of Columbia in its plan, the Administrator feels that this portion of the District of Columbia's plan is approvable.

As pointed out in the District of Columbia's plan, (reduction) of emissions due to work trips into, out of and within the District by Federal Government employees is integral to achieving air quality goals. Therefore, EPA feels it has the responsibility to aid the District in the control of these emissions. As a result, EPA will follow the District's suggestion and propose a federal regulation which would effectively reduce emissions as a result of commuter trips by federal employees. This will be done by requiring Federal Facilities in high density areas served by mass transit either to eliminate free parking by establishing commercial type rates or to reduce the available parking spaces in these facilities by 12 percent. The Administrator feels that the result of this proposal will be to induce Federal employees to utilize alternate modes of transportation, such as buses and carpools and thereby reduce the VMT in the area. It should be noted that this proposal should result in a reduction of the VMT for employees from all three jurisdictions in the National Capital area.

It is the Administrator's opinion that, at a minimum the central business district (Massachusetts Avenue, 1st Street, NW.; Constitution Avenue and 23rd Street, NW.) as well as the Southwest Mall-Waterside Mall area in Southwest, the Capitol Hill area, along with other areas would, in all likelihood, need to be included in any definition of high density employment area which is serviced by mass transit for this strategy to be effective.

b. *$2.00 Surcharge.* The District of Columbia plan proposes the imposition of a $2.00 per day surcharge (or an equivalent measure) on all long-term commercial parking facilities in employment areas which are adequately served by mass transit. Identification of the areas where the surcharge is to be imposed should be made by the District of Columbia within the next 10 months, upon completion of studies of the matter.

This proposal is to be implemented and enforced by the parking agency to be established by the District. The Administrator feels that if implemented according to the schedule provided in the plan, this proposal is approvable.

The effectiveness of mass transit systems can be greatly enhanced by imposing disincentives to the use of the private automobile. It is felt the District's proposals for the surcharge is integral to the success of the plan.

The Administrator wants to make it clear that if for any reason this strategy is not implemented according to schedule, he will institute equivalent measures. In order to avoid any delay in implementation of such equivalent measures and to invite timely public comment, the Administrator is proposing contingency measures in the plan which will become effective if it becomes apparent that the surcharge will not be implemented. Specifically, a phased 15 percent reduction in existing off-street parking spaces would be imposed, as well as ban on the construction, modification or enlargement of any parking facility without first obtaining a permit from the Administrator. Public comments are solicited on these contingency proposals.

c. *Mass Transit Improvements.* The development of an effective mass transit system is essential to the development of an effective transportation control strategy. If the strategy is to be successful, a sufficient number of buses with convenient service and adequate schedules must be provided.

The District of Columbia plan proposes that the District shall take all possible measures to assure that the area wide transmit system's current fleet be increased by 750 buses and that its service and convenience for commuters be improved. Included in this proposal are provisions for installing bus shelters, providing additional public information and improved scheduling. In addition, the District plans to institute a number of exclusive bus lanes, and contra-flow lanes on major highway corridors into the downtown area. All of these measures are meant to provide the increased mass transit service which will be necessary if air quality standards are to be achieved.

Based on the information contained in the three documents submitted by the District, the Administrator feels that the proposals for increased mass transit are approvable, on the condition that certain administrative details are provided to him by the District. Specifically, the arrangements or agreements which will trigger the expansion of the fleet should be clarified, since it is necessary for EPA to determine what actions are necessary to bring about any additional purchases of buses. Also a clarification on the schedule showing the projected incremental increases in fleet size should be provided.

d. *Bus/Car Pool Locator System.* The District of Columbia plan recognizes the need for more efficient automobile usage. Thus, the plan proposes a voluntary bus/car pool locator matching service. This system will attempt to assemble lists of commuters with similar work schedules and home, work locations, and will be phased in starting with pilot projects during 1973. Full operation of the system is scheduled for April 1974. The Administrator feels that this measure is approvable and encourages residents of the National Capital area to take advantage of this service.

Along with the benefits accruing to this system in terms of a potential decrease of vehicle miles traveled, this system also will mitigate the impact of disincentives to private auto use (i.e., the surcharge and elimination of free employee parking).

e. *Heavy Duty Vehicle Restraints.* In addition to the transportation measures described above, the District of Columbia plan proposes to reduce emissions from heavy duty gasoline powered vehicles. Since a substantial portion of the peak hour emissions of both hydrocarbons 6 percent and carbon monoxide 10 percent are produced by heavy duty trucks, the District of Columbia proposes a regulation which would ban peak hour (6–9:30 a.m., 4–6:30 p.m.) deliveries by gasoline-powered heavy duty trucks. Proposed compliance dates are January 1974 for the morning hours and January 1975 for the two peak periods. Assuming that the ban will result in a 50 percent reduction in heavy duty truck emissions (due to the exception of essential services and through traffic), calculations indicate a peak-hour reduction in total hydrocarbon emissions by 1.0 ton/ peak period. The Administrator commends the District of Columbia for proposing this effective measure and feels that this measure is approvable.

AIRCRAFT EMISSION REDUCTION

Aircraft emissions, as they affect ambient air quality, occur during approach, landing, taxi, idle, takeoff, and climbout. Heaviest emissions occur during taxi and idle when aircraft engines are operated at greatly reduced power.

The District of Columbia Transportation Control Plan asserts that control of these emissions through modified ground operations at Dulles and Washington National Airports can result in a significant hydrocarbon, and carbon monoxide emission reduction in the National Capital Region. The District of Columbia contends that a 50 percent reduction in hydrocarbon and carbon monoxide emissions can be achieved though the implementation of such ground controls at the two northern Virginia airports. Such a reduction would represent a 1.7 ton reduction in the area's hydrocarbon emissions and 28 ton reduction in the area's carbon monoxide emissions. The District of Columbia assumes the required measures will be fully implemented by EPA and FAA during the next four years and takes full credit for the potential emissions reductions which they believe could result from these measures.

The assumed reduction in hydrocarbon emissions is necessary for the plan to demonstrate achievement of the oxidant standards; the claimed carbon monoxide reductions are not needed for attainment of the standard.

EPA has published an Advance Notice of Proposed Rulemaking for aircraft ground controls but has not yet proposed regulations for such controls. The Agency, however, is currently funding a demonstration project with FAA to determine if safety hazards would accompany modified ground operations. If the demonstration is successful, EPA will propose and promulgate regulations for the implementation of ground operations deemed free of safety hazards.

The Agency currently believes that certain ground and taxi operations included in the demonstration can be conservatively assumed to be safe and acceptable. EPA calculations indicate that the application of these measures could result in a 24 percent reduction in hydrocarbons at National Airport and a 30 percent reduction in hydrocarbons at Dulles Airport versus 50 percent reduction proposed by the District of Columbia. No reductions are assumed for Andrews Air Force Base, which is responsible for 15 percent of the emissions inventory. In light of EPA's intention to work jointly with FAA to promulgate and implement ground operations deemed safe and acceptable prior to 1977, the Agency believes it is reasonable to allow the District of Columbia to accept credit for emission reductions which will result from controlling the ground operations conservatively felt at this time to be safe and acceptable. The percent emissions reductions indicated above which would result from these measures would provide approximately a 0.8 tons reduction in hydrocarbons for the National Capital Region. Accordingly, the Agency will accept 0.8 tons of the claimed 1.7 tons hydrocarbon reduction as being an approvable portion of the plan based on the expected implementation of ground operation regulations.

ECONOMIC AND SOCIAL IMPACT

The social and economic consequences of the measures included in the District of Columbia plan or proposed herein are considered reasonable. For example, the inspection and maintenance procedures will require expenses of approximately $10 annually for the average vehicle inspected. The implementation of the VSAD retrofit program of pre-1968 vehicles will require that individual motorists pay approximately $20 installation costs. Though the price to the fleet vehicle owner for the catalytic retrofit is $135 per vehicle, this cost could gradually be reclaimed through slightly higher service or use fees for the fleet vehicles controlled. In addition, such expenditure can be deducted from income tax as a business expense, and therefore part of the cost will be absorbed by the govern-

V 38-148 AUG 2 73 XUM

ment. Compensation for the expenditures associated with the modifications required by the gasoline handling regulations could similarly be gained through slight increase in the fees for station services or fuel prices. This also could be deducted as a business expense from the income tax. Distributed costs of the various mass transportation improvement measures, as well as the incentives for the use of express buses and carpools and disincentives on the use of automobiles by individual motorist-commuters, are also considered reasonable.

The measures providing transportation improvements are expected to benefit the public fom the standpoint of improved traffic flow for commuters, general urban mobility, and energy consumption. The resulting VMT reductions may also have some impact on the sprawling development patterns fostered by widespread automobile use which are unduly wasteful of energy, land and other resources and have contributed to the decay of urban centers.

PUBLIC COMMENTS SOLICITED

Although the Administrator has concluded that the proposed plan is the best approach available to him at the present time for achieving compliance with the requirements of the Act, further analysis may demonstrate that more appropriate options are available. He therefore desires to obtain the comments and suggestions of the public on the problems of achieving the ambient air quality standards in the District of Columbia portion of the National Capital Interstate Air Quality Control Region. Comments are particularly invited pertaining to measures that may be taken by Federal, State, or local authorities to support or supplement the proposed air pollution control strategy, to implement these measures, and to compare social and economic effects of alternative pollution control measures.

Public hearing will be held in the Department of Commerce Interior departmental Auditorium, 14th Street between E and Constitution Avenues, N.W., Washington, D.C. on September 5, 1973, beginning at 9:00 a.m. Notice of the hearing on these regulations (including designation of locations for inspection and distribution of EPA proposals) is being published in the District of Columbia.

The Administrator's final promulgation of transportation controls for the District of Columbia will be significantly influenced by the comments and testimony he receives, as well as any additional approvable strategies submitted by the District of Columbia as part of the District of Columbia plan before or at the hearing. These influences, and the additional analysis of alternative strategies that can be made in the time between this proposal and final promulgation, may lead the Administrator to adopt final regulations that differ in important ways from this proposal.

SUBMITTAL OF WRITTEN COMMENTS

Interested persons may participate in this rule making by submitting written comments, preferably in triplicate, to EPA, Attention: Mobile Source Enforcement Division, 401 M Street SW., Washington, D.C. 20460. All relevant comments received on or before September 4, 1973 will be considered. Receipt of comments will be acknowledged, but substantive responses to individual comments will not be provided. Comments received will be available for public inspection during normal business hours at EPA, Office of Public Affairs, 401 M Street SW., Washington, D.C. 20460. This notice of proposed rule making is issued under the authority of section 110(c) and 301(a) of the Clean Air Act (42 U.S.C. 1857 et seq.).

EPA STUDIES AND GUIDELINES

Further information on transportation control, land use, and motor vehicle emissions may be obtained from one or more of the following documents which the Environmental Protection Agency has published:

a. "Prediction of the Effects of Transportation Controls on Air Quality in Major Metropolitan Areas" and "Evaluating Controls to Reduce Motor Vehicle Emissions in Major Metropolitan Areas," November 1972. Both of these documents are generally known as the "Six Cities Study".

b. "Transportation Controls to Reduce Motor Vehicle Emissions in Major Metropolitan Areas", December 1972. This document is a summary of a study of 14 cities conducted with the view of recommending specific transportation control strategies. (Separate reports for each of the 14 cities are also available.)

NOTE: The documents listed in a and b above are available from the Air Pollution Technical Information Center, EPA, Research Triangle Park, North Carolina 27711.

c. "Control Strategies for In-Use Vehicles", November 1972. This report is available from EPA, Mobile Source Pollution Control Programs, 401 M Street, SW., Washington, D.C. 20460.

d. "Transportation Control Measures", FEDERAL REGISTER (38 FR 15194) June 8, 1973.

e. "Aircraft and Aircraft Engines", FEDERAL REGISTER (37 FR 26488) December 12, 1972.

f. "Aircraft Emissions: Impact on Air Quality and Feasibility of Control". This report presents the available information on the present and predicted nature and extent of air pollution related to aircraft operations in the United States. In addition, it presents an investigation of the present and future technological feasibility of controlling such emissions.

g. "An Air Pollution Impact Methodology for Airports—Phase I", APTD-1470, January, 1973.

(42 U.S.C. 1857 et seq.)

Dated: July 24, 1973.

ROBERT W. FRI,
Acting Administrator.

It is proposed to amend Part 52 of Chapter I of Title 40 of the Code of Federal Regulations by adding the following:

§ 52.486 Reduction of Employee Parking.

(a) Definitions:

(1) Government Entity—means a federal, department, agency, bureau, board, office, commission, district, or unit of any other type (excluding foreign embassies) which employs personnel paid wholly with public funds.

(2) Commercial Parking Rate—means the average rate charged by commercial parking facilities (excluding on-street parking meters) on a monthly basis within a 1 mile radius of a facility or installation covered by this section.

(3) Served by Public Transit—means that such transit is available during working hours within a reasonable walking distance of the employee's place of employment, even though such transit may not serve the area of the employee's residence.

(b) This section shall be applicable in the District of Columbia portion of the National Capital Interstate Air Quality Control Region.

(c)(1) All facilities or installations owned, operated or leased by federal government which control, operate or lease a parking facility containing 25 or more spaces, shall by January 1, 1974, report to the Administrator the number of parking spaces in each such facility as of October 15, 1973. This number shall not include residential (including barracks) parking spaces contained in or on the facility or installation.

(2) The chief administrative officer of all facilities or installations subject to paragraph (c)(1) of this section, shall by April 1, 1974, submit to the Administrator a detailed report specifying the level of public transit service to the facility, and also the parking space utilization at the facilities or installations under his or her control at that time. This report shall include but is not limited to:

(i) All public transit lines which have stops within one-half mile of any such installation or facility.

(ii) The practicality of the operation of shuttle service from presently well serviced location such as (Federal Triangle, Southwest Mall, Georgetown, Capitol Hill, etc.) to the facility or installation during morning and afternoon peak hours.

(iii) A summary of the existing parking situation at the facility including:

(a) average vehicle occupancy calculated from a visual survey of vehicles entering and leaving the facility over a full week's time.

(b) the percentage of vehicles with one, two, three and four occupants.

(c) the total number of vehicles using the facility daily.

Should the report state that the facility or installation is not presently served by public transit, this report shall be reexamined, updated, and submitted annually not later than April 1 of each successive year.

(d) Each governmental entity subject to paragraph (c)(1) of this section which in the opinion of the Administrator is served by public transit shall comply with either paragraph (d)(1) or (2) of this section. The governmental entity shall either:

(1) Adopt a plan whereby a charge equivalent to commercial parking rates will be imposed for parking at any such parking facility owned, operated or leased by the governmental entity. In no case shall the charge be less than $20.00 per space per month. Any funds collected by any governmental entity under this subparagraph may be used for any legitimate governmental purpose, *Provided, however,* That no such funds shall be used to subsidize directly or indirectly employee parking; or

(2) Adopt a plan to reduce the number of parking spaces in each facility from the number in existence on October 15, 1973, according to the following schedule:

(i) by November 30, 1974, a reduction of 4 percent

(ii) by February 28, 1975, a reduction of 8 percent

(iii) by May 31, 1975, a reduction of 12 percent

(e)(1) Each entity of the Federal government subject to paragraph (c) of this section shall submit to the Administrator no later than June 30, 1974, a detailed compliance schedule showing steps it will take to achieve either the require reduction of spaces, or the initiation of commercial parking rates. In the case of a reduction of spaces, the schedule shall include provisions for marking those spaces to be eliminated in a manner obvious to members of the public (painting over, roping off, etc.). In the case of the initiation of commercial parking rates, the schedule shall include:

(i) A date for the initial imposition of the charge. Such date shall be no later than January 31, 1975,

(ii) The amount to be charged per space per month,

(iii) Any exceptions to the charge (e.g., handicapped personnel, certain high level officials of the governmental entity), including documentation of the need and rationale for such exceptions,

(iv) Provisions for annual reevaluation of the amount charged per space per month based upon any changes in commercial parking rates.

(f) Failure to submit any report or compliance schedule as required by this section shall render the person so failing to comply in violation of an applicable implementation plan and subject to enforcement action under section 113 of the Clean Air Act. Any governmental entity which either allows vehicles to be parked in excess of the number allowable, or which fails to collect commercial parking charges, shall likewise be in violation and subject to enforcement.

§ 52.487 Limitation of Off-Street Parking.

(a) This section shall apply only in the event that the Administrator finds that the District of Columbia fails to take one or more of the following steps to implement the $2.00 surcharge (or an equivalent measure):

(1) Complete study identifying locations where surcharge or equivalent measure shall apply and submit to the Administrator by May 30, 1974.

(2) Submit to the Administrator legally adopted regulations of the District of Columbia or other governmental entities to collect the surcharge or impose the equivalent measure by June 30, 1974.

(3) Institute the collection of the surcharge or impose the equivalent measure in those areas identified in the study by April 1, 1975.

(b) In the event the District of Columbia chooses to adopt any "equivalent measure" to this surcharge, the District of Columbia must submit to the Administrator by December 31, 1973, information demonstrating that such measure will in fact achieve the required result. Failure to demonstrate this fact adequately will cause the Administrator to determine that the District of Columbia is failing to implement the surcharge.

(c) In the event that the Administrator determines that the District of Columbia is failing to implement the $2.00 surcharge (or an equivalent measure) he shall make this determination public in the FEDERAL REGISTER, and this section shall then be immediately effective.

(d) Definition:

(1) The term "off-street parking facility" means any land or building or portion of a building set aside for the purpose of storing a maximum capacity of 10 or more vehicles on a temporary basis.

(e) Each governmental entity, public agency, private corporation, partnership or sole proprietor owning or operating an off-street parking facility located within the District of Columbia portion of the National Capital Interstate Air Quality Control Region shall, within 30 days of the effective date of this regulation, report to the Administrator the number of parking spaces in each such facility under its ownership or control of the effective date of this regulation. The number used solely for the storage of vehicles of persons who reside within ¼ mile of the facility shall not be counted.

(f) Each such owner or operator of any off-street parking facility located within the area specified in paragraph (c) of this section shall reduce the number of affected parking spaces in each such facility from the number in existence as of the date this regultaion becomes effective according to the following schedule:

(i) Within 90 days of the effective date—a 5 percent reduction;

(ii) Within 120 days of the effective date—a 10 percent reduction;

(iii) Within 180 days of the effective date—a 15 percent reduction.

(g) Each such owner or operator of an off-street parking facility subject to the requirements of this section shall submit to the Administrator, no later than 60 days after the effective date of this section, a detailed compliance schedule showing the steps it will take to achieve the required reduction in parking spaces. Such schedule shall provide for the marking in some manner obvious to the public (such as painting over, roping off, or the like) of the eliminated spaces on which parking is not permitted pursuant to this section.

(h) Failure to submit a compliance schedule as required by this section shall render the person or governmental entity so failing in violation of a requirement of an applicable implementation plan and subject to enforcement action under section 113 of the Clean Air Act. Any owner or operator of an off-street parking facility who allows any vehicle to be parked on any parking space which has been eliminated pursuant to this section, or who fails to mark clearly those spaces which have been eliminated, shall likewise be in violation and subject to enforcement.

§ 52.488 Vacuum Spark Advance Disconnect.

(a) For purposes of this section, "vacuum spark advance disconnect" means a device or system installed on the vehicle which prevents the ignition vacuum advance from operating either when the vehicle's transmission is in the lower gears or when the vehicle is traveling below a predetermined speed.

(b) This section is applicable in the District of Columbia portion of the National Capital Interstate Air Quality Control Region.

(c) On or before January 1, 1975, all gasoline-powered light duty vehicles of model year prior to 1968 and subject under presently existing legal requirements to registration in the area described in paragraph (b) of this section shall be equipped with an appropriate vacuum spark advance disconnect device.

(d) The District of Columbia shall submit, no later than January 1, 1974, a detailed compliance schedule showing the steps it will take to implement and enforce this requirement. Such schedule shall included, as a minimum, the following:

(1) A date by which the District of Columbia will evaluate and approve devices for use in this program. Such date shall be no later than March 1, 1974.

(2) A date by which installation of this equipment shall commence. Such date shall be no later than June 1, 1974.

(3) A date by which all vehicles subject to this section will be equipped with such devices. Such date shall be no later than January 1, 1975.

(4) Designation of any agency or agencies responsible for evaluating and approving such devices for use on vehicles subject to this section.

(5) Designation of an agency or agencies responsible for ensuring that the prohibitions of paragraph (e)(2) of this section shall be enforced.

(6) Method and proposed procedures for ensuring that those persons installing the devices have the training and ability to perform the needed tasks satisfactorily and that an adequate supply of devices will be available.

(7) Provision (apart from the requirements of any program for periodic inspection and maintenance of vehicles generally) for emission testing at the time of device installation or some other positive assurance that the device is installed and operating correctly.

(e) After January 1, 1975, the following shall apply within the District of Columbia portion of the National Capital Interstate Air Quality Control Region.

(1) The District of Columbia shall not register a vehicle subject to this paragraph which is not equipped in accordance with paragraph (c) of this section.

V 38-148
AUG 2 73
XUM

(2) No owner of a light duty vehicle subject to this paragraph shall operate or allow the operation of any such vehicle that is not equipped in accordance with paragraph (c) of this section.

(f) The failure of any person to comply with any provision of this section shall render such person in violation of a requirement of an applicable implementation plan, and subject to enforcement action under section 113 of the Clean Air Act. As to compliance schedules, the District of Columbia will be considered to have failed to comply with the requirements of this regulation if it fails to submit on a timely basis the required compliance schedule, or if the compliance schedule when submitted does not contain in satisfactory form each of the elements it is required to contain.

§ 52.489 Gasoline transfer vapor control.

(a) The term "gasoline" means any petroleum distillate having a Reid vapor pressure of four (4) pounds or greater.

(b) This section is applicable in the District of Columbia portion of the National Capital Interstate Air Quality Control Region.

(c) No person shall transfer gasoline from any delivery vessel into any stationary storage container with a capacity greater than 250 gallons unless such container is equipped with a submerged fill pipe and unless the displaced vapors from the storage container are processed by a system that prevents release to the atmosphere of no less than 90 percent by weight of organic compounds in said vapors displaced from the stationary container location.

(1) The vapor recovery portion of the system shall include one or more of the following:

(i) A vapor-tight vapor return line from the storage container to the delivery vessel and a device that will ensure that the vapor return line is connected before gasoline can be transferred into the container.

(ii) Refrigeration-condensation system or equivalent designed to recover no less than 90 percent by weight of the organic compounds in the displaced vapor.

(2) The vapor-laden delivery vessel shall be subject to the following conditions:

(i) The delivery vessel must be so designed and maintained as to be vapor-tight at all times.

(ii) The vapor-laden delivery vessel may be refilled only at facilities equipped with a vapor recovery system or the equivalent, which can recover at least 90 percent by weight of the organic compounds in the vapor displaced from the delivery vessel during refilling.

(d) The provisions of this paragraph (c) of this section shall not apply to the following:

(1) Stationary containers having a capacity less than 550 gallons used exclusively for the fueling of implements of husbandry; provided, however, said containers are equipped with submerged fill pipes.

(2) Any container having a capacity less than 2,000 gallons installed prior to promulgation of this paragraph.

(3) Transfer made to storage tanks equipped with floating roofs or their equivalent.

(e) *Compliance schedule.* Except as provided in paragraph (f) of this section, the owner or operator of any source subject to this section shall comply with this section on or before January 31, 1974.

(1) Any owner or operator in compliance with this section on the effective date of this regulation shall certify such compliance to the Administrator no later than 120 days following the effective date of this section.

(2) Any owner or operator who achieves compliance with this section after the effective date of this section shall certify such compliance to the Administrator within 5 days of the date compliance is achieved.

(f) Any owner or operator of a source subject to paragraph (e) of this section may, not later than 120 days following the effective date of this section, submit to the Administrator for approval a proposed compliance schedule that demonstrates compliance with the provisions specified in paragraph (e) of this section as expeditiously as practicable but no later than June 30, 1975. The compliance schedule shall provide for increments of progress toward compliance. The dates for achievment of such increments of progress shall be specified. Increments of progress shall include, but not be limited to: submittal of final control plan to the Administrator; letting of necessary contracts for construction or process changes or issuance of orders for the purchase of component parts to accomplish emission control or process modification; initiation of on-site construction or installation of emission control equipment or process modification; completion of on-site construction or installation of emission control equipment or process modification; and final compliance.

(g) Any owner or operator who submits a compliance schedule pursuant to this paragraph shall, within 5 days after the deadline for each increment of progress, certify to the Administrator whether or not the required increment of the approved compliance schedule has been met.

§ 52.491 Elimination of drycleaning losses.

(a) Definition:

(1) Drycleaning Operation means that process by which an organic solvent is used in the commercial cleaning of garments and other fabric material.

(b) This section is applicable in the District of Columbia portion of the National Capital Interstate Air Quality Control Region.

(c) After May 31, 1974, no person shall operate a drycleaning operation unless the uncontrolled organic emissions from such operation have been reduced at least 85 percent, except that drycleaning operation emitting less than three (3) pounds per hour and less than fifteen (15) pounds per day are exempt from this regulation.

(d) If incineration is used as a control technique, 90 percent or more of the carbon in the organic compounds being incinerated must be oxidized to carbon dioxide.

(f) Any person who fails to fulfill any requirement of this section shall be in violation of an applicable implementation plan and subject to enforcement action under section 113 of the Clean Air Act.

§ 52.493 Management of parking supply.

(a) This section shall apply only in the event that the Administrator finds that the District of Columbia fails to take one or more of the following steps to implement the $2.00 surcharge (or an equivalent measure):

(1) Complete study identifying locations where surcharge or equivalent measure shall apply and submit to the Administrator by May 30, 1974.

(2) Submit to the Administrator legally adopted regulations of the District of Columbia or other governmental entities to collect the surcharge or impose the equivalent measure by June 30, 1974.

(3) Institute the collection of the surcharge or impose the equivalent measures in those areas identified in the study by April 1, 1975.

(b) In the event the District of Columbia chooses to adopt any "equivalent measure" to this surcharge, the District of Columbia must submit to the Administrator by December 31, 1973, information demonstrating that such measure will in fact achieve the required result. Failure to demonstrate this fact adequately will cause the Administrator to determine that the District of Columbia is failing to implement the surcharge.

(c) In the event that the Administrator determines that the District of Columbia is failing to implement the $2.00 surcharge (or an equivalent measure) he shall make this determination public in the FEDERAL REGISTER, and this section shall then be immediately effective.

(b) Definitions:

(1) "Construction" means fabrication, erection, or installation of a parking facility, or any conversion of land to use as a parking facility.

(2) "Modification" means any change to a parking facility which increases the vehicle capacity of such facility.

(3) "Enlargement" means any physical change or addition to a parking facility which increases the vehicle capacity of such facility.

(4) "Commenced" means that an owner or operator has undertaken a continuous program of construction, modification, or enlargement.

(5) "Parking facility" (also called "facility") means any facility, building, structure, or lot or portion thereof used primarily for temporary storage of motor vehicles.

(c) No person, after the effective date of this section, shall commence construction of any new parking facility or modification or enlargement of any existing parking facility until he has first received from the Administrator or from an

agency approved by the Administrator a permit stating the construction, modification or enlargement of such facility will not interfere with the attainment or maintenance of applicable Federal air quality standards.

(d) In order for any agency to be approved by the Administrator for purposes of issuing permits for construction of any new parking facility or any modification or enlargement of any existing parking facility, such agency shall demonstrate to the satisfaction of the Administrator that:

(1) Requirements for permit applications and issuance have been established. Such requirements shall include, but not be limited to, a requirement that before a permit may be issued, the following findings of fact or factually supported projections must be made:

(i) The location of the facility.

(ii) The total motor vehicle capacity before and after the construction, modification, or enlargement of the facility.

(iii) The normal hours of operation of the facility and the enterprises and activities which it serves.

(iv) The number of people using or engaging in any enterprises or activities which the facility will serve.

(v) The number of motor vehicles using the facility on an average hourly basis and a peak hour basis.

(vi) A projection of the geographic areas in the community from which people and motor vehicles will be drawn to the facility. Such projections shall include data concerning the availability of public transit from such areas.

(2) Criteria for issuance of permits have been established and published. Such criteria shall include, but shall not be limited to:

(i) Full consideration of all facts contained in the application.

(ii) Provisions that no permit shall be issued if such permit will result in the increase of VMT within any area, the air quality of which fails to meet applicable Federal air quality standards.

(3) Agency procedures provide that no permit for the construction, enlargement or modification of a parking facility covered by this section shall be issued without notice and opportunity for public hearing. The public hearing may be of the legislative type the notice shall conform to the requirements of 40 CFR 51.4(b); and the agency rules of procedure may provide that if no notice of intent to participate in the hearing is received from any member of the public (other than the applicant) prior to 7 days before the scheduled hearing date, no hearing need be held. Such a requirement, if imposed, shall be noted prominently in the required notice of hearing.

§ 52.490 Control of evaporative losses from the filling of vehicular tanks.

(a) The term "gasoline" means any petroleum distillate having a Reid vapor pressure of 4 pounds or greater.

(b) This section is applicable in the District of Columbia portion of the National Capital Interstate Air Quality Control Region.

(c) A person shall not transfer gasoline to an automotive fuel tank from gasoline dispensing systems unless the transfer is made through a fill nozzle designed to:

(1) Effect a vapor-tight fit between the fill nozzle and filler neck of the automotive fuel tank so as to prevent discharge of hydrocarbon vapors to the atmosphere.

(2) Direct vapor displaced from the automotive fuel tank to a system wherein at least 90 percent by weight of the organic compounds in displaced vapors are recovered.

(3) Prevent automotive fuel tank overfills or spillage on fill nozzle disconnect.

(d) The system referred to in paragraph (c) of this section can consist of a vapor-tight vapor return line from the fill nozzle filler neck interface to the dispensing tank or to an adsorption, absorption, incineration, or refrigeration-condensation system or equivalent.

(e) Components of the systems required by § 52.489(c) can be used for compliance with paragraph (c) of this section.

(f) If demonstrated to the satisfaction of the Administrator that it is impractical to comply with the provisions of paragraph (c) of this section as a result of fill neck configuration, location, or other design features, the provisions of this paragraph shall not apply to tanks or vehicles existing at the time of promulgation of this regulation.

(g) The District of Columbia shall divide all facilities subject to this section into three classes, the first of which shall equal approximately 70 percent of hydrocarbon emissions from all gasoline stations, the second and third classes shall each equal approximately 15 percent of total hydrocarbon emissions from these sources. The classes shall be known as Class I, Class II, and Class III.

(h) Except as provided in paragraph (k) of this section, the owner or operator of a source included in Class I shall comply with the increments contained in the following compliance schedule:

(1) Contracts for emission control systems or process modifications must be awarded or orders must be issued for the purchase of component parts to accomplish emission control or process modification not later than March 31, 1974.

(2) Initiation of on-site construction or installation of emission control equipment or process change must begin not later than July 31, 1974.

(3) On-site construction or installation of emission control equipment or process modification must be completed not later than March 31, 1975.

(4) Final compliance is to be achieved not later than May 31, 1975.

(i) The owner or operator of a source included in Class II shall comply with the increments contained in the following compliance schedule:

(1) Contracts for emission control systems or process modifications must be awarded or orders must be issued for the purchase of component parts to accomplish emission control or process modification not later than March 31, 1975.

(2) Initiation of on-site construction or installation of emissions control equipment or process change must begin not later than July 31, 1975.

(3) On-site construction or installation of emission control equipment or process modification must be completed not later than March 31, 1976.

(4) Final compliance is to be achieved not later than May 31, 1976.

(5) Any owner or operator of stationary sources subject to the compliance schedule in this paragraph shall certify to the Administrator, within 5 days after the deadline for each increment of progress, whether or not the required increment of progress has been met.

(j) The owner or operator of a source included in Class III shall comply with the increments contained in the following compliance schedule:

(1) Contracts for emission control systems or process modifications must be awarded or orders must be issued for the purchase of component parts to accomplish emission control or process modification not later than March 31, 1975.

(2) Initiation of on-site construction or installation of emissions control equipment or process change must begin not later than July 31, 1976.

(3) On-site construction or installation of emission control equipment or process modification must be completed not later than March 31, 1977.

(4) Final compliance is to be achieved not later than May 31, 1977.

(5) Any owner or operator of stationary sources, subject to compliance schedule in this paragraph shall certify to the Administrator, within 5 days after the deadline for each increment of progress, whether or not the required increment of progress has been met.

(k) Paragraphs (h) and (i) of this section shall not apply:

(1) To a source which is presently in compliance with paragraph (c) of this section and which has certified such compliance to the Administrator by December 31, 1973. The Administrator may request whatever information he considers necessary for proper certification.

(2) To a source for which a compliance schedule is adopted by the District and approved by the Administrator.

(3) To a source whose owner or operator submits to the Administrator, by December 31, 1973, a proposed alternative schedule. No such schedule may provide for compliance after May 31, 1975, in the case of Class I sources, and May 31, 1976, in the case of Class II sources. If promulgated by the Administrator, such schedule shall satisfy the requirements of this paragraph for the affected source.

(l) Nothing in this section shall preclude the Administrator from promulgating a separate schedule for any source to which the application of the compli-

V 38-148 AUG 2 73 XUM

ance schedule in paragraph (b) of this section fails to satisfy the requirements of § 51.15 (b) and (c) of this chapter.

§ 52.492 Oxidizing catalyst retrofit.

(a) Definitions:

(1) "Oxidizing catalyst" means a device installed in the exhaust system of the vehicle that utilizies a catalyst and, if necessary, an air pump to reduce emissions of hydrocarbon and carbon monoxide from that vehicle.

(2) Fleet vehicle means any of 5 or more light duty vehicles operated by the same person(s), business, or governmental entity and used principally in connection with the same or related occupations or uses. This definition shall also include any taxicab (or other light duty gasoline-powered vehicle-for-hire) owned by any individual or business.

(3) Governmental entity means any agency of the executive branch of the Federal government, or a state or local department, agency, bureau, board, office, commission, district, or unit of any other type (excluding foreign embassies) which employs personnel paid wholly with public funds.

(4) All other items used in this section which are defined in 40 CFR Part 51, Appendix N, are used herein with the meanings so defined.

(b)(1) This section is applicable in the District of Columbia portion of the National Capital Interstate Air Quality Control Region.

(2) Classes of Vehicles Covered: (i) Light duty fleet vehicles of model year 1971 through 1975, not already equipped with catalyst, or certified to meet original 1975 statutory light duty vehicle emission standards.

(c) The District of Columbia shall establish a retrofit program to insure that on or before May 31, 1977, classes of gasoline-powered light duty vehicles as specified in paragraph (b)(2) of this section, which are subject under presently existing legal requirements to registration in the area defined in paragraph (b) of this section and are used on the streets and highways, of the District, are equipped with an appropriate oxidizing catalyst retrofit device. No later than March 1, 1974, the District of Columbia shall submit legally adopted regulations to EPA establishing such a program. The regulations shall include:

(1) Designation of an agency responsible for evaluating and approving such devices for use on motor vehicles subject to this section.

(2) Designation of an agency responsible for ensuring that the provisions of paragraph (c)(3) of this section are enforced.

(3) A provision that starting no later than May 31, 1976, the District of Columbia shall commence retrofitting oxidizing catalysts to those light duty motor vehicles able to operate properly on unleaded 91 RON gasoline. The installation shall be completed by May 31, 1977.

(4) A method and proposed procedure for ensuring that those installing the retrofits have the training and ability to perform the needed tasks satisfactorily and that they will have an adequate supply of retrofit components.

(d) After May 31, 1977, the District shall not register or allow to operate on public streets or highways any light duty gasoline-powered vehicles specified in paragraph (b)(2) of this section which does not comply with the applicable standards and procedures adopted pursuant to paragraph (c) of this section.

(e) After May 31, 1977, no owner of a vehicle subject to this section shall operate or allow the operation of any such vehicles which does not comply with the applicable standards and procedures implementing this section.

(f) The District of Columbia shall submit, no later than October 1, 1973, a detailed compliance schedule showing the steps it will take to establish and enforce a retrofit program pursuant to paragraph (c) of this section, and the text of needed statutory proposals and needed regulations which it will proposed for adoption. The compliance schedule shall include a date by which the District shall evaluate and approve devices for use in this program. Such date shall be no later than September 30, 1975.

(g) Failure to comply with any provisions of this section shall render the person so failing to comply in violation of a requirement of applicable implementation plan and subject to enforcement under § 113 of the Clean Air Act. The District will be considered to have failed to comply with the requirements of this regulation if it fails to submit on time the required compliance schedule, or if the compliance schedule when submitted does not contain in satisfactory form each of the elements it is required to contain.

[FR Doc.73-15626 Filed 8-1-73;8:45 am]

[40 CFR Part 52]

OREGON; APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

Notice of Proposed Rule Making

The transportation control plan submitted to EPA on April 13, 1973, by the State of Oregon for attainment of the primary national ambient air quality standards for carbon monoxide and photochemical oxidants (hydrocarbons) in the Portland Interstate Region was approved with certain exceptions on June 15, 1973 (38 FR 16561). This Notice of Proposed Rulemaking sets forth regulations that in the Administrator's judgment can be implemented in addition to the approved portions of the Oregon transportation control plan to attain national standards in the Region by May 31, 1975.

If, prior to Federal promulgation the State of Oregon submits transportation control plan revisions which will assure attainment of national standards by May 31, 1975, and which the Administrator determines are acceptable, these proposed Federal regulations will not be promulgated. If revisions to the State plan are submitted and determined to be approvable after promulgation of Federal regulations, then those regulations will be rescinded. It is the desire of EPA that the plan to attain and maintain national standards in the Region be a State plan carried out by the State or by authorized local governments. To the greatest extent feasible, the Federal regulations proposed are designed to implement transportation control measures that are acceptable to the State and/or that received public support at the State hearings held on October 25, 1972, and on May 29, 1973, or that were contained in the comments submitted to EPA following EPA receipt of the State transportation control plan.

Pollution in the Oregon Portion of the Portland Interstate Region

The Oregon portion of the Portland Interstate Region encompasses the counties of Columbia, Washington, Multnomah, Yamhill, Polk, Marion, Benton, Linn, and Lane. The Region lies between the low Coast Mountain Range to the west and the Cascade Mountain Range to the east and contains three major urban areas. Portland, the largest city in the Region, is situated in a bowl at the confluence of the Willamette and Columbia Rivers. The topographical and climatological features of the Portland area contribute to the accumulation of air pollution.

Portland is the only area in the Region experiencing levels of carbon monoxide and photochemical oxidants exceeding national ambient air quality standards. The highest 8-hour carbon monoxide concentration recorded in Portland in 1971 was 23 parts per million, compared to an 8-hour national ambient air quality standard of 9 parts per million (10 milligrams per cubic meter), not to be exceeded more than once per year. The highest 1-hour concentration recorded in Portland was 32 parts per million compared with a national standard of 35 parts per million (40 milligrams per cubic meter), not to be exceeded more than once per year. An estimated 43 percent reduction in addition to the reductions resulting from implementation of Federal emission standards for new cars, is required to attain the 8-hour national ambient air quality standard. Attainment of the 8-hour standard will ensure attainment of the 1-hour standard.

The maximum 1-hour photochemical oxidant concentration recorded in Portland in 1971 was 0.14 part per million, compared to a 1-hour national ambient air quality standard of 0.08 part per million (160 micrograms per cubic meter), not to be exceeded more than once per year. An estimated 17 percent reduction in motor vehicle hydrocarbon emissions, in addition to the reductions resulting from implementation of Federal emission standards for new cars, is required to attain the 1-hour national ambient air quality standard for photochemical oxidants. The strategies proposed to achieve attainment of the 8-hour carbon monoxide standard will ensure attainment of the 1-hour standard for photochemical oxidants.

Summary of State Plan

The measures adopted by the State for implementation in the Oregon portion of the Portland Interstate Region and submitted to EPA on April 13 include: (1) Annual inspection to determine emissions from and maintenance required for gasoline-powered light-duty vehicles with a contingency retrofit provision; (2) traffic flow improvements with contingency provisions including alteration of the hours for loading and servicing to off-peak times; (3) public transportation improvements; and (4) reorganization and management of parking.

The State intends to limit the requirement for light-duty motor vehicle inspection to vehicles registered in four of the Oregon counties in the Portland metropolitan area (Clackamas, Columbia, Multnomah, and Washington). The emission inspection will be performed using loaded (dynamometer) emissions tests at inspection stations that are either State owned or privately operated under State supervision. If the emission reductions forecast by the State to result from the inspection and maintenance program are not achieved, the State indicates retrofitting of pre-1968 vehicles will then be required.

The State proposes to implement traffic flow improvements in the Portland central business district through a computerized traffic signalization system and through removal of on-street parking on selected streets. If further steps are needed to improve traffic flow or to maintain the flow improvements achieved through the computerized traffic signalization system and removal of on-street parking, the State will implement other measures including prohibiting turns into pedestrian crosswalks and altering servicing and loading hours.

The transit improvement plan developed includes elements such as acquisition of new buses, construction and operation of suburban park-and-ride stations with exclusive bus lanes and/or express buses, development of supplemental park-and-ride stations using existing parking lots, and creation of a transit mall in the Portland central business district. Service improvements and an aggressive marketing program will be used to attempt to induce new ridership.

To implement the reorganization and management of parking, the State has determined the maximum allowable parking spaces by land use and planning zone for new developments in downtown Portland. The Portland City Council, by ordinance, removed the minimum off-street parking requirements for new development in the downtown area.

State Emissions Density Calculations

In developing the transportation control strategies it submitted, the State used a proportional mathematical model to establish the maximum emission densities allowable if the 8-hour national ambient air quality standard for carbon monoxide is to be attained and maintained in the Oregon portion of the Portland Intrastate Region. The reductions in motor vehicle carbon monoxide emissions necessary to attain the ambient carbon monoxide standard by 1975 were determined by forecasting the emission densities for that year and subtracting the allowable emission densities established by means of the proportional model. For the purposes of the analysis, traffic speeds and volumes were determined for the metropolitan Portland area. Estimates of 1975 emissions were calculated for selected grid cells having high traffic densities and congested traffic flow. Based on these calculations the State determined that the only grid cell where the 8-hour ambient carbon monoxide standard will be exceeded in 1975 is in the central business district of Portland.

Tabular Summary—Control Strategy Effects

The following table summarizes, for one of the critical grid cells, within the Portland central business district, the effect of each of the control measures included in the strategy adopted by the State of Oregon on the overall emission reductions necessary in the Oregon portion of the Portland Interstate Region. The State estimates that the 8-hour standard for carbon monoxide can be met in the Portland central business district by reducing the emission density per week day to 79,000 grams per grid cell. The emission density forecast for 1975 is 133,950 grams per day for the selected grid cell. The 1975 estimate takes growth into account and the reduction in emissions from implementation of the Federal standards for new motor vehicles, but not the interim 1975 standards published April 26, 1973 (38 FR 10317). Consequently, an appropriate revision to the forecasted motor vehicle emissions inventory and adjustment of strategies may be required.

The State calculations indicate the emission reductions needed in the Portland central business district can be achieved by combining increased transit patronage, traffic signal optimization, removal of selected on-street parking, and vehicle inspection to determine emissions from and maintenance required for light-duty vehicles.

Compilation of Control Strategy Effects of State Plan for the Sample Analysis (Grid Cell[1] on May 31, 1975

Portland central business district

Transportation Control Measure	Carbon Monoxide Reductions Based on Motor Vehicle Emissions forecast for 1975	
	gm/grid—24 hr.	%
Increased transit patronage	−7,500	6
Traffic signal optimization	−7,700	6
Removal of selected on-street parking	−21,300	18
Inspection and maintenance of light duty vehicles	−18,900	14
Total	−58,400	44
Motor vehicle emission, 1975 forecast	133,950	
Motor vehicle emissions remaining	75,550	
Maximum emissions allowable to attain standard	79,000	

[1] Fourth, Washington, and Alder grid cell.

Deficiencies in the State Plan

Although the types of transportation control measures contained in the plan submitted to EPA by the State of Oregon are acceptable, there are deficiencies in the plan which prevent its complete approval by the Administrator. The plan does not contain for the inspection/maintenance program an adequate description of proposed surveillance and enforcement methods, proposed rules and regulations, proposed administrative procedures to be used, a description of the resources available, and a schedule of dates by which significant steps will be achieved. A sufficient description of the resources available to the State and to local agencies for carrying out other meaures in the plan is also not included.

In addition, the emission reductions claimed by the State to result from some of the transportation control measures are considered by the Administrator to be somewhat high. In the Administrator's judgment, a motor vehicle inspection/maintenance program of the type proposed by the State will result in an annual average reduction in carbon monoxide emissions of only 12 percent (See Appendix N, 38 FR 15197). The contingency retrofit program is not specified in sufficient detail to assure implementation.

The State has supplied some evidence that the traffic flow improvements resulting from traffic signal optimization and removal of on-street parking may not ultimately result in increased traffic on the affected streets and has indicated that other measures such as turn prohibitions and alteration of hours for loading and servicing will be implemented if the forecasted traffic flow improvements do not occur. Based on experience in other areas, improvements in traffic flow are generally short-lived: streets with improved traffic flow attract additional traffic and are again soon congested. The contingency measures to be instituted if the expected traffic flow improvements are not achieved and maintained are not discussed in sufficient detail to assure implementation.

Proposed Federal Regulations

Because of the deficiencies in the State transportation control plan for the Portland Interstate Region, Federal regulations are proposed to implement the following transportation control measures:

1. Establishment of a system of traffic lanes for the exclusive use of buses and car pools. The proposed regulation will require that a bus or bus and car pool lane be established between the downtown and Park-and-Ride lot. It will also require that for streets having four or more traffic lanes in one direction, at least one lane must be designated for use only by buses or by buses and car pools with an additional lane during rush hours. In the case of a street or highway with only three lanes in one direction, at least one of the lanes must be open to buses or buses and car pools from 6:30 to 9:30 a.m. and from 3:30 to 6:30 p.m. This regulation will apply to the Oregon

V 38-148 AUG 2 73 XUM

Counties of Clackamas, Columbia, Multnomah and Washington.

2. Institution of a daylight delivery ban that will alter the hours heavy-duty gasoline powered motor vehicles are allowed to make deliveries in the Portland central business district. The proposed regulation will prohibit these vehicles from making deliveries in the central business district between 7 a.m. and 6 p.m. The purpose of this regulation is to reduce the number and thus the air pollutant emissions from heavy-duty vehicles operating in downtown Portland during the hours when the 8-hour carbon monoxide standard is most likely to be exceeded. Reducing the number of heavy-duty vehicles will have the additional benefit of helping to improve traffic flow.

These Federally proposed measures are intended to strengthen and supplement, not wholly replace, State-adopted transportation control measures. Other measures are available to EPA and to the State that will, if implemented, assist in achieving a reduction in motor vehicles emissions equivalent to that resulting from the two proposed measures. In the State of Washington, for example, EPA is proposing regulations requiring the implementation of a selective vehicle-use exclusion program that will provide for metering the amounts of traffic entering those areas of Seattle and Spokane where air quality standards are presently not being met. To meter the traffic entering the affected areas, the State of Washington will be required to issue an "access certificate" to each vehicle requested within specified counties in the two metropolitan areas. The certificate will be affixed in a prominent place on the vehicle. On specified days of the week, vehicles displaying designated certificates will be prohibited from operating or parking in the affected areas between 7:00 a.m. and 5:00 p.m.

The estimated effect of the two proposed regulations, implemented together with three State-adopted transportation control measures is presented in the following table. Because the State-adopted measures to improve traffic flow will not, in the opinion of the Administrator, result in the increases in average vehicle speed forecasted, the reduction in carbon monoxide emissions from traffic flow improvements was reduced from the amount estimated by the State. Attainment of national standards by 1975 through implementation of only the State and Federal measures listed in the table will require that the State not permit in the Portland central business district the construction of any new parking facilities or the enlargement of any existing facilities. A regulation containing this authority, Oregon Administrative Rule, Chapter 340, section 20–050 through 20–070, "Parking Facilities and Highways in Urban Areas," was adopted January 24, 1972. This rule was incorporated in Section 5 of the State's Implementation Plan submitted January 30, 1972 and approved on May 31, 1972 (37 FR 10888). Stabilization of the parking supply in the Portland central business district will reduce the annual increase in light-duty vehicle travel, will help assure the success of State-adopted programs for traffic flow improvement and increased transit patronage, and will also encourage car pooling.

COMBINATION OF STATE/FEDERAL TRANSPORTATION CONTROL STRATEGY EFFECTS FOR THE SAMPLE ANALYSIS GRID CELL* ON MAY 31, 1975

PORTLAND CENTRAL BUSINESS DISTRICT

Transportation Control Measure	Carbon Monoxide Reductions	
	gm/grid—8 hr.	Percent
Increased transit patronage 1	−3,100	6
Traffic flow improvement 1, 3	−9,200	14
Parking management 1	−2,600	4
Bus/carpool lanes 2	−3,100	6
Daylight delivery ban 2	−9,200	14
Total	−28,800	44
Motor vehicle emissions 1975 forecast	65,600	
Motor vehicle emissions remaining	36,800	
Maximum emissions allowable to attain standard	38,800	

*Fourth, Washington, and Alder grid.
1 State-adopted transportation control measure.
2 EPA-proposed transportation control measure.
3 Traffic flow improvement measures include traffic signal optimization and removal of on-street parking.

Social and Economic Impacts of Proposed Federal Transportation Control Measures

A quantitative assessment of the economic and social impacts of the proposed Federal transportation control measures on the Portland Interstate Region has not been possible due to the short time available for development of the measures and the innate complexities of the issues involved. However, an attempt has been made to identify some of the more important impacts that will result if the proposed Federal measures are promulgated and implemented.

Reductions in the accessibility of the Portland central business district could result if vehicle use is restricted through the daylight delivery ban. If deliveries at alternative times of the day or using alternative modes of transportation are not provided and the central business district becomes less convenient, the economy of the district may be adversely affected. Property values could fall and private profits and government revenues could decline. The extent of adverse economic effects and the degree to which these effects can be ameliorated through providing alternatives to day time deliveries are difficult to estimate. However, economic losses in the central business district may be offset by gains elsewhere within the Region.

EPA Efforts to Mitigate the Effects of Proposed Regulations

The proposed Federal regulations, together with the State-adopted measures, will eliminate the danger to human health and welfare that exists in the Oregon portion of the Portland Interstate Region as a result of air pollution from motor vehicles. The regulations may, however, have adverse economic and social impacts. The Administrator will make every effort to mitigate the adverse effects of his final promulgation. He will be in contact with the Department of Transportation and other departments as necessary. The Administrator will request that these departments give special attention to the need for funding of programs necessary to offset any adverse effects resulting from the implementation of transportation control measures.

Public Comments Solicited

The Administrator intends that any Federal regulations which must be promulgated be as responsive as possible to the needs of the Portland Interstate Regions; he therefore desires to obtain the comments and suggestions of the public on the proposed regulations and on any other measures that may be taken by Federal, State, or local governments to strengthen, supplement, or replace the proposed measures.

A public hearing will be held on this and any alternative proposals in Portland at the Portland Hilton Hotel, Parlor D, 921 Sixth Avenue at 7:30 p.m. on September 5, 1973.

In any promulgation of regulations necessary the Administrator will consider all comments and testimony he receives, as well as any additional strategies submitted by the State.

Submittal of Written Comments

Interested persons may participate in this rule making by submitting written comments, preferably in triplicate, to the Administrator, EPA, Region X, 1200 Sixth Avenue, Seattle, Washington 98101, Attention: Ms. Betty Simon. All relevant comments received on or before September 4, 1973 will be considered. Receipt of comments will be acknowledged, but substantive responses to individual comments will not be provided. Comments received will be available for public inspection during normal business hours at the EPA Region X library. The changes proposed by this notice, with appropriate modifications, will be effective as noted. This notice of proposed rule making is issued under the authority of section 110(c) and 301(a) of the Clean Air Act.

(42 U.S.E. 1857c et seq.)

Dated: July 24, 1973.

ROBERT W. FRI,
Acting Administrator.

It is proposed to amend Part 52 of Chapter I, Title 40, of the Code of Regulations as follows:

Subpart MM—Oregon

1. Subpart MM is amended by adding § 52.1979 and § 52.1980 as follows:

§ 52.1979 Bus/carpool lanes.

(a) Definitions:

(1) "Carpool"—a vehicle containing three or more persons.

(2) "Bus/carpool lane"—a lane on a street or highway open only to buses (or buses and carpools), whether constructed specially for that purpose or converted from existing lanes.

(3) "Major street or highway"—any street or highway which meets the criteria given in paragraph (b)(4) (ii), (iii) and (iv) of this section.

(b) The following constitutes the bus/carpool control strategy for the Portland Interstate Air Quality Control Region.

(1) Each incorporated city within the counties of Clackamas, Columbia, Multnomah and Washington shall establish bus/carpool lanes on the major streets and highways (as defined herein) over which it has ownership or control, according to the schedule in paragraph (b)(4)(vi) of this section.

(2) The Oregon counties of Clackamas, Columbia, Multnomah and Washington shall establish bus/carpool lanes on the major streets and highways (as defined herein) within the Region over which they have ownership or control, according to the schedule in paragraph (b)(4)(vi) of this section.

(3) The State of Oregon shall establish bus/carpool lanes on the major streets and highways (as defined herein) within the Region over which it has ownership or control, according to the schedule in paragraph (b)(4)(vi) of this section.

(4) Each of the governmental entities named in the previous three subparagraphs shall submit no later than December 1, 1973, a detailed compliance schedule showing the steps which it will take to establish these bus/carpool lanes and to enforce the limitations on their use, with each schedule to include the following:

(i) Each street and highway which will have bus/carpool lanes must be identified with a schedule for the establishment of the lanes.

(ii) A bus/carpool lane must be established between the Portland central business district and each Park-and-Ride lot identified in section (iv), "Public Transportation Improvements of the Portland Transportation Strategy," April 15, 1973.

(iii) If a street or highway has four or more traffic lanes in one direction, at least one of these lanes must be open only to buses (or buses and carpools) at all times. If only one lane is open to buses (or buses and carpools) at all times, a second lane must be open only to buses (or buses and carpools) from 6:30 a.m. to 9:30 a.m. and from 3:30 p.m. to 6:30 p.m.

(iv) If a street or highway has three traffic lanes in one direction, at least one of these lanes must be open only to buses (or buses and carpools) from 6:30 a.m. to 9:30 a.m. and from 3:30 p.m. to 6:30 p.m.

(v) In unusual situations, a street or highway, or lane or segment thereof, may be exempt from these requirements if an approval of the exemption is obtained from the Administrator. The application for exemption shall not be submitted and will not be accepted after November 1, 1973. Special circumstances justifying the need for an exemption or modification (such as inappropriateness of use by buses, designation of bicycle lanes, or desire to allow bus/carpool lanes to be entered briefly by other vehicles for the purpose of crossing a lane or making a right turn) must be given in detail with its application.

(iv) Bus/carpool lanes must be prominently indicated by overhead signs at least once every mile, and at each intersection or entry ramp. Twenty-five percent of the lane mileage for each of the governmental entities must be established and needed signs must be installed by March 1, 1974; fifty percent by June 1, 1974; seventy-five percent by September 1, 1974; one hundred percent by December 1, 1974.

(vii) Bus/carpool lanes must be prominently indicated by distinctive painted lines, pylons, or physical barrier.

(viii) A signed statement by the chief executive officer of each governmental entity or his designee will identify the sources and amounts of funds for all projects.

(5) Buses shall have the right of way whenever changing lanes on streets and highways with bus lanes. This shall take effect as each lane is established and identified.

(6) Buses shall be permitted to make left turns whether or not the intersection is posted for "No Left Turn" (except when a one-way street would be entered from the wrong direction). This shall take effect January 1, 1974.

(7) None of the governmental entities named in paragraph (b) of this section shall convert existing on-street parking spaces to use as motor vehicle traffic lanes unless the effect will be to increase the number of bus/carpool lanes on the affected street beyond the number otherwise required by paragraph (b) of this section or unless the effect will be to create a bicycle lane in place of parking spaces.

(c) Failure to comply with any provisions of this section shall render the person so failing to comply in violation of a requirement of an applicable implementation plan and subject to enforcement under section 113 of the Clean Air Act. With regard to compliance schedules, a governmental entity will be considered to have failed to comply with the requirements of this section if it fails to timely submit any required compliance schedule, or if the compliance schedule when submitted does not contain in satisfactory form each of the elements it is required to contain.

§ 52.1980 Daylight delivery ban regulation.

(a) Definitions:

(1) "Daylight hours" means the hours between 7 a.m. and 6 p.m. Monday through Friday.

(2) "Delivery ban" means a program to reduce emissions from in-use heavy-duty gasoline-powered vehicles employed to deliver goods during daylight hours.

(3) "Heavy-duty gasoline-powered vehicle" means any motor vehicle designated primarily for transportation of property and rated at more than 6,000 pounds GVW which is powered by a gasoline-burning engine.

(4) All other terms used in this section which are defined in Part 51 of this subchapter are used herein with the meaning so defined.

(5) "Portland central business district" means an area enclosed by the freeway loop formed by the Marquam Bridge-Eastbank Freeway (I–5) and the Fremont Bridge-Stadium Freeway (I–405) and by West Burnside Street.

(b) This section is applicable in the Portland central business district.

(c) Beginning January 1, 1975, the State of Oregon, Multnomah County, and the City of Portland shall prohibit during daylight hours deliveries of goods to commercial establishments employing 10 or more persons on the streets or highways over which it has ownership or control. The prohibition shall state that heavy-duty gasoline-powered vehicles making deliveries in violation of the prohibition shall either be towed away, or the owner and/or operator subject to a fine of up to $100 or both. No later than March 1, 1974 each of the governmental entities shall submit legally adopted regulations to EPA establishing such a prohibition.

(d) The State of Oregon, Multnomah County, and the City of Portland shall submit, no later than December 1, 1973, detailed compliance schedules showing the steps they will take to establish and enforce a daylight hours delivery ban program including the statutory proposals and needed regulations which they will propose for adoption. The compliance schedule shall include the date by which the governmental entities will recommend needed legislation to the appropriate body and will identify the State, county or city officer responsible for enforcement.

(e) Failure to comply with any provision of this section shall render the person so failing to comply in violation of a requirement of an applicable implementation plan and subject to enforcement under section 113 of the Clean Air Act. A state or other governmental entity will be considered to have failed to comply with the requirements of this section if it fails to timely submit any required compliance schedule, or if the compliance schedule when submitted does not contain in satisfactory form each of the elements it is required to contain.

[FR Doc.72–15629 Filed 8–1–73;8:45 am]

[40 CFR Part 52]

MARYLAND; APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

Notice of Proposed Rule Making

The transportation control plan submitted by the State of Maryland for attainment of the primary national ambient air quality standards for carbon monoxide and photochemical oxidants (hydrocarbons) in the Metropolitan Baltimore Intrastate Air Quality Region, hereafter called the Metropolitan Baltimore Intrastate Region, was disapproved in part on June 15, 1973. This notice of proposed rule making sets forth regulations which in the Administrator's judgment could be implemented in addition to

V 3 8 - 1 4 8
AUG 2 7 3
XUM

the approved portions of the Maryland plan to attain and maintain the national standards for carbon monoxide and for photochemical oxidants in the Metropolitan Baltimore Intrastate Region.

If revisions to the State plan are submitted and determined to be approvable prior to Federal promulgation, these proposed regulations will be withdrawn. If revisions to the State plan are submitted and determined to be approvable after Federal promulgation, then those Federal regulations will be rescinded. It is the desire of the Environmental Protection Agency that the plan to attain and maintain the carbon monoxide standard and the photochemical oxidant standard in the Metropolitan Baltimore Intrastate Region be a State plan carried out by the State or its designated representatives.

SUMMARY

Portions of the Maryland plan were not approved on June 15, 1973, because the justification for claimed reductions and the procedures for administration, enforcement, and monitoring of the strategies were not adequate. Although some of the general strategies proposed in the plan were approved, the specific control strategy package was not approved. The specific control strategies in the State plan did not guarantee a sufficient degree of carbon monoxide and hydrocarbon emission reductions to justify a finding that carbon monoxide and photochemical oxidant air quality standards would be attained.

Maryland, by letter from Governor Marvin Mandel, has made a request for a 2-year extension until May 31, 1977, to meet the carbon monoxide and photochemical oxidant air quality primary standards. This would be the maximum extension permitted under section 110(e) of the Clean Air Act. On January 31, 1973, the opinion of the U. S. Court of Appeals for the District of Columbia in the case of Natural Resources Defense Council Inc., et al. v. Environmental Protection Agency (Civil Action No. 72–1522) and seven related cases required EPA to apply a very stringent standard of review to State extension requests. Maryland's submittal does not itself contain sufficient supporting data on the technical infeasibility of the available control strategies nor does it show adequate consideration of available alternative strategies.

However, based on EPA's own evaluation and analysis we have determined that the hardware necessary for retrofitting substantial numbers of light-duty vehicles with catalytic converters will not be available to meet standards until May 31, 1977. If evidence presented at the public hearings or submitted to the Agency during the comment period indicates that this 2-year extension is not justified, appropriate revisions will be made in our final promulgation.

The EPA-proposed regulations are designed to correct specific deficiencies in the State plan. A regulation is proposed to accelerate the implementation of the Maryland-proposed program which would prohibit the State of Maryland from registering or allowing the operation of vehicles which cannot show proof of satisfactorily passing a loaded emission test. Because the State plan lacks specific assurances of emission reductions from improvements to public transportation, regulations are proposed to establish exclusive bus/carpool lanes, restrict on-street parking, restrict the establishment of additional parking facilities, and require the establishment of a bus/carpool computer matching system.

A regulation also is proposed to require a Vacuum Spark Advance Disconnect (VSAD) retrofit by 1975 of all pre-1968 light-duty vehicles and an oxidizing catalyst retrofitting by 1977 of certain light-duty vehicles of model years 1968–1975 inclusive. Also proposed are regulations requiring gasoline marketing vapor controls to reduce hydrocarbon loss during transfer of gasoline. As a final assurance of adequate emission reductions, a regulation is proposed to limit gasoline sales in the Region to their base year levels beginning July 1, 1974, and to limit them to 40.5 percent of their base year levels beginning May 31, 1977.

The strategies proposed herein, when taken together with the effects of the Federal Motor Vehicle Control Program, are projected to achieve more than the 57 percent reduction in carbon monoxide base year (1972) emissions required to meet the national ambient air quality standard for carbon monoxide by May 31, 1977, and will achieve the 70 percent reduction in hydrocarbon base year (1972) emissions required to meet the national ambient air quality standards for photochemical oxidants by May 31, 1977 in the Metropolitan Baltimore Intrastate Region.

EPA is also considering the promulgation of additional control measures and requests public comment on the applicability of these measures to the Metropolitan Baltimore Intrastate Region. Candidate measures include phased reductions of public parking facilities, motorcycle limitation programs, the expanded use of any existing rail right-of-way, and establishment of bikeways.

In addition, EPA is evaluating the potential of increasing the stringency of certain proposed regulatory measures. The proposed inspection and maintenance regulations incorporate a 30 percent failure rate which could be expanded to 50 percent and gain additional emission reductions. Furthermore, Maryland has in effect regulations for organic solvent use and control of degreasing operations. Though these regulations are believed to be reasonable, further examination may indicate that additionally stringent measures are necessary. Pending review of public comments and additional EPA evaluation of these control measures and/or modifications, EPA may include some, if not all, of these potential strategies in the final promulgation.

TRANSPORTATION CONTROL ALTERNATIVES

Analysis of the air quality problems in the State of Maryland reveals a photochemical oxidant problem and a carbon monoxide problem within the Metropolitan Baltimore Intrastate Region.

Since a substantial proportion of the photochemical oxidant problem and virtually all of the carbon monoxide problem stems from emissions from individual motor vehicles, measures to reduce emissions and measures to reduce vehicular travel can be effective in improving air quality. Reductions in emissions from vehicles can be obtained through inspection and maintenance programs and from incorporation of various retrofit devices. Reductions in Vehicle Miles Traveled (VMT) can be achieved through various pricing and taxing schemes for road use, adoption of parking restrictions and/or limitations of available number of parking spaces, and programs promoting the use of bus/carpools.

Direct vehicle restraints may also be necessary. These can take the form of limitations on gasoline distribution or of restricting access of vehicles to areas of high pollutant concentrations. In the Metropolitan Baltimore Intrastate Region, where the greatest threat to air quality is an area-wide photochemical oxidant pollution generated by hydrocarbon emissions, an area-wide limitation on gasoline distribution would be an effective approach.

In solving the pollution problem, improvements to public transportation are a desirable and effective complement to restraints on automobile use. Such improvements as greater coverage, increased frequency of service, improved reliability, improved comfort, and adequate personal security would further encourage the use of public transit alternatives.

PROPOSED ADDITIONAL CONTROL STRATEGIES

The Maryland plan as amended by the June 15, 1973 submission, attempts to demonstrate attainment of the photochemical oxidant and carbon monoxide air quality standards through utilization of five general measures: the Federal Motor Vehicle Emissions Control Program; a State-wide, State-run Motor Vehicle Inspection Program for all gasoline-powered vehicles; improvements to public transportation; retrofit of heavy-duty gasoline-powered vehicles; and major stationary source restrictions.

The Maryland plan, which utilizes data gathered in the physical area defined by the Baltimore Metropolitan Area Transportation Study (BMATS), reports peak-period hydrocarbon emissions were 57.7 tons and carbon monoxide emissions were 507,800 tons per year in 1972. In order to demonstrate attainment of the standards, the State of Maryland calculations indicate that hydrocarbon emissions must be reduced by 70 percent of the 1972 emissions in the BMATS area to a level of 17.3 tons/peak period and that carbon monoxide emissions must be reduced by 57 percent of the 1972 emissions in the BMATS area to a level of 217,800 tons/year.

Including projected increases in vehicle miles of travel, the Federal Motor Vehicle Emissions Control Program will reduce hydrocarbon peak-period emissions by 31 percent to 39.7 tons and will reduce carbon monoxide emissions by 32 percent to 345,100 tons/year by 1977.

These estimates are adjusted to include the 1975 interim motor vehicle emission standards as announced on April 11, 1973.

To provide the required additional reductions to attain the national ambient air quality standards as expeditiously as practicable, several measures for controlling mobile sources and reducing VMT are proposed. Mobile source controls include the early initiation of a State vehicle inspection program and the retrofitting of certain light-duty gasoline-powered vehicles. VMT reductions to be realized through improvements to public transportation are augmented and supported by proposed measures providing for encouragement of bus/carpools, parking restrictions and limitations, and a gasoline distribution limitation.

In order to ensure that national ambient air quality standards will be achieved as expeditiously as practicable, the following VMT reduction measures will be implemented by May 31, 1975:

1. Gasoline distribution limitations to their base year (July 1, 1972–June 30, 1973) levels.

2. Public transportation improvements including exclusive bus lanes and parking restrictions.

Moreover, the Administrator is considering the promulgation of additional control strategies which he believes can possibly provide further support to assure attainment of the needed reduction in VMT. The Administrator encourages testimony on a program calling for the phased reduction of public parking spaces in the CBD and other trip attraction centers by as much as 20 percent by mid-1975. Also solicited is testimony on the possibility and advisability of the expanded use of existing rail right-of-way and motorcycle limitation programs.

The final promulgation may include measures not explicitly proposed herein if, on the basis of information provided to the Administrator, they appear at the time of the final promulgation to be the most effective and reasonable means of attaining standards.

PROPOSED REDUCTIONS IN VMT

According to the Maryland plan, improvements to public transportation are credited with reducing vehicle miles of travel by 13 percent in the BMATS area. This VMT reduction is expected to reduce by 13 percent light-duty mobile emissions of both hydrocarbons and carbon monoxide in that area. Improvements proposed include establishing exclusive bus lanes, purchase of new buses, and promotion of carpools; however, implementation schedules are not firm and hence provide no assurance for claimed reductions. To help ensure that the State's reductions claimed for mass transportation improvements will be achieved, the Environmental Protection Agency is proposing four additional regulations: provision of exclusive bus/carpool lanes, limitation of on-street parking on those streets with exclusive bus lanes, limitations on the construction of additional parking facilities, and the establishment of a computerized bus/carpool service.

Although the implementation of stationary source controls, inspection/maintenance of light-duty gasoline-powered vehicles, improvements to public transportation, retrofit of certain light-duty gasoline vehicles, and the above four additional regulations will enable the carbon monoxide standard to be achieved in 1977, these measures alone will not be sufficient to meet the standard for photochemical oxidants by 1977.

An additional reduction of 11.5 tons/peak period of hydrocarbon emissions is required. To attain this reduction, EPA proposes a phased gasoline distribution limitation, by limiting gasoline distribution by mid-1975 to the base year level and by reducing the distribution by mid-1977 to 40.5 percent of the base year level.

The Clean Air Act of 1970 requires attainment of the national ambient air quality standard as expeditiously as practicable but in no case later than May 31, 1975, unless the necessary technology or other control methods are not reasonably available by that date. In the latter event, an extension of time for achieving the standards until no later than May 31, 1977, may be granted, but all reasonably available alternatives must be implemented by May 31, 1975, along with such measures during the pre-1977 interim period as are deemed to be reasonably available. In the Metropolitan Baltimore Intrastate Region, a number of reasonable strategies (inspection/maintenance, gasoline distribution limitation, vacuum spark advance disconnect for light-duty vehicles, volatile organic loading facilities, preferential bus treatment, on-street parking and new parking facility limitations, and a computerized bus/carpool service) will be operative in 1975. However, because of hardware unavailability and long lead times involved in the acquisition of mass transportation equipment and in the installation of advance retrofit devices, the total strategy cannot be completed until May 31, 1977. The gasoline distribution limitation strategy must, by its very nature, rely heavily on the other proposed strategies. The percentage reduction in 1977 from the gasoline limitation program is projected to be 59.5 percent of the base year levels of gasoline consumption.

The proposals described above are the only ones for which regulatory language has been included in this proposal. However, EPA will also consider other VMT reduction measures as part of this rulemaking proceeding, and they may be included in the final promulgation if they are found to be the most feasible methods for achieving the standards. In particular, EPA will explore the possibility of reducing VMT by the phased reduction of the number of public parking spaces in CBD's and other trip attraction centers by as much as 20 percent by mid-1975, establishment of a more sophisticated mass transit system, selective conversion of traffic lanes on roads to the exclusive use of buses and carpools, adoption of more restrictive on-street parking regulations, increased parking charges, and adoption of more stringent enforcement methods. Measures to promote the use of bicycles and to limit the use of motorcycles will also be considered. Comments on these and other VMT reduction measures are particularly solicited.

PROPOSED CONTROLS ON STATIONARY SOURCES

Although Maryland has either existing or proposed regulations to control stationary sources, its proposal to reduce hydrocarbon emissions through vapor recovery during service station and automobile tank refueling operations was not supported by proposed regulations which the State committed itself to adopt as required by 40 CFR 51.14(a)(ii). In the plan addendum of June 28, 1973, Maryland's intent to adopt such regulations was indicated. This submission is now being evaluated. To ensure the reduction of 1.8 tons/peak period claimed for this measure, EPA is proposing a regulation to require 90 percent recovery of hydrocarbon vapors during loading of service station storage tanks and during transfer of gasoline to automobiles. If the Maryland proposal of June 28, 1973, is satisfactory, the regulation proposed by EPA herein will be withdrawn.

Existing organic solvent regulations require that all present drycleaning installations emitting more than 200 pounds per day of photochemically reactive hydrocarbons shall reduce present emissions by at least 85 percent, and that the limit for new installations shall be 40 pounds per day. Although the full effect of the existing regulations through natural attrition would not be felt until 1987, the additional requirement that all solvent users must be fully controlled by 85 percent of uncontrolled emissions would result in a negligible reduction of 0.03 tons per peak period, or 0.14 percent of the reduction required to meet the primary ambient air quality standards by May 31, 1977. The administrator is aware of Maryland's ongoing program for the control of hydrocarbon emissions from dry-cleaning installations and is presently evaluating the proposed regulation which would accelerate the program by attaining full compliance by the proposed May 31, 1974 date. Consequently, no regulation is being proposed by EPA at this time on the assumption that Maryland is proceeding expeditiously to control this relatively small source category of hydrocarbon emissions.

The Environmental Protection Agency has also examined Maryland's regulations governing emissions of organic solvents resulting from degreasing operations and from evaporation from surface and architectural coatings. For decreasing operations, there are no specific constraints on nonreactive material that may be used, such as perchlorethylene or saturated hologenated hydrocarbons that are in use elsewhere. Comments are solicited on whether degreasing operations in the Metropolitan Baltimore Intrastate Region are a significant source of reactive hydrocarbon emissions for

V 3 8 - 1 4 8
AUG 2 7 3
XUM

which a specific regulation should be promulgated.

Emissions of other solvents in the Metropolitan Baltimore Intrastate Region were also investigated. It has been determined that technology does exist to control more efficiently the emissions of a number of the smaller heating (15 to 200 lb/day category) and spraying operations (40 to 200 lb/day category) involving organic solvents. Their estimated total peak-period emission is 0.10 ton or 0.47 percent of the reduction required to meet the primary ambient air quality standards by May 31, 1977. Comments are solicited as to whether it is feasible or practicable to require additional controls on these sources, many of which are presumably located on premises of small firms. If these comments indicate that further controls are needed, then the Administrator proposes to promulgate regulations equivalent to those currently adopted by the County of Los Angeles Air Pollution Control District as Rule 66. Other minor relaxations from L.A. Rule 66 involve evaporative emissions from gallon (or smaller) containers of architectural coating compounds and from the allowable disposal limits of waste solvent materials. No data are presently available to the Administrator on the atmospheric burden that may be created by such evaporative emissions, which are presently believed to be very small.

Even if the Administrator should determine that Maryland's existing regulations for control of solvent emissions as discussed above need not be augmented at this time, they will be the subject of continuing examination and their rigorous enforcement will be monitored.

Proposed Controls on Mobile Sources

In the plan addendum of June 28, 1973, it is stated that legislative authorization funding measures, etc., are needed to implement Maryland's proposed inspection and maintenance program. The tentative implementation timetable proposed by Maryland shows the commencing of the 20-month program on January 1, 1975, following an assumed passage of legislation, and completion by September 1, 1976. Under the requirements of the Clean Air Act, the States must proceed as expeditiously as practicable to attain primary air quality standards. In an effort to ensure the earliest possible initiation of Maryland's inspection and maintenance program, the Administrator is proposing a regulation to require implementation of the system to begin by March 1, 1974, and actual commencement of the inspection program by August 1, 1975. The duration of this timetable is very close to that proposed by Maryland. The Maryland plan proposes an emission inspection program for all light- and heavy-duty gasoline-powered vehicles; a 12 percent hydrocarbon emission reduction and a 10 percent carbon monoxide emission reduction for all such vehicles is claimed through the use of a loaded-test inspection/maintenance program. These values are consistent with those presented in CFR Part 51, Appendix N. Both the Maryland and EPA proposals assume an initial 30 percent failure rate criterion. Comments are solicited on the desirability of establishing an initial 50 percent failure rate criterion, which calculations indicate would give an additional reduction of 0.1 ton of hydrocarbons per peak-period emission.

A full EPA review of the June 28, 1973, addendum is now in progress. This review will determine the degree of acceptability for both the establishment of the inspection and maintenance system itself and the subsequent inspection program. Comments are also solicited from the public and other interested parties on all aspects of the program. It is the Administrator's wish that the final promulgation incorporate as much of the Maryland-proposed program as can be found acceptable.

On June 15, 1973, and as subsequently amended on June 28, 1973, and on July 9, 1973, Maryland proposed retrofit of heavy-duty gasoline-powered vehicles with devices capable of reducing hydrocarbon and carbon monoxide emissions by 50 percent. EPA is unable to accept this proposal at this time because there has not been sufficient time for an adequate review of this proposal. Although a proposed implementation timetable has been included in Maryland's latest proposal, cooperative arrangements with jurisdictions proposing a heavy-duty retrofit program have not been indicated. EPA, however, encourages Maryland's intended efforts in this direction.

EPA proposes retrofit of pre-1968 light-duty vehicles with approved Vacuum Spark Advance Disconnect (VSAD) devices and of certain 1968–1975 light-duty vehicles with oxidizing catalyst devices. The VSAD device is expected to reduce hydrocarbon emissions by 20 percent per vehicle and carbon monoxide emissions by 9 percent per vehicle. The oxidizing catalyst device is expected to reduce both hydrocarbon and carbon monoxide emissions by 50 percent per vehicle. Only those cars of 1968–1975 model years which run on gasoline with a research octane number (RON) of 91 can be fitted with this device because of technical constraints. In addition, this gasoline must be unleaded. Exemptions will be allowed for all 1975 model year vehicles originally equipped with the oxidizing catalytic converter, or those vehicles which are certified to meet the original statutory Federal emission standards for 1975. National estimates indicate that approximately 20 percent of the 1968–1970 model year vehicles and 75 percent of the 1971–1975 model year vehicles would be retrofitted under this proposal.

Summary of Effects

The estimated combined effect of the State transportation control measures approved by EPA and Federally proposed regulation are presented in the following table.

Federally proposed regulations are intended to strengthen, supplement, and expand, not wholly replace, State transportation control measures approved by EPA.

Compilation of Control Strategy Effects for the Metropolitan Baltimore Intrastate Air Quality Control Region on May 31, 1977

	Carbon Monoxide		Hydrocarbons	
	Tons per Year	Percent of Total Reduction Required	Tons per Peak Period (6–9 am)	Percent of Total Reduction Required
Stationary Source Emissions Without Control Strategy	103,000		13.4	
Expected Reduction:				
a) Current Regulations (1)	−5,575	−4.4%	1.5	6.5%
b) Gasoline Handling Vapor Recovery (2)	0	0	1.8	8.1%
c) Other Stationary Source (1)	500	0.4%	0.5	2.4%
Rule Strengthening				
Stationary Source Emissions Remaining	108,075		9.6	
Mobile Emissions from Highway Light- and Heavy-Duty Vehicles without Control Strategy (Credit taken for FMVCP)	242,100		26.3	
Expected Reduction:				
a) Inspection and Maintenence (2)	15,500	12.2%	2.1	9.4%
b) Mass Transit Improvements (2)	20,400	16.0%	1.8	8.1%
c) VSAD Retrofit pre-1968 LDV (3)	1,400	1.1%	0.3	1.3%
d) LDV Catalytte Retrofit 1968–1975 (3)	33,000	25.9%	2.9	12.9%
e) Gasoline Distribution Limitation (3)	103,200	81.1%	11.5	51.3%
Mobile Emissions Remaining	68,600		7.7	
Total Emissions without Strategy	345,100		39.7	
Total Reduction	168,425	132%	22.4	100%
Total Emissions Remaining	176,675		17.3	
Total Reduction Required	127,300		22.4	

(1) Approved State strategy.
(2) State strategies modified by EPA.
(3) EPA proposed strategy.

Implementation Procedures

Implementation of the strategies provided for by the regulations proposed herein is the key to the success of the air quality improvement program for the Metropolitan Baltimore Intrastate Region. Therefore, the proposed regulations also provide for the development of any necessary administrative procedures; schedules of compliance by sources; and surveillance, monitoring, and enforcement activities.

In all cases where VMT reduction measures are being proposed by regulations, the State or city will be required to take steps to accomplish the intended result. If this is not done, penalties for violation of the Clean Air Act may be assessed. It is EPA's position that it may require States or cities to enforce regulations that are related to their position as owners of roads. As owners of roads, States and cities may be held directly responsible for the pollution caused by those roads and by the traffic which the roads make possible, and they may be required to take such steps as are necessary to ensure that the roads and the activities carried out on them cease to cause violations of air quality standards. Regulations have accordingly been drafted to impose enforcement responsibility on the States or cities only where the activity being regulated was, in the judgment of EPA, closely enough related to the government's position as owner of the roads to justify the imposition of responsibility under this theory.

Economic and Social Impact

The social and economic consequences of the majority of the measures included in the Maryland plan or proposed herein are considered reasonable. For example, the inspection and maintenance procedures will require expenses of approximately $10 annually for the average vehicle inspected. The implementation of the VSAD retrofit program of pre-1968 vehicles will require that individual motorists pay approximately $20 installation costs. Distributed costs of the various Maryland proposed mass transportation and fuel-handling improvement measures, as well as those supplemental strategies proposed by EPA providing incentives for the use of express buses and carpools and disincentives on the use of automobiles by individual motorist-commuters, are also considered reasonable. In addition, these measures are expected to benefit the public from the standpoint of improved traffic flow for commuters, general urban mobility, and a decrease in energy consumption.

On the other hand, while the collective benefits to be derived from the catalytic converter retrofit program are significant, the average price to the individual motorist is $135 per vehicle. However, the cost of this proposal could be ameliorated by the imposition of a state financed retrofit program which would spread the cost over the entire vehicle population. Such a program might be financed through a gasoline tax or vehicle registration fee.

The most stringent proposal would require in 1977 a gasoline sales reduction of 59.5 percent from base year levels. This would affect nearly every economic and social activity in the Metropolitan Baltimore Intrastate Region. It is not possible at this time to calculate the economic and social cost to the community of this proposal. However, it must be recognized that under the requirements of the Clean Air Act, the Administrator must help provide for attainment of air quality standards as expeditiously as practicable. It is for this reason that the Administrator solicits suggestions on all possible measures which will ease the burden of the more severe strategies considered. The Administrator recognizes that there are significant positive aspects to VMT reductions. These VMT reductions may well lessen the need for currently envisioned urban interstate highways. Many experts believe that the sprawling development patterns fostered by widespread automobile use are unduly wasteful of energy, land, and other resources, and have contributed to the decay of urban centers. Widespread use of other modes of transportation will be necessary if these adverse tendencies are to be corrected.

Greater use of mass transit and car pooling may well stimulate the switch to a 4-day week by major industries. This, in turn, may result in further reductions in VMT and/or total emissions, at least in the CBD. Gasoline limitation measures would stimulate the need for additional mass transit and/or car pooling, thus resulting in further reductions of the total emissions.

In summary, the Agency has responded to the order of the United States Court of Appeals for the District of Columbia Circuit and proposes a plan to attain and maintain air quality standards in the Metropolitan Baltimore Intrastate Region by May 31, 1977. In this proposed plan for attainment of standards by May 31, 1977, the Agency proposes to grant the maximum extension allowed by law. Even with this extension, the plan would result in social and economic consequences which must be considered severe. The public hearing scheduled on these proposals should focus not only on the reasonableness or unreasonableness of the proposed plan, but also on what steps can be taken to clean up the air and maintain air quality standards beyond 1977.

Mass Transportation

Improvements and expansion of the existing mass transportation facilities in the Baltimore Metropolitan area (the so-called Baltimore Metropolitan Area Transportation Study Area—BMATS) are integral to the proposed reduction in VMT obtained as a result of disincentives and restraints on the personal use of automobiles primarily within the BMATS area.

Since mid-1971, all transit functions in Baltimore City have been the responsibility of the Mass Transit Administration (MTA) of the Maryland Department of Transportation. The Baltimore Transit Company had been purchased in 1970 by the predecessor agency, the Metropolitan Transit Authority. MTA is responsible for planning, programming and implementing mass transit services in the Metropolitan Transit District, which is comprised of Baltimore City, Baltimore County, and Anne Arundel County. MTA has taken over four suburban transit companies. Thus, the entire metropolitan transit system is State owned and operated.

In addition to bus transit, MTA is planning and developing a regional rail rapid transit system in coordination with the Regional Planning Council. The Urban Mass Transportation Administration (UMTA) has recently granted $22.5 million to help finance construction of the first phase of the system. The local one-third of funds will come from the Maryland Department of Transportation.

There are few apparent legal or institutional obstacles to improved transit services, or even reduced transit fares at the State level. Local policy is one of support for public transit. There is a question of economic policy, however, related to the mandate of MTA to support all costs incurred for construction, acquisition, operation, and maintenance of transit facilities "as far as practicable" from the fare box and Federal funding grants. Presently no funds are available from Federal sources to subsidize operating losses; therefore, it would be necessary for the State to review policy related to operating losses caused by new services or reduced fares.

Present planning calls for many transit service improvements, including acquisition of at least 100 new buses in 1973. An application to UMTA to support this plan was submitted in January. The transit technical study (T9–5) is in the review stages, but it may be expected to recommend further service improvements.

Expanded mass transit facilities are essential to the success of any air pollution control strategy for the Metropolitan Baltimore area. The Administrator, therefore, encourages transit expansion in this area, and he will provide all possible support to efforts by Federal, State, local governmental, and private groups to expand the mass transit facilities.

Public Comments Solicited

Although the Administrator has concluded that the proposed plan is the best approach available to him at the present time for achieving compliance with the requirements of the Act, further analysis may demonstrate that more appropriate options are available. He therefore desires to obtain the comments and suggestions of the public on the problems of achieving the ambient air quality standards in the Metropolitan Baltimore Intrastate Region. Comments are particularly invited pertaining to measures that may be taken by Federal, State, or local authorities to support or supplement the proposed air pollution control measures to implement these measures, and to compare social and economic effects of alternative pollution control measures.

Public hearings will be held in Baltimore on September 5, 1973, at 10:00 a.m. in the Carroll Room, Baltimore Hilton Hotel, 101 West Fayette Street. Further notice of these hearings, including locations where EPA proposals can be inspected, will be published in the Baltimore area.

The Administrator's final promulgation of transportation controls for the Metropolitan Baltimore area will consider the comments and testimony he receives, as well as any additional approvable strategies submitted by the State before or at the hearing as part of the State plan. These influences, and the additional analysis of alternative strategies that can be made in the time between this proposal and final promulga-

V 38 148
AUG 2 73
XUM

tion, may lead the Administrator to adopt final regulations that differ in significant ways from this proposal.

SUBMITTAL OF WRITTEN COMMENTS

Interested persons may participate in this rule making by submitting written comments, preferably in triplicate, to the Regional Administrator, EPA Region III, Curtis Building, 6th and Walnut Streets, Philadelphia, Pennsylvania 19106. All relevant comments received not later than September 4, 1973 will be considered. Receipt of comments will be acknowledged, but substantive responses to individual comments will not be provided. Comments received will be available for public inspection during normal business hours at the EPA Region III Office, and at locations to be announced in the Baltimore area. This notice of proposed rule making is issued under the authority of section 110(c) and 301(a) of the Clean Air Act (42 U.S.C. 1857 et seq.).

EPA STUDIES AND GUIDELINES

Further information on transportation control, land use, and motor vehicle emissions may be obtained from one or more of the following documents which the Environmental Protection Agency has published:

1. "Prediction of the Effects of Transportation Controls on Air Quality in Major Metropolitan Areas" and "Evaluating Controls to Reduce Motor Vehicle Emissions in Major Metropolitan Areas," November 1972. Both of these documents are generally known as the "Six Cities Study."
2. "Transportation Controls to Reduce Motor Vehicle Emissions in Major Metropolitan Areas," December 1972. This document is a summary of a study of 14 cities conducted with the view of recommending specific transportation control strategies. (Separate reports for each of the 14 cities are also available.) The documents listed in 1 and 2 above are available from the Air Pollution Technical Information Center, EPA, Research Triangle Park, North Carolina 27711.
3. "Control Strategies for In-Use Vehicles," November 1972. This report is available from EPA, Mobile Source Pollution Control Programs, 401 M Street, SW., Washington, D.C. 20460.
4. "Transportation Control Measures," *Federal Register* (38 FR 15194), June 8, 1973.
5. "Transportation Controls to Reduce Motor Vehicle Emissions in Baltimore, Maryland," APTD–1443 (December 1972), available from EPA, Office of Air and Water Programs, Research Triangle Park, North Carolina 27711.

(42 U.S.C. 1857 et seq.)

Dated: July 24, 1973.

ROBERT W. FRI,
Acting Administrator.

It is proposed to amend Part 52 of Chapter 1 of Title 40 of the Code of Federal Regulations by adding the following:

Subpart V—Maryland

§ 52.1085 Inspection and maintenance.

(a) Definitions:

(1) "Inspection and maintenance program" means a program to reduce emissions from in-use vehicle by identifying vehicles which need emission-control-related maintenance and requiring that maintenance be performed.

(2) "Precontrolled vehicles" means light-duty vehicles sold nationally (except California) prior to the 1968 model year and light-duty vehicles sold in California prior to the 1966 model year.

(3) "Controlled vehicles" means light-duty vehicles sold nationally (except California) in the 1968 model year and later and light-duty vehicles sold in California in the 1966 model year and later.

(4) "Loaded emissions test" means a sampling procedure for exhaust emissions which requires testing the engine under stress (i.e., loading) by use of a chassis dynamometer to simulate actual driving conditions. As a minimum requirement, the loaded emission test must include running the vehicle and measuring exhaust emissions at two speeds and loads other than idle.

(5) "Idle emission test" means a sampling procedure for exhaust emissions which requires operation of the engine in the idle mode only. At a minimum, the idle test must consist of the following procedures carried out on a fully warmed-up engine: a verification that the idle RPM is within manufacturer's specified limits and a measurement of the exhaust carbon monoxide and/or hydrocarbon concentrations during the period of time from 15 to 25 seconds after the engine was used to move the car or was run at 2000 to 2500 RPM with no load for 2 to 3 seconds.

(6) "Retrofit" means the addition or removal of an item of equipment, or a required adjustment, connection, or disconnection of an existing item of equipment, for the purpose of reducing emissions.

(7) "Idle adjustment" means a series of adjustments which include RPM, idle air/fuel ratio and basic timing.

(8) "Initial failure rate" means the percentage of vehicles rejected because of excessive emissions of a single pollutant during the first inspection cycle of an inspection/maintenance program. (If inspection is conducted for more than one pollutant, the total failure rate may be higher than the failure rates for each single pollutant.)

(b) This regulation is applicable within the geographical confines of the State of Maryland.

(c) The State of Maryland shall submit to the Administrator of EPA or his designee, no later than January 1, 1974, a detailed compliance schedule showing the steps that will be taken to establish and enforce an inspection and maintenance program pursuant to paragraph (d) of this section.

The compliance schedule shall include:

(1) The text of any necessary statutory proposals and regulations that are needed to carry out the inspection/maintenance system.

(2) A detailed timetable describing the steps that must be taken and when these steps will be taken to ensure the timely submittal of the needed legislation to the legislature and to ensure timely adoption of the regulations needed for paragraph (d) of this section.

(3) A detailed timetable describing the dates of ordering and of acquisition of necessary equipment.

(4) A signed statement by the chief executive or his designee identifying the sources and amounts of funding for the inspection/maintenance program and a timetable to ensure that proper funding levels are available. If funds cannot legally be obligated under existing statutory authority, the text of the needed legislation shall be submitted to the Administrator of the Environmental Protection Agency or his designee pursuant to paragraph (c)(1) of this section.

(d) The State of Maryland shall establish an inspection and maintenance program applicable to all light-duty gasoline-powered vehicles registered within its confines. No later than March 1, 1974, the State of Maryland shall submit to the Environmental Protection Agency legally adopted regulations establishing such a program. The regulations shall include:

(1) Provisions for the inspection of all gasoline-powered light-duty vehicles at periodic intervals of no more than one year by means of a loaded (dynamometer) test.

(2) Provisions for inspection failure criteria consistent with the emission reduction claimed in the plan for the strategy. These criteria shall include an initial failure rate of 30 percent (see definitions).

(3) Provisions to ensure that failed vehicles receive the maintenance necessary to achieve compliance with the inspection standards. This shall include sanctions against individual owners and repair facilities, retest of failed vehicles following maintenance, a certification program to ensure that repair facilities performing the required maintenance have the necessary equipment, parts and knowledge to perform the tasks satisfactorily, and such other measures as may be necessary or appropriate.

(4) A program of enforcement to ensure that vehicles are not intentionally readjusted or modified subsequent to the inspection and/or maintenance in such a way as would cause them to no longer comply with the inspection standards. This might include spot checks of idle adjustments and/or a suitable type of physical tagging.

(5) Delineation of the agency or agencies responsible for conducting, overseeing and enforcing the inspection and maintenance program.

(6) Provisions for beginning the first inspection cycle by August 1, 1975, and completing it by July 31, 1976.

(e) After July 31, 1976, the State of Maryland shall not register nor allow to operate on its streets or highways vehicles which fall within this regulation and have not complied with the applicable standards and procedures of paragraph (d) of this section. This shall not apply to the initial registration of a new motor vehicle.

(f) After July 31, 1976, no owner of a vehicle which is affected by this regulation shall operate or allow to be operated a vehicle which does not comply with the applicable standards and procedures of paragraph (d) of this section. This shall not apply to the initial registration of a new motor vehicle.

§ 52.1086 Bus/carpool computer matching system.

(a) Definitions:

(1) "Bus/carpool matching" means assembling lists of commuters sharing similar travel needs. The number of commuters on each list identifies potential bus/carpools.

(2) "Time-origin-destination (TOD) information" means information that identifies a commuter's work schedule, home and work location.

(3) All other terms used in this section which are defined in 40 CFR Part 51, Appendix N, are used herein with the meanings so defined.

(b) This section is applicable in the Metropolitan Baltimore Intrastate Air Quality Control Region (hereafter referred to as the Region).

(c) Beginning March 1, 1974, the State of Maryland shall establish a computer-aided bus/carpool matching system which is conveniently available to all employees in businesses having more than 10 employees within the Region who operate light-duty vehicles on streets or highways over which it has ownership or control. No later than December 1, 1973, the State shall submit legally adopted regulations to the EPA establishing such a system. The regulations shall include:

(1) A method of collecting information which will include the following as a minimum:

(i) Provisions for each affected employee to receive an application form with a cover letter describing the matching program.

(ii) Provisions on each application for applicant identification of time, origin, and destination, and the applicant's desire to drive only, ride only, or share driving.

(2) A computer method of matching information that will have provisions for locating each applicant's origin and destination within a grid system in the urban area and suburban region surrounding it and matching applicants with identical origin and destination grids and compatible work schedules.

(3) A method for providing continuing service such that the master list of all applicants is retained and available for use by new applicants; applications are currently available; and the master list is periodically updated to remove applicants who have moved from the area served.

(4) An agency or agencies responsible for operating, overseeing and maintaining the bus/carpool computer matching system.

(d) Failure to comply with any provisions of this section shall render the person so failing to comply in violation of a requirement of an applicable implementation plan and subject to enforcement under section 113 of the Clean Air Act.

§ 52.1087 Management of parking supply.

(a) Definitions:

(1) "Construction" means fabrication, erection, or installation of a parking facility, or any conversion of land for use as a facility.

(2) "Modification" means any change to a parking facility which increases the vehicle capacity of such facility.

(3) "Enlargement" means any physical change or addition to a parking facility which increases the vehicle capacity of such facility.

(4) "Commenced" means that an owner or operator has undertaken a continuous program of construction, modification, or enlargement.

(5) "Parking facility" (also called "facility") means any facility, building, structure, or lot, or portion thereof used primarily for temporary storage of motor vehicles.

(b) This regulation is applicable in the Metropolitan Baltimore Intrastate Air Quality Control Region.

(c) No person, after August 15, 1973, shall commence construction of any new parking facility or modification or enlargement of any existing parking facility until he has first received from the Administrator or from an agency approved by the Administrator a permit stating that construction, modification, or enlargement of such facility will not interfere with the attainment or maintenance of applicable Federal air quality standards.

(d) In order for any agency to be approved by the Administrator for purposes of issuing permits for construction of any new parking facility or any modification or enlargement of any existing parking facility, such agency shall demonstrate to the satisfaction of the Administrator that:

(1) Requirements for permit applications and issuance have been established. Such requirements shall include, but not be limited to, a condition that before a permit may be issued the following findings of fact or factually supported projections must be made:

(i) The location of the facility.

(ii) The total motor vehicle capacity before and after the construction, modification, or enlargement of the facility.

(iii) The normal hours of operation of the facility and the enterprises and activities which it serves.

(iv) The number of people using or engaging in any enterprises or activities which the proposed facility will serve.

(v) The number of motor vehicles using the proposed facility on an average hourly basis and a peak hour basis.

(vi) A projection of the geographic areas in the community from which people and motor vehicles will be drawn to the facility. Such projections shall include data concerning the availability of public transit from such areas.

(2) Criteria for issuance of permits have been established and published. Such criteria shall include but not be limited to:

(i) Full consideration of all facts contained in the application.

(ii) Provisions that no permit shall be issued if such permit will result in the increase of vehicle miles of travel within any area the air quality of which fails to meet applicable Federal air quality standards.

(3) Agency procedures provide that no permit for the construction, enlargement, or modification of a facility covered by this section shall be issued without notice and opportunity for public hearing. The public hearing may be of the legislative type; the notice shall conform to the requirements of 40 CFR 51.4(b); and the agency rules of procedure may provide that if no notice of intent to participate in the hearing is received from any member of the public (other than the applicant) prior to 7 days before the scheduled hearing date, no hearing need be held. If notice of intent to participate is required, that fact shall be noted prominently in the required notice of hearing.

§ 52.1088 Limitation of public parking.

(a) The term "on-street parking" means leaving a vehicle on a street or sidewalk and also includes stopping for any purpose other than the momentary and immediate pickup or discharge of passengers. A prohibition of "on-street parking" under this section includes a prohibition against stopping for the purpose of effecting any delivery of goods.

(b) The following provisions apply to all areas within the City of Baltimore and the counties of Baltimore, Howard, and Anne Arundel, which are in the Metropolitan Baltimore Intrastate Air Quality Control Region.

(c) On-street parking limitations:

(1) Beginning January 1, 1974, the City of Baltimore and all municipalities in the counties described above shall prohibit on-street parking, Monday through Saturday, on all streets and highways over which they have ownership or control and which contain express bus/carpool lanes. The prohibition against "on-street parking" on any particular street or highway shall be only for the period during which the particular street or highway has a lane or lanes reserved for buses, carpools, or buses and carpools. The prohibition shall state that vehicles parked in violation of the prohibition shall be towed away, or the owner shall be subject to a fine of up to $100 per violation, or both, depending on the circumstances of the violation.

(2) Beginning January 1, 1974, the counties of Baltimore, Howard, and Anne Arundel shall prohibit on-street parking, Monday through Saturday, on all streets and highways over which they have ownership or control and which contain bus/carpool lanes. The prohibition against "on-street parking" on any particular street or highway shall be only for the period during which the particular street or highway has a lane or lanes reserved for buses, carpools, or buses and carpools. The prohibition shall state that vehicles parked in violation shall be towed away, or the owner shall be subject to a fine of up to $100 per violation, or both, depending on the circumstances of the violation.

V 38-148
AUG 2 73
XUM

(3) Beginning on January 1, 1974, the State of Maryland shall prohibit on-street parking, Monday through Saturday, on streets and highways over which it has ownership or control and which contain express bus/carpool lanes. The prohibition against "on-street parking" on any particular street or highway shall be only for the period during which the particular street or highway has a lane or lanes reserved for buses, carpools, or buses and carpools. The prohibition shall state that vehicles parked in violation of the prohibition shall be towed away, or the owner shall be subject to a fine of up to $100 for violation, or both, depending on the circumstances of the violation.

(d) Failure to comply with any provision of this section shall render the person so failing to comply in violation of a requirement of an applicable implementation plan, and subject to enforcement under section 113 of the Clean Air Act.

§ 52.1089 Preferential bus/carpool treatment.

(a) Definitions:

(1) "Carpool" means a vehicle containing three or more persons.

(2) "Bus/carpool lane" means a lane or a street or highway open only to buses (or buses and carpools), whether constructed specially for that purpose or converted from existing lanes.

(3) "CBD" is defined as the area bounded by Centre Street, Fallsway, Falls Avenue, Pratt Street, Greene Street, Franklin Street and Eutaw Street in Baltimore City.

(4) "Major street or highway" means any street or highway which meets the criteria given in paragraphs (b)(4)(ii) and (iii) of this section.

(b) The following provisions apply to all areas within the City of Baltimore and the counties of Baltimore, Howard, and Anne Arundel.

(1) The City of Baltimore and all municipalities in counties described above shall establish bus/carpool lanes on the major streets and highways over which they have ownership or control according to the schedule in paragraph (b)(4)(v) of this section.

(2) Baltimore, Howard, and Anne Arundel counties shall establish bus/carpool lanes on the major streets and highways over which they have ownership or control, according to the schedule in paragraph (b)(4)(v) of this section.

(3) The State of Maryland shall establish bus/carpool lanes on the major streets and highways over which it has ownership or control, according to the schedule in paragraph (b)(4)(v) of this section.

(4) Each of the governmental entities named in the previous three subparagraphs of this paragraph shall submit, no later than January 1, 1974, a detailed compliance schedule showing the steps which it will take to establish these bus/carpool lanes and to enforce the limitations on their use, with each schedule to include the following:

(i) Each street and highway which will have bus/carpool lanes must be identified with a schedule for the establishment of the lanes.

(ii) If a street or highway has four or more traffic lanes in one direction, at least one of these lanes must be open only to buses (or buses and carpools) from 6:30 a.m. to 9:30 a.m. and from 3:30 p.m. to 6:30 p.m.

(iii) If a street or highway has three lanes in one direction, at least one of these lanes must be open only to buses (or buses and carpools) from 6:30 a.m. to 9:30 a.m. and from 3:30 p.m. to 6:30 p.m.

(iv) In unusual situations, a street or highway, or segment thereof, may be exempt from these requirements if an approval of the exemption is obtained from the Administrator. The application for exemption shall not be submitted and will not accepted after November 15, 1973. Special circumstances justifying the need for an exemption (such as inappropriateness of use by buses, designation of bicycle lanes instead, or desire to allow bus/carpool lanes to be entered briefly by other vehicles for the purpose of crossing a lane or making a right turn) must be given in detail with the application.

(v) Bus/carpool lanes must be prominently indicated by overhead signs at least once every mile, and at each intersection or entry ramp. Of the lane mileage for each of the governmental entities, 25 percent must be established and needed signs must be installed by March 1, 1974; 50 percent by June 1, 1974; and 75 percent by September 1, 1974; and 100 percent by December 1, 1974.

(vi) Bus/carpool lanes must be prominently indicated by distinctive painted lines pylons, or physical barriers.

(vii) Between 7:00 a.m. and 6:30 p.m., the right two lanes of each one-way street in the CBD having four or more lanes shall be bus/carpool lanes.

(viii) Between 7:00 a.m. and 6:30 p.m., the right lanes of each one-way street in the CBD having three lanes shall be a bus/carpool lane.

(ix) In unusual situations, the requirements of paragraph (b)(4)(iv) of this section shall apply.

(5) Buses shall have the right-of-way whenever changing lanes on streets and highways with bus lanes. This shall take effect as each lane is established and identified.

(6) Buses shall be permitted to make left turns whether or not the intersection is posted for "No Left Turn" (except when a one-way street would be entered from the wrong direction). This shall take effect January 1, 1974.

(7) None of the governmental entities named in paragraphs (b)(1), (b)(2) and (b)(3) of this section shall convert existing on-street parking spaces to traffic lanes unless the effect will be to increase the number of bus/carpool lanes on the affected street beyond the number otherwise required by paragraph (b) of this section or unless the effect will be to create a bicycle lane in place of the parking spaces. Exemptions from the requirements of this paragraph (b)(7) of this section may be sought by application in the manner and subject to the requirements provided for by paragraph (b)(4)(iv) of this section. Requests for exceptions pursuant to this subparagraph along streets or highways on which existing parking lanes will be automatically eliminated by the institution of parking limitations pursuant to § 52.1088 of this Chapter shall be submitted to the EPA no later than November 15, 1973. In all other cases, requests for exceptions must be made and approved before a parking lane can be converted to a traffic lane other than bicycle or bus/carpool lanes.

(8) A signed statement by the chief executive of each governmental entity or his designee shall be submitted to the EPA on January 1, 1974, to identify the sources and amount of funds for all projects.

(c) Failure to comply with any provisions of this section shall render the person so failing to comply in violation of a requirement of an applicable implementation plan and subject to enforcement under section 113 of the Clean Air Act. A State of other governmental entity will be considered to have failed to comply with the requirements of this section if it fails to timely submit any required compliance schedule, or if the compliance schedule when submitted does not contain in satisfactory form each of the elements it is required to contain.

§ 52.1090 Control of evaporative losses from the filling of vehicular tanks.

(a) The term "gasoline" means any petroleum distillate having a Reid vapor pressure of 4 pounds or greater.

(b) This section is applicable in the Metropolitan Baltimore Intrastate Air Quality Control Region.

(c) A person shall not transfer gasoline to an automotive fuel tank from gasoline-dispensing systems unless the transfer is made through a fill nozzle designed to:

(1) Effect a vapor-tight fit between the fill nozzle and filler neck of the automotive fuel tank so as to prevent discharge of hydrocarbon vapors to the atmosphere.

(2) Direct vapor displaced from the automotive fuel tank to a system wherein at least 90 percent by weight of the organic compounds in displaced vapors are recovered.

(3) Prevent automotive fuel tank overfills or spillage on fill nozzle disconnect.

(d) The system referred to in paragraph (c) of this section can consist of a vapor-tight vapor return line from the fill nozzle filler neck interface to the dispensing tank or to an adsorption, absorption, incineration, or refrigeration-condensation system or equivalent.

(e) Components of the systems required by § 52.1091(c) can be used for compliance with paragraph (c) of this section.

(f) If demonstrated to the satisfaction of the Administrator that it is impractical to comply with the provisions

of paragraph (c) of this section as a result of fill neck configuration, location, or other design features, the provisions of this paragraph shall not apply to tanks on vehicles existing at the time of promulgation of this regulation.

(g) The State of Maryland shall divide all facilities subject to this section into two classes, each of which taken as a whole emit approximately equal amounts of hydrocarbon materials. The classes shall be known as Class I and Class II.

(h) Except as provided in paragraph (j) of this section, the owner or operator of a source included in Class I shall comply with the increments contained in the following compliance schedule:

(1) Contracts for emission control systems or process modifications must be awarded or orders must be issued for the purchase of component parts to accomplish emission control or process modification not later than March 31, 1974.

(2) Initiation of onsite construction or installation of emission control equipment or process change must begin not later than July 31, 1974.

(3) Onsite construction or installation of emission control equipment or process modification must be completed not later than March 31, 1975.

(4) Final compliance is to be achieved not later than May 31, 1975.

(5) Any owner or operator of stationary sources subject to the compliance schedule in this paragraph shall certify to the Administrator, within 5 days after the deadline for each increment of progress, whether or not the required increment of progress has been met.

(i) The owner or operator of a source included in Class II shall comply with the increments contained in the following compliance schedule:

(1) Contracts for emission control systems or process modifications must be awarded or orders must be issued for the purchase of component parts to accomplish emission control or process modification not later than March 31, 1975.

(2) Initiation of onsite construction or installation of emission control equipment or process change must begin not later than July 31, 1975.

(3) Onsite construction or installation of emission control equipment or process modification must be completed not later than March 31, 1976.

(4) Final compliance is to be achieved not later than May 31, 1976.

(5) Any owner or operator of stationary sources subject to the compliance schedule in this paragraph shall certify to the Administrator, within 5 days after the deadline for each increment of progress, whether or not the required increment of progress has been met.

(j) Paragraphs (h) and (i) of this section shall not apply:

(1) To a source which is presently in compliance with paragraph (c) of this section and which has certified such compliance with paragraph (c) of this section and which has certified such compliance to the Administrator by November 15, 1973. The Administrator may request whatever information he considers necessary for proper certification.

(2) To a source for which a compliance schedule is adopted by the State and approved by the Administrator.

(3) To a source whose owner or operator submits to the Administrator, by November 15, 1973, a proposed alternative schedule. No such schedule may provide for compliance after May 31, 1975, in the case of Class I sources, and May 31, 1976, in the case of Class II sources. If promulgated by the Administrator, such schedule shall satisfy the requirements of this paragraph for the affected source.

(k) Nothing in this section shall preclude the Administrator from promulgating a separate schedule for any source to which the application of the compliance schedule in paragraph (b) of this section fails to satisfy the requirements of § 51.15(b) and (c) of this Chapter.

§ 52.1091 Gasoline transfer vapor control.

(a) The term "gasoline" means any petroleum distillate having a Reid vapor pressure of 4 pounds or greater.

(b) This section is applicable in the Metropolitan Baltimore Intrastate Air Quality Control Region.

(c) No person shall transfer gasoline from any delivery vessel into any stationary storage container with a capacity greater than 250 gallons unless such container is equipped with a submerged fill pipe and unless the displaced vapors from the storage container are processed by a system that prevents release to the atmosphere of no less than 90 percent by weight of organic compounds in said vapors displaced from the stationary container location.

(1) The vapor recovery portion of the system shall include one or more of the following:

(i) A vapor-tight vapor return line from the storage container to the delivery vessel and a device that will ensure that the vapor return line is connected before gasoline can be transferred into the container.

(ii) Refrigeration-condensation system or equivalent designed to recover no less than 90 percent by weight of the organic compounds in the displaced vapor.

(2) The vapor-laden delivery vessel shall be subject to the following conditions:

(i) The delivery vessel must be so designed and maintained as to be vapor-tight at all times.

(ii) The vapor-laden delivery vessel may be refilled only at facilities equipped with a vapor recovery system or the equivalent, which can recover at least 90 percent by weight of the organic compounds in the vapors displaced from the delivery vessel during refilling.

(d) The provisions of paragraph (c) of this section shall not apply to the transfer made to storage tanks equipped with floating roofs or their equivalent.

(e) *Compliance schedule.* Except as provided in paragraph (f) of this section, the owner or operator of any source subject to this section shall comply with this section on or before January 31, 1974.

(1) Any owner or operator in compliance with this section on the effective date of this regulation shall certify such compliance to the Administrator no later than 120 days following the effective date of this section.

(2) Any owner or operator who achieves compliance with this section after the effective date of this section shall certify such compliance to the Administrator within 5 days of the date compliance is achieved.

(f) Any owner or operator of a source subject to paragraph (e) of this section may, not later than 120 days following the effective date of this section, submit to the Administrator for approval a proposed compliance schedule that demonstrates compliance with the provisions specified in paragraph (e) of this section as expeditiously as practicable but no later than June 30, 1975. The compliance schedule shall provide for increments of progress toward compliance. The dates for achievement of such increments of progress shall be specified. Increments of progress shall include, but not be limited to: submittal of final control plan to the Administrator; letting of necessary contracts for construction or process changes or issuance of orders for the purchase of component parts to accomplish emission control or process modification; initiation of onsite construction or installation of emission control equipment or process modification; completion of onsite construction or installation of emission control equipment or process modification; and final compliance.

(g) Any owner or operator who submits a compliance schedule pursuant to this paragraph shall, within 5 days after the deadline for each increment of progress, certify to the Administrator whether or not the required increment of the approved compliance schedule has been met.

§ 52.1092 Oxidizing catalyst retrofit.

(a) Definitions:

(1) "Oxidizing catalyst" means a device installed in the exhaust system of the vehicle that utilizes a catalyst and, if necessary, an air pump to reduce emissions of hydrocarbons and carbon monoxide from that vehicle.

(2) All other terms used in this section which are defined in 40 CFR Part 51, Appendix N, are used herein with the meanings so defined.

(b) This section is applicable in the Metropolitan Baltimore Intrastate Air Quality Control Region.

(c) The State of Maryland shall establish a retrofit program to ensure that on or before May 31, 1977, certain gasoline-powered light-duty motor vehicles of model years 1968 through 1975, which are or would be subject under presently existing legal requirements to registration in the area defined in paragraph (b) of this section, are equipped with an appropriate oxidizing catalyst retrofit device. No later than March 1, 1974, the

V 38 148 AUG 2 73 XUM

State shall submit legally adopted regulations to EPA establishing such a program. The regulations shall include:

(1) Designation of an agency responsible for evaluating and approving such devices for use on motor vehicles subject to this section.

(2) Designation of an agency responsible for ensuring that the provisions of paragraph (c)(3) of this section are enforced.

(3) A provision that starting no later than May 31, 1976, the State of Maryland shall commence retrofitting oxidizing catalysts to those light-duty motor vehicles able to operate properly on unleaded 91 RON gasoline. The installation shall be completed by May 31, 1977.

(4) A method and proposed procedures for ensuring that those installing the retrofits have the training and ability to perform the known needed tasks satisfactorily and that they will have an adequate supply of retrofit components.

(d) After May 31, 1977, the State shall not register or allow to operate on public streets or highways any light-duty gasoline-powered vehicle which does not comply with the applicable standards, procedures, and regulations adopted pursuant to paragraph (c) of this section.

(e) After May 31, 1977, no owner of a vehicle subject to this section shall operate or allow the operation of any such vehicle which does not comply with the applicable standards, procedures and regulations implementing this section.

(f) The State of Maryland shall submit, no later than January 1, 1974, a detailed compliance schedule showing the steps it will take to establish and enforce a retrofit program pursuant to paragraph (c) of this section and the text of needed statutory proposals and needed regulations which it will propose for adoption. The compliance schedule shall include a date by which the State shall evaluate and approve devices for use in this program. Such date shall be no later than September 30, 1975.

(g) Failure to comply with any provisions of this section shall render the person so failing to comply in violation of a requirement of an applicable implementation plan and subject to enforcement under section 113 of the Clean Air Act. A State will be considered to have failed to comply with the requirements of this regulation if it fails to submit on time the required compliance schedule, or if the compliance schedule when submitted does not contain in satisfactory form each of the elements it is required to contain.

§ 52.1093 Vacuum spark advance disconnect.

(a) For purposes of this section, "vacuum spark advance disconnect" means a device or system installed on the vehicle which prevents the ignition vacuum advance from operating either when the vehicle's transmission is in the lower gears or when the vehicle is traveling below a predetermined speed.

(b) This section is applicable in the Metropolitan Baltimore Intrastate Air Quality Control Region.

(c) On or before January 1, 1975, all gasoline-powered light-duty vehicles of model year prior to 1968 and subject under presently existing legal requirements to registration in the area described in paragraph (b) of this section shall be equipped with an appropriate vacuum spark advance disconnect device.

(d) The State of Maryland shall submit, no later than January 1, 1974, a detailed compliance schedule showing the steps it will take to implement and enforce this requirement. Such schedule shall include, as a minimum, the following:

(1) A date by which the State will evaluate and approve devices for use in this program. Such date shall be not later than March 1, 1974.

(2) A date by which installation of this equipment shall commence. Such date shall be no later than June 1, 1974.

(3) A date by which all vehicles subject to this section will be equipped with such devices. Such date shall be no later than January 1, 1975.

(4) Designation of any agency or agencies responsible for evaluating and approving such devices for use on vehicles subject to this section.

(5) Designation of an agency or agencies responsible for ensuring that the prohibitions of paragraph (e)(2) of this section enforced.

(6) Method and proposed procedures for ensuring that those persons installing the devices have the training and ability to perform the needed tasks satisfactorily and that an adequate supply of devices will be available.

(7) Provision (apart from the requirements of any program for periodic inspection and maintenance of vehicles generally) for emission testing at the time of device installation or some other positive assurance that the device is installed and operating correctly.

(e) After January 1, 1975, the following shall apply within the Metropolitan Baltimore Intrastate Air Quality Control Region:

(1) The State shall not register a vehicle subject to this paragraph which is not equipped in accordance with paragraph (c) of this section.

(2) No owner of a light-duty vehicle subject to this paragraph shall operate or allow the operation of any such vehicle that is not equipped in accordance with paragraph (c) of this section.

(f) The failure of any person to comply with any provision of this section shall render such person in violation of a requirement of an applicable implementation plan, and subject to enforcement action under section 113 of the Clean Air Act. As to compliance schedules, a State will be considered to have failed to comply with the requirements of this regulation if it fails to submit on a timely basis the required compliance schedule, or if the compliance schedule when submitted does not contain in satisfactory form each of the elements it is required to contain.

§ 52.1094 Gasoline limitation.

(a) Definitions:

(1) "Base year" means the consecutive twelve month period commencing on July 1, 1972, and ending June 30, 1973.

(2) "Distributor" means any corporation, partnership, or sole proprietorship which transports or stores or causes the transportation or storage of gasoline between any refinery and any retail outlet.

(3) "Retail outlet" means any establishment at which gasoline is sold or offered for sale to the public or introduced into any vehicle.

(b) This section is applicable in the Metropolitan Baltimore Intrastate Air Quality Control Region to all distributors who transport gasoline to any retail outlet in this area, and to the owners of retail outlets in this area.

(c) Beginning July 1, 1974, the State of Maryland shall implement regulations limiting the total gallonage of gasoline delivered to retail outlets in the area described in paragraph (b) of this section to the amount delivered to such outlets during the base year. Beginning May 31, 1977, the State of Maryland shall implement regulations limiting the total gallonage delivered to retail outlets to that amount which, when combusted, will not result in the ambient air quality standard being exceeded. The State shall by January 1, 1977, submit to the Administrator regulations to accomplish this limitation and specifying the amount of limitation necessary.

(d) In order for the State to determine the amount of gasoline delivered during the base year and each year in which control is in effect, all distributors to which this section applies shall provide the State with a detailed accounting of the amount of gasoline delivered to each retail outlet in the areas described in paragraph (b) of this section during the base year, and the years during which control is in effect. For the year during which control is in effect, the owner of each retail outlet to which this paragraph applies shall provide the State with a detailed accounting of gasoline received from each distributor, the total amount of gasoline sold during the year, and the amount of gasoline on hand at the beginning and end of the year. The State may require any other reports it may deem necessary for the implementation of this section.

(e) The State of Maryland shall submit no later than January 1, 1974, a detailed compliance schedule showing steps it will take to establish and enforce the limitation program specified in paragraph (c) and (d) of this section including the text of needed statutory proposals and needed regulations which it will propose for adoption. Each schedule shall also include the following:

(1) A date by which the State shall adopt procedures to ensure that no more than the amount of gasoline specified in paragraph (c) of this section is delivered to retail outlets in the areas affected. Such date shall be no later than March 30, 1974.

(2) A date by which any report necessary for establishing such procedures shall be furnished to the State by the distributors. Such a date shall be no later than January 1, 1974.

(3) An agency responsible for implementation and monitoring of this program.

(f) Failure to comply with any provision of this section shall render the person so failing to comply in violation of a requirement of an applicable implementation plan and subject to enforcement under Section 113 of the Clean Air Act. A state will be considered to have failed to comply with the requirements of this section if it fails to timely submit any required compliance schedule, or if the compliance schedule when submitted does not contain in satisfactory form each of the elements it is required to contain.

[FR Doc.73-15627 Filed 8-1-73;8:45 am]

[40 CFR Part 52]

MARYLAND; (PRINCE GEORGES AND MONTGOMERY COUNTIES) APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

Notice of Proposed Rule Making

The transportation control plan submitted by the State of Maryland for attainment of the primary National Ambient Air Quality Standards for carbon monoxide (CO) and photochemical oxidants for the Maryland portion of the National Capital Interstate Region was disapproved in part on June 15, 1973, (38 FR 16558). This notice of proposed rulemaking sets forth regulations which in the Administrator's judgment could be implemented in addition to the approvable portions of the Maryland plan to attain and maintain the National standards for carbon monoxide and photochemical oxidants in the Maryland portion of the National Capital Interstate Region.

If revisions to the Maryland plan are submitted and determined to be approvable prior to Federal promulgation, these proposed regulations will be withdrawn. If revisions to the Maryland plan are submitted and determined to be approvable after Federal promulgation, then those Federal regulations will be rescinded. It is the desire of the Environmental Protection Agency that the plan to attain and maintain the carbon monoxide and photochemical oxidant standards in the Maryland portion of the National Capital Interstate Region by a Regional plan carried out by the State or its designated representative.

TRANSPORTATION CONTROL ALTERATIVES

Analysis of the air quality problems in the National Capital Interstate Region, which contains Prince George's and Montgomery Counties in Maryland, reveals that both photochemical oxidants and carbon monoxide exhibit unacceptably high levels in the region, with the former being the pacing pollutant.

Since a substantial proportion of the photochemical oxidant problem and almost all of the carbon monoxide problem are the result of automotive vehicle emissions, measures to reduce emissions from individual vehicles and measures to reduce vehicular travel can be effective in improving air quality. Since a significant percentage of the oxidant-producting hydrocarbon emissions stem from the vehicle-related sources associated with gasoline handling operations, measures to reduce these operational losses can also provide a measurable improvement in the regional air quality.

Reductions in emissions from vehicles can be obtained through inspection and maintenance programs, and from incorporation of various retrofit devices. Reductions in Vehicle Miles Traveled (VMT) can be achieved through various pricing and taxing schemes for road use, adoption of parking restrictions, and/or limitations of available number of parking spaces, restrictions on idling or cruising of fleet vehicle, selective control of goods movement, the establishment of vehicle-free zones, establishment of a four-day week, programs promoting the use of carpools or alternative modes of transportation and limitations on gasoline usage. It must be emphasized that, in order to be effective, each VMT control measure proposed or adopted for the Region by the State of Maryland must be reflected by identical or equivalent measures in each of the neighboring jurisdictions of Virginia, and the District of Columbia.

In effecting substantial improvements in air quality, improvements in and expansion of public transportation facilities are a necessary and effective complement facilitating use of this alternative to the private automobile. Clearly public transit improvements must be implemented in concert with the appropriate level of vehicle restraints, as determined by the regional characteristics of the private automobile use demand elasticity. Such improvements as greater coverage, increased frequency of service, improved reliability, increased comfort and convenience, a reasonable cost, and adequate personal security will further encourage the use of public transit alternatives to the private automobile.

SUMMARY

The Maryland plan, as amended by the June 15, 1973, June 22, 1973, and June 28, 1973, submissions in its demonstration of attainment of the photochemical oxidant and carbon monoxide air quality standards utilizes the following general measures. These are: the Federal Motor Vehicle Emission Control Program, a state-wide, state-run Motor Vehicle Inspection Program for all gasoline powered vehicles, improvements to public transportation, increased parking charges, bus/carpool locator, retrofit of heavy duty gasoline powered vehicles, restrictions on aircraft ground operations, and major stationary source restrictions. As aforementioned, it is EPA's intent to use the state submitted strategy to the greatest extent possible.

The Maryland plan reports that, in 1972, peak period hydrocarbon emissions were 30.1 tons (47.6 percent of the total Regional Peak emissions) and carbon monoxide emissions were 286,725 tons per year. Although these figures are only for Prince George's and Montgomery counties (i.e., the Maryland portion of the National Capital AQCR), they are reflected in the overall strategy developed by the Metropolitan Washington Council of Government (COG). The state of Maryland's corrected calculations indicate that hydrocarbon emissions in Maryland in the peak period must be reduced by 65 percent of the 1972 emissions to a level of 10.5 tons. Similarly, carbon monoxide emissions must be reduced by 55 percent of the 1972 levels to an annual level of 129,026 tons.

After including projected increases in vehicle miles of travel, the Federal Motor Vehicle Control Program will reduce hydrocabron peak period emissions by 15.1 tons or by approximately 50 percent relative to the 1972 base period. Similarly, the impact on carbon monoxide levels will be to reduce emissions in Maryland by 145,000 tons yearly or by 51 percent relative to the 1972 base period. These estimates are adjusted to reflect the effect of the 1975 interim motor vehicle emission standards announced on April 11, 1973.

Since the 21-day period for public comment on the additional submissions has not been completed, it is impossible for the Administrator to make a final decision on approval or disapproval of the strategies included in the Maryland plan at this time. This decision must take into consideration all comments received during this time. However, preliminary review by EPA indicates that certain strategies are likely to be approvable. Accordingly, the Agency is proposing only those items which, when added to the approvable measures, are necessary to attain the National Ambient Air Quality Standards.

If an apparently approvable strategy is determined not to be approvable, additional measures will be proposed.

The information contained in the additional submissions by the State appears to remedy many of the deficiencies on which the Administrator's June 15 decision was based.

The following is a summary of the actions EPA is proposing to take with respect to the Maryland Plan.

Federal Motor Vehicle Control Program—Reductions appear to be approvable based on projected vehicle populations and emission factors.

Motor Vehicle Inspection Program—The basic program appears to be approvable in concept but lack of legal authority delays timely implementation of the plan. Therefore, it does not appear to be approvable. The Administrator will propose the same program, but with an acceptable implementation schedule.

Improvements in Public Transit

(a) Maryland participation in the area wide addition of 750 buses to current fleet—appears to be approvable, contingent upon clarification of certain administrative details.

V 38-148 AUG 2 73 XUM

(b) Exclusive Bus Lanes—appears to be approvable.

(c) System Improvements (i.e., shelters, fringe parking, improved scheduling) appears to be approvable.

Increased Terminal Charges

(a) Elimination of free off-street, employee parking in certain areas—does not appear to be approvable.

(b) Street enforcement of current on-street parking restrictions—appears to be approvable.

(c) $2.00 parking surcharge (or an equivalent measure)—appears to be approvable.

Bus Carpool Locator Program—appears to be approvable.

Restrictions on aircraft ground operations—partial reductions are allowable; appears to be partially approvable.

Increased Control of Stationary Source Emissions—not approvable at this time due to lack of adopted regulations.

Heavy Duty Restraints—does not appear to be approvable because of lack of documented technical feasibility.

Due to the fact that:

Full reductions claimed for aircraft emissions do not appear to be allowable;

The plan did not include adequate controls for heavy duty gasoline powered vehicles.

The portion of the plan dealing with elimination of free off-street employee parking does not appear to be approvable.

The controls over stationary sources cannot be approved at this time.

EPA is proposing the following measures:

Initiation of commercial-type parking rates or reduction of 12% the available spaces at any federal, state, or local facility which has 25 or more parking spaces and which is located in a high density employment area which is well serviced by public transit.

Retrofit by 1975 of all pre-1968 vehicles with a vacuum spark advance disconnect kit.

Retrofit of light duty 1971–1975 fleet vehicles (including federal government vehicles) and taxicabs with an oxidizing catalyst retrofit—beginning in mid-1976, to be completed by mid-1977.

Controls of emissions of hydrocarbons due to gasoline handling; both from the delivery truck to underground tank and from the pump to the vehicle. Implementation begins in 1974 and is fully completed by 1977.

Ban of heavy-duty-gasoline-powered vehicles (except emergency vehicles, mail trucks, etc.) from 6:00 a.m. to 9:30 a.m. beginning July 1, 1974.

Finally, since the $2.00 surcharge proposed by Maryland is integral to the success of this plan, EPA is proposing contingency strategies to be implemented if appropriate steps are not taken to implement the surcharge. These contingency measures are:

A ban on the construction, modification or enlargement of any parking facility without having first obtained a permit from the Administrator.

A phased 15 percent reduction in the number of off-street parking spaces.

The Administrator invites comments on these and any other measures which may be used to achieve the national ambient air quality standards for photochemical oxidants and carbon monoxide.

Two-Year Extensions to Achieve Standards

The Administrator proposes to give a two-year extension for the attainment of the standard in the State of Maryland. To attain the standards in 1975 would require stringent restraints on vehicle miles traveled which could not be considered to be "reasonably available" within the meaning of section 110(e) of the Clean Air Act, or the implementation of a widespread catalytic retrofit program which could not be implemented due to technological problems before 1977. Although some measures have not been proposed here which have appeared in some other proposals (such as gasoline limitations and a selective vehicle exclusion program involving colored tags) the reduction in vehicle miles traveled expected from measures contained herein appears to be substantial and adequate to fulfill the requirement that reasonably available alternative measures be employed before an extension is given for any strategy. The plan proposed herein, along with the apparently approvable measures submitted by the State of Maryland, apply the reasonably available alternative means of control at the earliest possible dates. Comment is invited on any measures which have not been considered and applied and which can be considered to be reasonably available.

Summary of Effects

The following table is a summary of the effect of the proposed strategies on the total reductions required.

COMPILATION OF CONTROL STRATEGY EFFECTS FOR THE NATIONAL CAPITAL INTERSTATE REGION ON MAY 31, 1977

	Carbon Monoxide		Hydrocarbons	
	Tons per peak period	Percent of total Reduction Required	Tons per peak period	Percent of total Reduction Required
Stationary Source Emissions Without Control Strategy	78	.....	11.3	.....
Expect Reduction From:				
(a) Dry Cleaning Vapor Recovery	0	0	1.1	8.7
(b) Gasoline Handling Vapor Recovery	0	0	5.0	39.4
(c) Other Stationary Source Rule Strengthening	0	0	0	.....
Stationary Emissions Remaining	78	.....	8.2	.....
Mobile Emissions from Highway Light and Heavy Duty Vehicles without Control Strategy	498	.....	19.3	.....
Expected Reductions From:				
(a) Inspection and Maintenance	28	31.6	1.5	11.8
(b) X-Kit Retrofit, pre-'68 Cars	3	1.0	0.4	3.2
(c) Catalytic Retrofit of Fleet LDV's	5	6.7	0.2	1.6
(d) Mass Transit Improvements	21	28	2.7	21.2
(e) HDV Peak Hour Delivery Ban	27	35	1.0	7.6
(f) Aircraft Model Program	11.0	11.6	0.8	6.1
Mobile Emissions Remaining	405	.....	12.7	.....
Total Emissions without strategy	576	.....	33.6	.....
Total Reductions	93	123.9	12.7	100.2
Total Emissions Remaining	483	.....	20.9	.....

Proposed Controls on Stationary Sources

One of the major sources of hydrocarbon emissions, which have been identified in the Maryland plan for the Maryland portion of the National Capital Interstate Region, is the gas handling losses which occur in the distribution system for gasoline fuel. The Maryland plan proposes control of these emissions.

The regulations proposed by the State of Maryland for control of hydrocarbon emissions at retail service stations or fleet-owned service stations requires installation of a vapor balance line or equally effective vapor discharge control system. This regulation requires controls to be installed on all stations with a monthly average throughput exceeding 35,000 gallons by May 31, 1975, and at all other stations by May 31, 1977. Vapor collecting systems which must be installed on vehicle fuel tank filling systems are to be installed concurrent with the vapor balance line connections specified above.

The regulations as proposed by the State of Maryland appear to be adequate to achieve the anticipated reduction in hydrocarbon emissions. However, the Administrator cannot approve these proposed regulations at this time, since 40 CFR part 51 requires that all regulations dealing with the control of stationary sources be adopted at the time of submittal of the plan. EPA is therefore proposing to promulgate similar regulations which will be rescinded upon submission of equivalent acceptable regulations as adopted by the State of Maryland.

Existing organic solvent regulations require that all present dry cleaning installations emitting more than 200 pounds per day of photochemically reactive hydrocarbons shall reduce present emissions by at least 85 percent, and that the limit for new installations shall be 40 pounds per day. In its plan the state has proposed a requirement that all dry cleaning establishments refrain from using any photochemically reactive organic solvents after May 31, 1974. This would result in a reduction of 0.03 tons per peak period, or 0.14 percent of the reduction required to meet the primary ambient air quality standards by May 31, 1977. The Administrator is aware of Maryland's on-going program for the control of hydrocarbon emissions from dry cleaning installations and is presently evaluating the proposed regulation which would accelerate the program by attaining full compliance by the proposed May 31, 1974 date.

The regulations as proposed by the State of Maryland appear to be adequate to achieve the anticipated reduction in hydrocarbon emissions. However, the Administrator cannot approve these proposed regulations at this time, since 40 CFR part 51 requires that all regulations dealing with the control of Stationary Sources be adopted at the time of submittal of the plan. EPA is therefore proposing to promulgate similar regulations which will be rescinded upon submission of equivalent acceptable regulations as adopted by the State of Maryland.

The Environmental Protection Agency has also examined Maryland's regulations governing emissions of organic solvents resulting from degreasing operations and from evaporation from surface and architectural coatings. For degreasing operations, there are no specific constraints on non-reactive material that may be used such as perchlorethylene or saturated halogenated hydrocarbons that are in use elsewhere. Comments are solicited on whether degreasing operations in the Maryland portion of the National Capital Interstate Region are a significant source of reactive hydrocarbon emissions for which a specific regulation should be promulgated.

Emissions of other solvents in the Maryland portion of the National Capital Interstate Region were also investigated. It has been determined that technology does exist to control more efficiently the emissions of a number of the smaller heating (15 to 200 lb per day category) and spraying operations (in the 40 to 200 lb per day category) involving organic solvents. Their estimated total peak period emissions is 0.10 tons or 0.47 percent of the reduction required to meet the primary ambient air quality standards by May 31, 1977. Comments are solicited as to whether it is feasible or practicable to require additional controls on these sources, many of which are presumably located on the premises of small sized firms. If these comments indicate that further controls are needed, then the Administrator proposes to promulgate regulations equivalent to those currently adopted by the County of Los Angeles Air Pollution Control District as Rule 66. L.A. Rule 66 contains minor exemptions involving evaporative emissions from gallon (or smaller) sized containers of architectural coating compounds, and from the allowable disposal limits of waste solvent materials. There are no data presently available to the Administrator on the atmospheric burden that may be created by such evaporative emissions though they are presently believed to be very small.

Proposed Controls on Mobile Sources (non-aircraft)

In the plan addendum of June 28, 1973, it is stated that legislative authorization funding measures, etc., are needed to implement Maryland's proposed inspection and maintenance program. The tentative implementation timetable proposed by Maryland shows the commencing of the 20-month program on January 1, 1975, following an assumed passage of legislation, and completion by September 1, 1976. Under the requirement of the Clean Air Act, the States must proceed as expeditiously as practicable to attain primary air quality standards. Because of the delay in getting legal authority, Maryland's program would not be implemented as expeditiously as possible. In an effort to ensure the earliest possible initiation of Maryland's program, the Administrator is proposing a regulation which will permit implementation of the system to begin on March 1, 1974, and permit actual commencement of the inspection program by August 1, 1975.

The Maryland plan proposes an emissions inspection program for all light and heavy duty gasoline powered vehicles with an initial failure rate of 30 percent. As recommended in Appendum N of 40 CFR, Part 51, a 12 percent hydrocarbon emission reduction and a 10 percent carbon monoxide emission reduction for all such vehicles is claimed through the use of a loaded test inspection/maintenance program. Comments are solicited on the desirability to establish an initial 50 percent failure rate criterion which calculations indicate would result in an additional reduction of 0.1 tons hydrocarbon peak period emission.

A full EPA review of the June 28, 1973, addendum is now in progress. This review will determine the degree of acceptability for both the establishment of the inspection and maintenance system itself and the subsequent inspection program. Comments are also solicited from the public and other interested parties on all aspects of the program. It is the Administrator's intent that the final promulgation incorporate as much of the Maryland proposed program as can be found acceptable.

Since the Clean Air Act requires consideration of all reasonably available alternatives, in order to attain the primary standard as expeditiously as practicable, EPA proposes retrofit of pre-1968 light duty vehicles with approved Vacuum Spark Advance Disconnect (VSAD) devices and 1971–1975 light duty fleet vehicles with oxidizing catalyst devices. The VSAD device is expected to reduce hydrocarbon emissions by 25 percent per vehicle and carbon monoxide emissions by 9 percent per vehicle. The oxidizing catalyst device is expected to reduce both hydrocarbon and carbon monoxide emissions by 50 percent per vehicle. Only those cars of 1971–1975 model years which run on gasoline with a R.O.N. of 91 can be fitted with this device because of technical constraints. In addition this gasoline must be unleaded. National estimates indicate that approximately 75 percent of the 1971–1975 model year vehicles would be retrofitted under this proposal. Since catalytic retrofit devices for light-duty vehicles are expected to be available by 1977, it is proposed to require installation of these devices on all 1971–1975 LDV fleet vehicles (e.g., taxis, GSA vehicles, rental cars, fleet delivery vehicles), capable of operating on 91 RON gasoline.

The regulation proposed by the Administrator will require that the above motor vehicles be equipped with catalytic retrofit devices by May 31, 1977, effecting a 50 percent hydrocarbon emission reduction for each vehicle. Exemptions will be allowed for all 1975 vehicles originally equipped with the oxidation catalytic converter or those vehicles which are certified to meet the original statutory emission standards in 1975. Based on inspection currently available to him, the Administrator estimates that fleet vehicles account for 6 percent of total mobile source emissions. On the basis that one-third of the fleet vehicles will be older than two years (pre 1976), and catalytic retrofits can reduce automotive emissions from each vehicle by 50 percent, it is apparent that this measure, when applied on a Region-wide basis, will result in a hydrocarbon emission reduction of 0.2 tons/peak period.

In the event that the measures proposed herein prove to be inadequate, the Administrator is required by law to apply additional reasonably available alternatives, including catalytic retrofit of other segments of 1968–1975 light duty vehicle population. Candidate segments include all light duty trucks, all GSA cars, or passenger vehicles of specified model years. The public is urged to present their comments on these or any other type of control measure that may help to achieve the National Ambient Air Quality Standards.

Proposed Reductions in VMT

According to data provided by the Metropolitan Washington Council of Governments, the proposed transportation package (including 750 additional buses, exclusive bus/carpool lanes, a carpool locater service, and parking restrictions) will result in a 12 percent reduction in 6–9 am VMT and a corresponding reduction in total trips.

The Maryland plan includes the following strategies under its transportation measures:

1. Participation with District of Columbia and Commonwealth of Virginia in an area wide improved transit system, including the addition of 750 buses to the current area fleet, the establishment of exclusive bus lanes, bus shelters, and fringe parking facilities.

2. Increased terminal costs including the elimination of free parking and the establishment of a $2.00 parking surcharge for long term commuter parking in all areas adequately served by mass transit.

3. Establishment of a computerized carpool locater service.

This portion of the plan is central to the Maryland plan for reduction of HC and CO emissions. Therefore, to avoid confusion and expedite comments, a discussion of the elements that make up this portion of the plan shall be included.

a. *Elimination of Free Parking*—The State of Maryland proposes to have EPA

V 38-148
AUG 2 73
XUM

eliminate free parking for the federal government employees, and to study the feasibility for similar action by the state for employees of state and local government and private businesses. The plan also includes a program of strict enforcement of existing parking regulations.

These measures will be imposed in high density employment areas which are adequately served by mass transit. These areas will be more specifically described by the state within the next 10 months, upon completion of studies of the matter.

Additionally, Maryland proposes to enter into a reciprocal enforcement program for parking violations. Thus, enforcement of the existing parking regulations will be facilitated.

On the basis of the information submitted by Maryland in its plan, the Administrator feels that the portions of the Maryland plan dealing with enforcement of existing parking restrictions and the reciprocal enforcement of parking violations is approvable.

As pointed out in Maryland's plan, reduction of emissions due to work trips within the Maryland portion of the AQCR by Federal Government employees is integral to achieving air quality goals. Therefore, EPA feels it has the responsibility to aid Maryland in the control of these emissions. As a result, EPA will follow the suggestion made in the Maryland plan and propose a federal regulation which would effectively reduce emissions as a result of commuter trips by federal employees. This will be done by requiring federal facilities in high density areas served by mass transit to either eliminate free parking (by establishing commercial type rates) or to reduce the available parking spaces in these facilities by 12 percent.

Since the other jurisdictions in the AQCR has also proposed to eliminate free parking for employees of their government and the Maryland plan is unclear on this point, EPA is also proposing that the specific state and local governmental parking facilities eliminate free parking (or adopt an equivalent measure). Specifically the proposal calls for the elimination of free parking or the reduction of available space by 12 percent for all state and local government parking facilities which have 25 or more spaces and which are located in high density employment areas which are served by public transportation. Since the plan is regional in nature, this action is necessary to insure that the reductions achievable by this measure throughout the AQCR do in fact occur. The Administrator feels that the result of this proposal will be to induce employees to utilize alternate modes of transportation, such as buses and carpools and thereby reduce the VMT in the area. In should be noted that this proposal should result in a reduction of VMT over the entire area because it will reduce VMT of employees from all three jurisdictions in the National Capital Area.

The Friendship Heights Area, the Silver Spring Area, and the Rockville Area, along with other areas, in all likelihood would need to be included in any definition of "high density employment area which is served by mass transit" for this strategy to be effective.

b. *$2.00 Surcharge (or its equivalent)* The Maryland plan proposes to seek the imposition of a $2.00 per day surcharge (or an equivalent measure) on all long term parking facilities in employment areas which are served by mass transit. Identification of the areas where the surcharge is to be imposed should be made within the next 10 months, upon completion of studies of matter.

This proposal calls for the charge to be implemented and enforced by the local jurisdictions within the Maryland portion of the AQCR. The Administrator feels that, if implemented according to the schedule provided in the plan, this proposal is approvable.

It is well documented that no matter how well designed and operated a mass transit system is, unless there are disincentives to the use of the private automobile, mass transit will be ineffective. Therefore, Maryland's proposals for the surcharge is integral to the success of the plan.

The Administrator wants to make it clear that if for any reason this strategy is not emplemented according to schedule, he will institute equivalent measures. In order to avoid any delay in the implementation of such equivalent measures and to invite timely public comment, the Administrator is proposing contingency measures in the plan. These contingency measures will become effective if it becomes apparent that the surcharge will not be implemented. Specifically, a phased 15 percent reduction in existing off-street parking spaces would be imposed, as well as a ban on the construction, modification or enlargement of any parking facility without first obtaining a permit from the Administrator. Public comments are solicited on these contingency proposals.

c. *Mass Transit Improvements.* The development of an effective mass transit system is essential to the development of an effective tranportation control strategy. If this control plan is to be successful, a sufficient number of buses with convenient service and adequate schedules must be provided.

The Maryland plan proposes to participate in the area wide transit system increase of current fleet size by 750 buses and to improve service and convenience for commuters. Included in this proposal are provisions for installing bus shelters, providing additional public information and improved scheduling. In addition, Maryland plans to institute a number of exclusive bus lanes on major highway corridors. All of these measures are meant to provide the increased mass transit service which will be necessary if air quality standards are to be achieved.

Based on the information contained in the documents submitted by Maryland, the Administrator feels that the proposals for increased mass transit are approvable, on the condition that certain administrative details will be provided to him by the State. Specifically, the arrangements or agreements which will trigger the expansion of the fleet should be clarified, since it is necessary for EPA to determine what actions are necessary to bring about any additional purchases of buses. Also a clarification on the schedule showing the projected incremental increases in fleet size should be provided. In addition, the Maryland plan does not specifically indicate that Maryland will expend funds for the necessary purchase of new buses. Since Maryland is a signator of the WMATA compact, this commitment can be assumed. A direct declaration by Maryland should be made, though.

d. *Bus/Car Pool Locator System.* The Maryland plan recognizes the need for more efficient utilization of current automobile usage. Thus, the plan proposes a voluntary bus/car pool locator matching service. This system will attempt to assemble lists of commuters with similar work schedules and home, work locations, and will be phased in starting with pilot projects during 1973. Full operation of the system is scheduled for April 1974. The Administrator feels that this measure is approvable, and encourages residents of the National Capital area to take advantage of this service.

Along with the benefits accruing to this system in terms of a potential decrease of vehicle miles traveled, this system also has the advantages of fuel conservation and it will mitigate the impact of disincentives to private auto use (i.e., the surcharge and elimination of free employee parking).

e. *Heavy duty vehicle restraints.* In addition to the transportation measures described above, the Maryland plan addresses the problem of heavy duty gasoline powered vehicle emissions. The plan discusses emission control retrofit program for heavy duty gasoline powered vehicles. The discussion provided indicates the need to achieve a 50 percent reduction in emissions from such vehicles to meet the standards by 1977. Such reduction would be complimentary to the approvable heavy duty emission controls measures included in the District of Columbia plan and the concepts discussed in the Virginia plan.

The Maryland plan specifically proposes a heavy duty retrofit strategy to be implemented by 1977. Currently, EPA feels there are many uncertainties concerning the feasibility of implementing such a strategy by 1977. The only significant development and testing program currently on-going is being conducted by the state of New York. EPA feels this program has the potential to develop and provide information for the implementation of a heavy duty retrofit program by 1977. Accordingly, the Agency has approved this strategy for the New York plan.

While Maryland's heavy duty retrofit proposal appears to be basically approvable, EPA does not feel the plan provides adequate assurance that Maryland will develop a program of their own for the development and testing of such devices or indicate a commitment to establish an understanding to use information developed through New York's program.

Without this information, EPA does not feel this strategy is approvable at this time. Furthermore, even if this program was approvable, the Administrator believes emission reductions from heavy duty vehicles can be reduced at an earlier date through heavy duty vehicle delivery bans.

In light of this determination and in order to compliment similar measures in the District of Columbia and Virginia plans, the Administrator is proposing a delivery ban on heavy duty gasoline powered vehicles which will be effective during the peak traffic period (6:00 am–9:30 am). The ban will take effect July 1, 1974. The Administrator recognizes that the District of Columbia will impose this ban on January 1, 1974; however, in order to allow Maryland adequate time to adopt regulations and plans for implementation of this ban, the additional implementation time is warranted.

EPA encourages the State of Maryland to submit the required additional information on the heavy duty retrofit program. Such a program could eventually replace the proposed interim delivery ban.

Aircraft Emission Reduction

Aircraft emissions, as they affect ambient air quality, occur during approach, landing, taxi, idle, takeoff, and climb-out. Heaviest emissions occur during taxi and idle when aircraft engines are operated at greatly reduced power.

The Maryland Transportation Control Plan asserts that control of these emissions through modified ground operations at Dulles and Washington National Airports can result in a significant hydrocarbon, and carbon monoxide emission reduction in the National Capital Region. Maryland contends that a 50% reduction in hydrocarbon and carbon monoxide emissions can be achieved through the implementation of such ground controls at the two northern Virginia airports. Such a reduction would represent a 1.7 ton reduction in the area's hydrocarbon emissions and a 28 ton reduction in the area's carbon monoxide emission. Maryland assumes the required measures will be fully implemented by EPA and FAA during the next four years and takes full credit for the potential emissions reductions which they believe could result from these measures.

The assumed reduction in hydrocarbon emissions is necessary for the plan to demonstrate achievement of the oxidant standards; the claimed carbon monoxide reductions are not needed for attainment of the standard.

EPA has published an Advance Notice of Proposed Rulemaking for aircraft ground controls but has not yet proposed regulations for such controls. The Agency, however, is currently funding a demonstration project with FAA to determine if safety hazards would accompany modified ground operations. If the demonstration is successful, EPA will propose and promulgate regulations for the implementation of ground operations deemed free of safety hazards.

The Agency currently believes that certain ground and taxi operations included in the demonstration can be conservatively assumed to be safe and acceptable. EPA calculations indicate that the application of these measures could result in a 24 percent reduction in hydrocarbons at National Airport and a 30 percent reduction in hydrocarbons at Dulles Airport vice (50 percent reduction proposed by Virginia). In light of EPA's intention to work jointly with FAA to promulgate and implement ground operations deemed safe and acceptable prior to 1977, the Agency believes it is reasonable to allow Maryland to accept credit for emission reductions which will result from controlling the ground operations conservatively felt at this time to be safe and acceptable. The percent emissions reductions indicated above which would result from these measures would provide approximately a 0.8 tons reduction in hydrocarbons for the National Capital Region. Accordingly, the Agency will accept 0.8 tons of the claimed 1.7 tons reduction as being an approvable portion of the plan based on the expected implementation of ground operation regulations.

Economic and Social Impact

The social and economic consequences of the measures included in the Maryland plan or proposed herein are considered reasonable. For example, the inspection and maintenance procedures will require expenses of approximately $10 annually for the average vehicle inspected. The implementation of the VSAD retrofit program of pre-1968 vehicles will require that individual motorists pay approximately $20 installation costs. Though the price to the fleet vehicle owner for the catalytic retrofit is $135 per vehicle, this cost could gradually be reclaimed through slightly higher service or use fees for the fleet vehicles controlled. In addition, such expenditure can be deducted from income tax as a business expense, and therefore part of the cost will be absorbed by the government. Compensation for the expenditures associated with the modifications required by the gasoline handling regulations could similarly be gained through slight increase in the fees for station services or fuel prices. This also could be deducted as a business expense from the income tax. Distributed costs of the various mass transportation improvement measures, as well as the incentives for the use of express buses and carpools and disincentives on the use of automobiles by individual motorist-commuters, are also considered reasonable.

The measures providing transportation improvements are expected to benefit the public from the standpoint of improved traffic flow for commuters, general urban mobility, and energy consumption. The resulting VMT reductions may also have some impact on the sprawling development patterns fostered by widespread automobile use which are unduly wasteful of energy, land and other resources and have contributed to the decay of urban centers.

Public Comments Solicited

Although the Administrator has concluded that the proposed plan is the best approach available to him at the present time for achieving compliance with the requirements of the Act, further analysis may demonstrate that more appropriate options are available. He therefore desires to obtain the comments and suggestions of the public on the problems of achieving the ambient air quality standards in the Maryland portion of the National Capital Interstate Air Quality Control Region. Comments are particularly invited pertaining to measures that may be taken by Federal, State, or local authorities to support or supplement the proposed air pollution control strategy, to implement these measures, and to compare social and economic effects of alternative pollution control measures.

Public hearings will be held at the Holiday Inn, 8777 Georgia Ave., Silver Spring, Maryland on September 6, 1973, beginning at 9:00 a.m. Notice of the hearings on these regulations (including designation of locations for inspection and distribution of EPA proposals) is being published in the Maryland portion of the National Capital Interstate Air Quality Control Region.

The Administrator's final promulgation of transportation controls for the Maryland portion of the Natonal Capital Interstate Region will consider the comments and testimony he receives, as well as any additional approvable strategies submitted by the State as part of the State plan before or at the hearings. These influences, and the additional analysis of alternative strategies that can be made in the time between this proposal and final promulgation, may lead the Administrator to adopt final regulations that differ in important ways from this proposal.

Submittal of Written Comments

Interested persons may participate in this rule making by submitting written comments, preferably in triplicate, to the Mobile Source Enforcement Division, EPA, 401 M Street, SW., Washington, D.C. 20460. All relevant comments received on or before September 4, 1973 will be considered. Receipt of comments will be acknowledged, but substantive responses to individual comments will not be provided. Comments received will be available for public inspection during normal business hours at the office of Public Affairs, EPA, 401 M Street, SW., Washington, D.C. 20460. This notice of proposed rule making is issued under the authority of Section 110(c) and 301(a) of the Clean Air Act. (42 U.S.C. 1857 et seq.)

EPA Studies and Guidelines

Further information on transportation control, land use, and motor vehicle emissions may be obtained from one or more of the following documents which the Environmental Protection Agency has published:

a. "Prediction of the Effects of Transportation Controls on Air Quality in Ma-

V 38 148 AUG 2 73 XUM

jor Metropolitan Areas" and "Evaluating Controls to Reduce Motor Vehicle Emissions in Major Metropolitan Areas," November 1972. Both of these documents are generally known as the "Six Cities Study".

b. "Transportation Controls to Reduce Motor Vehicle Emissions in Major Metropolitan Areas", December 1972. This document is a summary of a study of 14 cities conducted with the view of recommending specific transportation control strategies. (Separate reports for each of the 14 cities are also available.)

NOTE: The documents listed in a and b above are available from the Air Pollution Technical Information Center, EPA, Research Triangle Park, North Carolina 27711.

c. "Control Strategies for In-Use Vehicles", November 1972. This report is available from EPA, Mobile Source Pollution Control Programs, 401 M Street, SW., Washington, D.C. 20460.

d. "Transportation Control Measures", FEDERAL REGISTER (38 FR 15194) June 8, 1973.

e. "Aircraft and Aircraft Engines", FEDERAL REGISTER (37 FR 26488) December 12, 1972.

f. "Aircraft Emissions: Impact on Air Quality and Feasibility of Control." This report presents the available information on the present and predicted nature and extent of air pollution related to aircraft operations in the United States. In addition, it presents an investigation of the present and future technological feasibility of controlling such emissions. (42 U.S.C. 1857 et seq.)

Dated: July 24, 1973.

ROBERT W. FRI,
Acting Administrator.

It is proposed to amend Part 52 of Chapter I of Title 40 of the Code of Federal Regulations by adding the following:

Subpart V—Maryland

§ 52.1095 Inspection and maintenance.

(a) Definitions:

(1) "Inspections and maintenance program" means a program to reduce emissions from in-use vehicles by identifying vehicles which need emission-control-related maintenance and requiring that maintenance be performed.

(2) "Precontrolled vehicles" means light duty vehicles sold nationally (except California) prior to the 1968 model year and light duty vehicles sold in California prior to the 1966 model year.

(3) "Controlled vehicles" means light duty vehicles sold nationally (except California) in the 1968 model year and later light duty vehicles sold in California in the 1966 model year and later.

(4) "Loaded emissions test" means a sampling procedure for exhaust emissions which requires testing the engine under stress (i.e., loading) by use of a chassis dynamometer to simulate actual driving conditions. As a minimum requirement, the loaded emission test must include running the vehicle and measuring exhaust emissions at two speeds and loads other than idle.

(5) "Idle emission test" means a sampling procedure for exhaust emission which requires operation of the engine in the idle mode only. At a minimum, the idle test must consist of the following procedures carried out on a fully warmed-up engine: A vertification that the idle RPM is within manufacturer's specified limits and a measurement of the exhaust carbon monoxide and/or hydrocarbon concentrations during the period of time from 15 to 25 seconds after the engine was used to move the car or was run at 2000 to 2500 RPM with no lead for 2 to 3 seconds.

(6) "Retrofit" means the addition or removal of an item of equipment, or a required adjustment, connection, or disconnection of an existing item of equipment, for the purpose of reducing emissions.

(7) "Idle adjustment" means a series of adjustments which include RPM, idle air/fuel ratio and basic timing.

(8) "Initial failure rate" means the percentage of vehicles rejected because of excessive emissions of a single pollutant during the first inspection cycle of an inspection/maintenance program. (If inspection is conducted for more than one pollutant, the total failure rate may be higher than the failure rates for each single pollutant.)

(b) This regulation is applicable within the Maryland portion of the National Capital Interstate Air Quality Control Region.

(c) The State of Maryland shall submit to the Administrator of EPA or his designee, no later than January 1, 1974, a detailed compliance schedule showing the steps that will be taken to establish and enforce an inspection and maintenance program pursuant to paragraph (d) of this section. The compliance schedule shall include:

(1) The text of any necessary statutory proposal and regulations that are needed to carry out the inspection/maintenance system.

(2) A detailed timetable describing the steps that must be taken and when these steps will be taken to ensure the timely submittal of the needed legislation to the legislature and to ensure timely adoption of the regulations needed for paragraph (d) of this section.

(3) A detailed timetable describing the dates of ordering and of acquisiton of necessary equipment.

(4) A signed statement by the chief executive or his designee identifying the sources and amounts of funding for the inspection/maintenance program and a timetable to ensure that proper funding levels are available. If funds cannot legally be obligated under existing statutory authority, the text of the needed legislation shall be submitted to the Administrator of the Environmental Protection Agency or his designee pursuant to paragraph (c)(1) of this section.

(d) The State of Maryland shall establish an inspection and maintenance program applicable to all light duty gasoline-powered vehicles registered within its confines. No later than March 1, 1974, the State of Maryland shall submit to the Environmental Protection Agency legally adopted regulations reestablishing such a program. The regulations shall include:

(1) Provisions for the inspection of all gasoline-powered light duty vehicles at periodic intervals of no more than one year by means of a loaded (dynamometer) test.

(2) Provisions for inspection failure criteria consistent with the emission reduction claimed in the plan for the strategy. These criteria shall include an initial failure rate of 30 percent (see definitions).

(3) Provisions to ensure that failed vehicles receive the maintenance necessary to achieve compliance with the inspection standards. This shall include sanctions against individual owners and repair facilities, retest of failed vehicles following maintenance, a certification program to ensure that repair facilities performing the required maintenance have the necessary equipment, parts and knowledge to perform the tasks satisfactorily, and such other measures as may be necessary or appropriate.

(4) A program of enforcement to ensure that vehicles are not intentionally readjusted or modified subsequent to the inspection and/or maintenance in such a way as would cause them to no longer comply with the inspection standards. This might include spot checks of idle adjustments and/or a suitable type of physical tagging.

(5) Delineation of the agency or agencies responsible for conducting, overseeing and enforcing the inspection and maintenance program.

(6) Provisions for beginning the first inspection cycle by August 1, 1975, and completing it by July 31, 1976.

(e) After July 31, 1976, the State of Maryland shall not register nor allow to operate on its streets or highways vehicles which fall within this regulation and have not complied with the applicable standards and procedures of paragraph (d) of this section. This shall not apply to the initial registration of a new motor vehicle.

(f) After July 31, 1976, no owner of a vehicle which is affected by this regulation shall operate or allow to be operated a vehicle which does not comply with the applicable standards and procedures of paragraph (d) of this section. This shall not apply to the initial registration of a new motor vehicle.

§ 52.1097 Vacuum Spark Advance Disconnect.

(a) For purposes of this section, "vacuum spark advance disconnect" means a device or system installed on the vehicle which prevents the ignition vacuum advance from operating either when the vehicle's transmission is in the lower gears or when the vehicle is traveling below a predetermined speed.

(b) This section is applicable in the State of Maryland portion of the National Capital Interstate Air Quality Control Region.

(c) On or before January 1, 1975, all gasoline-powered light duty vehicles of model year prior to 1968 and subject

under presently existing legal requirements to registration in the area described in paragraph (b) of this section shall be equipped with an appropriate vacuum spark advance disconnect device.

(d) The State of Maryland shall submit, no later than January 1, 1974, a detailed compliance schedule showing the steps it will take to implement and enforce this requirement. Such schedule shall include, as a minimum, the following:

(1) A date by which the State of Maryland will evaluate and approve devices for use in this program. Such date shall be no later than March 1, 1974.

(2) A date by which installation of this equipment shall commence. Such date shall be no later than June 1, 1974.

(3) A date by which all vehicles subject to this section will be equipped with such devices. Such date shall be no later than January 1, 1975.

(4) Designation of any agency or agencies responsible for evaluating and approving such devices for use on vehicles subject to this section.

(5) Designation of an agency or agencies responsible for ensuring that the prohibitions of paragraph (c)(2) of this section shall be enforced.

(6) Method and proposed procedures for ensuring that those persons installing the devices have the training and ability to perform the needed tasks satisfactorily and that an adequate supply of devices will be available.

(7) Provision (apart from the requirements of any program for periodic inspection and maintenance of vehicles generally) for emission testing at the time of device installation or some other positive assurance that the device is installed and operating correctly.

(e) After January 1, 1975, the following shall apply within the State of Maryland portion of the National Capital Interstate Air Quality Control Region.

(1) The State of Maryland shall not register a vehicle subject to this paragraph which is not equipped in accordance with paragraph (c) of this section.

(2) No owner of a light duty vehicle subject to this paragraph shall operate or allow the operation of any such vehicle that is not equipped in accordance with paragraph (c) of this section.

(f) The failure of any person to comply with any provision of this section shall render such person in violation of a requirement of an applicable implementation plan, and subject to enforcement action under section 113 of the Clean Air Act. As to compliance schedules, the State of Maryland will be considered to have failed to comply with the requirements of this regulation if it fails to submit on a timely basis the required compliance schedule, or if the compliance schedule when submitted does not contain in satisfactory form each of the elements it is required to contain.

§ 52.1098 Oxidizing catalyst retrofit.

(a) Definitions:

(1) "Oxidizing catalyst" means a device installed in the exhaust system of the vehicle that utilizes a catalyst and, if necessary, an air pump to reduce emissions of hydrocarbon and carbon monoxide from that vehicle.

(2) Fleet vehicle means any of 5 or more light duty vehicles operated by the same person(s), business, or governmental entity and used principally in connection with the same or related occupations or uses. This definition shall also include any taxicab (or other light duty gasoline-powered vehicle-for-hire) owned by any individual or business.

(3) Governmental entity means any agency of the executive branch of the Federal government, or a state or local department, agency, bureau, board, office, commission, district, or unit of any other type (excluding foreign embassies) which employs personnel paid wholly with public funds.

(4) All other items used in this section which are defined in 40 CFR Part 51, Appendix N, are used herein with the meanings so defined.

(b)(1) This Section is applicable in the State of Maryland portion of the National Capital Interstate Air Quality Control Region.

(2) Classes of Vehicles Covered:

(i) Light duty fleet vehicles of model year 1971 through 1975, not already equipped with catalyst, or certified to meet original 1975 statutory light duty vehicle emission standards.

(c) The State of Maryland shall establish a retrofit program to insure that on or before May 31, 1977, classes of gasoline-powered light duty vehicles as specified in (b)(2) of this section which are subject under presently existing legal requirements to registration in the area defined in paragraph (b) of this section and are used on the streets and highways of the State, are equipped with an appropriate oxidizing catalyst retrofit device. No later than March 1, 1974, the State of Maryland shall submit legally adopted regulations to EPA establishing such a program. The regulations shall include:

(1) Designation of an agency responsible for evaluating and approving such devices for use on motor vehicles subject to this section.

(2) Designation of an agency responsible for ensuring that the provisions of paragraph (c)(3) of this section are enforced.

(3) A provision that starting no later than May 31, 1976, the State of Maryland shall commence retrofitting oxidizing catalysts to those light duty motor vehicles able to operate properly on unleaded 91 RON gasoline. The installation shall be completed by May 31, 1977.

(4) A method and proposed procedure for ensuring that those installing the retrofits have the training and ability to perform the needed tasks satisfactorily and that they will have an adequate supply of retrofit components.

(d) After May 31, 1977, the State shall not register or allow to operate on public streets or highways and light duty gasoline-powered vehicles specified in paragraph (b)(2) of this section which does not comply with the applicable standards and procedures adopted pursuant to paragraph (c) of this section.

(e) After May 31, 1977, no owner of a vehicle subject to this section shall operate or allow the operation of any such vehicles which does not comply with the applicable standards and procedures implementing this section.

(f) The State of Maryland shall submit, no later than October 1, 1973, a detailed compliance schedule showing the steps it will take to establish and enforce a retrofit program pursuant to paragraph (c) of this section, and the text of needed statutory proposals and needed regulations which it will propose for adoption. The compliance schedule shall include a date by which the State shall evaluate and approve devices for use in this program. Such date shall be no later than September 30, 1975.

(g) Failure to comply with any provisions of this section shall render the person so failing to comply in violation of a requirement of an applicable implementation plan and subject to enforcement under section 113 of the Clean Air Act. The State will be considered to have failed to comply with the requirements of this regulation if it fails to submit on time the required compliance schedule, or if the compliance schedule when submitted does not contain in satisfactory form each of the elements it is required to contain.

§ 52.1101 Control of evaporative losses from the filling of vehicular tanks.

(a) The term "gasoline" means any petroleum distillate having a Reid vapor pressure of 4 pounds or greater.

(b) This section is applicable in the State of Maryland portion of the National Capital Interstate Air Quality Control Region.

(c) A person shall not transfer gasoline to an automotive fuel tank from gasoline dispensing systems unless the transfer is made through a fill nozzle designed to:

(1) Effect a vapor-tight fit between the fill nozzle and filler neck of the automotive fuel tank so as to prevent discharge of hydrocarbon vapors to the atmosphere.

(2) Direct vapor displaced from the automotive fuel tank to a system wherein at least 90 percent by weight of the organic compounds in displaced vapors are recovered.

(3) Prevent automotive fuel tank overfills or spillage on fill nozzle disconnect.

(d) The system referred to in paragraph (c) of this section can consist of a vapor-tight vapor return line from the fill nozzle filler neck interface to the dispensing tank or to an adsorption, absorption, incineration, or refrigeration-condensation system or equivalent.

(e) Components of the systems required by § 52.1100(c) can be used for compliance with paragraph (c) of this section.

(f) If demonstrated to the satisfaction of the Administrator that it is impractical to comply with the provisions of paragraph (c) of this section as a result of fill neck configuration, location, or other design features, the provisions of this paragraph shall not apply to

V 38 148 AUG 2 73 XUM

tanks or vehicles existing at the time of promulgation of this regulation.

(g) The State of Maryland shall divide all facilities subject to this section into three classes, the first of which shall equal approximately 70 percent of hydrocarbon emissions from all gasoline stations, the second and third classes shall each equal approximately 15 percent of total hydrocarbon emissions from these sources. The classes shall be known as Class I, Class II, and Class III.

(h) Except as provided in paragraph (k) of this section, the owner or operator of a source included in Class I shall comply with the increments contained in the following compliance schedule:

(1) Contracts for emission control systems or process modifications must be awarded or orders must be issued for the purchase of component parts to accomplish emission control or process modification not later than March 31, 1974.

(2) Initiation of on-site construction or installation of emission control equipment or process change must begin not later than July 31, 1947.

(3) On-site construction or installation of emission control equipment or process modification must be completed not later than March 31, 1975.

(4) Final compliance is to be achieved not later than May 31, 1976.

(5) Any owner or operator of stationary sources, subject to the compliance schedule in this paragraph shall certify to the Administrator, within 5 days after the deadline for each increment of progress, whether or not the required increment of progress has been met.

(i) The owner or operator of a source included in the Class II shall comply with the increments contained in the following compliance schedule:

(1) Contracts for emission control systems or process modifications must be awarded or orders must be issued for the purchase of components parts to accomplish emission control or process modification not later than March 31, 1975.

(2) Initiation of on-site construction or installation of emissions control equipment or process change must begin not later than July 31, 1975.

(3) On-site construction or installation of emission control equipment or process modification must be completed not later than March 31, 1976.

(4) Final compliance is to be achieved not later than May 31, 1976.

(5) Any owner or operator of stationary sources subject to the compliance schedule in this paragraph shall certify to the Administrator, within 5 days after the deadline for each increment of progress, whether or not the required increment of progress has been met.

(j) The owner or operator of a source included in Class III shall comply with the increments contained in the following compliance schedule:

(1) Contracts for emission control systems or process modifications must be awarded or orders must be issued for the purchase of component parts to accomplish emission control or process modification not later than March 31, 1975.

(2) Initiation of on-site construction or installation of emissions control equipment or process change must begin not later than July 31, 1976.

(3) On-site construction or installation of emission control equipment or process modification must be completed not later than March 31, 1977.

(4) Final compliance is to be achieved not later than May 31, 1977.

(5) Any owner or operator of stationary sources, subject to compliance schedule in this paragraph shall certify to the Administrator, within 5 days after the deadline for each increment of progress, whether or not the required increment of progress has been met.

(k) Paragraph (h) and (i) of this section shall not apply:

(1) To a source which is presently in compliance with paragraph (c) of this section and which has certified such compliance to the Administrator by December 31, 1973. The Administrator may request whatever information he considers necessary for proper certification.

(2) To a source for which a compliance schedule is adopted by the State and approved by the Administrator.

(3) To a source whose owner or operator submits to the Administrator, by December 31, 1973, a proposed alternative schedule. No such schedule may provide for compliance after May 31, 1975, in the case of Class I sources, and May 31, 1976, in the case of Class II sources. If promulgated by the Administrator, such schedule shall satisfy the requirements of this paragraph for the affected source.

(l) Nothing in this section shall preclude the Administrator from promulgating a separate schedule for any source to which the application of the compliance schedule in paragraph (b) of this section fails to satisfy the requirements of § 51.15(b) and (c) of this chapter.

§ 52.1100 Gasoline transfer vapor control.

(a) The term "gasoline" means any petroleum distillate having a Reid vapor pressure of four (4) pounds or greater.

(b) This section is applicable in the State of Maryland portion of the National Capital Interstate Air Quality Control Region.

(c) No person shall transfer gasoline from any delivery vessel into any stationary storage container with a capacity greater than 250 gallons unless such container is equipped with a submerged fill pipe and unless the displaced vapors from the storage container are processed by a system that prevents release to the atmosphere of no less than 90 percent by weight of organic compounds in said vapors displaced from the stationary container location.

(1) The vapor recovery portion of the system shall include one or more of the following:

(i) A vapor-tight vapor return line from the storage container to the delivery vessel and a device that will ensure that the vapor return line is connected before gasoline can be transferred into the container.

(ii) Refrigeration-condensation system or equivalent designed to recover no less than 90 percent by weight of the organic compounds in the displaced vapor.

(2) The vapor-laden delivery vessel shall be subject to the following conditions:

(i) The delivery vessel must be so designed and maintained as to be vapor-tight at all times.

(ii) The vapor-laden delivery vessel may be refilled only at facilities equipped with a vapor recovery system or the equivalent, which can recover at least 90 percent by weight of the organic compounds in the vapor displaced from the delivery vessel during refilling.

(d) The provisions of this paragraph (c) of this section shall not apply to the following:

(1) Stationary containers having a capacity less than 550 gallons used exclusively for the fueling of implements of husbandry; provided, however, said containers are equipped with submerged fill pipes.

(2) Any container having a capacity less than 2,000 gallons installed prior to promulgation of this paragraph.

(3) Transfer made to storage tanks equipped with floating roofs or their equivalent.

(e) Compliance schedule: Except as provided in paragraph (f) of this section, the owner or operator of any source subject to this section shall comply with this section on or before January 31, 1974.

(1) Any owner or operator in compliance with this section on the effective date of this regulation shall certify such compliance to the Administrator no later than 120 days following the effective date of this section.

(2) Any owner or operator who achieves compliance with this section after the effective date of this section shall certify such compliance to the Administrator within 5 days of the date compliance is achieved.

(f) Any owner or operator of a source subject to paragraph (e) of this section may, not later than 120 days following the effective date of this section, submit to the Administrator for approval a proposed compliance schedule that demonstrates compliance with the provisions specified in paragraph (e) of this section as expeditiously as practicable but no later than June 30, 1975. The compliance schedule shall provide for increments of progress toward compliance. The dates for achievement of such increments of progress shall be specified. Increments of progress shall include, but not be limited to: submittal of final control plan to the Administrator; letting of necessary contracts for construction or process changes or issuance of orders for the purchase of component parts to accomplish emission control or process modification; initiation of on-site construction or installation of emission control equipment or process modification; completion of on-site construction or installation of emission control equipment or process modification; and final compliance.

(g) Any owner or operator who submits a compliance schedule pursuant to this paragraph shall, within 5 days after the deadline for each increment of progress, certify to the Administrator whether or not the required increment of the approved compliance schedule has been met.

§ 52.1103 Management of Parking Supply.

(a) This section shall apply only in the event that the Administrator finds that the State of Maryland fails to take one or more of the following steps to implement the $2.00 surcharge (or an equivalent measure):

(1) Complete study identifying locations where surcharge or equivalent measure shall apply and submit to the Admininistrator by May 30, 1974.

(2) Submit to the Administrator legally adopted regulations of the State of Maryland or other governmental entities to collect the surcharge or impose the equivalent measure by June 30, 1974.

(3) Institute the collection of the surcharge or impose the equivalent measures in those areas identified in the study by April 1, 1975.

(b) In the event the State of Maryland chooses to adopt any "equivalent measure" to this surcharge, the State of Maryland must submit to the Administrator by December 31, 1973, information demonstrating that such measure will in fact achieve the required result. Failure to demonstrate this fact adequately will cause the Administrator to determine that the State of Maryland is failing to implement the surcharge.

(c) In the event that the Administrator determines that the State of Maryland is failing to implement the $2.00 surcharge (or an equivalent measure) he shall make this determination public in the FEDERAL REGISTER, and this section shall then be immediately effective.

(b) Definitions:

(1) "Construction" means fabrication, erection, or installation of a parking facility, or any conversion of land to use as a parking facility.

(2) "Modification" means any change to a parking facility which increases the vehicle capacity of such facility.

(3) "Enlargement" means any physical change or addition to a parking facility which increases the vehicle capacity of such facility.

(4) "Commenced" means that an owner or operator has undertaken a continuous program of construction, modification, or enlargement.

(5) "Parking facility" (also called "facility") means any facility, building, structure, or lot or portion thereof used primarily for temporary storage of motor vehicles.

(c) No person, after the effective date of this section, shall commence construction of any new parking facility or modification or enlargement of any existing parking facility until he has first received from the Administrator or from an agency approved by the Administrator a permit stating the construction, modification or enlargement of such facility will not interfere with the attainment or maintenance of applicable Federal air quality standards.

(d) In order for any agency to be approved by the Administrator for purposes of issuing permits for construction of any new parking facility or any modification or enlargement of any existing parking facility, such agency shall demonstrate to the satisfaction of the Administrator that:

(1) Requirements for permit applications and issuance have been established. Such requirements shall include, but not be limited to, a requirement that before a permit may be issued, the following findings of fact or factually supported projections must be made:

(i) The location of the facility.

(ii) The total motor vehicle capacity before and after the construction, modification, or enlargement of the facility.

(iii) The normal hours of operation of the facility and the enterprises and activities which it serves.

(iv) The number of people using or engaging in any enterprises or activities which the facility will serve.

(v) The number of motor vehicles using the facility on an average hourly basis and a peak hour basis.

(vi) A projection of the geographic areas in the community from which people and motor vehicles will be drawn to the facility. Such projections shall include data concerning the availability of public transit from such areas.

(2) Criteria for issuance of permits have been established and published. Such criteria shall include, but shall not be limited to:

(i) Full consideration of all facts contained in the application.

(ii) Provisions that no permit shall be issued if such permit will result in the increase of VMT within any area, the air quality of which fails to meet applicable Federal air quality standards.

(3) Agency procedures provide that no permit for the construction, enlargement or modification of a parking facility covered by this section shall be issued without notice and opportunity for public hearing. The public hearing may be of the legislative type; the notice shall conform to the requirements of 40 CFR Part 51.4(b); and the agency rules of procedure may provide that if no notice of intent to participate in the hearing is received from any member of the public (other than the applicant) prior to 7 days before the scheduled hearing date, no hearing need be held. Such a requirement, if imposed, shall be noted prominently in the required notice of hearing.

§ 52.1096 Reduction of employee parking.

(a) Definitions

(1) Governmental Entity—means a federal, state or local department, agency bureau, board, office, commission, district, or unit or any other type (excluding foreign embassies) which employs personnel paid wholly with public funds.

(2) Commercial Parking Rate—means the average rate charged by commercial parking facilities (excluding on-street parking meters) on a monthly basis within a 1 mile radius of a facility or installation covered by this section.

(3) Served by Public Transit—means that such transit is available during working hours within a reasonable walking distance of the employee's place of employment, even though such transit may not serve the area of the employee's residence.

(4) State Agency means State of Maryland, Bureau of Air Quality Control.

(b) This section shall be applicable in the State of Maryland portion of the National Capital Interstate Air Quality Control Region.

(c)(1) All facilities or installations owned, operated or leased by the federal government which control, operate or lease a parking facility containing 25 or more spaces, shall by January 1, 1974, report to the Administrator the number of parking spaces in each such facility as of October 15, 1973. This number shall not include residential (including barracks) parking spaces contained in or on the facility or installation.

(2) The chief administrative officer of all facilities or installations subject to paragraph (c)(1) of this section, shall by April 1, 1974, submit to the Administrator a detailed report specifying the level of public transit service to the facility and also the parking space utilization at the facilities or installations under his or her control at that time. This report shall include but is not limited to:

(i) All public transit lines which have stops within one-half mile of any such installation or facility.

(ii) The practicality of the operation of shuttle service from presently well serviced locations such as Friendship Heights, Silver Spring to the facility or installation during morning and afternoon peak hours.

(iii) A summary of the existing parking situation at the facility including:

(a) Average vehicle occupancy calculated from a visual survey of vehicles entering and leaving the facility over a full week's time.

(b) The percentage of vehicles with one, two, three and four occupants.

(c) The total number of vehicles using the facility daily.

Should the report state that the facility or installation is not presently served by public transit, this report shall be reexamined, updated, and submitted annually not later than April 1 of each successive year.

(d)(1) All facilities or installations owned, operated, or leased by state and local governments which control, operate or lease a parking facility containing 25 or more spaces, shall by January 1, 1974 report to the State Agency the number of parking spaces in each such facility as of October 15, 1973. This number shall not include residential parking spaces contained in or on the facility or installation or publicly owned commercial type parking facilities.

V 38-148
AUG 2 73
XUM

(2) The chief administrative officer of all facilities or installations, subject to paragraph (d)(1) of this section, shall be April 1, 1974 submit to the State of Maryland, Bureau of Air Quality Control, a detailed report specifying whether the facilities or installations under his or her control are served by public transit at that time. This report shall include, but is not limited to:

(i) All public transit lines which have stops within one-half mile of any such installation or facility.

(ii) The practicality of the operation of shuttle service from presently well serviced location such as Friendship Heights, Silver Spring to the facility or installation during morning and afternoon peak hours.

(iii) A summary of the existing parking situation at the facility including:

(*a*) Average vehicle occupancy calculated from a visual survey of vehicles entering and leaving the facility over a full week's time.

(*b*) The percentage of vehicles with one, two, three and four occupants.

(c) The total number of vehicles using the facility daily. Should the report state that the facility or installation is not presently served by public transit, this report shall be reexamined, updated and submitted annually, not later than April 1 of each successive year.

(e) Each governmental entity subject to paragraphs (c)(1) and (d)(1) of this section, and which in the opinion of the Administrator of State Agency is served by public transit shall comply with either paragraphs (e)(1) or (2) of this section. This governmental entity shall either:

(1) Adopt a plan whereby a charge equivalent to commercial parking rates will be imposed for parking at any such parking facility owned, operated or leased by the governmental entity. In no case shall the charge be less than $20.00 per space per month. Any funds collected by any governmental entity under this subparagraph may be used for any legitimate governmental purpose, *Provided, however*, That no such funds shall be used to subsidize directly or indirectly employee parking; or

(2) Adopt a plan to reduce the number of parking spaces in each such facility from the number in existence on October 15, 1973, according to the following:

(i) By November 30, 1974, a reduction of 4 percent

(ii) By February 28, 1975, a reduction of 8 percent

(iii) by May 31, 1975, a reduction of 12 percent

(f)(1) Each entity of the Federal government subject to paragraph (e) of this section shall submit to the Administrator no later than June 30, 1974, a detailed compliance schedule showing steps it will take to achieve either the required reduction of spaces, or the initiation of commercial parking rates. In the case of a reduction of spaces, the schedule shall include provisions for marking those spaces to be eliminated in a manner obvious to members of the public (painting over, roping off, etc.). In the case of the initiation of commercial parking rates the schedule shall include:

(i) A date for the initial imposition of the charge. Such date shall be no later than January 1, 1975.

(ii) The amount to be charged per space per month.

(iii) Any exceptions to the charge (e.g., handicapped personnel, certain high level officials of the governmental entity), including documentation of the need and rationale for such exceptions.

(iv) Provisions for annual reevaluation of the amount charged per space per month based upon any changes in commercial parking rates.

(2) Each entity of a State or local government subject to paragraph (e) of this section shall submit to the State Agency no later than June 30, 1974, a detailed compliance schedule showing steps it will take to achieve either the required reduction of spaces or the initiation of commercial parking rates. In the case of a reduction of spaces, the schedule shall include provisions for marking those spaces to be eliminated in a manner obvious to members of the public (painting over, roping off, etc.). In the case of the initiation of commercial parking rates, the schedule shall include:

(i) A date for the initial imposition of the charge. Such date shall be no later than January 1, 1975.

(ii) The amount to be charged per space per month.

(iii) Any exceptions to the charge (e.g., handicapped personnel, certain high level officials of the governmental entity), including documentation of the need and rationale for such exceptions.

(iv) Provisions for annual reevaluation of the amount charged per space per month based upon any changes in commercial parking rates.

(g) Failure to submit any report or compliance schedule as required by this section shall render the person so failing to comply in violation of an applicable implementation plan and subject to enforcement action under § 113 of the Clean Air Act. Any governmental entity which either allows vehicles to be parked in excess of the number allowable, or which fails to collect commercial parking charges, shall likewise be in violation and subject to enforcement.

§ 52.1102 Elimination of drycleaning losses.

(a) Definition:

(1) A photochemically reactive solvent is any solvent with an aggregate of more than 20 percent of its total volume composed of the chemical compounds classified below or which exceeds any of the following individual percentage composition limitations, referred to the total volume of solvent:

(i) A combination of hydrocarbons, alcohols, aldehydes, esters, ethers or ketones having an olefinic or cyclo-olefinic type of unsaturation: 5 percent;

(ii) A combination of aromatic compounds with eight or more carbon atoms to the molecule except ethylbenzene: 8 percent;

(iii) A combination of ethylbenzene, ketones having branched hydrocarbon structures, trichloroethylene or toluene: 20 percent;

Whenever any organic solvent or any constituent of an organic solvent may be classified from its chemical structure into more than one of the above groups of organic compounds, it shall be considered as a member of the most reactive chemical group, that is, that group having the least allowable percent of the total volume of solvents.

(b) This section is applicable in the Maryland portion of the National Capital Interstate Air Quality Control Region.

(c) After May 31, 1974, no person shall cause, suffer, allow, or permit the use of any photochemically reactive organic solvent for the purpose of drycleaning of clothing and household items.

(d) The owner or operator of any premise subject to the requirements of this section shall within 30 days of the effective date of this regulation submit to the Administrator the following information:

(1) Location of premise.

(2) Source of supply and identifying name, number or purchase specification for all drycleaning solvents used.

(e) Any owner or operator who fails to fulfill any requirement of this section shall be in violation of an applicable implementation plan and subject to enforcement action under section 113 of the Clean Air Act.

§ 52.1099 Peak hour delivery ban regulation.

(a) Definitions:

(1) *Peak Hours*—The hours 6:00 AM to 9:30 AM Monday through Saturday.

(2) *Delivery Ban*—A program to reduce emissions from in-use heavy duty gasoline powered vehicles employed to deliver goods within the specified peak hours.

(3) *Heavy Duty Gasoline Powered Vehicle*—Any motor vehicle either designated primarily for transportation of property and rated more than 6,000 pounds GVW and which is powered by a gasoline burning engine. This shall not include mail trucks, and emergency type vehicles such as fire trucks and police wagons.

(4) All other terms used in this section which are defined in 40 CFR Part 51, Appendix N are used therein with the meaning so defined.

(b) This regulation is applicable in the State of Maryland portion of the National Capital Interstate Air Quality Control Region.

(c) The State of Maryland counties of Prince Georges, Montgomery and all incorporated cities located within such county shall establish a peak hour, heavy duty gasoline powered vehicle use prohibition on streets and highways over which each entity has ownership and control. No later than February 1, 1974, each governmental entity shall submit to the Administrator a legally enforceable program which shall include:

(1) Provisions for initiation of the ban no later than June 30, 1974.

(2) The prohibition shall state that heavy duty gasoline powered vehicles making deliveries in violation of the prohibition shall either be towed away, or the owner and/or operator subject to a fine of up to $100, or both.

(d) The State of Maryland, counties and all incorporated cities within such counties subject to this section shall submit, no later than February 1, 1974, a detailed compliance schedule showing the steps it will take to establish and enforce a peak hour delivery ban. The compliance schedule shall include the date by which the jurisdictions will recommend needed regulations to the appropriate body, and will identify the state, county, or city official responsible for enforcement.

(e) Failure to comply with any provisions of this regulation shall render such person in violation of a requirement of an applicable implementation plan and subject to enforcement action under section 113 of the Clean Air Act. A state or other governmental entity will be considered to have failed to comply with the requirements of this section if it fails to timely submit any required compliance schedule.

§ 52.1104 Limitation of off-street parking.

(a) This section shall apply only in the event that the Administrator finds that the State of Maryland fails to take one or more of the following steps to implement the $2.00 surcharge (or an equivalent measure):

(1) Complete study identifying locations where surcharge or equivalent measure shall apply and submit to the Administrator by May 30, 1974.

(2) Submit to the Administrator legally adopted regulations of the State of Maryland or other governmental entities to collect the surcharge or impose the equivalent measure by June 30, 1974.

(3) Institute the collection of the surcharge or impose the equivalent measure in those areas identified in the study by April 1, 1975.

(b) In the event the State of Maryland chooses to adopt any "equivalent measure" to this surcharge, the State of Maryland must submit to the Administrator by December 31, 1973, information demonstrating that such measure will in fact achieve the required result. Failure to demonstrate this fact adequately will cause the Administrator to determine that the State of Maryland is failing to implement the surcharge.

(c) In the event that the Administrator determines that the State of Maryland is failing to implement the $2.00 surcharge (or an equivalent measure) he shall make this determination public in the Federal Register, and this section shall then be immediately effective.

(d) Definition:

(1) The term "off-street parking facility" means any land or building or portion of a building set aside for the purpose of storing a maximum capacity of 10 or more vehicles on a temporary basis.

(e) Each governmental entity, public agency, private corporation, partnership or sole proprietor owning or operating an off-street parking facility located within the State of Maryland portion of the National Capital Interstate Air Quality Control Region shall, within 30 days of the effective date of this regulation, report to the Administrator the number of parking spaces in each such facility under its ownership or control of the effective date of this regulation. The number used solely for the storage of vehicles of persons who reside within ¼ mile of the facility shall not be counted.

(f) Each such owner or operator of any off-street parking facility located within the area specified in paragraph (c) of this section shall reduce the number of affected parking spaces in each such facility from the number in existence as of the date this regulation becomes effective according to the following schedule:

(1) Within 90 days of the effective date—a 5 percent reduction;

(2) Within 120 days of the effective date—a 10 percent reduction;

(3) Within 180 days of the effective date—a 15 percent reduction.

(g) Each such owner or operator of an off-street parking facility subject to the requirements of this section shall submit to the Administrator, no later than 60 days after the effective date of this section, a detailed compliance schedule showing the steps it will take to achieve the required reduction in parking spaces. Such schedule shall provide for the marking in some manner obvious to the public (such as painting over, roping off, or the like) of the eliminated spaces on which parking is not permitted pursuant to this section.

(h) Failure to submit a compliance schedule as required by this section shall render the person or governmental entity so failing in violation of a requirement of an applicable implementation plan and subject to enforcement action under section 113 of the Clean Air Act. Any owner or operator of an off-street parking facility who allows any vehicle to be parked on any parking space which has been eliminated pursuant to this section, or who fails to mark clearly those spaces which have been eliminated, shall likewise be in violation and subject to enforcement.

[FR Doc.73-15628 Filed 8-1-73;8:45 am]

[40 CFR Part 52]

VIRGINIA; APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

Notice of Proposed Rule Making

The transportation control plan submitted by the Commonwealth of Virginia for attainment of the primary national ambient air quality standards for carbon monoxide (CO) and photochemical oxidants (Ox) for the Virginia portion of the National Capital Interstate Region was disapproved in part on June 15, 1973 (38 FR 16563). This notice of proposed rulemaking sets forth regulations which in the Administrator's judgment could be implemented in addition to the approvable portions of the Virginia plan to attain and maintain the national standards for carbon monoxide and photochemical oxidants in the Virginia portion of the National Capital Interstate Region.

If revisions to the Virginia plan are submitted and determined to be approvable prior to Federal promulgation, these proposed regulations will be withdrawn. If revisions to the Virginia plan are submitted and determined to be approvable after Federal promulgation, then those Federal regulations will be rescinded. It is the desire of the Environmental Protection Agency that the plan to attain and maintain the carbon monoxide and photochemical oxidant standards in the Virginia portion of the National Capital Interstate Region be a State plan carried out by the Commonwealth of Virginia or its designated representative.

Transportation Control Alternatives

Analysis of the air quality problems in the National Capital Interstate Region, which is partly located in the Commonwealth of Virginia, reveals that both photochemical oxidants and carbon monoxide exhibit unacceptably high levels in the region, with the former being the pacing pollutant.

Since a substantial proportion of the photochemical oxidant problem and almost all of the carbon monoxide problem are the result of automotive vehicle emissions, measures to reduce emissions from individual vehicles and measures to reduce vehicular travel can be effective in improving air quality. Since a significant percentage of the oxidant-producing hydrocarbon emissions stem from vehicle-related sources associated with gasoline handling operations, measures to reduce these operational losses can also provide a measurable improvement in the regional air quality.

Reductions in emissions from vehicles can be obtained through inspection and maintenance programs and from incorporation of various retrofit devices. Reductions in Vehicle Miles Traveled (VMT) can be achieved through various pricing and taxing schemes for road use, adoption of parking restrictions, including limitations of available number of parking spaces, restrictions on idling or cruising of fleet vehicles, selective control of goods movement, the establishment of vehicle-free zones, establishment of a four-day work week, programs promoting the use of carpools or alternative modes of transportation, and limitations on gasoline usage. It must be emphasized that, in order to be effective, each VMT control measure proposed or adopted by the Commonwealth of Virginia must be reflected by identical or equivalent measures in the neighboring jurisdictions of Maryland and the District of Columbia for their portions of the National Capital Interstate Region.

In effecting substantial improvements in air quality, improvements in and expansion of public transportation facilities are a necessary and effective com-

V 38-148
AUG 2 73
XUM

plement facilitating use of this alternative to the private automobile. Clearly, public transit improvements must be implemented in concert with the appropriate level of vehicle restraints, as determined by the regional characteristics of the private automobile use demand elasticity. Such improvements as greater coverage, increased frequency of service, improved reliability, increased comfort and convenience, a reasonable cost, and adequate personal security will further encourage the use of public transit alternatives to the private automobile.

SUMMARY

The Virginia plan, as amended by the July 9, 1973, submission, in its demonstration of the attainment of the photochemical oxidant and carbon monoxide air quality standards, utilizes seven general measures. These are: the Federal Motor Vehicle Control Program, the Virginia Motor Vehicle Inspection and Maintenance Program for light duty vehicles, improvement in public transportation, increased terminal (or parking) costs, car pool locator service, restrictions on aircraft ground operations, and control of stationary source emissions. According to the Virginia plan, which utilizes data by the Metropolitan Washington Council of Governments for the entire National Capital Interstate Region, peak period hydrocarbon emissions were 63.3 tons for the region as a whole and peak period carbon monoxide emissions were 1133.5 tons in 1972. In order to demonstrate attainment of standards, the Council of Governments' calculations indicate that hydrocarbon emissions must be reduced by 67 percent of the 1972 emissions in the National Capital Interstate Region to a level of 20.9 tons/peak period, and that carbon monoxide emissions must be reduced by 55.6 percent of the 1972 emissions in the Region to a level of 501 tons/peak period.

Including projected increase in vehicle miles of travel, the Federal Motor Vehicle Control Program will reduce hydrocarbon peak period emissions by 47 percent to 33.6 tons and will reduce carbon monoxide peak period emissions by 49.0 percent to 576 tons/peak period by 1977. These estimates are adjusted to reflect the 1975 interim motor vehicle emission standards as announced on April 11, 1973.

Since the 21-day period for public comment on the additional submission has not been completed, it is impossible for the Administrator to make a final decision on approval or disapproval of the strategies included in the Virginia plan at this time. This decision must take into consideration all comments received during this time. However, preliminary review by EPA indicates that certain strategies are likely to be approvable. Accordingly, the Agency is proposing only those items which, when added to the approvable measures, are necessary to attain the National Ambient Air Quality Standards.

If an apparently approvable strategy is determined not to be approvable, additional measures will be proposed.

The information contained in the additional submissions by Virginia appears to remedy many of the deficiencies on which the Administrator's June 15 decision was based.

The following is a summary of the actions EPA is proposing to take with respect to the Virginia Plan:

Federal Motor Vehicle Control Program—Reductions appear to be approvable based on projected vehicle populations and emission factors.

Motor Vehicle Inspection Program—Appears to be approvable, based upon proposed regulation and supporting data.

Improvements in Public Transit—

(a) Virginia participation in the area wide addition of 750 buses to current fleet—appears to be approvable, contingent upon clarification of certain administrative details.

(b) Exclusive Bus Lanes—appears to be approvable.

(c) System Improvements (i.e., shelters, fringe parking, improved scheduling)—Appears to be approvable.

Increased Terminal Charges—

(a) Elimination of free off-street, employee parking in certain areas—does not appear to be approvable.

(b) Elimination of on-street long-term parking in certain areas—appears to be approvable.

(c) $2.00 parking surcharge (or an equivalent measure)—appears to be approvable.

Bus/Carpool Locator Program—Appears to be approvable.

Restrictions on Aircraft Ground Operations—Partial reductions are allowable; appears to be partially approvable.

Increased Control of Stationary Source Emissions—Not approvable at this time due to lack of adopted regulations.

Due to the fact that:

a. Full reductions claimed for aircraft emissions do not appear to be allowable,

b. The plan did not include controls over heavy duty gasoline powered vehicles,

c. The portion of the plan dealing with elimination of free off-street employee parking does not appear to be approvable, and

d. The controls over stationary sources cannot be approved at this time.

EPA is proposing the following measures:

a. Initiation of commercial-type parking rates or reduction by 12 percent the available spaces at any federal, state, or local government facility which has 25 or more parking spaces and which is located in a high density employment area which is well serviced by public transit.

b. Retrofit by 1975 of all pre-1968 vehicles with a vacuum spark advance disconnect kit.

c. Retrofit of light duty 1971–1975 fleet vehicles (including federal government vehicles) and taxicabs with an oxidizing catalyst retrofit—beginning in mid-1976, to be completed by mid-1977.

d. Controls of emissions of hydrocarbons due to gasoline handling; both from the delivery truck to underground tank and from the pump to the vehicle. Implementation begins in 1974 and is fully completed by 1977.

e. Ban of heavy-duty-gasoline-powered vehicles (except emergency vehicles, mail trucks, etc.) from 6:00 a.m. to 9:30 a.m. beginning July 1, 1974.

Finally, since the $2.00 surcharge proposed by Virginia is integral to the success of this plan, EPA is proposing contingency strategies to be implemented if appropriate steps are not taken to implement the surcharge. These contingency measures are:

a. A ban on the construction, modification or enlargement of any parking facility without having first obtained a permit from the Administrator.

b. A phased 15 percent reduction in the number of off-street parking spaces.

The Administrator invites comments on these and any other measures which may be used to achieve the national ambient air quality standards for photochemical oxidants and carbon monoxide.

TWO-YEAR EXTENSION TO ACHIEVE STANDARDS

The Administrator proposes to give a two-year extension for the attainment of the standard in the Commonwealth of Virginia. To attain the standards in 1975 would require stringent restraints on vehicle miles traveled which could not be considered to be "reasonably available," within the meaning of section 110 (c) of the Clean Air Act, or the implementation of a widespread catalytic retrofit program which could not be implemented due to technological problems before 1977. Although some measures have not been proposed here which have appeared in some other proposals, such as gasoline limitations and a selective vehicle exclusion program involving colored tags, the reduction in vehicle miles traveled expected from measures contained herein appears to be substantial and adequate to fulfill the requirement that reasonably available alternative measures be employed before an extension is given for any strategy. The plan proposed herein, along with the apparently approvable measures submitted by the Commonwealth of Virginia applies the reasonably available alternative means of control at the earliest possible dates. Comment is invited on any measures which have not been considered and applied and which can be considered to be reasonably available.

COMPILATION OF CONTROL STRATEGY EFFECTS FOR THE NATIONAL CAPITAL INTERSTATE REGION ON MAY 31, 1977

	Carbon Monoxide		Hydrocarbons	
	Tons per Peak Period	Percent of Total Reduction Required	Tons per Peak Period	Percent of Total Reduction Required
Stationary Source Emissions Without Control Strategy	78		14.3	
Expected Reductions From:				
(a) Dry Cleaning Vapor Recovery	0	0	1.1	8.7
(b) Gasoline Handling Vapor Recovery	0	0	5.0	39.4
(c) Other Statutory Source Rule Strengthening	0	0	0	
Stationary Source Emissions Remaining	78		8.2	
Mobile Emissions from Highway Light and Heavy Duty Vehicles without Control Strategy	498		19.3	
Expected Reductions From:				
(a) Inspection and Maintenance	26	34.6	1.5	11.8
(b) VSAD Retrofit, pre-'68 cars	3	4.0	0.4	3.2
(c) Catalytic Retrofit of Fleet LDV's	5	6.7	0.2	1.6
(d) Mass Transit Improvements	21	28	2.7	21.2
(e) HDV Peak Hour Delivery Ban	27	36	1.0	7.9
(f) Aircraft Model Program	9	12	0.8	6.4
Mobile Emissions Remaining	416		12.7	
Total Emissions without Strategy (FMVCP Included)	576		33.6	
Total Reductions	82	100.3	12.7	100.2
Total Emissions Remaining	494		20.9	

PROPOSED CONTROLS ON STATIONARY SOURCES

The major stationary sources of hydrocarbon emissions, which have been identified in the Virginia plan, are the gas handling losses which occur in the distribution system for gasoline fuel, and the emissions losses from dry cleaning establishments. Since present regulations are inadequate to effect any substantial control of the resultant emissions, from gasoline distribution, the Commonwealth of Virginia has proposed regulations and compliance schedules which would reduce gasoline handling losses by 90 percent.

The regulation proposed by the Commonwealth of Virginia for control of hydrocarbon evaporative emissions at retail service stations and fleet owned stations requires the installation of 90 percent effective vapor recovery devices at stations handling over 50,000 gallons per month by May 31, 1975, and at stations handling over 25,000 gallons per month by May 31, 1977.

It is estimated that installations of 90 percent effective vapor recovery devices on all these service stations throughout the region will result in a total reduction of hydrocarbon emissions of 5.0 tons/peak period (6–9 a.m.) by May 31, 1977.

The Commonwealth of Virginia proposed the following additional regulations for the control of hydrocarbon emissions from stationary sources in the Northern Virginia portion of the National Capital Interstate Region:

(a) *Effluent Oil Water Separators*, which recover more than 200 gallons per day of any petroleum product, are required to be equipped with vapor recovery devices which reduce the emissions of all hydrocarbon vapors and gasses into the atmosphere by at least 90 percent by weight.

(b) *Storage of Petroleum Products*, in any container of more than 40,000 gallons capacity is forbidden unless the container is a pressure tank maintaining working pressures sufficient at all times to prevent hydrocarbon vapor or gas loss to the atmosphere, or is equipped with a floating roof or a vapor recovery system.

(c) *Organic Liquid Loading (Bulk Terminals)*, shall be accomplished in such a manner that all displaced vapor and air will be vented out to a vapor collection system.

(d) *Gasoline Loading (Submerged Fill)*, into any stationary tank with a capacity of 250 gallons or more is forbidden unless such tank is equipped with a vapor loss control device, or is a pressure tank as described in section (b).

Since photochemical reactive solvents are not used by any dry cleaning establishment in the Virginia portion of the National Capital Interstate Region, the hydrocarbon emission reduction by 1.1 tons per peak period is achievable without further specific action by Virginia.

The foregoing regulations as proposed by the Commonwealth of Virginia appear to be adequate to achieve the anticipated reduction in hydrocarbon emissions. However, the Administrator cannot approve these proposed regulations at this time, since 40 CFR Part 51 requires that all regulations dealing with the control of emissions from stationary sources be adopted at the time of submittal of the plan. EPA is therefore proposing to promulgate similar regulations which will be rescinded upon submission of equivalent regulations as adopted by the Commonwealth of Virginia.

PROPOSED CONTROLS ON MOBILE SOURCES (NON-AIRCRAFT)

The Commonwealth of Virginia, in its July 9, 1973 submission of additions and revisions to the implementation plan, proposes an idle mode emission inspection program with an initial failure rate of 30 percent in conjunction with its eixsting annual safety inspection program. The proposed timetable for legal authority (by July 1974), initiation of the inspection program (by January 1975) and completion of the first cycle (by June 1975) provides an enforceable measure for improving air quality by means of a 10 percent reduction in hydrocarbon emissions from light duty vehicles by mid-1975. Therefore, the Administrator feels that this portion of the Commonwealth of Virginia plan is approvable. Anticipated emissions reductions from the inspection/maintenance programs as proposed throughout the National Capital Interstate Region, are 1.5 tons per peak period for hydrocarbon and 26 tons per peak period for carbon monoxide.

In order to comply with the requirements of the Clean Air Act that primary standards be achieved as expeditiously as practicable, the Administrator proposes to promulgate a regulation requiring that on or before January 1, 1975, all pre-1968 light duty vehicles be retrofitted with a vacuum spark advance disconnect device which will reduce hydrocarbon emissions from such vehicles by 25 percent. If implemented throughout the National Capital Interstate Region, installation of these devices will result in a total reduction of hydrocarbon emissions of 0.4 tons per peak period and a total reduction of carbon monoxide emissions of 3 tons per peak period.

In order to attain the primary air quality standard by May 31, 1977, additional measures are required beyond those proposed by the Commonwealth of Virginia. Since catalytic retrofit devices for light duty vehicles are expected to be readily available by 1977, it is proposed to require installation of these devices on selected segments of the light duty vehicle population. These segments include all 1971–1975 LDV fleet vehicles (e.g., taxis, GSA vehicles, rental cars, fleet delivery vehicles), capable of operating on 91 RON gasoline.

The regulation proposed by the Administrator will require that the vehicles designated be equipped with catalytic retrofit devices by May 31, 1977, effecting a 50 percent hydrocarbon emission reduction for each vehicle. Exemptions will be allowed for all 1975 vehicles originally equipped with the oxidizing catalytic converter on those vehicles which are certified to meet the original statutory federal emission standards for 1975. Based on information currently available to him, the Administrator estimates that:

Fleet vehicles account for 6 percent of total mobile source emissions. On the basis that one-third of the fleet vehicles will be older than two years (pre-1976), and catalytic retrofits can reduce automotive emission from each vehicle by 50 percent, it is apparent that this measure, when applied on a Region-wide basis, will result in a hydrocarbon emission reduction of 0.2 tons/peak period.

In the event that the measures proposed herein prove to be inadequate, the Administrator is required by law to apply additional reasonably available alternatives, including catalytic retrofit of other segments of 1968–1975 light duty vehicle population. Canidate segments include all light duty trucks, or passenger vehicles of specified model years. The public is urged to comment on these or any other type of control measure that may help to achieve the National Ambient Air Quality Standards.

V 38-148 AUG 2 73 XUM

PROPOSED REDUCTIONS IN VMT

According to computer printouts provided by the Metropolitan Washington Council of Governments, the Commonwealth of Virginia's transportation package (including participation in the area wide expansion of transit by 750 buses, exclusive bus carpool lanes, a carpool locator service, and extensive parking restrictions) will result in a 12 percent reduction in 6–9 a.m. VMT and a corresponding reduction in total trips.

The Virginia plan includes the following strategies under its transportation measures:

(1) Participation with D.C. and Maryland in an area wide improved transit system, including the addition of 750 buses to the current area fleet, the establishment of exclusive bus lanes, bus shelters, and fringe parking facilities.

(2) Increased terminal cost, including the elimination of free parking and the establishment of a $2.00 parking surcharge for long term commuter parking in all areas adequately served by mass transit.

(3) Establishment of a computerized carpool locator service.

This portion of the plan is central to the Virginia plan for reduction of HC and CO emissions. Therefore, to avoid confusion and expedite comments, a discussion of the elements that make up this portion of the plan shall be included.

a. Elimination of Free Parking—The Commonwealth of Virginia proposes to have EPA eliminate off-street parking for federal employees; once this has occurred, the plan proposes that other employers (state, local government and private businesses) will then begin a program to eliminate free parking for their employees. The plan also calls for a reduction of available on-street spaces which will be achieved by the elimination of street parking for commuters.

The elimination of on-street spaces will initialy be imposed in the Rosslyn and Crystal City areas of Arlington County and downtown Alexandria. Other high density employment areas will be analyzed for future restrictions as bus service expands. This program is scheduled for implementation in early 1975.

On the basis of the information submitted by Virginia, it is the Administrator's opinion that the portion of the Virginia plan dealing with elimination of on-street parking is approvable.

The reduction in off-street parking proposed by the plan is conceptually acceptable; however, there is not enough of a firm commitment indicated in the plan to permit approval of this element of the plan at this time. Therefore, EPA intends to propose those same strategies which Virginia had suggested in its plan, and thereby provide the firm commitment to implement Virginia's strategy.

As pointed out in Virginia's plan, reduction of emission due to work trips by Federal Government employees into, out of, and within Virginia is integral to achieving air quality goals. Therefore, EPA feels it has the responsibility to aid Virginia in the control of these emissions. As a result, EPA will follow Virginia's suggestion and propose a federal regulation which would effectively reduce emissions as a result of commuter trips by federal employees. This will be done by requiring Federal Facilities in high density areas served by mass transit to either eliminate free parking (by establishing commercial type rates) or to reduce the available parking spaces in these facilities by 12 percent.

Since the other jurisdictions in the AQCR have also proposed to eliminate free parking for employees of its government and Virginia's plan is unclear on this point, EPA is also proposing that State and local government parking facilities which have 25 or more spaces and which are located in high density employment areas which are served by public transit either eliminate free parking or reduce the available spaces by 12 percent. It is EPA's opinion that since this plan is regional in nature that this action is necessary to insure that the reductions achievable by this measure do, in fact, occur.

The Administrator feels that the result of this proposal will be to induce employees to utilize alternate modes of transportation, such as buses and carpools and thereby reduce the VMT in the area. It should be noted that this proposal should result in a reduction of VMT for the entire National Capital area because it will reduce VMT of employees from all three jurisdictions.

It is the Administrator's opinion that, at a minimum, the Rosslyn, Crystal City, Pentagon, and Downtown Alexandria areas, along with other areas would, in all likelihood, need to be included in any definition of "high density employment area which is serviced by mass transit" for this strategy to be effective.

b. $2.00 Surcharge (or its equivalent)

The Virginia plan proposes the imposition of a $2.00 per day surcharge (or an equivalent measure) on all long term parking facilities in employment areas which are adequately served by mass transit. Identification of the areas where the surcharge is to be imposed should be made by Virginia within the next 10 months upon completion of studies of the matter.

This proposal calls for the charge to be implemented and enforced by Arlington County or the Northern Virginia Transportation Commission (NVTC). The Administrator feels that if implemented, according to the schedule provided in the plan, this proposal is approvable.

It is well documented that no matter how well designed and operated a mass transit system is, unless there are disincentives to the use of the private automobile, mass transit shall be ineffective. Therefore, Virginia's proposals for the surcharge is integral to the success of the plan.

The Administrator wants to make it clear that if for any reason this strategy is not implemented according to schedule, he will institute equivalent measures. In order to avoid any delay in implementation of such equivalent measures and to invite timely public comment, the Administrator is proposing contingency measures in the plan which will become effective if it becomes apparent that the surcharge will not be implemented. Specifically, a phased 15% reduction in existing off-street parking spaces would be imposed, as well as ban on the construction, modification or enlargement of any parking facility without first obtaining a permit from the Administrator or a specified local Agency. Public comments are solicited on these contingency proposals.

c. Mass Transit Improvements

The development of an effective mass transit system is essential to the development of an effective transportation control strategy. If this control plan is to be successful, a sufficient number of buses with convenient service and adequate schedules must be provided. The improvement in the transit system is an area wide measure in which Virginia will participate with District of Columbia and State of Maryland.

The Virginia plan proposes that NVTC, which represents the local governments in Northern Virginia in public transportation matters, shall take all possible measures to assure that the area wide transit system's current fleet size is increased by 750 buses and that service and convenience for commuters is improved. Included in this proposal are provisions for installing bus shelters, providing expanded fringe parking, additional public information and improved scheduling. In addition, Virginia plans to institute a number of exclusive bus lanes on major highway corridors in the area. The local jurisdictions in conjunction with NVTC have allocated funds to provide subsidies to support a lowering and equalization of transit fares throughout Northern Virginia. All of these measures are meant to provide the increased mass transit service which will be necessary if air quality standards are to be achieved.

Based on the information contained in the documents submitted by Virginia, the Administrator believes that the proposals for increased mass transit are approvable, on the condition that certain administrative details are provided to him by the Commonwealth. Specifically, the arrangements or agreements which will trigger the expansion of the fleet should be clarified, since it is necessary for EPA to determine what actions are necessary to bring about any additional purchases of buses. Also a clarification on the schedule showing the projected incremental increases in fleet size should be provided.

d. Bus/Carpool Locator System

The Virginia plan recognizes the need for more efficient utilization of current automobile usage. Thus, the plan proposes a voluntary bus/carpool locator matching service. This system will attempt to assemble lists of commuters with similar work schedules and home, work locations, and will be phased in starting with a pilot project during 1973. Full operation of the system is scheduled for April 1974. The Administrator feels that this measure is approvable, and encourages residents of the National Capital area to take advantage of this service.

Along with the benefits accruing to this system in terms of a potential decrease of vehicle miles traveled, this system also has the advantages of fuel conservation and it will mitigate the impact of disincentives to private auto use (i.e., the surcharge and elimination of free employee parking).

e. Heavy Duty Vehicle Restraints

In addition to the transportation measures described above, the Virginia plan discusses the problem of heavy-duty gasoline-powered vehicle emissions. The plan does not propose any measures to control these emissions; however, the plan discusses the possibility of either a heavy-duty vehicle ban between 6–9 a.m. or an emissions control retrofit program for Heavy Duty Trucks. The discussions indicate the need to achieve a 50 percent reduction in emissions from such vehicles to meet the standards by 1977. Such a strategy would be complementary to the approvable heavy duty emission control measures included in the District of Columbia plan and the concepts discussed in the Maryland plan.

Since the Virginia plan does not actually propose any heavy duty truck measures, the Administrator must propose a regulation which will achieve the required reductions. Therefore, EPA is proposing a delivery ban on heavy duty gasoline-powered vehicles which will be effective during the peak traffic period (6:00 a.m.–9:30 a.m.). The ban will take effect July 1, 1974. The Administrator recognizes that the District of Columbia will impose this ban on January 1, 1974; however, in order to allow Virginia adequate time to adopt regulations and plan for implementation of this ban, the additional implementation time is warranted.

EPA has not proposed the heavy duty vehicle retrofit strategy discussed by the state of Virginia. Though a heavy duty retrofit strategy was proposed by the State of New York and approved by EPA, the uncertainties in its implementation date are such that EPA does not feel justified in proposing its establishment as a Federal Program. If the Commonwealth of Virginia wishes to propose a heavy duty strategy as a state program in a manner similar to New York's, then it may well be approved provided it is consistent with the New York Program.

It is recommended that if the Virginia Air Resources Board is considering for its plan a measure that requires the retrofit of heavy duty vehicles, it should actively work with the New York City Bureau of Motor Vehicle Pollution Control which has already made much progress in this area. For the approach to be approvable, Virginia must provide written commitments that appropriate arrangements will be made with the state of New York. This will provide a greater assurance that an acceptable device will be available in the Virginia portion of the National Capital Interstate Air Quality Control Region. However, even if Virginia were to adopt this strategy in conjunction with New York, reductions could not be achieved until 1977.

The Clean Air Act dictates that the Administrator must apply reasonably available interim strategies. The Administrator feels that reductions in emissions from this type of vehicle are possible through imposition of restraints in use of this type of vehicle.

AIRCRAFT EMISSION REDUCTIONS

Aircraft emissions, as they affect ambient air quality, occur during approach, landing, taxi, idle, takeoff, and climbout. Heaviest emissions occur during taxi and idle when aircraft engines are operated at greatly reduced power.

The Virginia Transportation Control Plan asserts that control of these emissions through modified ground operations at Dulles and Washington National Airports can result in a significant hydrocarbon, and carbon monoxide emission reduction in the National Capital Region. Virginia contends that a 50 percent reduction in hydrocarbon and carbon monoxide emissions can be achieved though the implementation of such ground controls at the two northern Virginia airports. Such a reduction would represent a 1.7 ton reduction in the area's hydrocarbon emissions and 28 ton reduction in the area's carbon monoxide emissions. Virginia assumes the required measures will be fully implemented by EPA and FAA during the next four years and takes full credit for the potential emissions reductions which they believe could result from these measures.

The assumed reduction in hydrocarbon emissions is necessary for the plan to demonstrate achievement of the oxidant standards; the claimed carbon monoxide reductions are not needed for attainment of the standards.

EPA has published an Advance Notice of Proposed Rulemaking for aircraft ground controls but has not yet proposed regulations for such controls. The Agency, however, is currently funding a demonstration project with FAA to determine if safety hazards would accompany modified ground operations. If the demonstration is successful, EPA will propose and promulgate regulations for the implementation of ground operations deemed free of safety hazards.

The Agency currently believes that certain ground and taxi operations included in the demonstration can be conservatively assumed to be safe and acceptable. EPA calculations indicate that the application of these measures could result in a 24 percent reduction in hydrocarbons at National Airport and a 30 percent reduction in hydrocarbons at Dulles Airport (vice 50 percent reduction proposed by Virginia). In light of EPA's intention to work jointly with FAA to promulgate and implement ground operations deemed safe and acceptable prior to 1977, the Agency believes it is reasonable to allow Virginia to accept credit for emission reductions which will result from controlling the ground operations conservatively felt at this time to be safe and acceptable. The percent emissions reductions indicated above which would result from these measures would provide approximately a 0.8 tons reduction in hydrocarbons for the National Capital Region. Accordingly, the Agency will accept 0.8 tons of the claimed 1.7 tons reduction as being an approvable portion of the plan based on the expected implementation of ground operation regulations.

ECONOMIC AND SOCIAL IMPACT

The social and economic consequences of the measures included in the Virginia plan or proposed herein are considered reasonable. For example, the inspection and maintenance procedures will require expenses of approximately $10 annually for the average vehicle inspected. The implementation of the VSAD retrofit program of pre-1968 vehicles will require that individual motorists pay approximately $20 installation costs. Though the price to the fleet vehicle owner for the catalytic retrofit is $135 per vehicle, this cost could gradually be reclaimed through slightly higher service or use fees for the fleet vehicles controlled. In addition, such expenditure can be deducted from income tax as a business expense, and therefore part of the cost will be absorbed by the government. Compensation for the expenditures associated with the modifications required by the gasoline handling regulations could similarly be gained through slight increase in the fees for station services or fuel prices. This also could be deducted as a business expense from the income tax. Distributed costs of the various mass transportation improvement measures, as well as the incentives for the use of express buses and carpools and disincentives on the use of automobiles by individual motorist-commuters, are also considered reasonable.

The measures providing transportation improvements are expected to benefit the public from the standpoint of improved traffic flow for commuters, general urban mobility, and energy consumption. The resulting VMT reductions may also have some impact on the sprawling development patterns fostered by widespread automobile use which are unduly wasteful of energy, land and other resources and have contributed to the decay of urban centers.

PUBLIC COMMENTS SOLICITED

Although the Administrator has concluded that the proposed plan is the best approach available to him at the present time for achieving compliance with the requirements of the Act, further analysis may demonstrate that more appropriate options are available. He therefore desires to obtain the comments and suggestions of the public on the problems of achieving the ambient air quality standards in the Virginia portion of the National Capital Interstate Air Quality Control Region. Comments are particularly invited pertaining to measures that may be taken by Federal, State, or local authorities to support or supplement the proposed air pollution control strategy, to implement these measures, and to compare social and economic effects of alternative pollution control measures.

Public hearings will be held at the Holiday Inn, Jefferson Plaza, 1489 Jefferson Davis Highway, Arlington, Virginia, on September 4, 1973, beginning at 9:00 a.m. Notice of the hearing on these regulations (including designation of locations for inspection and distribution of EPA proposals) is being published in the Virginia portion of the National Capital Interstate Air Quality Control Region.

V 38-148 AUG 2 73 XUM

The Administrator's final promulgation of transportation controls for the Virginia portion of the National Capital Interstate Region will consider the comments and testimony he receives, as well as any additional approvable strategies submitted by the Commonwealth as part of the Commonwealth plan before or at the hearing. These influences, and the additional analysis of alternative strategies that can be made in the time between this proposal and final promulgation, may lead the Administrator to adopt final regulations that differ in important ways from this proposal.

SUBMITTAL OF WRITTEN COMMENTS

Interested persons may participate in this rulemaking by submitting written comments, preferably in triplicate, to EPA ATTN: Mobile Source Enforcement Division, 401 M Street, SW., Washington, D.C. 20460. All relevant comments received no later than September 4, 1973 will be considered. Receipt of comments will be acknowledged but substantive responses to individual comments will not be provided. Comments received will be available for public inspection during normal business hours at the Office of Public Affairs, EPA, 401 M Street, SW., Washington, D.C. 20460. This notice of proposed rulemaking is issued under the authority of section 110(c) and 301(a) of the Clean Air Act (42 U.S.C. 1857 et seq).

EPA STUDIES AND GUIDELINES

Further information on transportation control, land use, and motor vehicle emissions may be obtained from one or more of the following documents which the Environmental Protection Agency has published:

a. "Prediction of the Effects of Transportation Controls on Air Quality in Major Metropolitan Areas" and "Evaluating Controls to Reduce Motor Vehicle Emissions in Major Metropolitan Areas." November 1972. Both of these documents are generally known as the "Six Cities Study."

b. "Transportation Controls to Reduce Motor Vehicle Emissions in Major Metropolitan Areas," December 1972. This document is a summary of a study of 14 cities conducted with the view of recommending specific transportation control strategies. (Separate reports for each of the 14 cities are also available.)

NOTE: The documents listed in a and b above are available from the Air Pollution Technical Information Center, EPA, Research Triangle Park, North Carolina 27711.

c. "Control Strategies for In-Use Vehicles," November 1972. This report is available from EPA, Mobile Source Pollution Control Programs, 401 M Street, SW., Washington, D.C. 20460.

d. "Transportation Control Measures." FEDERAL REGISTER (38 FR 15194) June 8, 1973.

e. "Aircraft and Aircraft Engines," FEDERAL REGISTER (37 FR 26488) December 12, 1972.

f. "Aircraft Emissions: Impact on Air Quality and Feasibility of Control." This report presents the available information on the present and predicted nature and extent of air pollution related to aircraft operations in the United States. In addition, it presents an investigation of the present and future technological feasibility of controlling such emissions.

(42 U.S.C. 1857 et seq.)

Dated: July 24, 1973.

ROBERT W. FRI,
Acting Administrator.

It is proposed to amend Part 52 of Chapter I of Title 40 of the Code of Federal Regulations by adding the following:

§ 52.2435 Reduction of employee parking.

(a) Definitions:

(1) Governmental Entity—means a federal, state or local department, agency bureau, board, office, commission, district, or unit or any other type (excluding foreign embassies) which employs personnel paid wholly with public funds.

(2) Commercial Parking Rate—means the average rate charged by commercial parking facilities (excluding on-street parking meters) on a monthly basis within a 1 mile radius of a facility or installation covered by this section.

(3) Served by Public Transit—means that such transit is available during working hours within a reasonable walking distance of the employee's place of employment, even though such transit may not serve the area of the employee's residence.

(4) State Agency means Commonwealth of Virginia, State Air Pollution Control Board.

(b) This section shall be applicable in the Commonwealth of Virginia portion of the National Capital Interstate Air Quality Control Region.

(c)(1) All facilities or installations owned, operated or leased by the federal government which control, operate or lease a parking facility containing 25 or more spaces, shall by January 1, 1974, report to the Administrator the number of parking spaces in each such facility as of October 15, 1973. This number shall not include residential (including barracks) parking spaces contained in or on the facility or installation.

(2) The chief administrative officer of all facilities or installations subject to paragraph (c)(1) of this section, shall by April 1, 1974, submit to the Administrator a detailed report specifying the level of public transit service to the facility and also the parking space utilization at the facilities or installations under his or her control at that time. This report shall include but is not limited to:

(i) All public transit lines which have stops within one-half mile of any such installation or facility.

(ii) The practicality of the operation of shuttle service from presently well serviced locations such as (Rosslyn, Crystal City) to the facility or installation during morning and afternoon peak hours.

(iii) A summary of the existing parking situation at the facility including:

(*a*) Average vehicle occupancy calculated from a visual survey of vehicles entering and leaving the facility over a full week's time.

(*b*) The percentage of vehicles with one, two, three and four occupants.

(*c*) The total number of vehicles using the facility daily.

Should the report state that the facility or installation is not presently served by public transit, this report shall be reexamined, updated, and submitted annually, not later than April 1 of each successive year.

(d)(1) All facilities or installations owned, operated, or leased by state and local governments which control, operate or lease a parking facility containing 25 or more spaces, shall by January 1, 1974, report to the State Agency the number of parking spaces in each such facility as of October 15, 1973. This number shall not include residential parking spaces contained in or on the facility or installation or publicly owned commercial type parking facilities.

(2) The chief administrative officer of all facilities or installations, subject to paragraph (d)(1) of this section, shall by April 1, 1974, submit to the Commonwealth of Virginia, State Air Pollution Control Board, a detailed report specifying whether the facilities or installations under his or her control are served by public transit at that time. This report shall include, but is not limited to:

(i) All public transit lines which have stops within one-half mile of any such installation or facility.

(ii) The practicality of the operation of shuttle service from presently well serviced locations such as Rosslyn, Crystal City to the facility or installation during morning and afternoon peak hours.

(iii) A summary of the existing parking situation at the facility including:

(*a*) average vehicle occupancy calculated from a visual survey of vehicles entering and leaving the facility over a full week's time.

(*b*) The percentage of vehicles with one, two, three and four occupants.

(*c*) The total number of vehicles using the facility daily.

Should the report state that the facility or installation is not presently served by public transit, this report shall be reexamined, updated and submitted annually, not later than April 1 of each successive year.

(e) Each governmental entity subject to paragraphs (c)(1) and (d)(1) of this section and which in the opinion of the Administrator or State Agency is served by public transit shall comply with either subparagraphs (1) or (2) of this paragraph. This governmental entity shall either:

(1) Adopt a plan whereby a charge equivalent to commercial parking rates will be imposed for parking at any such parking facility owned, operated or leased by the governmental entity. In no case shall the charge be less than $20.00 per space month. Any funds collected by any governmental entity under this subparagraph may be used for any legitimate governmental purpose, *provided, however,* That no such funds shall be used to subsidize directly or indirectly employee parkng; or

(2) Adopt a plan to reduce the number of parking spaces in each such facility from the number in existence on October 15, 1973, according to the following:

(i) By November 30, 1974, a reduction of 4 percent;

(ii) By February 28, 1975, a reduction of 8 percent;

(iii) By May 31, 1975, a reduction of 12 percent.

(f)(1) Each entity of the Federal government subject to paragraph (e) of this section shall submit to the Administrator no later than June 30, 1974, a detailed compliance schedule showing steps it will take to achieve either the required reduction of spaces, or the initiation of commercial parking rates. In the case of a reduction of spaces, the schedule shall include provisions for marking those spaces to be eliminated in a manner obvious to members of the public (painting over, roping off, etc.). In the case of the initiation of commercial parking rates the schedule shall include:

(i) A date for the initial imposition of the charge. Such date shall be no later than January 1, 1975.

(ii) The amount to be charged per space per month.

(ii) Any exceptions to the charge (e.g., handicapped personnel, certain high level officials of the governmental entity), including documentation of the need and rationale for such exceptions.

(iv) Provisions for annual reevaluation of the amount charged per space per month based upon any changes in commercial parking rates.

(2) Each entity of a State or local government subject to paragraph (e) of this section shall submit to the State Agency no later than June 30, 1974, a detailed compliance schedule showing steps it will take to achieve either the required reduction of spaces or the initiation of commercial parking rates.

In the case of a reduction of spaces, the schedule shall include provisions for marking those spaces to be eliminated in a manner obvious to members of the public (painting over, roping off, etc.). In the case of the initiation of commercial parking rates, the schedule shall include:

(i) A date for the initial imposition of the charge. Such date shall be no later than January 1, 1975.

(ii) The amount to be charged per space per month.

(iii) Any exceptions to the charge (e.g., handicapped personnel, certain high level officials of the governmental entity), including documentation of the need and rationale for such exceptions.

(iv) Provisions for annual reevaluation of the amount charged per space per month based upon any changes in commercial parking rates.

(g) Failure to submit any report or compliance schedule as required by this section shall render the person so failing to comply in violation of an applicable implementation plan and subject to enforcement action under section 113 of the Clean Air Act. Any governmental entity which either allows vehicles to be parked in excess of the number allowable, or which fails to collect commercial parking charges shall likewise be in violation and subject to enforcement.

§ 52.2436 Vacuum spark advance disconnect.

(a) For purposes of this section, "vacuum spark advance disconnect" means a device or system installed on the vehicle which prevents the ignition vacuum advance from operating either when the vehicle's transmission is in the lower gears or when the vehicle is traveling below a predetermined speed.

(b) This section is applicable in the Commonwealth of Virginia portion of the National Capital Interstate Air Quality Control Region.

(c) On or before January 1, 1975, all gasoline-powered light duty vehicles of model year prior to 1968 and subject under presently existing legal requirements to registration in the area described in paragraph (b) of this section shall be equipped with an appropriate vacuum spark advance disconnect device.

(d) The Commonwealth of Virginia shall submit, no later than January 1, 1974, a detailed compliance schedule showing the steps it will take to implement and enforce this requirement. Such schedule shall include, as a minimum, the following:

(1) A date by which the Commonwealth of Virginia will evaluate and approve devices for use in this program. Such date shall be no later than March 1, 1974.

(2) A date by which installation of this equipment shall commence. Such date shall be no later than June 1, 1974.

(3) A date by which all vehicles subject to this section will be equipped with such devices. Such date shall be no later than January 1, 1975.

(4) Designation of any agency or agencies responsible for evaluating and approving such devices for use on vehicles subject to this section.

(5) Designation of an agency or agencies responsible for ensuring that the prohibitions of paragraph (e)(2) of this section shall be enforced.

(6) Method and proposed procedures for ensuring that those persons installing the devices have the training and ability to perform the needed tasks satisfactorily and that an adequate supply of devices will be available.

(7) Provision (apart from the requirements of any program for periodic inspection and maintenance of vehicles generally) for emission testing at the time of device installation or some other positive assurance that the device is installed and operating correctly.

(e) After January 1, 1975, the following shall apply within the Commonwealth of Virginia portion of the National Capital Interstate Air Quality Control Region.

(1) The Commonwealth of Virginia shall not register a vehicle subject to this paragraph which is not equipped in accordance with paragraph (c) of this section.

(2) No owner of a light duty vehicle subject to this paragraph shall operate or allow the operation of any such vehicle that is not equipped in accordance with paragraph (c) of this section.

(f) The failure of any person to comply with any provision of this section shall render such person in violation of a requirement of an applicable implementation plan, and subject to enforcement action under section 113 of the Clean Air Act. As to compliance schedules, the Commonwealth of Virginia will be considered to have failed to comply with the requirements of this regulation if it fails to submit on a timely basis the required compliance schedule, and or if the compliance schedule when submitted does not contain in satisfactory form each of the elements it is required to contain.

§ 52.2437 Oxidizing catalyst retrofit.

(a) Definitions:

(1) "Oxidizing catalyst" means a device installed in the exhaust system of the vehicle that utilizes a catalyst and, if necessary, an air pump to reduce emissions of hydrocarbon and carbon monoxide from that vehicle.

(2) Fleet vehicle means any of 5 or more light duty vehicles operated by the same person(s), business, or governmental entity and used principally in connection with the same or related occupations or uses. This definition shall also include any taxicab (or other light duty gasoline-powered vehicle-for-hire) owned by any individual or business.

(3) Governmental entity means any agency of the executive branch of the Federal government, or a state or local department, agency, bureau, board, office, commission, district, or unit of any other type (excluding foreign embassies) which employs personnel paid wholly with public funds.

(4) All other items used in this section which are defined in 40 CFR Part 51, Appendix N, are used herein with the meanings so defined.

(b)(1) This section is applicable in the Commonwealth of Virginia portion of the National Capital Interstate Air Quality Control Region.

(2) Classes of Vehicles Covered.

(i) Light duty fleet vehicles of model year 1971 through 1975, not already equipped with catalysts, or certified to meet original 1975 statutory light duty vehicle emission standards.

(c) The Commonwealth of Virginia shall establish a retrofit program to insure that or before May 31, 1977, classes of gasoline-powered light duty vehicles as specified in paragraph (b)(2) of this section, which are subject under presently existing legal requirements to registration in the area defined in paragraph (b) of this section above and are used on the streets and highways, of the Commonwealth, are equipped with an appropriate oxidizing catalyst retrofit device. No later than March 1, 1974, the Commonwealth of Virginia shall submit legally adopted regulations to EPA establishing such a program. The regulations shall include:

(1) Designation of an agency responsible for evaluating and approving such devices for use on motor vehicles subject to this section.

(2) Designation of an agency responsible for ensuring that the provisions of paragraph (c)(3) of this section are enforced.

V 38-148 AUG 2 73 XUM

(3) A provision that starting no later than May 31, 1976, the Commonwealth of Virginia shall commence retrofitting oxidizing catalysts to those light duty motor vehicles able to operate properly on unleaded 91 RON gasoline. The installation shall be completed by May 31, 1977.

(4) A method and proposed procedure for ensuring that those installing the retrofits have the training and ability to perform the needed tasks satisfactorily and that they will have an adequate supply of retrofit components.

(d) After May 31, 1977, the Commonwealth shall not register or allow to operate on public streets or highways any light duty gasoline-powered vehicle specified in paragraph (b)(2) of this section which does not comply with the applicable standards and procedures adopted pursuant to paragraph (c) of this section.

(e) After May 31, 1977, no owner of a vehicle subject to this section shall operate or allow the operation of any such vehicles which does not comply with the applicable standards and procedures implementing this section.

(f) The Commonwealth of Virginia shall submit, no later than October 1, 1973, a detailed compliance schedule showing the steps it will take to establish and enforce a retrofit program pursuant to paragraph (c) of this section, and the text of needed statutory proposals and needed regulations which it will propose for adoption. The compliance schedule shall include a date by which the Commonwealth shall evaluate and approve devices for use in this program. Such date shall be no later than September 30, 1975.

(g) Failure to comply with any provisions of this section shall render the person so failing to comply in violation of a requirement of an applicable implementation plan and subject to enforcement under section 113 of the Clean Air Act. The Commonwealth will be considered to have failed to comply with the requirements of this regulation if it fails to submit on time the required compliance schedule, or if the compliance schedule when submitted does not contain in satisfactory form each of the elements it is required to contain.

§ 52.2438 Control of evaporative losses from the filling of vehicular tanks.

(a) The term "gasoline" means any petroleum distillate having a Reid vapor pressure of 4 pounds or greater.

(b) This section is applicable in the Commonwealth of Virginia portion of the National Capital Interstate Air Quality Control Region.

(c) A person shall not transfer gasoline to an automotive fuel tank from gasoline dispensing systems unless the transfer is made through a fill nozzle designed to:

(1) Effect a vapor-tight fit between the fill nozzle and filler neck of the automotive fuel tank so as to prevent discharge of hydrocarbon vapors to the atmosphere.

(2) Direct vapor displaced from the automotive fuel tank to a system wherein at least 90 percent by weight of the organic compounds in displaced vapors are recovered.

(3) Prevent automotive fuel tank overfills or spillage on fill nozzle disconnect.

(d) The system referred to in paragraph (c) of this section can consist of a vapor-tight vapor return line from the fill nozzle filler neck interface to the dispensing tank or to an adsorption, absorption, incineration, or refrigeration-condensation system or equivalent.

(e) Components of the systems required by § 52.2439 paragraph (c) can be used for compliance with paragraph (c) of this section.

(f) If demonstrated to the satisfaction of the Administrator that it is impractical to comply with the provisions of paragraph (c) of this section as a result of fill neck configuration, location, or other design features, the provisions of this paragraph shall not apply to tanks or vehicles existing at the time of promulgation of this regulation.

(g) The Commonwealth of Virginia shall divide all facilities subject to this section into three classes, the first of which shall equal approximately 70 percent of hydrocarbon emissions from all gasoline stations, the second and third classes shall each equal approximately 15 percent of total hydrocarbon emissions from these sources. The classes shall be known as Class I, Class II, and Class III.

(h) Except as provided in paragraph (k) of this section, the owner or operator of a source included in Class I shall comply with the increments contained in the following compliance schedule:

(1) Contracts for emission control systems or process modifications must be awarded or orders must be issued for the purchase of component parts to accomplish emission control or process modification not later than March 31, 1974.

(2) Initiation of on-site construction or installation of emission control equipment or process change must begin not later than July 31, 1974.

(3) On-site construction or installation of emission control equipment or process modification must be completed not later than March 31, 1975.

(4) Final compliance is to be achieved not later than May 31, 1976.

(5) Any owner or operator of stationary sources, subject to the compliance schedule in this paragraph shall certify to the Administrator, within 5 days after the deadline for each increment of progress, whether or not the required increment of progress has been met.

(i) The owner or operator of a source included in the Class II shall comply with the increments contained in the following compliance schedule:

(1) Contracts for emission control systems or process modifications must be awarded or orders must be issued for the purchase of components parts to accomplish emission control or process modification not later than March 31, 1975.

(2) Initiation of on-site construction or installation of emissions control equipment or process change must begin not later than July 31, 1975.

(3) On-site construction or installation of emission control equipment or process modification must be completed not later than March 31, 1976.

(4) Final compliance is to be achieved not later than May 31, 1976.

(5) Any owner or operator of stationary sources subject to the compliance schedule in this paragraph shall certify to the Administrator, within 5 days after the deadline for each increment of progress, whether or not the required increment of progress has been met.

(j) The owner or operator of a source included in Class III shall comply with the increments contained in the following compliance schedule:

(1) Contracts for emission control systems or process modifications must be awarded or orders must be issued for the purchase of component parts to accomplish emission control or process modification not later than March 31, 1975.

(2) Initiation of on-site construction or installation of emissions control equipment or process change must begin not later than July 31, 1976.

(3) On-site construction or installation of emission control equipment or process modification must be completed not later than March 31, 1977.

(4) Final compliance is to be achieved not later than May 31, 1977.

(5) Any owner or operator of stationary sources, subject to compliance schedule in this paragraph shall certify to the Administrator, within 5 days after the deadline for each increment of progress, whether or not the required increment of progress has been met.

(k) Paragraph (h) and (i) of this section shall not apply:

(1) To a source which is presently in compliance with paragraph (c) of this section and which has certified such compliance to the Administrator by December 31, 1973. The Administrator may request whatever information he considers necessary for proper certification.

(2) To a source for which a compliance schedule is adopted by the Commonwealth and approved by the Administrator.

(3) To a source whose owner or operator submits to the Administrator, by December 31, 1973, a proposed alternative schedule. No such schedule may provide for compliance after May 31, 1975, in the case of Class I sources, and May 31, 1976, in the case of Class II sources. If promulgated by the Administrator, such schedule shall satisfy the requirements of this paragraph for the affected source.

(l) Nothing in this section shall preclude the Administrator from promulgating a separate schedule for any source to which the application of the compliance schedule in paragraph (b) of this section fails to satisfy the requirements of § 51.15(b) and (c) of this chapter.

§ 52.2439 Gasoline transfer vapor control.

(a) The term "gasoline" means any petroleum distillate having a Reid vapor pressure of four (4) pounds or greater.

(b) This section is applicable in the Commonwealth of Virginia portion of the National Capital Interstate Air Quality Control Region.

(c) No person shall transfer gasoline from any delivery vessel into any stationary storage container with a capacity greater than 250 gallons unless such container is equipped with a submerged fill pipe and unless the displaced vapors from the storage container are processed by a system that prevents release to the atmosphere of no less than 90 percent by weight of organic compounds in said vapors displaced from the stationary container location.

(1) The vapor recovery portion of the system shall include one or more of the following:

(i) A vapor-tight vapor return line from the storage container to the delivery vessel and a device that will ensure that the vapor return line is connected before gasoline can be transferred into the container.

(ii) Refrigeration-condensation system or equivalent designed to recover no less than 90 percent by weight of the organic compounds in the displaced vapor.

(2) The vapor-laden delivery vessel shall be subject to the following conditions:

(i) The delivery vessel must be so designed and maintained as to be vapor-tight at all times.

(ii) The vapor-laden delivery vessel may be refilled only at facilities equipped with a vapor recovery system or the equivalent, which can recover at least 90 percent by weight of the organic compounds in the vapor displaced from the delivery vessel during refilling.

(d) The provisions of paragraph (c) of this section shall not apply to the following:

(1) Stationary containers having a capacity less than 550 gallons used exclusively for the fueling of implements of husbandry; provided, however, said containers are equipped with submerged fill pipes.

(2) Any container having a capacity less than 2,000 gallons installed prior to promulgation of this paragraph.

(3) Transfer made to storage tanks equipped with floating roofs or their equivalent.

(e) Compliance schedule: Except as provided in paragraph (f) of this section, the owner or operator of any source subject to this section shall comply with this section on or before January 31, 1974.

(1) Any owner or operator in compliance with this section on the effective date of this regulation shall certify such compliance to the Administrator no later than 120 days following the effective date of this section.

(2) Any owner or operator who achieves compliance with this section after the effective date of this section shall certify such compliance to the Administrator within 5 days of the date compliance is achieved.

(f) Any owner or operator of a source subject to paragraph (e) of this section may, not later than 120 days following the effective date of this section, submit to the Administrator for approval a proposed compliance schedule that demonstrates compliance with the provisions specified in paragraph (e) of this section as expeditiously as practicable but no later than June 30, 1975. The compliance schedule shall provide for increments of progress toward compliance. The dates for achievement of such increments of progress shall be specified. Increments of progress shall include, but not be limited to: Submittal of final control plan to the Administrator; letting of necessary contracts for construction or process changes or issuance of orders for the purchase of component parts to accomplish emission control or process modification; initiation of on-site construction or installation of emission control equipment or process modification; completion of on-site construction or installation of emission control equipment or process modification; and final compliance.

(g) Any owner or operator who submits a compliance schedule pursuant to this paragraph shall, within 5 days after the deadline for each increment of progress, certify to the Administrator whether or not the required increment of the approved compliance schedule has been met.

§ 52.2440 Control of hydrocarbon emissions from effluent oil-water separators.

(a) This section is applicable in the Virginia Portion of the National Capital Interstate Air Quality Control Region.

(b) After December 30, 1973, a person shall not use any compartment of any vessel or device operated for the recovery of oil from effluent water which recovers 200 gallons a day or more of any petroleum products from any equipment which processes, refines, stores or handles hydrocarbons with a vapor pressure of 1.5 pounds per square inch absolute or greater under actual storage conditions unless such compartment is equipped with one of the following vapor loss control devices, except when gauging or sampling is taking place:

(1) A solid cover with all openings sealed and totally enclosing the liquid contents of that compartment.

(2) A floating pontoon or double-deck type cover, equipped with closure seals to enclose any space between the cover's edge and compartment wall.

(3) A vapor recovery system, which reduces the emission of all hydrocarbon vapors and gases into the atmosphere by at least 90 percent by weight.

(4) Other equipment of an efficiency equal to or greater than 1, 2, or 3 if approved by the Administrator.

This section shall not apply to any oil-effluent water separator used exclusively in conjunction with the production of crude oil if the water fraction of the oil-water effluent entering the separator contains less than 5 parts per million hydrogen sulfide, organic sulfides, or a combination thereof.

§ 52.2441 Peak hour delivery ban regulation.

(a) Definitions:

(1) *Peak Hours.* The hours 6:00 a.m. to 9:30 a.m. Monday through Saturday.

(2) *Delivery Ban.* A program to reduce emissions from in-use heavy duty gasoline powered vehicles employed to deliver goods within the specified peak hours.

(3) *Heavy Duty Gasoline Powered Vehicle.* Any motor vehicle either designated primarily for transportation of property and rated more than 6,000 pounds GVW and which is powered by a gasoline burning engine. This shall not include mail trucks, and emergency type vehicles such as fire trucks and police wagons.

(4) All other terms used in this section which are defined in 40 CFR Part 51, Appendix N are used herein with the meaning so defined.

(b) This regulation is applicable in the Commonwealth of Virginia portion of the National Capital Interstate Air Quality Control Region.

(c) The Commonwealth of Virginia counties of Arlington, Fairfax, and Loudoun and all incorporated cities located within such county shall establish a peak hour, heavy duty gasoline powered vehicle use prohibition on streets and highways over which each entity has ownership and control. No later than February 1, 1974, each governmental entity shall submit to the Administrator a legally enforceable program which shall include:

(1) provisions for initiation of the ban no later than June 30, 1974.

(2) the prohibition shall state that heavy duty gasoline powered vehicles making deliveries in violation of the prohibition shall either be towed away, or the owner and/or operator subject to a fine of up to $100, or both.

(d) The Commonwealth of Virginia, counties and all incorporated cities within such counties subject to this section shall submit, no later than February 1, 1974, a detailed compliance schedule showing the steps it will take to establish and enforce a peak hour delivery ban. The compliance schedule shall include the date by which the jurisdictions will recommend needed regulations to the appropriate body, and will identify the state, county, or city official responsible for enforcement.

(e) Failure to comply with any provisions of this regulation shall render such person in violation of a requirement of an applicable implementation plan and subject to enforcement action under section 113 of the Clean Air Act. A state or other governmental entity will be considered to have failed to comply with the requirements of this section if it fails to timely submit any required compliance schedule.

§ 52.2442 Limitation of off-street parking.

(a) This section shall apply only in the event that the Administrator finds that the Commonwealth of Virginia fails to take one or more of the following steps to implement the $2.00 surcharge (or an equivalent measure):

V 38-148 AUG 2 73 XUM

(1) Complete study identifying locations where surcharge or equivalent measure shall apply and submit to the Administrator by May 30, 1974.

(2) Submit to the Administrator legally adopted regulations of the Commonwealth of Virginia or other governmental entities to collect the surcharge or impose the equivalent measure by June 30, 1974.

(3) Institute the collection of the surcharge or impose the equivalent measure in those areas identified in the study by April 1, 1975.

(b) In the event the Commonwealth of Virginia chooses to adopt any "equivalent measure" to this surcharge, the Commonwealth of Virginia must submit to the Administrator by December 31, 1973, information demonstrating that such measure will in fact achieve the required result. Failure to demonstrate this fact adequately will cause the Administrator to determine that the Commonwealth of Virginia is failing to implement the surcharge.

(c) In the event that the Administrator determines that the Commonwealth of Virginia is failing to implement the $2.00 surcharge (or an equivalent measure) he shall make this determination public in the FEDERAL REGISTER, and this section shall then be immediately effective.

(d) Definition:

(1) The term "off-street parking facility" means any land or building or portion of a building set aside for the purpose of storing a maximum capacity of 10 or more vehicles on a temporary basis.

(e) Each governmental entity, public agency, private corporation, partnership or sole proprietor owning or operating an off-street parking facility located within the Commonwealth of Virginia portion of the National Capital Interstate Air Quality Control Region shall, within 30 days of the effective date of this regulation, report to the Administrator the number of parking spaces in each such facility under its ownership or control of the effective date of this regulation. The number used solely for the storage of vehicles of persons who reside within ¼ mile of the facility shall not be counted.

(f) Each such owner or operator of any off-street parking facility located within the area specified in paragraph (c) of this section shall reduce the number of affected parking spaces in each such facility from the number in existence as of the date this regulation becomes effective according to the following schedule:

(1) Within 90 days of the effective date—a 5 percent reduction;

(2) Within 120 days of the effective date—a 10 percent reduction;

(3) Within 180 days of the effective date—a 15 percent reduction;

(g) Each such owner or operator of an off-street parking facility subject to the requirements of this section shall submit to the Administrator, no later than 60 days after the effective date of this section, a detailed compliance schedule showing the steps it will take to achieve the required reduction in parking spaces. Such schedule shall provide for the marking in some manner obvious to the public (such as painting over, roping off, or the like) of the eliminated spaces on which parking is not permitted pursuant to this section.

(h) Failure to submit a compliance schedule as required by this section shall render the person or governmental entity so failing in violation of a requirement of an applicable implementation plan and subject to enforcement action under section 113 of the Clean Air Act. Any owner or operator of an off-street parking facility who allows any vehicle to be parked on any parking space which has been eliminated pursuant to this section, or who fails to mark clearly those spaces which have been eliminated, shall likewise be in violation and subject to enforcement.

§ 52.2443 Management of parking supply.

(a) This section shall apply only in the event that the Administrator finds that the Commonwealth of Virginia fails to take one or more of the following steps to implement the $2.00 surcharge (or an equivalent measure):

(1) Complete study identifying locations where surcharge or equivalent measure shall apply and submit to the Administrator by May 30, 1974.

(2) Submit to the Administrator legally adopted regulations of the Commonwealth of Virginia or other governmental entities to collect the surcharge or impose the equivalent measure by June 30, 1974.

(3) Institute the collection of the surcharge or impose the equivalent measures in those areas identified in the study by April 1, 1975.

(b) In the event the Commonwealth of Virginia chooses to adopt any "equivalent measure" to this surcharge, the Commonwealth of Virginia must submit to the Administrator by December 31, 1973, information demonstrating that such measure will in fact achieve the required result. Failure to demonstrate this fact adequately will cause the Administrator to determine that the Commonwealth of Virginia is failing to implement the surcharge.

(c) In the event that the Administrator determines that the Commonwealth of Virginia is failing to implement the $2.00 surcharge (or an equivalent measure) he shall make this determination public in the FEDERAL REGISTER, and this section shall then be immediately effective.

(d) Definitions:

(1) "Construction" means fabrication, erection, or installation of a parking facility, or any conversion of land to use as a parking facility.

(2) "Modification" means any change to a parking facility which increases the vehicle capacity of such facility.

(3) "Enlargement" means any physical change or addition to a parking facility which increases the vehicle capacity of such facility.

(4) "Commenced" means that an owner or operator has undertaken a continuous program of construction, modification, or enlargement.

(5) "Parking facility" (also called "facility") means any facility, building, structure, or lot or portion thereof used primarily for temporary storage of motor vehicles.

(e) No person, after the effective date of this section, shall commence construction of any new parking facility or modification or enlargement of any existing parking facility until he has first received from the Administrator or from an agency approved by the Administrator a permit stating the construction, modification or enlargement of such facility will not interfere with the attainment or maintenance of applicable Federal air quality standards.

(f) In order for any agency to be approved by the Administrator for purposes of issuing permits for construction of any new parking facility or any modification or enlargement of any existing parking facility, such agency shall demonstrate to the satisfaction of the Administrator that:

(1) Requirements for permit applications and issuance have been established. Such requirements shall include, but not be limited to, a requirement that before a permit may be issued, the following findings of fact or factually supported projections must be made:

(i) The location of the facility.

(ii) The total motor vehicle capacity before and after the construction, modification, or enlargement of the facility.

(iii) The normal hours of operation of the facility and the enterprises and activities which it serves.

(iv) The number of people using or engaging in any enterprises or activities which the facility will serve.

(v) The number of motor vehicles using the facility on an average hourly basis and a peak hour basis.

(vi) A projection of the geographic areas in the community from which people and motor vehicles will be drawn to the facility. Such projections shall include data concerning the availability of public transit from such areas.

(2) Criteria for issuance of permits have been established and published. Such criteria shall include, but shall not be limited to:

(i) Full consideration of all facts contained in the application.

(ii) Provisions that no permit shall be issued if such permit will result in the increase of VMT within any area, the air quality of which fails to meet applicable Federal air quality standards.

(3) Agency procedures provide that no permit for the construction, enlargement or modification of a parking facility covered by this section shall be issued without notice and opportunity for public hearing. The public hearing may be of the legislative type the notice shall conform to the requirements of 40 CFR Part 51.4(b); and the Agency rules of procedure may provide that if no notice of intent to participate in the hearing is received from any member of the public (other than the applicant) prior to 7 days before the scheduled hearing date, no hearing need be held. Such a requirement, if imposed, shall be noted prominently in the required notice of hearing.

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C., Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by the Executive Branch of the Federal Government. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $2.50 per month or $25 per year, payable in advance. The charge for individual copies is 20 cents for each issue, or 20 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

HIGHLIGHTS—Continued

BOATS CARRYING GRAIN TO U.S.S.R.—Commerce Dept. revised regulations for operating differential subsidy; effective 7–31–73 20807

FOREIGN LANGUAGE ADVERTISING—FTC requirements regarding clear disclosure 20820

CORROSIVE MATERIALS—DOT specifies certain shipping names and adds authorized packagings; effective 12–31–73 20837

EMPLOYMENT DISCRIMINATION—EEOC designates state agencies to receive certain complaints; effective 8–3–73 ... 20829

STUDENT EMPLOYMENT—Labor Department list of establishments authorized to pay less than minimum wage 20957

SELECTIVE SERVICE SYSTEM—Miscellaneous amendments to regulations 20953

CUSTOMS DUTIES—Customs Service proposal on payment at time of entry; comments by 9–4–73 20896

CARGO MANIFESTS—Customs Service proposal on certain load and count statements; comments by 9–4–73 ... 20895

TEXTILE IMPORTS—CITA renews limitations on cotton textiles from Nicaragua 20934

ANTIDUMPING—
Tariff Commission notice of investigation and hearing on papermaking machinery and parts from Sweden; hearing 9–18–73 20957
Tariff Commission notice of extension to 9–27–73 the time for filing written views on certain hydraulic tappets . 20957

COMMON CARRIER TARIFFS—ICC proposals for certain filings and postings; comments by 9–4–73 20852

NEW ANIMAL DRUGS—FDA approves various preparations (5 documents); effective 8–13–73 20821–20823

CROPS—
USDA rules for 1973 crop recourse distress loans on barley, corn, grain sorghum, oats, rye, and wheat; effective 8–2–73 20843
USDA 1973 extra long staple cotton marketing quota penalty rate; effective 8–3–73 20840

List of CFR Parts Affected

The following numerical guide is a list of the parts of each title of the Code of Federal Regulations affected by documents published in today's issue. A cumulative list of parts affected, covering the current month to date, appears following the Notices section of each issue beginning with the second issue of the month. In the last issue of the month the cumulative list will appear at the end of the issue.

A cumulative guide is published separately at the end of each month. The guide lists the parts and sections affected by documents published since January 1, 1973, and specifies how they are affected.

Title 3—The President

MEMORANDUM OF JUNE 29, 1973

[Presidential Determination No. 73–16]

Waiver of Regional Ceiling on Military Assistance and Sales to Latin America

Memorandum for the Secretary of State

THE WHITE HOUSE,
Washington, June 29, 1973.

In accordance with the recommendation in your memorandum of June 19, 1973 I hereby find pursuant to Section 33(c) of the Foreign Military Sales Act, as amended, that overriding requirements of the national security of the United States justify the waiver of the $100 million ceiling for Fiscal Year 1973 established by Section 33(a) of the Foreign Military Sales Act, as amended, on (a) the aggregate of the total amount of military assistance pursuant to the Foreign Asssitance Act of 1961, as amended, (b) cash and credit sales pursuant to the Foreign Military Sales Act, as amended, and (c) loans and sales in accordance with Section 7307 of Title 10, United States Code, excluding training, to Latin American countries.

You are directed on my behalf to report this finding to the Congress as required by law.

This finding shall be published in the FEDERAL REGISTER.

Richard Nixon

[FR Doc.73–16141 Filed 8–1–73;3:34 pm]

Rules and Regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

Title 46—Shipping

CHAPTER II—MARITIME ADMINISTRATION, DEPARTMENT OF COMMERCE

SUBCHAPTER C—REGULATIONS AFFECTING SUBSIDIZED VESSELS AND OPERATORS

[General Order 116, 2nd Rev.]

PART 294—OPERATING-DIFFERENTIAL SUBSIDY FOR BULK CARGO VESSELS ENGAGED IN CARRYING BULK RAW AND PROCESSED AGRICULTURAL COMMODITIES FROM THE UNITED STATES TO THE UNION OF SOVIET SOCIALIST REPUBLICS

Revision of Regulation

The following revised regulations have been adopted by the Maritime Subsidy Board to govern the operating-differential subsidy program with respect to bulk cargo vessels engaged in carrying export bulk raw and processed agricultural commodities from the United States to the Union of Soviet Socialist Republics. They supersede the regulations originally appearing in the FEDERAL REGISTER on October 21, 1972 (37 FR 22747), as corrected on October 27, 1972 (37 FR 22936), revised on November 16, 1972 (37 FR 24349) and amended on January 11, 1973 (38 FR 1277), March 29, 1973 (38 FR 8160), May 18, 1973 (38 FR 13016), June 7, 1973 (38 FR 14943), June 22, 1973 (38 FR 16354), and June 28, 1973 (38 FR 17005).

These regulations are issued pursuant to the Merchant Marine Act, 1936, as amended (46 U.S.C. 1101–1294). The Secretary of Commerce is authorized under section 601(a) of the Act:

> • • • [T]o consider the application of any citizen of the United States for financial aid in the operation of a vessel or vessels, which are to be used in an essential service in the foreign commerce of the United States. . . .

The meaning of the term "essential service" is described in section 211 of the Act as including:

> The bulk cargo carrying services that should, for the promotion, development, expansion, and maintenance of the foreign commerce of the United States and for the national defense or other national requirements be provided by United States-flag vessels. . . .

The operating-differential subsidy provided for in these regulations is deemed appropriate in light of the national requirements for participation by United States vessels in the carriage of export bulk raw and processed agricultural commodities.

The authority for the operating-differential subsidy procedures covered by these regulations is set forth in section 603(b) of the Act which provides:

> . . . [T]he Secretary of Commerce may, with respect to any vessel in an essential bulk cargo carrying service as described in section 211(b), pay, in lieu of the operating-differential subsidy provided by this subsection (b), such sums as he shall determine to be necessary to make the cost of operating such vessel competitive with the cost of operating similar vessels under the registry of a foreign country.

This publication constitutes a complete revised version of the regulations affecting the carriage of bulk raw and processed agricultural commodities from the U.S. to the U.S.S.R. Most sections of the former regulations have been preserved intact although they have been renumbered. Significant changes and additions are noted below:

1. For fixtures made on or after July 1, 1973, for the carriage of raw and processed agricultural commodities, charter rates are determined according to the arrangements executed May 30, 1973 between the designated representatives of the United States and the Soviet Union. The monthly average voyage charter rate for the carriage of grain in the U.S. Gulf to Holland/Belgium trade will be used as an index number. This index number is multiplied by 1.5107 (which represents the ratio between the charter rates from the U.S. Gulf to Holland/Belgium and from the U.S. Gulf to the Black Sea in December, 1972 which were $6.09 and $9.20 respectively) to arrive at the charter rate for the carriage of raw and processed agricultural commodities from the U.S. Gulf to the Black Sea (Base Charter Rate). This Base Charter Rate is adjusted for carriage in other than the U.S. Gulf to Black Sea trade and for the carriage of barley (Adjusted Charter Rate).

2. The modification in method of rate determination for voyages fixed on or after July 1, 1973 has prompted a new formula for the abatement of subsidy. This new formula establishes a rate for each trade, above which abatement of subsidy would occur (Abatement Level). In the event charter rates in the particular trade are in excess of the Abatement Level, there will be an abatement of subsidy on such excess. An excess of $1 or less results in a subsidy abatement equal to 50 percent of that excess. Charter rates between $1 and $7 in excess of the Abatement Level result in an abatement equal to 75 percent of such excess. Excess over $7 results in abatement of subsidy by 90 percent of such excess.

3. For voyages commenced on or after August 1, 1973, the 3 and 5 year cost averages under § 294.7(b) shall be based upon the period ending at the close of the operator's fiscal year in 1972.

4. Section 294.11 has been added to require operators to notify the Maritime Administration when the subsidized voyage commences and again when the vessel has completed loading, together with information as to tonnage loaded, commodity loaded and destination.

Rulemaking involving the operating-differential subsidy program is exempt from the requirements of 60 Stat. 238, Section 4, as amended (5 U.S.C. § 553). Part 294 to Title 46, Chapter II, Code of Federal Regulations is revised to read as follows:

Sec.

294.1 Purpose.
294.2 Applications.
294.3 Definitions.
294.4 Subsidy contract.
294.5 Voyage approval procedures.

294.8 Leased vessels.
294.9 Charter rate determination and abatement of subsidy.
294.10 Payment of subsidy.
294.11 Preliminary voyage reporting requirements.
294.12 Final voyage reporting requirements.
294.13 Partial payment billing procedure.
294.14 Final payment billing procedure.
294.15 Renegotiation.
294.16 Effective date.

AUTHORITY: Section 204, Merchant Marine Act, 1936, as amended (46 U.S.C. 1114).

§ 294.1 Purpose.

The regulations in this Part prescribe rules in accordance with Title VI of the Merchant Marine Act, 1936, as amended (Act), governnig the payment of operating-differential subsidy for United States-flag bulk cargo vessels engaged in carrying export bulk raw and processed agricultural commodities from ports in the United States (U.S.) to ports in the Union of Soviet Socialist Republics (U.S.S.R.) or other permissible ports of discharge, including the return voyage.

§ 294.2 Applications.

Applications for operating-differential subsidy contracts under this Part may be obtained from the Secretary, Maritime Subsidy Board (Board), Maritime Administration, Department of Commerce, Washington, D.C. 20230.

§ 294.3 Definitions.

(a) *Bulk cargo vessels.* All vessels meeting the criteria in sections 601 and 610 of the Act, whether dry-bulk, tanker or break-bulk by design, shall be bulk cargo vessels for purposes of this Part and, as such, eligible for participation in this operating-differential subsidy program.

V 38-149 AUG 3 73 XUM

(b) *Foreign flag competition.* For purposes of establishing such sums as the Board determines are necessary to make the cost of operating U.S.-flag vessels competitive with the cost of operating similar vessels under the registry of a foreign country, the Board shall select a typical foreign-flag vessel which has actually participated in the carriage of export bulk raw and processed agricultural commodities from the U.S. to the U.S.S.R. In the event that it is not possible to obtain actual cost data for a selected typical vessel which has engaged in that trade the Board will establish such costs based upon the costs of a foreign-flag vessel which, in the opinion of the Board, has equivalent costs of operation.

(c) *Subsidized voyage.* (1) *Commencement.* A subsidized voyage shall commence at 0001 local time in the U.S. port of loading on the day the subsidized bulk cargo vessel:

(i) Is certified by the National Cargo Bureau, Inc., as being clean and ready to commence loading if it is at the port of loading at the time of such certification;

(ii) Arrives at the U.S. port of loading if the vessel has obtained such certification prior to its arrival at the port of loading; or

(iii) Commences loading if certification is subsequently obtained.

(2) *Termination.* A subsidized voyage shall terminate at 2400 local time on the day the subsidized bulk cargo vessel:

(i) Arrives at a U.S. port of call if it returns in ballast, provided that if the vessel returns to a U.S. port of call different from that at which it loaded cargo, the subsidized voyage shall terminate at the time the vessel would normally have returned to the port of loading, if that time is earlier;

(ii) Completes discharge of inbound cargo in a U.S. port if it has engaged in the carriage of bulk cargo in the U.S. import commerce and has not engaged in foreign-to-foreign commerce; or

(iii) Commences deviation from the general track of the normal ballast return voyage, if it engages in foreign-to-foreign commerce.

(3) *Limitation on subsidized voyage commencement and termination.* For vessels engaged in consecutive subsidized voyages, a subsidized voyage shall not commence and terminate on the same day.

(4) *Deviations to engage in U.S. import commerce.* A subsidized bulk cargo vessel shall be allowed (i) a maximum of three and one-half days steaming time and (ii) loading and unloading time, in excess of the normal total steaming time for the ballast return voyage, if the vessel engages in the carriage of bulk cargo in the U.S. import commerce. For the purpose of determining the permissible deviation under this paragraph, the total steaming time of the inbound voyage shall be compared to the normal steaming time required for the ballast return from the last port of discharge of the U.S. export cargo to the first port of discharge of the U.S. import cargo. This paragraph shall not apply to vessels which engage in foreign-to-foreign commerce during a subsidized voyage.

(5) *Idleness or delay.* The operator shall report promptly to the Board all facts and explanations thereof relating to periods of idleness or delay sustained on a subsidized voyage. The Board shall determine whether such idleness or delay could have been avoided through efficient and economical operation and whether subsidy shall be payable, in whole or in part, for such periods. If the delay was not caused by inefficient operation but it results in a reduction of operating costs, the Board shall determine the fair and reasonable amount of subsidy, if any, applicable to such period, taking into consideration the costs involved.

(6) *Ineligible voyages.* No voyages shall be eligible for subsidy during which the subsidized bulk cargo vessel carries:

(i) Cargo in the domestic commerce of the U.S.;

(ii) U.S. preference cargo, including that covered by 10 U.S.C. 2631, 46 U.S.C. 1241 and 15 U.S.C. 616a; or

(iii) Any other commercial cargo simultaneously with the export bulk raw and processed agricultural commodities being carried to the U.S.S.R., except equipment which may be needed to facilitate unloading of such agricultural commodities.

(7) *Subsidized voyage days.* For subsidy payment purposes subsidized voyage days are divided into two categories: Port days and sea days. Port days are those subsidized days (i) from commencement of a voyage to time of departure from the first loading port, (ii) from time of arrival to time of departure from any subsequent port or ports of call, and (iii) if the vessel is engaged in the bulk carriage of inbound cargo, from the time of arrival at the final discharge port until termination of the voyage. Port days are computed for the voyage on the basis of accumulated days and hours per voyage to the nearest full day. Sea days are those subsidized days within the voyage exclusive of port days and are computed for the voyage on the basis of accumulated days and hours per voyage to the nearest full day. Cumulatively port days and sea days may not exceed total approved voyage days.

§ 294.4 Subsidy contract.

(a) *Expiration.* Unless extended, contracts executed in accordance with the rules and regulations of this Part shall expire on December 31, 1973, except for purposes of renegotiations under this section and § 294.15 of this Part. Subsidized voyages in progress as of midnight of that date may continue to their termination as defined in § 294.3(c)(2) for purposes of the payment of operating-differential subsidy.

(b) *Renegotiation of contracts.* The operating-differential subsidy contract shall provide that amounts otherwise payable thereunder shall be subject to renegotiation under § 294.15 of this Part if the Board determines that the operator has earned excessive profits. In the determination of what constitutes excessive profits the Board shall consider the provisions of section 103 of the Renegotiation Act of 1951, as amended (50 U.S.C. App. 1213), and may take into consideration such other matters that the Board deems appropriate, including any other provision of said Renegotiation Act. The elimination of excessive profits shall be accomplished through the renegotiation of the operating-differential subsidy contract including withholding or recovering amounts paid or accrued with respect to any subsidized voyage. Payments received or accrued under other contracts between the operator and the Government shall not be taken into account for purposes of such renegotiation.

(c) *Subsidized voyage approval.* The operating-differential subsidy contract shall provide that each subsidized voyage must have the prior written approval of the Board. In acting upon a request for such approval, the Board will consider all pertinent facts, including the availability of appropriated funds, the most productive utilization of such funds, whether the charter rate is the maximum then obtainable, and the purposes and policies of the Act. The Board may impose such terms and conditions on its approval as it deems necessary. The Board shall not approve retroactively the subsidization of a voyage which has already commenced.

§ 294.5 Voyage approval procedures.

(a) *Requests.* All requests for the approval of a subsidized voyage must be in writing. Telegrams are acceptable. The request must contain the following data:

(i) Name of operator;

(ii) Operating-differential subsidy contract number;

(iii) Vessel name;

(iv) Charterer;

(v) Load and discharge ports;

(vi) Lay days;

(vii) Commodities and estimated tonnage;

(viii) Charter rate and terms;

(ix) Expected date of commencing the voyage;

(x) Estimated duration of voyage; including estimated number of days at sea and estimated number of days in port;

(xi) Similar data concerning U.S. import cargo if such carriage is contemplated; and

(xii) Any other data as may be deemed necessary by the Board.

(b) *Finality.* Approvals and denials of requests for subsidized voyages are final and not subject to review or appeal, except that approvals may be canceled if the operator has knowingly or negligently provided incorerct or misleading data or information to the Board. Commencement of an approved subsidized voyage shall constitute the acceptance by the operator of all terms and conditions expressed in the approval.

§ 294.6 Sources of required data.

(a) *U.S. costs.* The Board will establish the operating costs of the subsidized vessel based on statements, payrolls, invoices and other data, certified as correct by an officer of the operator, and any other sources the Board considers appropriate.

(b) *Foreign costs.* The Board will establish the operating costs of the typical foreign-flag vessel from data obtained from the Maritime Administration's foreign representatives and any other sources the Board considers appropriate.

§ 294.7 Determination of subsidy.

(a) *In general.* For purposes of this Part, the amount of operating-differential subsidy, as determined by the Board, shall not exceed the excess costs of U.S. wages of officers and crew; subsistence of officers and crew; maintenance and repairs; vessel insurance; stores, supplies and expendable equipment; fuel; and other vessel expenses over the estimated costs of the same items of expense of the typical foreign-flag vessel. An additional operating-differential subsidy amount, as determined by the Board, shall be paid for the fair and reasonable depreciation and interest costs directly attributable to the subsidized vessel, such amount not to exceed the excess of the same costs of operating a similar foreign-flag vessel. The operating-differential subsidy consisting of such excess costs will be determined as a per diem amount and shall be subject to the limitations imposed by §§ 294.(b), 294.8, 294.9 and 294.15.

(b) *U.S. costs.* The following items shall be used to establish operating costs for each subsidized vessel:

(1) *Wages of officers and crew.* Actual wage costs, including voyage payrolls, port relief crew payrolls, contributions to pension and welfare plans, social security and other taxes, and other employment costs directly attributable to the subsidized voyage;

(2) *Subsistence of officers and crew.* The net cost of food and other edibles consumed by officers and crew, including port relief crews, during the subsidized voyage, including sales taxes, government inspection fees and shipside delivery and loading costs incurred for services performed by other than the crew and reliew complements;

(3) *Maintenance and repairs.* The cost of maintenance and repairs attributable to the subsidized voyage shall be:

(i) The average cost per operating day of maintenance and repair expenses for the subsidized vessel, including costs of drydocking and special surveys, but excluding costs which are reimbursed by third parties (e.g., insurance underwriters) and costs ineligible for subsidy pursuant to Part 272 of this Chapter (except for the costs identified in § 272.11 (c)), for the five-year period preceding the current year for vessels that have been owned or leased by the operator, or a holding company, affiliate, subsidiary, or associate, for five years preceding the current year. For voyages commenced before August 1, 1973, costs previously submitted to and accepted by the Board in connection with an original application shall be utilized in determining the daily cost of maintenance and repair. For voyages commenced on and after August 1, 1973, cost data for the five-year period ending at the close of the operator's fiscal year in 1972 shall be utilized. For all voyages terminating in 1973, the cost data for the five-year period will be adjusted by the Board to January 1, 1973 by application of survey reports of the U.S. Salvage Association, Inc., and the U.S. Monthly Index Wages (Hourly Earnings in Manufacturing) published by the U.S. Bureau of Labor Statistics. Or,

(ii) The fair and reasonable cost per operating day of maintenance and repair expenses for the subsidized vessel as determined by the Board, for vessels that have not been under such ownership or lease for the five-year period;

(4) *Vessel Insurance.* Vessel insurance shall include the following costs:

(i) The fair and reasonable net insurance premium costs, after brokerage and owner's adjustments, including foreign stamp taxes, in effect for the subsidized voyage. In determining fair and reasonable costs, effect shall be given to the deductibles or franchise provisions included in the policies in effect during the three years preceding the current year (or such lesser period as the vessel has been in operation) for protection and indemnity insurance, and the five years preceding the current year (or such lesser period as the vessel has been in operation) for hull and machinery insurance, if the deductible or franchise provisions of current insurance policies differ from those in effect during such prior periods.

(ii) The fair and reasonable cost of claims for death, injury and illness of officers and crews absorbed by the operator under the deductible provision of protection and indemnity insurance policies attributable to the subsidized voyage as determined on the basis of the average cost per operating day for the subsidized vessel of such expenses paid during the three-year period preceding the current year (or such lesser period as the vessel has been in operation).

(iii) For purposes of the three-year and five-year prior period cost data referred to in paragraphs (i) and (ii) above, for voyages commenced prior to August 1, 1973 the data submitted to and accepted by the Board in connection with an original application shall be utilized; for voyages commenced on or after August 1, 1973 cost data for the three-year and five-year periods ending at the close of the operator's fiscal year in 1972 shall be utilized.

(5) *Stores, supplies and expendable equipment.* The cost of stores, supplies and expendable equipment attributable to the subsidized voyage shall be:

(i) The average cost per operating day of stores, supplies and expendable equipment expenses for the subsidized vessel for the three-year period preceding the current year, for vessels that have been owned or leased by the operator, or a holding company, affiliate, subsidiary, or associate, for three years preceding the current year. For voyages commenced before August 1, 1973, costs previously submitted to and accepted by the Board in connection with an original application shall be utilized in determining the daily cost of stores, supplies and expendable equipment. For voyages commenced on or after August 1, 1973, cost data for the three-year period ending at the close of the operator's fiscal year in 1972 shall be utilized. For all voyages terminating in 1973, the cost data for the three-year period will be adjusted by the Board to January 1, 1973, by application of the U.S. Wholesale Price Index of Total Manufacturers. Or,

(ii) The fair and reasonable cost per operating day of stores, supplies and expendable equipment expenses for the subsidized vessel as determined by the Board, for vessels that have not been under such ownership or lease for the three-year period.

(6) *Fuel.* The actual cost of fuel consumed at sea and in port during the subsidized voyage, including taxes and delivery costs, after taking into account bunkers on board upon commencement and termination of the subsidized voyage;

(7) *Other vessel expenses.* The actual cost of miscellaneous expenses directly attributable to the subsidized voyage and incident to the management and maintenance of the subsidized vessel. Items as exemplified in the partial list at § 282.764 of this Chapter will be utilized, as appropriate;

(8) *Vessel depreciation.* The depreciation expense of the subsidized vessel for the period of the subsidized voyage shall be the actual unsubsidized construction cost, reconstruction cost or purchase cost of the subsidized vessel depreciated on a straight-line basis over the economic life of the vessel actually used by the operator to depreciate such construction, reconstruction or purchase cost, after taking into account the actual residual value of the vessel used by the operator for financial accounting purposes; and

(9) *Interest expense attributable to vessel indebtedness.* The interest expense of the subsidized vessel for the period of the subsidized voyage shall be the interest expense directly attributable to indebtedness incurred in connection with the construction, reconstruction or purchase of the subsidized vessel as determined by analysis of the date and principal amount of the debt, the principal amortization schedule, the interest rate and the scheduled payments of principal and interest during the period of the subsidy contract.

(c) *Foreign costs.* The following items shall be used to establish operating costs of the typical foreign-flag vessel:

(1) *Actual cost items.* The following operating costs of the selected typical vessel shall be taken at current actual figures, and, if such data are not current,

V 38-149
AUG 3 73
XUM

then they shall be adjusted to the current cost level by appropriate indices contained in the International Financial Statistics published by the International Monetary Fund or the Monthly Bulletin of Statistics published by the United Nations:

(i) Wages of officers and crew;
(ii) Subsistence of officers and crew;
(iii) Maintenance and repairs;
(iv) Vessel insurance;
(v) Stores, supplies and expendable equipment;
(vi) Fuel; and
(vii) Other vessel expenses.

(2) *Vessel depreciation.* Depreciation expense shall be based on the cost of constructing or reconstructing the U.S. subsidized vessel in a representative foreign shipbuilding center or purchasing the vessel at world market price, which cost shall be depreciated on a straight-line basis over the same economic life actually used by the operator for the subsidized vessel in order to determine the foreign depreciation of such construction, reconstruction or purchase cost, after taking into account the residual value of the vessel actually used by the operator for financial accounting purposes.

(3) *Interest expense attributable to vessel indebtedness.* Interest expense shall be determined by assuming the same interest rate, repayment term, and method of principal amortization as those that actually exist for the subsidized vessel, and by applying those terms to obtain the interest which would be payable if the original principal of the debt had been the same percentage of the foreign cost of construction, reconstruction or purchase as the original construction, reconstruction or purchase debt of the subsidized vessel was of its construction, reconstruction or purchase cost.

(d) *Review.* The Board shall review the costs of each voyage for which subsidy is being sought and shall disallow for subsidy any cost resulting from inefficient or uneconomical operation.

§ 294.8 Leased Vessels.

(a) *In general.* Section 601 of the Act provides that an applicant for operating-differential subsidy must own or lease the subsidized vessel. For purposes of this Part the term "leased vessels" includes only vessels leased under a bareboat charter party.

(b) *Calculation of vessel depreciation and interest expense attributable to vessel indebtedness.* (1) *In general.* For purposes of determining the U.S. cost of vessel depreciation and interest expense attributable to vessel indebtedness in paragraphs 7(b) (8) and (9) of § 294.7 for leased vessels, the appropriate data of the owner shall be used. In the event that the charterer cannot obtain such data from the owner, no subsidy will be paid in respect to those items.

(2) *Limitation.* In calculating the subsidy payable with respect to vessel depreciation and interest expense attributable to vessel indebtedness for leased vessel, U.S. costs for such items of expense in excess of the bareboat charter hire shall not be taken into account.

§ 294.9 Charter rate determination and abatement of subsidy.

(a) *Fixtures made before July 1, 1973*—(1) *Charter rate determination.* Under the terms agreed to in connection with the signing of the Agreement Between the Government of the United States of America and the Government of the Union of Soviet Socialist Republics Regarding Certain Maritime Matters, October 14, 1972, fixtures made before July 1, 1973 for shipments of bulk raw and processed agricultural commodities from the U.S. to the U.S.S.R. were to be made on U.S.-flag vessels at the higher of:

(i) A rate for the cargo and route involved based upon the average of market charter rates for the years 1969, 1970 and 1971; or

(ii) The current market charter rate for the cargo and route involved (where such market charter rates did not exist, a rate would be determined by agreed adjustments to current market charter rates for the most comparable cargo and route) plus a rate premium of 10 percent of such rate.

(2) *Adjustments.* (i) In general. If calculated according to clause (i) above, the charter rate for carriage other than in the U.S. Gulf/Black Sea trade (Base Rate: $8.05) and for the carriage of barley was adjusted as follows:

Trade	*Adjustment to base rate (per long ton)*	
U.S. Gulf/Baltic	−$.30	Plus $1.00 per long ton, F.I.O.T. if scheduled date of arrival is between Nov. 1 and Apr. 30
U.S. Gulf/Soviet Pacific	+$2.00	
U.S.N.H./Black Sea	−$.50	
U.S.N.H./Baltic	−$.50	Plus $1.00 per long ton, F.I.O.T. if scheduled date of arrival Baltic is between Nov. 1 and Apr. 30
U.S. Pacific/Soviet Pacific	+$.50	

(ii) Barley. For the carriage of barley, an additional $.40 per long ton shall be added.

(3) *Abatement determination.* The operating-differential subsidy otherwise payable on voyages fixed before July 1, 1973 under this Part shall be subject to abatement on a voyage basis when fixtures are made and carriage occurs at the rate referred to in paragraph (a) (1) (ii). The abatement shall be comprised of two portions, one associated with the 10 percent rate premium and the second associated with the current market charter rate.

(i) To the extent that the charter rate exceeds the three-year average rate for the cargo and route involved as established under that Agreement and related letters, the amount of the rate premium abatement shall be equal to 100 percent of the revenue per ton attributable to the 10 percent rate premium. The commission attributable to the amount subject to abatement will be deducted from the abatement. For example, if the current market charter rate is $7.80 per ton, the minimum rate under the Agreement is 110 percent of $7.80 or $8.58 per ton. The amount subject to abatement in this case would be $.53 per ton, which is the amount by which the premium causes the charter rate to exceed the three-year average rate of $8.05 per ton. The abatement would be reduced by the amount of commission paid by the operator which is attributable to the $.53 per ton.

(ii) The amount of the current market charter rate abatement per ton shall be determined by multiplying the freight rate increments in the left hand column of the table below by the percentages in the right hand column. The commission attributable to the amount subject to abatement will be deducted from such abatement.

Charter rate increment	*Percentage*
For the first $.95 per ton that the rate in paragraph (a) (1) (ii), exclusive of the rate premium, exceeds the rate in paragraph (a) (1) (i), the percentage is	0
For the amount that such excess is between $.95 per ton and $1.95 per ton, the percentage is	50
For the amount that such excess is over $1.95 per ton, the percentage is	75

(4) *Example.* The provisions of this paragraph are illustrated by the following example:

A vessel is fixed for the carriage of U.S. export grain to the U.S.S.R. at a charter rate of $12.10 per ton, F.I.O.T. consisting of $11.00 representing the current market charter rate of $11.00 plus a rate premium of $1.10. The commission rate per the terms of the charter party is 3¾ percent of charter revenue. The average market charter rate for such cargo and route for the years 1969, 1970 and 1971 as established under the Agreement and related letters is $8.05 per ton.

Subsidy abatement is determined as follows:

	Per ton F.I.O.T.
Current market charter rate	$11.00
Add 10% premium	1.10
Fixture rate	$12.10
Less average of market charter rates for the years 1969, 1970 and 1971	8.05
Difference	$ 4.05
Abatement of subsidy per ton of cargo carried:	
Abatement attributable to the premium:	
Gross premium	$ 1.10
Less commissions at 3¾%	.04125
Net revenue	$ 1.05875
Abatement percentage	100%
Abatement per ton	$1.05875
Abatement attributable to the excess of the current market charter rate over the average of market charter rates for 1969, 1970 and 1971	*Per ton F.I.O.T.*
Excess of $.95 or less	$ .95
Less commissions at 3¾%	.035625
Net revenue	.914375
Abatement percentage	0%
Abatement per ton	0
Excess between $.95 and $1.95	$ 1.00
Less commissions at 3¾%	.0375
Net revenue	.9625
Abatement percentage	50%
Abatement per ton	.48125
Excess over $1.95	$ 1.00
Less commissions at 3¾%	.0375
Net revenue	.9625
Abatement percentage	75%
Abatement per ton	.721875
Total abatement of subsidy per ton of cargo carried	$2.261875

(b) *Fixtures made on or after July 1, 1973*—(1) *Charter rate determination.* Under the additional arrangements executed May 30, 1973, concerning the implementation of the Agreement Between the Government of the United States and the Government of the Union of Soviet Socialist Republics Regarding Certain Maritime Matters signed October 14, 1972, fixtures made on or after July 1, 1973, for the carriage of bulk raw and processed agricultural commodities from the U.S. to the U.S.S.R. will be made at a charter rate determined as follows:

(i) *Index number.* The monthly average voyage charter rate for the carriage of grain in the U.S. Gulf to Holland/Belgium trade as listed in the *Daily Freight Register*, published by U. K. Publications, Ltd., London, England on or about the fifth day of the month for the preceding month shall serve as an index number.

The index number for the month of May as published in the *Daily Freight Register* on June 4, 1973, shall be applicable for fixtures made during the period July 1 through July 9, 1973. Thereafter, the index number published every month shall be effective for fixtures made from the 10th day of that month to the 9th day of the following month. In the event that a monthly average voyage charter rate for the carriage of grain in the U.S. Gulf to Holland/Belgium trade is not published in a given month, the index number will remain unchanged until a new rate for that trade is published.

(ii) *Base Charter Rate.* A Base Charter Rate shall be established monthly for the U.S. Gulf/Black Sea trade by multiplying the index number by 1.5107.

(iii) *Adjusted Charter Rate.* (A) In general. For the carriage of bulk raw and processed agricultural commodities in other than the U.S. Gulf/Black Sea trade and for the carriage of barley, the Base Charter Rate shall be adjusted as follows:

Trade	*Adjustment to Base Charter Rate*	
U.S. Gulf/Baltic	−$.55	Plus $1.00 per long ton, F.I.O.T. if scheduled date of arrival is between Nov. 1 and Apr. 30
U.S. Gulf/Soviet Pacific	+$3.75	
U.S.N.H./Black Sea	−$.95	
U.S.N.H./Baltic	−$.95	Plus $1.00 per long ton, F.I.O.T. if scheduled date of arrival Baltic is between Nov. 1 and Apr. 30
U.S. Pacific/Soviet Pacific	+$.95	

(B) *Barley.* For the carriage of barley, the charter rates provided above will be increased by $.40 per long ton.

(2) *Abatement determination.* (i) In general. The operating-differential subsidy otherwise payable on fixtures made on or after July 1, 1973 under this Part shall be subject to abatement on a voyage basis.

(ii) *Abatement Level.* (A) In general. When the charter rate is the same as or less than the amounts shown in the table below, no abatement will occur.

Trade	*Abatement Level (per long ton)*	
U.S. Gulf/Black Sea	$9.00	
U.S. Gulf/Baltic	$8.70	Plus $1.00 if arrival is between Nov. 1 and Apr. 30
U.S. Gulf/Soviet Pacific	$11.00	
U.S.N.H./Black Sea	$8.50	
U.S.N.H./Baltic	$8.50	Plus $1.00 if arrival is between Nov. 1 and Apr. 30
U.S. Pacific/Soviet Pacific	$9.50	

(B) Barley—The Abatement Level for carriage of barley shall be at the amounts indicated above plus $.40 per long ton.

(iii) *Abatement.* To the extent that the charter rate exceeds the Abatement Level, the payment of subsidy will be abated as indicated below. The Commission payable under the charter party attributable to the amount subject to abatement will be deducted from the abatement.

Excess of charter rate above Abatement Level	*Percent of Abatement per long ton*
$1.00 or less	50%
$1.00 to $7.00	75%
Over $7.00	90%

(iv) *Example.* The provisions of this paragraph are illustrated by the following example.

A vessel is fixed for the carriage of U.S. export grain (non-barley from U.S. Gulf port to Black Sea port at a charter rate of $17.12 per ton, F.I.O.T. The Commission rate is 3¾ percent of the freight revenue.

Charter rate	$17.12
Abatement Level (U.S. Gulf/Black Sea)	9.00
Excess subject to abatement	$8.12
Excess of $1.00 or less	$1.00
Less commission (at 3¾%)	(.0375)
Net revenue	.9625
Abatement percentage	50%
Abatement amount	$.48125
Excess between $1.00 and $7.00	$6.00
Less commission (at 3¾%)	(.225)
Net revenue	5.775
Abatement percentage	75%
Abatement amount	$4.33125
Excess over $7.00	$1.12
Less commission (at 3¾%)	(.042)
Abatement percentage	90%
Net revenue	1.078
Abatement amount	$.97020
Total Abatement of subsidy per ton of cargo carried	$5.78270

§ 294.10 Payment of subsidy.

(a) *Tentative per diem subsidy*—(1) *In general.* A tentative per diem subsidy amount (rounded to the nearest dollar) for each subsidized vessel will be incorporated in the operating-differential subsidy contract for wages of officers and crew, subsistence of officers and crew, vessel insurance, fuel, other vessel expenses, vessel depreciation, interest expense attributable to vessel indebtedness, maintenance and repairs and stores, supplies and expendable equipment. Such tentative subsidy amounts for maintenance and repairs and stores, supplies and expendable equipment also will be stated as differential percentages (rounded to two decimal places).

(2) *Partial payment.* After termination of an approved voyage, the operator shall be paid the following subsidy which shall be abated by an amount determined pursuant to section 294.9 and subject to reductions in subsidy pursuant to paragraph (c) of § 294.13.

(i) Ninety percent of the algebraic sum of the tentative per diem subsidy amounts for wages of officers and crew, subsistence of officers and crew, vessel insurance, fuel, other vessel expenses, vessel depreciation and interest expense attributable to vessel indebtedness, less any negative per diem amounts for maintenance and repairs and stores, supplies and expendable equipment, for each approved voyage day, and

(ii) An amount determined by multiplying any positive differential percentages for maintenance and repairs or stores, supplies and expendable equipment by the costs incurred for such items by the operator in any of the United States or the Commonwealth of Puerto Rico subsequent to commencement of the approved voyage but not to exceed ninety percent of the tentative per diem amounts for such items for each approved voyage day.

V 38-149 AUG 3 73 XUM

(b) *Final per diem subsidy*—(1) *In general.* As soon as practicable after termination of an approved voyage, and after verification of historical cost data and expenses attributable to the approved voyage, a final per diem subsidy amount (rounded to the nearest dollar) for the vessel will be incorporated in the operating-differential subsidy contract for wages of officers and crew, subsistence of officers and crew, vessel insurance, fuel, other vessel expenses, vessel depreciation, interest expense attributable to vessel indebtedness, maintenance and repairs and stores, supplies and expendable equipment. Such final subsidy amounts for maintenance and repairs and stores, supplies and expendable equipment also will be stated as differential percentages (rounded to two decimal places).

(2) *Final payment.* After final per diem amounts and differential percentages for the subsidized vessel on the approved voyage are incorporated in the operating-differential subsidy contract, the operator shall be paid subsidy as follows:

(i) The balance due of the algebraic sum of the final per diem subsidy amounts for wages of officers and crew, subsistence of officers and crew, vessel insurance, fuel, other vessel expenses, vessel depreciation and interest expense attributable to vessel indebtedness, less any negative per diem amounts for maintenance and repairs and stores, supplies and expendable equipment, for each approved voyage day, and

(ii) The balance due of an amount determined by multiplying any positive differential percentages for maintenance and repairs or stores, supplies and expendable equipment by the costs incurred for such items by the operator in any of the United States or the Commonwealth of Puerto Rico during the five-year period following commencement of the approved voyage but not to exceed the total final per diem subsidy amounts for such items for each approved voyage day. If the operator sells, transfers or otherwise disposes of its interest in the subsidized vessel within such five-year period, no outstanding accruals of such total per diem amounts shall be paid unless the Board executes a separate agreement governing such payments.

§ 294.11 Preliminary voyage reporting requirements.

(1) *Commencement of subsidized voyage.* The operator shall notify the Assistant Administrator for Maritime Aids, Maritime Administration, Washington, D.C. 20230 by telex or other appropriate means when the subsidized voyage commences, as defined in paragraph (c)(1) of § 294.3. A copy of that report shall be sent to the Region Director of the Region in which the operator is headquartered.

(2) *Departure from port of loading.* The operator shall notify the Assistant Administrator for Maritime Aids, Maritime Administration, Washington, D.C. 20230 by telex or other appropriate means upon departure from port of loading. Such notification shall specify quantity, commodity and charter rate of cargo carried and destination. A copy of that report shall be sent to the Region Director of the Region in which the operator is headquartered.

§ 294.12 Final voyage reporting requirements.

(a) *In general.* In order to determine compliance with the requirements of the operating-differential subsidy contract and this Part, a Final Voyage Report is required to be submitted to the Office of Subsidy Administration, Maritime Administration, Washington, D.C. 20230, after termination of each approved voyage but prior to or simultaneously with the first billing for the partial payment as specified in paragraph (a)(2) of § 294.10 and § 294.13.

(b) *Contents of report.* The report shall include the following items to the extent they are applicable to the approved voyage:

(1) *Name of vessel.*

(2) *Contract number.*

(3) *A copy of the Certificate of Readiness issued by the National Cargo Bureau.*

(4) *U.S. loading port(s)*: Following information by port:

(i) Date and time of arrival.

(ii) Date and time of commencement of loading.

(iii) Date and time of completion of loading.

(iv) Date and time of departure.

(v) Quantity, commodity and charter rate of cargo loaded.

(5) *Foreign discharge port(s)*: Following information by port:

(i) Date and time of arrival.

(ii) Date and time of commencement of discharge.

(iii) Date and time of completion of discharge.

(iv) Date and time of departure.

(v) Quantity and commodity discharged.

(6) *Bunkering port(s)*: (If other than loading or discharge port):

(i) Date and time of arrival.

(ii) Date and time of departure.

(7) *Foreign loading port (s)*: Following information by port, if applicable:

(i) Date and time arrival.

(ii) Date and time of commencement of loading.

(iii) Date and time of completion of loading.

(iv) Date and time of departure.

(v) Quantity, and commodity of cargo loaded by port(s) of destination.

(8) *U.S. discharge port(s): Following information regarding discharge of U.S. import cargo by port, if applicable:*

(i) Date and time of arrival.

(ii) Date and time of commencement of discharge.

(iii) Date and time of completion of discharge.

(iv) Quantity and commodity discharged.

(9) *U.S. port of arrival in ballast:*

(i) If port of arrival is the same as that at which vessel loaded outbound cargo: Date and time of arrival.

(ii) If port of arrival is different from that at which vessel loaded outbound cargo: Estimated date and time vessel would have arrived at U.S. port at which outbound cargo was loaded.

(10) *If the vessel engaged in the carriage of U.S. import cargo during the subsidized voyage:* Estimated number of days and hours that the steaming time of the inbound voyage exceeded the normal steaming time for a ballast return voyage from the last port of discharge of the U.S. export cargo to the first port of discharge of the U.S. import cargo.

(11) *If the vessel engaged in the carriage of foreign-to-foreign trade:* The date and hour that the vessel deviated from the general track of the normal ballast return voyage.

(12) *Number of subsidized days:*

(i) Days at sea.

(ii) Days in port.

(iii) Total subsidized days.

(13) *Delays.* The report must contain a detailed explanation of (i) any period of idleness or delay in excess of 2 days more than the normal operating time in port or (ii) any excessive delay at sea.

(c) *Submission.* The Final Voyage Report shall be submitted in duplicate and certified as correct by an official of the subsidized company.

(d) *Approval of voyage days.* After review, the operator will be notified by letter of the approved voyage days, in port and at sea, for use in preparing subsequent billings with respect to the subsidized voyage.

§ 294.13 Partial payment billing procedure.

(a) *In general.* Upon termination of an approved voyage a partial payment billing may be submitted for payment of an amount not to exceed 90 percent of the estimated operating-differential subsidy due in accordance with § 294.10(a)(2). The partial payment billing is to be prepared using the voyage days reported on the Final Voyage Report submitted pursuant to § 294.12 and the tentative per diem subsidy amounts and differential percentages incorporated in the operating-differential subsidy contract. If the Board has approved a different number of subsidized voyage days than reported on the Final Voyage Report, partial payment shall be based on the approved voyage days.

(b) *Partial payments of subsidy applicable to maintenance and repairs and stores, supplies and expendable equipment*—(1) *Negative differentials.* If the tentative per diem subsidy amounts incorporated in the contract for maintenance and repairs and/or stores, supplies and expendable equipment are negative, the partial payment will be reduced by 90 percent of the product of such negative per diem amount times the number of subsidized voyage days.

(2) *Positive differentials.* If the tentative per diem subsidy amounts incorporated in the contract for maintenance and repairs and/or stores, supplies and expendable equipment are positive, the partial payment will be limited to the lesser of (i) an amount determined by multiplying the differential percentage for such category of expense by the costs incurred for such items by the operator in any of the United States or the Commonwealth of Puerto Rico subsequent to commencement of the subsidized voyage or (ii) 90 percent of the tentative per diem amounts for such category of expense times the number of subsidized voyage days.

(c) *Reduction in subsidy payments.*

(1) *Reduction in subsidy payments due to deviations, idleness or delay.* In accordance with paragraph (c)(4) of § 294.3 a subsidized vessel is allowed a maximum of 3½ days steaming time in excess of the normal total steaming time for a ballast return voyage when engaging in the carriage of bulk cargo in U.S. import commerce. Any time in excess of the allowable 3½ days steaming time plus loading and unloading time will result in a reduction of subsidy. Similarly, any time that is disallowed by the Board as a result of periods of idleness or delay pursuant to paragraph (c)(5) of § 294.3 will result in a reduction in subsidy. The required reduction in subsidy will be accomplished on Schedule A of the billing format set out in § 294.13(e) by reducing the "total voyage days" by the excess deviation time or unallowable period of idleness or delay to determine the "subsidized voyage days."

(2) *Reduction in subsidy payments due to reduced operating costs during periods of idleness or delay.* Reductions in costs during periods of idleness or delay will result in a reduction in subsidy. For partial payment billing purposes, a reduction in the amount of subsidy payable shall be effected through a reduction in the tentative wage subsidy amount applicable to the periods of idleness or delay. The reduction of the subsidy shall be computed as follows:

(i) The tentative wage per diem subsidy amount incorporated into the operating-differential subsidy contract shall be divided by the number of crew shown in the manning scale incorporated into the operating-differential subsidy contract to determine the average tentative wage per man per diem subsidy amount.

(ii) A man-day reduction shall be computed by multiplying the number of crew reduced below the contractual manning scale (regardless of crew rating) by the number of days of such reduction. If there is more than one crew reduction, the separate man-day crew reductions shall be totaled to determine the total man-day crew reduction. For example, if, for the first four days of the idle or delay period, the crew was reduced by six members and for the next twenty days, the crew was further reduced by 18 more crew members for a total crew reduction of 24, the total man-day crew reduction for the period would be 504 (six crew members for four days equal 24 man-days; 18 crew members plus six crew members, a total of 24 crew members, for twenty days equal 480 man-days).

(iii) The reduced accrued tentative wage subsidy amount shall be derived by multiplying the average tentative wage per man per diem subsidy amount by the total man-day crew reduction.

(iv) Ninety percent of the reduced accrued tentative wage subsidy shall be deducted from the partial payment billing vouchers.

(d) *Reduction in subsidy payments applicable to abatements.* The total subsidy determined as above will be reduced by the amount of the abatement calculated pursuant to § 294.9.

(e) *Forms.* The partial payment billing is to be prepared on a public voucher, standard forms 1034 and 1034a which can be obtained from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402 and is to be submitted in five copies, made up of an original, (SF 1034), supported as set forth below, three supported copies and one unsupported copy (SF 1034a). The unsupported copy will be returned to the payee by the Treasury Department. The following schedules are to be used for computing the operating-differential subsidy due and as support of the public voucher. Each operator shall furnish its own required supply of these schedules.

SCHEDULE A

(f) *Operator's affidavit.* An operator's affidavit, substantially in the form shown below, is to be submitted with each billing.

AFFIDAVIT

State of _____,
City of _____,
County/Parish of _____,
I, _____ being duly sworn, depose and say, that I am _____ of _____ (herein referred to as the "Operator"), and as such am familiar with (a) the provisions of the Operating-Differential Subsidy Agreement, Contract No. _____ dated as of _____, to which the Operator is a party, and (b) the operation of the vessel(s) covered by said Agreement; and (c) the accounts, books, records and disbursements of the Operator relating to such operation.

Referring to the public voucher dated _____, covering (vessel name) _____, on a voyage which commenced _____ and terminated, _____, and attached, submitted by said Operator concurrently herewith for a payment on account in the sum of _____, under said Agreement, the Operator has fully complied with the terms and conditions of said Agreement and applicable orders, regulations, rulings and provisions of the Merchant Marine Act, 1936, as amended, and is entitled under the provisions of said Agreement and orders, regulations and rulings applicable thereto, to the amount of the payment on account requested; and further depose and say that the vessel named in the attached schedules was in authorized service for the voyage on which the payment on account is requested and has not included in the calculations of the amount of subsidy claimed in the attached voucher any costs of a character that the Maritime Administration, or Secretary of Commerce, acting by and through the Maritime Subsidy Board, or any predecessor or successor, had advised the Operator to be ineligible to be so included, or any costs collectible from insurance, or from any other source; and further depose and say that during the course of this voyage the vessel named did not carry (1) any cargo in the domestic commerce of the United States; or (2) any U.S. preference cargo, including that covered by 10 U.S.C. 2631, 46 U.S.C. 1241 and 15 U.S.C. 616a; or (3) any other commercial cargo simultaneously with the export bulk raw and processed agricultural commodities being carried to the U.S.S.R. except equipment which may be needed to facilitate unloading of such agricultural commodities.

Payment by the Maritime Administration of all or part of the amount claimed herein shall not be construed as approval as the correctness of the amount stated to have been due, nor a waiver of any right or remedy the Maritime Administration, or Secretary of Commerce, acting by and through the Maritime Subsidy Board, or any predecessor or successor, may have under the terms of said Agreement, or otherwise.

I further depose and say that this affidavit is made for and on behalf and at the direction of the Operator for the purpose of inducing the Maritime Administration to make a payment on account pursuant to the provisions of the aforesaid Operating-Differential Subsidy Agreement.

Subscribed and sworn to before me, a Notary Public, in and for the aforesaid County and State, this ____ day of _____, 19__. My commission expires _____

_____
Notary Public.

(g) *Submission of partial payment billing.* The partial payment billing is to be submitted to the Maritime Administration, Office of Budget and Accounts, Washington, D.C. 20230 for processing and payment.

(h) *Supplemental partial payment billing.* Supplemental partial payment billings for maintenance and repairs and store supplies and expendable equipment costs incurred by the operator in any of the United States or the Commonwealth of Puerto Rico subsequent to the preparation of the initial partial payment billing may be submitted not more frequently than once every 30 calendar days. Supplemental partial payment billings will be prepared and submitted in the same manner as the initial partial payment billing.

§ 294.14 Final payment billing procedure.

(a) *In general.* This section sets forth the procedures for the final payment billings and supplemental final payment billings by an operator. An operator may make final payment billings after the Maritime Administration completes audit of the operator's historical costs, subsidizable costs and revenues from the carriage of bulk raw and processed agricultural commodities from the U.S. to the U.S.S.R. This section provides rules for the conduct of the audit and specifies when an operator may make final payment or supplemental final payment

(b) *Audit*—(1) *In general.* Audit consists of verification by the Maritime Administration of the following four items in respect to each subsidized vessel:

(i) Historical costs;

(ii) Actual subsidizable costs incurred on the subsidized voyage;

(iii) Actual costs of maintenance and repairs (M&R) and stores, supplies and expendable equipment (SS&E) incurred in any of the United States or the Commonwealth of Puerto Rico after commencement of the subsidizable voyage; and

(iv) Revenues earned on the subsidized voyage for the carriage of bulk raw and processed agricultural commodities from the U.S. to the U.S.S.R.

(2) *Information necessary for audit.* In order to perform the audit, the operator must submit all documents relating to the items specified in subparagraph (1) of this paragraph. These documents include, but are not limited to:

(i) Historical costs:

(A) *M&R*—invoices (as directed by the Maritime Administration) of suppliers and repair yards in support of costs paid during the five-year period preceding the current year which were submitted to the Board for tentative subsidy per diem calculation purposes;

(B) *Protection and indemnity insurance deductible absorptions*—crew injury, illness and death claim records and files compiled in connection with costs absorbed and paid under protection and indemnity insurance policy during the three-year period preceding the current year or such lesser period as the vessel has been in operation, which were submitted to the Board for tentative subsidy per diem calculation purposes;

(C) Deductible provisions of protection and indemnity insurance policies in effect during the 3 years preceding the current year and deductible provisions of hull and machinery insurance policies in effect during the 5 years preceding the current year.

(D) *SS&E*—invoices (as directed by the Maritime Administration) of suppliers in support of costs paid during the three-year period preceding the current year which were submitted to the Board for tentative subsidy per diem calculation purposes.

(ii) Actual subsidizable costs incurred on the subsidized voyage:

(A) *Wages of officers and crew*—voyage and port payrolls including overtime supports, individual pay vouchers, computation of payroll taxes and the various payroll contributions payable under collective bargaining agreements for the period of the subsidized voyage;

(B) *Subsistence of officers and crew*—computation of subsistence inventories aboard vessel both at the commencement and the termination of the subsidized voyage, vendors' invoices and delivery receipts for subsistence stores purchased; vendors's invoices for loading of subsistence stores aboard vessel;

(C) *Vessel insurance*—protection and indemnity insurance and hull and machinery insurance policies in effect during the subsidized voyage and applicable premium invoices, general and particular average claim files;

(D) *Fuel*—computation of fuel inventories aboard vessel both at the commencement and the termination of the subsidized voyage, vendors' invoices and delivery receipts for fuel purchased, contracts for the purchase of fuel;

(E) *Other vessel expenses*—invoices and receipts applicable to subsidizable costs incurred during the subsidizable voyage;

(F) *Vessel depreciation*—computation of depreciation and supporting data on vessel cost capitalized;

(G) *Interest expense attributable to vessel indebtedness*—computation of interest expense together with supporting loan agreements evidencing debt principal, interest rates, amortization schedules, and other terms of the loan.

(iii) Actual costs of M&R and SS&E incurrred in any of the United States or the Commonwealth of Puerto Rico after the commencement of the subsidized voyage:

(A) *M&R*—invoices of domestic suppliers and repair yards for all such items charged to the subsidized vessel; and

(B) *SS&E*—invoices of domestic suppliers for all such items charged to the subsidized vessel including invoices for such items used to stock inventory immediately preceding the subsidized voyage.

(iv) Revenues earned on the subsidized voyage from the carriage of bulk raw and processed agricultural commodities from the U.S. to the U.S.S.R. for the purpose of determining abatement of subsidy as provided in § 294.9—all contracts of affreightment, charter parties, bills of lading and other documents re-

V 38-149
AUG 3 73
XUM

lating to revenues earned from the carriage of bulk agricultural commodities, including cargo loaded and cargo discharged reports.

(3) *Time for submission of audit data.* Audit data shall be submitted as follows:

(i) Historical cost data shall be submitted as soon as possible after the commencement of a subsidized voyage.

(ii) All other data shall be submitted within one year from the termination of a subsidized voyage except as provided in paragraph (d) of this section.

(c) *Final payment procedures*—(1) *In general.* After the audit is completed, the Maritime Administration will determine final subsidy per diem amounts and differential percentages. When such amounts are incorporated into the operating-differential subsidy agreement (ODSA), the operator shall make a final payment billing pursuant to paragraph (c)(8).

(2) *Final payments of subsidy applicable to maintenance and repairs and stores, supplies and expendable equipment:*

(i) *Negative per diem subsidy amounts.* If the final per diem subsidy amount incorporated into the operating-differential subsidy contract for M&R or SS&E is negative, the final payment will be reduced by the product of such negative per diem subsidy amount multiplied by the number of subsidized voyage days.

(ii) *Positive per diem subsidy amounts and positive differential percentages.* If the final per diem subsidy amount or differential percentage incorporated into the subsidy contract for M&R or SS&E, is positive, the final payment will be limited to the lesser of:

(A) An amount determined by multiplying the differential percentage for such category of expense by the costs incurred by the subsidized operator for such items in any of the United States or the Commonwealth of Puerto Rico to the date of the final payment billing;

(B) An amount determined by multiplying the final per diem amount for such category of expense by the number of subsidized voyage days.

(3) *Reduction of final subsidy payments due to deviations, idleness or delays.* The reduction of subsidy required under § 294.13(c) because of deviations, idleness or delays during the subsidized voyage shall be made on final subsidy payment vouchers.

(4) *Reduction of final subsidy payments due to abatement of subsidy.* The total subsidy payment as determined under this Part shall be reduced by the amount of subsidy abatement calculated pursuant to § 294.9.

(5) *Forms for final payment billing.* Final payment billing shall be submitted to the appropriate Maritime Administration Region Finance Office in the forms described in § 294.13(e). Payment to the operator will be made by Maritime Administration, Washington, D.C.

(6) *Affidavit.* The affidavit set forth in § 294.13(f) shall be submitted with the final payment billing, and each supplemental final payment billing.

(7) *Finality of final payment billing.* Except as provided in paragraph (d) of this section (relating to supplemental final payment billings for M&R and SS&E) costs for all subsidizable items shall be final when billed and not subject to adjustment by the operator.

(8) *Maximum time for final payment billing.* Final payment billing shall be made not later than 30 days from the date final per diem amounts and differential percentages are incorporated into the ODSA.

(d) *Supplemental final payment billings*—(1) *In general.* Under paragraph (b)(2)(ii) of § 294.10, subsidy on M&R and SS&E is not paid until (i) the operator makes actual expenditures for such items in any of the United States or the Commonwealth of Puerto Rico within a 5-year period from the date that the subsidized voyage commenced and (ii) such expenditures are audited by the Maritime Administration. Within that 5-year period, billings may be made subject to the rules in this subsection.

(2) *Rules for supplemental billings.* Supplemental final payment billings may be made when the applicable per diem subsidy amount and differential percentage for M&R or SS&E is positive.

(3) *Frequency of supplemental billings.* Supplemental final payment billings may not be made more often than once each 30 days. Each billing shall include the cumulative costs of M&R or SS&E on which subsidy is payable to the date of such billing.

(4) *Submission of supplemental billings.* Supplemental final payment billings shall be submitted in the same manner as provided in paragraph (c) of this section.

§ 294.15 Renegotiation.

(a) *In general.* Paragraph (b) of § 294.4 of this Part provides that subsidy otherwise payable under the operating-differential subsidy contracts for the carriage of bulk raw and processed agricultural commodities from the U.S. to the U.S.S.R. shall be subject to renegotiation. This section provides rules for the filing of a statement of profit or loss on such carriage to provide the Board with a basis on which to review operating-differential subsidy contracts subject to renegotiation.

(b) *Requirement for filing.* Every operator receiving subsidy under a contract pursuant to this Part must file a statement with the Board when its total gross receipts from operation under this Part, including subsidy payments received or accrued and revenues earned from the carriage of U.S. import cargoes, are in excess of $1 million for any taxable year. In the event of a short taxable year, the $1 million minimum gross receipts shall be prorated on a daily basis. Only contracts of operators having receipts in excess of the minimum requirement for filing purposes may be subject to renegotiation under this section.

(c) *Filing statements.* Operators with contracts subject to renegotiation must file Maritime Administration Form MA–782 or an equivalent statement with the Secretary, Maritime Subsidy Board, Washington, D.C. 20230 (Secretary, MSB) within 120 days following the close of the operator's taxable year. Form MA–782 may be obtained from the Secretary, MSB.

(d) *Extension of filing date.* (1) *In general.* All requests for extension of time for filing the required statement must be made in writing to the Secretary, MSB prior to the date for filing. Extensions will be granted when the operator has been granted an extension for filing its Federal income tax return or upon presentation of other valid reason.

(2) *Length of extension.* Extensions will be granted for a reasonable length of time. Where an extension is sought because the due date for filing the Federal income tax return has been extended, a statement must be filed within 15 days from the date of filing the Federal income tax form.

(e) *Limitation on time for renegotiation.* If within one year from the date the statement is filed the Board does not commence renegotiation or inform the operator in writing that it intends to commence renegotiation, the operator is relieved from further liability for renegotiation under this Part.

(f) *Scope of renegotiation.* (1) *Voyages.* Renegotiation will not be conducted on a voyage-by-voyage basis but will be conducted on the basis of all voyages subsidized pursuant to this Part (renegotiable voyages) and terminated during the taxable year.

(2) *Consolidated renegotiations.* Neither filing of consolidated statements nor consolidated renegotiation will be permitted even though a consolidated Federal income tax return is filed. Thus, for example, if companies B and C, which are subsidiaries of company A, each have an operating-differential subsidy contract, B and C must file separately for renegotiation whether or not a consolidated tax return is filed.

(g) *Preparation of Form MA–782.* (1) *In general.* The purpose of Form MA–782 is to make allocations of revenues and expenses between operations subject to renegotiation under this Part (renegotiable operations) and all other operations (nonrenegotiable operations). When completed, the form will show the portion of net profit which is attributable to renegotiable operations and which may be reviewed as to reasonableness.

(2) *Applicability of standard Maritime Administration accounting.* Form MA–782 is based on the standard Maritime Administration accounting system prescribed in Part 282 of this Chapter and in Maritime Administration General Order 22. Operators which do not keep books according to this system are to submit a statement as similar to Form MA–782 as possible and attached thereto an explanation of the accounting system used and the basis for allocations between renegotiable operations and other operations.

(3) *Definition of voyage for purposes of renegotiation.* The definition of voyage is contained in § 294.3(c) of this Part. However, for the purpose of determining profits subject to renegotiation, the following additional expenses may be allocated entirely to the renegotiable operations:

(i) Vessel cleaning expenses and reasonable costs of storing and supplying the vessel incurred before a renegotiable voyage;

(ii) Operating expenses of the vessel on the ballast voyage from last port of call of lay-up to port of loading for a renegotiable voyage.

(iii) Operating expenses incurred on a route deviation to engage in U.S. import commerce, notwithstanding the limitation contained in 294.3(c)(4)(i) of this Part;

(iv) Voyage maintenance and repair expenses incurred after and as a result of a renegotiable voyage.

(4) *Method of allocation.* All allocations between renegotiable and nonrenegotiable operations are to be direct, except for the following:

(i) "Inactive vessel expenses." All inactive vessel expenses are to be allocated directly to nonrenegotiable operations, unless specifically approved by the Board for allocation to renegotiable operations.

(ii) "Net income or expense of terminal operations, cargo handling operations, tug and lighter operations and other shipping operations." These accounts are to be allocated between renegotiable and nonrenegotiable operations in the same proportion as the charges for such facilities and services attributable to the renegotiable operation bear to the total of the charges for such facilities and services.

(iii) "Agency fees, commissions and brokerage earned, administrative and general expenses, management commissions, advertising, taxes other than income taxes, bad debt expenses and amortization of deferred charges, debt discount and expense, organization and preoperating expense." These accounts are to be allocated between renegotiable and nonrenegotiable operations in the same proportion as the vessel operating and maintenance expense attributable to each operation bear to the total operations. Vessel operating and maintenance expense consists of those expenses proper for inclusion in Account 700—"Operating expenses; terminated voyages," excepting Account 760—"Charter hire," and in Account 800—"Inactive vessel expense," excepting Account 826—"Charter hire," as prescribed in Part 282 of this Chapter.

(iv) "Interest expense on vessel mortgages and depreciation expense on vessels." Interest expense on vessel mortgages and depreciation expense on vessels subject to the provisions of this section are to be charged to renegotiable operations in proportion to the ratio of the number of days such vessel operates on subsidized renegotiable voyages to the total number of days in the tax year for which the vessel was owned. Interest expense on vessel mortgages and depreciation expense on vessels not included in the operating-differential subsidy contract are to be charged directly to nonrenegotiable operations. Interest expense not attributable to vessel mortgages, and depreciation and amortization expense other than for vessels are to be allocated between renegotiable and nonrenegotiable operations on the basis of the vessel operating and maintenance expense formula prescribed in clause (iii) of this subparagraph.

(v) Any other reasonable method of allocation for the expenses included in this subparagraph may be utilized by the operator. If an alternate method of allocation is elected, an explanation of such method must be attached to the statement filed. The reasonableness of such alternate method of allocation will be subject to review by the Board.

(5) *Other income and deductions allocable to renegotiable service.* A schedule shall be attached detailing all other income, deductions, expenses and credits whether or not allocable in whole or in part to renegotiable operations in the amounts shown on the operator's Federal income tax return. An explanation of the method used for the allocations shall be included. These amounts shall be shown net of tax adjustments.

(6) *Non-Federal taxes.* Non-Federal taxes based on income shall be allocated directly to nonrenegotiable operations.

(7) *Net income in the case of a corporation.* This amount ordinarily will be that shown in the Federal income tax return before net operating loss deduction and special deductions. If the amount differs from that reported for tax purposes, a reconciling schedule and explanation shall be attached.

§ 294.16 Effective date.

The provisions of this Part shall be effective on July 31, 1973, and supersede regulations originally appearing on October 21, 1972 and thereafter amended.

NOTE: The reporting requirements contained herein have been approved by the Office of Management and Budget in accordance with 44 U.S.C., sections 3501–11.

(Sec. 204, 49 Stat. 1987, as amended; 46 U.S.C. 1114)

Dated: July 30, 1973.

By Order of the Assistant Secretary of Commerce for Maritime Affairs and the Maritime Subsidy Board,

JAMES S. DAWSON, Jr.,
Secretary, Maritime Subsidy Board, Maritime Administration.

[FR Doc.73-15886 Filed 8-2-73;8:45 am]

Title 5—Administrative Personnel

CHAPTER I—CIVIL SERVICE COMMISSION

PART 1001—EMPLOYEE RESPONSIBILITIES AND CONDUCT

Statements of Employment and Financial Interests

Section 1001.735–401 is being revised and thirteen new positions are added to the list of positions, the incumbents of which are required to submit statements of employment and financial interests in accordance with §§ 1001.735–402 through 1001.735–411.

Effective August 3, 1973, § 1001.735–401 is amended as set out below.

§ 1001.735–401 Employees required to submit statements.

(a) *Office of the Executive Director.* (1) The Executive Director.
(2) The Deputy Executive Director.
(3) The Assistant Executive Director.

(b) *Office of Labor-Management Relations.* (1) The Director.

(c) *The Office of the General Counsel.* (1) The General Counsel.
(2) The Deputy General Counsel.

(d) *Board of Appeals and Review.* (1) The Chairman.

(e) *Office of Administrative Law Judges.* (1) The Director.
(2) All employees in Administrative Law Judge positions.

(f) *Bureau of Management Services.* (1) The Director.
(2) The Deputy Director.
(3) The Director of Personnel and Labor Relations.
(4) The Chief, Office Services Division.
(5) The Assistant Chief, Office Services Division.
(6) The Chief, Budget and Finance Division.
(7) The Assistant Chief, Budget and Finance Division.

(g) *Bureau of Retirement, Insurance, and Occupational Health.* (1) The Director.
(2) The Deputy Director.
(3) The Assistant Director.
(4) The Assistant to the Director.
(5) The Chief, Legislative and Policy Division.
(6) The Chief Actuary, Office of the Actuary.
(7) Assistant to the Chief (Contracts and Instructions Specialists) GS–14 and GS–15, Legislative and Policy Division.
(8) Supervisory Accountant, GS–15, Systems and Audits.
(9) Systems Accountant, GS–14, Systems and Audits.
(10) Auditors (Financial Activities), GS–13, Systems and Audits.
(11) Occupational Health Program Manager.
(12) Regional Occupational Health Representative.

Title 12—Banks and Banking

CHAPTER III—FEDERAL DEPOSIT INSURANCE CORPORATION

SUBCHAPTER B—REGULATIONS AND STATEMENTS OF GENERAL POLICY

PART 329—INTEREST ON DEPOSITS

Maximum Rates of Interest on Single and Multiple Maturity Time Deposits

Correction

In FR Doc. 73-15505 appearing at page 20247 in the issue of Monday, July 30, 1973, the section heading for § 329.6, should read "§ 329.6 *Maximum rates of interest payable on time and savings deposits by insured nonmember banks other than insured nonmember mutual savings banks.*"

Title 14—Aeronautics and Space

CHAPTER I—FEDERAL AVIATION ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

[Docket No. 73-NW-9-AD; Amdt. 39-1700]

PART 39—AIRWORTHINESS DIRECTIVES

Boeing 737 Series Airplanes

Pursuant to the authority delegated to me by the Administrator (31 FR 13697), an airworthiness directive was adopted on July 20, 1973 and made effective immediately as to all known United States operators of all Boeing 737 airplanes delivered prior to November 1, 1972. Cracks have been detected in the wing front spar upper chord in four airplanes. These cracks were between two and twelve inches in length. These cracks severely impair the integrity of the wing and could lead to structural failure. Since this condition is likely to develop in other model 737 airplanes, the airworthiness directive was issued to require inspection and repair, as necessary, of the wing front spar upper chord.

Since it was found that immediate corrective action was required, notice and public procedure thereon was impracticable and contrary to the public interest and good cause existed for making the airworthiness directive effective immediately. These conditions still exist and the Airworthiness Directive is hereby published in the FEDERAL REGISTER as an amendment to § 39.13 of Part 39 of the Federal Aviation Regulations.

BOEING. Applies to all Boeing 737 airplanes delivered prior to November 1, 1972 certificated in all categories.

Compliance required as indicated:
To detect cracks in the wing front spar upper chord, accomplish the following:

(A) Within the next 100 hours time in service, unless already accomplished in accordance with Boeing Alert Service Bulletin 737–57–1081, dated July 19, 1973, inspect the wing front spar upper chord for cracks in accordance with that service bulletin.

(B) If cracks less than two inches long are found, repair prior to further flight in accordance with Boeing Alert Service Bulletin 737–57–1081, Paragraph 4.C. Reinspect daily, using eddy current or dye penetrant inspection methods. If crack growth is determined, or within 400 hours time in service following the first inspection in accordance with Paragraph (A), whichever occurs first, repair in accordance with Boeing Alert Service Bulletin 737–57–1081, Paragraph 5.

(C) If cracks of two inches length or greater are found, repair prior to further flight in accordance with Boeing Alert Service Bulletin 737–57–1081, Paragraph 5, or subsequent FAA approved revisions, or an equivalent method approved by the Chief, Engineering and Manufacturing Branch, FAA Northwest Region.

(D) Airplanes having cracks which require rework under this AD may be flown in accordance with FAR § 21.197 to a base where rework can be accomplished.

(E) Revisions to this AD concerning reinspection intervals and terminating action will be forthcoming.

The manufacturer's specifications and procedures identified and described in this Directive are incorporated herein and made a part hereof pursuant to 5 U.S.C. 552(a)(1). All persons affected by this Directive who have not already received these documents may obtain copies upon request to The Boeing Company, Box 3707, Seattle, Washington 98108. These documents may also be examined at FAA Northwest Region, Boeing Field International, Seattle, Washington 98108.

This amendment becomes effective on August 3, 1973, for all persons except those to whom it was made effective immediately by telegram dated July 20, 1973.

(Secs. 313(a), 601, 603, Federal Aviation Act of 1958; 49 U.S.C. 1354(a), 1421, 1423; sec. 6(c); Department of Transportation Act; 49 U.S.C. 1655(c))

Issued in Seattle, Washington on July 27, 1973.

J. H. TANNER,
Acting Director
Northwest Region.

[FR Doc.73-15982 Filed 8-2-73;8:45 am]

[Airspace Docket No. 73-SO-4]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Alteration of Control Zone and Transition Area

The purpose of this amendment to Part 71 of the Federal Aviation Regulations is to alter the Owensboro, Ky., control zone and transition area.

The Owensboro control zone is described in § 71.171 (38 FR 351) and the Owensboro transition area is described in § 71.181 (38 FR 435). In each description, an extension is predicated on Owensboro VOR 181° radial. Since the VOR RWY 35 Instrument Approach Procedure has been revised to utilize the compass locator-outer marker in lieu of the Masonville RBN, and the altitude over the COMLO has been raised to 2,300 feet MSL, the control zone extension is no longer required. The transition area extension was designated to provide controlled airspace protection for IFR aircraft executing the VOR RWY 35 and NDB RWY 35 Instrument Approach Procedures. Since the VOR RWY 35 Instrument Approach Procedure has been revised and the NDB RWY 35 Instrument Approach Procedure has been cancelled, the transition area extension is no longer required. It is necessary to alter the descriptions to reflect these changes. Since these amendments are less restrictive in nature, notice and public procedure hereon are unnecessary.

In consideration of the foregoing, Part 71 of the Federal Aviation Regulations is amended, effective immediately, as hereinafter set forth.

In § 71.171 (38 FR 351), the Owensboro, Ky., control zone is amended as follows:

"• • • within 2.5 miles each side of Owensboro VOR 181 ° radial, extending from the 5-mile radius zone to the Masonville RBN (Lat. 37°39'35" N, Long. 87°10'17" W) • • •" is deleted from the description.

In § 71.181 (38 FR 435), the Owensboro, Ky., transition area is amended to read:

OWENSBORO, KY.

That airspace extending upward from 700 feet above the surface within a 9-mile radius of Owensboro-Daviess County Airport (Lat. 37°44'31" N, Long. 87°09'57" W).

(Sec. 307(a) Federal Aviation Act of 1958; 49 U.S.C. 1348(a); Sec. 6(c) Department of Transportation Act; 49 U.S.C. 1655(c))

Issued in East Point, Ga., on July 25, 1973.

PHILLIP M. SWATEK,
Director, Southern Region.

[FR Doc.73-15984 Filed 8-2-73;8:45 am]

[Docket No. 13059; Amdt. No. 875]

PART 97—STANDARD INSTRUMENT APPROACH PROCEDURES

Miscellaneous Amendments

This amendment to Part 97 of the Federal Aviation Regulations incorporates by reference therein changes and additions to the Standard Instrument Approach Procedures (SIAPs) that were recently adopted by the Administrator to promote safety at the airports concerned.

The complete SIAPs for the changes and additions covered by this amendment are described in FAA Forms 3139, 8260–3, 8260–4, or 8260–5 and made a part of the public rule making dockets of the FAA in accordance with the procedures set forth in amendment No. 97–696 (35 FR 5609).

SIAPs are available for examination at the Rules Docket and at the National Flight Data Center, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591. Copies of SIAPs adopted in a particular region are also available for examination at the headquarters of that region. Individual copies of SIAPs may be purchased from the FAA Public Document Inspection Facility, HQ–405, 800 Independence Avenue, SW., Washington, D.C. 20591 or from the applicable FAA regional office in accordance with the fee schedule prescribed in 49 CFR 7.85. This fee is payable in advance and may be paid by check, draft or postal money order payable to the Treasurer of the United States. A weekly transmittal of all SIAP changes and additions may be obtained by subscription at an annual rate of $150.00 per annum from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. Additional copies mailed to the same address may be ordered for $30.00 each.

Since a situation exists that requires immediate adoption of this amendment, I find that further notice and public procedure hereon is impracticable and good cause exists for making it effective in less than 30 days.

In consideration of the foregoing, Part 97 of the Federal Aviation Regulations is amended as follows, effective on the dates specified:

1. Section 97.23 is amended by orginating, amending, or canceling the following VOR–VOR/DME SIAPs, *effective September 13, 1973.*

Title 16—Commercial Practices

CHAPTER I—FEDERAL TRADE COMMISSION

PART 14—ADMINISTRATIVE INTERPRETATIONS, GENERAL POLICY STATEMENTS, AND ENFORCEMENT POLICY STATEMENTS [1]

Enforcement Policy Statement

The Federal Trade Commission has noted that, with increasing intensity, advertisers are making special efforts to reach foreign language-speaking consumers. As part of this special effort, advertisements, brochures and sales documents are being printed in foreign languages.

In recent years the Commission has issued various cease and desist orders which require affirmative disclosure in connection with certain kinds of representations and business activities. Generally, these disclosures are required to be "clear and conspicuous." Because questions have arisen as to the meaning and application of the phrase "clear and conspicuous" with respect to foreign language advertisements and sales materials, the Commission deems it appropriate to set forth the following enforcement policy statement:

§ 14.9 Cease and desist order requirements with respect to clear and conspicuous disclosure in foreign language advertising and sales materials.

(a) Where a cease and desist order requires "clear and conspicuous" disclosure of certain information, that disclosure must be in the same language as that principally used in the advertisements and sales materials involved.

(b) Any respondent who fails to comply with this requirement may be the subject of a civil penalty proceeding for violating the terms of a Commission cease-and-desist order.

(Sec. 5, 38 Stat. 719, as amended; 15 U.S.C. 45)

By direction of the Commission dated July 24, 1973.

[SEAL] CHARLES A. TOBIN, *Secretary.*

[FR Doc.73-16085 Filed 8-2-73;8:45 am]

Title 17—Commodity and Securities Exchanges

CHAPTER II—SECURITIES AND EXCHANGE COMMISSION

[Release 34-10304]

PART 241—INTERPRETATIVE RELEASE RELATING TO THE SECURITIES EXCHANGE ACT OF 1934 AND GENERAL RULES AND REGULATIONS THEREUNDER

Application of Minimum Net Capital Requirements

In Securities Exchange Act Release No. 9633, of June 14, 1972 [37 FR 11970] the Commission announced the adoption of amendments to Rule 15c3-1 [17 CFR 240.15c3-1] which increased the minimum net capital requirements of certain brokers or dealers. The rule was amended to require that brokers or dealers who handle customer funds or securities or who engage in a general securities business maintain minimum net capital of not less than $25,000.[1] With respect to certain brokers or dealers who were registered with the Commission prior to August 13, 1971, the amended rule provided that those brokers or dealers would be permitted to maintain minimum net capital of not less than $5,000 until July 31, 1973, at which time they would be required to maintain minimum net capital of not less than $15,000.[2] On July 31, 1974, the minimum net capital requirements will be increased to not less than $25,000 for those brokers or dealers.

Rule 15c3-1 provides in paragraph (a)(3) that a minimum net capital requirement of not less than $5,000 shall continue to exist for registered brokers or dealers who limit their business activities to the prompt transmittal of customers' funds or securities, and where they do not otherwise hold funds or securities of or for customers, or do not otherwise carry accounts of customers.

Many brokers or dealers will be required to maintain increased minimum net capital of not less than $15,000 on July 31, 1973, and the Commission's Regional Offices and the National Association of Securities Dealers have been asked by certain brokers or dealers whether they are entitled to continue to maintain minimum net capital of not less than $5,000.

In adopting the amendments to Rule 15c3-1, it was the Commission's intention that the $5,000 minimum net capital requirement be available only to brokers or dealers who introduced all their transactions to another broker or dealer on a fully disclosed basis. The Commission in the adopting release emphasized the necessity of assuring that smaller firms have a secure position in the securities industry, and that entry into the industry be preserved to the greatest extent possible compatible with the public interest and the protection of investors. In that connection while establishing a $25,000 minimum requirement for most brokers or dealers who carry customer accounts, the $5,000 requirement was preserved for those who introduced their accounts on a fully disclosed basis. In order to make this provision viable, the Commission also amended Rule 17a-3(b) to permit all brokers or dealers, subject to their maintaining minimum net capital of not less than $25,000, to clear such transactions for introducing brokers or dealers.

In order to clarify the applicability of the $5,000 minimum requirement set forth in paragraph (a)(3) and to some extent the $2,500 minimum capital requirement of paragraph (a)(4), the Commission is setting forth its views below:

A. The $5,000 Minimum Net Capital Requirement—Paragraph (a)(3)

The $5,000 minimum requirement shall be available to those registered brokers or dealers who do not carry customer accounts.

In administering the net capital rule the $5,000 requirement has been held to be applicable if the broker or dealer engages only in one, or any combination, of the following activities:

(1) The broker or dealer introduces all of its transactions to another broker or dealer or bank as provided in Rule 17a-3(b). Such transactions are confirmed to customers by the clearing broker or dealer who is deemed to carry such customer's account. All checks in payment for such purchases are to be made payable to the clearing broker or dealer by the customer and if received by the introducing broker or dealer they are to be promptly transmitted to the clearing broker or dealer by noon the next business day. Also, deliveries of securities by customers are to be made directly to the clearing broker or dealer who confirms such transactions. Any payments received by the introducing broker or dealer from customers for the payment of securities purchased and any securities received from customers by the introducing broker or dealer in settlement of sales shall be transmitted promptly to the clearing broker or dealer;

(2) The broker or dealer promptly transmits subscriptions for securities (including but not limited to limited partnership interests or redeemable shares of registered investment companies) to the issuer, sponsor or distributor of such securities and delivers checks, drafts, notes or other evidences of indebtedness which shall be payable solely to the issuer, sponsor or distributor who in turn delivers the related security directly to the subscriber or who holds such security as custodian for such customer; or

(3) The broker or dealer promptly transmits customers' checks, drafts, notes or other evidences of indebtedness payable to an independent escrow agent in payment for customer purchases of securities (including best efforts underwriting or deposits for the purchase of condominium units) and where the escrow agent has agreed in writing to hold all such funds in escrow for the persons who have beneficial interests therein and to return such funds or delivers securities purchased directly to the customers who have the beneficial interest therein.

The Commission wishes to make clear that simply because a broker or dealer is entitled to an exemption from Rule 15c3-3 under paragraph (k)(2)(A) thereof, the broker or dealer is not automatically entitled to maintain minimum net capital of not less than $5,000 unless the activities of such broker or dealer are limited as described above. Finally, the $5,000 minimum net capital requirement of Rule 15c3-1 is not intended to preclude the broker or dealer from effecting an occasional transaction for his own account.

B. The $2,500 Minimum Net Capital Requirement—Paragraph (a)(4)

It should be made clear that the $2,500 minimum net capital requirement is a special provision applicable only to those brokers or dealers who limit their business solely as specified therein. A broker or dealer who expands his business in such a fashion as to engage in the sale of other types of investment contracts is not eligible for the $2,500 requirement. Moreover, if he engages in the sale of other types of investments he will not be eligible for the $5,000 minimum net capital requirement unless he limits his activities and the manner of conducting those activities as described in A. above. Finally, if the broker or dealer does not limit his business as set forth in paragraph (a)(4) nor will the broker or dealer be eligible for the $5,000 minimum requirement set forth in (a)(3).

By the Commission.

[SEAL] RONALD F. HUNT, *Secretary.*

JULY 27, 1973.

[FR Doc.73-16020 Filed 8-2-73;8:45 am]

[1] Title changed.

[1] Brokers or dealers who registered with the Commission after August 13, 1971, are required to maintain a ratio of net capital to aggregated indebtedness of not less than 800 percentum (8 to 1) during the first year of their operations or a minimum net capital of not less than $25,000 whichever is greater.

[2] A broker or dealer must maintain not less than the appropriate minimum net capital *and* such net capital may not be less than 1/20th of his aggregate indebtedness, except during the first year of operations.

Title 19—Customs Duties

CHAPTER I—UNITED STATES CUSTOMS SERVICE, DEPARTMENT OF THE TREASURY [1]

[T.D. 73-210]

PART 4—VESSELS IN FOREIGN AND DOMESTIC TRADES

Types of Forms To Be Accepted by Customs Officers

Pursuant to § 4.99 of the Customs Regulations, Customs officers are permitted to accept certain Customs forms printed by private parties or by foreign governments, provided the forms meet certain requirements, including size requirements. Requests have been received from the private sector for approval of reduced versions of Customs Form 7527-A, the United States Customs Inward Foreign Manifest. It appears that the use of reduction processes in trade documentation will be prevalent in the future, and that smaller forms are sufficient for Customs purposes, provided that they are legible and usable.

In view of the foregoing, it is advisable to amend the Customs Regulations to allow the importing public to use the described forms, and authorize Customs officers to accept them.

Accordingly, § 4.99, Customs Regulations, is amended to read as follows:

§ 4.99 Forms: Substitution.

Customs Forms 1300, 1301, 1303, and 1304 printed by private parties or foreign governments shall be accepted provided the forms so printed conform to the official Customs forms in size (except that such forms may be up to 14 inches in length), wording, arrangement, style, size of type, and paper specifications. Customs Forms 7527-A and 7527-B printed by private parties or foreign governments shall be accepted provided the forms so printed conform to the official Customs forms in size (except that the Customs Form 7527-A may be reduced in size to not less than 11" x 8½"), wording, arrangement, style, size of type, and paper specifications. Forms not complying with the requirements of this section are not acceptable without the specific approval of the Commissioner of Customs. If instructions are printed on the reverse of any of the official Customs forms, such instructions may be omitted (although such instructions must be followed).

(R.S. 251, as amended, sec. 624, 46 Stat. 759; 5 U.S.C. 301, 19 U.S.C. 66, 1624)

Because this amendment merely relaxes a present requirement and requires no public initiative, notice and public procedure thereon is found to be unnecessary, and good cause exists for dispensing with a delayed effective date under the provisions of 5 U.S.C. 553.

Effective date. This amendment shall be effective on August 3, 1973.

[SEAL] VERNON D. ACREE, *Commissioner of Customs.*

Approved: July 25, 1973.

EDWARD L. MORGAN, *Assistant Secretary of the Treasury.*

[FR Doc.73-16069; Filed 8-2-73;8:45 am]

[1] Effective August 1, 1973, the heading of 19 CFR Ch. I is changed from "Bureau of Customs, Department of Treasury" to read as set forth above.

Title 21—Food and Drugs

CHAPTER I—FOOD AND DRUG ADMINISTRATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

SUBCHAPTER B—FOOD AND FOOD PRODUCTS

PART 121—FOOD ADDITIVES

Nitrites and/or Nitrates Combined With Spices in Curing Premixes

Correction

In FR Doc. 73-14945 appearing at page 19218 in the issue of Thursday, July 19, 1973, make the following changes:

1. In the sixth line of the second complete paragraph in the third column on page 19218, the word "nitrates" should read "nitrites".

2. In the first line of § 121.4002 on page 19219, the date "January 15, 1973", should read "January 19, 1974".

SUBCHAPTER C—DRUGS

PART 135a—NEW ANIMAL DRUGS FOR OPHTHALMIC AND TOPICAL USE

Fluocinolone Acetonide Solution, Veterinary

The Commissioner of Food and Drugs has evaluated a supplemental new animal drug application (15-298V) filed by Syntex Laboratories, Inc., Stanford Industrial Park, Palo Alto, CA 94304, proposing the safe and effective use of fluocinolone acetonide solution, veterinary, for the treatment of dogs and cats. The supplemental application is approved.

Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 512(i), 82 Stat. 347; 21 U.S.C. 360b(i)) and under authority delegated to the Commissioner (21 CFR 2.120), Part 135a is amended by adding a new section as follows:

§ 135a.52 Fluocinolone acetonide solution, veterinary.

(a) *Specifications.* The drug contains 0.01 percent fluocinolone acetonide in propylene glycol with citric acid.

(b) *Sponsor.* See code No. 036 in § 135.501(c) of this chapter.

(c) *Conditions of use.* (1) The drug is indicated for the relief of pruritus and inflammation associated with otitis externa and certain superficial acute and chronic dermatoses in the dog. It is also indicated for the relief of pruritus and inflammation associated with acute otitis externa and certain superficial acute and chronic dermatoses in the cat.

(2) A small amount of solution is applied to the affected area 2 or 3 times daily.

(3) Federal law restricts this drug to use by or on the order of a licensed veterinarian.

Effective date. This order shall be effective August 3, 1973.

(Sec. 512(i), 82 Stat. 347; 21 U.S.C. 360b(i))

Dated: July 26, 1973.

C. D. VAN HOUWELING, *Director, Bureau of Veterinary Medicine.*

[FR Doc.73-16001 Filed 8-2-73;8:45 am]

PART 135b—NEW ANIMAL DRUGS FOR IMPLANTATION OR INJECTION

Promazine Hydrochloride

The Commissioner of Food and Drugs has evaluated a supplemental new animal drug application (10-782V) filed by Wyeth Laboratories, Division of American Home Products Corp., Post Office Box 8299, Philadelphia, Pa. 19101 proposing revised labeling for the safe and effective use of promazine hydrochloride for the treatment of animals. The supplemental application is approved.

Therefore, pursuant to provisions of the Federal Food, Drug and Cosmetic Act (sec. 512(i), 82 Stat. 347; 21 U.S.C. 360b(i)) and under authority delegated to the Commissioner (21 CFR 2.120), Part 135b is amended by adding a new section as follows:

§ 135b.60 Promazine hydrochloride injection, veterinary.

(a) *Chemical name.* 10-[3-(Dimethylamino) propyl] phenothiazine monohydrochloride

(b) *Specifications.* The products contains 50 milligrams of promazine hydrochloride in each milliliter of sterile aqueous solution.

(c) *Sponsor.* See code No. 040 in § 135.501(c) of this chapter.

(d) Conditions of use. (1) It is administered either intramuscularly or intravenously to horses at a dosage level of 0.2

V38-149 AUG 3 73 XUM

milligram to 0.5 milligram per pound of body weight and to dogs and cats at 1 milligram to 3 milligrams per pound of body weight every 4 to 6 hours as a tranquilizer or preanesthetic.

(2) It is not to be used in conjunction with organophosphates because their toxicity may be potentiated, nor with procaine hydrochloride as its activity may be increased.

(3) Not for use in horses intended for food.

(4) Federal law restricts this drug to use by or on the order of a licensed veterinarian.

Effective date. This order shall be effective August 3, 1973.

(Sec. 512(i), 82 Stat. 347; 21 U.S.C. 360b(i))

Dated: July 30, 1973.

C. D. VAN HOUWELING,
Director,
Bureau of Veterinary Medicine.

PART 135b—NEW ANIMAL DRUGS FOR IMPLANTATION OR INJECTION

Levamisole Phosphate

The Commissioner of Food and Drugs has evaluated a new animal drug application (49-553V) filed by American Cyanamid Co., Post Office Box 400, Princeton, NJ 08540, proposing the safe and effective use of levamisole phosphate injection, veterinary for use as an anthelmintic in cattle. The application is approved.

Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 512(i), 82 Stat. 347; 21 U.S.C. 360b(i)) and under authority delegated to the Commissioner (21 CFR 2.120), Part 135b is amended by adding a new section as follows:

§ 135b.91 Levamisole phosphate injection, veterinary.

(a) *Specifications.* Each milliliter of levamisole phosphate injection veterinary contains levamisole phosphate equivalent to 182 milligrams of levamisole hydrochloride in sterile aqueous solution.

(b) *Sponsor.* See code No. 004 in § 135.501(c) of this chapter.

(c) *Conditions of use.* (1) The drug is administered by subcutaneous injection to cattle as an anthelmintic against the following nematode infections: stomach worms (*Haemonchus, Trichostrongylus, Ostertagia*), intestinal worms (*Trichostrongylus, Cooperia, Nematodirus, Bunostomum, Oesophagostomum*) and lungworms (*Dictyocaulus*).

(2) It is administered subcutaneously in the mid-neck region at the rate of 2 milliliters per 100 pounds of body weight. Cattle maintained under conditions of constant helminth exposure may require retreatment within 2 to 4 weeks after the first treatment.

(3) Consult veterinarian before using in severely debilitated animals.

(4) Do not administer to cattle within 7 days of slaughter for food. Do not administer to dairy animals of breeding age.

Effective date. This order shall be effective August 3, 1973.

(Sec. 512(i), 82 Stat. 347; 21 U.S.C. 360b(i))

Dated: July 26, 1973.

C. D. VAN HOUWELING,
Director,
Bureau of Veterinary Medicine.

[FR Doc.73-15997 Filed 8-2-73;8:45 am]

PART 135b—NEW ANIMAL DRUGS FOR IMPLANTATION OR INJECTION

PART 135c—NEW ANIMAL DRUGS IN ORAL DOSAGE FORMS

Triflupromazine Hydrochloride Injection, Veterinary, Triflupromazine Hydrochloride Tablets, Veterinary

The Commissioner of Food and Drugs has evaluated a supplemental new animal drug application (11-482V) filed by E. R. Squibb & Sons, Georges Rd., New Brunswick, NJ 08902, proposing revised labeling for the safe and effective use of triflupromazine hydrochloride injection, veterinary for use in dogs, cats, and horses; and triflupromazine hydrochloride tablets, veterinary for use in dogs and cats. The supplemental application is approved.

Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 512(i), 82 Stat. 347; 21 U.S.C. 360b(i)) and under authority delegated to the Commissioner (21 CFR 2.120), Parts 135b and 135c (21 CFR Parts 135b and 135c) are amended as follows:

1. Part 135b is amended by adding the following new section:

§ 135b.95 Triflupromazine hydrochloride injection, veterinary.

(a) *Specifications.* Triflupromazine hydrochloride injection, veterinary contains 20 milligrams of triflupromazine hydrochloride in each milliliter of sterile aqueous solution.

(b) *Sponsor.* See code No. 035 in § 135.501(c) of this chapter.

(c) *Conditions of use.* (1) The drug is used in dogs, cats, and horses to relieve anxiety and to help control psychomotor overactivity as well as to increase the tolerance of animals to pain and pruritus. The drug is indicated in various office and clinical procedures which require the aid of a tranquilizer, antiemetic, or preanesthetic.

(2) The drug is administered to dogs either intravenously at a dosage level of 0.5 to 1 milligram per pound of body weight daily, or intramuscularly at a dosage level of 1 to 2 milligrams per pound of body weight daily. It is administered to cats intramuscularly at a dosage level of 2 to 4 milligrams per pound of body weight daily. It is administered to horses intravenously or intramuscularly at a dosage level of 10 to 15 milligrams per 100 pounds of body weight daily to a maximum dose of 100 milligrams.

(3) Not for use in horses intended for food.

(4) Do not use in conjunction with organophosphates and/or procaine hydrochloride, because phenothiazines may potentitate the toxicity of organophosphates and the activity of procaine hydrochloride.

(5) Federal law restricts this drug to use by or on the order of a licensed veterinarian.

2. Part 135c is amended by adding the following new section:

§ 135c.112 Triflupromazine hydrochloride tablets, veterinary.

(a) *Specifications.* Each tablet contains either 10 milligrams or 25 milligrams of triflupromazine hydrochloride.

(b) *Sponsor.* See code No. 035 in § 135.501(c) of this chapter.

(c) *Conditions of use.* (1) The drug is used in dogs and cats to relieve anxiety and to help control psychomotor overactivity as well as to increase the tolerance of animals to pain and pruritus. The drug is indicated in various office and clinical procedures which require the aid of a tranquilizer, antiemetic, or preanesthetic.

(2) The drug is administered orally to dogs and cats at a dosage level of 1 to 2 milligrams per pound of body weight daily; an initial dosage at the 2-milligrams level is suggested followed by daily doses at the 1-milligram level. Frequently, the drug may be withdrawn after 4 to 5 days, with drug effect continuing after withdrawal.

(3) Do not use in conjunction with organophosphates and/or procaine hydrochloride, because phenothiazines may potentiate the toxicity of organophosphates and the activity of procaine hydrochloride.

(4) Federal law restricts this drug to use by or on the order of a licensed veterinarian.

Effective date. This order shall become effective August 3, 1973.

(Sec. 512(i), 82 Stat. 347; 21 U.S.C. 360b(i))

Dated: July 30, 1973.

C. D. VAN HOUWELING,
Director,
Bureau of Veterinary Medicine.

[FR Doc.73-15999 Filed 8-2-73;8:45 am]

PART 135c—NEW ANIMAL DRUGS IN ORAL DOSAGE FORMS

Anthelin Tablets

The Commissioner of Food and Drugs has evaluated a supplemental new animal drug application (7-226V) filed by Jensen-Salsbery Laboratories, Division of Richardson-Merrell Inc., Kansas City, MO 64141, proposing the safe and effective use of anthelin tablets, veterinary for the treatment of dogs. The supplemental application is approved.

Therefore, pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec 512(i), 82 Stat. 347; 21 U.S.C. 360b(i)) and under authority delegated to the Commissioner (21 CFR 2.120), Part 135c is amended by adding a new section as follows:

§ 135c.116 Anthelin tablets, veterinary.

(a) *Specifications.* Anthelin tablets, veterinary contain anthelin as the active ingredient.

(b) *Sponsor.* See code No. 062 in § 135.501(c) of this chapter.

(c) *Conditions of use.* (1) The drug is used for the removal of tapeworms (*Taenia* and *Dipylidium spp.*) from dogs.

(2) The tablets are administered orally to dogs at a dosage level of 4.7 milligrams of anthelin per pound of body weight up to a maximum dosage of 211.5 milligrams of anthelin for dogs 45 pounds or over. Only milk is fed 24 hours prior to treatment. The dosage is repeated in one week if indicated.

(3) Do not administer to sick, feverish, weak or undernourished dogs. Depression, nausea, vomiting and colic are signs of overdosage. If vomiting is a problem, a light feeding within 1 hour after administering the drug is recommended. If no catharsis occurs within 3 hours an enema will facilitate passage of large masses of tapeworms. Dogs may be fed their normal ration 4 to 8 hours after medication.

Effective date. This order shall be effective August 3, 1973.

(Sec. 512(i), 82 Stat. 347; 21 U.S.C. 360b(i))

Dated: July 26, 1973.

C. D. VAN HOUWELING,
Director,
Bureau of Veterinary Medicine.

PART 135c—NEW ANIMAL DRUGS IN ORAL DOSAGE FORMS

Butonate Liquid Veterinary

Correction

In FR Doc. 73-14748 appearing on page 19219 in the issue of Thursday, July 19, 1973, make the following changes:

1. In the seventh line of the first paragraph, "note" should read "nate".

2. In § 135c.78(a), the chemical name "O,O-Dimethyl (2,2,2 - trichloro - 1 - n - butyryl - oxyethyl phosphonate" should read "O,O - Dimethyl (2,2,2 - trichloro - 1 - n - butyryl - oxyethyl) phosphonate".

Title 26—Internal Revenue

CHAPTER I—INTERNAL REVENUE SERVICE, DEPARTMENT OF THE TREASURY

SUBCHAPTER A—INCOME TAX

[T.D. 7283]

PART 1—INCOME TAX; TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1953

Income Tax Regulations; Amendments Relating to DISC's

By a notice of proposed rulemaking appearing in the FEDERAL REGISTER for Friday, January 5, 1973 (38 FR 883), amendments to the Income Tax regulations (26 CFR Part 1) under sections 246(b), 246(d), 246(e), 901(d), 922, 931(a), 931(d), and 1014(d) of the Internal Revenue Code of 1954 were proposed in order to provide certain technical rules relating to DISC's. After consideration of all such relevant matters as were presented by interested persons regarding the rules proposed, it was determined that only certain nonsubstantive, technical changes should be made. Subject to such changes, the amendments of the regulations as proposed are adopted by this document.

Where the amendments refer to regulations under section 997 of the Code, the reference is intended to refer to such regulations as finally adopted. This procedure is being followed because of the need for immediate guidance with respect to the provisions contained in this Treasury decision. Proposed regulations corresponding to such reference, which can be used for informational purposes, have been published with a notice of proposed rule making in the FEDERAL REGISTER for Friday, December 29, 1972 (37 FR 28754).

Adoption of amendments to the regulations. On Friday, January 5, 1973, a notice of proposed rule making was published in the FEDERAL REGISTER (38 FR 883) in order to conform the Income Tax regulations (26 CFR Part 1) to section 246(b) of the Internal Revenue Code of 1954, section 246(d) of such Code (as added by section 502(a) of the Revenue Act of 1971 (85 Stat. 549)), to section 901(d) of such Code (as amended by section 502(b)(1) of such Revenue Act), to section 922 of such Code (as amended by section 502(c) of such Revenue Act), to section 931(a) of such Code (as amended by section 502(d) of such Revenue Act), to section 931(d) of such Code, to section 1014(d) of such Code (as added by section 502(f) of such Revenue Act), and to certain provisions of section 501 of such Revenue Act. After consideration of all such relevant matters as were presented by interested persons regarding the rules proposed, the following regulations are hereby adopted, effective for taxable years ending after December 31, 1971:

PARAGRAPH 1. Section 1.246 is amended by revising section 246(b)(1), by adding paragraphs (d) and (e) to section 246, and by amending the historical note. These amended and added provisions read as set forth below.

PAR. 2. Section 1.246-4 is added immediately after § 1.246-3. This added provision reads as set forth below.

PAR. 3. Section 1.301-1 is amended by redesignating paragraph (o) as paragraph (p) and by adding a new paragraph (o). This added provision reads as set forth below.

PAR. 4. Section 1.901-1 is amended by adding a paragraph (i). This added provision reads as set forth below.

PAR. 5. Section 1.902-3 is amended by adding a sentence at the end of paragraph (a)(1). This added provision reads as set forth below.

PAR. 6. Section 1.902-4 is amended by adding a sentence at the end of paragraph (a). This added provision reads as set forth below.

PAR. 7. Section 1.922 is amended by revising section 922 and by adding a historical note. These amended and added provisions read as set forth below.

PAR. 8. Section 1.922-1 is amended by adding a paragraph (c). This added provision reads as set forth below.

PAR. 9. Section 1.931 is amended by revising so much of section 931(a)(2) as follows section 931(a)(2)(A), by revising section 931(d), and by adding a historical note. These amended and added provisions read as set forth below.

PAR. 10. Section 1.931-1 is amended by adding a paragraph (j). This added provision reads as set forth below.

§ 1.931-1 Citizens of the United States and domestic corporations deriving income from sources within a certain possession of the United States.

PAR. 11. Section 1.1014 is amended by adding a subsection (d) and by revising the historical note. These amended and added provisions read as set forth below.

§ 1.1014 Statutory provisions; basis of property acquired from a decedent.

PAR. 12. Section 1.1014-1 is amended by revising paragraph (b). This amended provision reads as set forth below.

§ 1.1014-1 Basis of property acquired from a decedent.

* * * * *

PAR. 13. Section 1.1014-9 is added immediately after § 1.1014-8. This added provision reads as set forth below.

§ 1.1014-9 Special rule with respect to DISC stock.

(Section 7805, Internal Revenue Code of 1954, 68A Stat. 917; 26 U.S.C. 7805)

Approved: July 27, 1973.

[SEAL] DONALD C. ALEXANDER,
Commissioner of Internal Revenue.

FREDERIC W. HICKMAN,
Assistant Secretary of the Treasury.

PARAGRAPH 1. Section 1.246 is amended by revising section 246(b)(1), by adding subsections (d) and (e) to section 246, and by amending the historical note. These amended and added provisions read as follows:

§ 1.246 Statutory provisions; rules applying to deductions for dividends received.

SEC. 246. *Rules applying to deductions for dividends received.* * * *

(b) *Limitation on aggregate amount of deductions.*—(1) *General rule.* Except as provided in paragraph (2), the aggregate amount of the deductions allowed by sections 243(a)(1), 244(a), and 245 shall not exceed 85 percent of the taxable income computed without regard to the deductions allowed by sections 172, 243(a)(1), 244(a), 245, and 247, and without regard to any capital loss carryback to the taxable year under section 1212(a)(1).

* * * * *

(d) *Dividends from a DISC or former DISC.* No deduction shall be allowed under section 243 in respect of a dividend from a corporation which is a DISC or former DISC (as defined in section 992(a)) to the extent such dividend is paid out of the corporations' accumulated DISC income or previously taxed

V 38-149 AUG 3 73 XUM

income, or is a deemed distribution pursuant to section 995(b)(1).

(e) *Cross reference.* For special rule relating to mutual savings banks, etc., to which section 593 applies, see section 596.

[Sec. 246 as amended by sec. 18 and sec. 57(c)(2), Technical Amendments Act 1958 (72 Stat. 1614, 1646); sec. 214(b)(2), Rev. Act 1964 (78 Stat. 55); sec. 434(b) and sec. 512(f), Tax Reform Act 1969 (83 Stat. 625, 641); sec. 502(a), Rev. Act 1971 (85 Stat. 549)]

PAR. 2. Section 1.246–4 is added immediately after § 1.246–3. This added provision reads as follows:

§ 1.246–4 Dividends from a DISC or former DISC.

The deduction provided in section 243 (relating to dividends received by corporations) is not allowable with respect to any dividend (whether in the form of a deemed or actual distribution or an amount treated as a dividend pursuant to section 995(c)) from a corporation which is a DISC or former DISC (as defined in section 992(a) (1) or (3) as the case may be) to the extent such dividend is from the corporation's accumulated DISC income (as defined in section 996(f)(1)) or previously taxed income (as defined in section 996(f)(2)) or is a deemed distribution pursuant to section 995(b)(1) in a taxable year for which the corporation qualifies (or is treated) as a DISC. To the extent that a dividend is paid out of earnings and profits which are not made up of accumulated DISC income or previously taxed income, the corporate recipient is entitled to the deduction provided in section 243 in the same manner and to the same extent as a dividend from a domestic corporation which is not a DISC or former DISC.

PAR. 3. Section 1.301–1 is amended by redesignating paragraph (o) as paragraph (p) and by adding a new paragraph (o). This added provision reads as follows:

§ 1.301–1 Rules applicable with respect to distribution of money and other property.

* * * * *

(o) *Distributions of certain property by DISC's to corporate shareholders.* See § 1.997–1 for the rule that if a corporation which is a DISC or former DISC (as defined in section 992(a) (1) or (3) as the case may be) makes a distribution of property (other than money and other than the obligations of the DISC or former DISC) out of accumulated DISC income (as defined in section 996(f)(1)) or previously taxed income (as defined in section 996(f)(2)), such distribution of property shall be treated as if it were made to an individual and that the basis of the property distributed, in the hands of the recipient corporation, shall be determined as if such property were distributed to an individual.

* * * * *

PAR. 4. Section 1.901–1 is amended by adding a paragraph (i). This added provision reads as follows:

§ 1.901–1 Allowance of credit for taxes.

* * * * *

(i) *Dividends from a DISC treated as foreign.* For purposes of sections 901 through 906 and the regulations thereunder, any amount treated as a dividend from a corporation which is a DISC or former DISC (as defined in section 992(a)(1) or (3) as the case may be) will be treated as a dividend from a foreign corporation to the extent such dividend is treated under section 861(a)(2)(D) as income from sources without the United States.

PAR. 5. Section 1.902–3 is amended by adding a sentence at the end of paragraph (a)(1). This added provision reads as follows:

§ 1.902–3 Credit for domestic corporate shareholder of a foreign corporation (after amendment by Revenue Act of 1962).

(a) *Domestic shareholder owning stock in a first-tier corporation—(1) In general.* * * * For purposes of this section and § 1.902–5, a DISC or former DISC shall be treated as if it were a foreign corporation, but only with respect to dividends from the DISC or former DISC to the extent such dividends are treated under section 861(a)(2)(D) as income from sources without the United States.

* * * * *

PAR. 6. Section 1.902–4 is amended by adding a sentence at the end of paragraph (a). This added provision reads as follows:

§ 1.902–4 Definition of less developed country corporation for purposes of section 902.

(a) *In general.* * * * A DISC or former DISC shall not be treated as a less developed country corporation for purposes of section 902.

* * * * *

PAR. 7. Section 1.922 is amended by revising section 922 and by adding a historical note. These amended and added provisions read as follows:

§ 1.922 Statutory provisions; special deduction.

SEC. 922. *Special deduction.* In the case of a Western Hemisphere trade corporation there shall be allowed as a deduction in computing taxable income an amount computed as follows—

(1) First determine the taxable income of such corporation computed without regard to this section.

(2) Then multiply the amount determined under paragraph (1) by the fraction—

(A) The numerator of which is 14 percent, and

(B) The denominator of which is that percentage which equals the sum of the normal tax rate and the surtax rate for the taxable year prescribed by section 11.

No deduction shall be allowed under this section to a corporation for a taxable year for which it is a DISC or in which it owns at any time stock in a DISC or former DISC (as defined in section 992(a)).

(Sec. 922 as amended by sec. 502(c), Rev. Act 1971 (85 Stat. 550))

PAR. 8. Section 1.922–1 is amended by adding a paragraph (c). This added provision reads as follows:

§ 1.922–1 Special deduction of Western Hemisphere trade corporation.

* * * * *

(c) *Denial of deduction for a DISC or shareholder thereof.* The special deduction provided by section 922 is not allowed to a corporation for a taxable year (1) for which it qualifies (or is treated) as a DISC or (2) during which it owns directly or indirectly at any time stock in a corporation which, at such time, is (or is treated as) a DISC or former DISC. (See section 922(a) (1) and (3), respectively, for the definitions of the terms "DISC" and "former DISC".) For example, assume X corporation and Y corporation have the same taxable years. On the first day of its taxable year X owns and sells all of the stock in Y. Y on such day owns and sells all of the stock in Z corporation and Z qualifies as a DISC as of such day. Neither X nor Y will be eligible for the special deduction provided by section 922 for their taxable years. Z will likewise not be eligible for the special deduction for the taxable year for which it qualifies as a DISC.

PAR. 9. Section 1.931 is amended by revising so much of section 931(a)(2) as follows section 931(a)(2)(A), by revising section 931(d), and by adding a historical note. These amended and added provisions read as follows:

§ 1.931 Statutory provisions; income from sources within possessions of the United States.

SEC. 931. *Income from sources within possessions of the United States*—(a) *General rule.* * * *

(2) *Trade or business.* * * *

(B) In the case of such citizen, 50 percent or more of his gross income (computed without the benefit of this section) for such period or such part thereof was derived from the active conduct of a trade or business within a possession of the United States either on his own account or as an employee or agent of another.

This section shall not apply in the case of a corporation for a taxable year for which it is a DISC or in which it owns at any time stock in a DISC or former DISC (as defined in section 992(a)).

* * * * *

(d) *Deductions*—(1) *General rule.* Except as otherwise provided in this subsection and subsection (e), in the case of persons entitled to the benefits of this section the deductions shall be allowed only if and to the extent that they are connected with income from sources within the United States; and the proper apportionment and allocation of the deductions with respect to sources of income within and without the United States shall be determined as provided in part I, under regulations prescribed by the Secretary or his delegate.

(2) *Exceptions.* The following deductions shall be allowed whether or not they are connected with income from sources within the United States:

(A) The deduction, for losses not connected with the trade or business if incurred in transactions entered into for profit, allowed by section 165(c)(2), but only if the profit, if such transaction had resulted in a profit, would be taxable under this subtitle.

(B) The deduction, for losses of property not connected with the trade or business if arising from certain casualties or theft, allowed by section 165(c)(3), but only if the loss is of property within the United States.

(C) The deduction for charitable contributions and gifts allowed by section 170.

(3) *Deduction disallowed.* For disallowance of standard deduction, see section 142(b)(2).

* * * * *

[Sec. 931 as amended by sec. 107, Foreign Investors Tax Act 1966 (80 Stat. 1571); sec. 502(d), Rev. Act 1971 (85 Stat. 550)]

PAR. 10. Section 1.931–1 is amended by adding a paragraph (j). This added provision reads as follows:

§ 1.931–1 Citizens of the United States and domestic corporations deriving income from sources within a certain possession of the United States.

* * * * *

(j) *Nonapplication to a DISC or shareholder thereof.* Section 931 does not apply to a corporation for a taxable year (1) for which it qualifies (or is treated) as a DISC or (2) during which it owns directly or indirectly at any time stock in a corporation which, at such time, is (or is treated as) a DISC or former DISC. (See section 992(a) (1) and (3), respectively, for the definitions of the terms "DISC" and "former DISC".) For example, assume X corporation and Y corporation have the same taxable years. On the first day of its taxable year, X owns and sells all of the stock in Y. Y on such day owns and sells all of the stock in Z corporation, and Z qualifies as a DISC as of such day. Section 931 will not apply to X and Y for their taxable years. Section 931 will likewise not apply to Z for the taxable year for which it qualifies as a DISC.

PAR. 11. Section 1.1014 is amended by adding a subsection (d) and by revising the historical note. These amended and added provisions read as follows:

§ 1.1014 Statutory provisions; basis of property acquired from a decedent.

SEC. 1014. *Basis of property acquired from a decedent.* * * *

(d) *Special rule with respect to DISC stock.* If stock owned by a decedent in a DISC or former DISC (as defined in section 992(a)) acquires a new basis under subsection (a), such basis (determined before the application of this subsection) shall be reduced by the amount (if any) which would have been included in gross income under section 995(c) as a dividend if the decedent had lived and sold the stock at its fair market value on the estate tax valuation date. In computing the gain the decedent would have had if he had lived and sold the stock, his basis shall be determined without regard to the last sentence of section 996(e)(2) (relating to reductions of basis of DISC stock). For purposes of this subsection, the estate tax valuation date is the date of the decedent's death or, in the case of an election under section 2032, the applicable valuation date prescribed by that section.

(Sec. 1014 as amended by sec. 2, Act of February 11, 1958 (Public Law 85–320, 72 Stat. 5); sec. 502(f), Rev. Act 1971 (85 Stat. 550))

PAR. 12. Section 1.1014–1 is amended by revising paragraph (b). This amended provision reads as follows:

§ 1.1014–1 Basis of property acquired from a decedent.

* * * * *

(b) *Scope and application.* With certain limitations, the general rule described in paragraph (a) of this section is applicable to the classes of property described in paragraphs (a) and (b) of § 1.1014–2, including stock in a DISC or former DISC. In the case of stock in a DISC or former DISC, the provisions of this section and §§ 1.1014–2 through 1.1014–8 are applicable, except as provided in § 1.1014–9. Special basis rules with respect to the basis of certain other property acquired from a decedent are set forth in paragraph (c) of § 1.1014–2. These special rules concern certain stock or securities of a foreign personal holding company and the surviving spouse's one-half share of community property held with a decedent dying after October 21, 1942, and on or before December 31, 1947. In this section and §§ 1.1014–2 to 1.1014–6, inclusive, whenever the words "property acquired from a decedent" are used, they shall also mean "property passed from a decedent", and the phrase "person who acquired it from the decedent" shall include the "person to whom it passed from the decedent."

* * * * *

PAR. 13. Section 1.1014–9 is added immediately after § 1.1014–8. This added provision reads as follows:

§ 1.1014–9 Special rule with respect to DISC stock.

(a) *In general.* If property consisting of stock of a DISC or former DISC (as defined in section 992(a) (1) or (3) as the case may be) is considered to have been acquired from a decedent (within the meaning of paragraph (a) or (b) of § 1.1014–2), the uniform basis of such stock under section 1014, as determined pursuant to §§ 1.1014–1 through 1.1014–8 shall be reduced as provided in this section. Such uniform basis shall be reduced by the amount (hereinafter referred to in this section as the amount of reduction), if any, which the decedent would have included in his gross income under section 995(c) as a dividend if the decedent had lived and sold such stock at its fair market value on the estate tax valuation date. If the alternate valuation date for Federal estate tax purposes is elected under section 2032, in computing the gain which the decedent would have had if he had lived and sold the stock on the alternate valuation date, the decedent's basis shall be determined with reduction for any distributions with respect to the stock which may have been made, after the date of the decedent's death and on or before the alternate valuation date, from the DISC's previously taxed income (as defined in section 996(f)(2)). For this purpose, the last sentence of section 996(e)(2) (relating to reductions of basis of DISC stock) shall not apply. For purposes of this section, if the corporation is not a DISC or former DISC at the date of the decedent's death but is a DISC for a taxable year which begins after such date and on or before the alternate valuation date, the corporation will be considered to be a DISC or former DISC only if the alternate valuation date is elected. The provisions of this paragraph apply with respect to stock of a DISC or former DISC which is included in the gross estate of the decedent, including but not limited to property which—

(1) Is acquired from the decedent before his death, and the entire property is subsequently included in the decedent's gross estate for estate tax purposes, or

(2) Is acquired property described in paragraph (d) of § 1.1014–3.

(b) *Portion of property acquired from decedent before his death included in decedent's gross estate.*—(1) *In general.* In cases where, due to the operation of the estate tax, only a portion of property which consists of stock of a DISC or former DISC and which is acquired from a decedent before his death is included in the decedent's gross estate, the uniform basis of such stock under section 1014, as determined pursuant to § 1.1014–1 through § 1.1014–8, shall be reduced by an amount which bears the same ratio to the amount of reduction which would have been determined under paragraph (a) of this section if the entire property consisting of such stock were included in the decedent's gross estate as the value of such property included in the decedent's gross estate bears to the value of the entire property. (2) *Example.* The provisions of this paragraph may be illustrated by the following example: *Example.* The decedent creates a trust during his lifetime to pay the income to A for life, remainder to B or his estate. The trust instrument further provides that if the decedent should survive A, the income shall be paid to the decedent for life. The decedent predeceases A, so that, due to the operation of the estate tax, only the present value of the remainder interest is included in the decedent's gross estate. The trust consists of 100 shares of the stock of X corporation (which is a DISC at the time the shares are transferred to the trust and at the time of the decedent's death) with an adjusted basis immediately prior to the decedent's death of $10,000 (as determined under section 1015). At the time of the decedent's death the value of the stocks is $20,000, and the value of the remainder interest in the hands of B is $8,000. Applying the principles of paragraph (b)(3)(i) of § 1.1014–6, the uniform basis of the entire property following the decedent's death, prior to reduction pursuant to this paragraph, is $14,000. The amount of reduction which would have been determined under paragraph (a) of this section if the entire property consisting of such stock of X

V 38-149
AUG 3 73
XUM

corporation were included in the decedent's gross estate is $5,000 The uniform basis of the entire property following the decedent's death, as reduced pursuant to this paragraph, is $12,000, computed as follows:

Uniform basis under section 1014(a), prior to reduction pursuant to this paragraph	$14,000
Less decrease in uniform basis (determined by the following formula)	2,000

Reduction in uniform basis (to be determined)	$8,000 (value of property included in gross estate)
$5,000 (amount of reduction if paragraph (a) applied)	$20,000 (value of entire property)

Uniform basis under section 1014(a) reduced pursuant to this paragraph	12,000

(c) *Estate tax valuation date.* For purposes of section 1014(d) and this section, the estate tax valuation date is the date of the decedent's death or, in the case of an election under section 2032, the applicable valuation date prescribed by that section.

(d) *Examples.* The provisions of this section may be illustrated by the following examples:

Example (1). At the date of A's death, his DISC stock has a fair market value of $100. The estate does not elect the alternate valuation allowed by section 2032, and A's basis in such stock is $60 at the date of his death. The person who acquires such stock from the decedent will take as a basis for such stock its fair market value at A's death ($100), reduced by the amount which would have been included in A's gross income under section 995(c) as a dividend if A had sold stock on the date he died. Thus, if the amount that would have been treated as a dividend under section 995(c) were $30, such person will take a basis of $70 for such stock ($100, reduced by $30). If such person were immediately to sell the DISC stock so received for $100, $30 of the proceeds from the sale would be treated as a dividend by such person under section 995(c).

Example (2). Assume the same facts as in example (1) except that the estate elects the alternate valuation allowed by section 2032, the DISC stock has a fair market value of $140 on the alternate valuation date, the amount that would have been treated as a dividend under section 995(c) in the event of a sale on such date is $50 and the DISC has $20 of previously taxed income which accrued after the date of the decedent's death and before the alternate valuation date. The basis of the person who acquires such stock will be $90 determined as follows:

(1) Fair market value of DISC stock at alternate valuation date	$140
(2) Less: Amount which would have been treated as a dividend under section 995(c)	50
(3) Basis of person who acquires DISC stock	90

If a distribution of $20 attributable to such previously taxed income had been made by the DISC on or before the alternate valuation date (with the DISC stock having a fair market value of $120 after such distribution), the basis of the person who acquires such stock will be $70 determined as follows:

(1) Fair market value of DISC stock at alternate valuation date	$120
(2) Less: Amount which would have been treated as a dividend under section 995(c)	50
(3) Basis of person who acquires DISC stock	70

[FR Doc.73-16003 Filed 8-2-73;8:45 am]

[T.D. 7284]

PART 1—INCOME TAX; TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1953

Requirements for Reporting Certain Information on Forms W–3, W–2, 1096, 1099, and 1042S

Amendments to the Income Tax Regulations under sections 6041, 6052, 6071, and 6091 were first published as a notice of proposed rule making on January 31, 1967 (32 FR 1091). The purpose of those proposed amendments was to require the reporting of all forms of taxable compensation on Forms W–3 and W–2 rather than on a combination of Forms W–3, W–2, 1096, and 1099. This consolidation of compensation on Forms W–3 and W–2 was designed to augment the Service's increasing use of automatic data processing procedures for the utilization of information documents. Among the rules proposed in the notice was one requiring that all forms of compensation paid to, or for the benefit of, a particular employee, including group-term life insurance purchased for the employee, be reported on a single Form W–2. Another proposed rule required the reporting of commissions paid to full-time life insurance salesmen on Form W–2.

On Tuesday, November 21, 1972, a revised notice of proposed rulemaking was published in the Federal Register (37 FR 24757) withdrawing the prior 1967 notice of proposed rulemaking and setting forth revised requirements for reporting certain information on Forms W–3, W–2, 1096, 1099, and 1042S.

The revised notice of proposed rulemaking responded to the comments received following publication of the 1967 notice by allowing, in general, the reporting of information on multiple Forms W–2 at the election of the employer. The revised notice permits wages paid in the form of group-term life insurance to be reported on a separate Form W–2 or, in the case of a full-time life insurance salesman whose commissions are reported on Form 1099. The revised notice also permits a life insurance company to report all payments of commissions to full-time life insurance salesmen on Form W–2 or on Form 1099. With respect to any one company, however, one form or the other must be used exclusively. There is also a corresponding rule for group-term life insurance on the lives of full-time life insurance salesmen. If commissions are reported on Form W–2, Form W–2 must be used to report group-term life insurance. If commissions are reported on Form 1099, Form 1099 must also be used for group-term life insurance. Another change made by the revised notice is to specifically include as an amount reportable on Forms 1096 and 1099 contributions to a qualified retirement plan which are used to purchase life insurance protection and are taxable to plan participants by reason of section 72(m)(3)(B).

The amendments of the regulations as adopted by this document, however, do not reflect the proposed amendment to the Income Tax Regulations under section 6041 contained in the notice of proposed rule making dealing with the character of total distributions from qualified plans paid after December 31, 1969, which was published in the FEDERAL REGISTER of June 12, 1971 (36 FR 11442, 11450).

ADOPTION OF AMENDMENTS TO THE REGULATIONS

After consideration of all such relevant matter as was presented by interested persons regarding the rules proposed in the revised notice of proposed rulemaking published in the FEDERAL REGISTER (37 FR 24757) on Tuesday, November 21, 1972, the amendments of the regulations as so proposed are hereby adopted without change.

(Sec. 7805, Internal Revenue Code of 1954, 68A Stat. 917; 26 U.S.C. 7805)

[SEAL] DONALD C. ALEXANDER,
Commissioner of Internal Revenue.

Approved: July 30, 1973.

JOHN H. HALL,
Deputy Assistant Secretary of the Treasury.

PARAGRAPH 1. Section 1.1461–2 is amended by revising paragraph (c)(1) to read as follows:

§ 1.1461–2 Return of tax withheld.

* * * * *

(c) *Form 1042S*—(1) *Filing requirement.* Every withholding agent shall make on or before March 15 an annual information return on Form 1042S of all items of income specified in § 1.1441–2 paid during the previous calendar year to nonresident alien individuals, foreign partnerships, or foreign corporations if such items consist of—

(i) Amounts upon which tax was required to be withheld under chapter 3 of the Code,

(ii) Amounts upon which tax would have been required to be withheld under such chapter but for an exclusion from gross income applicable under any income tax convention to which the United States is a party,

(iii) Amounts upon which tax would have been required to be withheld under such chapter but for the provisions of any specific exemption from withholding applicable under the authority of any regulation under this title or any ruling or procedure of the Commissioner, or

(iv) Amounts in respect of which tax withheld under such chapter has, pursuant to such authority, been released or refunded to the payee by the withholding agent.

Notwithstanding subdivisions (i) through (iv) of this subparagraph, income paid to nonresident alien individuals, foreign partnerships, or foreign corporations and required to be shown on Form W–2, or in the case of income

paid prior to January 1, 1972, on Form 1001 (or on any special variation of Form 1001 referred to in paragraph (i) of § 1.1461–1, or the substitute thereof) is not required to be shown on Form 1042S. However, a return under this subparagraph is required on Form 1042S (rather than on Form W–2) in respect of amounts which otherwise would be required to be shown on Form W–2 solely by reason of § 1.6041–2 (relating to return of information as to payments to employees) or § 1.6052–1 (relating to information regarding payments of wages in the form of group-term life insurance). The original and duplicate copies of Form 1042S shall accompany Form 1042 and shall be filed with the Director of International Operations, Internal Revenue Service, Washington, D.C. 20225.

* * * * *

PAR. 2. Section 1.6041–1 is amended by revising paragraphs (a) and (g) to read as follows:

§ 1.6041–1 Return of information as to payments of $600 or more.

(a) *General rule.* (1) Except as provided in § 1.6041–3, every person engaged in a trade or business shall make an information return for each calendar year with respect to payments made by him during the calendar year in the course of his trade or business to another person of fixed or determinable—

(i) Salaries, wages, commissions, fees, and other forms of compensation for services rendered aggregating $600 or more;

(ii) Interest, rents, royalties, annuities, pensions, and other gains, profits, and income aggregating $600 or more; or

(iii) Foreign items, as defined in § 1.6041–4, aggregating $600 or more.

The payments described in subdivisions (i), (ii), and (iii) of this subparagraph shall not include any payments with respect to which a statement is required by, or may be required under authority of, section 6042 (a) (relating to dividends), section 6043(a)(2) (relating to distributions in liquidation) section 6044(a) (relating to patronage dividends), section 6045 (relating to brokers' transactions with customers), or section 6049 (a)(1) and (2) (relating to interest). Thus, the term "interest", as used in subdivision (ii) of this subparagraph, includes all interest other than that coming within the definition of interest provided in § 1.6049–2. For example, a closely held corporation borrows money from one of its officers on a promissory note not in registered form the yearly interest on which is $300. It also pays royalties to such officer amounting to $400 a year. An information return is required under subdivision (ii) of this subparagraph with respect to the payments to such officer since the interest does not come within the definition of interest provided in § 1.6049–2 and the aggregate of the interest and royalty payments is in excess of $600.

(2) *Prescribed form.* The return required by subparagraph (1) of this paragraph shall be made on Forms 1096 and 1099 except that (i) the return with respect to distributions to beneficiaries of a trust or of an estate shall be made on Form 1041, and (ii) the return with respect to certain payments of compensation to an employee by his employer shall be made on Forms W–3 and W–2 under the provisions of § 1.6041–2 (relating to return of information as to payments to employees). See, however, § 1.6041–2(a)(2) for special election applicable to the reporting of commissions paid to full-time life insurance salesmen. Where Form 1099 is required to be filed under this section, a separate Form 1099 shall be furnished for each person to whom payments described in subdivision (i), (ii), or (iii) of subparagraph (1) of this paragraph are made. For time and place for filing Forms 1096 and 1099, see § 1.6041–6.

* * * * *

(g) *Payments made by the United States or a State.* Information returns on—

(1) Forms 1096 and 1099 and

(2) Forms W–3 and W–2 (when made under the provisions of § 1.6041–2)

of payments made by the United States or a State, or political subdivision thereof, or the District of Columbia, or any agency or instrumentality of any one or more of the foregoing, shall be made by the officer or employee of the United States, or of such State, or political subdivision, or of the District of Columbia, or of such agency or instrumentality, as the case may be, having control of such payments or by the officer or employee appropriately designated to make such returns.

PAR. 3. Section 1.6041–2 is amended to read as follows:

§ 1.6041–2 Return of information as to payments to employees.

(a)(1) *In general.* Wages, as defined in section 3401, paid to an employee are required to be reported on Form W–2. See section 6011 and the Employment Tax Regulations thereunder. Except as otherwise provided in subparagraph (2) of this paragraph, all other payments of compensation, including the cash value of payments made in any medium other than cash, to an employee by his employer in the course of the trade or business of the employer must also be reported on Form W–2 if the total of such payments and the amount of the employee's wages (as defined in section 3401), if any, required to be reported on Form W–2 aggregates $600 or more in a calendar year. For example, if a payment of $700 was made to an employee and $400 thereof represents wages subject to withholding under section 3402 and the remaining $300 represents compensation not subject to withholding, such wages and compensation must both be reported on Form W–2. A separate Form W–2 shall be furnished for each employee for whom a return must be made. At the election of the employer, components of amounts required to be reported on Form W–2 pursuant to the provisions of this subparagraph may be reported on more than one Form W–2.

(2) *Certain payments by a life insurance company.* All payments of commissions by a life insurance company to its full-time life insurance salesmen (within the meaning of section 3121(d)(3)(B)) may, at the election of the payer, be reported on Forms 1096 and 1099 rather than on Forms W–3 and W–2. A separate Form 1099 shall be furnished for each employee for whom a return must be made. For contents and time and place for filing Forms 1096 and 1099, see § 1.6041–6.

(3) *Transmittal form.* The transmittal form for a return on Form W–2 made pursuant to the provisions of subparagraph (1) of this paragraph shall be Form W–3. In a case where an employer must file a Form W–3 under this paragraph and also under § 31.6011(a)–4 or § 31.6011(a)–5 of this chapter (Employment Tax Regulations), the Form W–3 filed under such § 31.6011(a)–4 or § 31.6011(a)–5 shall also be used as the transmittal form for a return on Form W–2 made pursuant to the provisions of this paragraph.

(4) *Time for filing*—(i) *General rule.* In a case where an employer must file Forms W–3 and W–2 under this paragraph and also under § 31.6011(a)–4 or § 31.6011(a)–5 of this chapter (Employment Tax Regulations), the time for filing such forms under this paragraph shall be the same as the time (including extensions thereof) for filing such forms under § 31.6011(a)–4 or § 31.6011(a)–5.

(ii) *Exception.* In a case where an employer is not required to file Forms W–3 and W–2 under § 31.6011(a)–4 or § 31.6011(a)–5 of this chapter (Employment Tax Regulations), the returns on Forms W–3 and W–2 required under this paragraph for any calendar year shall be filed on or before February 28 of the following year.

(iii) *Cross reference.* For extensions of time for filing returns, see section 6081 and the regulations thereunder.

(5) *Place for filing.* The returns on Forms W–3 and W–2 required under this paragraph shall be filed pursuant to the rules contained in § 31.6091–1 of this chapter (Employment Tax Regulations), relating to the place for filing certain returns.

(b) *Distributions under employees' trust or plan.* (1) Amounts which are—

(i) Distributed or made available to a beneficiary, and to which section 402 (relating to employees' trusts) or section 403 (relating to employee annuity plans) applies, or

(ii) Described in section 72(m)(3)(B), shall be reported on Forms 1096 and 1099 to the extent such amounts are includible in the gross income of such beneficiary if the amounts so includible aggregate $600 or more in any calendar year. In addition, every trust described in section 501(c)(17) which makes one or more payments (including separation and sick and accident benefits) totaling $600 or more in 1

V 38-149
AUG 3 73
XUM

year to an individual must file an annual information return on Form 1096, accompanied by a statement on Form 1099, for each such individual. Payments made by an employer or a person other than the trustee of the trust should not be considered in determining whether the $600 minimum has been paid by the trustee. The provisions of this subparagraph shall not be applicable to payments of supplemental unemployment compensation benefits made after December 31, 1970, which are treated as if they were wages for purposes of section 3401(a). Such amounts are required to be reported on Forms W–3 and W–2. See paragraph (b)(14) of § 31.3401(a)–1 of this chapter (Employment Tax Regulations).

(2) Any amount with respect to which a statement is required by § 1.6047–1, relating to employee retirement plans covering owner-employees, shall not be included in amounts required to be reported under section 6041.

(c) *Special rule for calendar years before 1972.* For calendar years before 1972, the provisions of this section will be deemed to have been complied with if the returns for such years were filed in accordance with the provisions of this section in effect prior to [insert date on which final regulations under this section are published in the FEDERAL REGISTER] or with the instructions applicable to the appropriate forms.

PAR. 4. Section 1.6041–3 is amended by revising paragraph (a) to read as follows:

§ 1.6041–3 Payments for which no return of information is required under section 6041.

• • • • •

(a) Payments of income required to be reported on Forms 1042, 1042S, 1000, 1001 (including all special variations thereof), 1120–S, 941, W–3, and W–2 (however, see § 1.6041–2 with respect to Forms W–3 and W–2);

• • • • •

PAR. 5. Section 1.6041–6 is amended to read as follows:

§ 1.6041–6 Returns made on Forms 1096 and 1099 under section 6041; contents and time and place for filing.

Returns made under section 6041 on Forms 1096 and 1099 for any calendar year shall be filed on or before February 28 of the following year with any of the Internal Revenue Service Centers, the addresses of which are listed in the instructions for such forms. The name and address of the person making the payment and the name and address of the recipient of the payment shall be stated on Form 1099. If the present address of the recipient is not available, the last known post office address must be given. See section 6109 and the regulations thereunder for rules requiring the inclusion of identifying numbers in Form 1099.

PAR. 6. Section 1.6052–1 is amended by revising paragraphs (a) and (b), by redesignating paragraphs (c) and (d) as paragraphs (d) and (e), and by inserting after paragraph (b) a new paragraph (c). These amended and added provisions read as follows:

§ 1.6052–1 Information returns regarding payment of wages in the form of group-term life insurance.

(a) *Requirement of reporting*—(1) *In general.* (i) Every employer, who during any calendar year provides any one of his employees remuneration for services in the form of group-term life insurance on the life of such employee any part of the cost of which is to be included in such employee's gross income as set forth in paragraph (a)(2) of § 1.79–1, shall make a separate return on Form W–2 with respect to each such employee for such year which includes the following information:

(*a*) Name, address, and identifying number of the employer;

(*b*) Name, address, and social security number of the employee; and

(*c*) Total amount includible in the employee's gross income by reason of the provisions of section 79(a), computed as if each employee reported his income on the basis of a calendar year (determined as if the employer making such return is the only employer paying the employee remuneration in the form of group-term life insurance on his life which is includible in his gross income under section 79(a)).

Returns on Form W–2 required to be filed pursuant to the provisions of this section shall be transmitted by Form W–3. In a case where, with respect to the same employee, an employer must make a return on Form W–2 under this section and also under § 31.6011(a)–4 or § 31.6011(a)–5 of this chapter (Employment Tax Regulations), or under § 1.6041–2 (relating to return of information as to payments to employees), such employer may make such returns on the same Form W–2 or on separate Forms W–2. In a case where an employer must file a Form W–3 under this section and also under § 31.6011(a)–4 or § 31.6011(a)–5 of this chapter (Employment Tax Regulations), the Form W–3 filed under such § 31.6011(a)–4 or § 31.6011(a)–5 shall also be used as the transmittal form for a return on Form W–2 made pursuant to the provisions of this section.

(ii) Notwithstanding subdivision (i) of this subparagraph, if a life insurance company has elected, as provided by § 1.6041–2(a)(2), to report all payments of commissions to its full-time life insurance salesmen on Forms 1096 and 1099 rather than on Forms W–3 and W–2, remuneration for services in the form of group-term life insurance on the lives of such salesmen shall be reported on Forms 1096 and 1099. Returns on Form 1099 required to be filed pursuant to the provisions of this section shall include the information prescribed by subdivision (i)(c) of this subparagraph and shall be transmitted by Form 1096. In a case where, with respect to the same full-time life insurance salesman, a life insurance company is required to make a return on Form 1099 under this section and also under § 1.6041–2(a)(2) (relating to return of information as to payments to employees), the life insurance company may make such returns on the same Form 1099 or on separate Forms 1099. See § 1.6041–6 for contents and time and place for filing Forms 1096 and 1099.

(2) *Definitions.* Terms used in subparagraph (1) of this paragraph which are defined in paragraph (b) of § 1.79–1 have the meaning ascribed to them in such paragraph (b).

(b) *Time and place for filing*—(1) *Time for filing*—(i) *General rule.* In a case where an employer must file Forms W–3 and W–2 under this section and also under § 31.6011(a)–4 or § 31.6011(a)–5 of this chapter (Employment Tax Regulations), the time for filing such forms under this section shall be the same as the time (including extensions thereof) for filing such forms under § 31.6011(a)–4 or § 31.6011(a)–5.

(ii) *Exception.* In a case where an employer is not required to file Forms W–3 and W–2 under § 31.6011(a)–4 or § 31.6011(a)–5 of this chapter (Employment Tax Regulations), returns on Forms W–3 and W–2 required under paragraph (a) of this section for any calendar year shall be filed on or before February 28 of the following year.

(iii) *Cross reference.* For extensions of time for filing returns, see section 6081 and the regulations thereunder.

(2) *Place for filing.* The returns on Forms W–3 and W–2 required under paragraph (a) of this section shall be filed pursuant to the rules contained in § 31.6091–1 of this chapter (Employment Tax Regulations), relating to the place for filing certain returns.

(c) *Special rule for calendar years before 1972.* For calendar years before 1972, the provisions of this section will be deemed to have been complied with if the returns for such years were filed in accordance with the provisions of this section in effect prior to (insert date on which final regulations under this section are published in the FEDERAL REGISTER) or with the instructions applicable to the appropriate forms.

• • • • •

PAR. 7. Section 1.6052–2 is amended by redesignating paragraph (d) as paragraph (e), by redesignating paragraph (e) as paragraph (f), by inserting after paragraph (c) a new paragraph (d), and by inserting after paragraph (f) a new paragraph (g). These amended and revised provisions read as follows:

§ 1.6052–2 Statements to be furnished employees with respect to wages paid in the form of group-term life insurance.

• • • • •

(d) *Special rule where Form W–2 or Form 1099 is used.* The provisions of this paragraph shall apply notwithstanding anything to the contrary in paragraph (b) or (c) of this section. The requirement of this section for the furnishing of a statement to an employee may be satisfied by furnishing to such employee the employee's copy of Form W–2 filed pursuant to § 1.6052–1 in respect of such employee, or, in the case of an election by a life insurance company pursuant to the provisions of § 1.6041–2(a)(2), by furnishing to the full-time life insurance salesman a copy of Form 1099 filed pursuant to § 1.6052–1(a)(1). In a case where the statement furnished by an employer to an employee for purposes of complying with this section is the employee's copy of a Form W–2, or in the case of certain full-time life insurance salesmen a copy of Form 1099, then the rules in § 31.6051–1 of this chapter (Employment Tax Regulations) shall apply with respect to the means and time (including extensions thereof) for furnishing such statements to the employee and making corrections on such form.

• • • • •

(g) *Special rule for calendar years before 1972.* For calendar years before 1972, the provisions of this section will be deemed to have been complied with if the statements for such years were furnished in accordance with the provisions of this section in effect prior to [insert date on which final regulations under this section are published in the FEDERAL REGISTER] or with the instructions applicable to the appropriate forms.

PAR. 8. Paragraph (c)(7) of § 1.6071–1 is amended to read as follows:

§ 1.6071–1 Time for filing returns and other documents.

• • • • •

(c) *Time for filing certain information returns.* • • •

(7) For provisions relating to the time for filing information returns by persons making certain payments, see paragraph (a)(4) of § 1.6041–2 and § 1.6041–6.

• • • • •

PAR. 9. Paragraph (b)(7) of § 1.6091–1 is amended to read as follows:

§ 1.6091–1 Place for filing returns or other documents.

• • • • •

(b) *Place for filing certain information returns.* • • •

(7) For the place for filing returns of information reporting certain payments, see paragraph (a)(5) of § 1.6041–2 and § 1.6041–6.

Title 29—Labor

CHAPTER XIV—EQUAL EMPLOYMENT OPPORTUNITY COMMISSION

PART 1601—PROCEDURAL REGULATIONS

Designated 706 Agencies

By virtue of the authority vested in it by section 713(a) of Title VII of the Civil Rights Act of 1964, as amended, 42 U.S.C. 2000e–12(a), 78 Stat. 265, the Equal Employment Opportunity Commission (hereinafter referred to as the Commission) hereby amends Title 29, Chapter XIV, § 1601.12(k) in accordance with requirements of § 1601.12(g)(1).

The amendment sets forth those state agencies which have been formally designated as 706 agencies as defined in § 1601.12(c) for the purpose of receiving charges deferred by the Commission pursuant to section 706(c) and (d) of Title VII and whose final findings and orders will be accorded substantial weight by the Commission as provided in § 1601.19b(e).

Publication of this list of agencies effectuates their formal designation as 706 Agencies. Additions to this list may be made by the Commission from time to time as amendments to this subsection published in the FEDERAL REGISTER.

Section 1601.12(k) is amended to read as follows:

• • • • • •

(k) The designated 706 Agencies are:

1. Alaska Commission for Human Rights
2. Colorado Civil Rights Commission
3. Connecticut Commission on Human Rights and Opportunities
4. Delaware Department of Labor
5. District of Columbia Office of Human Rights
6. Illinois Fair Employment Practices Commission
7. Indiana Civil Rights Commission
8. Michigan Civil Rights Commission
9. Minnesota Department of Human Rights
10. New Hampshire Commission for Human Rights
11. New Jersey Division on Civil Rights, Department of Law and Public Safety
12. Oregon Bureau of Labor
13. Pennsylvania Human Relations Commission
14. South Dakota Human Relations Commission
15. Utah Industrial Commission
16. West Virginia Human Rights Commission
17. Wyoming Fair Employment Practices Commission*

The following agencies which appeared on the list of proposed 706 agencies published in the FEDERAL REGISTER Vol. 38 No. 121 June 25, 1973 have been omitted from the list of formally designated 706 agencies pending the evaluation of comments received by the Commission pursuant to the requirements of § 1601.12(g)(1):

1. Arizona Civil Rights Commission
2. California Fair Employment Practices Commission
3. Massachusetts Commission Against Discrimination
4. New York State Division of Human Rights

(Sec. 713(a), 76 Stat. 265, 42 U.S.C. § 2000e–12(a)).

This amendment is effective upon publication in the FEDERAL REGISTER.

Signed at Washington, D.C. 27th day of July, 1973.

WILLIAM H. BROWN III,
Chairman.

PROVISIONAL 706 AGENCIES

Pursuant to § 1601.12(d)(1) as amended and published in the FEDERAL REGISTER Vol. 38, No. 121, June 25, 1973, the Equal Employment Opportunity Commission (hereinafter referred to as the Commission) has extended until July 1, 1974, designation of the agencies listed in Chart I below as Provisional 706 Agencies for the purposes of receiving referenced types of charges deferred by the Commission, pursuant to section 706 (c) and (d) of Title VII of the Civil Rights Act of 1964, as amended.

The designations reflected herein were officially adopted by the Commission on April 17, 1972, and extended June 25, 1973. The Commission may, from time to time, amend the designations listed herein by subsequent publications.

*Will not receive charges alleging violation of § 704(a) of the Civil Rights Act of 1964 [Retaliation Charges].

Title 33—Navigation and Navigable Waters

CHAPTER I—COAST GUARD, DEPARTMENT OF TRANSPORTATION

[CGD 3-73-4R]

PART 127—SECURITY ZONES

New London Harbor, Connecticut

This amendment to the Coast Guard's Security Zone Regulations, establishes the waters of New London Harbor, Connecticut as a security zone. This security zone is established to prevent interference with the launching of the USS Glenard P. Lipscomb.

This amendment is issued without publication of a notice of proposed rule making and this amendment is effective in less than 30 days from the date of publication because this security zone involves a military function of the United States.

In consideration of the foregoing, Part 127 of Title 33 of the Code of Federal Regulations is amended by adding § 127.305, to read as follows:

§ 127.305 New London Harbor, Connecticut.

The waters within the following boundary is a security zone: a line beginning at the western bank of New London Harbor at 41°20'32" North; thence northerly along that bank to 41°21'03" North; thence easterly along that meridian to the east bank; thence southerly along that bank to 41°20'32" North; thence westerly along that meridian to the beginning point.

(46 Stat. 220, as amended, § 1, 63 Stat. 503, § 6(b), 80 Stat. 937; 50 U.S.C. § 191, 14 U.S.C. § 91, 49 U.S.C. § 1655(b); E.O. 10173, E.O. 10277, E.O. 10352, E.O. 11249; 3 CFR, 1949-1953 Comp. 356, 778, 873, 3 CFR, 1964-1965 Comp. 349, 33 CFR Part 6, 49 CFR 1.46(b))

Effective date: This amendment is effective from 12:00 Noon Eastern Daylight Time on Saturday, 4 August 1973 to 2:00 P.M. Eastern Daylight Time on Saturday, 4 August 1973.

Dated: July 25, 1973.

B. F. ENGEL,
Vice Admiral, United States Coast Guard, Commander, Third Coast Guard District, Governors Island, New York.

Title 36—Parks, Forests and Memorials

CHAPTER I—NATIONAL PARK SERVICE, DEPARTMENT OF THE INTERIOR

PART 7—SPECIAL REGULATIONS, AREAS OF THE NATIONAL PARK SYSTEM

Rocky Mountain National Park, Colorado; Fishing

A proposal was published at page 8749 of the FEDERAL REGISTER of April 6, 1973 to revise paragraph (a) of § 7.7 of Title 36 of the Code of Federal Regulations. The effect of the revision is to permit fishing in Black Canyon Creek and Bear Lake, which had previously been closed, and to establish restrictions on the methods of taking and the possession of fish in the Park.

Interested persons were given 30 days for submitting written comments, suggestions, or objections with respect to the proposed revision. Of ten comments received, seven contained minor objections to various parts of the proposed regulations. After consideration was given to all suggestions and objections the proposed regulations are adopted with the following change: Paragraph (a)(1) was amended to clarify the total possession limit of fish to be six (6) of any species.

This revision will become effective August 3, 1973 so as to be in effect during the main visitor use season.

(39 Stat. 535, 16 U.S.C. 3; 38 Stat. 800, 16 U.S.C. 195; 34 FR 13879; 38 FR 7478; 37 FR 6324)

Section 7.7 is revised as set forth below:

§ 7.7 Rocky Mountain National Park.

(a) Fishing. (1) Possession Limit. Possession limit shall mean the numbers, sizes, or species of fish that may be in the possession of a person regardless if fresh or preserved. All fish a person does not elect to keep, or which do not meet the possession requirements, shall be carefully and immediately returned to the waters from which they were taken. The total possession limit shall be six (6) fish of any species.

(i) The possession limit for cutthroat trout is four (4) fish, which must be 10 inches or longer. This provision has park-wide application except as provided in paragraph (a)(3) of this section.

(ii) The possession limit for brook trout, rainbow trout and brown trout is six (6) fish, with no minimum length requirement. This provision has park-wide application except as provided in paragraph (a)(3) of this section.

(2) Method of capture.

(i) Each person fishing in Park water shall use only one hand-held rod or line.

(ii) Only artificial lures or flies with one (single, double, or treble) hook with a common shank may be used in Park waters.

(iii) When in possession of any fishing equipment, and while immediately adjacent to or on waters of the park, no person shall possess any fish bait, such as, but not limited to worms, insects, minnows, fish eggs, other organic matter, or parts thereof.

(3) Special Management Area. The Colorado River above its intersection with the Park boundary (between Sections 25 and 36, T4N, R76W), to the confluence of Timber Creek is designated as a special management area. Brown trout, rainbow trout, and cutthroat trout caught in this section of river must be fourteen (14) inches in length to be retained in possession.

(4) Closed Waters. Bear Lake is closed to fishing during the period April 1 to October 31.

ROGER J. CONTOR,
Superintendent, Rocky Mountain National Park.

Title 38—Pensions, Bonuses, and Veterans' Relief

CHAPTER I—VETERANS ADMINISTRATION

PART 3—ADJUDICATION

Subpart A—Pension, Compensation, and Dependency and Indemnity Compensation

DISABILITY BENEFITS; HOUSEBOUND RATES

On page 16396 of the FEDERAL REGISTER of June 22, 1973, there was published a

V 38-149 AUG 3 73 XUM

notice of proposed regulatory development to amend §§ 3.350 and 3.351 to provide a liberalization applicable to those who have a service-connected disability evaluated at 100 percent (or a nonservice-connected disability evaluated as permanent and total) pursuant to the "extra schedular" provisions of § 3.321 (b), title 38, Code of Federal Regulations. Interested persons were given 30 days in which to submit comments, suggestions, or objections regarding the proposed regulations.

No written objections have been received and the proposed regulations are hereby adopted without change and are set forth below.

Effective date. These VA Regulations are effective July 25, 1973.

Approved: July 25, 1973.

By direction of the Administrator.

[SEAL] RUFUS H. WILSON,
Associate Deputy Administrator.

1. In § 3.350(i), the introductory portion preceding subparagraph (1) is amended to read as follows:

§ 3.350 Special monthly compensation ratings.

* * * * *

(i) *Total plus 60 percent, or housebound; 38 U.S.C. 314(s).*—The special monthly compensation at the rate of $554 provided by 38 U.S.C. 314(s) is payable where the veteran has a single service-connected disability rated as 100 percent without resort to individual unemployability and.

* * * * *

2. In § 3.351(d), the introductory portion preceding subparagraph (1) is amended to read as follows:

§ 3.351 Special monthly dependency and indemnity compensation, death compensation and pension ratings.

* * * * *

(d) *Permanent and total plus 60 percent, or housebound; 38 U.S.C. 521.*—The monthly rate of pension otherwise payable to a veteran who is entitled to pension under 38 U.S.C. 521 and who does not qualify for increased pension ($110) based on need of regular aid and attendance shall be increased by $44 if, in addition to having a single permanent disability rated as 100 percent without resort to individual unemployability, the veteran:

* * * * *

[FR Doc.73-15978 Filed 8-2-73;8:45 am]

PART 36—LOAN GUARANTY

Flood Insurance Requirements

On page 2709 of the FEDERAL REGISTER of January 29, 1973, there was published a notice of proposed rulemaking to amend § 36.4326 to specifically require flood insurance coverage on properties securing a loan guaranteed by the Veterans Administration in a special flood hazard area, as designated by the Secretary of Housing and Urban Development. Interested persons were given 30 days in which to submit comments, suggestions, or objections regarding the proposed regulation.

As a result of the notice of proposed rule, four comments were received. In each instance the party commented favorably upon the idea of flood insurance, but three objected to making it mandatory. Two comments were about the effect of flood insurance in a specific area.

The flood insurance program has been available on a non-mandatory basis for only several years, and empirical knowledge is not sufficient to definitively assess the objections filed. Furthermore, designation of special flood hazard areas is within the jurisdiction of the Secretary of Housing and Urban Development and not the Administrator of Veterans Affairs. For these reasons and because of the necessity of providing a workable insurance program that will provide protection against flood disasters, the proposed regulation is hereby adopted without change and is set forth below.

Effective date. This VA Regulation is effective September 10, 1973.

Approved: July 25, 1973.

By direction of the Administrator.

[SEAL] FRED B. RHODES,
Deputy Administrator.

§ 36.4326 Hazard insurance.

The holder shall require insurance policies to be procured and maintained in an amount sufficient to protect the security against the risks or hazards to which it may be subjected to the extent customary in the locality. Flood insurance will be considered customary in the locality if the security is located in a special flood hazard area, as designated by the Secretary of Housing and Urban Development. The amount of flood insurance required will be equal to the outstanding loan balance of the mortgage or the maximum limit of coverage authorized for the particular type of security, or a sum designated by the Administrator, whichever is less. An exception to the flood insurance requirement may be made if it is determined by the Administrator in an individual case that the security, although situated in a special flood hazard area designated by the Secretary of Housing and Urban Development, is clearly not subject to flood damage because of its particular location, elevation, or construction. All moneys received under such policies covering payment of insured losses shall be applied to restoration of the security or to the loan balance.

[FR Doc.73-15977 Filed 8-2-73;8:45 am]

Title 40—Protection of Environment

CHAPTER I—ENVIRONMENTAL PROTECTION AGENCY

SUBCHAPTER C—AIR PROGRAMS

PART 51—PREPARATION, ADOPTION AND SUBMISSION OF IMPLEMENTATION PLANS

Submission of State Reports and Emission Control Action Programs

On February 1, 1973 (38 FR 3083) the Administrator of the Environmental Protection Agency (EPA) proposed to amend two sections of the regulations for the preparation, adoption and submittal of state implementation plans (40 CFR Part 51, November 25, 1971, at 36 FR 22398). The amendments proposed to modify §§ 51.7, *Reports* and 51.16, *Prevention of air pollution emergency episodes.* Interested parties were provided an opportunity to comment on these amendments until March 5, 1973. No comments were received on the proposed regulatory changes to § 51.16, *Emergency episodes.* Eight separate comments were received on the amendments to § 51.7; seven from State and local agencies, the other from a utility company. In consideration of these and other comments, the proposed regulations have been modified.

All eight comments received on the reporting regulations were concerned with various aspects of the emission data requirements; three identified certain problems with the air quality data requirements and two discussed in general terms the needs for the required information. Three of the formal comments received from the State and local air pollution agencies indicated that the proposed report regulations were overly burdensome and indicated their concern for the resources necessary to fulfill the reporting requirements of § 51.7. It should be noted that EPA met with the State and Territorial Air Pollution Program Administrators (STAPPA) on several occasions throughout the development of the proposed regulations and in consideration of their comments significantly reduced the original reporting requirements to that level proposed in the FEDERAL REGISTER.

It is believed that the regulations set forth below require the minimum information which will allow the Agency to carry out its two basic surveillance responsibilities. These responsibilities include the need to determine whether a state implementation plan must be revised to assure the attainment and maintenance of the national standards in a timely fashion and the need to assure that individual sources achieve compliance with adopted control regulations which are part of the applicable plan.

There appears to be a misconception on the part of some agencies regarding the emission data requirements. The reporting regulations do not require a complete emission inventory with each semiannual report. Only data for major point sources which achieved compliance

with applicable regulations, new sources which began operation, sources which received approval to construct, and a listing of sources which ceased operation is required to be submitted.

In light of the comments received, a number of changes have been made to the proposed regulations. Specifically, these include:

(1) The number of sources for which emissions and plan enforcement data need be submitted has been reduced. The proposed regulations would have required states to report progress for any stationary sources causing emissions in excess of 100 tons per year of a pollutant in a region whose urban place population was equal to or greater than 1 million (1970); or for any stationary source causing emissions in excess of 25 tons per year of a pollutant in a region whose population was less than 1 million (1970). The proposed regulation also required emission information for each emission point or stack which emitted 25 tons per year of a criteria pollutant within a total facility which emitted more than 100 tons per year. Upon review of various comments which addressed these requirements, it has been determined that in general, data for only sources which emit greater than 100 tons per year need to be submitted to the EPA. Since sources which contribute 100 tons per year or more of a pollutant contribute such a significant portion of the total emissions in a Region, it is believed that monitoring the progress of these major sources in achieving compliance with applicable regulations will be a sufficient indicator of general progress of all sources within the Region. In cases where a single facility emits greater than 100 tons per year, the state must submit information on individual emissions points within that facility which emit 25 tons per year or greater of a criteria pollutant.

(2) The reporting requirements for sources listed in Appendix C of the November 25, 1971, SIP regulations (36 FR 22398) has been deleted based upon comments which indicated that Appendix C is overly broad in that it includes sources of minor significance and sources which are not emitters of criteria pollutants. As previously noted, States must provide information for all major sources which emit greater than 100 tons per year of a criteria pollutant whether listed in said Appendix C or not since these sources do contribute a significant part of the total emissions in a Region.

(3) The proposed regulations that required *all* non-regulatory revisions of the plan be submitted to the Agency with the semi-annual report has been modified. The regulations which are set forth below require States to submit only *substantive* non-regulatory revisions. Substantive revisions include, but are not limited to, changes in stack-test procedures for determining compliance with applicable regulations, modifications in projected manpower needs, and changes in responsibilities given to local agencies to carry out the implementation plan. It should be noted, however, that no modification has been made to the requirement that all *regulatory* revisions be submitted to the Agency within 60 days of their adoption.

(4) The requirement that general information on plan progress be submitted to the Agency has been deleted. States, however, are encouraged to submit any information which they believe shows that the plan is being implemented.

(5) The requirement for reporting all enforcement actions has been changed to limit reporting to those enforcement actions which result in civil or criminal penalties. This change will decrease the amount of effort required by the States to report while still providing EPA with the necessary information.

(6) A requirement has been added which will require States to submit emission data for those sources which were *approved for construction* during the reporting period. The proposed regulations required data from only sources which *began* operation. Upon further consideration, it has been determined that information pertaining to sources that have been granted approval to construct during the reporting period is necessary to allow the Agency to review the effectiveness of State's new source review procedures.

(7) A modification has been made to the regulation to require States to report the achievement of increments of progress for point sources under enforcement orders as well as compliance schedules. This modification expands the original reporting activity which dealt only with compliance schedules. The regulations set forth below will allow the Agency to monitor progress independent of the State's regulatory mechanisms or terminology.

(8) The requirement for submisson of enforcement orders with the semiannual report has been changed to require their submittal within 60 days of issuance. This change should not impose any additional reporting effort on the part of the states and in the Acting Administrator's judgment is necessary to satisfy EPA's responsibility to ensure enforcement of regulatory provisions of the SIP's.

A major area of concern in comments received was the use of the NEDS emission data format. Two States indicated concern over the specified data format since they have existing computer systems which are not compatible with NEDS, while another agency supported this orderly and uniform basis of providing the information. One State indicated concern with the NEDS format since emission information is already available on State computer forms. Other comments indicated that the instructions for completing the NEDS computer forms were either not received or that the instructions for completing the forms were not clear.

While the regulations specify the NEDS format for submitting emission data, there is a provision in the regulations which allows the Regional Administrator to approve an alternate data form. Further, to help resolve the basic problem of dual data systems, the Agency has been providing assistance to States to either manually convert the data to the NEDS system or to develop computer programs which would output the necessary information in the NEDS format for Agency usage. Similarly, assistance is available and has been provided to many States to convert data on State forms to NEDS data forms. Comprehensive data handling guidelines are also available from EPA to further assist States in data handling and reporting consistency. Every effort is being made to minimize the reporting burden to the State agencies but at the same time structure the report and information so an orderly flow of information will be provided to support the national analysis of SIP progress.

In regard to the nonreceipt of instructions for NEDS systems, specific instructions on completing the NEDS forms were provided to each State agency in September 1972 in a publication entitled "Guidelines for Compiling a Comprehensive Emission Inventory, Chapter 4, APTD–1135." While the NEDS instructions are quite extensive, technical assistance to States on special problems is available from Regional Office personnel.

Very few comments were received on the proposed air quality data reporting requirements. One comment related to the need of EPA for the detailed air quality measurements rather than data summaries. While one State suggested that summary air quality statistics should be adequate, one other agency stated in positive terms the acceptability of the reporting procedures.

It is the Acting Administrator's judgement that detailed data will allow the Agency to develop statistical trends and projections of ambient levels in relation to progress in achieving national standards. Also, a central national data handling system which can provide summary statistics to State and local agencies is a useful service to those agencies that do not have their own capability to do so. It is the intent of the Agency to make available through the Regional Offices summary statistics within 75 days of the receipt of the data by the Agency.

One comment was submitted by a utility company which indicated that the proposed requirements for States to report emission data semi-annually to the Agency would in turn require States to solicit emission data from the utility industry. The utility stated that the Federal Reports Act of 1942 obligates Federal agencies to coordinate data acquisition even if the data are to be collected by a third party. Since the regulations do not require States to establish procedures for data acquisition from sources nor do they require States to routinely obtain emission information for any sources, the utility's comment reflects a misunderstanding of the Agency's prescribed reporting requirements. The Agency however supports the use of the Federal Power Commission's Form 67 as an information source for general emission information for utilities, but also recognizes State agencies' needs for

V38-149 AUG 3 73 XUM

additional information such as enforcement or compliance information. EPA will continue to coordinate with the Federal Power Commission on the environmental information needs of the Agency.

The regulations which are included in this package for § 51.16 will delete the requirement for states to negotiate and submit to EPA the emergency emission control action programs for individual sources. This modification does not relieve States or source owners or operators of their respective obligations to require and to achieve control of emissions from such sources whenever and wherever such control is necessary to prevent an air pollution episode. Nor does this modification affect EPA's authority to initiate action under section 303 of the Act to prevent imminent and substantial endangerment to the health of persons.

The existence of individual emissions control actions programs for major sources tends to facilitate source owners' and operators' responses to abatement orders issued for the purpose of episode prevention. Many agencies will require such programs from sources as indicated by § 51.16(b) and Appendix L to Part 51. In dealing with sources for which such standby programs do not exist, the responsible State or local agency, or EPA in the event of Federal action under section 303, may have to provide more detailed abatement orders, but it is entirely feasible to do so, and where necessary, State and local agencies will be expected to do so. Accordingly, it is not anticipated that this modification of § 51.16(c) will have any significant effect on protection of persons against the occurrence of air pollution levels which could cause significant harm to health.

States are still encouraged to provide for the development of individual emission control action programs for major stationary sources in order to facilitate prevention of air pollution episodes. It is the Acting Administrator's judgment, however, that an absolute requirement for preparation and evaluation of such emission control action programs for all such stationary sources in all Priority I air quality control regions and to submit them to the Agency for review and approval would consume resources which at this time can be put to more productive use in preparation and evaluation of compliance schedules and transportation control strategies and in taking other steps necessary to ensure that adequate progress is made toward attainment of the national ambient air quality standards.

The regulations discussed above are effective upon publication in the FEDERAL REGISTER. The Agency finds that good cause exists for making these regulations effective upon publication since the process of preparing quarterly and semi-annual reports of progress is already underway in most State agencies. The three additional requirements which were not proposed on February 1, 1973, moderately expand sections of the proposed reporting requirements for which few, if any, comments were received.

(42 U.S.C. 1857g(a))

Dated: July 30, 1973.

ROBERT W. FRI,
Acting Administrator,
Environmental Protection Agency.

Part 51 of Title 40, Code of Federal Regulations is revised to read as follows:

§ 51.7 Reports.

(a) *Quarterly report on air quality data.* On a quarterly basis commencing with the end of the first quarterly period of October 1–December 31, 1972, the State agency shall report to the Administrator (through the appropriate Regional Office) information on air quality as specified in this paragraph.

(1) Quarterly reports shall include all air quality data gathered during the reporting period by the air quality surveillance network which is part of the applicable plan. The first report shall include all air quality data gathered subsequent to the air quality data which provided the basis for the development of the applicable plan.

(2) Quarterly reports shall be recorded and submitted in accordance with the procedures and data forms specified in the Storage and Retrieval of Aerometric Data (SAROAD) Users Manual, USEPA, OAP, APTD-0663. The data shall be submitted on paper forms, punched cards, or magnetic tape in the SAROAD format as specified in the following forms:

(i) SAROAD Site Identification Form for each new sampling site.

(ii) SAROAD Hourly Data Form for data with a sampling interval of less than 24 hours.

(iii) SAROAD Daily Data Form for data with a sampling interval of 24 hours or greater.

(iv) SAROAD Multiple-Parameter, Multiple-Station or Composite Data Forms may be used for reporting convenience.

(3) Quarterly reports shall be submitted within 45 days after the end of each reporting period. The quarterly periods are January 1–March 31, April 1–June 30, July 1–September 30 and October 1–December 31.

(b) *Semiannual report.* (1) For purposes of paragraph (a)(3) and paragraph (4)(i) and (ii) of this section, the term source shall have the following meaning: Any facility which emits a total of more than 100 tons per year of any one pollutant for which a national standard has been promulgated. For such facilities, emissions shall be reported as follows:

(i) Emissions of each such pollutant for the facility as a whole.

(ii) Emissions of each such pollutant from any individual emission point within the facility which emits more than 25 tons per year of any such pollutant.

(2) Submission of report: On a semi-annual basis commencing with the end of the first semiannual period of July 1–December 31, 1972, the State agency shall report to the Administrator (through the appropriate Regional Office) information as specified in this section.

(3) Source inventory data: (i) Emissions data and information related to emissions as identified by the NEDS point source coding forms shall be reported for each source which achieved compliance at any time within the reporting period with any regulation of an applicable plan. The first report shall include all sources which achieved compliance since the development of the applicable plan.

(ii) Emissions data and information related to emissions for criteria pollutants shall be reported for each new or modified source which:

(*a*) Received approval to construct during the reporting period.

(*b*) Began operation during the reporting period. The first report shall include all new or modified sources which began operation since the development of the applicable plan.

(iii) The identification of sources which ceased operations during the reporting period shall be reported. The first report shall identify all sources which ceased operation since the development of the applicable plan.

(iv) The data required by paragraphs (b)(3)(i), (ii) and (iii) of this section shall be recorded and submitted on the NEDS point source coding forms specified in the "Guide for Compiling a Comprehensive Emission Inventory," Revised (March 1973), USEPA, OAWP, ATPD-1135.

(4) Progress in plan enforcement: (i) For each source, achievement during the reporting period of any increment of progress of compliance schedules required by the applicable plan or by any enforcement order or other State action required to be submitted pursuant to paragraph (d) shall be reported.

(ii) For each source, any enforcement action taken during the reporting period and not submitted under paragraph (d) which results in civil or criminal penalties shall be reported.

(iii) For each category of area sources, an estimate of the percent of sources in compliance with any emission regulation of the applicable plan shall be reported.

(5) Revisions: All substantive revisions, during the reporting period of the applicable plan, other than revisions to rules and regulations or compliance schedules submitted in accordance with section 51.6(g) of this part shall be identified and described. Substantive revisions shall include but are not limited to changes in stack-test procedures for determining compliance with applicable regulations, modifications, in the projected total manpower needs to carry out the approved plan, all changes in responsibilities given to local agencies to carry out various portions of the plan.

(6) Submission of semi-annual report: Semi-annual reports shall be submitted within 45 days after the end of each reporting period. The semi-annual periods are January 1–June 30 and July 1–December 31.

(c) *Report format.* Where a State agency has an existing format for recording the information required by paragraphs (a) and (b) of this section that differs from the format specified in those paragraphs, the State agency must obtain approval of the format by the Administrator (through the appropriate Regional Office) prior to its submittal as part of the quarterly or semiannual report.

(d) *Report on enforcement orders and other state actions.* (1) Any enforcement orders, including any court order, and any state action which purports to modify the requirements of an applicable implementation plan shall be submitted to the Administrator within 60 days of its issuance or adoption by the State.

(2) A State enforcement order or other State action shall not revise the applicable implementation plan unless such order or action is submitted as a revision to such plan pursuant to § 51.6 and approved by the Administrator.

§ 51.16 [Amended]

In § 51.16, paragraph (c) is revoked and the first and second sentences of paragraph (f) are amended by deleting the words "paragraphs (c) and" and by inserting instead the word "paragraph."

[FR Doc.73-15972 Filed 8-2-73;8:45 am]

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

Approvals and Disapprovals of Plan Revisions

On May 31, 1972 (37 FR 10842), pursuant to section 110 of the Clean Air Act and 40 CFR Part 51, the Administrator approved portions of State plans for implementation of the national ambient air quality standards in the States of Vermont and Massachusetts. This publication contains two approvals and one disapproval of proposed revisions to those plans.

Vermont, after notice and a public hearing, submitted a proposed revision to its implementation plan that would permit the Whitefield Paper Division of Georgia Pacific Corporation to burn for a limited time fuel oil with a sulfur content in excess of the 1.5 percent maximum allowed under Vermont Air Pollution Control Regulation 5–221. The revision would allow the burning of oil with an average of 2.25 percent sulfur (not to exceed 2.5 percent) from October 1, 1972 to July 1, 1973. This revision is approved for the reasons indicated below.

The Georgia Pacific Whitefield Division is located in Gilman, Vermont, which is in the Vermont Intrastate air quality control region, and is classified Priority II for SO_x. The primary ambient air quality standard for SO_x, however, was not attained at the time of classification. Therefore, a date for the attainment of the primary standard in that region was established as a part of Vermont's SO_x control strategy. That date is January 31, 1975. Because the revision does not relieve Georgia Pacific from its obligation to comply with the applicable Vermont emission limitation by January 31, 1975, there is no inconsistency with the approved control strategy for SO_x in the Vermont implementation plan. The revision is also consistent with the requirements of 40 CFR Part 51 that pertain to compliance schedules. Although it relieves Georgia Pacific from compliance for a limited period of time, the Administrator has determined that the proposed compliance date is the earliest practicable time by which Georgia Pacific could acquire the low sulfur fuel necessary for compliance.

Massachusetts, after notice and public hearings, submitted two proposed revisions to its implementation plan. One would allow two facilities of the Newton Public Schools to operate hand fired coal furnaces after June 1, 1972, the date upon which Massachusetts Regulation 5.3.1, prohibiting such operation, became effective. The revision would allow operation until June 1, 1973. This revision is also approved, for the reasons indicated below.

Both facilities are located in the Metropolitan Boston Intrastate air quality control region, which is classified Priority I for particulates. The attainment date in that region for the primary particulate standard is July 31, 1975. Because the revision does not relieve either facility from the obligation to comply with the applicable Massachusetts control measure by July 31, 1975, there is no inconsistency with the approved control strategy for particulates in the Massachusetts implementation plan.

The revision is also consistent with the requirements of 40 CFR Part 51 that pertain to compliance schedules. Although it delays the date by which the two facilities must comply, the Administrator has determined that the proposed compliance date is the earliest practicable time by which the heating systems could be closed down. After that date, the facilities involved must not be operated until they have been modified to avoid hand firing.

A second proposed revision would have permitted Peirce Brothers, Inc., in Waltham, Massachusetts, to burn a maximum 1.0 percent sulfur fuel from October 1, 1972 to October 1, 1973. Massachusetts Regulation 5.1.1 prohibits the burning in certain regions of fuel with a sulfur content in excess of 0.5 percent. Peirce Brothers is located in the Metropolitan Boston Intrastate air quality control region, which is classified Priority I for SO_x. The attainment date in that region for the primary SO_x standard is July 31, 1975.

The Administrator has determined that this revision fails to satisfy the requirement of 40 CFR 51.15(b)(1) that compliance be as "expeditious as practicable." Massachusetts' justifications for the revision, that economic hardship will be incurred otherwise and that it is necessary for the public good, are insufficient to show that compliance in accordance with Regulation 5.1.1 would be impracticable. It has been determined that a sufficient quantity of sulfur fuel is available to Peirce Brothers for achieving the 0.5 percent limitation by blending. Accordingly, this proposed revision is disapproved.

The Agency finds that good cause exists for making these actions effective immediately upon publication for the following reasons:

1. The implementation plan revisions were adopted in accordance with procedural requirements of State and Federal law, which provided for adequate public hearings and comments, and further participation is unnecessary and impracticable.

2. Immediate effectiveness of the actions enables the sources involved to proceed with certainty in conducting their affairs and persons wishing to seek judicial review of the actions may do so without delay.

(42 U.S.C. 1857c-5)

ROBERT W. FRI,
Acting Administrator.

JULY 30, 1973.

Part 52 of Chapter 1, title 40 of the Code of Federal Regulations is amended as follows:

Subpart W—Massachusetts

1. Section 52.1125, is amended by adding a new paragraph (a) and by adding new lines to the table in paragraph (b), as follows:

§ 52.1125 Compliance schedules.

(a) The compliance schedules for source identified below are disapproved as not meeting the requirements of § 51.15 of this chapter. All regulations cited are air pollution control regulations of the State, unless otherwise noted.

Source	Location	State regulation involved	Date of adoption
Peirce Brothers, Inc.	Waltham, Mass.	5.1.1	1/9/73

(b) • • •

Source	Location	State regulation involved	Date of adoption	Effective date	Final compliance date
• • •	• • •	• • •	• • •	• • •	• • •
Newton Public Schools	Newton, Mass.	5.3.1	Dec. 7, 1972	Immediately	June 1, 1973
Administration Building	265 Washington Street.				
Claflin Hall, Newton Junior College.	Washington Park, Newton Hlve.				

V 38-149 AUG 3 73 XUM

Subpart UU—Vermont

2. A new § 52.2376 is added, as follows:

§ 52.2376 Compliance schedules.

(a) The compliance schedules for the sources identified below are approved as meeting the requirements of § 51.15 of this chapter. All regulations cited are air pollution control regulations of the State, unless otherwise noted.

Source	Location	State regulation involved	Date of adoption	Effective date	Final compliance date
Georgia Pacific Corp., Whitefield Paper Division.	Gilman, Vt.....	5-221	Jan. 5, 1973	Immediately..	July 1, 1973

[FR Doc.73-15973 Filed 8-2-73;8:45 am]

Title 41—Public Contracts and Property Management

CHAPTER 15—ENVIRONMENTAL PROTECTION AGENCY

PART 15-3—PROCUREMENT BY NEGOTIATION

Subpart 15-3.6—Small Purchases

Section 15-3.650, Oral Purchase Orders, is hereby added to Chapter 15, Title 41 of the Code of Federal Regulations.

Effective date. This regulation will be effective August 3, 1973.

Dated: July 30, 1973.

ROBERT W. FRI,
Acting Administrator.

Subpart 15-3.6—Small Purchases

Sec.
15-3.650 Oral Purchase Orders.
15-3.650-1 Policy.
15-3.651 Procedure.

AUTHORITY: 40 U.S.C. 486(c), 63 Stat. 377, as amended, sec. 205(c).

Subpart 15-3.6—Small Purchases

§ 15-3.650 Oral Purchase Orders.

§ 15-3.650-1 Policy.

Oral purchase orders are authorized under the following conditions:

(a) Items are supplies in vendor stock or services readily available.

(b) Neither the imprest fund method nor a blanket purchase agreement is available or appropriate.

(c) Total order will not exceed $250.00.

§ 15-3.651 Procedure.

(a) Upon receipt of a Procurement Request/Requisition (EPA Form 1900-8), the Contracting Officer will place an oral order with the appropriate vendor in accordance with EPA Order 1900.4.

(b) In addition to purchasing information for which specific blocks are provided on the EPA Form 1900-8, the Purchasing Agent will annotate on all copies of the Procurement Request the following:

(1) Oral Purchase Order Number
(2) Date of Order
(3) Vendor Name and Address
(4) F.O.B. Point
(5) Discount Terms
(6) Time for Delivery
(7) Pricing Data as Agreed to
(8) Federal Supply Schedule Contract Number, if applicable
(9) Name of Person Taking Order
(10) Contracting Officer's Name

(c) The vendor will be given the purchase order number and be instructed to include the number in the shipment destination address. The vendor will also be requested to invoice immediately upon shipment and to include the purchase order number on the invoice. The address for billing will also be provided the vendor. All invoices shall be forwarded by the vendor directly to the applicable Accounting Operations Office.

(d) The Contracting Officer will complete and sign the original Purchase Request/Requisition and distribute as follows:

(1) Original filed in the Procurement Office "Oral Order" open file.

(2) Copy sent to Accounting Operations Office for obligation of funds.

(3) Two copies sent to Receiving area for use as receiving report.

(4) Copy returned to the Originator.

(e) When the material is delivered, the receiving clerk shall certify receipt on one copy and forward it to the Accounting Operations Office for payment.

(f) In the event the vendor requires a written order, a copy of the requisition, properly annotated as a confirming order, will be furnished by the ordering office.

(g) Number and distribution of copies may be modified by ordering offices with prior concurrence of the Accounting Operations Office.

[FR Doc.73-15974 Filed 8-2-73;8:45 am]

PART 15-30—CONTRACT FINANCING

Subpart 15-30.1—Forms of Financing

Forms of Financing, Subpart 15-30.1, is hereby added to Chapter 15, Title 41 of the Code of Federal Regulations.

This section is a statement of agency internal procedures.

Effective date. This regulation will become effective August 3, 1973.

Dated: July 30, 1973.

ROBERT W. FRI,
Acting Administrator.

Subpart 15-30.1—Forms of Financing

Sec. 15-30.103 Advance payments authority.
Sec. 15-30.104-1 Letters of credit.

AUTHORITY: (40 U.S.C. 486(c), Sec. 205(c), 63 Stat. 377, as amended)

Subpart 15-30.1—Forms of Financing

§ 15-30.103 Advance payments—authority.

(a) In considering whether cash advances are appropriate in a particular situation, and to determine the requirements for implementing advances, the contracting officer should be guided by this EPPR, the FPR (Subparts 30.1 and 30.4), Department of the Treasury Circular 1075 and part VI of the Department of the Treasury Fiscal Requirements Manual.

(b) Cash advances by the EPA shall be limited to the minimum amounts needed by the contractor for the performance of the contract. The advances shall be timed in accord with the contractor's actual cash requirements.

(c) Department of the Treasury Circular 1075 (revised April 16, 1969) authorizes two methods for making cash advances: the letter of credit and the Treasury check. Normally, the method to be used will be chosen as follows (however, pending development and approval of the Agency's systems and procedures to deal with letters of credit, only the Treasury check method will be used):

(1) If the agency does not expect to have a continuing relationship with the contractor for at least one year, advances will be made by Treasury check.

(2) If the agency expects to have a continuing relationship with the contractor for at least one year involving total annual advances of less than $250,000, advances will be made by Treasury check.

(3) If the agency expects to have a continuing relationship with the contractor for at least one year involving total annual advances of $250,000 or more, advances will be made by use of a letter of credit.

(d) The EPA may request from the Department of Treasury specific approval of other methods of making advance payments, if they appear to be as advantageous to the Government as the Treasury check or letter of credit methods.

§ 15-30.104-1 Letters of credit.

(a) The letter of credit method provides EPA, the contractor and the Department of Treasury with a mechanism specially designed to enable the contractor to obtain cash from the Treasury promptly and with such frequency as may be necessary based upon the contractor's own determination of when and how much cash is actually needed for its disbursements.

(b) A letter of credit, which must be executed by an authorized certifying officer of the agency, gives the contractor the authority to draw directly on the Treasury, through its commercial bank (acting as its agent) and either a Federal Reserve Bank (acting as agent of the Treasury) or the Cash Division, Office of the Treasurer of the United States, subject to any monetary and other limits established by the program agency. Withdrawals must be made by authorized officials of the contractor's organization who have been designated by it and approved by the agency's certifying officer.

[FR Doc.73-15975 Filed 8-2-73;8:45 am]

PART 15-30—CONTRACT FINANCING

Subpart 15-30.4—Advance Payments

Subpart 15-30.4, Advance Payments, is hereby added to Chapter 15, Title 41, of the Code of Federal Regulations.

This section is a statement of agency internal procedures.

Effective Date. This regulation will become effective on August 3, 1973.

Dated: July 30, 1973.

ROBERT W. FRI,
Acting Administrator.

Subpart 15-30.4—Advance Payments

Sec.
15-30.403 Interests.
15-30.406 Responsibility—Delegation of authority.
15-30.410 Findings, determinations and authorization.
15-30.412-2 Contract provisions for advance payments.

AUTHORITY: The provisions of this subpart 15-30.4 issued under 40 U.S.C. 486(c), Sec. 205(c), 63 Stat. 377, as amended.

§ 15-30.403 Interest.

(a) Interest will be charged on all advance payments at the rate of six percent per annum on the unliquidated balance; provided, however, that advance payments may be approved without interest in connection with (1) nonprofit contracts with nonprofit educational or research institutions for experimental, research, and development work, (2) contracts solely for the management and operation of Government-owned plants, or (3) other classes of cases where specifically authorized by the Director, Contracts Management Division, AMAC.

(b) If the contract provides for interest-free advances to the contractor, it shall nonetheless provide that interest will be charged at the rate of six percent per annum on advances made or used for the purpose of making subadvances to the subcontractors; provided, however, that such contract may provide that interest will not be charged on subadvances in connection with subcontracts without fee or profit with nonprofit education or research institutions for experimental, research, or developmental work.

§ 15-30.406 Responsibility—delegation of authority.

(a) Requests to make advance payments shall be forwarded to the chief officer responsible for procurement at the contracting activity. Such requests shall include, at a minimum: (1) A proposed determinations and findings prepared in the format suggested in § 1-30.410, altered to meet the condition or circumstances of the procurement action, (2) the information required in § 1-30.411 and § 1-30.412, and (3) proposed contract provisions as set out in § 1-30.414-2. The chief officer responsible for procurement at the contracting activity shall sign all determinations and findings which authorize advance payments and will approve all contract provisions relating to advance payments. Prior to signing advance payment determinations and findings, the chief officer responsible for procurement at the contracting activity shall obtain the advice and concurrence of the Director, Financial Management, AMRF, or his designee. The Financial Management Division will make arrangements with the Treasury Department for all advance payments, including the establishment of Federal Reserve Letters of Credit, and will also make arrangements with other Government agencies when EPA use of their Federal Reserve Letters of Credit is expedient.

§ 15-30.410 Findings, determinations and authorizations.

41 U.S.C. 255 shall be cited as authority for advance payments.

§ 15-30.414-2 Contract provisions for advance payments.

The appropriate contract provisions suggested in § 1-30.414-2 shall be used to authorize advance payment. Proposed alterations of the contract provisions must be aproved by the chief officer responsible for procurement at the contracting activity prior to incorporation into an EPA contract.

[FR Doc.73-16045 Filed 8-2-73;8:45 am]

Title 49—Transportation

CHAPTER I—DEPARTMENT OF TRANSPORTATION

SUBCHAPTER A—HAZARDOUS MATERIALS REGULATIONS BOARD

[Docket No. HM-57; Amdts. 172-20, 173-74, 178-26]

CLASSIFICATION AND PACKAGING OF CORROSIVE MATERIALS

The purpose of these amendments to the Hazardous Materials Regulations is to amend §§ 172.5, 173.119, 173.245, 173.245b, and 178.343-5 to specify certain shipping names and to add authorized packagings for the shipment of corrosive materials.

On February 12, 1973, the Hazardous Materials Regulations Board published a notice of proposed rulemaking, Docket No. HM-57; Notice No. 73-1 (38 FR 4270), which proposed these amendments. Interested persons were invited to give their views and many comments were received by the Board.

1. *Shipping descriptions.* Several commenters requested the inclusion of additional shipping names and packagings which were not the subject of Notice No. 73-1. Since these were not proposed to be added to the regulations, it would be more appropriate for the Board to handle these requests in a separate notice of proposed rule making to allow for adequate comment. The Board intends to publish such a notice.

2. *Drum size limitation for corrosive solids.* One commenter noted, in a petition for reconsideration in Docket HM-57, Amendment No. 173-61, that the 55-gallon capacity limitation for corrosive solids in § 173.245b(a)(4) was too restrictive in view of their experience in shipping drums of larger size. In view of the Board's previously stated position in packaging requirements for solids, (See 36 FR 11304 and 15762, 37 FR 5946) and on the basis of the reported satisfactory experience, the Board agrees with the commenter and has removed the size restriction in the subject paragraph.

3. *Inside PE container for corrosive liquids.* One commenter stated that § 173.245(a)(16), as proposed, should be changed to provide for a certain high density, non-DOT specification, 55-gallon capacity polyethylene inner container for shipping corrosive liquids, n.o.s. The commenter cites satisfactory experience with the use of such an inner container for materials previously not considered regulated. Such a change was not proposed in the notice. The Board, however, is considering a proposal to amend the inner container specifications. Meanwhile, it believes such packaging should be approved only under the terms of a special permit so that it can study the experience factor more closely. Since similar permits now exist, this commenter should petition the Board for a special permit so that the Board may add his experience to that being obtained under other permits.

4. *Corrosive material definition.* Several comments were made on the Board's proposal to adjust the corrosive material definition (§ 173.240) to coincide with certain proposals by the Commissioner of Food and Drugs (FDA) (37 FR 27635). The Board's proposals were mainly related to handling of test animals and detail on preparation of the test material. Before acting on this proposal, the Board is awaiting the outcome of the Food and Drug Administration's rule making. However, as stated in the preamble of Notice No. 73-1, the Board continues to believe that any changes it proposed will not materially alter the classification of materials severely corrosive (that cause destruction or irreversible alteration) to human skin. When the FDA rule making action is completed, the Board will then consider all the comments received on the definition in § 173.240 and the FDA decision.

5. *Test animals.* One commenter pointed out the difficulties in relating results of tests on rabbit skin to the results on human skin contact, particularly with respect to materials proven not corrosive to human skin although giving positive results under rabbit skin testing. This commenter went on to state that such a substance need not be labeled

V 38-149 AUG 3 73 XUM

under the provisions of the Federal Hazardous Substances Act. The Board points out that this was one of the primary reasons for the adoption of § 173.240(b). This paragraph specifically alludes to human experience. There is a mechanism, established by the Board, whereby materials may be "declassified" by its action. It should be noted, however, that the Board, under the same provision, may "classify" a material because of human experience without being strictly limited to the quantitative rabbit skin test results. In conclusion on this matter, the Board chose rabbit skin testing for its criteria because it wanted to use recognized methods and not establish completely new criteria. To have established new criteria would have posed a different series of difficulties for manufacturers.

6. *Ethylene dichloride.* Based on a comment the Board has removed ethylene dichloride from the list (§ 172.5) of flammable liquids which are also corrosive. The Board will study this matter in more depth.

7. *Cargo tank density limitations.* Several comments were made objecting to the proposed lading density limitation of 10 pounds per gallon when transporting a corrosive material in a DOT specification MC 304 or MC 307 cargo tank. The regulation has been amended to remove the restriction for MC 307 cargo tanks since the weight of lading is adequately controlled by § 178.340–10(b)(1) wherein such a cargo tank has a maximum product load limitation established by regulation. This maximum product load must be marked in pounds on the metal certification plate attached to each MC 307 cargo tank. Also, the proposed regulation has been amended to remove the reference to a lading weight restriction for MC 304 based on the comments and reports of operation and experience received indicating that such a restriction is not justified.

8. *Tank car bottom outlets.* Objections were made to the "interim" authorization for bottom outlets on tank cars. The Board recognizes that this situation creates some serious difficulties with respect to program planning, cost allocations, leasing, long-term operations, forecasts, etc. It does, however, have comments on file questioning the safety of permitting bottom outlets on tank cars containing certain corrosive materials. While the Board has not completed its evaluation of the reported problems, it nevertheless believes that it would be misleading to provide for bottom outlets in § 173.245 without an appropriate warning that such authorization is provided temporarily pending a final decision. On the other hand, the Board does not consider it has progressed far enough in its evaluation to justify any curtailment of such cars in the services where they are used. Therefore, the Board is using an "interim" solution which it considers to be appropriate under these circumstances.

9. *Emergency discharge controls.* Several comments were received objecting to a requirement for heat actuated and remote control mechanisms in bottom outlet valves as proposed for MC 304, MC 310, MC 311, and MC 312 cargo tanks used in the transportation of corrosive liquids. The Board agrees that the requirement for a heat-actuated mechanism, in view of the nature of the lading, is not justifiable under conditions of transportation as known today. The Board, however, believes that the remote control mechanism is necessary to provide adequate safety in handling corrosive materials. The comments that objected to the need for the remote control shut-off argued that such a shut-off was unnecessary. But duplication with respect to control is known to exist in several plants handling these materials. The concern for an adequately safe operation in unloading the tank truck should be of the same order of importance as the plant handling of the material. It is of interest to note that the National Transportation Safety Board (NTSB) in its report NTSB–HAR–72–3, a truck-automobile collision involving spilled methyl bromide, observed that "substantial differences exist between methyl bromide hazard control measures exercised in manufacturing plants and those found in transportation in this accident." The NTSB concluded: "Inplant hazard control procedures should be considered by the regulators in developing future changes in transportation regulations." The Board (HMRB) believes such an analogy exists here. The requirement for a second station in the event of incident involving the discharge point station is consistent with safety engineering practices in use and is not overburdening when considering the plant safety procedures in use for handling corrosive materials. Therefore, the Board is requiring use of a remote station except when liquids contain solids in suspension in sufficient quantity that settling may form a layer of solid material that may interfere with sealing of the valve seat.

10. *"Grandfather" clause.* Several commenters pointed out the difficulty in handling materials which were in the distribution system before the effective date of these amendments. The Board considers these comments valid and has provided a limited "grandfather" clause. See Note 1 to § 173.240.

11. *Inside plastic receptacles for corrosive solids.* In Notice No. 71–17, the Board proposed to authorize plastic receptacles as inside packagings for shipment of corrosive solids covered by § 173.244(c). This type of packaging was inadvertently omitted from Amendment No. 173–61. This oversight has been corrected by amending § 173.244(c).

In view of the foregoing, 49 CFR Parts 172, 173, and 178 are amended as follows:

PART 172—LIST OF HAZARDOUS MATERIALS CONTAINING THE SHIPPING NAME OR DESCRIPTION OF ALL MATERIALS SUBJECT TO PARTS 170–189 OF THIS SUBCHAPTER

In § 172.5 paragraph (a), the List of Hazardous Materials is amended as follows:

§ 172.5 List of hazardous materials.

(a) • • •

Article	Classed as—	Exemptions and packing (see sec.)	Label required if not exempt	Maximum quantity in 1 outside container by rail express
(Change)				
Crotonaldehyde	F.L.	173.118, 173.119(m)	F.L.	10 gallons.
Diethylamine	F.L.	173.118, 173.119(m)	F.L.	10 gallons.
Propylene oxide	F.L.	173.118, 173.119(m)	F.L.	10 gallons.
(Add)				
Caustic soda, dry, solid, flake, bead, or granular.	Cor.	173.244, 173.245b	Corrosive	100 pounds.
*Phosphoric acid, *liquid*, or Phosphoric acid solution.	Cor.	173.244, 173.245	Corrosive	10 gallons.
Sodium hydroxide, dry, solid, flake, bead, or granular. See Caustic soda.				

PART 173—SHIPPERS

A. In § 173.119, paragraph (m)(4) is amended; paragraphs (m)(9), (10), (11), (12), (13), (14), and (15) are added to read as follows:

§ 173.119 Flammable liquids not specifically provided for.

• • • • • •

(m) • • •

(4) Specification 5, 5A, 5B, 5C, 5P, 17C (single-trip), or 17E (single-trip) (§§ 178.80, 178.81, 178.82, 178.83, 178.92, 178.115, 178.116 of this subchapter). Metal barrels or drums. Removable head packagings over 16 gallons capacity are not authorized. Authorized only for materials which will not react dangerously with the drum metal, or be decomposed by contact with it.

• • • • •

(9) Cylinders as prescribed for any compressed gas, except acetylene. All cylinder valves must be protected by one of the methods described in § 173.301(g)(1), (2), or (3). See § 173.34(e)(16).

(10) Specification MC 304: Tank motor vehicle meeting § 178.343–2(c) of this subchapter. If the cargo tank is constructed with bottom outlets, they must meet § 178.342–5(a) of this subchapter.

(11) Specification MC 307 (§§ 178.340, 178.342 of this subchapter). Tank motor vehicle meeting § 178.343–2(c) of this subchapter.

(12) Specification MC 310, MC 311, or MC 312 (§§ 178.340, 178.343 of this subchapter). Tank motor vehicles. If the cargo tank is constructed with bottom outlets, they must meet §§ 178.342–5(a) and 178.343–5 of this subchapter.

(13) Specification 103AW, 103A–ALW, 103ANW, 103BW, 103CW, 103EW, 111A100F2, 111A60ALW2, 111A60W2, 111A60W5 (§§ 179.200, 179.201 of this subchapter). Tank cars. All special requirements for tank cars according to flashpoint, vapor pressure, and viscosity in paragraphs (a) through (L) of this section apply.

(14) Specification 105A100W or 112–A200W (§§ 179.200, 179.201, 179.100, 179.101 of this subchapter). Tank cars. Authorized only for propylene oxide.

(15) Specification 103ALW, 103DW, 103W, 104W, 111A60ALW1, 111A60W1, 111A100W3, 111A100W6, 115A60W6, or AAR206W (§§ 179.200, 179.201, 179.220 of this subchapter). Tank cars. All special requirements for tank cars according to flashpoint, vapor pressure, and viscosity in paragraphs (a) through (L) of this section apply. (See Note 1.)

NOTE 1: Authorized only on an interim basis pending the Department's decision on use of bottom outlets for tank cars containing hazardous materials.

B. In § 173.240, foot note 1 is added to read as follows:

§ 173.240 Corrosive materials; definition.[1]

• • • • • •

C. In § 173.244, paragraph (c) is amended to read as follows:

§ 173.244 Exemptions for corrosive materials.

• • • • • •

(c) Corrosive solids, except those for which no exemptions are provided as indicated by the "No exemption" statement in § 172.5 of this subchapter in inside earthenware, glass, plastic, or paper receptacles of not more than 5 pounds capacity each or in inside metal, rigid fiber or composition cans or cartons, or rigid plastic receptacles, of not more than 10 pounds capacity each, overpacked in metal, wooden, or fiberboard outside containers not exceeding 25 pounds net weight each are, unless otherwise provided in this part, exempt from specification packaging, marking, and labeling requirements, except that marking name of contents on outside container is required for shipments via carrier by water. Shipments for transportation by highway carriers are exempt also from Part 177 of this subchapter, except § 177.817.

D. In § 173.245, paragraph (a)(16) is amended; paragraph (b) and paragraphs (a)(28) through (32) are added to read as follows:

§ 173.245 Corrosive liquids not specifically provided for.

(a) • • •

(16) Specification 6D or 37M (nonreusable container) (§§ 178.102, 178.134 of this subchapter). Cylindrical steel overpacks with inside spec. 2S, 2SL, or 2U (§§ 178.35, 178.35a 178.24 of this subchapter) polyethylene packaging.

• • • • •

(28) Cylinders as prescribed for any compressed gas, except acetylene. All cylinder valves must be protected by one of the methods described in § 173.301(g)(1), (2), or (3). See § 173.34(e)(16).

(29) Specification MC 304. Tank motor vehicle meeting § 178.343–2(c) of this subchapter.

(30) Specification MC 307 (§§ 178.340, 178.342 of this subchapter). Tank motor vehicle meeting § 178.343–2(c) of this subchapter.

(31) Specification MC 310, MC 311, or MC 312 (§§ 178.340, 178.343 of this subchapter). Tank motor vehicles. If cargo tank is constructed with bottom outlets, they must meet § 178.343–5 of this subchapter.

(32) Specification 103AW, 103A–ALW, 103ANW, 103BW, 103CW, 103EW, 111A100F2, 111A60ALW2, 111A60W2, 111A60W5, (§§ 179.200, 179.201 of this subchapter). Tank cars.

(33) Specification 103ALW, 103DW, 103W, 104W, 111A60ALW1, 111A60W1, 111A100W3, 111A100W6, 115A60W6, or AAR206W (§§ 179.200, 178.201, 179.220 of this subchapter). Tank cars. (See Note 1.)

NOTE 1: Authorized only on an interim basis pending the Department's decision on use of bottom outlets for tank cars containing hazardous materials.

(b) If a material classed as corrosive is corrosive to steel or aluminum according to § 173.240(a)(2) and is not corrosive to skin according to § 173.240(a)(1), it is not subject to any requirements of this subchapter for rail or highway when transported in a tank car tank or cargo tank constructed entirely of materials that will not react dangerously with or be decomposed by the commodity being transported.

E. In § 173.245a, the introductory text in paragraph (a) is amended and paragraph (b) is added to read as follows:

§ 173.245a Corrosive liquids, n.o.s. shipped in bulk.

(a) Corrosive liquids, n.o.s. which are listed in the following table, may not be shipped in bulk unless they are packaged as follows:

• • • • • •

(b) Corrosive liquids, n.o.s., except those listed in paragraph (a) of this section, when shipped in bulk, must be packaged as prescribed by § 173.245.

F. In § 173.245b, paragraph (a)(11) is deleted and paragraphs (a)(2), (4), (5), and (7) thru (10) are amended to read as follows:

§ 173.245b Corrosive solids not specifically provided for.

(a) • • •

(2) Fiberboard box with inside paper bags, not over 50 pounds total net capacity. When shipped by water, each box must include a moisture barrier.

• • • • • •

(4) Metal drum.

(5) Fiber drum not exceeding 550 pounds net weight and not over 55-gallon capacity. When shipped by water, each drum must include a moisture barrier.

• • • • • •

(7) Bag: Each bag filled to weight with product and closed as for shipment must be capable of withstanding four drops from a height of 4 feet onto a solid surface, one drop on each end and one drop on each face, without sifting or rupture. Authorized net weight not to exceed 110 pounds. When shipped by water, each bag must include a moisture barrier.

(8) Metal portable tank or closed bin of not over 660-gallon capacity and 7,000 pounds gross weight.

(9) Fiberglass or rubber tank or closed bin of not over 74-cubic-foot capacity.

(10) Metal sift-proof cargo tank or tank car, or hopper-type or pneumatic bulk vehicle.

(11) [Deleted]

PART 178—SHIPPING CONTAINER SPECIFICATIONS

Section 178.343–5 is amended to read as follows:

§ 178.343 Specification MC 312: cargo tanks.

§ 178.343–5 Outlets.

(a) Each outlet at or near the top of a tank, used for discharge of lading, must be equipped with a shutoff valve located as close as practical to the point of outlet from the tank. Each such outlet having its discharge end below the top liquid level in the tank must be equipped with an additional shutoff valve, blank flange, or sealing cap at the discharge end of the outlet.

(b) Except as provided in paragraphs (c) and (d), of this section; each bottom outlet must be equipped with a shutoff valve designed, installed, and protected as follows:

(1) Product piping must be protected to assure against the accidental escape of contents by a shear section located outboard of each valve seat and within four inches of the vessel.

(i) The shear section must be machined to abruptly reduce the wall thickness of the adjacent piping (or valve) material by at least 20 percent so that it will break under strain and leave the valve seat and its attachment to the vessel and the valve head intact without leakage of the lading.

(2) Each bottom outlet valve must be located inside the tank or immediately adjacent at the outlet point outside the tank.

(i) The valve seat must be located inside the tank or within the welded flange nozzle or coupling at the point of outlet from the tank.

[1] A corrosive material, not subject to the definition previously in effect in § 173.240, packaged before December 31, 1973, may be shipped and transported without being subject to any of the requirements in 49 CFR Parts 170 to 179 until December 31, 1974. As of January 1, 1975, these materials may not be shipped or transported unless they are in compliance with 49 CFR 170 to 179.

V 38-149 AUG 3 73 XUM

(ii) Each bottom discharge valve must be equipped with a remote means to activate a valve closure manually from a point no less than 10 feet away.

(3) In addition, a blank flange, sealing cap, or shutoff valve is required at the discharge end of the outlet.

(c) A bottom opening for purposes other than lading discharge may be closed by a bolted blank flange at the tank shell. If any piping extends from such an opening, it must be fitted with a shutoff valve designed, installed, and protected as described in paragraph (b)(1) of this section. In addition a supplemental closure is required at the discharge end of this piping.

(d) Bottom outlet valves need not meet subparagraph (b)(2)(ii) of this section when the cargo tank is transporting a corrosive liquid containing solids in suspension in sufficient quantity that settling may form a layer of solid material that may interfere with sealing of the valve seat.

This amendment is effective December 31, 1973. However, compliance with the regulations, as amended herein, is authorized immediately.

(Secs. 831-835, Title 18, U.S.C., sec. 9, Department of Transportation Act, 49 U.S.C. 1657, title VI and sec. 902(h), Federal Aviation Act of 1958, 49 U.S.C. 1421-1430, 1472(h), 1655(c).)

Issued in Washington, D.C. on July 27, 1973.

C. R. MELUGIN, JR.,
Board Member, for the Federal Aviation Administration.

ROBERT A. KAYE,
Board Member, for the Federal Highway Administration.

MAC E. ROGERS,
Board Member, for the Federal Railroad Administration.

CHAPTER X—INTERSTATE COMMERCE COMMISSION

SUBCHAPTER A—GENERAL RULES AND REGULATIONS

[S.O. 1084; Amdt. 3]

PART 1033—CAR SERVICE

Chicago, Rock Island and Pacific Railroad Co.

At a session of the Interstate Commerce Commission, Railroad Service Board, held in Washington, D.C., on the 27th day of July 1973.

Upon further consideration of Service Order No. 1084 (36 FR 22063; 37 FR 12726 and 28059), and good cause appearing therefor:

It is ordered, That:

§ 1033.1084 Service Order No. 1084 (Chicago, Rock Island and Pacific Railroad Company authorized to operate over tracks of Chicago and North Western Transportation Company) be, and it is hereby, amended by substituting the following paragraph (e) for paragraph (e) thereof:

(e) *Expiration date.* This order shall expire at 11:59 p.m., January 31, 1974, unless otherwise modified, changed, or suspended by order of this Commission.

Effective date. This amendment shall become effective at 11:59 p.m., July 31, 1973.

(Secs. 1, 12, 15, and 17(2), 24 Stat. 379, 383, 384, as amended; 49 U.S.C. 1, 12, 15, and 17 (2). Interprets or applies Secs. 1(10-17), 15 (4), and 17(2), 40 Stat. 101, as amended, 54 Stat. 911; 49 U.S.C. 1(10-17), 15(4), and 17 (2).)

It is further ordered, That a copy of this amendment shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association; and that notice of this amendment be given to the general public by depositing a copy in the Office of the Secretary of the Commission at Washington, D.C., and by filing it with the Director, Office of the Federal Register.

By the Commission, Railroad Service Board.

[SEAL] ROBERT L. OSWALD,
Secretary.

[FR Doc.73-16077 Filed 8-2-73;8:45 am]

Title 7—Agriculture

CHAPTER VII—AGRICULTURAL STABILIZATION AND CONSERVATION SERVICE (AGRICULTURAL ADJUSTMENT), DEPARTMENT OF AGRICULTURE

SUBCHAPTER B—FARM MARKETING QUOTAS AND ACREAGE ALLOTMENTS

[Amdt. 1]

PART 722—COTTON

Subpart—Marketing Quota Regulations for the 1972 and Succeeding Crops of Extra Long Staple Cotton and Record-keeping Requirements for Extra Long Staple and Upland Cotton

1973 RATE OF PENALTY

The purpose of this amendment is to announce the rate of penalty applicable to excess extra long staple cotton produced in the 1973 crop year. This amendment is issued pursuant to the Agricultural Adjustment Act of 1938, as amended (52 Stat. 31), as amended (7 U.S.C. 1281 et seq.).

Under the Act, the penalty rate per pound on the farm marketing excess is equal to the higher of 50 percent of the parity price or 50 percent of the support price for extra long staple cotton as of June 15 of the calendar year in which the crop is produced.

Since the rate of penalty is simply a mathematical determination, it is hereby determined and found that the compliance with the notice, public procedure, and effective date requirements of 5 U.S.C. 553 is unnecessary and contrary to the public interest, and this amendment shall become effective August 3, 1973.

The regulations for Marketing Quotas for the 1972 and Succeeding Crops of Extra Long Staple Cotton and Record-keeping Requirements for Extra Long Staple and Upland Cotton (37 FR 25029) are amended as follows:

1. Section 722.73 is amended by adding a new paragraph (c)(2) to read as follows:

§ 722.73 **Rate of penalty.**

* * * * * * *

(c) * * *

(2) 1973 ELS cotton penalty rate is 44.4 cents per pound.

(Secs. 346, 347, 373, 375, 63 Stat. 674, as amended, 63 Stat. 675, as amended, 52 Stat. 65, 66, as amended, 7 U.S.C. 1346, 1347, 1373, 1375)

Effective date: August 3, 1973.

Signed at Washington, D.C., on July 27, 1973.

KENNETH E. FRICK,
Administrator, Agricultural Stabilization and Conservation Service.

CHAPTER IX—AGRICULTURAL MARKETING SERVICE (MARKETING AGREEMENTS AND ORDERS; FRUITS, VEGETABLES, NUTS), DEPARTMENT OF AGRICULTURE

[Lime Regulation 7]

PART 911—LIMES GROWN IN FLORIDA

Limitation of Handling

This regulation fixes the quantity of Florida limes that may be shipped to fresh market during the weekly regulation period August 5-11, 1973. It is issued pursuant to the Agricultural Marketing Agreement Act of 1937, as amended, and Marketing Order No. 911. The quantity of limes so fixed was arrived at after consideration of the total available supply of Florida limes, the quantity currently available for market, lime prices, and the relationship of season average returns to the parity price for Florida limes.

§ 911.107 **Lime Regulation 7.**

(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 911, as amended (7 CFR Part 911; 37 FR 10497), regulating the handling of limes grown in Florida, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), and upon the basis of the recommendations and information submitted by the Florida Lime Administrative Committee, established under the said amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of handling of such limes, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) The need for this regulation to limit the quantity of limes that may be marketed during the ensuing week stems from the production and marketing situation confronting the Florida lime industry.

(i) The committee has submitted its recommendation with respect to the quantity of limes which it deems advisable to be handled during the succeeding week. Such recommendation results from consideration of the factors enumerated in the order. The committee further reports the fresh market demand for limes is poor, with f.o.b. prices last week ranging from $1.25 to $1.40 per 10 lb. pony, down about 25 cents from the previous week. Fresh shipments for the weeks ended July 28, 1973, and July 21, 1973, were 27,967 bushels and 28,899 bushels, respectively.

(ii) Having considered the recommendation and information submitted by the committee, and other available information the Secretary finds that the quantity of limes which may be handled should be fixed as hereinafter set forth.

(3) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rulemaking procedure, and postpone the effective date of this regulation until 30 days after publication hereof in the FEDERAL REGISTER (5 U.S.C. 553) because the time intervening between the date when information upon which this regulation is based became available and the time when this regulation must become effective in order to effectuate the declared policy of the act is insufficient, and a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions hereof effective as hereinafter set forth. The committee held an open meeting during the current week, after giving due notice thereof, to consider supply and market conditions for Florida limes, and the need for regulation; interested persons were afforded an opportunity to submit information and views at this meeting; the recommendation and supporting information for regulation during the period specified herein were promptly submitted to the Department after such meeting was held; the provisions of this regulation, including its effective time, are identical with the aforesaid recommendation of the committee, and information concerning such provisions and effective time has been disseminated among handlers of such limes; it is necessary, in order to effectuate the declared policy of the act, to make this regulation effective during the period herein specified; and compliance with this regulation will not require any special preparation on the part of persons subject hereto which cannot be completed on or befort the effective date hereof. Such committee was held on July 31, 1973.

(b) *Order.* (1) The quantity of limes grown in Florida which may be handled during the period August 5, 1973 through August 11, 1973, is hereby fixed at 20,000 bushels.

(2) As used in this section, "handled" and "limes" have the same meaning as when used in said amended marketing agreement and order, and "bushel" means 55 pounds of limes.

(Secs. 1-19, 48 Stat. 31, as amended; 7 U.S.C. 601-674)

Dated: August 2, 1973.

CHARLES R. BRADER,
Acting Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc.73-16184 Filed 8-2-73;8:45 am]

[Lemon Regulation 597]

PART 910—LEMONS GROWN IN CALIFORNIA AND ARIZONA

Limitation of Handling

This regulation fixes the quantity of California-Arizona lemons that may be shipped to fresh market during the weekly regulation period August 5-11, 1973. It is issued pursuant to the Agricultural Marketing Agreement Act of 1937, as amended, and Marketing Order No. 910. The quantity of lemons so fixed was arrived at after consideration of the total available supply of lemons, the quantity of lemons currently available for market, the fresh market demand for lemons, lemon prices, and the relationship of season average returns to the parity price for lemons.

§ 910.897 **Lemon Regulation 597.**

(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 910, as amended (7 CFR Part 910), regulating the handling of lemons grown in California and Arizona, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), and upon the basis of the recommendations and information submitted by the Lemon Administrative Committee, established under the said amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of handling of such lemons, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) The need for this regulation to limit the quantity of lemons that may be marketed during the ensuing week stems from the production and marketing situation confronting the lemon industry.

(i) The committee has submitted its recommendation with respect to the quantity of lemons it deems advisable to be handled during the ensuing week. Such recommendation resulting from consideration of the factors enumerated in the order. The committee further reports the demand for lemons continues active, exceeding supplies on all sizes and grades. Average f.o.b. price was $5.69 per carton the week ended July 28, 1973, compared to $5.34 per carton the previous week. Track and rolling supplies at 152 cars were up 3 cars from last week.

(ii) Having considered the recommendation and information submitted by the committee, and other available information, the Secretary finds that the quantity of lemons which may be handled should be fixed as hereinafter set forth.

(3) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rulemaking procedure, and postpone the effective date of this regulation until 30 days after publication hereof in the FEDERAL REGISTER (5 U.S.C. 553) because the time intervening between the date when information upon which this regulation is based became available and the time when this regulation must become effective in order to effectuate the declared policy of the act is insufficient, and a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions hereof effective as hereinafter set forth. The committee held an open meeting during the current week, after giving due notice thereof, to consider supply and market conditions for lemons and the need for regulation; interested persons were afforded an opportunity to submit information and views at this meeting; the recommendation and supporting information for regulation during the period specified herein were promptly submitted to the Department after such meeting was held; the provisions of this regulation, including its effective time, are identical with the aforesaid recommendation of the committee, and information concerning such provisions and effective time has been disseminated among handlers of such lemons; it is necessary, in order to effectuate the declared policy of the act, to make this regulation effective during the period herein specified; and compliance with this regulation will not require any special preparation on the part of persons subject hereto which cannot be completed on or before the effective date hereof. Such committee meeting was held on July 31, 1973.

(b) *Order.* (1) The quantity of lemons grown in California and Arizona which may be handled during the period August 5, 1973 through August 11, 1973, is hereby fixed at 275,000 cartons.

(2) As used in this section, "handled", and "carton(s)" have the same meaning as when used in the said amended marketing agreement and order.

(Secs. 1-19, 48 Stat. 31, as amended; 7 U.S.C. 601-674)

Dated: August 2, 1973.

CHARLES R. BRADER,
Acting Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[Peach Reg. 13]

PART 919—PEACH GROWN IN MESA, COUNTY, COLORADO

Limitation of Shipments, Preamble

This regulation requires that Colorado peaches shipped to points outside of Colorado grade at least U.S. No. 1, and be at least 2⅛ inches in diameter during the period August 4, through September 30, 1973.

On July 24, 1973, notice of proposed rulemaking was published in the FEDERAL REGISTER (38 FR 19832), regarding a proposed regulation to be made effective pursuant to the marketing agreement and Order No. 919 (7 CFR Part 919), regulating the handling of peaches grown in the county of Mesa in the State of Colorado. This notice allowed interested persons 7 days during which they could submit written data, views, or arguments pertaining to this proposed regulation. None were submitted. The proposed regulation was recommended by the Administrative Committee established pursuant to the said marketing agreement and order. This program is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674).

This action reflects the Department's appraisal of the need for regulation, and of the crop and current and prospective market conditions. Shipments of peaches from the production area are expected to begin on or about August 4, 1973. The grade and size requirements provided herein are necessary to prevent the handling, on and after August 4, 1973, of any peaches which do not comply with such requirements, so as to provide consumers with good quality fruit, consistent with the overall quality of the crop, while providing producers a fair return pursuant to the declared policy of the act.

After consideration of all relevant matters presented, including the proposal set forth in the aforesaid notice, the recommendation and information submitted by the Administrative Committee, and upon other available information, it is hereby found that the limitation of handling of such peaches, as hereinafter provided, will tend to effectuate the declared policy of the act.

It is hereby further found that good cause exists for not postponing the effective date of this regulation until 30 days after publication in the FEDERAL REGISTER (5 U.S.C. 553) in that (1) notice of proposed rulemaking concerning this regulation, with an effective date as hereinafter specified, was published in the FEDERAL REGISTER (38 FR 19832), and no objection to this regulation or such effective date was received; (2) compliance with the regulation will not require any special preparation on the part of the persons subject thereto which cannot be completed by the effective time hereof; and (3) shipments of the current crop of such peaches are expected to begin on or about the effective date hereof and this regulation should be applicable, insofar as practicable, to all shipments of such peaches in order to effectuate the declared policy of the act.

§ 919.314 Peach Regulation 13.

(a) *Order.* During the period August 4, through September 30, 1973, no handler shall ship:

(1) Any peaches of any variety which do not grade at least U.S. No. 1;

(2) Any peaches of any variety which are of a size smaller than 2⅛ inches in diameter: *Provided,* That any lot of peaches shall be deemed to be of a size not smaller than 2⅛ inches in diameter (i) if not more than 10 percent, by count, of such peaches in such lot are smaller than 2⅛ inches in diameter; and (ii) if not more than 15 percent, by count, of the peaches contained in any individual container in such lot are smaller than 2⅛ inches in diameter.

(b) *Definitions.* As used herein, "peaches", "handler", "ship", and "variety" shall have the same meaning as when used in the aforesaid amended marketing agreement and order; "U.S. No. 1", "diameter", and "count", shall have the same meaning as when used in the United States Standards for Peaches (7 CFR 51.1210–51.1223).

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674).

Dated: July 31, 1973.

CHARLES R. BRADER,
Acting Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[Prune Reg. 11]

PART 925—FRESH PRUNES GROWN IN DESIGNATED COUNTIES IN IDAHO AND IN MALHEUR COUNTY, OREGON

Limitation of Shipments, Preamble

This regulation specifies the grade, size and container requirements on the handling of fresh Idaho-Oregon prunes during the period August 4, 1973, through August 31, 1974. Prunes would be required to grade at least U.S. No. 1, have a minimum size of 1¼ inches and the net weight of prunes in containers, other than the ½ bushel basket, would be either less than 20 pounds or more than 30 pounds.

Notice was published in the FEDERAL REGISTER on July 18, 1973 (38 FR 19129), that consideration was being given to proposals relative to limitations of shipments of fresh prunes recommended by the Idaho-Malheur County, Oregon Fresh Prune Marketing Committee, established under the marketing agreement and Order No. 925 (7 CFR Part 925), regulating the handling of fresh prunes grown in designated counties in Idaho and in Malheur County, Oregon, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674).

The notice afforded interested persons until July 24, 1973, to submit written data, views, or arguments in connection with said proposals. None were received.

After consideration of all relevant matters presented, including that in the notice and other available information, it is hereby found that the regulation, as hereinafter set forth, is in accordance with said marketing agreement and order and will tend to effectuate the declared policy of the act.

It is expected that ample supplies of desirable grades and sizes of fresh prunes will be available to the fresh market. The grade and size requirements set forth in the regulation are designed to prevent the handling, on and after August 4, 1973, of Italian prunes of lower grades and smaller sizes than hereinafter specified so as to provide consumers with good quality fruit, consistent with the overall quality of the crop, while improving returns to producers and providing orderly marketing conditions in the interest of producers and consumers, pursuant to the declared policy of the act.

The requirement that fresh prunes be handled in containers holding either less than 20 pounds or 30 pounds or more of prunes, with the exception of the one-half bushel basket, is necessary to standardize the capacities of containers that can be used to ship fresh prunes grown in the production area and prevent deception and misrepresentation of the net weight of prunes commonly contained in such containers. An exception is made for the one-half bushel basket as that container is customarily packed on a volume basis rather than on the basis of weight.

Individual shipments of 1,000 pounds or less of fresh prunes are exempted from regulation in that such shipments are primarily more mature prunes sold locally to fruit stands to fill a consumer need for fruit for home canning, and they do not materially affect the demand in commercial channels. Shipments of Moyer Perfecto and Empress varieties would be exempt from the grade, size, and container requirements of this section as well as the assessment and inspection provisions of the order because such varieties are of a type that does not compete, in the fresh fruit markets, with the principal varieties of Italian prunes.

It is hereby further found that good cause exists for not postponing the effective date of this regulation until 30 days after publication in the FEDERAL REGISTER (5 U.S.C. 553) in that (1) notice was given of the proposed regulation, to become effective August 4, 1973, through publicity in the production area and by publication in the July 18, 1973, issue of the FEDERAL REGISTER; (2) the effective date hereof will not require of handlers any preparation that cannot be completed prior thereto; (3) this regulation was unanimously recommended by members of the Idaho-Malheur County, Oregon Fresh Prune Marketing Committee in an open meeting at which all interested persons were afforded an opportunity to submit their views; and (4) shipments are expected to begin on or about August 4, 1973, and this regulation should, insofar as practicable, be applicable to all shipments of prunes in order to effectuate the declared policy of the act.

§ 925.312 Prune Regulation 11.

(a) *Order.* During the period August 4, 1973, through August 31, 1974, no handler shall handle any lot of Italian prunes except Moyer Perfecto and Empress varieties, unless such prunes meet the following applicable requirements, or are handled in accordance with (a) (3) of this section:

(1) *Minimum grade and size requirements.* Such prunes grade at least U.S. No. 1 and are a minimum size of 1¼ inches in diameter: *Provided,* That prunes which are affected by healed hail marks may be shipped if they otherwise grade at least U.S. No. 1.

(2) *Containers.* The net weight of prunes in any container, other than the one-half (½) bushel basket shall be either (1) less than 20 pounds, or (2) more than 30 pounds.

(3) Notwithstanding any other provision of this regulation, any individual shipment of prunes which, in the aggregate, does not exceed 1,000 pounds net weight may be handled without regard to the restrictions specified in this paragraph (a) of this section or in § 925.41 (Assessment) and § 925.55 (Inspection and Certification).

(4) The terms "U.S. No. 1", "diameter", and "hail marks" shall have the same meaning as when used in the United States Standards for Fresh Plums and Prunes (7 CFR 51.1520–51.1538); and terms used in the marketing agreement and order, shall when used herein, have the same meaning as is given to the respective term in the marketing agreement and order.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Dated July 31, 1973.

CHARLES R. BRADER,
Acting Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc.73-16131 Filed 8-2-73;8:45 am]

[Pear Regulation 3, Amendment 1]

PART 917—FRESH PEARS, PLUMS, AND PEACHES GROWN IN CALIFORNIA

Limitation of Shipments

This amended regulation, issued pursuant to the Marketing Agreement and Order 917 (7 CFR 917) requires all California Bartlett, Max-Red Bartlett, Red Bartlett, and Rosired Bartlett pears shipped in interstate commerce during the period July 5, 1973, through July 31, 1974, to grade at least U.S. Combination, with not less than 80 percent grading at least U.S. No. 1 grade. It also requires that such pears be not smaller than 165 size, except that not to exceed 5.263 percent may be smaller but not smaller than 180 size, and provides that containers of such pears shall be marked with the variety name or the words "unknown variety." The regulation is the same as that currently in effect in § 917.432 (Pear Regulation 3; 38 F.R. 17182). The action is necessary to assure that the pears shipped will be of suitable quality and size in the interest of consumers and producers. The proposed regulation was recommended by the Pear Commodity Committee established pursuant to the said amended marketing agreement and order. This program is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674).

Notice was published in the FEDERAL REGISTER issues of July 11 and 17, 1973 (38 FR 18467, 19047), that the Department was giving consideration to a proposal to amend § 917.432 (Pear Regulation 3, 38 FR 17182) effective pursuant to the marketing agreement, as amended, and Order No. 917, as amended (7 CFR Part 917), regulating the handling of fresh pears, plums, and peaches grown in California to extend the regulation through July 31, 1974. This notice allowed interested persons until July 23, 1973, to submit written data, views, or arguments for consideration relative to such proposed extension. No such comments were received in response to such notice. However, a letter from Placerville Fruit Growers Association dated July 6 was received after the initial regulation was issued. This letter requested that a regulation be issued which would permit shipment of pears meeting 75 percent U.S. No. 1 quality instead of limiting shipments to 80 percent U.S. No. 1 quality as recommended by the committee so as to accommodate shipment of pears affected by russeting from Eldorado County.

This request was carefully and fully considered along with the information contained in the aforesaid letter, the information submitted by the committee, and other available data bearing on the situation. The Bartlett pear crop in the Pacific Coast States is forecast at 521,000 tons compared with 438,000 tons last year. The carryin stocks of practically all canned fruits are at low levels. Carryin stocks of pears are about a third less than last year and fruit cocktail nearly 50 percent less. Hence, the demand in the processing outlet which normally takes in excess of 75 percent of the Bartlett pear crop is extremely favorable. Pears affected by russeting are objectionable to consumers in the fresh market, and growers generally dispose of pears so affected in processing outlets in which russeting is not objectionable. Ample supplies of pears meeting requirements set forth in the notice are available from this large crop. Therefore it is concluded that the amendment as specified in said notice is appropriate for the supply and market situation expected to prevail during the pear shipping season. Said amendment will tend to assure consumers of an adequate supply of acceptable quality pears and maintain grower returns at a level consistent with the public interest, and it is hereby found that the limitation of handling of such pears, as hereinafter provided, will tend to effectuate the declared policy of the act.

It is hereby further found that good cause exists for not postponing the effective date of this regulation until 30 days after publication in the FEDERAL REGISTER (5 U.S.C. 553) in that (1) shipments of such pears are expected to continue on and after the expiration date of the existing regulation and such regulation should be applicable to all shipments made during the season in order to effectuate the declared policy of the act; (2) notice of proposed rule making concerning this amendment with an effective date as hereinafter specified, was published in the FEDERAL REGISTER (38 FR 18467, 19047); (3) the regulatory requirements are the same as those currently in effect; and (4) compliance with this amended regulation will not require any special preparation on the part of the persons subject thereto which cannot be completed by the effective time hereof.

Order. § 917.432 paragraph (a) is hereby amended to read as follows:

§ 917.432 Pear Regulation 3.

(a) *Order.* During the period July 5, 1973, through July 31, 1974, no handler shall ship:

* * * * * *

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Dated: July 31, 1973.

CHARLES R. BRADER,
Acting Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

CHAPTER XIV—COMMODITY CREDIT CORPORATION, DEPARTMENT OF AGRICULTURE

SUBCHAPTER B—LOANS PURCHASES, AND OTHER OPERATIONS

[1973-Crop Distress Grain Loan Program Regs.]

PART 1473—DISTRESS LOANS

Subpart—1973-Crop Distress Grain Loan Program

This subpart issued by the Commodity Credit Corporation contains the terms and conditions under which recourse, distress loans will be made available on 1973-crop barley, corn, grain sorghum, oats, rye, and wheat stored on the ground.

The Commodity Credit Corporation has issued regulations making its regu-

V 38-149 AUG 3 73 XUM

lar price support loan and purchase program available for the 1973 crops of barley, corn, grain sorghum, oats, rye, and wheat. The distress loan program set forth in this subpart is an adjunct to the regular price support loan and purchase program. The distress loan program, which will be put into effect in areas where storage is temporarily unavailable, is designed to assist producers in holding their grain until they can market it in usual channels or qualify for nonrecourse loans under the regular CCC price support loan and purchase program.

Since this is a temporary emergency program which must be made effective immediately, it is hereby found and determined that compliance with the notice of proposed rule making procedure is unnecessary, impracticable and contrary to the public interest. Therefore, this subpart is being issued without following such proposed rule making procedure and shall be effective upon filing with the Office of the Federal Register.

Sec.
1473.1 Administration.

1473.15 Personal liability of the producer.
1473.16 Loan rates.
1473.17 Maturity of loans.
1473.18 Settlement.
1473.19 Foreclosure.

AUTHORITY: Secs. 4 and 5, 62 Stat. 1070, as amended; 15 U.S.C. 714b and c.

§ 1473.1 Administration.

(a) *General statement.* This subpart contains the terms and conditions under which the Commodity Credit Corporation will make recourse distress loans (hereinafter called loans) on 1973-crop barley, corn, grain sorghum, oats, rye, and wheat piled on the ground or stored in temporary facilities. As used in this subpart, "CCC" means the Commodity Credit Corporation, and "ASCS" means the Agricultural Stabilization and Conservation Service of the U.S. Department of Agriculture.

(b) *Responsibility.* The Grain Division, ASCS will administer the regulations in this subpart under the general supervision and direction of the Deputy Administrator, Programs, ASCS, in accordance with program provisions and policy determined by the Board of Directors and the Executive Vice President, CCC. In the field, the regulations in this subpart will be administered by the State and County Agricultural Stabilization Committees (hereinafter called State and county committees), ASCS Commodity Offices and the ASCS Data Processing Center.

(c) *Documents.* Any member of the county committee, the county executive director, or other employee of the county ASCS office (hereinafter called county office) designated in writing by the county executive director to act in his behalf (such delegation to be filed in the county office) is authorized to approve documents under this program except where otherwise specified in the regulations in this subpart. He may also execute releases or otherwise obtain the release of record of chattel mortgages and security agreements made to CCC to secure loans upon payment in full of the loan involved. He may execute indemnity agreements on behalf of CCC where any county recording officer deems such indemnity agreement necessary to releasing a mortgage or security agreement of record.

(d) *Limitation of authority.* County executive directors, State and county committees, ASCS commodity offices, the ASCS Data Processing Center, and employees thereof, do not have authority to modify or waive any of the provisions of the regulations in this subpart.

(e) *State committee.* The State committee may take any action authorized or required by the regulations in this subpart to be taken by the county committee which has not been taken by such committee. The State committee may also (1) correct or require a county committee to correct any action taken by such county committee which is not in accordance with the regulations in this subpart, or (2) require a county committee to withhold taking any action which is not in accordance with the applicable regulations in this subart.

(f) *Executive Vice President, CCC.* No delegation herein to a State or county committee, an ASCS commodity office, or the Data Processing Center shall preclude the Executive Vice President, CCC or his designee, from determining any question arising under the regulations in this subpart or from reversing or modifying any determination made by a State or county committee, an ASCS commodity office, or the ASCS Data Processing Center.

§ 1473.2 Availability of loans.

(a) *Areas.* In areas designated by the State committee, loans to eligible producers shall be available on 1973-crop barley, corn, grain sorghum, oats, rye, and wheat (hereinafter jointly called "grain") stored on or off the farm either (1) on the ground, or (2) in temporary facilities, except that, in areas where the State committee determines it is not feasible safely to store grain on the ground, it may authorize loans only on grain stored in temporary facilities. Producers may obtain at the county office information as to areas where loans are available.

(b) *Requesting loans.* Producers should make requests for loans at the county office which keeps the farm program records for the farm.

(c) *Period of availability.* Loans will be available in any area designated by the State committee beginning with the date the program for the area is announced by the State committee. The final date of availability of loans in any such area shall be 30 calendar days after the program is announced for the area, or 30 calendar days after the producer completes harvest of the grain tendered for loan, whichever is later. Whenever the final date of availability or the maturity date of the loan falls on a nonworkday for the county office, the applicable final date shall be extended to include the next workday.

(d) *Completion of applicable loan documents.* To obtain a loan, the producer must sign and deliver to the county office, not later than the final date of availability for loans, a Form CCC-677, "Farm Storage Note Chattel Mortgage and Security Agreement" and a "Supplemental Terms and Conditions to Farm Storage Note, Chattel Mortgage and Security Agreement".

§ 1473.3 Disbursement of loans.

Disbursement of loans will be made to producers by county offices by drafts drawn on CCC or by credit to the producer's account. The producer shall not present the loan documents for disbursement unless the grain covered by the mortgage is in existence and in good condition. If the grain was not in existence and in good condition at the time of disbursement, the total amount disbursed under the loan shall be refunded promptly by the producer.

§ 1473.4 Eligible producer.

(a) *Producer.* An eligible producer shall be an individual, partnership, association, corporation, estate, trust, State or political subdivision or agency thereof, or other legal entity (1) which produced the grain tendered for loan as landowner, landlord, tenant, sharecropper, and (2) which meets the other requirements for eligibility for loans contained in this subpart.

(b) *Producers of barley, corn, grain sorghum, and wheat.* To be eligible for a loan on barley, corn, grain sorghum, or wheat, producers must meet the compliance requirements set forth in the CCC 1973 crop barley, corn, grain sorghum, and wheat loan and purchase program supplements respectively (Part 1421 of this title).

(c) *Estates and trusts.* A receiver or trustee of an insolvent or bankrupt debtor's estate, an executor or an administrator of a deceased person's estate, a guardian of an estate of a ward or an incompetent person, and trustees of a trust estate shall be considered to represent the insolvent or bankrupt debtor, the deceased person, the ward or incompetent, and the beneficiaries of a trust, respectively, and the production of the receiver, executor, administrator, guardian, or trustee shall be considered to be the production of the person or estate he represents. Loan documents executed by any such person will be accepted by CCC only if they are legally valid and such person has the authority to sign the applicable documents.

(d) *Eligibility of minors.* A minor who is otherwise an eligible producer shall be eligible for a loan only if he meets one of the following requirements: (1) The right of majority has been conferred on him by court proceedings or by statute; (2) a guardian has been appointed to manage his property and the applicable loan documents are signed by the guardian; (3) any note signed by the minor is cosigned by a financially responsible person; or (4) a bond is furnished under which a surety guarantees to protect CCC from any loss incurred for which the minor would be liable had he been an adult.

(e) *Beneficial interest.* To be eligible for a loan, the beneficial interest in the grain must be in the producer tendering the grain as security for a loan and must always have been in him or in him and a former producer whom he succeeded before it was harvested, except that heirs who (1) succeed to the beneficial interest of a deceased producer, and (2) assume the decedent's obligation under a loan if a loan has already been obtained shall be eligible for loans as producers whether such succession occurs before or after harvest of the grain. A producer shall not be considered to have divested himself of the beneficial interest in the grain if he enters into a contract to sell, or gives an option to buy his grain if, under the contract or option, he retains control and risk of loss and title to the grain subject to such agreements, and retains control of its production.

(f) *Succession of interest.* To meet the requirements of succession to the beneficial interest of a former or deceased producer under paragraph (e) of this section, the rights, responsibilities and interests of the former producer with respect to the farming unit on which the grain was produced shall have been substantially assumed by the person claiming succession. Mere purchase or inheritance of a crop prior to harvest without acquisition of any additional interest in the farming unit on which the crop is produced does not constitute succession to such beneficial interest.

(g) *Joint loans.* Two or more eligible producers who have an interest in eligible grain which is the production from a farm and is stored in accordance with § 1473.5 may obtain a joint loan on such grain. Each producer who is a party to the joint loan will be jointly and severally responsible for the obligations set forth in the loan documents and the regulations in this subpart.

§ 1473.5 Eligible grain.

General. To be eligible for a loan, the grain tendered shall be stored identity preserved, except, that grain may be stored commingled outside at a warehouse; Provided, the producer furnishes weight tickets or other evidence of the quantity he contributed. Weight tickets on commingled grain must be certified by the warehouseman or other responsible persons as to the quantity and location. Storage must meet the requirements of § 1473.6 and the grain shall meet the eligibility requirements for the applicable commodity appearing in the following sections of Part 1421 of this chapter: Barley § 1421.51(a); Corn § 1421.91(a); Grain Sorghum § 1421.211(a); Oats § 1421.247(a); Rye § 1421.337(a); and Wheat § 1421.461(a).

§ 1473.6 Storage.

(a) *Temporary storage.* Temporary storage facilities shall be facilities which the county office determines to be suitable for the temporary storage of grain.

(b) *Ground storage.* Grain piled on the ground shall be protected from animals and shall be located on ground which will afford maximum protection from water drainage.

§ 1473.7 Determination of quantity.

The quantity of grain tendered for loan shall be estimated by the county office or weight tickets for commingled grain stored outside at a warehouse furnished by the producer. Measurements, threshing records, and other guides shall be used in making the estimate to the extent that they are practicable or available. Loans shall be made on the quantity of grain so determined. The quantity of grain delivered to CCC shall be determined by weight.

§ 1473.8 Liens.

If there are any liens or encumbrances on the grain, waivers that will fully protect the interest of CCC must be obtained even though the liens or encumbrances are satisfied from the loan proceeds. Notwithstanding the foregoing provisions, in lieu of waiving his prior lien on grain tendered as security for a loan, a lienholder may execute a Lienholder's Subordination Agreement (Form CCC-864) with CCC in which he subordinates his security interest to the rights of CCC in the grain subject to the loan or such other quantity of the grain as is delivered in satisfaction of a loan. No additional liens or encumbrances shall be placed on the grain after the loan is approved.

§ 1473.9 Fees and charges.

(a) *Loan service fee.* A producer shall pay a loan service fee of $8 for each loan disbursed. The loan service fee is not refundable.

(b) *Delivery charge.* A delivery charge, in addition to the loan service fee, shall be paid by producers on the quantity of grain delivered to CCC. The rate is one-half cent per bushel for barley, corn, oats, rye, and wheat and 1 cent per hundredweight for grain sorghum. The delivery charge shall be paid at time of settlement.

§ 1473.10 Setoffs.

The proceeds of the loan shall be applied against any indebtedness of the producer to CCC or any other agency of the United States in accordance with the provisions of § 1421.15 of Part 1421 of this chapter.

§ 1473.11 Interest rate.

Loans shall bear interest at the same rates as those announced for regular nonrecourse loans in a separate notice published in the FEDERAL REGISTER, 38 FR 3614.

§ 1473.12 Release of grain under loan.

(a) *Obtaining release.* A producer shall not remove any collateral covered by a chattel mortgage until he has received prior written approval for such removal from the county committee on a form prescribed by CCC. A producer may at any time obtain release of all or part of the grain remaining under loan by paying to CCC the amount of the loan made with respect to the quantity of the grain released plus interest. When the proceeds of the sale of the grain are needed to repay a loan, the producer must request and obtain prior written approval of the county office on a form prescribed by CCC to remove a specified quantity of the grain from storage. Any such approval shall be subject to the terms and conditions set out in the applicable form, copies of which may be obtained by producers at the county office. Any such approval shall not constitute a release of CCC's security interest in the grain or release the producer from liability for any amounts due on his loan indebtedness if full payment of such amounts is not received by the county office.

(b) *Release of chattel mortgage.* The chattel mortgage shall not be released until the loan has been satisfied in full. After satisfaction of a loan, the county executive director shall release the chattel mortgage.

§ 1473.13 Insurance.

CCC does not require the producer to insure the grain placed under a loan; however, if the producer insures such grain and an indemnity is paid thereon, such indemnity shall inure to the benefit of CCC to the extent of its interest after first satisfying the producer's equity in the grain involved in the loss.

§ 1473.14 Losses in quantity or quality.

CCC will not assume losses in quantity or quality of the grain under loan resulting from any cause.

§ 1473.15 Personal liability of the producer.

The personal liability of the producer to CCC for fraud or other reasons stated in § 1421.17 of Part 1421 in connection with a loan shall be the same as the personal liability of the producer in connection with a farm-storage loan as prescribed in paragraphs (a), (c), (d), (e), and (f) of such § 1421.17, except that the loan settlement value referred to in such section shall be the settlement value as determined under § 1473.18.

§ 1473.16 Loan rates.

Loans will be made under this program at 75 percent of the basic county loan rate for the applicable commodity established for the county in which the grain is stored under the regular 1973-crop price support loan and purchase programs, 7 CFR Part 1421. Such rates appear in the following sections of Part 1421 of this chapter: Barley—§ 1421.75; Corn—§ 1421.116; Grain Sorghum—§ 1421.239; Oats—§ 1421.274; Rye—§ 1421.237; and Wheat—§ 1421.489.

V 38-149 AUG 3 73 XUM

§ 1473.17 Maturity of loans.

Loans mature on demand, but not later than 90 days from the date the loan is disbursed.

§ 1473.18 Settlement.

Loans are recourse loans and the principal of a loan plus interest must be paid on or before maturity. Loans shall be satisfied in accordance with the provisions contained in this section.

(a) *Producer obtains nonrecourse loan.* A producer, on or before maturity of the loan, may, with approval of the county committee, place his commodity in eligible farm or warehouse storage and, if he and the commodity are eligible therefor, obtain a regular nonrecourse price support loan from CCC under the applicable loan and purchase regulations, 7 CFR 1421. When the nonrecourse loan is made, the principal on the loan made under this subpart plus accrued interest shall be paid in full either in cash or out of the proceeds of the nonrecourse loan.

(b) *Producer delivers commodity to CCC.* If, on maturity, repayment has not been made and the producer delivers the grain under loan to CCC, delivery of the grain to CCC shall be made in accordance with instructions issued by the county office. When the grain is delivered to CCC, credit shall be given to the producer for the quantity and quality of the grain actually delivered, at the market price at the time and place of delivery, as determined by CCC: *Provided, however,* That if such grain is sold by CCC in order to determine the market price, the settlement value shall not be less than such sales price. If the amount of such credit exceeds the amount due on the principal of the loan plus interest, the amount of the excess shall be paid to the producer by the county office. If the amount of such credit is less than the amount due on the principal of the loan plus accrued interest, the amount of the deficiency shall be paid by the producer to CCC. Any payment which would be due to the producer under any agricultural program administered by the Secretary of Agriculture, or any other payments which are due or may become due the producer from CCC or any other agency of the United States, may be set off against such deficiency.

(c) *Producer repays distress loan.* If the producer does not obtain a nonrecourse loan or deliver the grain to CCC, he must repay in cash the principal due on the loan plus accrued interest.

(d) *Handling payments and collections not exceeding $3.* In order to avoid administrative costs of making small payments and handling small accounts, amounts of $3 or less which are due the producer will be paid only upon his request. Deficiencies of $3 or less, including interest, may be disregarded unless demand for payment is made by CCC.

§ 1473.19 Foreclosure.

If the distress loan is not satisfied upon maturity, the regulations in § 1421.24 with respect to foreclosure shall apply.

Effective date: August 2, 1973.

Signed at Washington, D.C., on: July 27, 1973.

KENNETH E. FRICK,
Executive Vice President,
Commodity Credit Corporation.

[FR Doc.73-16029 Filed 8-2-73;8:45 am]

Proposed Rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rulemaking prior to the adoption of the final rules.

ENVIRONMENTAL PROTECTION AGENCY

[40 CFR Part 52]

APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

Transportation Control Measures; Correction

In the transportation control regulations proposed on July 2 and 3, 1973 for pre-construction review of parking facilities in the Los Angeles area of California, the Trenton and Philadelphia areas of New Jersey, and the Houston-Galveston, San Antonio, and Dallas-Fort Worth areas of Texas, a definition of "commenced" was inadvertently proposed which is at variance with the definition in 40 CFR 52.01, published in 37 FR 19807 (September 22, 1972). Wording consistent with other proposed regulations for parking facilities is given herein as the proposal for these three States.

In the aforementioned areas, and in the Minneapolis area of Minnesota, the proposed regulations specify that the requirement for pre-construction review will be effective upon promulgation (or, in the case of New Jersey, upon proposal). It is the Agency's intention that any such regulation be effective on August 15, 1973, regardless of the date of proposal or promulgation. Therefore, wording consistent with other proposed regulations is given herein as the proposal for these four States.

This notice of proposed rulemaking is issued under the authority of section 110 (c) and section 301(a) of the Clean Air Act. (42 U.S.C. 1857 et seq.)

Dated: July 31, 1973.

ROBERT W. FRI,
Acting Administrator.

SUBPART F—CALIFORNIA

1. The document proposing to revise Part 52 of Chapter I of Title 40 of the Code of Federal Regulations, published in the Federal Register on July 2, 1973, at 38 FR 17686, is corrected by changing § 52.244(a)(4) to read as follows:

(4) "Commenced" means that an owner or operator has undertaken a continuous program of construction, modification, or enlargement.

2. The document proposing to revise Part 52 of Chapter I of Title 40 of the Code of Federal Regulations, published in the Federal Register on July 2, 1973, at 38 FR 17686, is corrected by changing the words "after the date of this regulation" to read "after August 15, 1973" in § 52.244(c).

SUBPART Y—MINNESOTA

3. The document proposing to revise Part 52 of Chapter I of Title 40 of the Code of Federal Regulations, published in the FEDERAL REGISTER on July 2, 1973, at 38 FR 17702, is corrected by adding to § 52.1231(a) a new subparagraph (3) as follows:

(3) "Commenced" means that an owner or operator has undertaken a continuous program of construction, modification, or enlargement.

4. The document proposing to revise Part 52 of Chapter I of Title 40 of the Code of Federal Regulations, published in the FEDERAL REGISTER on July 2, 1973, at 38 FR 17702, is corrected by changing the number "(3)" to the letter "(b)", the number "(i)" to the number "(1)", and the number "(ii)" to the number "(2)" in § 52.1231, and by changing the words "the promulgation date of this regulation" to "August 15, 1973" in both instances in which it appears in § 52.1231.

SUBPART FF—NEW JERSEY

5. The document proposing to revise Part 52 of Chapter I of Title 40 of the Code of Federal Regulations, published in the FEDERAL REGISTER on July 3, 1973, at 38 FR 17790, is corrected by changing § 52.1590(a)(4) to read as follows:

(4) "Commenced" means that an owner or operator has undertaken a continuous program of construction, modification, or enlargement.

6. The document proposing to revise Part 52 of Chapter I of Title 40 of the Code of Federal Regulations, published in the FEDERAL REGISTER on July 3, 1973, at 38 FR 17790, is corrected by changing the words "after the date of this proposed regulation" to read "after August 15, 1973" in § 52.1590(c).

SUBPART SS—TEXAS

7. The document proposing to revise Part 52 of Chapter I of Title 40 of the Code of Federal Regulations, published in the FEDERAL REGISTER on July 3, 1973, at 38 FR 17811, is corrected by changing § 52.2295(a)(4) to read as follows:

(4) "Commenced" means that an owner or operator has undertaken a continuous program of construction, modification, or enlargement.

8. The document proposing to revise Part 52 of Chapter I of Title 40 of the Code of Federal Regulations, published in the FEDERAL REGISTER on July 3, 1973, at 38 FR 17811, is corrected by changing the words "after the effective date of this section" to read "after August 15, 1973" in § 52.2295(c).

[FR Doc.73-16044 Filed 8-2-73;8:45 am]

[40 CFR Part 52]

APPROVAL AND PROMULGATION OF STATE IMPLEMENTATION PLANS

Opportunity for Public Comment on Proposed Transportation and/or Land Use Control Strategies

On June 15, 1973, pursuant to section 110(a) of the Clean Air Act and 40 CFR Part 51, the Administrator announced his partial approvals and partial disapprovals of State transportation control plans for implementation of the national ambient air quality standards. This was published in the FEDERAL REGISTER on June 22, 1973 (38 FR 16550).

In accordance with the decision of the Court of Appeals for the District of Columbia Circuit in *Natural Resources Defense Council, Inc., et al. v. Environmental Protection Agency* (Civil Action No. 72-1522), the Administrator is required to promulgate a plan where a State plan is deficient, by August 15, 1973. If, prior to promulgation, a State has adopted and submitted a plan or revision which the Administrator determines to be in accordance with applicable requirements, the State plan will be approved in lieu of promulgation. (Section 110(c) of the Clean Air Act.)

In its order, the court stated that the Administrator shall permit the public to comment on the State transportation control strategies and on the request by the Governor of any State, pursuant to section 110(e) of the Clean Air Act, for an extension of the date for attainment of a primary ambient air quality standard.

This notice is issued to advise the public that revisions for the proposed implementation plans for the State of Colorado and for the District of Columbia have been received by the Environmental Protection Agency and that comments may be submitted on whether the proposed plans, as revised, should be approved or disapproved by the Administrator under section 110(a) of the Clean Air Act. Only comments received on or before August 24, 1973. Notice of opportunity to comment on State plans has been published previously on April 24, April 27, May 4, June 1, June 22, and July 18, 1973.

More detailed descriptions are set forth below.

DISTRICT OF COLUMBIA

A control strategy for the attainment and maintenance of the national standards for carbon monoxide and photochemical oxidants in the National Capital Interstate Air Quality Control Region was submitted by the Mayor of the District of Columbia on April 20, 1973. The

V 38-149 AUG 3 73 XUM

plan was approved in part on June 15, 1973. 38 FR 16550 (June 22, 1973). However, the absence of sufficient detail on regulatory, administrative, and enforcement aspects of some strategies, plus the unlikely availability of others, precluded full approval.

Supplemental information to correct the deficiencies was received on July 9, 1973, including a request for two-year extension of the date for attainment of the primary standards.

On July 16, 1973, the District of Columbia submitted additional supplemental information on enforcement procedures, administrative details, proposed regulations for various strategies, and designation of agencies to perform various functions, as well as cross references showing where other details may be found in the April 1973 submission. A copy of a Council of Governments study on Bus Priority Lanes for the Washington Metropolitan Area was included as an appendix, although apparently not as a commitment to the corridors recommended in the study, inasmuch as the D.C. material on July 9, 1973, designates the corridors selected by the District for bus lanes.

Copies of the supplemental information are available for inspection at Room 213, Environmental Protection Agency, Region III, 6th and Walnut Streets, Philadelphia, Pennsylvania 19106, at Room 329, Environmental Protection Agency, 401 M Street, SW., Washington, D.C. 20460, and at the Bureau of Air and Water Quality Control, 25 K Street, N.E., Washington, D.C.

COLORADO

Control strategies for the attainment and maintenance of the national standards for carbon monoxide and photochemical oxidants in the Metropolitan Denver Intrastate Air Quality Control Region were submitted by the Governor of Colorado on June 4, 1973, dated May 25, 1973, including a request for a two-year extension for attainment of the primary standards. The plan could not be approved on June 15, 1973, due to lack of sufficient time for public comment. 38 FR 16550 (June 22, 1973).

On July 16, 1973, the Governor of Colorado submitted a letter containing supplemental information confirming the intent of the State of Colorado to undertake certain control measures set forth in the plan submitted earlier, containing copies of certain existing legal authority, containing copies of proposed regulations, and setting forth other information.

Copies of the supplemental information are available for inspection at the Environmental Protection Agency, Office of Public Affairs, Region VIII, Lincoln Towers Building, Suite 900, 1860 Lincoln Street, Denver, Colorado 80203, at Room 329, Environmental Protection Agency, 401 M Street, SW, Washington, D.C. 20460, and at the Colorado Department of Health, 4210 East 11th Street, Denver, Colorado.

Dated: July 30, 1973.

ROBERT W. FRI,
Acting Administrator.

[40 CFR Part 202]

NOISE ABATEMENT

Interstate Motor Carrier Noise Emission Standards

Correction

In FR Doc. 73-15500 appearing at page 20102 in the issue of Friday, July 27, 1973, in the second complete paragraph in the third column on page 20105, the date "July 27, 1973" in the second line, should read "September 10, 1973".

INTERSTATE COMMERCE COMMISSION

[49 CFR Part 1310]

[Docket No. 35867]

COMMON CARRIERS OF PROPERTY BY MOTOR VEHICLE AND WATER

Construction, Filing, and Posting of Tariffs

At a session of the Interstate Commerce Commission, Division 2, held at its office in Washington, D.C., on the 5th day of July 1973.

In this proceeding we propose to consider the revision of existing regulations which govern the construction, filing, and posting of tariffs of common carriers of property by motor vehicle and tariffs of common carriers of property by water which contain joint motor-water rates or provisions governing such rates. The present regulations are published in Tariff Circular MF No. 3 (49 CFR Part 1307, Subpart B). The proposed regulations will be published in proposed Tariff Circular No. MF 5 (49 CFR Part 1310) and are set forth below without explanation of each individual change. We believe the nature and purpose of each proposed change will be readily understood by those conversant with the present regulations.

Changes are proposed in almost all existing rules. Many changes are of a very substantial or important nature. A list of those which we consider to be the most substantial or important follows, but it should be understood that it may not include some change which for a particular reason a person or persons might view as substantial or important. Other than these, changes have not been listed.

LIST OF PROPOSED CHANGES OF A SUBSTANTIAL OR IMPORTANT NATURE

1. *Loose-leaf tariffs.* (a) Neither loose-leaf tariffs nor loose-leaf page amendments or supplements to such tariffs will be accepted for filing after January 1, 1979. See §§ 1310.4(a) and 1310.10(a). (Presently there is no prohibition.)

(b) Printing will be permitted on one side of the sheet or both sides. See § 1310.4(f). (Now a sheet may be printed on only one side.)

(c) Expansion of a page number will be restricted to whole numbers and single letter suffixes. When the sheet is printed on both sides, only the higher numbered of the pages printed thereon will be permitted to be expanded. See § 1310.10(d)(7). (Now fractions, decimals, and multiple-letter suffixes are not referred to specifically.)

(d) The number of sheets containing pages canceled from the tariff will be subject to a maximum of five times the number of sheets containing effective tariff matter. See § 1310.10(d)(9). (Now there is no restriction.)

(e) The filing of a blanket page will be permitted to transfer all provisions from or reflect the cancellation of five or more pages. See § 1310.10(d)(12). (Present regulations require issuance of individual pages.)

(f) The updated check sheet system (one or more pages always showing listing of all current pages comprising the tariff) method will be required. See §§ 1310.6(b) and 1310.10(d)(13). (Now either this method or the "correction number check-off" method is authorized.)

(g) Numbers of pages, except title pages, will be required to be shown in the upper corner opposite the binding edge corner. See § 1310.4(f)(4). (The present regulations require the showing of the page numbers in the upper left corner, but Special Permission 20899-M authorizes their showing in the upper right corner.)

2. *Bound tariffs.* (a) The filing of a supplement will be prohibited to a tariff that has been in effect for eight years. See § 1310.9(d). (Now there is no prohibition.)

(b) An updated list of items and units in effective supplements will be required in all regular supplements of eight or more pages. See § 1310.9(b). (There is no present requirement.)

(c) The supplemental requirements of incorporated Special Permission M-70560 are liberalized to permit original tariffs containing 501 to 800 pages to have in effect one additional supplement and to permit original tariffs containing 801 or more pages to have two additional supplements. The unlimited additional supplements are in lieu of one additional supplement of not to exceed four pages. See § 1310.9(d). (Rail carriers are authorized to maintain such additional supplements by Special Permission 71-906.)

(d) Carriers and agents will be permitted to file "periodical tariffs" not less frequently than once a year. These tariffs will be permitted to be supplemented without regard to any limitation as to the number of pages in the effective supplements. See § 1310.9(d)(3). (Motor carriers now have no authority to file such tariffs, but rail carriers do under rule 9(f) of supplement 8 to Tariff Circular 20.)

(e) The filing of a blanket supplement (a common supplement issued jointly to several tariffs of the same agent or carrier) to not less than five tariffs will be permitted. See § 1310.9(g). (Now special permission authority must be obtained before a blanket supplement may be filed.)

(f) Partial amendments will be permitted to numbered items containing many types of provisions (not rates or rules). See § 1310.10(c)(6). (Rail carriers are authorized by Special Permission 70-258 to partially amend numbered items in tariffs published by computer. This extends the coverage to motor carriers' tariffs regardless of whether or not they are published by computer.)

(g) Partial amendments will be permitted to rate tables and rate base number tables comprising more than two pages. See § 1310.10(c)(7). (There is no authority now for the publication of such partial amendments.)

(h) The use of items, with item numbers, will be required to the greatest extent possible. The use of index numbers and rule numbers for tariff provisions will be prohibited. See § 1310.4(h). (The present rules provide that the use of item numbers are permissive.) The trend in tariffs has been in this direction.

3. *Suspensions.* (a) The reproduction of portions of the suspension order itself in the suspension supplement will no longer be required. See § 1310.14(c).

(b) A notice of 10 days and an effective date will be required in connection with a statement of cancellation in a suspension notice of suspended matter reissued without change prior to the filing of the suspension notice. See § 1310.14(d).

(c) Tariff matter (providing changes) which violates an investigation and suspension order because it was enroute to the Commission at the time of the suspension will be permitted to be amended on ten days' notice to bring it into compliance. See § 1310.14(e). (Now special permission authority must be obtained to correct the defective matter or the publication is subject to rejection.)

(d) When a tariff, supplement, item, unit, or loose-leaf page which contains suspended matter is reissued, the proposed rules will require that the suspended matter be brought forward without change and that the superseded publication, item, or unit shall be canceled in its entirety. See § 1310.14(f). (Publishers now may use this method under authority of Special Permission M-89600. Otherwise, they must comply with the provisions of the third paragraph of rule 10(c) of Tariff Circular MF No. 3, which provides that the reissue shall cancel the tariff or supplement "except portions under suspension.") This is a benefit to all tariff users as well as publishers.

(e) If, after suspended matter has become effective and the matter held in force has been canceled or has expired, the Commission orders the suspended matter canceled, the carrier or agent will be permitted to restore the matter held in force (subject to whatever changes, if any, lawfully made in the interim, except for the cancellation) effective concurrently with the effectiveness of the cancellation of the matter ordered canceled and upon the same notice. See § 1310.14(k).

4. *Adoptions.* (a) The filing of a combined adoption notice and adoption supplement will be required by the new carrier when at least one tariff of the old carrier's (or its predecessor's) issue is adopted in whole or in part. See § 1310.25(f) and (g). (Now an individual adoption notice and a separate adoption supplement for each such tariff adopted is required.) This reduces the paperwork and has benefits for the tariff user.

(b) The filing of a supplement will be prohibited after one year from the effective date of the adoption to a tariff of the old carrier's (or predecessor's) issue which has been adopted in whole or in part. See § 1310.25(j). (There is no present prohibition.)

(c) The filing of adoption publications will no longer be required from receivers, trustees, or other officials appointed by a court. See § 1310.25(n).

(d) When an adoption is in part, the new carrier will be required to issue new powers of attorney or concurrences at the same time it issues the adoption publications. See § 1310.25(o)(2). (The present rules do not specifically provide for this situation.)

(e) When the adoption is in part, the new carrier will be required to amend the old carrier's tariff to announce the partial adoption thereof and to cancel therefrom rates and provisions which belong to the new carrier by virtue of the adoption. Two supplement numbers will be reserved for these purposes. See §§ 1310.25(f), (g)(2), and (s). (Now the old carrier must file the adoption supplement to its tariff and cancel rates and provisions owned by the new carrier.) This helps the new carrier to transfer adopted rates to its own tariffs.

5. *Concurrences or powers of attorney.* (a) The designation "F" will be substituted for "MFX" on the prescribed concurrence or power of attorney forms. See § 1310.27. This adopts the same letters as the rails use.

(b) Carriers will be permitted to withhold authority in their powers of attorney to publish any increases or general increases. See § 1310.27(b)(4). (The present rules contain no specific provision.) This makes specific a present interpretation.

(c) The restriction is removed which prohibits a carrier from issuing a tariff in which it is shown as an intermediate carrier, the same as applies to rail carriers. See § 1310.27(c).

(d) A carrier or agent to which a concurrence or power of attorney is issued will be permitted to notify the Commission that it no longer wishes to retain or exercise the authority and that the authority shall have no further force or effect. See § 1310.27(p)(7). (Now there is no rule covering this and agents and carriers must retain old effective instruments indefinitely until the issuing party revokes.)

6. When a receipted copy of a letter of transmittal is requested the carrier or agent will be required to furnish the envelope and either prepay or guarantee the postage by means other than sending ordinary postage stamps. See § 1310.1(c). (Now the Commission furnishes the envelope and pays the postage.)

7. The regulation which prohibits changes in rates or other provisions before they have been in effect for 30 days is omitted. See § 1310.1(g). (This is now the subject of a separate rulemaking—Ex Parte No. 294. Whatever conclusions are reached in that proceeding will be incorporated in the circular.)

8. This incorporates the present Special Permission No. 4054-M terms. A carrier will be permitted to dispense with or discontinue the posting of a tariff at a station if that tariff has not been used by the carrier or the public at that station for six months. See § 1310.2(f). (The words "a substantial period of time" in the permission is here changed to "six months".)

9. Commodity descriptions in connection with commodity rates or exception ratings will be required to be described either in the same words as the classification or as close thereto as possible. If the article appears under a generic heading in the classification, the rate or exceptions tariff will be required to show that exact heading and the commodity as subordinate to it. See §§ 1310.6(j), 1310.7(h), and 1310.17(c)(3). (Now there is no similar requirement.) This is intended to reform the present practice whereby the same commodity may be described in ways difficult or impossible to relate to the classification it displaces.

10. Motor carriers will be required to publish in the same manner as rail carriers provisions applicable on export or import traffic handled beyond by ocean carriers. See § 1310.7(m). (Rail carriers are governed by § 1300.67 [rule 67 of Tariff Circular No. 20]. There are no similar provisions for motor carriers. Ex Parte No. 261, in which this subject was previously considered, has been reopened, and whatever conclusions are reached in that proceeding will be incorporated in the circular.)

11. When the explanation of a reference mark or note is changed, the amending publication will be required to either republish all matter using the reference mark or note or publish in connection with the changed explanation a reference to the tariff matter using the mark or note. See § 1310.10(h). (Rail carriers must republish all matter using the reference mark or note unless the tariff is published by computer, in which case the use of the "reference" method is authorized by Special Permission 70-258. Regulations for motor carriers now do not adequately cover this.)

12. Changes are proposed to simplify the process of canceling tariffs, including eliminating authorizing an agent to cancel an individual carrier's tariff (now will require supplement to carrier's tariff) and, where a tariff is reissued, requiring the only cancellation notice to be in the new tariff. Generally, the changes reflect what has become the present practice. See § 1310.11.

V 38 149 AUG 3 73 XUM

13. Regulations governing tariffs which define the carriers' authorized operations (scope tariffs) are added. See § 1310.19. (Now the filing of such a tariff is authorized, but there are no regulations governing its construction and its application.)

14. When a carrier is canceled from a participating carrier tariff and is later reinstated, a short form method will be permitted to reinstate for the account of the carrier rates and other provisions that were canceled by statement when the carrier was canceled. See § 1310.20 (e). (Now each individual provision is required to be republished.)

15. Each Class I and Class II motor carrier will be required to file an index of all effective and all published but not yet effective tariffs to which it is a party (including those published in its own name). An index will also be required from a Class III motor carrier if it participates in a rate tariff of an agent. See § 1310.24. (There are no present effective regulations requiring indexes from motor carriers. Rail carriers are required to file them. There was included such a requirement originally in the tariff circular, but was postponed from time to time and then postponed indefinitely. It is now proposed to establish a similar, but not identical, requirement.)

16. The term "special permission authority" will be changed to "special tariff authority," as being a more appropriate term. The notarization of applications for such authority will no longer be required. See § 1310.26.

17. The participating-carrier list in tariffs reproducing the DOT (formerly ICC) regulations governing packaging and transportation of dangerous articles will be permitted to be amended upon one day's notice, instead of five days now part of Special Permission 19511–M. This reduces the notice requirement to that which we allow such changes in the classification tariffs, also under a special permission order. See § 1310.28(d).

18. Motor carriers will be permitted on five days' notice to extend expiration dates and postpone the effective dates of comeback rates. See § 1310.28(f). (Rail carriers have had this authority under Special Permission 39797.)

19. Special Permission 72–1100 M, which authorizes the postponing or repostponing of tariff provisions on eight days' notice, is incorporated. However, its use will be prohibited in connection with general rate adjustments published by means of a conversion table. The latter restriction was incorporated into the corresponding permission given the railroads. See § 1310.28(h)(14).

20. The publication of substituted service provisions (rail for motor) will be permitted without special permission authority, but subject to the same restrictions. See § 1310.30.

In addition to those listed above, the provisions of the following general special permissions are incorporated which authorize upon less than 30 days' notice the following tariff actions (the permission numbers are shown in parentheses):

1. The filing of suspension notices in consolidated form (M–94300).

2. The postponement or further postponement of suspended matter (M–83800).

3. The cancellation of suspended matter (M–94200).

4. In connection with tariff publication to cover proposed issuance of operating authority, (a) the addition of the description of such authority, (b) the addition of the name of the carrier to the list of participants, (c) the addition of routing provisions, and (d) the amendment of the list of points served (27458–M).

5. The establishment of new routes for existing operating authority (27458–M).

6. Restoration of the listing of carriers as participants following published cancellation, so as to continue participation without interruption (67–142–M).

7. The amendment of the list of participating carriers in classifications to provide additions thereto and corrections and other changes therein (M–88800).

8. The changing or cancellation of expiration dates published in connection with temporary authorities (M–64500).

9. The establishment of rates and other emergency transportation operat- other provisions to cover emergency transportation operating authority (M–60160).

It appearing, that existing regulations which govern the construction, filing, and posting of tariffs of common carriers of property by motor vehicle and tariffs of certain common carriers of property by water are published in Subpart B of Part 1307 of Title 49 of the Code of Federal Regulations (Tariff Circular MF No. 3);

And it further appearing, that the regulations need revising for the purposes of, among other things, (1) updating; (2) clarifying; (3) incorporating the modifying provisions of general special permission authorities; (4) adding restrictions to eliminate or correct practices which have been the source of justifiable complaint; (5) canceling regulations no longer needed; and (6) accomplishing overall tariff simplification and improvement;

And good cause appearing therefor:

It is ordered, That a rulemaking proceeding be, and it is hereby instituted under the provisions of the Interstate Commerce Act and section 553 of the Administrative Procedure Act for the purpose of considering whether or not the facts and circumstances require or warrant the revision in the manner and form set forth in Appendix A attached hereto of the regulations referred to in the first appearing paragraph of this order.

It is further ordered, That all common carriers of property by motor vehicle, all common carriers of property by water that participate in joint motor-water rates, and their tariff publishing agents be, and they are hereby, made respondents in this proceeding.

It is further ordered, That any person intending to participate in these proceeding by submitting initial or reply statements, or otherwise, shall notify this Commission by filing with the Office of Proceedings, Interstate Commerce Commission, within 30 days from the date of publication of this order in the Federal Register the original and one copy of a statement of his intention to participate. Inasmuch as the Commission desires wherever possible (a) to conserve time, (b) to avoid unnecessary expense to the public, and (c) the service of pleadings by parties in proceedings of this type only upon those who intend to take an active part in these proceeding, the statement of intention to participate shall include a detailed specification of the extent of such person's interest, including (1) whether such interest extends merely to receiving Commission releases in these proceedings, (2) whether he genuinely wishes to participate by receiving or filing initial and/or reply statements, (3) if he so desires to participate as described in "(2)", whether he will consolidate or is capable of consolidating his interests with those of other interested parties by filing joint statements in order to limit the number of copies of pleadings that need be served, such consolidation of interests being strongly urged by the Commission, and (4) any other pertinent information which will aid in limiting the service list to be issued in these proceedings; that this Commission shall then prepare and make available to all such persons a list containing the names and addresses of all parties desiring to participate in these proceedings and upon whom copies of all statements must be filed; and that at the time of service of this service list the Commission will fix the time for filing and serving statements under the modified procedure;

It is further ordered, That any interested person subsequently submitting initial written statements of facts, views, and arguments should specify therein (1) whether he opposes or supports the general revision; (2) the specific rules which he opposes or supports; (3) the reasons for such opposition or support; and (4) recommendations for specific changes in the rules which he opposes.

It is further ordered, That while this proceeding does not currently appear to be a major Federal action significantly affecting the quality of the human environment within the meaning of the National Environmental Policy Act of 1969, statements filed by parties participating in these proceedings shall indicate the presence or absence of any effect of the recommendations made therein to this Commission on the quality of the human environment. Cf. *Implementation—National Environmental Policy Act, 1969*, 340 ICC 431 (1972).

And it is further ordered, That statutory notice of the institution of this proceeding be given to the general public by mailing a copy of this order to the Governor of every State and to the Public Utilities Commissions or Boards of each State having jurisdiction over transportation, by depositing a copy of this order in the Office of the Secretary, Interstate Commerce Commission, Washington, D.C. 20423, for public inspection, and by delivering a copy thereof to the Director, Office of the Federal Register, for publication in the FEDERAL REGISTER as notice to all interested persons.

By the Commission, Division 2.

[SEAL] ROBERT L. OSWALD,
Secretary.

PART 1310—FREIGHT RATE TARIFFS AND CLASSIFICATIONS OF MOTOR COMMON CARRIERS

Sec.
1310.0 General provisions.
(a) General.
(b) Application of this Part 1310.
(c) Conformity required.
(d) Intrastate, liability and information-only provisions.
(e) Carrier liable for violations.
(f) Definition of terms used in this part.
1310.1 Filing tariffs (Rule 1).
(a) Where to file.
(b) Number of copies required.
(c) Letter of transmittal.
(d) Letters of authorization.
(e) Tariff publications not consecutively numbered.
(f) Concurrences and powers of attorney required.
(g) Period of notice required.
(h) Other filing requirements.
(i) Rejection of tariff publications.
(j) Rejection or suspension of revocation notice.
1310.2 Posting tariffs (Rule 2).
(a) Introduction to posting requirements.
(b) What tariffs must be posted at principal office.
(c) What tariffs must be posted at stations.
(d) Period of notice.
(e) Exception as to posting by Class III motor carriers.
(f) Exception as to posting at stations.
(g) Freight classifications and dangerous articles tariffs.
(h) Conditions: Non-posted tariffs.
1310.3 ICC Tariff numbers (Rule 3).
(a) Nonapplication of this section.
(b) ICC numbers to be printed on tariffs.
1310.4 Form, size, and printing (Rule 4).
(a) Form, size, durability, and method of printing.
(b) Size of type.
(c) Alterations.
(d) Margin.
(e) Bound tariffs: Pages and binding.
(f) Loose-leaf tariffs.
(g) Ruling of tables.
(h) Items and numbering systems.
1310.5 Title page (Rule 5).
(a) Title page required.
(b) ICC number and cancellation notice.
(c) Loose-leaf tariffs.
(d) Name and certificate number.
(e) Type of rates, modes of transportation, and territorial application—rate tariffs.
(f) Governing tariffs.
(g) Nomenclature for tariff.
(h) Reference to item containing list of governing tariffs.
(i) Tariffs issued under order or other authority.
(j) Issue and effective dates.
(k) Expiration dates.
(l) Name and title of issuing party and address.
1310.6 Contents of tariff (Rule 6).
(a) General requirements.
(b) Check sheets—loose-leaf tariffs only.
(c) Table of contents.
(d) Reference to tariffs naming rates on other commodities.
(e) List of participating carriers.
(f) Indexes of commodities, origins, and destinations.
(g) Statement of operating authority in rate tariffs.
(h) List of governing tariffs.
(i) Rules and other provisions which govern the tariff.
(j) Exceptions to classification classes, ratings, and rules.
(k) Explanatory statements.
(l) Statement of rates.
(m) Statement of routes.
(n) Explanation of reference marks, notes, and abbreviations.
1310.7 Statement of rates (Rule 7).
(a) Rates must be clear and explicit.
(b) Arbitraries.
(c) Percentage, fraction or multiple of class rates.
(d) Minimum quantities.
(e) Rates based on varying quantities.
(f) Mixed shipments.
(g) Generic terms.
(h) Commodity rates.
(i) Rates of a carrier must be in limited number of tariffs.
(j) Conflicting or duplicating rates prohibited.
(k) Through rate applies.
(l) Proportional rates.
(m) Export, import, coastwise, and intercoastal rates.
(n) Intermediate application of rates.
(o) "From" and "to" intermediate rules may apply in connection with same rate.
(p) Class rate from or to unnamed points.
1310.8 Routing (Rule 8).
(a) Routing to be specified.
(b) Routing guide.
(c) Emergency routing clause.
1310.9 Supplements (Rule 9).
(a) Amendment by supplement.
(b) Updated lists of items and units in effective supplements.
(c) Index and table of contents.
(d) Number of supplements and pages permitted.
(e) Additional supplement to comply with order of Commission.
(f) Bridge supplements.
(g) Blanket supplements.
1310.10 Amendments (Rule 10).
(a) How made.
(b) Participating carriers—how shown.
(c) Amendments to bound tariffs.
(d) Amendments to loose-leaf tariffs.
(e) Reinstatement of canceled or expired provisions must be by republication.
(f) Changes indicated.
(g) Reissued matter.
(h) Change in the explanation of reference marks and notes.
(i) Matter issued under order or other authority.
(j) Conversion supplements to provide general rate changes.
1310.11 Transfer or cancellation of provisions (Rule 11).
(a) Different situations.
(b) Procedures to follow.
1310.12 Expiration dates (Rule 12).
(a) Expiration dates may be shown.
(b) Expiration dates may be shown in separate item.
(c) Expired provisions.
1310.13 Sectional tariffs (Rule 13).
(a) May be filed—sections must be numbered.
(b) Alternative use of rates may be provided.
(c) Nonalternating section—position of sections—statements.
(d) Restrictions.
(e) Arrangement may not be changed.
1310.14 Suspended matter (Rule 14).
(a) Suspension orders and vacating orders.
(b) Supplement to loose-leaf tariff.
(c) Supplement announcing suspension—consolidated supplement.
(d) Suspended matter reissued before supplement announcing suspension is issued.
(e) Suspended matter republished before supplement announcing suspension is issued.
(f) Reissue of suspended matter.
(g) Postponement or further postponement of matter suspended.
(h) No change permitted—suspended matter and matter held in force.
(i) Suspended matter may be canceled.
(j) Vacation of order—suspended matter under postponement found justified.
(k) Suspended or postponed matter ordered canceled.
(l) Postponement of tariff matter published under an order which is stayed.
(m) Compliance with § 1310.9(d) (rule 9) not required.
(n) Reference to authority and to investigation and suspension docket number required.
(o) Court orders.
1310.15 Terminal and other services—Charges and allowances (Rule 15).
(a) Provisions must be filed.
(b) Method of publication.
(c) Joint rates include intermediate drayage or transfer.
(d) Pickup and delivery service.
1310.16 Distance rates (Rule 16).
(a) Distance rates may be filed—when they may be used.
(b) Statements on publications required.
(c) Application of rates must be clear.
(d) When a map is referred to.
(e) When a distance guide is referred to.
(f) Size of characters on maps.
1310.17 Classification, exceptions, rules, and dangerous articles tariffs; precedence of class rates (Rule 17).
(a) Classification.
(b) Precedence of rates.
(c) Exceptions tariffs.
(d) Rules tariffs.
(e) Dangerous articles tariffs.
(f) Participation in governing publications.
1310.18 Rate basis tariffs (Rule 18).
(a) Separate tariffs may be filed.
(b) Points and carriers to be listed.
(c) Rate groups or rate basis—arbitraries or differentials.
(d) General rules may not be included.
(e) Scope of operating authority.
1310.19 Tariffs listing carriers' operating authority (Rule 19).
(a) Separate tariffs may be filed.
(b) Reference to scope tariffs for one carrier.
(c) Agents' tariffs governed by more than one scope tariff.
(d) Scope provisions may be included in participating carrier tariffs.
1310.20 Participating carrier tariffs (Rule 20).
(a) Separate tariffs may be filed by agents.
(b) List of carriers.
(c) List of tariffs.
(d) Cancellation of participating carrier.
(e) Reinstatement of participating carrier.
(f) Adoptions.
(g) Participating carrier tariff may include statements of operating rights.
1310.21 Tariffs of joint agents (Rule 21).
(a) May be filed.
(b) Title pages and loose-leaf pages.
(c) Publications must be identical and filed under one cover.
(d) List of participating carriers.

V38-149 AUG 3 73 XUM

Sec.
1310.22 Seasonal motor-water rates (Rule 22).
(a) Tariffs may provide for restoration or discontinuance of service.
(b) Notation required on title page.
(c) When definite dates of service cannot be determined.
(d) When definite dates of service can be determined.
(e) Supplements announcing discontinuance of service.
(f) Tariffs may be reissued.
1310.23 Rates prescribed by Commission (Rule 23).
1310.24 Tariff indexes (Rule 24).
(a) Must be filed by most carriers—information required.
(b) Arrangement.
(c) Supplements or loose-leaf page amendments to tariffs listed in the index.
(d) Revisions, supplements, and loose-leaf pages.
(e) Notation on title page.
(f) Issued date but no effective date.
1310.25 Transfer of operations—Change in name and control (Rule 25).
(a) Different situations.
(b) Requirement for recording new ownership of effective tariffs, etc.
(c) If old carrier has no tariff provisions or other instruments.
(d) When only adoption notice is required.
(e) Form for adoption notice.
(f) When combined adoption notice and adoption supplement is required.
(g) Form for combined adoption notice and adoption supplement.
(h) Series of ICC numbers to use on adoption notices and new tariffs.
(i) Effective date on adoption publication.
(j) Adopted tariff may not be amended after one year.
(k) When name of old carrier need not be shown.
(l) Temporary control.
(m) Adoption publications to contain no other matter.
(n) Adoption publications not required from trustees, etc.
(o) Concurrences and powers of attorney.
(p) Tariffs issued by other carriers or by agents.
(q) Tariffs involved in part shall be amended.
(r) Junction point.
(s) New carrier may amend tariff adopted in part—reserved supplement numbers for new carrier's use.
(t) Subsequent supplements or loose-leaf pages.
(u) Former tariff must be described when canceled.
(v) Adoption notice not to be canceled.
(w) Adoption supplements to be noncounting.
(x) Carriers to which this section applies.
1310.26 Applications for special tariff authority (Rule 26).
(a) Commission has authority to grant special tariff authority.
(b) Special tariff authority will not be issued to modify formal orders.
(c) Filing of application by carrier—also joint agents' tariff.
(d) Where to send applications and number of copies required.
(e) Numbering and signing of applications.
(f) Form of application.
(g) Information application shall show.
(h) The authority must be used in its entirety.
(i) Confirmatory application.
(j) Authority to reject publication.
1310.27 Concurrences or powers of attorney—Transfer of agent (Rule 27).
(a) Different situations.
(b) Forms of powers of attorney.
(c) Forms of concurrences.
(d) Exact name of carrier must be shown what individual may sign instrument.
(e) Official or employee may not act as agent.
(f) Corporation as agent.
(g) Specifications for forms.
(h) Number of copies.
(i) Conflicting authority must be avoided.
(j) Alternate agent.
(k) Transfer of authority from one agent to another agent—death or disability of agent.
(l) Take-over publications.
(m) Supplements (or loose-leaf pages) to be shown in series of former agent.
(n) New agent must start new series.
(o) Cancellation of instruments.
(p) Revocation of instruments.
1310.28 Provisions which may be filed on less than 30 days' notice (Rule 28).
(a) Certain provisions in connection with new temporary or new permanent operating authority.
(b) New route for existing operating authority.
(c) Restore carrier participation.
(d) Amend participating carrier list in dangerous articles tariff.
(e) Amend participating carrier list in classification.
(f) Extend expiration dates or postpone effective date of comeback provisions.
(g) Change or cancel expiration dates in connection with temporary authorities.
(h) Postponement of tariffs or tariff matter.
(i) Tariffs covering emergency transportation operating authority.
1310.29 Commodity rates determined by the use of rate base numbers (Rule 29).
(a) May be filed.
(b) Reference to other tariffs for rate base numbers.
(c) Other requirements.
1310.30 Substituted service (rail for motor) (Rule 30).
(a) Tariffs may provide for substituted service.
(b) Required provisions.
(c) Participation of rail carrier.
(d) Substituted freight service directory.
(e) Different rates prohibited.
(f) Routing provisions not required.
1310.31 Transmission of publications to subscribers (Rule 30).

AUTHORITY: The provisions of this Part 1310 issued under secs. 204, 217, 49 Stat. 546, as amended, 560, as amended, sec. 210a, as amended, 52 Stat. 1238, as amended; 49 U.S.C. 304, 317, 310a.

§ 1310.0 General Provisions.

(a) *General.* (1) Every problem that might arise cannot be anticipated in regulations. It is intended by the Commission that the contents of each tariff be so published that the size of the printed characters, the proportion and distribution of blank space allowed on a page, the system used for indentation or setting off material, the breaking up of lengthy material into smaller units, and the like, are such as to permit prolonged reading, without straining of the eyes, by the average person, and to permit any one with reasonable technical transportation knowledge and experience to understand the application. The Commission expects the cooperation in this respect of all persons associated with the construction of tariffs, and reserves the right to require modification or reissue of a tariff which it considers as not affording the public this accommodation to which it is lawfully entitled.

(2) The Commission expects all carriers to observe strict compliance with its posting regulations, and to control and direct the practices of its publishing agents or representatives toward making possible such compliance without exception.

(3) Nothing in paragraph (a) (1) and (2) of this section shall be construed as being a relaxation of any of the regulations in this part.

(b) *Application of this Part 1310.* (1) Subject to the provisions of paragraph (b)(3) of this section, the regulations promulgated in this part shall govern the construction, publication, filing, posting, and keeping open for public inspection of:

(i) Any tariff filed under section 217 of the Act by a motor carrier or its agent; and

(ii) Any tariff filed under section 306 of the Act by a water carrier or its agent which contains any joint motor-water rate or any provision governing the application of such rate.

The regulations in this part shall also apply to any tariff filed under section 217 of the Act containing any joint rate or provision for the transportation of property over a motor carrier of property jointly with a common carrier of passengers by motor vehicle having authority from this Commission to transport property together with passengers in the same vehicle, or jointly with a carrier of property by air as authorized by the Federal Aviation Act of 1958.

(2) Carriers (other than motor common carriers of property) and freight forwarders whose rates are on file with the Interstate Commerce Commission may participate in tariffs subject to the regulations of this part which are exclusively distance guides (§ 1316.16 (rule 16)), or classifications or dangerous articles tariffs (§ 1310.17 (rule 17)) and also in participating carriers tariffs (§ 1310.20 (rule 20)) but only to the extent necessary to establish participation in such other tariffs.

(3) The regulations in this part do not apply to any tariff filed by a motor carrier, by a water carrier jointly with a motor carrier, or by its agent which contains joint rates applicable over joint intermodal routes as to which rail carrier transportation forms any segment of the joint route, or any provision governing the application of such rates and routes, unless such rates, routes and provisions form only a minor portion of the tariff material, and the carrier or agent notifies the Commission at time of filing, as part of the letter transmitting the tariff, that it is effecting compliance with the regulations in this part rather than another for the construction of the tariff. Such portions of the tariff as pertain to such intermodal transportation shall, however, comply with the regulations elsewhere governing the publication of rates, routes, and provisions which include rail carrier participation.

(4) For regulations for water common carrier tariffs not governed hereby, Part 1300 and §§ 1308.0 through 1308.11 of this chapter (Tariff Circular Nos. 20 and 22, or reissues thereof) should be referred to.

(c) *Conformity required.* (1) Except as otherwise authorized by special permission order, all tariffs must conform to the reglations in this part 1310 by (here will be shown a date of one year from the approved date of these regulations).

(2) For reasons it considers to be sufficient, the Commission may direct the reissue of any tariff, power of attorney, or concurrence at any time.

(d) *Intrastate, liability and information-only provisions.* A tariff may include provisions having intrastate application only, provided they are so indicated (see § 1310.6(n)(6) (rule 6)), and a tariff may be indicated as a joint filing with state regulatory bodies. Provisions indicated as "For Information Purposes Only" provisions which explain the plan of the tariff or the manner in which the tariff should be used, to assist the tariff user, may be included provided they are not contrary to the actual application of the tariff. Except as specifically authorized by this Commission, provisions pertaining to such as liability of the carrier for loss, damage or overcharge, and transportation not subject to economic regulation of this Commission, and advertising or promotional material, may not be included in the tariff.

(e) *Carrier liable for violations.* Carriers have a positive duty under the Act to file with this Commission and to post for public inspection all of its tariffs required by the Act. The Act places upon the Commission the obligation to issue regulations prescribing the manner in which tariffs shall be constructed, filed and posted. The law prescribes penalties against carriers for failure to comply with the Act and the regulations, and also for using any rate which is not one contained in its lawfully published, filed and applicable tariffs. The tender of a tariff and its receipt by the Commission does not relieve any carrier participating therein from liability for violation of the Act itself or of regulations issued under the authority of the Act.

(f) *Definition of terms used in this part.* (1) "Act" means the Interstate Commerce Act, as amended.

(2) "Agent" means a person or corporation duly authorized under this part by a carrier to publish rates and provisions for that carrier's account in tariffs published in the name of the agent.

(3) "Bound tariff" means a tariff consisting of a single sheet, or two or more sheets bound at left edge in pamphlet or book form.

(4) "Carrier" means a motor or water carrier.

(5) "Classification" means a publication containing a list of articles or commodities and the class ratings to which they are assigned for the purpose of applying class rates, together with governing rules and regulations.

(6) "Class I, II, and III motor carriers" are as defined in the Commission's Uniform System of Accounts for Motor Carriers, § 1240.5 of this title.

(7) "Class rate" means a rate which applies on any one or more of various articles according to the class rating to which they are assigned in a classification or tariff of exceptions thereto or in the class rate tariff. It does not include a so-called all-freight, all-commodity, etc. commodity rate which applies on commodities or articles by definition as to the maximum and/or minimum classification or exception class rating to which they are assigned but otherwise has none of the characteristics of a class rate. Nor does it include a so-called column-commodity or commodity-column rate which applies on commodities assigned a column number and are based on the particular rate-basis number applicable between points of origin and destination in class rate tariffs, but otherwise has none of the characteristics of a class rate. "Class tariffs" are those which contain class rates.

(8) "Commission" means the Interstate Commerce Commission.

(9) "Commodity rate" means a rate published to apply on a commodity or commodities which are specifically named or described in the tariff in which the rate is published or in a separate commodity list. "Commodity tariffs" are those which contain commodity rates.

(10) "Item" means a tariff provision of any kind bearing an "item number" designation.

(11) "Joint motor-rail rate" means a joint rate over a joint route consisting of at least one motor segment and one rail segment. It includes ones embracing more than one such segment, and in any sequence.

(12) "Joint motor-water-rail rate" means a joint rate over a joint route consisting of at least one motor segment, one water segment, and one rail segment. It includes ones embracing more than one such segment, and in any sequence.

(13) "Joint motor-water rate" means a joint rate over a joint route consisting of at least one motor segment and one water segment. It includes ones embracing more than one such segment, and in any sequence.

(14) "Joint rate" means a rate that applies over the lines or routes of two or more carriers and that is made by arrangement or agreement between such carriers evidenced by concurrence or power of attorney. "Joint tariffs" are those which contain joint rates.

(15) "Local rate" means a rate that applies over the lines or routes of one carrier only. "Local tariffs" are those which contain local rates.

(16) "Loose-leaf page amendment" means a publication consisting of a single sheet containing any amendment to a loose-leaf tariff.

(17) "Loose-leaf tariff" means a tariff (not a bound tariff) consisting of loose-leaf pages.

(18) "Motor carrier" means a common carrier of property by motor vehicle.

(19) "Original tariff" means the tariff as originally filed excluding supplements or other amendments thereto, if any.

(20) "Post" refers to the maintenance of a file of tariffs which the public may inspect.

(21) "Proportional rate" means a rate published to apply only on traffic originating beyond the point from which such rate applies, destined beyond the point to which such rate applies, or originating and destined beyond the points from and to which such rate applies. "Proportional tariffs" are those which contain proportional rates.

(22) "Rail carrier" means a common carrier of property by railroad.

(23) "Station" of a carrier means the terminal, office (other than principal office), or other facility maintained by or for such carrier.

(24) "Supplement" means a publication, indicated as a supplement, consisting of a single sheet, or two or more sheets bound at the left edge in pamphlet or book form containing any amendment to a tariff, including its cancellation.

(25) "Tariff" means a publication containing one or more rates, charges, classification ratings, rules, regulations, or other provisions, or any combination thereof, of one or more common carriers, together with its supplements or loose-leaf page amendments thereto, if any.

(26) "Tariff publication" means an original tariff, a supplement, or a loose-leaf page amendment.

(27) "Through rate" means the total rate from point of origin to destination. It may be a local rate, a joint rate, or combination of separately established rates.

(28) "Unit" means a tariff provision of any kind set apart by use of a number designation (other than item) or by employment of line or space separations, or because of its obvious independent completeness in itself.

(29) "Water carrier" means a common carrier of property by water subject to part III of the Act.

§ 1310.1 Filing tariffs (Rule 1).

(a) *Where to file.* Except as otherwise authorized, all tariff publications sent for filing should be addressed

Interstate Commerce Commission
Bureau of Traffic
Washington, D.C. 20423

and every package marked prominently with the word "Tariffs."

(b) *Number of copies required.* Unless additional copies are requested by the Commission, and except as otherwise provided in the regulations in this part, two copies of every tariff publication must be filed with the Commission. When a tariff publication is published and filed in the name of more than one agent, as a joint-agency issue, each such agent must file the required number of copies.

(c) *Letters of transmittal.* (1) All tariff publications filed with the Commission must be accompanied by a letter of transmittal listing them. The letter shall

V 38-149 AUG 3 73 XUM

be prepared on durable paper approximately 8 by 10½ inches in size in substantially the following form:

(Name of carrier or agent in full)

(Street address or R.F.D. number)

(City, State, etc. and ZIP Code)

(Date)

Transmittal No.--------
Interstate Commerce Commission
Bureau of Traffic—Tariffs
Washington, D.C. 20423

The accompanying publication(s) which is (are) listed below (on the attached sheet(s)) (below and on the attached sheet(s)) is (are) sent to you for filing in compliance with the requirements of the Interstate Commerce Act.

Supplement
or Page No.
I.C.C. (MF-I.C.C.) No.

(Signature of person issuing publication or other authorized person)

(Title)

If because of the quantity and bulk of the material being transmitted, more than one package is used, one should include the original, and each of the others a copy, each indicating how many packages make up the whole. If a receipt from the Commission is desired, a duplicate marked "Receipt Requested" must be furnished, together with a self-addressed return envelope. The envelope must provide the postage needed, by, for example, the sender's postage meter, a stamp embossed as part of the envelope itself, or guarantee by the sender's U.S. Postal Service permit number. In no case must loose stamps or envelopes with stamps affixed be supplied. A separate letter of transmittal must accompany the filing by each agent in the case of a tariff publication issued jointly by two or more agents.

(2) A letter of transmittal accompanying a tariff publication filed in the carrier's name must be signed by the person issuing the tariff publication or by a person duly authorized by the carrier to perform this service evidenced by a letter of authorization (see paragraph (d) of this section).

(3) A letter of transmittal accompanying a tariff publication filed in the name of an individual as agent or alternate agent must be signed by that individual, and such authority may not be delegated.

(4) A letter of transmittal accompanying a tariff publication filed in the name of a corporation as agent must be signed by a duly authorized tariff-publishing officer. See § 1310.27(f) (rule 27).

(d) *Letters of authorization.* (1) A letter of transmittal of a carrier should be signed by the person shown on the title page of the tariff publication as the one issuing it. If it is not, then the signer must be specifically authorized to do so. The authorization must be prepared on durable paper approximately 8 by 10½ inches in size in the following form:

LETTER OF AUTHORIZATION

(Complete name of carrier)
Docket No. MC- --------

(Street address or R.F.D. number)

(City, state, etc. and ZIP Code)

(Date)

Interstate Commerce Commission
Bureau of Traffic—Tariffs
Washington, D.C. 20423

This is to certify that ----------
(Name of individual

(authorized to act)

is hereby authorized to sign letters of transmittal and transmit to the Commission thereunder for filing in compliance with the Interstate Commerce Act, as amended, tariffs, supplements, or loose-leaf page amendments issued in the name and MF-I.C.C. or I.C.C. series of the carrier named herein.

All such tariffs, supplements, and pages are to be considered the official filings of the carrier named herein when tendered for filing by the individual named in the first paragraph hereof.

(Name of carrier)
By ----------
(Signature)

(Title)

Verification:
The above statement was subscribed and sworn to before me this -------- day of ----------, 19----.

(Notary Public)

The authorizing letter must be signed by the owner, a partner or an officer, as the case may be, of the carrier. If such a letter does not accompany the publication or has not previously been filed, the publication may be returned to the sender.

(2) A letter of authorization may only be issued in favor of a single individual. It may not authorize two or more individuals, a firm, or a corporation to act. Only one such letter may be effective at any one time.

(3) A letter of authorization may not cancel a previous one. Cancellation shall be made by a separate notice prepared on durable paper approximately 8 by 10½ inches in size in the following form:

Cancellation of

(Street address or R.F.D. number)

(City, state, etc. and ZIP Code)

The effective date specified should take into account the necessary time enroute to the Commission. If the date shown is prior to that on which it is received, the Commission considers the prior authority canceled on the date received. Only publications received on and after that date, or the date shown on the notice (if later), are considered affected thereby. It must be signed by the owner, a partner, or an officer of the carrier. The representative whose authority is being canceled shall be furnished with a copy of the cancellation notice at the same time the notice is sent to the Commission.

(e) *Tariff publications not consecutively numbered.* An original tariff, a supplement, or an original or revised page tendered for filing which is out of the sequence required by the regulations of this part must be accompanied by a separate letter affirming that a publication bearing the skipped over number will be filed and when, which in no case may be a date after the published effective date of the publication not in sequence.

(f) *Concurrences and powers of attorney required.* Any participation by a carrier in a tariff publication other than its own issue must be supported by a power of attorney or concurrence, whichever is appropriate (see § 1310.27 (rule 27)). If it is not already on file with the Commission, it must accompany the publication being filed.

(g) *Period of notice required.* (1) The Act requires that all changes in rates or charges, or in rules or other provisions that affect rates, shall be filed with the Commission at least 30 days before the date upon which they are to become effective unless otherwise authorized by the Commission. Manifestly it is impossible for the Commission to check the items in tariffs to determine whether or not 30 days' notice has been given. Therefore, except as otherwise authorized by the Commission, 30 days' notice to the public and to the Commission must be given as to every tariff publication filed with the Commission, regardless of whether or not changes are effected thereby.

(2) Notice commences to run with the date the tariff publication is received by

the Commission in Washington, D.C. Thus, a publication received any time during one calendar day has on the next calendar day (whatever it may be) accounted for one day of the required thirty days, and then on the thirtieth day following the date on which it was received has accounted for the full thirty days. For example, a publication received on a March 1st date must have an effective date of March 31st or later; one received April 1st needs an effective date of May 1st or later.

(h) *Other filing requirements.* (1) A tariff publication received by the Commission will not be returned unless formally rejected (see paragraph (i) of this section), except under the following circumstances. If, before the filing is received by the Commission, the carrier or agent advises that it is withdrawing its tender for filing and requests that it be returned not accepted, the Commission will take such a request under consideration but compliance is not to be assumed. Verbal requests must be confirmed in writing promptly, and be signed by an authorized person. Purported filings which are absent one or more essentials (such as an I.C.C. number, or a title page) will be returned as not a bonafide tariff publication.

(2) No package containing any tariff publication will be accepted unless all charges applicable to the transmission thereof have been paid.

(3) A joint tariff publication filed by a carrier or a tariff publication filed by an agent will constitute filing for all carriers participants therein.

(4) All rates used in making combination through rates for interstate shipments, including rates between points in one state, must be filed with the Commission and posted for public inspection and they can be changed as to such traffic only in accordance with the provisions of the Act, and as amended.

(i) *Rejection of tariff publications.* Any tariff publication tendered for filing which.

(1) Fails to give lawful notice of changes in rates, charges, or other provisions which it proposes to establish;

(2) Fails to meet the requirements of the regulations in this part; or

(3) violates any order of the Commission or of a court is subject to rejection by the Commission. When a tariff publication is rejected, the Commission, acting through a designated administrative officer, will inform the carrier or agent who tendered it for filing, in writing, of the reasons for rejection. The several copies will ordinarily be returned. The Commission may at its discretion retain one or more copies for its own information use, but the tariff publication is nevertheless rejected any may not be applied.

(j) *Rejection or suspension of revocation notice.* A notice of the partial or complete revocation of a concurrence or power of attorney may be rejected in the same manner as a tariff publication where the effectiveness of such notice would require the establishment of rates or charges in violation of

(1) An order of the Commission;
(2) An order of a court; or
(3) The regulations in this part.

Any such notice of revocation which would require the establishment of rates or charges of doubtful lawfulness may be suspended.

§ 1310.2 Posting tariffs (Rule 2).

(a) *Introduction to posting requirements.* Under the Interstate Commerce Act, carriers are required to keep open to public inspection their tariffs naming rates and charges, in such form and manner as the Commission by regulation shall prescribe. The file of tariffs posted and maintained for public inspection shall be in a complete, accessible and usable form and shall be available for inspection during the ordinary business hours of the carrier. Employees of the carrier shall be required to give any desied information contained in such tariffs, to lend assistance to seekers of information therefrom, and to afford inquirers opportunity to examine any of such tariffs without requiring the inquirer to assign any reason for such desire. A carrier performing local pickup or delivery service for another carrier within the latter's bonafide terminal area and not named as a participant in its tariffs is not required to post such tariffs.

(b) *What tariffs must be posted at principal office.* Except as otherwise provided in paragraph (e) of this section, each motor or water carrier shall post at its principal office a complete set of all tariffs of its own issue and all tariffs to which it is a party except that a water carrier shall be required to post only such tariffs which contain any joint motor-water rate or provision governing the application of such rate. Only tariffs in effect or issued but not yet in effect are required to be posted hereunder.

(c) *What tariffs must be posted at stations.* Each motor or water carrier shall also post tariffs at each station (see § 1310.0 (f)(23)) at which it receives freight for transportation and at which it employs the person in charge of that station exclusively or jointly with another carrier. Except as otherwise provided in paragraphs (e) and (f) of this section, the tariffs that must be posted at such station are those of the carrier's own issue and those to which the carrier is a party which contain the following:

(1) Any effective, or published but not yet effective, rate published to apply for account of the carrier from or at such station, or any origin in that station's terminal area, except a water carrier need post only when a joint motor-water rate.

(2) Any effective, or published but not yet effective, provision governing the application of any such rate.

(d) *Period of notice.* Except as otherwise authorized, each tariff publication must be posted continuously from a date at least 30 days prior to the effective date. When the Commission permits or requires a different period of notice for filing, the tariff publication shall be posted at least that number of days before the effective date. The carrier shall at the time of posting stamp or write thereon such posting date.

(e) *Exception as to posting by Class III motor carriers.* A Class III motor carrier may at any location dispense with or discontinue the posting of a tariff (other than those specified in paragraph (g) of this section) in which the carrier participates solely as to joint-rate application, provided that the public file of its connecting carrier or carriers contains the tariff, and also subject to the provisions of paragraph (h) of this section.

(f) *Exception as to posting at stations.* A carrier may discontinue the posting of a posted tariff (other than those specified in paragraph (g) of this section) if for six months time no request has been made to inspect, and the carrier has not used, the tariff (including the prior issue if not in effect six months), but subject to the provisions of paragraph (h) of this section. If posting of a tariff is discontinued, the authority under this paragraph also extends to the reissues.

(g) *Freight classifications and dangerous articles tariffs.* When reference is made to this paragraph, the tariffs are those providing classifications of freight and those containing the U.S. Department of Transportation's regulations governing the acceptance and transportation of dangerous articles (hazardous materials).

(h) *Conditions: non-posted tariffs.* When a request is received at a station or principal office to post at that place a tariff the posting of which had been dispensed with or discontinued at that location under the provisions of paragraphs (e) or (f) of this section, the requested tariff, and all tariffs governing the application thereof, shall be posted at that station or principal office within 20 calendar days and posting of the tariff and its reissues shall be continued for at least six consecutive months. (After that time, the provisions of paragraphs (e) and (f) of this section may again be used.) Any carrier availing itself of the authority herein to dispense with or discontinue posting of a tariff at a location shall display continuously in a conspicuous place at that station or that principal office a notice printed in large type as follows:

With only such exceptions as have been specifically authorized by the Interstate Commerce Commission, all tariffs containing rates, and governing tariffs, effective or published but not yet effective, for the account of this carrier applying from or at this terminal area are on file in this office. The tariffs may be inspected during ordinary business hours by any person upon request and without assignment of any reason for such inspection. The employee on duty in this office will lend any assistance desired in securing information therefrom. [In the case of a principal office, omit the words "applying from or at this terminal area." In the case of a water carrier, insert the words "joint motor-water" immediately following the word "containing." In the case of a Class III carrier maintaining no tariff file at its principal office or at a station, this paragraph should be omitted from the notice posted at that location.]

If request is made for an effective tariff or tariffs naming rates or governing provisions for the account of this carrier applying

V 38-149 AUG 3 73 XUM

from or at this terminal area which is not posted hereunder authorization of the Interstate Commerce Commission, the employee on duty here will arrange to have such tariff or tariffs posted within 20 days and thereafter maintain posting until authorized otherwise. [In the case of a principal office, omit the words "applying from or at this terminal area."]

[This paragraph to be used where the affected location is a station, not the principal office, but not as to a Class III motor carrier that does not maintain a complete file at any office.] In addition, a complete file of all this company's tariffs is maintained and kept available for public inspection at [here identify the location].

[A Class III carrier not posting a tariff under authority of paragraph (e) of this section shall add the following to the notice.] Any tariff naming joint-line rates not posted here under authorization of the Interstate Commerce Commission may be inspected at [here show name of connecting carrier and location of its file containing such tariff and reference to the complete file at its principal office if one is maintained there].

§ 1310.3 ICC tariff numbers (Rule 3).

(a) *Nonapplication of this section.* The regulations in this section shall not apply to emergency temporary authority tariffs (see § 1310.28(i) (rule 28)). See also § 1310.21 (rule 21) as to joint agents.

(b) *ICC numbers to be printed on tariffs.* (1) Each tariff shall be assigned an ICC number. The numbers shall run consecutively beginning with the next unused consecutive number in the issuing carrier's or agent's ICC series. If the last tariff filed was designated MF-I.C.C. No. 14 under the former regulations, the next tariff shall be designated ICC 15, followed by 16, 17 and so on. If a carrier or agent has not previously filed a tariff, the number series shall commence with ICC 1.

(2) Title pages of the original tariff (bound and loose-leaf) and supplements thereto, and any revised title page of a loose-leaf tariff shall show the ICC number in the upper right-hand corner (see § 1310.9(g) (rule 9)—blanket supplements). All other pages (original and revised) of a loose-leaf tariff shall show the number in the upper corner forming part of the binding edge. When the tariff is one published on both sides of the sheet, this would be the upper left-hand corner on one page and the upper right-hand corner for the next higher numbered page published on the reverse side.

(3) "MF-ICC" designations printed on existing effective tariffs need not be changed. Reissues of those tariffs shall bear only "ICC" designations, for example ICC 15—without intervening periods (e.g. I.C.C. 15), without the use of "No.", and without letter prefixes or suffixes on the number.

(4) Any tariff referring to another tariff must identify it by ICC (or MF-ICC) number.

(5) The number assigned to a tariff which has been rejected may not again be used. The rejected tariff may not be referred to in any subsequent tariff as having been cancelled, amended, or withdrawn, but the tariff which is published in its stead must bear the following notation:

Issued in lieu of [here identify the rejected tariff], rejected by the Commission.

§ 1310.4 Form, size, and printing (Rule 4).

(a) *Form, size, durability, and method of printing.* Except as otherwise provided in this part, all original tariffs and amendments thereto shall be of size not less than 8 by 11 inches and not more than 8½ by 11 inches, except that all supplements and loose-leaf page amendments shall be of the same size as the tariff they amend. They shall be in book, pamphlet, single-sheet, or loose-leaf form, be in the English language, and printed or prepared by other process on paper of good quality providing durable copies. Copies filed with the Commission and posted shall be clearly and permanently legible in every respect, free from blurring or distortion of content, and free from smudged or darkened background. Typewritten sheets, handwritten material, carbon copies, or proof sheets shall not be used for filing or posting. All copies filed and posted must be identical. (See § 1310.9(g) (rule 9) blanket supplements.) No tariff in loose-leaf form will be accepted for filing by this Commission after January 1, 1979. (See § 1310.10(a) (rule 10) as to loose-leaf page amendments after January 1, 1979.)

(b) *Size of type.* Except as otherwise provided in § 1310.16 (rule 16), the type used shall be of size not less than 8-point or its equivalent (if systems not employing the printer's point standards are used), but in no case may there be more than 9 lines of printed matter to the vertical inch and 16 printed characters to the horizontal inch, with fractional inches of material to be in proportion. Characters, words, and lines shall be spaced in an uncrowded manner to assure easy readability of the material. See § 1310.0(a).

(c) *Alterations.* Alteration before reproduction by such as crossing out or blotting out material is not permitted. No alteration, insertion, or erasure of material in copies after reproduction is permissible. (See § 1310.9(g) (rule 9) blanket supplements.)

(d) *Margin.* A margin of not less than five-eights of an inch with no printing thereon shall be allowed at the binding edge of tariff publication. (The "binding edge" of a loose-leaf tariff or amendment is its left long edge if printed on one side of the sheet only. If printed on both sides, it is the right long side for the higher numbered page printed on the reverse side.)

(e) *Bound tariffs: Pages and binding.* (1) Pages of an original bound tariff shall be consecutively numbered employing Arabic numerals. The title page shall not be numbered. The next page shall be numbered 1, the next page 2, and so on. Pages of supplements shall be similarly numbered, starting with 1 again. Any numbered page intentionally left blank should so state thereon.

(2) Any original bound tariff of two or more sheets and any supplement of two or more sheets shall be permanently bound. Stapling is acceptable, but use of plastic rings, fasteners which can be opened and closed, wire fasteners other than staples, brads, and other similar fasteners are not acceptable forms of binding and shall not be used.

(f) *Loose-leaf tariffs.* (1) The requirements of this paragraph shall not apply to title pages. See also § 1310.21 (rule 21) as to joint agents.

(2) Pages of a loose-leaf tariff may be printed on one side of the sheet or on both sides. Whichever general plan is used in the original tariff must be followed in all its amendments for the life of the tariff. Any numbered page intentionally left blank shall contain a statement to that effect.

(3) Pages of an original loose-leaf tariff shall be consecutively numbered employing Arabic numerals only. Fractional or decimal numbers, or letter prefixes or suffixes, may not be used. The first page following the title page shall be designated as "Original Page 1", the next page designated as "Original Page 2", and so on. Omit the words "No." and "Number".

(4) Each page shall show the page designation in the upper corner opposite the binding edge corner. When the tariff is one published on both sides of the sheet, this would be the upper right-hand corner on one page and the upper left-hand corner for the next higher numbered page published on the reverse side. See § 1310.10(d) (rule 10) as to cancellation of prior issues of the same page, and § 1310.3(b)(2) (rule 3) for placement of the ICC number.

(5) Each page shall show at the top, in the center, the complete name of the issuing carrier or agent, as officially recorded with the Commission. At the bottom, it shall show the issue date on the left side and the effective date on the right side. The date in each case shall show the name of the month spelled out, followed by the day and year by number. If the page contains matter effective upon a date other than the general effective date of the page, the notation "(Except as otherwise provided)" shall be shown in direct connection with the general effective date. Included in this category is matter reissued without change effective later than the general effective date of the new page, and therefore constituting an exception thereto. Except as to tariffs of joint agents (see § 1310.21 (rule 21)), each page shall show at the bottom, in the center, the name and title of the issuing party, and the complete street and mailing address of the carrier or agent, including the postal service ZIP Code number.

(g) *Ruling of tables.* When tables of rates, rate base numbers or charges, or numerals or letters for other purposes are used, the pages shall be vertically ruled in columns of sufficient width to accommodate the matter to be shown thereon (including reference marks) without crowding. At least one blank space or a ruled line shall appear after every sixth horizontal line, or less, of printed matter.

(h) *Items and numbering systems.* (1) The Commission believes that simplicity would be better served by a reduction in

the number of different categories of provisions, each with its own numbering system. Items, with item numbers, should be employed to the greatest extent possible. Rule numbers and index numbers may not be used for tariff provisions, except that tariffs in effect on the conformity date of the regulations in this part and containing such numbers may continue their use for the life of such tariffs. (Section numbers, class-rate table numbers, and note numbers, and numbers or letters within an item, may be used.) When arranging the contents, items should be relatively limited in size for convenience in handling amendments, but each essentially complete in itself. An original tariff should allow sufficient unused numbers within each numerical sequence used therein so that the use of other than whole numbers will be unnecessary when assigning numbers to future provisions. All numbering systems shall employ Arabic numerals.

(2) The numbers assigned to items shall be in numerical sequence in the original tariff, but need not be consecutive. For example, items may be numbered 5, 10, 15, etc. Only one series of item numbers may be used in a tariff. Except as authorized for suspension-notice items (see § 1310.14(c) (rule 14), alphabetical letters may not be used either alone or as part of an item number except as a suffix to designate amendments as provided in § 1310.10(c) (rule 10) and except as to classification tariffs. If two or more items relate one to the other in subject matter, or are considered subordinate in some way to a master item, it is permissible to use compound numbers. This is an initial number followed by a hyphen, then one of a new series of numbers—for example, item 400 and item 400–1, item 400–2, and so on. No decimal or fractional item numbers are permitted. If the whole initial numbers are used up, and new but unrelated matter must be inserted, a compound number may be introduced provided the initial number (for example, item 400 in the above illustration) has not already been used in a compound number series. This, however, should be used sparingly, and the tariff considered for early reissue.

(3) Sections of a sectional tariff must be numbered (see § 1310.13 (rule 13)). Class-rate tables may or may not be numbered, but if they are, the numbers must be in numerical sequence. Notes outside of items must be numbered in numerical sequence.

§ 1310.5 Title page (Rule 5).

(a) *Title page required.* Each original tariff shall have a title page, which shall contain the information required by paragraphs (b) through (l) of this section and in that sequence. It is the purpose of the title page to inform the tariff user. Hence it should identify the nature, purpose, and scope of the publication, but do so in brief, yet complete fashion. When any of these change, the title page must be amended at the same time. The essential elements follow, but others should be shown if they further the purpose. (See also § 1810.21 (rule 21) as to joint agents.)

(b) *ICC number and cancellation notice.* In the upper right-hand corner shall be shown the tariff's ICC number. Immediately thereunder shall be shown the ICC (MF-ICC) number of each tariff, if any, cancelled thereby, except that if the cancellations are numerous, the ICC (MF-ICC) numbers of the tariffs cancelled may be shown near the top of page 1, and a reference to that cancellation notice shown under the ICC number on the title page.

(c) *Loose-leaf tariffs.* The title page of an original loose-leaf tariff shall be printed on one side of the leaf only. The term "Original Title Page" must be shown in the upper left-hand corner.

(d) *Name and certificate number.* At the top, in the center, the complete name of the issuing carrier or agent, as officially recorded with the Commission, shall be shown: If a carrier, its name must be followed by its certificate number. Sub numbers of certificates need not be shown. On agency tariffs, when the agent is a corporation, the name of the corporation shall be shown, but, when the agent is an individual, the name of the association (if any) for whom the agent acts may also be shown. If this is done, the name of the agent shall be preceded by the name of the association.

(e) *Type of rates, modes of transportation, and territorial application—rate tariffs.* (1) A tariff naming rates shall show statements indicating the type of rates therein, the modes of transportation for which the rates are published to apply, and the territorial application of the rates.

(2) The following terms must be used where and to the extent they properly identify such rates: Local, joint, proportional, export, import, coastwise, intercoastal, distance, assembling, distribution, class, commodity, commodity-column (column-commodity), truckload, less-than-truckload, and any quantity. If the tariff does not name any rates specifically restricted to apply on export, import, coastwise, or intercoastal traffic, these terms should not be used.

(3) Each mode of transportation must be specifically identified, such as all-motor routes, motor-water routes, motor-rail routes, etc. It is not necessary to repeat the name of the same mode appearing twice in a combination. Motor-rail-motor need simply be motor-rail.

(4) The statement as to the territorial application shall provide a brief but reasonably complete description of the territory covered by the tariff, or it shall list the states from and to, or between, which the rates therein are published to apply.

(f) *Governing tariffs.* A classification or other type of governing tariff shall show under the carrier's or agent's name a brief description of the tariff and its contents.

(g) *Nomenclature for tariff.* If desired, a brief reference name (e.g. "Iron and Steel Tariff") by which the tariff can be readily identified may be shown next.

(h) *Reference to item containing list of governing tariffs.* A tariff governed by one or more other tariffs shall next refer to the item containing a list of the publications governing the tariff in the following manner:

For governing publications, see Item-------.

(i) *Tariffs issued under order or other authority.* If the entire tariff—

(1) Is issued to comply with a mandatory order requiring the specific action;

(2) Is issued under authority of a permissive order allowing notice of less than thirty days or departure from tariff-publishing regulations; or

(3) Is published under a regulation of this part permitting less than thirty days' notice and/or departure from an outstanding order;

a reference to such order or rule by number, and the number of days' notice (where less than thirty is authorized) shall be shown.

(j) *Issue and effective dates.* (1) The issue date shall be shown on the left side and the effective date opposite thereto on the right side. The date in each case shall show the name of the month spelled out, followed by the day and year by number.

(2) A tariff containing matter effective upon a date other than the general effective date of the tariff must show one of the following notations in direct connection with the general effective date. Included in this category is matter reissued without change from a prior tariff effective later than the general effective date of the tariff, and therefore constituting an exception thereto.

(3) The added notation for a bound tariff is

(except as otherwise provided in ------) or (for exceptions, see page 1).

The exceptions, whether referred to on the title page or on page 1, shall identify by number the provisions containing the exceptions. If the excepted provisions are not numbered, the page numbers on which they appear must be shown.

(4) The added notation for a loose-leaf tariff is

(except as otherwise provided).

(k) *Expiration dates.* An entire tariff that is to expire with a given date must show the following notation:

* This tariff, as amended, expires with [here show date of expiration], unless sooner canceled, changed, or extended.

(l) *Name and title of issuing party and address.* (1) Except as otherwise provided in § 1310.21 (rule 21), at the bottom, in the center, shall be shown the name and title of the issuing party, and the complete street and mailing address of the carrier or agent, including the postal service ZIP Code number.

(2) A tariff published in the name of a carrier must show the owner, a partner, or an otherwise authorized official or duly appointed traffic manager as the issuing party. Where the owner or a partner, no title is necessary.

(3) A tariff published in the name of an individual as agent or alternate agent must show that individual as the issuing party.

V 38-149
AUG 3 73
XUM

(4) A tariff published in the name of a corporation as agent must show its duly authorized tariff publishing officer as the one issuing it. See § 1310.27 (rule 27).

§ 1310.6 Contents of tariff (Rule 6).

NOTE: See §§ 1310.14, 1310.22, 1310.24, 1310.25, 1310. 27, and 1310.28 (rules 14, 22, 24, 25, 27, and 28) for provisions which may be filed on less than 30 days' notice.

(a) *General requirements.* Tariffs must contain only rates, charges, and related provisions that cover services in strict conformity with each carrier's operating authority. No provision may be published in tariff publications which results in restricting service to less than the carrier's full operating authority or which results in exceeding such authority. Tariff publications containing such provisions are subject to rejection or suspension for investigation. Original tariffs shall contain the provisions required by paragraphs (b) through (n) of this section in the order named.

(b) *Check sheets—loose-leaf tariffs only.* The first page shall be used to list in numerical order the numbers of the original loose-leaf pages comprising the tariff. (This page is to always show an updated listing of each page and supplement.) No other matter may be printed on either side of the sheet containing this list.

(c) *Table of contents.* Except where a tariff contains less than 15 numbered pages, and its title page or interior arrangement plainly discloses its contents, each tariff must provide a table of contents, arranged alphabetically by general headings, fully descriptive and indicative of the matter being identified. Each such heading shall show the item or page number where information on that subject is located.

(d) *Reference to tariffs naming rates on other commodities.* A user of a tariff naming general commodity rates should be aided in locating other possible sources of rates on a considered shipment. Therefore, a general commodity tariff or a combined class and commodity tariff shall contain reference to any other tariffs published in the name of the same carrier or agent in which rates on other commodities are published from any origin to any destination within the same territorial coverage over the same carriers. Each reference must briefly describe the tariff, the commodities therein, and the territorial application.

(e) *List of participating carriers.* (1) A list of participating carriers (complete names must be shown) arranged alphabetically shall be provided, with the city and state of the principal office, the lead docket number of its certificate series, and the form and number of the power of attorney or concurrence issued. This does not apply to tariffs of a carrier having application only for that carrier. The issuing carrier is not to be named a participating carrier in any case. The commonly accepted rules for alphabetizing shall be used, with the key part of the name shown first. In the case of trade names and partnerships, the names of the individual or partners are to follow, but away from the left margin. Where one carrier leases and operates another (section 210a(b) of the Act), the name of the lessor (which is to be followed by the lessee name) controls its position in the list. The name or part of the name controlling its alphabetical position should be in upper case characters if the tariff employs both upper and lower case.

(2) When reference to a concurrence is shown in an agent's tariff, the carrier to whom it has been given shall be indicated.

(f) *Indexes of commodities, origins, and destinations.*—(1) *Intent of Commission.* The tariff user must be provided with a quick, direct, and ready means to determine whether or not the tariff names a rate, rating or charge governing line-haul transportation as to any given traffic, and if so, where it may be found in the tariff. The Commission reserves the right to require reissue of any tariff which it believes does not afford the user adequate means for this purpose.

(2) *Indexes of commodities.* (i) Each tariff naming commodity rates and each rate tariff naming ratings or classes constituting exceptions to the classification shall contain an alphabetically arranged index of articles together with a reference to the number of each item (or page) where such article is shown. The index shall list each article on which the tariff shows a commodity rate or shows an exception rating or class.

(ii) When nouns are not sufficiently explicit, articles shall be indexed also under the names of descriptive adjectives. All of the entries relating to different kinds or species of the same commodity shall be grouped together. For example, "Paper, building; paper, printing; paper, wrapping."

(iii) When articles are grouped together in one list under a generic heading as authorized in § 1310.7(g)(3) (rule 7), such generic name shall be shown in the index and opposite thereto shall be shown reference to each item (or page) where the generic term is used. Each article in the generic list must be shown separately in its proper alphabetical order in the index together with reference to each item (or page) where such article is shown by name, but when such article appears only in a generic list, reference to the items (or pages) containing rates or ratings (classes) may be omitted provided reference is given to the generic name as it appears in the index.

(iv) Tariffs naming rates on "all freight" shall list the term in the index but need not list each article embraced in the term.

(v) The index may be omitted if

(*a*) All of the commodity rates to each destination in a general commodity tariff or a combined class and commodity tariff are arranged in alphabetical order by commodities; or

(*b*) The tariff names rates or exceptions on only "all freight."

(3) *Indexes of origins and destinations.* (i) Tariffs which name specific point to point rates shall provide an index of all points from which rates apply and a separate index of all points to which rates apply showing the states in which points are located. All generally recognized points (cities, towns, townships, and other named state locations that have a precise meaning territorially) of sufficient size located within the territorial coverage of the tariff shall be listed. The points shall be arranged alphabetically within each state and the states arranged alphabetically, or the points shall be arranged alphabetically througout the index. When all or substantially all the rates named in the tariff apply in both directions between the points shown therein, the points of origin and destination may be shown in one index. If there be not more than 12 points of origin or 12 points of destination, the names of such points may, if practicable, be shown in alphabetical order on the title page. In this event, the index of such points of origin or destination, or both, as the case may be, may be omitted.

(ii) When the traiff names rates for the account of more than one carrier, the index shall provide directly with such point the complete names of all carriers serving the point pursuant to the regular-route portion of their operating authorities from this Commission. The complete names of all carriers serving the point pursuant to the irregular-route portion of their operating authorities from this Commission shall also be shown to the greatest extent practicable. The name of a carrier serving the point pursuant to both types of authorities shall be shown only once. Omission of the showing of a carrier as serving a point does not in itself render inapplicable a rate named from or to such point. Carrier name abbreviations or code designations may be used provided they are explained in the tariff in which used. Where desirable the rate tariff may refer to a separate publication (not a rate tariff) for the name or names of carriers serving the points appearing in such rate tariff.

(iii) If a tariff names a rate from or to a state or county without specifying the points in such state or county, at the beginning of the appropriate index shall be shown a reference to the number of the item (or page) containing such rate.

(iv) If rates are shown in a tariff by rate bases or by named, numbered, or lettered territorial groups, the indexes shall show the basis or group to which each point is assigned. When reference is made to a separate publication as provided in § 1310.18 (rule 18) for lists of points in such groups, such points may be omitted from the indexes. In this event there shall be shown in the table of contents the number of the item (or page) giving reference to the separate publication and there shall be shown at the beginning of the index of points (if the tariff contains any such index) reference to the separate publication.

(v) If rates are published in items, the indexes of points shall show the numbers of items in which rates from or to such points appear. When rates are not published in items, the indexes shall show the numbers of the pages on which rates from or to such points will be found.

(vi) The index of origins or destinations may be omitted if

(*a*) Points of origin or of destination are shown in the rate or rate basis tables in groups arranged by states, the points being in alphabetical order in the groups and such groups also being in alphabetical order of states; or

(*b*) Points of origin or destination are shown in rate tables in continuous alphabetical order throughout the tariff: *provided,* That, when the tariff names rates for more than one carrier, information will be included showing the carrier or carriers serving the various points.

(vii) If points are arranged in commodity items in alphabetical order or in numerical sequence by index numbers and such commodity items are referred to in the index of commodities required by paragraph (f)(2) of this section, such item numbers may be omitted from the indexes of points.

(viii) When points are arranged in rate tables in alphabetical order and indexes of points of origin and destination are not included in the tariff, the table of contents shall refer to the pages on which the rate tables showing an alphabetical list of points are to be found. Also, when points are grouped in rate tables by states, the table of contents shall give reference to the pages on which rates from or to points in each state will be found.

(g) *Statement of operating authority in rate tariffs.* (1) Tariffs naming rates (for account of regular or irregular route motor carriers) must either define clearly the carriers' authorized operations, both as to commodities and territories, insofar as they are pertinent to the application of the rates and routes, or must contain reference to a separate governing publication (not a rate tariff) containing such provisions and on file with this Commission. Such governing publication must be one authorized by § 1310.19 (rule 19). Unless a separate tariff is referred to which has provisions restricting the application of rates and provisions to the extent of carriers' operating authorities, the application of the rate tariff shall be restricted by a provision published therein as follows:

Rates and provisions named in this tariff, or as amended, are limited in their application on interstate or foreign commerce to the extent of the operating rights set forth ["below" or "in items ——"]. Unless otherwise specifically provided, the provisions are to be interpreted in the same manner as the Commission interprets the certificate from which the following is quoted, with respect to such as implied authority, commercial zones, tacking (of separate authorities), and diversion routes.

If the tariff names joint intermodal rates, the wording may be modified so as to confine the restriction to apply only to the extent the rates apply over the motor carriers.

(2) The limitation statements, reproducing a carrier's operating authority, should not be used as a substitute for the required description of commodities or territories in connection with the application of rates.

(h) *List of governing tariffs.* (1) Except where the regulations in this part permit omission of reference to certain kinds of governing tariffs, each tariff governed in any way by others must provide a list of such tariffs, arranged in columnar form, the columns headed as follows:

Tariff No.
ICC (MF-ICC) No.
Title or Kind of Tariff
Issuing Agent or Carrier
Governs to the Extent Provided in Items

Each such governing tariff shall be separately listed, the information called for by the headings fully explained, and the table headed by a provision reading:

This tariff is governed, except as otherwise provided herein, by the following described tariffs, and by supplements or loose-leaf page amendments thereto or successive issues thereof:

If there are no separate items explaining or further qualifying the application of any such particular tariff, the last column should be omitted.

(2) Except as otherwise specifically authorized by the regulations in this part, a rate tariff may not refer to another rate tariff for governing provisions and may not contain provisions purporting to govern another rate tariff; nor may a governing tariff contain any rule which in effect would permit a rate tariff to be governed by another rate tariff. Except as otherwise specifically authorized by the regulations in this part, a tariff issued by an agent may not refer to a tariff issued by a carrier or a tariff issued by another agent as a governing tariff. A tariff issued by a carrier may not so refer to a tariff issued by another carrier. A carrier may not publish and file local rates to apply for another carrier, nor any joint rates in which it is not a party.

(i) *Rules and other provisions which govern the tariff.* (1) Unless a separate tariff is published for this purpose (see § 1310.17(d) (rule 17) and except as to those explanatory statements treated in paragraph (k) of this section, all of the rules or provisions stating conditions which in any way affect the rates named in the tariff shall be entered under this heading in a rate tariff. A rule affecting a particular item or rate must be specifically referred to in such item or in connection with such rate, except that provisions affecting more than one but not all of the rates in the tariff or applying to only a portion of the carriers for which the rates are published may be included in the explanatory statements authorized in paragraph (k) of this section.

(2) Each rule or similar provision must be given a brief, but descriptive, title.

(3) Except as otherwise specifically authorized in the regulations in this section, no tariff may include any rule or other provision which in any way or in any terms authorizes substituting a rate for any other rate or substituting a rate made up by means of a combination of rates, nor any rule to the effect that traffic of any nature will be "taken by special agreement," "taken at carrier's convenience," or other provisions of like import.

(4) Tariffs which contain rates for the transportation of dangerous articles (hazardous materials) shall also reproduce the regulations promulgated by the Department of Transportation governing the acceptance and transporation thereof, or must bear specific reference to a separate tariff which contains such regulations (see §§ 1310.17(d) and 1310.17 (e) (rule 17)).

(j) *Exceptions to classification classes, ratings, and rules.* (1) Exceptions made to classification classes or ratings, and rules, which apply only for the rates published in one tariff must be published in that tariff, and shall:

(i) Be published in a separate tariff section headed "Exceptions to the Governing Classification" or "Exceptions to the Governing Classification and Tariff of Exceptions Thereto" (see paragraph (j)(4) of this section for alternative plan).

(ii) Be arranged in the same order as they appear in the classification.

(iii) Be complete in itself (if a rule) by republication of the complete rule as amended by the exception, and identification of the rule in the classification (and in the tariff of exceptions, if any) and the part being changed. If, however, the exception is to make the rule not applicable, it need not be republished in full.

(iv) Describe the commodity (if a commodity exception) either in the same words, or as close thereto as possible, used in the classification, and use the generic heading (if any) appearing in the governing classification under which the article would otherwise fall.

(v) Indicate if classes or ratings have any-quantity, less-than-truckload, truckload, volume, or other clearly defined quantity application.

(vi) Provide in the rate tariff for the nonapplication of any exception in a separate tariff, if any, to the same class, rating, or rule, or to the same part of the same rule.

(2) Different classes or ratings on the same article, articles, commodity, or commodities based on different minimum quantities may be published provided the lowest charge resulting from any such class or rating applied in connection with its published minimum (or actual quantity shipped, if greater) is made applicable by publishing such classes or ratings in the same item and by providing in connection with such item a rule to the effect that the lowest charge obtainable under the different classes or ratings and minimums applicable thereto (or actual quantities, if greater) will be applied.

(3) Exceptions may not be alternated with exceptions in another tariff or with classes, ratings, or rules in the classification. A statement providing that the class, rating, or rate on any article will be that applying to another article is not permissible.

(4) Exceptions to classification rules (not classes or ratings) may be included in the same section containing the rules authorized by paragraph (i) of this section, in which event the heading for the combined section must contain reference to the inclusion of both kinds of provisions, and the heading for the exceptions

V 38-149 AUG 3 73 XUM

section must refer to classes or ratings only.

(k) *Explanatory statements.* Tariffs shall contain such explanatory statements as may be necessary to remove all doubt as to the proper application of the rates and rules contained therein. When rates are published for account of any carrier under authority of a concurrence or of a limited power of attorney, and the rate application should accordingly be restricted there shall be included in this section of the tariff an explicit statement clearly indicating to what extent the published rates apply for account of such carrier. Only such specific statements as are required to indicate the application with respect to particular carriers should be included in this section. The name of the carrier must be shown in the caption or heading of the item. General rules relating to the application of the rates should be published under paragraph (i) of this section.

(l) *Statement of rates.* Rate tariffs shall show a statement of rates applicable for the transportation of the articles or class of articles on which rates are named therein, arranged as set forth in § 1310.7 (rule 7).

(m) *Statement of routes.* A clear and explicit statement of routes over which the published rates apply prepared in accordance with the provisions of § 1310.8 (rule 8) shall be shown.

(n) *Explanation of reference marks, notes, and abbreviations.* (1) The use of reference marks and note references should be held to a minimum for the convenience of the tariff user. Abbreviations should be confined to commonly used ones in business and commerce, and to carrier-name abbreviations and/or designations (but only if the carrier is repetitively referred to).

(2) If a reference mark, note reference, or abbreviation is not explained in the item or unit itself, or on the page on which it appears, then the explanation must be provided in a location assigned for that purpose at the end of the tariff. A separate unit for each category—reference marks, note references, and abbreviations—is required. The unit for reference marks explanation shall be a numbered item. If the explanation of a reference mark or note reference does not appear on the page where used, such page must refer to the page where the explanation is given.

(3) Carrier name abbreviations or code designations may be included as part of the List of Participating Carriers if one is published within the tariff, provided a statement to that effect is included under the Explanation of Abbreviations.

(4) State name abbreviations shall be explained unless they are abbreviations adopted by the U.S. Postal Service for official use.

The abbreviation Cwt. may not be used. The following commonly used abbreviations are acceptable without explanation and will have the meaning shown in connection therewith:

Abbreviation	*Explanation*
&	and
Ave	avenue
Blvd	boulevard
bldg	building
Bros	Brothers
¢	cents
Co	Company
Corp	Corporation
cu	cubic
$	dollars
E	East
etc	and so forth
e.g.	for example
Ft	Fort
ft	foot, feet
gal	gallon
i.e.	that is
in	inch
Inc	Incorporated
lb	pound
Ltd	Limited
Mfg	Manufacturing
Mt	Mount, Mountain
N	North
PO	Post Office
Rd	Road
S	South
St	Street
US	United States
wt	weight
W	West

(5) Carriers and agents should, to the greatest extent possible, avoid using the same reference mark or note reference for different purposes in a tariff. Otherwise, the explanation thereof must appear on the page where used. If used for different purposes on the same page, the explanation must appear in each item or unit where used. A reference mark or note reference may not be used for different purposes within the same item or unit.

(6) The following reference marks (symbols) shall be used in the exact form shown for the purpose indicated and shall not be used for any other purpose.

↓ or (R)	to denote reductions
↑ or (A)	to denote increases
▲ or (C)	to denote changes which result in neither increases nor reductions in charges
●	to denote no change in rate (see § 1310.10(f) (rule 10))
+	to denote intrastate application only
□	to denote reissued matter (see § 1310.10(g) (rule 10))

When alternative reference marks (symbols) are provided in this subparagraph, one should be used exclusively throughout the tariff, as amended. New or added matter on which the prescribed reference marks (symbols) in this subparagraph would not be appropriate shall be indicated as "New," "Addition," or "Add" or bear a reference mark of the carrier's or agent's choice properly explained.

(7) The mark □ or ( ) is an acceptable substitute for the □ if compilation is by typewriter and it has no means to construct the latter mark. If substituted, the use must be consistent throughout all supplements of the tariff and the other two forms may not be used for any purpose.

§ 1310.7 Statement of rates (Rule 7).

(a) *Rates must be clear and explicit.* (1) The Act intends tariffs to be for the information of and use by any and all members of the public, not just for professionals. The regulations in this section are intended to insure, to the greatest extent practicable, that tariffs are so constructed that not only are they readable from a physical standpoint, but that their terms and conditions are susceptible to ready understanding and application. To protect the interest of the general public in this respect, the Commission through its Bureau of Traffic may reject or require correction, of any tariff provision which in its judgment is not sufficiently clear, explicit, and self-explanatory for this purpose.

(2) All rates and governing provisions or restrictions shall be clearly and explicitly stated, together with the names or other proper designations of the places from, to, between, or within which they apply. Rates may only be stated in cents, in dollars, or in dollars and cents in lawful money of the United States. They shall be stated to apply per 100 pounds, per ton, or other standard United States or defined (in the tariff) unit, but, except as otherwise specifically provided in this paragraph, not unit of time nor per cubic foot or other space-occupied basis. Per trailer, per truck, per truck-mile, per container, per package, or other variable unit is permissible provided the measure of the service is fixed by defining the unit specifically, or in "maximum" terms, such as a stated maximum weight of contents permitted per truck or container of a certain maximum cubic capacity or measurement, or stated maximum dimensions or weight per individual package. Per-hour and other time-based units are permissible for terminal and other services under § 1310.15 (rule 15). Rates otherwise complying with this section may be subject to a minimum charge which employs a time factor, which, however, may not be less than a defined weekly period—such as a stated amount per defined vehicle per calendar week. Rates stated simply as "per ton" or "per net ton" and not defined shall apply per ton of 2,000 pounds and the term need not be defined in the tariff. If a different weight quantity is to apply, other terms must be used and defined, for example "per ton of 2,240 pounds." Rates must be stated as having any-quantity, less-than-truckload, truckload, volume, or other clearly defined quantity application.

(3) If the rates on a page, or in a table or column, are generally to apply per 100 pounds or other one unit, that fact may be stated in the caption or heading thereof with the addition of "except as noted" or other words of like import if exceptions are to be made. If for an entire tariff, this fact may be stated on the title page of the tariff. If done, the statement of unit of application need not be repeated each time in connection with each rate.

(4) The names or other proper designations of the places from, to, between, or within which the rates are published to apply must be shown. The rates may be stated as applying from, to, between, or within named states, counties, cities, towns, townships, or other named state locations that have a precise meaning territorially; or described areas provided the limits of such described areas are in geographical terms, such as named rivers or numbered highways, or by established political boundaries, such as state or county lines. Code letters and/or numbers may not be substituted for names of origins or destinations in items unnecessily. Subject to the provisions of paragraph (a)(5) of this section, rates may be published to apply from or to a plant site, construction site, etc. Rates may not be stated as applying to the commercial zone of a point, as defined by the Commission, unless the appropriate description referred to is published in the tariff or in a governing tariff.

(5) When rates are published to apply from or to a named plant site, construction site, or other site, the location of the site must be identified as specifically as possible. For example, the "plant site of John Doe Manufacturing Company, on U.S. Highway 10 approximately 23 miles east of A Town, Z State." The terms "near" or "near or at" should be avoided, unless they contribute still more specificity. Rates may not be published to apply from or to a named shipper or receiver (except for the purpose of identifying the site), or from or to a named site located within a city, town, or township unless the carrier's operating certificate is so restricted in the same words.

(6) Where it is necessary to carry over part of a rate item or table to a succeeding column or page, general captions to which the continued material is subordinate, and any explanation of column headings necessary for an understanding of such material must be repeated.

(7) All rates and provisions must be arranged in a simple and systematic manner. Complicated plans, including ones requiring multiple-step computing not authorized herein, may not be used. Ambiguous, conflicting, or indefinite terms, rules, or other provisions affecting or governing the application of rates are prohibited.

(8) Except as specifically authorized, a rate item or other rate unit may not refer to another rate item or other rate unit for commodity descriptions or other application, and a rate may not be stated as applying only in the absence of another rate, or as applying regardless of another rate named to apply.

(9) Joint rates having intermodal application only over motor and off shore water carriers, and rates restricted to apply only on shipments having a prior or subsequent movement by off shore water carriers may be stated in cents, in dollars, or in dollars and cents per cubic foot, provided it is clearly and explicitly stated how the determination is made.

(10) Tariffs should contain a rule governing what shall apply on returned undelivered shipments. In the absence of such a rule, the following shall govern. Any class or commodity rate published to apply over a named route or routes in one direction effective on the date of return is applicable on the undelivered shipment returned over the same route but in the reverse direction. However, if there is another rate specifically published to apply on the considered shipment being returned, over the same route, which results in a lower total charge, that rate shall apply in the absence of provisions to the contrary.

(b) *Arbitraries.* A tariff may provide rates from or to designated points by the addition of arbitraries to rates shown therein from or to named base points. Provision for this shall be shown either in a separate item in the same tariff, which must specifically name the base point and clearly and definitely state the manner in which such arbitraries shall be applied, or in a separate rate basis tariff as provided for in § 1310.18 (rule 18). Arbitraries, or any provision for addition or subtraction of any amounts, may not be published to construct rates to apply from or to the base point itself, or to differentiate between commodities, nor may any tariff provision be made, whether in the same tariff or in a governing tariff, for accrual of the charges to a certain carrier or carriers, or for division of the revenue between carriers.

(c) *Percentage, fraction or multiple of class rates.* Except as otherwise provided in this paragraph, for each classification or exception class rating governing class rates, the tariff naming the class rates must name a rate for that class rating. A statement that a class rate for a class rating shall be a percentage, fraction, or multiple of another rate is prohibited. However, the same rate tariff may provide a table which shows in one column the class rate and in succeeding columns the actual rates representing the various percentages, fractions, or multiples of such class rate. Class rates for certain class ratings may be omitted, provided there is a statement that in such cases the next higher class rating shall be used.

(d) *Minimum quantities.* When a rate per 100 pounds, per ton, or other weight or quantity unit stated as being a truckload (not "per truck", etc.—see paragraph (a)(2) of this section) rate or volume rate is published, a minimum quantity on which the rate is published to apply must be provided in that tariff, except as otherwise provided in paragraph (g) of this section authorizing separate lists tariffs or combined exceptions and lists tariffs. Where a rate or rating refers to a separate list elsewhere in the same tariff or in a different tariff, the minimum quantity or quantities (if any) applicable shall be stated in direct connection with the rate or rating, unless different minimum quantities apply to different commodities. In the latter case, the minimum quantities may be shown in the list.

(e) *Rates based on varying quantities.* Different rates based on different minimum quantities may be published, provided the lowest charge resulting from any such rate applied in connection with its published minimum (or actual quantity shipped, if greater) is made applicable by publishing such rates in the same item or in different columns on the same page and by providing in connection with such items or rate columns a rule to the effect that the lowest charge obtainable under the different rates and minimums applicable thereto (or actual quantities, if greater) will be applied.

(f) *Mixed shipments.* If two or more commodities are listed in connection with a rate or rating application, there must be a clear statement as to whether the rate or rating applies on straight shipments only, on a specific mixture of such articles only, or on straight or mixed shipments. If one or more of such commodities are to be subject to a rate or a minimum quantity or both, different from the others, how the minimum charge per mixed shipment is to be determined must be made clear. This is also required if two or more rates or ratings, based on different minimum quantities, are provided for the same commodity. Where different rates or ratings, or different minimum quantities are so provided, there must be a statement published to the effect that the deficit, if any, in the applicable minimum weight shall be rated at the lowest rate or rating used for any commodity in the shipment.

(g) *Generic terms.* (1) A tariff may provide for the transportation of an entire plant to a new location by publication of a point-to-point commodity rate published to apply on commodity descriptions employing generic terms. The rate may not be published to apply in both directions. The rate and related provisions must be indicated to expire with a specific date not later than six months from their effective date, which may be extended for an additional period totaling not more than 12 months (only) from the original date by republication. All provisions must terminate at that time. The tariff must specifically state that the rate covers a movement of a plant, name the classes of articles to be transported under the rate, and provide either that the rate does or does not include transportation of raw materials or finished or semifinished products, in substantially the following form:

> Rate covers the movement of a plant to a new location only and applies only on the articles that are actually a part of the equipment, furnishings, materials, and supplies of such plant. [Here state whether or not the rate includes raw materials or finished or semifinished articles of manufacture or stock]

to which should be added for inclusion or exclusion, for clarification purposes, classes of articles in connection with which there may be doubt as to whether or not the broad description covers or excludes. For example: Tools; machine parts, used; office furniture, equipment, machines, and supplies.

(2) Commodity rates may be published to apply on straight (a single commodity) or mixed (two or more commodities)

V 38-149 AUG 3 73 XUM

shipments of "all freight" without naming the individual commodities embraced in such term. Only the term "all freight" is authorized. The rates may be restricted to not apply on one or more commodities provided such commodities are specifically described. To avoid conflicting or duplicating rates (which are prohibited by paragraph (j) of this section), a notation reading substantially as follows may be shown:

Rate does not apply on a straight shipment of a single commodity where there is published to apply on such shipment a specific commodity rate.

(3) Except as otherwise authorized in paragraph (g) (1) and (2) of this section, a commodity rate item may, by use of a generic term, provide rates on a number of articles without naming such articles, provided such commodity item contains reference to an item (not a rate item) in the tariff which contains a complete list of such articles, or contains reference to a separate tariff (not a rate tariff) containing such a list, or both. Example: "Packing house products, as described in item ___ or successive issues thereof," or "Packing house products, as described under heading 'Packing house products' in ICC (or MF-ICC) ___, supplements (or loose-leaf page amendments) thereto or successive issues thereof." The separate list must bear a commodity caption (for example "Chemicals, namely:") and the caption must be worded identically with the reference thereto. Reference may not be made to a separate list for only a portion of the commodities included in the list nor restricted to those which are subject to certain ratings. The commodities in each list must be alphabetically arranged.

(4) A separate tariff, not containing rates and not a classification (see paragraph (g)(5) of this section), may be filed by a carrier or an agent, showing lists of the commodities and minimum quantities, on which rates published by reference to generic terms will apply, and rate tariffs may be made subject thereto as provided above. The title page of such separate publication shall contain the following notations:

List of commodities upon which rates are provided in tariffs making reference hereto, and

This tariff may be used only in connection with tariffs making specific reference hereto by ICC (or MF-ICC) number.

Except as provided in § 1310.17(c)(4) (rule 17), pertaining to combined exceptions and lists tariffs, a separate publication issued for the purpose of publishing generic lists shall contain no information other than that authorized in this subparagraph. Except as to reference to a classification for commodity descriptions (see paragraph (g)(5) of this section), only one such publication may be in effect at any time in a carrier's or agent's file and it may list only generic terms which refer to 10 or more commodities. Otherwise the tariff of rates shall specify each commodity upon which the rates therein apply. A tariff of rates may not refer to another tariff of rates for lists of commodities.

(5) A rate tariff (only) may refer to a classification (see § 1310.17 (rule 17)) instead of, or in addition to, a separate list tariff for description of articles on which rates published by reference to generic terms will apply. The reference may be restricted to the descriptions in certain identified items under the generic heading referred to. A rate item may also refer to certain items in the classification for a more complete description of the commodity named instead of for purposes of a list of commodities. In this event, the commodity term used in the rate item must embrace the commodities in such classification items, and the use of the classification items must be necessary only for the descriptive details, governing conditions and requirements, or other material. The rate tariff must clearly indicate whether or not the reference to the classification items is intended to embrace any reference therein in turn to notes, qualifying conditions, and other matter published in conjunction with the classification items.

(h) *Commodity rates.* (1) Except as otherwise provided in paragraph (g) of this section, when commodity rates (including column commodity rates—see § 1310.29 (rule 29)) are established, the description must be specific and the rates thereon may not be applied to analogous articles. As far as possible uniform commodity descriptions should be used in all tariffs. If the carrier or agent anywhere maintains class rates governed by a classification, the article on which the commodity rate is published to apply shall be described either in the same words used in the classification or as close thereto as possible. If the article appears under a generic heading in the classification, the rate tariff must also show that exact heading and the commodity as subordinate to it.

(2) If a commodity rate (distance or otherwise) is published, such commodity rate, except as otherwise provided in these rules, is the applicable rate and the only rate that may be applied from and to the same points over the route or routes over which the commodity rate applies, even though a class rate (except as provided in this paragraph, paragraph (n) of this section, and § 1310.13 (rule 13)) may make a lower charge.

(3) When, because of differences in minimum weights, package requirements, mixed quantity provisions, or other conditions, the charges accruing under commodity rates result in higher charges than those accruing under the class rates published in other tariffs, provision may be made in a tariff containing commodity rates only, for the alternation of such rates with class rates published in not more than three other tariffs, provided that the commodity tariff contains specific reference to the class tariffs and shows in connection with each reference a complete description of the origin and destination territory shown in that tariff. The following notation must be shown in the commodity tariff under the application of rates:

If the charges accruing under the class rates published in the following tariffs, including supplements or loose-leaf page amendments thereto or successive issues thereof, from and to the same points via the same routes are lower than the charges accruing under the commodity rates published in this tariff, the lower charges resulting from such class rates will apply. [Here show ICC (or MF-ICC) numbers of the class tariffs and the required description of each.]

(4) If a commodity tariff contains only a few rates which result in higher charges than would accrue under the class rates, the reference to the class tariffs prescribed herein should be shown immediately in connection with such commodity rates or may be shown in a separate item shown under an appropriate heading and reference to such item shown immediately in connection with the commodity rates.

(5) Great care should be exercised in describing the territorial application of the class tariffs in order that users of the commodity tariff may determine without examining the class tariffs, which of such class tariffs is to be used in connection with any commodity rate. The alternative application of commodity rates in one tariff with class rates in another tariff may be resorted to only where there is real necessity therefor, and that wherever possible, the commodity rates should be revised so that they will not exceed the class rates between the same points.

(i) *Rates of a carrier must be in limited number of tariffs.* (1) It is the sense of the regulations in this paragraph that rates be so published that the user of a particular tariff may expect that as to the issuing carrier or as to a carrier named as a participant therein the tariff will contain all the issuing carrier's local rates and all joint rates via joint routes provided for therein, of a particular kind (class or commodity), on a considered commodity and shipment if within the scope of the tariff application and unless specifically restricted otherwise.

(2) Except as otherwise provided in this paragraph, a tariff naming any local class rate for a carrier must name all that carrier's local class rates published to apply within the scope of that tariff, and a tariff naming any local commodity rate for a carrier must name all that carrier's local commodity rates published to apply within the scope of that tariff.

(3) Except as otherwise provided in this paragraph, a tariff published in the name of a carrier containing any joint class rate or containing any joint commodity rate, or a tariff published in the name of an agent containing any joint class rate or containing any joint commodity rate for a carrier who participates therein under a power of attorney, must contain all of that carrier's joint class rates or must contain all of that carrier's joint commodity rates, as the case may be, published to apply within the scope of that tariff in connection with the carriers parties thereto, irrespective of differences, if any, as to the point of interchange between such carriers.

(4) When carriers participating under powers of attorney in joint-rate application with other carriers, but not with each other, in tariffs having the same scope, but published by different agents, wish to establish a joint rate with each other, such rate may be published in either agent's tariff.

(5) Distance or mileage rates, or commodity column rates (column commodity rates) may be published each in a separate tariff for that particular kind of rates only. Each of such tariffs must, in all other respects, comply with the requirements of this paragraph.

(6) Rates for a special type of service, such as for pool-truck distribution, or assembling or distribution rates under Section 408 of the Act, need not be included in the same tariff with rates for regular service or for other special type of service, but if not, the requirements of this paragraph must, in all other respects, be complied with as to each such tariff as to that particular service. Rates providing merely a lesser or greater degree of service on what essentially is the same traffic (for example, rates which do not include pickup or delivery service, or rates which apply only when transit service, included in the rate, is performed on the shipment) are not rates for a special type of service within the meaning of this subparagraph.

(7) If a carrier wishes as to a certain commodity or commodities to publish in a tariff some local commodity rates, or some joint commodity rates in connection with a certain carrier or carriers, which are encompassed within the scope of another tariff, the latter tariff must provide that it names no local rates for account of that carrier, or no joint rates for the account of that carrier in connection with the other carrier or carriers, as the case may be, as to that commodity or commodities, identifying clearly the commodity or commodities without use of undefined generic terms. The restriction published for this purpose in the tariff must be a general one, and may not be provided for by individual restrictions in rate items or in connection with specific rates.

(8) For the purpose of this paragraph, the "scope" of a tariff means the commodity and territorial coverage of a tariff. The publication of rates on a commodity or commodities, whether in straight or in specific mixture shipments (including rates on "all freight" and like terms), establishes the commodity coverage as being that commodity, commodities, or specific mixture of commodities, as the case may be. The publication of rates from an origin area or to a destination area establishes the origin territorial coverage or destination territorial coverage as one blanketing the area bounded by a line drawn through the outermost of such origins or such destinations and this includes all points within such boundaries whether or not a rate is published from or to such points.

(j) *Conflicting or duplicating rates prohibited.* The publication of class or commodity rates which duplicate or conflict with the rates published in the same or any other tariff over the same route is not permissible. Except as otherwise authorized in the regulations in this part, the publication of a statement in a tariff to the effect that the rates published therein take precedence over the rates published in some other tariff, or that the rates published in some other tariff take precedence over or alternate with the rates published therein, is prohibited. (See also paragraph (a)(8) of this section.)

(k) *Through rate applies.* When a carrier or carriers establish a local or joint rate for application over any route from origin to destination, such rate is the one that must be applied by such carrier or carriers over the authorized route, notwithstanding that it may be higher than the aggregate of intermediate rates over such route. No rule may be published which provides for the use of any such aggregate, if lower.

(l) *Proportional rates.* Tariffs containing proportional rates must clearly and definitely show the application thereof. If a proportional rate is intended for use on traffic destined to a restricted territory, such territory should be clearly defined. For example, a tariff naming a proportional rate to St. Louis, Missouri, intended for use on traffic destined to points in Kansas, shall state that the proportional rate applies only for the purpose of constructing rates on traffic destined to points in Kansas. If the application of a proportional rate is not restricted, such proportional rate will be usable in connection with any other applicable rates from or to the proportional rate point. A statement that proportional rates apply from (or to) points from (or to) which no through rates are published must not be used, as such a statement is not sufficiently definite to restrict the application of the rates and such proportional rates could not in any event be applied on traffic on which applicable through one factor rates are published. However, proportional rates may be published to apply only on traffic from or to (or from and to) points on the line or lines of a particular carrier or carriers. It is not permissible to include a provision in a tariff to the effect that proportional rates will be stated percentages of other rates.

(m) *Export, import, coastwise, and intercoastal rates.* (1) Export, import, coastwise, and intercoastal rates, when so designated, whether class or commodity, take precedence over rates (either class or commodity), not so designated, published to apply between the same points, over the same route, on export, import, coastwise, or intercoastal traffic, as the case may be, and tariffs containing such rates or governing tariffs must so provide, and must define such terms.

(2) Ocean carriers operating between ports of the United States and foreign countries are not subject to the terms of the Interstate Commerce Act or to the jurisdiction of the Commission. The inland carriers of property exported to or imported from a foreign country by water must file their rates to the ports and from the ports, and such rates must be the same for all, regardless of what ocean carrier may be designated by the shipper, except as otherwise provided by section 28 of the Merchant Marine Act.

(3) When rates are published to apply on traffic exported or imported by ocean carriers, but not on traffic destined to or originating at the port, the tariffs containing such rates shall specify by inclusion or exclusion the countries to or from which traffic subject to such rates shall move, regardless of whether such countries are, or are not, adjacent to the United States. Tariffs shall also specify whether or not property destined to or coming from the Republic of Cuba, the Commonwealth of Puerto Rico, Guam, Hawaii, or the Canal Zone is subject to such rates. In the absence of a statement in tariffs limiting the application of export or import rates, such rates will apply on traffic destined to or coming from them.

(4) As a matter of convenience to the public, said inland carriers may also publish as information in their tariffs, in connection with the inland rate as provided in this paragraph, the steamship charges to or from foreign destinations. When this is done, such steamship charges may be changed without notice, but the rates of inland carriers to (or from) ports are subject to all provisions of section 217 of the Act and of the Commission's rules with respect to notice and form of publication. Tariffs containing such steamship charges must not be concurred in by the ocean carriers.

(5) Shipments exported and imported by ocean carriers may be forwarded under through billing, but through bills of lading must clearly separate the liability of the inland carrier or carriers and of the ocean carrier, and must show the tariff rate of the inland carrier or carriers.

(n) *Intermediate application of rates.* (1) By means of the rule authorized in this paragraph, the application of published class and commodity rates may be extended to intermediate points. Such rule may be used only to provide application from or to, as the case may be, points situated on the regular-route portion of a carrier's operating authority from this Commission. Any such rule published in a tariff must show in connection with it that it is applicable only as to points on the regular routes of the carrier.

(2) If the rule is published, it must be accompanied by a statement as to whether or not, for purposes of application of the rule, locations within one mile of a highway which may be served under the implied authority of the carrier's certificate shall be considered intermediate if the corresponding location on the highway is intermediate. Also, if off-route points (if any) authorized to a carrier to be served in connection with its regular route authority shall be considered intermediate if the point on such highway to which it is nearest is intermediate.

(3) The wording of the rules shall not be varied. Tariffs may, however, by appropriate provision published in connection with any such rules, provide that it

V 38-149 AUG 3 73 XUM

will apply only in connection with the rates or routes making reference thereto, or may provide for the nonapplication of any such rule to particular rates or routes.

(4) The rules applicable in connection with commodity rates shall read as follows:

COMMODITY RATES APPLICABLE FROM INTERMEDIATE POINTS

When any point of origin is not provided in this tariff with a commodity rate on a given article to a particular destination over a particular route, and such origin is between the considered destination and a point from which a commodity rate on the article is published herein over the same route to such destination, apply on such article the commodity rate from the next more-distant point from which a commodity rate is named thereon over the considered route through the intermediate point, except as provided in notes 1, 2, 3, and 4.

NOTE 1. When, by reason of branch or diverging routes, there are more than one more-distant points from which commodity rates on the article to be considered destination are named herein, apply the rate from the more-distant point which, on that article to the same destination over the same route, results in the lowest charge.

NOTE 2. If the intermediate point is located between two points from which commodity rates on the same article are published in this tariff to the same destination over the same route, apply that one of such rates which results in the higher charge. If, due to branch or diverging routes, there are two or more next more-distant points in the same direction, only that one of such points from which the lowest charge results will be considered in applying the provisions of this note.

NOTE 3. If the class rate on the same article to same destination over the same route from the intermediate point produces a lower charge than would result from applying the commodity rate under this rule, such commodity rate will not apply.

NOTE 4. If there is in any other tariff a commodity rate (not made by use of an intermediate-point rule) published for account of the same carrier or carriers on the same article from the considered intermediate point, applicable to the same destination over the same route, the provisions of this rule will not be applied from such intermediate point.

COMMODITY RATES APPLICABLE TO INTERMEDIATE POINTS

When any point of destination is not provided in this tariff with a commodity rate on a given article from a particular origin over a particular route, and such destination is between the considered origin and a point to which a commodity rate on the article is published herein over the same route from such origin, apply on such article the commodity rate to the next more-distant point to which a commodity rate is named thereon over the considered route through the intermediate point, except as provided in notes 1, 2, 3, and 4.

NOTE 1. When, by reason of branch or diverging routes, there are more than one more-distant points to which commodity rates on the article from the considered origin are named herein, apply the rate to the more-distant point which, on that article from the same origin over the same route, results in the lowest charge.

NOTE 2. If the intermediate point is located between two points to which commodity rates on the same article are published in this tariff from the same origin over the same route, apply that one of such rates which results in the higher charge. If, due to branch or diverging routes, there are two or more next more-distant points in the same direction, only that one of such points to which the lowest charge results will be considered in applying the provisions of this note.

NOTE 3. If the class rate on the same article from the same origin over the same route to the intermediate point produces a lower charge than would result from applying the commodity rate under this rule, such commodity rate will not apply.

NOTE 4. If there is in any other tariff a commodity rate (not made by use of an intermediate-point rule) published for account of the same carrier or carriers on the same article from the considered intermediate point, applicable from the same origin over the same route, the provisions of this rule will not be applied to such intermediate point.

(5) The rule applicable in connection with class rates shall read as follows:

CLASS RATES FROM AND TO INTERMEDIATE POINTS

From or to any point not named or referred to in this tariff which is intermediate to a point from or to which class rates are published herein through such unnamed point, the class rate published herein over the same route from or to the next more-distant point will be applied, except as provided in notes 1 and 2.

NOTE 1. When, by reason of branch or diverging routes, there are more than one more-distant points from or to which class rates are named herein, apply the rate published to apply over the same route from or to the more-distant point which results in the lowest charge.

NOTE 2. If the intermediate point is located between two points from or to which class rates are published to apply over the same route, apply the rate which results in the highest charge. When, by reason of branch or diverging routes, there are two or more next more-distant points in the same direction, only that one of such points from or to which the lowest charge results will be considered in applying the provisions of this note.

(6) Intermediate rules may not be published to apply on the same traffic on which unnamed points rules as set forth in paragraph (p) of this section have been published.

(o) *"From" and "to" intermediate rules may apply in connection with same rate.* When the rules providing application "from" and "to" intermediate points are both shown in connection with any class or commodity rate, they establish class or commodity rates from intermediate points of origin to intermediate points of destination on such classes or commodities. Unless otherwise provided in the tariff, intermediate application rules establish rates from or to intermediate points on the routes of carriers parties to the tariff without regard to the concurrence forms and numbers under authority of which carriers are shown as participating carriers.

(p) *Class rate from or to unnamed points.* (1) Where use of the class-rate intermediate rule is not permitted or will not suffice to cover all unnamed traffic generating or receiving points a carrier may serve, the rule authorized by this paragraph may be published as an alternative.

(2) Any tariff naming class rates may provide for the application of such rates from or to unnamed points by including the rule set forth in paragraph (p) (4) of this section. Before a tariff may include the rule, the tariff must provide, as a minimum, class rates for all points within the territorial coverage thereof which the carrier or carriers participating in the rule have authority to serve and which are shown as points on the official state maps issued by the particular state authorities or on commercial maps equivalent thereto. The maps must either be attached to the tariff and referred to for application, or be part of a governing tariff. The initial filing must be of current maps in use, and they should be replaced from time to time to maintain a reasonable currency.

(3) The rule may not be published to apply on class rates having a limited application, such as assembling and distribution rates, nor may it be published when intermediate rules have been published to apply on the same tariff.

(4) The rule shall read as follows:

CLASS RATES FROM OR TO UNNAMED POINTS

From any unnamed origin point located on a highway between two named points, apply the higher of the class rates provided from such named points.

To any unnamed destination point located on a highway between two named points, apply the higher of the class rates provided to such named points.

In each case, the named point must be the nearest named point on a highway (or highways) leading thereto from the unnamed point.

When, by reason of branch or diverging highways, there are two or more nearest named points equidistant from the unnamed point, the highest rated of the nearest named points will be used.

From or to unnamed points located on highways, but not located between named points, or from or to unnamed points not located on highways, apply the following:

When the distance between the unnamed point and the nearest named point is:	The rate from or to the unnamed point will be determined by adding the following arbitrary to the rate from or to the nearest named point.
Distance in miles (See Note)	Arbitraries in cents per 100 pounds
------ or less	----------
------ and over ------	----------

NOTE—In determining the distance, the actual distance over the shortest route over which a truck can operate shall be used. Distances shall be computed from or to the Post Office having the same name as the named point from or to which a rate is published (Use the main Post Office if it has more than one) from or to the actual place of loading or unloading. If the point named herein from or to which a rate is published has no Post Office by the same name, the distance shall be computed from or to the generally recognized business center of the community.

This rule does not authorize a carrier to handle shipments from or to points or via routes not within the scope of its operating authority.

If there is in any other tariff, a class rate published specifically to or from the unnamed point, for account of the same carrier or carriers, over the same route, this rule will not apply.

The definition of terms as used in this rule are as follows:

"Highway" means the roads, highways, streets, and ways in any state.

"Point" means a particular city, town, village, community, or other area which is treated as a unit for the application of rates.

"Unnamed" point is one from or to which class rates are not provided, other than by use of this rule. "Named" point is one from or to which class rates are provided in this tariff, other than by use of this rule.

§ 1310.8 Routing (Rule 8).

NOTE: See §§ 1310.22 and 1310.28 (rules 22 and 28) for provisions which may be filed on less than 30 days' notice.

(a) *Routing to be specified.* (1) Tariffs naming joint rates shall specify routes over which such rates apply or refer to a separate tariff or tariffs (see paragraph (b) of this section) for such provisions, or both. The routes must be stated in such a manner that they may be definitely ascertained. The names or other identifying abbreviations or numbers (abbreviations and numbers must be explained in the tariff in which used) of the carriers and the name of every point of interchange between such carriers must be shown. To the greatest extent practicable, the statement of the route should be complete, identifying each carrier and the point of interchange in proper order from origin to destination of the rate. Highway numbers need not be listed. Identification of the interchange point only as being any common point served by the carriers, or use of other indefinite provisions, is not permitted.

(2) Tariffs must provide that the joint rates therein apply only over the routes specifically shown.

(b) *Routing guide.* (1) A tariff (not a rate tariff) containing routes may be designated as a routing guide. When a tariff refers to a routing guide or guides for all of the routes over which the rates therein are published to apply, it must show the following notation:

The rates herein apply over the routes of the carriers parties to this tariff specified in ICC (or MF-ICC) ___, supplements (or loose-leaf page amendments) thereto or successive issues thereof.

(2) When a tariff refers to a routing guide or guides for routes in connection with some but not all of the rates in a tariff, or for routes for account of some but not all of the carriers parties to the tariff, an appropriate notation must be shown therein. When a rate tariff provides that certain rates published therein will not apply over all the routes shown in a routing guide to which the tariff is subject, the rate tariff shall show clearly what routes in the routing guide are not applicable, or are the only routes applicable, as the case may be, in connection with such rates. Such exceptions may not be published in the routing guide. Routing guides may not contain exceptions having a narrow application, such as by providing nonapplication or application in connection with certain identified commodity rates or rate items of certain tariffs.

(3) When a tariff which refers to a routing guide also shows routes, it shall show clearly whether the routes named therein are in addition to the routes shown in the routing guide or are the only routes over which the rates making reference to such routes will apply. No one rate may be made subject to more than one routing guide for account of any initial carrier except that interterritorial rates may be subject to one guide for each of such territories in which such a guide is published for that territory alone.

(4) A routing guide must be concurred in by all carriers over whose lines routes are provided therein.

(5) Routing guides shall show on their title pages the following notation:

The routes provided herein may be used only in connection with rates made subject thereto by specific ICC (or MF-ICC) reference to this guide in the tariff containing such rates. Its use in connection with any tariff is restricted to the carriers and to the application provided in such tariff.

(c) *Emergency routing clause.* The following provision may be incorporated into routing guides or under "Routing Instructions" in rate tariffs:

The rates named in [here rate tariffs shall show "this tariff" and routing guides shall show "tariffs made subject to this tariff"] will apply over the routes and through transfer points authorized herein except that when in the case of pronounced traffic congestion (not an embargo), detours or other similar emergency, or through carriers' error, carriers forward shipments by other transfer points of the same carriers or over the lines of other carriers parties to the tariff, the rate specified in [here rate tariffs shall show "this tariff" and routing guides shall show "tariffs making reference to this tariff"] (but not higher than the rate applicable over the actual route of movement) will be applied.

The words "or over the lines of other carriers parties to the tariff" may be omitted.

§ 1310.9 Supplements (Rule 9).

NOTE: See §§ 1310.14, 1310.22, 1310.24, 1310.25, 1310.27, and 1310.28 (rules 14, 22, 24, 25, 27, and 28) for provisions which may be filed on less than 30 days' notice.

(a) *Amendment by supplement.* (See paragraph (g) of this section—blanket supplements.)

(1) Apart from reissuing the tariff itself, the supplement is the vehicle for adding to, deleting, or changing provisions of a bound tariff. Paragraph (d) of this section provides the restrictions on the use of this means. (See § 1310.10 (rule 10) as to loose-leaf tariffs and § 1310.11 (rule 11) as to complete and partial cancellation of a tariff.)

(2) The first supplement to a tariff shall be desgnated as Supplement 1 either in the upper right-hand corner of the title page thus:

Supplement 1
to
ICC (or MF-ICC) ——

or in the center of the uppermost portion in connection with the carrier's or agent's own tariff number (not ICC number). Subsequent supplements shall be numbered consecutively in like manner. Whatever location is used for the first supplement must be also used for all subsequent supplements to the same tariff.

(3) Each supplement shall specify on its title page, immediately under the supplement and ICC (or MF-ICC) number (if the supplement designation is to appear in the upper right-hand corner) or immediately under the supplement and carrier's or agent's tariff number (if the supplement designation is to appear in the upper center portion) the publications which the supplement cancels. Cancellations must be specific. A statement that the supplement cancels conflicting portions of the tariff or prior supplements, or all provisions of a certain kind or application, may not be used.

(4) The numbers of the supplements in effect on the effective date of the supplement must be shown in the upper portion of the title page. Effective supplements of a special nature (suspension, postponement, adoption, general increase, etc.) should be indicated in the list as to their special nature and may be grouped separately.

(5) The matter contained in each supplement shall be arranged in the same general manner and order as the tariff which it amends. (See § 1310.25 (rule 25) for additional regulations governing adoption supplements.) When points in a tariff are given index numbers, the same index number must be assigned to the same point in all supplements to the tariff.

(b) *Updated lists of items and units in effective supplements.* Every supplement of eight or more pages issued to a bound tariff, except blanket supplements and general increase or reduction conversion table supplements, shall provide near the front of the supplement a cumulative list of all items and numbered units that have been added, canceled, or changed by supplement together with reference to the number of the supplement where each is last shown.

(c) *Index and table of contents.* A supplement of 5 or more pages must be properly indexed, and a supplement of 15 or more pages must also contain a table of contents. If the table of contents is published in a numbered item, see § 1310.10 (rule 10) *Amendments.* The table of contents or any index may be omitted if § 1310.6(c) or § 1310.6(f) (rule 6) does not require the tariff to contain a table of contents or such an index.

(d) *Number of supplements and pages permitted.* (1) A tariff is published to be used, and no tariff should be permitted to reach the maximum supplemental limits prescribed without a reissue already prepared to file with the Commission and distribute to users. Nor should a tariff be permitted to become so old or so much supplemented that little of the matter in the original tariff has application any longer, and copies are no longer obtainable. No tariff may be further supplemented that has been in effect for eight years, except to cancel, to announce a suspension, to announce an adoption, or

V 38-149 AUG 3 73 XUM

to comply with an order of the Commission and then only for the initial compliance action required. (For exception as to adopted publications see § 1310.25 (j) (rule 25).)

(2) Except as otherwise authorized, the following is the maximum number of supplements to a tariff that may be in effect at any time and the maximum number of pages they may contain.

Number of pages in original tariff (inclusive)	Number of effective supplements permitted	Maximum number of pages effective supplements may contain
1 to 2	None	None.
3 to 4	1 (see note)	2 (see note).
5 to 8	1	4.
9 to 16	2	8.
17 to 80	2, plus 2 additional supplements of not to exceed 4 pages each.	Not to exceed 50 percent of the number of pages in the original tariff.
81 to 200	3, plus 2 additional supplements of not to exceed 4 pages each.	
201 to 500	4, plus 2 additional supplements of not to exceed 4 pages each.	
501 to 800	5, plus 1 additional supplement of not to exceed 4 pages.	
801 or more	6, plus 1 additional supplement of not to exceed 4 pages.	

(NOTE: The tariff of 3 or 4 pages, if supplemented hereunder, must be canceled within 180 days of the effective date of such supplement.)

(3) A tariff may provide that it will be reissued periodically, but not less frequently than once a year. Such tariff must carry on its title page the notation:

A reissue of this tariff will become effective not later than [here name date].

This notation may not be changed or eliminated by amendment. Supplements may be issued to such a tariff without limit as to the number of pages in effective supplements, but the regulations pertaining to the number of supplements in effect at any time must be complied with.

(e) *Additional supplement to comply with order of Commission.* When the Commission, in a formal case, orders the cancellation of tariff matter or the establishment of tariff matter, the supplemental limits may be exceeded to the extent necessary to initially comply therewith (but not continuing compliance as to a continuing order), but if exceeded the next regular supplement issued to the tariff must republish or otherwise dispose of the initial publication, observing the prescribed supplemental limits. If the initial publication would result in exceeding the supplemental limits, the supplement may not contain any other matter and the title page must refer to this section for authority to exceed such limits.

(f) *Bridge supplements.* When a bound tariff is issued and filed canceling a prior issue, it is sometimes found necessary to establish, cancel, or change matter in the prior issue effective before the new issue becomes effective replacing it. If the action is intended to affect only the matter in the prior issue, the supplement, which must be on lawful notice, is to be issued only to the prior issue. If it is to affect matter in both tariffs, a separate supplement may be issued to each, or a bridge supplement may be issued which is a supplement to both. To do so by one publication requires a clear separation to be made therein as to the separate actions. A separate and appropriate supplement number must be shown as to each ICC (or MF-ICC) number. A separate effective date must be established as to each, which in the case of the new issue must be the same as the general effective date of the tariff. The contents must be separated as to each tariff and clearly identified as to the tariff it amends, and the item or other unit as to each tariff that is being added, canceled, or changed. If a bridge supplement is issued, the supplement to the old tariff need not be within the requirements of paragraph (d) of this section. Only one bridge supplement may be in effect at any time.

(g) *Blanket supplements.* (1) Ordinarily amendment of a tariff should be effected by issuance of a supplement to that tariff alone. However, it sometimes happens that the same or similar addition, deletion, or change of provision is to be made simultaneously in a substantial number of different tariffs. If the matter is susceptible to handling in this fashion, a blanket supplement (a common supplement issued jointly to several tariffs of the same agent or carrier) may be issued and filed, subject to the provisions and regulations of this paragraph.

(2) A blanket supplement may not be issued to less than five tariffs.

(3) Such supplements shall show on their title page, in lieu of printed supplement and tariff number designations, in the upper right-hand corner the following wording and spaces for later insertion of numbers:

Supplement ------ to ICC (or MF-ICC) ------

Before filing with this Commission, each copy shall have inserted in ink or by other permanent means the appropriate supplement number and the ICC (or MF-ICC) number of the tariff it supplements. The number of copies ordinarily required for each tariff supplemented shall be filed.

(4) The listing of the effective supplements as to each tariff may be omitted.

(5) On page 1 or a subsequent page, the number of each supplement and the number of each tariff supplemented, as a minimum, shall be shown in columnar form, under a caption reading "List of Tariffs Supplemented Hereby." Any additional provisions (such as cancellation notices, items containing matter held in effect, etc.,) must be similarly shown.

(6) Supplements may not be filed in blanket form to loose-leaf tariffs except for the same purposes for which the filing of individual supplements to such tariffs are authorized. (See § 1310.10(d) (rule 10)—amendments to loose-leaf tariffs.)

(7) Supplements published in blanket form need not comply with the indexing requirements of paragraphs (b) and (c) of this section.

§ 1310.10 Amendments (Rule 10).

NOTE. See §§ 1310.14, 1310.22, 1310.24, 1310.25, 1310.27, and 1310.28 (rules 14, 22, 24, 25, 27, and 28) for provisions which may be filed on less than 30 days' notice.

(a) *How made.* Any change in, addition to, or cancellation from a tariff shall be known as an amendment. Amendment of a bound tariff shall be made by reissue of the tariff or by issue of a supplement as provided in § 1310.9 (rule 9). Amendment of a loose-leaf tariff shall be made by reissue of the tariff or by issue or reissue of a page or pages as provided in paragraph (d) of this section. A loose-leaf tariff may also be amended by issue of a supplement (prepared as specified in § 1310.9 (rule 9)), but only for the purposes referred to in paragraph (d) of this section. A loose-leaf tariff may not be amended after January 1, 1979, except (1) to cancel; (2) to reissue as a bound tariff; (3) to announce a suspension; (4) to announce an adoption; or (5) to comply with an order of the Commission and then only for the initial compliance action required.

(b) *Participating carriers—how shown.* (1) Paragraph (b) (2), (3), and (4) of this section will not apply to participating-carrier tariffs. For regulations governing participating carrier tariffs, see § 1310.20 (rule 20).

(2) If an original bound tariff specifically names participating carriers, each supplement thereto must contain either a complete list of the carriers participating in the tariff, as amended, and show that it cancels the prior list, or shall state that the list of participating carriers is "as shown in the tariff" to which may be added "except [here shown cumulative list of corrections in, additions to, or cancellations from the list in the original tariff]." Only one such cumulative list may be in effect at any one time. The participating-carrier list may be published in numbered item form, in which case paragraph (c) of this section governs. The names of the carriers shall be listed alphabetically as provided in § 1310.6(e) (rule 6). When the participation of a carrier is canceled, the carrier's complete name shall be shown, together with the word "Cancel" or other suitable provision, but without reference to the power of attorney or concurrence. Each addition and cancellation of a carrier must be carried forward as reissued matter and not dropped.

(3) The list of participating carriers published in a loose-leaf tariff may be amended only by republication of the page upon which it appears. Additions, cancellations, and changes shall be indicated as such. Cancellations shall be republished on successive reissues of the list and the page, indicating when cancellation was first made effective, until all provisions in the tariff referring specifically to said carrier have been removed from the effective pages, after which the cancellation listing may be omitted.

(4) When the participation of a carrier is canceled, the supplement (when a bound tariff) or the page or pages (when a loose-leaf tariff) must also provide for the cancellation of rates and other provisions for the account of such carrier unless the cancellation of the carrier is in connection with the publication of a complete adoption of the rate of such carrier by another. (See § 1310.25 (rule 25)—Transfer of Operations; Changes in Name and Control.) The cancellation of rates and other provisions must be accomplished by either amending the individual pages (when a loose-leaf tariff) or items or other provisions affected or by the publication of a blanket cancellation notice specifically indicating that all rates and other provisions in the tariff applying for the account of the carrier are canceled. Such blanket cancellation must be shown in direct connection with the list of participating carriers and be referred to in the cancellation of the carrier's name from the list. As to a bound tariff, the blanket cancellation must be carried forward as reissued matter in the usual manner when the suplement is reissued. As to a loose-leaf tariff, it must be carried forward on successive reissues of the page (with a statement as to when the cancellation first became effective) until all provisions referring to the carrier have been eliminated by reissue. If the blanket cancellation notice alternative is used, the items and other provisions affected must be promptly amended to remove the canceled application. If the cancellation of provisions (whether specifically canceled or canceled by notice) becomes effective, any subsequent restoration of the canceled provisions, for any reason, must be by republication of such provisions.

(c) *Amendments to bound tariffs.* (1) Except as otherwise specifically authorized, an item or numbered or unnumbered unit amended by a supplement must be published in that supplement in its entirety as amended.

(2) When any part of an item (see definition of "item" in § 1310.0 (f)) is amended, except as otherwise specifically authorized the new item shall be given the same number with a letter suffix and shall specifically cancel all uncanceled correspondingly numbered items in the same numbered series. The first revision shall use suffix A, the next B, and so on through Z, then starting over with AA, BB, and so on. For example: Item 40–A cancels Item 40; Item 40–B cancels Item 40–A and Item 40 (if Item 40 has not been previously canceled), and so on.

(3) Specific cancellation of items may be omitted if the original tariff contains the following rule:

As this tariff is supplemented, numbered items with letter suffixes cancel, except as otherwise specifically indicated, correspondingly numbered items in the original tariff or in a prior supplement. Letter suffixes will be used in alphabetical sequence starting with A. Example: Item 445–A cancels Item 445, and Item 365–B cancels Item 365–A in a prior supplement, which in turn canceled Item 365 (if Item 365 had not been canceled for some reason, Item 365–B would cancel it as well). If an Item provides a specific cancellation of a prior issue or issues, this rule is not applicable.

If this method of cancellation is used, it may not be discontinued during the life of the tariff. The item which, in whole or in part, was the subject of an order of suspension, and also the prior issue of that item containing matter held in force by reason of that suspension, are required to be canceled specifically if it is intended to cancel them (this prohibition does not apply to subsequent issues of such items in which suspended matter and matter held in force have been brought forward in an authorized manner—see § 1310.14 (rule 14)).

(4) When any part of a numbered unit (not an item—see definition of "unit" in § 1310.0(f)) is amended, except as otherwise specifically authorized the new unit shall be given the same number and shall specifically cancel all prior uncanceled units bearing that number. Cancellation shall be made by referring to the number of the unit and to the number of the page in the original tariff or in the supplement on which the unit to be canceled is shown. If in a supplement, the number of the supplement must also be referred to. When it is necessary to effect cancellation in more than one supplement, or in the original tariff and one or more supplements, appropriate references must be made to all. Numbered units may not be given suffix letters when amended.

(5) Tariffs should not publish unnumbered units unless necessary or desirable because of the character of the particular matter. Use of a number clearly indicates to the tariff user what matter in the original tariff or an uncanceled prior supplement has been superseded, no matter how the character and content may have been changed. Therefore, an unnumbered amended provision must, in addition to directing the cancellation of the prior issue of the provision (clearly indicating the matter to be canceled), also make specific reference to the page or pages of the original tariff or the prior uncanceled supplement on which the provision first appeared in the tariff. Except where partial amendments of units are authorized, an unnumbered unit, when amended, shall be republished in its entirety as amended.

(6) Indexes of commodities, origins, and destinations; and items containing only

Table of contents,
Lists of commodities,
Lists of points,
Statements of carriers' operating authorities,
Explanation of abbreviations,
Explanation of reference marks,
Package descriptions,
Notes, and explanations of notes,

may, subject to the following conditions, be amended in part without bringing forward the index, item, or unit in its entirety as amended. Only one partial amendment may be in effect at one time as to any index, item, or unit. Unless otherwise specifically authorized, each successive partial amendment must accumulate all changes as to a particular index, item, or unit and must cancel any prior partial amendment thereto. The purpose of a table of contents in a supplement is to list the contents of the same supplement, and location. Therefore, if the table of contents is published in item form, the number of partial amendments permitted is not limited. A unit may not be amended in part if it contains provisions required by a released-rate order. If an index of origins or destinations is amended in part and if index numbers are assigned to origins or destinations in the tariff, the following notation must be shown at the beginning of such indexes:

The index numbers of points in this supplement correspond with the index numbers of the same points shown on pages — to —, inclusive, of the tariff, with the following additions and exceptions.

Partial amendments shall be published in such a manner that it is clear what matter is being changed or canceled. For canceling or amending expiration dates in connection with publications covering temporary authorities, see § 1310.28(g) (rule 28).

(7) A table of rates, rate base numbers, or other figures comprising not more than two pages must be republished in its entirety if amended. Otherwise, the table may be amended in part, subject to the following. When amending a figure at the intersection of a headline point or other caption and a sideline point or other designation, either the entire vertical column of figures in which the change appears shall be reproduced, or the entire horizontal line of figures in which the change appears. Only one partial amendment of any table may be in effect at any time, and each amendment shall republish the prior changes, directing the cancellation of the prior showing.

(8) When any rate or provision expires or is canceled, in part or in its entirety, the expired or canceled matter should not be reproduced in the new item or unit effecting the cancellation except to the extent necessary to identify the subject matter. No rate or other figure that is no longer effective shall be reproduced.

(9) If an item or unit expires or is canceled, leaving no rates or provision in effect in that item or unit, the statement of the expiration or cancellation shall be treated as any other reissued matter in subsequent supplements.

(10) If all or any part of the matter in an item or unit is transferred to another tariff or to a different location in the same tariff, whether in the same or in a modified form, that item or unit shall be revised in the regular manner authorized in this paragraph to show the revised provision, or when no effective matter is continued therein, to indicate cancellation of such item or unit. In all cases, the item or unit must show where the transferred rates or provisions will thereafter be found. For example: "Item 10–A cancels Item 10; rates formerly appearing in Item 10, but not shown

V 38-149 AUG 3 73 XUM

herein will be found in Item — (or in tariff ICC —)."

(d) *Amendments to loose-leaf tariffs.* (1) When any part of a page is amended, that page shall be reprinted, given the same number, designated as a revised page, and given a revision number. Revised page designations shall be shown in the same corner in which original page designations are required to be shown. Except as otherwise specifically authorized, the new page shall specifically cancel all uncanceled pages bearing that number. The first revision shall be numbered 1, the next 2, and so on in consecutive numerical sequence. For example: "First Revised Title Page cancels Original Title Page"; "Third Revised Page 4 cancels Second Revised Page 4 and First Revised Page 4" (If First Revised Page 4 has not been previously canceled); and so on. Items and numbered units must not be given suffix numbers (see paragraph (d)(6) of this section).

(2) Specific cancellations of pages, except the title page, may be omitted if the tariff contains the following rule:

METHOD OF CANCELING ORIGINAL AND REVISED PAGES, EXCEPT THE TITLE PAGE

When this tariff is amended by revised pages, the cancellation of prior pages, except the title page, will be effected by means of this rule. A revised page will not show a cancellation notice except when a cancellation notice is necessary because of suspension, rejection, or other reason. Revisions of each page will be published and filed in numerical sequence.

Except where a specific cancellation is shown on a new revised page, a revised page cancels any and all uncanceled revised or original pages, or uncanceled portions thereof, which bear the same page number. See Exception. For example: First Revised Page 10 will have the effect of canceling Original Page 10; 45th Revised Page 12 will have the effect of canceling 44th Revised Page 12; 13th Revised Page 4–A will have the effect of canceling 12th Revised Page 4–A and also 11th Revised Page 4–A if the cancellation of 12th takes place on or before its effective date.

EXCEPTION: When a specific cancellation on a prior revised page excepts a previously filed page wholly or in part, this rule does not have the effect of canceling such excepted previously filed page or portion thereof.

If this method of cancellation is used, it may not be discontinued during the life of the tariff. The page which, in whole or in part, was the original subject of an order of suspension, and also the prior issue of that page containing matter held in force by reason of that suspen- are required to be canceled specifically if it is intended to cancel them (this prohibition does not apply to subsequent issues of such pages on which suspended matter and matter held in force have been brought forward in an authorized manner—see § 1310.14 (rule 14)).

(3) Revised title pages shall be printed on one side of the sheet only, show the number of the revision in the upper left-hand corner, and show immediately under the effective date the following notation:

Original tariff effective [here show effective date of original tariff]

(4) When the tariff is one the pages of which are printed on both sides of the sheets and it is desired to amend only one page, the page published on the reverse side must also be reprinted, assigned the next consecutive revision number, and filed on lawful notice (see paragraph (d)(6) of this section). In direct connection with the revision number on the unchanged page shall appear the following statement, or a reference mark explained as follows:

Change in revision number only, without change in matter on body of the page.

This reference mark must be used for this purpose, and no other, for the life of the tariff.

(5) When a sheet containing an original page printed on one side with no tariff provisions printed on the reverse side is added to a tariff containing sheets printed on both sides, the blank page must show the notation "Intentionally left blank" or a notation reading as follows shown at the bottom of the printed page:

The reverse side of this sheet is intentionally left blank.

One or the other notations must be carried forward on future reissues of the sheet.

(6)(i) If tariff material is printed on both sides of a sheet and it is desired to withdraw all material from only one side and leave that side blank without being required to reprint that side each time the reverse side is amended, publication may be made as set forth in paragraph (d)(6)(ii) through (iv) of this section, provided a rule is published in the tariff clearly setting forth the method to be used, with an example.

(ii) At the time the matter on the page is withdrawn, both sides of the sheet shall be reissued in the normal manner and assigned the next consecutive revised-page numbers. Prior revisions of those pages shall be properly canceled. In the center portion of the page from which the matter is being withdrawn shall be shown the following notation:

Tariff provisions canceled. This page series discontinued.

(iii) The next reissue of the page containing effective tariff provisions shall then dispose of the revised-page designation by including a statement at the bottom reading

The reverse side of this sheet is intentionally left blank. The [here show revised page number of the page from which the material was withdrawn as it was last designated] is hereby canceled and page series discontinued until further notice.

Each subsequent reissue shall include a statement reading

The reverse side of this sheet is intentionally left blank.

If, in accordance with this procedure, the contents of a page have been canceled and the page series discontinued, and the subsequent reissue of the page on the reverse side has effectively canceled the page designation, and it is desired to reactivate the page series the following shall govern: The revision number shown in connection with the page number shall be the same as the revision number of the page on the reverse side. It shall not cancel any previous page, but shall publish a notation specifying that the unused intervening revision numbers of the page have not been used and will not be used, identifying what revision numbers these are.

(iv) If it is desired to use the page after the tariff provisions have been withdrawn, but before the page series has been specifically canceled and that side of the sheet left blank, amendment shall be accomplished in the normal manner (designating the page with the next consecutive revision number of that page series and making the proper cancellation).

(7) If it becomes necessary to add an additional page, such page (except when it follows the final page) shall be designated with the same number as an existing page together with a single letter suffix—for example, Original Page 4–A, Original Page 4–B, etc. If it is necessary, for example, to change matter on Original Page 4–A, the page shall be reprinted and such changed page shall be designated as First Revised Page 4–A, and, unless the tariff contains the automatic cancellation rule provided in paragraph (d)(2) of this section, shall show that it cancels Original Page 4–A. Only single letter suffixes are permitted for this purpose, and no other system or variation, such as use of multiple letter suffixes, decimal or fractional numbers, etc., is permitted. As to any page number designation, suffix letters (if used) shall start with A and proceed alphabetically as needed through Z. When a sheet is printed on both sides, only the number of the higher numbered of the pages printed thereon may be used for expansion by adding a letter suffix. For example, if the page on one side of the sheet is numbered 5 (regardless of whether an original or revised page) and the page on the reverse side is numbered 6, an added page may be designated as "Original Page 6–A," but may not be designated as "Original Page 5–A."

(8) If, after a loose-leaf tariff has been filed with the Commission, it is desired to file additional pages at the end of the tariff, the pages shall be numbered consecutively with the last page of the tariff, and shall be designated as original pages, without letter suffixes.

(9) The number of sheets containing thereon pages canceled from the tariff may not exceed five times the number of sheets containing effective tariff matter. Sheets containing only pages on which no tariff matter is printed except for notations such as "Intentionally left blank", or page numbers and other provisions necessary only to accommodate the format of the tariff, are not included in the count of sheets containing effective matter within the meaning of this rule.

(10) When the Commission, in a formal case, orders the cancellation of or the establishment of tariff matter, the page limit provided in paragraph (d)(9) of this section may be exceeded to the extent necessary to initially comply therewith (but not continuing compliance as to a continuing order).

(11) When a revised page is issued which omits rates, rules or other provisions previously published on the page which it cancels, the disposition of the omitted provisions must be indicated clearly. If the omitted provisions are published on a different page, the revised page shall make specific reference to the page on which they will be found. The page to which reference is so made shall contain the following notation in connection with such rates, rules, or other provisions:

"For [here insert rates, rules, provisions, etc. as appropriate] in effect prior to the effective date hereof, see page (or pages) [here identify page or pages from which transferred, whether changed or unchanged]."

If canceled or expired and not transferred to another page unchanged or in changed form, the page shall so indicate that fact, identifying the provision canceled or expired only to the extent necessary to show what is affected. No rate or other figure that is no longer effective shall be reproduced.

(12) If five or more pages of a tariff, the pages of which are printed on one side of the sheet only, are reissued at one time with the same effective date to cancel all provisions thereon or to transfer all provisions to other pages, the reissue and cancellation may be accomplished by means of a single printing, but showing the individual cancellations. In one column shall be listed the designation of each page (for example, "2nd Revised Page 16") under a column headed "Page." In a second column, headed "Cancels," and opposite each listing in turn shall be shown the designation of the page the new page cancels—for example, "1st Revised Page 16." In the upper left-hand or upper right-hand corner, where the page designation for that tariff would otherwise appear, the following wording and spaces for later insertion of words and numbers shall be shown:

——Revised Page——
cancels
——Page——

Before filing with this Commission, each copy (two copies for each different page) shall have inserted in ink or other permanent means the designation of the new page and the designation of the page which the new page cancels. The automatic cancellation provisions of paragraph (d)(2) of this section may not be used with this procedure. Each cancellation must be specific. Such pages may be filed only when all provisions on each page are canceled or transferred, and no other or new provisions are substituted thereon. Any such page, however, may be subsequently reissued individually in the regular manner to establish provisions thereon.

(13) Each time a page is revised or a new page or supplement is added, the page (check sheet) showing the updated listing of pages and supplements comprising the tariff shall be correspondingly revised by reissuance to show in numerical sequence by page numbers the effective original pages and effective revised pages, and the original pages and revised pages that have been filed but are not yet effective. The check sheet shall indicate by reference mark or other means which revision numbers shown thereon are different or are in addition to those shown on the next previous check sheet. Effective and to be effective supplements shall also be listed thereon. Pages or supplements which only contain matter under suspension or subsequent postponement and pages or supplements which contain matter held in effect by reason of suspension or subsequent postponement shall be included and an appropriate explanation made in each case. Cancellation of supplements when they have served their purpose (except supplements announcing an adoption of the tariff, which should not be canceled, and except supplements canceled by other supplements of like or similar character or content) shall be effected by reissuance of the check sheet and a notation to that effect made thereon. No other matter may be shown on either side of the sheet containing this updated list.

(14) The indexes of the tariff must be amended concurrently with changes in the contents of the tariff to show additions, cancellations, and changes as to points and commodities.

(15) Changes shall be indicated as required by paragraph (f) of this section. Reference marks or wording to indicate reissue without change need not be employed, but if they are, they shall be used once only, then omitted from subsequent reissues.

(16) If an item or unit expires or is withdrawn in its entirety and canceled, the statement of the expiration or cancellation shall be shown one time and then omitted from subsequent reissues of the page. The same item or unit may be used again for other provisions or for reinstatement of the same provisions.

(17) When a protective cover not a part of the official filing of the tariff is used, only such information should appear thereon as will remain constant and in use during the life of the tariff.

(18) Supplements shall not be issued to loose-leaf tariffs, except for the purposes authorized by the following:

(i) *Section 1310.10(j).* Conversion supplements to provide general rate changes (rule 10).

(ii) *Section 1310.11.* Transfer or cancellation of provisions (rule 11).

(iii) *Section 1310.14.* Suspended matter (rule 14).

(iv) *Section 1310.22.* Seasonal motorwater rates (rule 22).

(v) *Section 1310.25.* Transfer of operations—change in name and control (rule 25).

(vi) *Section 1310.27(1).* Take-over publications (transfer of agent) (rule 27).

(vii) *Section 1310.28(g).* Change or cancel expiration dates in connection with temporary authorities (rule 28).

(viii) *Section 1310.28(h).* Postponement of tariffs or tariff matter (rule 28).

(e) *Reinstatement of canceled or expired provisions must be by republication.* If provisions have been eliminated by cancellation or expiration, they may not be reinstated except by republication with a new effective date providing lawful notice. If in a supplement and if republication is made in an item bearing the same number as the old item, the next unused letter suffix in that numbered series must be assigned thereto.

(f) *Changes indicated.* (1) Tariff publications shall indicate changes made in existing rates, charges, classifications, rules, or other provisions by use of the following uniform reference marks in connection with each such change:

or (R)	to denote reductions
♦ or (A)	to denote increases
▲ or (C)	to denote changes which result in neither increases nor reductions in charges

(2) Explanations of such reference marks shall be provided (see § 1310.6(n) (rule 6)), in the publication in which used, and these marks shall not be used for any other purpose. The form of the reference marks and their explanations must be shown exactly as prescribed herein. The reference mark must be positioned in direct connection with the changed rate or other provision. The use of more than one reference mark in connection with the same provision to indicate more than one type of change is not permittd unless the character of the amendment is such that the provision cannot be treated to show the appropriate single reference mark in connection with each part proposing a certain kind of change.

(3) When a change of the same character is made in all or in substantially all rates in a tariff or supplement, or on a page thereof, that fact and the nature of such change may be indicated in distinctive type at the top of the title page of such issue, or at the top of each page, as the case may be, in the following manner: "All rates in this issue are increases"; or "All rates on this page are reductions"; or there may be added, when appropriate, "except as otherwise provided in connection with particular rates." When a tariff publication indicates a change, with exceptions, in the manner provided in this subparagraph, a bold-faced dot "●" shall be used to indicate a rate or other provision in which no change has been made, and the appropriate reference mark shall be used to indicate any other change not indicated by the general statement on the publication. A bold-faced dot may not be used to indicate "no change" under any other circumstances.

(4) When tariff matter, in connection with which a reference mark or wording as above has been used, is reissued with-

V 38-149 AUG 3 73 XUM

out change, the mark or wording shall be omitted.

(g) *Reissued matter.* (1) Matter brought forward without change from one supplement into another within the same tariff must be designated as "Reissued" and must show the original effective date and the number of the supplement from which it is reissued; or it must conform to the requirements provided in paragraph (g)(2) of this section.

(2) The reissued matter shall be uniformly designated by a number within a square (or an authorized substitute—see § 1310.6(n) (rule 6)), the number corresponding to the number of the supplement from which the matter is reissued, and the explanation thereof must appear in the supplement in which the reference mark is used. The explanation must identify the matter as reissued in substantially the following manner:

□ (with number enclosed) Reissued from supplement bearing the number enclosed within the square. See item [here insert number of item referred to, explaining the methods of denoting reissued matter in supplements].

The rules section of the tariff shall contain an item (the number of which will be inserted in the explanation of the reference mark denoting matter reissued from a prior supplement) reading substantially as follows:

METHOD OF DENOTING REISSUED MATTER IN SUPPLEMENTS

Matter brought forward without change from a supplement being canceled into another supplement will either (1) be designated as reissued by a complete statement to that effect in direct connection with the reissued matter, indicating the number of the supplement in which the reissued matter first appeared in its currently effective form, or (2) by a reference mark [here show □, [ ] or ( ), whichever single type is adopted in the tariff] enclosing a number, the number being that of the supplement in which the reissued matter first appeared in its currently effective form. To determine its original effective date, consult the supplement in which the reissued matter first became effective.

(3) When the matter brought forward was first published in its currently effective form in one supplement and its effective date was modified by another supplement, the matter shall be indicated as "Reissued" together with a notation that refers to the number of the supplement in which the matter was first published, the final effective date of the matter, and the number of the supplement which established such final effective date—for example, "Reissued from Supplement 4, effective January 1, 19—, per Supplement 5." When such a notation is referred to by use of a reference mark, the reference mark must be one other than that prescribed in this paragraph for ordinary reissuances, and shall be explained on the same page as that on which the reissued matter appears.

(4) Republication of matter as "reissued" matter serves to establish a new effective date for the provisions, which shall be the general effective date of the supplement into which it is brought forward. The reference to a prior supplement serves to direct the tariff user to where the provision first appeared in its present form. Therefore, if the effective date shown for a provision in the prior supplement being canceled is a date later than the general effective date of the new supplement into which the provision is being reissued, the number-in-a-square reference mark may not be used, but instead the reference to the prior supplement and the later effective date shall be stated in full in direct connection with the reissued provision.

(h) *Change in the explanation of reference marks and notes.* A change in the explanation of a reference mark or note governing tariff provisions published elsewhere in the tariff or prior supplement should not require the tariff user to conduct a search for its use in order to determine the effect. Therefore, any change or cancellation of an explanation of a reference mark or a note, or in an item or other provisions such explanation refers to in turn, shall be accompanied by a republication at the same time of all tariff provisions in the tariff as amended which employ the use of the reference mark or note, or, in the alternative, the changed explanation (or tariff provision referred to in turn by such explanation) shall identify by item number or page (identifying the supplement if in a supplement) the effective tariff provisions which refer to the reference mark or note.

(i) *Matter issued under order or other authority.* If an entire supplement or a loose-leaf page or a provision

(1) Is issued to comply with a mandatory order requiring the specific action;

(2) Is issued under authority of a permissive order allowing notice of less than thirty days and/or departure from tariff-publishing regulations; or

(3) Is published under a regulation of this part permitting less than thirty days' notice and/or departure from an outstanding order;

a reference to such order or rule and the number of days' notice (where less than thirty is authorized) shall be shown on the title page if covering an entire supplement and in direct connection with the tariff provisions (together with the specific effective date) if not comprising an entire supplement. Outstanding orders departed from must be identified.

(j) *Conversion supplements to provide general rate changes.* (1) A conversion table type supplement may be filed to any bound or loose-leaf tariff having not less than 20 pages (excluding supplements) to provide a general change in the level of all or substantially all the rates or charges, or all or substantially all the rates or charges in a described category (less-than-truckload, truckload, etc.) named in the tariff. The supplement shall be in clear, explicit, and simple terms, and be free of conflict and ambiguity. A conversion type supplement may be filed by a carrier or agent to a tariff of less than 20 pages (excluding supplements) provided it is filed at the same time as such supplements are filed by it to other of its tariffs which have 20 or more pages and provided the change is part of the same general rate adjustment.

(2) The conversion supplements shall contain an application provision reading substantially as follows:

Except as provided in [here identify location of listing of items, notes, or provisions not subject to rate change in whole or in part, specifying what part] and in [specify whether supplements or loose-leaf pages] issued subsequent to this supplement, all rates and charges published in this tariff, as amended, or as may be amended in [specify whether supplements or loose-leaf pages] issued subsequent to this supplement, are hereby or will on their effective dates be [specify whether increased or reduced] as follows for the period this supplement is in effect:

Immediately following this statement, a clear and explicit application of each column of changes must be published. If the supplement does not contain exceptions to or any non-application or the rate changes, the reference in the statement to a listing of exceptions must be omitted. However, under no circumstances may the exception therein with respect to subsequent supplements or loose-leaf pages be omitted. If not all of the rates or charges in a tariff are being changed by the supplement, the statement must clearly and definitely state the exact category of rates or charges (any-quantity, less-than-truckload, truckload, volume, or less-volume rates, minimum charges, etc.) being changed and/or the exact items, sections, etc. of the tariff in which they are contained. Reference to categories of rates may employ only terms used in the tariff or determinable through its published definitions.

(3) If the supplement does not include all the tariff rates and charges to be changed, it must provide a percentage formula or other basis for converting rates and charges which are higher than those shown or otherwise not shown in the conversion table. If this is necessary, the supplement must provide a method of disposing of resulting fractions. When multiple-factor rates or charges made by use of arbitraries or other means are being changed, the method of computing such changes shall be provided.

(4) The base and the converted rates or charges must be in the same monetary unit (in cents, in dollars and cents, etc.) used in the tariff. If the tariff names rates or charges in more than one monetary unit (for example, some in cents, others in dollars and cents), the unit used must be the one employed in the greatest percentage of rates and charges to be changed, and a provision must be published stating how the change is to be applied in connection with the remainder—for example, if the conversion supplement is based on a monetary unit of "in cents," it shall contain the following rule:

Where the rate or charge is stated in dollars or dollars and cents per 100 pounds, per ton, per article, per piece, per package, per shipment, or per any other unit, first find the rate or charge which is equivalent in cents under column [here show column containing base rates] of the conversion table herein and then apply the changed rate or charge shown opposite thereto in columns [here show numbers of columns containing changed rates or charges] in item [here show number of item containing application of columns] herein.

(5) Each supplement may contain not more than 10 columns of rates or charges including the base rate or charge column. As to any base rate or charge, application of only one column of changed rate or charge is permitted.

(6) Each conversion type supplement shall contain no other matter, be indicated to expire with a specific date not beyond one year from its effective date, and, as to a bound tariff, be exempt from the terms of § 1310.9(d)(2) (rule 9). Each regular (not conversion type) supplement containing only republished class-rate tables and necessary related provisions forming a part of the same general rate adjustment and not made subject to a conversion table shall also be exempt from the terms of § 1310.9(d)(2) (rule 9). Such a regular supplement need not show an expiration date.

(7) As to a bound tariff, an exception item or note may be republished from the conversion supplement into a regular supplement in order to add, eliminate, or change provisions. As to a loose-leaf tariff, exceptions may be published in an item in the tariff proper to which the conversion supplement may refer, in which case the item may be republished in the regular manner in subsequent republications of the particular page. If the exceptions are published in the conversion supplement issued to a loose-leaf tariff, they may not be amended.

(8) The title page of the conversion supplement shall indicate, in the top margin, whether the changes are increases or are reductions. If the changes consist of some or both kinds, the notation must add "as indicated herein" and the different categories of changes must be indicated by use of the appropriate symbols for increase and reduction.

(9) All subsequent amendments (supplements or loose-leaf pages) to the tariff becoming effective during the effectiveness of the conversion supplement and naming rates or charges shall contain a notation indicating whether such amendments are or are not subject, as the case may be, to the provisions of the conversion supplement and/or an item, identifying such supplement and/or item.

(10) As to a tariff, only one conversion supplement may be in effect at any time. The duration of the application of published changes in a conversion supplement may not be extended by a like supplement providing the same increases or reductions. A conversion supplement may not be reissued with the same expiration date unless requested by the Commission.

(11) The provisions of this paragraph do not authorize the publication and filing of so-called master tariffs or connecting link supplements.

§ 1310.11 Transfer or cancellation of provisions (Rule 11).

(a) *Different situations.* Cancellation of a tariff, in whole or in part, involves one or more different situations each of which requires a different procedure to be followed in publishing. Below is summarized each of the several different kinds of situations, together with a reference in each instance to the paragraph giving the details of the procedure required to be followed.

(1) Cancellation of an entire tariff, as amended, with discontinuance of all provisions therein, no transfer of provisions to another tariff or tariffs—see paragraph (b)(1) of this section.

(2) Cancellation of an entire tariff, as amended, with transfer of all provisions not being discontinued to a new tariff (issued by the same carrier or agent) being issued concurrently—see paragraph (b)(2) of this section.

(3) Cancellation of an entire tariff, as amended, with transfer of all provisions not being discontinued to two or more tariffs (which may be new concurrent issues or already effective issues, or both) issued by the same carrier or agent—see paragraph (b)(3) of this section.

(4) Cancellation of an entire tariff, as amended, issued by a carrier with transfer of all provisions not being discontinued to one or more tariffs (which may be new concurrent issues or already effective issues, or both) issued by an agent—see paragraph (b)(4) of this section.

(5) Cancellation of a tariff, as amended, in part only, with discontinuance of the provisions canceled, no transfer of provisions to another tariff—see paragraph (b)(5) of this section.

(6) Cancellation of a tariff, as amended, in part only, transferring such of the provisions of that part which are not being discontinued to one or more other tariffs—see paragraph (b)(6) of this section.

(7) Cancellation of a tariff, as amended, to correct error of omission in failing to direct its cancellation in the new issue thereof—see paragraph (b)(7) of this section.

(8) Transfer of provisions from an agent's tariff to the tariff of a carrier. A carrier's tariff may not direct the cancellation of a tariff, either in whole or in part, of an agent. Transfer may only be effected by cancellation by the agent and publication by the carrier, each as to its own issue. A common effective date for both actions should be arranged to prevent conflict in rates or absence of any effective rates.

(b) *Procedures to follow.* (1) Issue a supplement "to" the tariff (bound or loose-leaf) to be canceled showing that it "cancels" the tariff. State what provisions, of what tariff, will thereafter apply.

(2) Show on title page of new tariff, or within, as provided in § 1310.5(b) (rule 5), that it "cancels" the prior issue. If the new issue does not contain all of the provisions superseding those formerly in the canceled tariff, the canceling tariff shall show where provisions not appearing therein will thereafter be found, or what rates thereafter will apply.

(3) Issue a supplement "to" the tariff (bound or loose-leaf) to be canceled, showing that it "cancels" the tariff. Refer to each other tariff in which the provisions thereafter will be found. If to more than one other tariff, identify in some manner what portion is being transferred to what tariff. If some portion is being discontinued, without transfer, state this fact, identifying the provisions to the greatest extent possible, and state what tariff will thereafter apply on the traffic or on the service. In each tariff to which a transfer is made (by reissue or amendment to an existing tariff), indicate in connection with the superseding provisions in each case, if newly published and not already effective, the tariff containing the provisions superseded, whether changed or not. The effective date of all actions must be the same.

(4) Follow same procedure set forth in paragraph (b)(3) of this section.

(5) Amend the tariff to be canceled in part in the regular manner (by supplement, by revised pages, or by reissue, as appropriate for the type of tariff under this part), making specific cancellations of provisions (except where tariff reissued). If a bound tariff, and the amount of tariff matter it would be necessary to publish to comply would require more than four complete pages (including the title page), or if a loose-leaf tariff, and the reissuance of more than one-fourth the effective pages would be required to comply, the cancellation may be effected by a statement for the purpose published in a special supplement issued to the tariff. The statement shall specifically identify the material canceled (numbers of the items, units, tables, sections, pages, etc.) and state what provisions in what tariffs will thereafter apply in the absence thereof. The supplement must be permitted to remain in effect for the life of the tariff, or in the case of loose-leaf tariffs until all the affected pages have been reissued (such reissued pages must refer to the supplement action). A supplement to a bound tariff may contain both cancellation in the regular manner and cancellation by statement. A supplement containing only matter necessary for the partial cancellation is exempt from supplemental limit provisions of this part. In bound tariffs, any reissue in a subsequent supplement of an item or unit affected by the statement form of cancellation shall specifically cancel the prior item or unit "as amended by" the canceling supplement.

(6) Proceed as set forth in paragraph (b)(5) of this section in amending the tariff to be canceled in part, and follow the procedure set forth in paragraph (b)(3) of this section to the extent it prescribes the method of referring to the

V 38-149 AUG 3 73 XUM

tariffs to which the provisions are being transferred, and to the extent it prescribes the procedure in amending those tariffs to which transferred. The effective date of all actions must be the same.

(7) Issue a cancellation supplement to the tariff (bound or loose-leaf) which in error was not canceled by its reissue. Do not attempt to add the cancellation notice to the new issue.

§ 1310.12 Expiration dates (Rule 12).

NOTE: See § 1310.28 (rule 28) for provisions which may be filed on less than 30 days' notice.

(a) *Expiration dates may be shown.* Any tariff as amended, any supplement to a tariff, or any certain provisions thereof, may be indicated to expire "with" a given date. If to govern an entire tariff as amended, the provision must be on the title page and start with "This tariff, as amended * * *." The statement should not be repeated on the title pages of subsequent supplements. If an expiration date is to be added or one changed by supplement, the amending provision must be specific, for example: "Refer to the title page of tariff and ["add," "change," etc.]." Such amendments should be treated the same as other matter being reissued, if the supplement is reissued. If to govern an entire supplement, the expiration statement must be shown on the title page of the supplement, starting with "This supplement * * *." If to govern an item, the statement may be published within the item simply as "Expires with * * *." If a unit other than an item or if only a portion of an item, the statement must be clear as to what is subject to the expiration.

(b) *Expiration dates may be shown in separate item.* The reference mark (E) may be attached to a provision (the reference mark may be used only against items or parts of items, and may not be used for any other purpose) and explained "Subject to expiration date shown in item * * *" in which case the referred to item, reserved for this purpose only, shall identify the item affected, whether all or what provisions therein are subject thereto, and the "with" expiration date, so worded as to leave no doubt as to the proper application. After expiration, the reference therein (to an item or parts of an item) should be amended promptly to indicate "expired" and so maintained until the provisions affected have been amended to indicate the expiration.

(c) *Expired provisions.* Expired provisions part of a tariff should be reissued in accordance with § 1310.10(c)(9) (rule 10) to indicate the fact.

§ 1310.13 Sectional tariffs (Rule 13).

(a) *May be filed—sections must be numbered.* A tariff arranged in "sections" may be filed. Each section must be consecutively numbered, commencing with section No. 1, and each page (including the title page, if any) of the section shall show the section number in the upper center portion thereof, in a prominent manner.

(b) *Alternative use of rates may be provided.* (1) Rates may be alternated by publishing them in different sections of the same tariff. A section containing rates which alternate with rates in any other section of the same tariff shall be known as an alternating section. The first page of each section in a tariff containing alternating sections shall be the title page of that section, be reserved for provisions pertaining to application, and show, in addition to the section number, the application of rates published in the section. The title page of each alternating section must contain the following statement:

If the charge accruing under section ———, ———, or ——— of this tariff is lower than the charge accruing under this section on the same shipment over the same route, the charge accruing under section ———, ———, or ———, whichever is lower, will apply.

If the rates in the section alternate with rates in less than three other sections, the statement shall be modified to be compatible therewith.

(2) Unnecessary alternation of rates must be avoided by checking the rates in one section against those in other sections and omitting rates which clearly result in higher charges than those which result from the rates in the other sections. Alternating reference must not be given to another section unless that section actually contains rates which alternate.

(c) *Nonalternating section—position of sections—statements.* Each commodity tariff and each combined class and commodity tariff arranged in sections for alternative use shall contain a section naming specific commodity rates which do not alternate with rates in any other section. This section shall be known as the nonalternating section. When a tariff names commodity rates only, the nonalternating section shall be the first one naming rates. When a combined class and commodity tariff, only class rates shall be shown in the first section of sections naming rates, and the nonalternating section shall be the first one naming commodity rates. Such tariffs shall show, in the places indicated, the following statements: Under "Application of Rates" in the rules section of the tariff, show

The rates in section [here show number of nonalternating section] are specific commodity rates and do not alternate with rates in other sections of the tariff. See application of that section.

On the title page of the nonalternating section, show

When the rates are published in this section on the commodity transported from point of origin to destination, rates named in this section will apply regardless of rates between the same points, over the same routes, published in other sections.

On the title page of each other section containing commodity rates, preceding the statement prescribed in paragraph (b), show

When rates are published in section [here show number of nonalternating section], the rates named in this section on the same commodity from and to the same points, over the same route, will not apply.

Specific section numbers may be shown instead of "other sections" in the statements.

(d) *Restrictions.* A tariff arranged in sections for alternative use is subject to the following restrictions on alternations between sections in the same tariff:

(1) A class rate section may alternate with not more than one other class rate section.

(2) A tariff may contain not more than two alternating commodity rate sections, which may alternate with one another and may alternate with not more than two class rate sections.

(3) One section may not alternate with more than three other sections.

(4) Rates published in another tariff may not be reproduced for alternative purposes.

(5) Except as otherwise authorized in § 1310.7(e) (rule 7), a rate in one section may not alternate with a rate in the same section.

(6) Alternating sections may not be subdivided.

(e) *Arrangement may not be changed.* A bound tariff which, as originally filed, does not contain alternating sections may not be changed into one with alternating sections except by reissue, nor may a supplement issued thereto add an additional section to a tariff containing alternating sections. A loose-leaf tariff may be changed in the regular manner, by issuance of new and revised pages.

§ 1310.14 Suspended matter (Rule 14).

(a) *Suspension orders and vacating orders.* An order of suspension suspends the operation of the tariff provisions described therein and prohibits any change during the period of suspension in such provisions or in the matter held in effect by reason of the suspension. Regardless of whether or not a notice of suspension is filed and amendments made to published cancellations (if any) to carry out the purpose of the order, neither the matter described nor cancellations (published and on file at time of issuance of such order) prohibited by the order shall become effective. The use is permissive of any authority arising from a vacating order (unless otherwise provided in the order), but if used the tariff must be specifically amended to remove the published notice of suspension and other impediments in the tariff to the application of the provisions originally suspended.

(b) *Supplement to loose-leaf tariff.* A supplement may (or must, as the case may be as to each affected paragraph) be filed to a loose-leaf tariff to comply with the provisions of paragraph (c), (g), (i), (j), (k), or (l) of this section. Such a supplement may contain no other matter. As to paragraphs (i) and (k) of this section, the supplement may be filed only for the purposes specifically indicated therein.

(c) *Supplement announcing suspension—consolidated supplement.* (1) Upon receipt of an order suspending any tariff publication in part or in its entirety,

the carrier or agent in whose name the publication was filed shall immediately file a supplement containing a "Notice of Suspension." The title page of the supplement shall identify the investigation and suspension docket number, and shall bear an issue date, but not an effective date. The notice of suspension shall specifically indicate the publication or portion thereof that is suspended, the date with which the suspension ends, state that the matter under suspension may not be used during the period of suspension (and subsequent postponement, if any), and identify the provisions that will apply. If class rates in a tariff published in the name of the same carrier or agent will apply, the reference need only be to "class rates." If the class rates are published elsewhere, the tariff must be identified. If commodity rates will apply, the reference must be specific. Indefinite terms such as "presently applicable provisions" or "rates and charges in effect prior to suspension" may not be used. The notice shall also correct, where necessary, by statement (i) cancellation notices which have the effect of canceling the suspended matter or matter held in force by reason of the suspension and (ii) statements on title pages of supplements listing the numbers of the effective supplements to the tariff. The notice may include a provision postponing the effective date of the suspended matter beyond the suspension period until the date on which the suspension notice is canceled. A notice of suspension may not include any provision not relating to the suspension.

(2) As to bound tariffs (only) two or more notices of suspension may be published in a supplement confined to such a purpose, which shall be known as a consolidated suspension supplement. The title page shall bear an issue date, but not an effective date. Each notice must be designated as an item, which shall include all provisions required by paragraph (c)(1) of this section and may include any provision permitted thereby. The item numbers shall be in a separate series, differentiated from the regular tariff series by use of the prefix "S", starting with S–1, then S–2, S–3 and so on in consecutive numerical sequence. Not more than two such supplements may be in effect at one time in any tariff. Once such a supplement is filed to a tariff, this supplement and item form of publication must continue for the life of the tariff.

(3) When it is necessary to adjust an item in the consolidated supplement to conform with a corrected order of the Commission, the supplement shall be reissued and the item republished showing "(Corrected)" after the item number instead of showing a letter suffix. If matter in an item in a consolidated suspension supplement is changed and republished in another such supplement for any other reason (for example, to add a postponement notice), cancellation shall be by letter suffix as provided in § 1310.10(c) (rule 10) if a bound tariff or specific if a loose-leaf tariff. The cancellation shall provide an effective date and be filed on lawful notice.

(4) Otherwise, as long as the status of the tariff matter suspended does not change, or unless and until the manner of showing the fact of suspension and postponement is changed to that authorized in paragraph (f) of this section, the item must be maintained in a consolidated suspension supplement. If the matter is placed into effect by tariff publication or is canceled, then the item must be brought forward into the supplement effecting that change in the matter and the item canceled in the regular manner. If the period of suspension or the period of postponement expires, causing the matter to become effective the item should be canceled in the regular manner in the next regular supplement issued to the tariff. If, using the method authorized in paragraph (f) of this section, the suspended or postponed matter is brought forward in a regular supplement with appropriate notations as to suspension or postponement, then the item, no longer serving any purpose, must be concurrently canceled in the regular manner in the same supplement taking such action. If the announcement of suspension (with or without postponement) is in a single supplement (not in an item) authorized in paragraph (c)(1) of this section; such supplement must be canceled when it has served its purpose, and effective concurrently with the tariff matter (if any) which removes the need for it, by supplement if a bound tariff or by the reissued check sheet if a loose-leaf tariff. Cancellation of such a supplement or item should include a brief reference to the circumstance or reason causing its issuance. A single supplement containing a notice of suspension, or a suspension item, must not be canceled unless all the matter referred to therein is canceled, becomes effective, or is properly brought forward as explained in the regulations in this section.

(5) In the case of a resuspension of tariff matter, the notice of suspension or the item announcing suspension, as the case may be, shall be reissued, canceling the first, and the statements therein adapted to the new action taken by the Commission, including a reference to the facts of the first suspension. Subsequent handling of the matter shall proceed substantially as prescribed for suspension matters in this section.

(d) *Suspended matter reissued before supplement announcing suspension is issued.* If a bound tariff and if, prior to the filing of the supplement announcing suspension, a carrier or agent files a later supplement which contains as reissues the matter suspended in the previous supplement, the supplement announcing the suspension shall specifically by statement (not reissue) cancel from the later supplement such reissued matter. Such statement of cancellation must itself have an effective date, and such date must be the same as the date upon which the reissued matter is indicated to become effective, giving not less than 10 days' notice. As used in this paragraph, "reissued matter" means matter republished without change and designated or referenced as reissued matter in the manner required by § 1310.10 (g) (rule 10). Items or other tariff provisions which direct the cancellation of a previous showing of such matter do not constitute reissued matter which the suspension supplement may cancel, even though no actual change in the provision is made. Tardiness in filing any supplement announcing a suspension may result in the rejection of the later supplement which cancels the suspended matter.

(e) *Suspended matter republished before supplement announcing suspension is issued.* (1) If, prior to the filing of the supplement announcing suspension, a carrier or agent files a later publication which contains a republication (not a reissue as defined in paragraph (d) of this section), in the same or in changed form, of matter in the previous publication, which matter, however, is under suspension, the matter must again be republished to remove the violation of the investigation and suspension order. When a bound tariff, the republication shall be accomplished by supplement (it may not be included in the supplement announcing the suspension), and when a loose-leaf tariff, by loose-leaf page amendment. See paragraphs (f) and (g) of this section for procedure.

(2) Such publication may be filed on not less than 10 days' notice, but all the correcting provisions must become effective on or before the date the erroneously republished matter was originally indicated to become effective.

(f) *Reissue of suspended matter.* (1) When a tariff, supplement, loose-leaf page, item, or unit, part of which is under suspension is reissued and the suspended matter therein is to remain suspended, the publication, item, or unit shall be canceled in its entirety and the suspended matter brought forward without change into the new publication, item, or unit.

(2) The suspended matter which is brought forward shall clearly show that it is under suspension by publication of a notice in direct connection with such matter and in substantially the following form:

NOTICE OF SUSPENSION

This [here indicate whether item, rate, rule, etc.] is reissued from [here state whether tariff, supplement, or page and the number thereof] and is under suspension to and including [here show date appearing in suspension order] by order of the Interstate Commerce Commission dated [here show date of order] in I. & S. Docket No. [here show docket number]. It may not be applied on any shipment during the period of suspension [here add "and postponement" when the postponement notice is used]. Apply [here identify in the same manner as in the suspension notice the provisions that will apply].

(See paragraph (g) of this section for provisions pertaining to the postponement of suspended matter.)

(3) If matter held in force by the suspension is in the same tariff as the suspened matter, it may be brought forward without change into the new publication. If such matter is normally shown in the same location where the supended matter is shown, it must when bringing it

V 38-149 AUG 3 73 XUM

forward be shown with the suspended matter in the new publication. If a publication, item, or unit containing matter held in force by reason of a suspension is canceled, and the matter therein is to be continued in force, such matter must be reissued without change. When such matter held in force is brought forward, it must be properly identified in every case.

(4) Matter originally suspended and later postponed may be carried forward in the same manner as suspended matter.

(5) If the matter held in force is brought forward into the new publication and is to be canceled or is to expire with the effectiveness of the suspended matter, publication in every case must be made in such a manner that in event the suspended matter becomes effective at the end of the period of suspension or postponement without additional publication, the matter held in force will be canceled or will expire by its own terms effective concurrently.

(6) Before the suspended matter may be brought forward for the first time under the provisions of this paragraph, a supplement announcing the suspension must be on file.

(7) Every tariff or supplement which contains suspended matter brought forward under the provisions of this paragraph must contain in the table of contents and opposite the words "Suspended Matter Herein" reference to such matter by number of the item, unit, page, or other designation where it appears. If the tariff or supplement does not contain a table of contents, the same information shall appear under the same subject near the front.

(g) *Postponement or further postponement of matter suspended.* (1) If it is desired that suspended matter not become effective at the end of the suspension period, and if the supplement announcing the suspension does not provide for postponement thereof, a postponement notice may be published and filed at any time during the suspension period. The postponement notice must be indicated to become effective not later than the date to which the matter is suspended (See paragraph (g)(3) of this section). It must provide that the postponed matter may not be applied on any shipment during the period of postponement. If the postponement notice is to appear in connection with the reissue of suspended matter authorized by paragraph (f) of this section, it must follow the first sentence in the "Notice of Suspension" required by paragraph (f)(2) of this section. The postponement notice may postpone the effectiveness of the matter to a date upon which such notice is canceled, or to a specific date.

(2) When it is postponed to a specific date and it is desired that the matter be further postponed, the postponement notice may be changed at any time during the period of suspension or postponement. The changed postponement notice must be indicated to become effective not later than the date to which the matter was previously postponed. The previous notice must be canceled.

(3) When a postponement or further postponement provision authorized by this paragraph (g) of this section is filed, as much notice as reasonably possible must be given, but in no case less than one day. When the matter held in force by the suspension is indicated to be canceled on or to expire with a date prior to the date to which the suspended matter is postponed, such cancellation or expiration must be concurrently extended on the same notice. A postponement notice may be canceled at any time upon 30 days' notice.

(h) *No change permitted-suspended matter and matter held in force.* A suspended rate, charge, classification, rule, or provision respecting practices may not be changed or withdrawn, except as otherwise specifically authorized; nor may any change be made in a rate, charge, classification, rule, or provision respecting practices which is continued in effect as a result of such suspension, except as otherwise specifically authorized.

(i) *Suspended matter may be canceled.* (1) After the notice of suspension required by paragraph (c) of this section has been filed, matter under suspension or suspended matter under postponement may be canceled upon not less than 10 days' notice. The cancellation shall be made effective on or prior to the date to which the matter has been suspended (or postponed), or on or before the date a final decision in the proceeding is reached by the Commisison, whichever is earlier.

(2) The carrier or agent shall concurrently with the filing of such cancellation notify all parties of record in the proceeding and the Office of Proceedings, Interstate Commerce Commission, Washington, D.C. 20423, by first class mail or telegram of such cancellation. The notification shall refer to the docket number of the investigation and suspension proceeding, to the ICC (or MF-ICC) number of each tariff included in the suspension, and to the number of each supplement or loose-leaf page effecting the cancellation, and shall indicate the effective date thereof. The carrier or agent shall concurrently certify by first class mail to the Office of Proceedings that the notifications have been made. A signed copy of the certifying letter shall be attached to the letter of transmittal accompanying the copies of the tariff publication sent to the Bureau of Traffic for official filing.

(3) If the matter held in force is contained in the same tariff as the suspended or postponed matter and if it was specifically indicated to be canceled by the suspended or postponed matter, it must be brought forward without change concurrently and on the same notice into the supplement or onto the page canceling the suspended or postponed matter. If the matter held in force is still contained in a prior issue of the tariff containing the suspended matter, it may be brought forward without change concurrently and on the same notice into the canceling publication or into a new tariff.

(4) Suspended or postponed matter may not be canceled under the provisions of this paragraph

(i) When a particular carrier or agent cancels only a portion of the matter in tariffs issued in its name which is under suspension in a particular I. & S. docket;

(ii) Where cancellation of suspended matter by one carrier or agent would result in duplicating or conflicting provisions for account of any carrier if and when other suspended matter (which is also included in the same I. & S. docket) will become effective in tariffs of other agents or carriers; and

(iii) Where there is no matter (other than class rates) held in force to bring forward and the item, unit, or other provision providing for such cancellation contains the same provision (as that suspended) or a new or changed substitute provision. ("Docket" includes orders bearing sub numbers as well as the lead-number order.)

(5) The cancellation shall be accomplished by supplement (if a bound tariff) or by loose-leaf page amendment (if a loose-leaf tariff), except that if a loose-leaf tariff containing only the suspended matter is to be canceled, that cancellation shall be accomplished by supplement. Supplements and loose-leaf pages shall comply fully with the requirements of § 1310.10(c) or § 1310.10(d) (rule 10), respectively, and cancellation by notice, contrary to the provisions of such paragraphs, is not permitted except in a supplement canceling a tariff containing only the suspended matter. If a provision postponing the suspended matter is in effect, such provision shall be canceled concurrently and on the same notice by the supplement or, when the matter is canceled by a loose-leaf page amendment to a loose-leaf tariff, by the check sheet.

(6) No new matter may be published, nor the effective date of any matter advanced under the provisions of this paragraph.

(j) *Vacation of order—suspended matter under postponement found justified.* (1) When the Commission vacates an order of suspension, or when the effective date of suspended matter has been postponed beyond the term of the suspension order and the Commission finds the matter lawful or otherwise justified, unless otherwise directed the suspended or postponed matter may be made effective on not less than one day's notice. If this is done, the effectiveness shall be accomplished by supplement, if a bound tariff. As to loose-leaf tariffs, if the matter suspended or under postponement has not been brought forward on a new page with appropriate notations as permitted under paragraph (f) of this section, effectiveness shall be accomplished by supplement. If it has been brought forward to a new loose-leaf page (in the same tariff or in a reissue of the tariff) the effectiveness shall be accomplished by reissuance of the particular page or pages. If the order contains an effective date, the tariff action may not be indicated to become effective prior thereto.

(2) The supplement or the loose-leaf page shall identify the suspended or postponed matter and give effect thereto by statement, indicate the date upon which the matter will become effective, and cancel the postponement notice, if any.

(3) When a supplement containing a vacating notice is canceled, if a bound tariff the notice shall be brought forward as reissued matter, the same as any other tariff provision.

(4) Concurrently therewith and on the same notice, the matter held in force shall be canceled (the cancellation must be specific) provided it was originally indicated to be canceled by the suspended or postponed matter, or indicated to be canceled or to expire simultaneously with the effectiveness of the suspended or postponed matter.

(5) When the cancellation of a tariff is to be completed under the provisions of this paragraph, this must be accomplished by statement in a supplement to the new tariff if the new tariff had originally provided for the cancellation of the old tariff in its entirety. Otherwise, the cancellation of the old tariff shall be completed by statement in a supplement to that tariff.

(6) When an entire tariff which is under suspension (or subsequent postponement) is found lawful or otherwise justified, any changes or additions which in the interim have been lawfully made in the tariff held in force may be brought forward without change into the tariff found lawful or otherwise justified. If a new tariff superseding the tariff held in force has been filed during the period of suspension (or subsequent postponement) and the tariff originally held in force has been canceled, any changes or additions lawfully made in the new tariff which are not included in the tariff found lawful or otherwise justified may be brought forward without change into the latter tariff. In this event, concurrently and on the same notice, the new tariff shall be canceled by a supplement thereto. If the tariff found lawful or otherwise justified is a bound tariff, the reissued matter must be shown in the supplement which gives effect thereto. If a loose-leaf tariff, concurrently and on the same notice the reissued matter must be shown on one or more loose-leaf page amendments thereto. Supplements or pages filed under the provisions of this paragraph (j) may not contain any other matter.

(k) *Suspended or postponed matter ordered canceled.* (1) When the Commission orders suspended (or subsequently postponed) matter canceled, unless otherwise directed by the order, the cancellation may be accomplished on not less than one day's notice, by tariff amendment or reissue, effective not later than the final date of compliance stated in the order. The amendment shall be in full accord with § 1310.10(c), § 1310.10(d) (rule 10), or § 1310.11 (rule 11).

(2) If after the matter (that had been suspended) has become effective at the termination of the suspension period, or subsequent period of postponement (if any), the Commission issues an order requiring the respondent carrier or agent to cancel, and the matter that was held in force by reason of the suspension has been specifically canceled by the now effective formerly suspended provisions, or it had expired by its own terms in accordance with the manner of publication authorized in paragraph (f) of this section, such matter must be restored (subject to whatever changes, if any, lawfully made in the interim, except for the cancellation) effective concurrently with the effectiveness of the cancellation of the matter ordered canceled, and upon the same notice. Reinstatement may be accomplished only by republication of the canceled matter, unless otherwise authorized by this Commission.

(l) *Postponement of tariff matter published under an order which is stayed.* If a Commission order directs or authorizes, as the case may be, certain tariff action, and the effectiveness of the order or the compliance date therein specified is deferred or postponed specifically by order of the Commission, by operation of its regulations, or by a court of competent jurisdiction, the authority therein to require or permit certain action is also deferred or stayed. Therefore, if not already effective, the provisions published therein, if not otherwise authorized, must be postponed by the publishing carrier or agent. For this purpose, postponement may be published effective upon not less than one day's notice, referring to this rule for the authority therefor. The postponement must be to a date not earlier than that upon which it may otherwise lawfully be made effective or postpone indefinitely to such time as the postponement is specifically canceled. Postponement may be in the form of a statement, provided the application is clearly stated.

(m) *Compliance with § 1310.9(d) (rule 9) not required.* (1) When the Commission suspends an entire tariff, any tariffs which would have been canceled by the suspended tariff are continued in effect and will remain in force during the period of suspension or until lawfully canceled or reissued. Supplements to bound tariffs thus continued in effect containing additions to and changes in matter not sought to be changed by the suspended tariff may be filed without regard to the volume of supplemental matter which the effective supplements in the aggregate contain. If the volume permitted by § 1310.9(d) (rule 9) is exceeded and the Commission orders the cancellation of the suspended tariff, either the volume shall be brought within the requirements of § 1310.9(d) (rule 9) or the tariff reissued within 120 days.

(2) Supplements containing only the following kinds of provisions shall be considered exempt for the life of the tariff from the limitations of this part pertaining to the number of effective supplements and the volume of supplemental matter permitted to a tariff:

(i) Suspension notices, as provided by paragraph (c) of this section;

(ii) Provisions which have been republished to remove the violation of the suspension order caused by the republishing of matter under suspension, as provided by paragraph (e) of this section;

(iii) Notice of postponement of matter suspended, as provided by paragraphs (g) and (l) of this section;

(iv) Provisions for the cancellation of suspended matter, as provided by paragraphs (i) and (k) of this section; or

(v) Notice of vacation of suspension or postponement, as provided by paragraph (j) of this section.

(n) *Reference to authority and to investigation and suspension docket number required.* Reference to the investigation and suspension docket number and to this section or rule by number is required for any publication made hereunder. (See § 1310.5(i) (rule 5) as to tariffs, and § 1310.10(i) (rule 10) as to amendments.)

(o) *Court orders.* Restraining orders, injunctions, enjoinders, or other court orders having the effect of suspending the operation of tariff provisions must, to the greatest extent possible, be reflected in tariffs in the same manner as suspensions.

§ 1310.15 Terminal and other services—Charges and allowances (Rule 15).

(a) *Provisions must be filed.* (1) Each carrier or its agent shall identify and publish in clear and explicit terms and file with the Commission all rules governing, and, where charged, all rates and charges for: (i) Protective service (icing, refrigeration, heat), detention of vehicles, helper or extra labor furnished, storage, weighing, diversion, reconsignment, C.O.D. collection, transit, loading, unloadings, and all other terminal or extra services in addition to the line haul transportation; (ii) allowances or absorptions; (iii) and all other practices, privileges, or other considerations which in any way increase or decrease the amount to be paid on any shipment, or which increase or decrease the value of the service to the shipper. Tariffs authorizing such services, privileges, or practices, or providing rates or charges therefor, or authorizing allowances or absorptions must clearly show their application.

(2) Tariffs may not provide for the addition of any unspecified bridge tolls or ferry charges. They may provide for the addition of named bridge tolls or ferry charges on truckload or volume shipments only if the facilities are identified and the tariff shows clearly and explicitly when and under what circumstances the tolls or charges accrue on any given shipment. Tariffs may not provide for the addition of highway tolls or taxes assessed against the vehicle or the carrier. They may provide for the addition of the unspecified costs of federal, state, or local permits and fees only if the size or weight of the shipment, or the inherent nature of the commodity shipped, is such that the costs must necessarily be incurred, and if the tariff clearly indicates under what circumstances they will be incurred and that the separate amounts will be identified in any billing.

V 38-149
AUG 3 73
XUM

(b) *Method of publication.* (1) All such services, practices, charges, privileges, allowances, and absorptions shall be provided for in one of the following three ways:

(i) By including in the line-haul rate tariff the rules governing the service, practice, charge, privilege, allowance, or absorption, and the charge, if any, for any such service, practice, or privilege;

(ii) By including in the line-haul rate tariff a specific reference by ICC (or MF-ICC) number to a separate tariff for the rules governing the service, practice, charge, privilege, allowance, or absorption, and the charge, if any, for any such service, practice, or privilege; or

(iii) By including in the line-haul rate tariff the rule set forth below:

Shipments made under the rates contained in this tariff are entitled also to terminal and transit services and privileges, and are subject to the charges, allowances, rules, and regulations legally applicable thereto, as provided in separately published, lawfully filed tariffs.

No toll or ferry charge, nor charges or fees for permits, or other charges not for a service performed by the carrier or for a privilege may be provided for in this manner.

(2) The tariffs referred to by paragraph (b)(1)(iii) of this section may include only provisions for services, practices, privileges, charges, allowances, and absorptions which have local application for the carrier for and on behalf of which the tariff is published.

(3) The use of "free," "without charge," and similar terms must be avoided unless the term is published to apply on transportation which is authorized to be performed free by the Interstate Commerce Act. Except where otherwise provided by orders of the Commission, the tariff may provide that the line-haul rate includes the performance of the particular service.

(4) A tariff may not provide for performance of a service at actual cost. The charge must be specific and readily obtainable from the tariff. However, a carrier may exclude a service from its transportation performance provisions and provide that it will, upon request, act as the shipper's or consignee's agent and undertake to procure such service from other parties, advance the actual charges to the other parties, and collect such charges from the shipper or consignee. However, if the carrier, under the same or another name, is otherwise in the business of performing such service, practice, or privilege, it may not procure its own service at actual cost.

(5) Agents may refer specifically to a tariff (not a tariff naming line-haul rates) published in the name of a member carrier or another agent covering services, charges, practices, privileges, allowances, or absorptions local to the carrier's own line.

(c) *Joint rates include intermediate drayage or transfer.* Joint through rates from points on the line of one carrier to points on the line of another carrier include drayage or other transfer services at intermediate transfer points, and no part of such charges may be added to the joint rates on shipments handled through and not stopped for special services at such intermediate transfer points. All tariffs containing joint rates shall contain the following provision:

The joint rates published herein include all charges for drayage or other transfer services at intermediate transfer points on shipments handled through and not stopped for special services at such intermediate transfer points.

(d) *Pickup and delivery service.* (1) All tariffs containing rates for the transportation of property shall specify whether such rates do or do not include pickup and delivery service within the limits of the points from, to, or between which the rates are named. If the rates therein do include such service, the following rule must be published in the rate tariff (not a governing tariff):

The rates named herein include pickup and delivery service at all places within the limits of the cities, towns, villages, or other points from, to, or between which the rates apply.

To this rule may be appended exceptions or reference to exceptions or qualifying provisions elsewhere in the tariff or in a governing tariff (not another rate tariff).

(2) If pickup and delivery service will be performed also in an area beyond or outside the limits of the cities, towns, villages, or other points, from, to, or between which the rates apply, such area shall be described in the tariffs.

(3) If there are to be limitations to, or exclusions from, the service of pickup or delivery, they must be specifically and clearly stated. Unless the tariff specifically provides otherwise, pickup service includes loading by the carrier onto the vehicle and delivery service includes unloading by the carrier from the vehicle. Conflicts must be avoided when establishing rates specifically excluding loading and unloading by the carrier and there are other rates which, being silent on the matter, apply regardless of who loads and unloads.

§ 1310.16 Distance rates (Rule 16).

(a) *Distance rates may be filed—when they may be used.* A carrier or agent may file tariffs containing distance or mileage (hereinafter referred to only as distance) class or commodity rates, or both. Except as otherwise provided in § 1310.13 (rule 13) pertaining to alternating sections in tariffs, (1) distance class rates may be used only when no through class rates (other than distance class rates) are published to apply from and to the same points over the same route and (2) distance commodity rates may be used only when no through commodity rates (other than distance commodity rates) are published to apply from and to the same points over the same route.

(b) *Statements on publications required.* (1) Each tariff that contains only distance class rates or only distance commodity rates which do not alternate with the rates in any other tariff shall show on the title page the appropriate following statement:

Distance class rates shown herein may be used only when no commodity rates or class rates (other than distance class rates) are published to apply from and to the same points over the same route.

or

Distance commodity rates shown herein may be used only when no commodity rates (other than distance commodity rates) are published to apply from and to the same points over the same route.

(2) Each tariff that contains only distance class and commodity rates which do not alternate with the rates in any other tariff and which do not alternate with each other shall show on the title page the following statement:

Distance class rates shown herein may be used only when no commodity rates or class rates (other than distance class rates) are published to apply from and to the same points over the same route, and distance commodity rates shown herein may be used only when no commodity rates (other than distance commodity rates) are published to apply from and to the same points over the same route.

If the rates alternate with each other, the statement may be used if appropriately modified.

(3) If distance rates without alternative application are published in a tariff which also contains rates other than distance rates, the appropriate statement prescribed by paragraph (b) (1) or (2) of this section shall be shown directly with such distance rates.

(c) *Application of rates must be clear.* The application of distance rates must be clearly and definitely shown. The rate table or unit shall provide a scale of distances ranging from the minimum distance to the maximum distance for which charges will be applied. A rate shall be provided for each such distance. Each state or area embraced by the application of the rate table or unit shall be listed. Such listing must be brief, but must be completely informative as to the territorial coverage. The distances to use for application of the rates shall be determined by providing in the rate tariff the distances between all locations from and to which the rates are published to apply, or by referring in the rate tariff to one or more maps attached thereto or to one or more distance guides. Provisions for the use of "actual" mileage may not be published.

(d) *When a map is referred to.* (1) Not more than three maps may be referred to, and each shall be attached to the publication in a manner that will enable a user to open each map without tearing it or undoing the fastening. Each map should be attached to an individual sheet. The map or maps must provide distances between locations in every state embraced in whole or in part by the rates. (If not more than three maps cannot completely cover the territorial application of the rates, maps may not be used to provide the distances.) Only maps each of which covers a single state are acceptable, except where not more than three states are commonly grouped and no adequate single-state maps are available from ordinary commercial or government sources. (State governments generally have available highway maps of their respective jurisdictions.)

(2) When maps are referred to, the rate tariff must include a rule specifying the manner in which the distances will be obtained from the maps. The rule must include a definite means for determing distances (not "actual" mileage) for ratemaking purposes between all locations within the territorial coverage of the rates, regardless of whether all such locations are or are not shown on the maps and regardless of whether actual distances are or are not shown between all locations shown thereon.

(3) When a map to a tariff supersedes another map to the same tariff (loose-leaf or bound), the new map shall be attached to and made a part of a supplement to a bound tariff or a loose-leaf page to a loose-leaf tariff which shall specifically cancel the old map and give effect to the new.

(e) *When a distance guide is referred to.* (1) Only distance guides officially on file with the Commission may be referred to. More than one may be referred to provided the rate tariff clearly specifies the circumstances under which each guide will apply. All carriers parties to distance rates referring to one or more distance guides must also be parties to each guide referred to. An agent may refer to a distance guide published in the name of another agent for the account of participating carriers also parties to the guide.

(2) Distance guides shall be constructed on the principle of distance tables or combinations of tables and maps, definitely and clearly indicating distances between the locations covered by the rates referring thereto. Tables must provide specific distances between a substantial number of the points and be shown as having precedence. Each guide must provide rules setting forth the application of the guide. The rules must include a definite means for determining distances (not "actual" mileage) for ratemaking purposes between all locations within the territorial coverage of the guide, regardless of whether all such locations are or are not shown in the guide and regardless of whether distances are or are not shown between all locations therein. If distances between certain points or areas are to be determined through a certain gateway or interchange point only, and not by use of the short-line distance as determined from the maps or by use of the tables, the affected origin and destination areas and the gateway or interchange point (limited to one only) in connection therewith must be identified. Distance guides may exceed the maximum size limitation imposed by § 1310.4(a) (rule 4) but may not exceed 14½ by 17½ inches in size.

(f) *Size of characters on maps.* All characters shown on maps (including maps forming part of a distance guide) need not be of the minimum size ordinarily required by § 1310.4(b) (rule 4) but must be of sufficient size and clarity that they can be read without use of magnification. The Commission may refuse or require correction of maps which in its judgment require improvement to be acceptable.

§ 1310.17 Classification, exceptions, rules, and dangerous articles tariffs; precedence of class rates (Rule 17).

NOTE: See § 1310.28 (rule 28) for provisions which may be filed on less than 30 days' notice.

(a) *Classification.* (1) A tariff (not a rate tariff) may be filed containing a classification of the articles or commodities upon which the rates named in tariffs making reference thereto will apply. The various articles or commodities shall be listed in the classification in an orderly manner, and the class or rating to which an article or a commodity is assigned shall be shown directly therewith. Such a tariff shall contain an alphabetically arranged index of all of the articles or commodities listed. Item numbers shown in connection with commodity descriptions shall be assigned, and the items treated, in the manner prescribed in § 1310.4(h) (rule 4), except that they may have portions subordinate thereto indicated as "sub" or "S" following by a number which shall start with the number one and progress in numerical sequence if two or more such parts. Any amendment must be by complete reissue of the item including all its parts. A statement providing that the class, rating, or rate on any article or commodity will be that applying on another article or commodity is not permissible.

(2) Different classes or ratings on the same article, articles, commodity, or commodities based on different minimum quantities may be published provided the alternation provisions of § 1310.6(j)(2) (rule 6) are complied with.

(3) Rules which have general application may be published in a classification tariff. All rules in a classification must precede the list of articles and must be separately indexed.

(4) A tariff published in the name of an agent may refer to a classification tariff published in the name of another agent.

(b) *Precedence of rates.* (1) Each classification shall provide that the establishment of a commodity rate removes the application of the class rate on the same article between the same points over the same route, except when and insofar as alternative use of class and commodity rates is specifically provided in the tariff containing such commodity rates, and except that import, export, coastwise, and intercoastal class rates will take precedence over commodity rates which are not published to apply specifically on import, export, coastwise, or intercoastal traffic. In connection with the application of such a rule, there shall be provided a clear statement showing as to volume, truckload, less-than-truckload, and any-quantity commodity rates what category of class rates the application of which is removed by each such category of commodity rates.

(2) In applying the rule required by paragraph (b)(1) of this section, a local commodity rate will take precedence, on traffic originating or destined beyond, over a proportional class rate between the same points over the same route whether higher or lower, but an import, export, coastwise, or intercoastal class rate will take precedence on import, export, coastwise, or intercoastal traffic, respectively, over a domestic commodity rate.

(c) *Exceptions tariffs.* (1) A separate tariff may be filed containing exceptions to classification classes, ratings, rules or conditions for application in connection with tariffs or rates referring thereto. Exceptions published therein shall not be restricted to a small number of points. One rate tariff may be governed for account of any one carrier by not more than one tariff of exceptions published either by a carrier or by an agent. Except as otherwise provided in subparagraph (4) of this paragraph, a tariff of exceptions may not contain any matter which is not in fact an exception to a rule, class, rating, or other condition published in the classification. Exceptions may not be alternated with classes, ratings, rules, or conditions in the classification. Any statement providing that the class, rating, or rate on any article will be that applying to another article is not permissible.

(2) Different classes or ratings on the same article, articles, commodity, or commodities based on different minimum quantities may be published provided the alternation provisions of § 1310.6(j)(2) (rule 6) are complied with.

(3) An exceptions tariff shall contain separate and complete alphabetical indexes of the rules and of the articles listed therein. The exceptions shall be arranged and constructed in the manner set forth for exceptions in rate tariffs in subdivisions (ii), (iii), (iv), and (v) of § 1310.6 (j)(1) (rule 6). The title page shall provide a statement reading substantially as follows:

This tariff applies only in connection with tariffs referring hereto by ICC number.

(4) Rules and provisions covered by § 1310.6(i) (rule 6) may be included in the same tariff with classification exceptions. Lists of commodities authorized in § 1310.7(g)(4) (rule 7) may also be included in an exceptions tariff, in which case the carrier or agent may not have any other tariff publishing commodity lists exclusively. Where classification exceptions are published in the same tariff with rules or commodity lists, the tariff shall be divided into sections. Classification exceptions shall be shown in the first section, rules and similar provisions in the second, and commodity lists in the last. Such a publication must contain a complete index.

(d) *Rules tariffs.* Governing rules and similar provisions may be published in a separate tariff filed in the name of an agent or a carrier. As to any one rate tariff published by a carrier as its own issue there may not be more than one governing rules tariff of its own issue and not more than one governing rules tariff of its agent's issue. As to any one rate tariff published by an agent there

V 38-149 AUG 3 73 XUM

may not be more than one governing rules tariff, which must be the issue of that agent. A carrier may not publish in its own issue rules which cover the same service, practice, or privilege provided for its account in the tariff of its agent. Either the agent's tariff rule must indicate nonapplication for its account, or the carrier's tariff rule must be indicated as an exception to the rule of its agent and clearly identify what rule. Exceptions when taken must indicate it is to the complete rule, not merely a part, and an exception must be a complete rule in itself. For the purposes of this subparagraph, the following tariffs shall not be considered rules tariffs:

(1) Tariffs containing exclusively rules and charges applying to terminal and other services and other matters covered by § 1310.15 (rule 15);

(2) Classification tariffs authorized by paragraph (a) of this section;

(3) Classification exceptions tariffs authorized by paragraph (c) of this section, provided they do not contain rules or other provisions authorized to be included by § 1310.6(i) (rule 6);

(4) Rate basis books authorized by § 1310.18 (rule 18);

(5) Tariffs containing rules and regulations governing the acceptance and transportation of dangerous articles (hazardous materials);

(6) Substituted freight service directories authorized by § 1310.30 (rule 30); and

(7) Tariffs confined to providing basis numbers (by intersection of headline and sideline points) for determination of class rates or column commodity rates in other tariffs.

(e) *Dangerous articles tariffs.* A separate tariff may be filed reproducing the regulations promulgated by the Department of Transportation governing the acceptance and transportation of dangerous articles (hazardous materials). The tariff shall be properly indexed and include necessary provisions for the application of the regulations. It may contain no other matter. An agent may refer to such tariff published in the name of another agent.

(f) *Participation in governing publications.* All carriers parties to tariffs making reference to separate tariffs for classification classes or ratings, classification exceptions, rules, or other provisions affecting the rates or the services rendered, except such carriers as do indicate by restrictions in the referring tariffs that they will not apply the provisions of such referred to tariffs, shall also be participating carriers in such separate tariffs. The regulations in this paragraph do not require participation in local drayage tariffs or in tariffs containing provisions for terminal or special services local to the carrier in whose name the tariff is published. Rail and water carriers whose participation in the rate tariff is solely to provide substituted service at the motor carrier's option need not be parties to the tariffs governing the rate tariff except the governing tariff, if any, containing the provisions for such substitution. See § 1310.30 (rule 30).

§ 1310.18 Rate basis tariffs (Rule 18).

(a) *Separate tariffs may be filed.* Instead of showing in the rate tariff the rate groups or bases to be used in determining rates between points named therein and the carriers serving such points, a separate rate basis tariff may be filed to serve this purpose. If it is not desired to include both grouping and carrier service in the same tariff, one for each purpose may be filed. No tariff may be governed by more than two rate basis tariffs (not including points of service tariffs), one for points of origin and one for points of destination. A rate tariff may not refer to another rate tariff for a list of points assigned rate groups or rate bases or for a list of carriers serving points.

(b) *Points and carriers to be listed.* All generally recognized points (cities, towns, townships, and other named state locations that have a precise meaning territorially) of sufficient size located within the territorial coverage of the tariff shall be listed. The points shall be arranged alphabetically within each state and the states arranged alphabetically, or the points shall be arranged alphabetically throughout the tariff. There shall be shown in direct connection with each point the complete names of all carriers serving the point pursuant to the regular-route portion of their operating authorities from this Commission. The complete names of all carriers serving the point pursuant to the irregular-route portion of their operating authorities from this Commission shall also be shown to the greatest extent practicable. The name of a carrier serving the point pursuant to both types of authorites shall be shown only once. Omission of the showing of a carrier as serving a point does not in itself render inapplicable a rate named from or to such point. Carrier name abbreviations or code designations may be used provided they are explained in the tariff in which used.

(c) *Rate groups or rate bases—arbitraries or differentials.* The applicable rate group or rate basis, or arbitraries or differentials to be added to or deducted from the group or base rates, shall be shown directly with each point, except that reference may there be made to an item or unit showing such information. Exceptions to the rate group or rate basis shall not be made in rate basis tariffs unless such exceptions apply to or from a considerable number of points or on a considerable number of commodities. When the arbitraries or differentials are governed by classification or other provisions other than those governing the base or group rate, reference to such classification provisions or other provisions shall be made directly in connection with the arbitraries or differentials.

(d) *General rules may not be included.* Rules or other provisions governing the application of rates determined by the use of a rate tariff and a rate basis tariff or providing application of groups, bases, or rates at intermediate points may not be published in a rate basis tariff.

(e) *Scope of operating authority.* A rate basis tariff may include a section in which is reproduced the operating authorities of carriers in the manner set forth in § 1310.19 (rule 19).

§ 1310.19 Tariffs listing carriers' operating authority (Rule 19).

NOTE: See § 1310.28 (rule 28) for provisions which may be filed on less than 30 days' notice.

(a) *Separate tariffs may be filed.* (1) separate tariffs (not rate tariffs) may be filed by carriers or agents defining clearly the carriers' authorized operations, both as to commodities and territories, insofar as they are pertinent to the application of the rates in the tariffs referring thereto and of the routes over which such rates apply. For purposes of this section, such a separate tariff shall be known as a "scope" tariff. The application of the rate tariffs referring to the scope tariff shall be restricted by a provision published in the scope tariff as follows:

Rates and provisions for the account of carriers participating in tariffs governed by this tariff are limited in their application on interstate or foreign commerce to the extent of the carriers' operating rights set forth herein [If any tariff governed by the scope tariff refers to any other scope tariff, here show "and in" and identify the other scope tariff or tariffs by issuing carrier's or agent's name and ICC (or MF-ICC) number or refer to where such information is listed]. [If the scope tariff is issued in the name of a carrier, and all rates in tariffs referring thereto have local application only, the phrase "for the account of carriers participating" and the word "carriers'" shall not appear.] Unless otherwise specifically provided, the provisions are to be interpreted in the same manner as the Commission interprets the certificate from which the following is quoted, with respect to such as implied authority, commercial zones, tacking (of separate authorities), and diversion routes.

If the tariffs referring thereto names joint intermodal rates, the wording may be modified so as to confine the restriction to apply only to the extent the rates apply over the motor carriers.

(2) The limitation statements, reproducing a carrier's operating authority, should not be used as a substitute for the required description of commodities or territories in connection with the application of rates.

(b) *Reference to scope tariffs for one carrier.* A carrier publishing rates in a tariff of its own issue may refer to limiting scope of operating authority provisions in one other tariff only, which must be either of its own issue or an issue of its agent. A carrier publishing rates in a tariff of its agent's issue may refer to a separate tariff of that agent's issue, or refer therein to a tariff of another agent's issue in which the carrier is also a party, but not more than one separate issue may be referred to in any case. A carrier may not refer in its agent's issue to a tariff of its own issue or to one of another carrier. A carrier may not refer in its own issue to the issue of another carrier.

(c) *Agents' tariffs governed by more than one scope tariff.* A rate tariff filed

in the name of an agent may refer to more than one scope tariff. When this is done, the list of participating carriers in the rate tariff or in the participating carrier tariff governing the rate tariff shall identify the tariff in which each carrier's operating authority is published. Such identification or reference to such identification shall be shown directly with the carrier's name. Each scope tariff which governs a rate tariff must be specifically referred to by that rate tariff.

(d) *Scope provisions may be included in participating carrier tariffs.* Instead of filing a separate tariff, statements of carriers' operating authorities may be included in participating carrier tariffs or in rate basis tariffs, provided the operating authorities are shown in a separate section and the requirements of this section are otherwise complied with.

§ 1310.20 Participating carrier tariffs (Rule 20).

Note: See § 1310.28 (rule 28) for provisions which may be filed on less than 30 days' notice.

(a) *Separate tariffs may be filed by agents.* (1) An agent (not a carrier) or an agent jointly with not more than two other agents may file a tariff (not a rate tariff) listing the carriers participating in tariffs referring thereto provided there are at least ten participants and five governed tariffs. The title page must state it is applicable only as to tariffs which specifically refer to it.

(2) The tariff shall include rules and other provisions necessary to provide application thereof, but not rate restrictions, application of rates, or similar provisions which properly belong in rate tariffs or other tariffs. Exception: It may provide that the carriers participate in the governed tariffs only for local hauls or for joint hauls.

(b) *List of carriers.* (1) In the list of participating carriers, carrier numbers or abbreviations may be shown in connection with the names of the carriers.

(2) In connection with each participating carrier the participating carrier tariff and the governed tariffs in which it participates (by tariff number, not ICC or MF-ICC number) shall be shown. Exception: the participation of all carriers in the participating carrier tariff itself may be established by a statement, instead of listing the tariff number each time.

(3) In all cases reference shall be made to an item, unit, section, or page containing an explanation of such tariff numbers (see paragraph (c) of this section).

(c) *List of tariffs.* (1) A list of all tariffs, including those which contain their own list of participating carriers, published and filed in the name of the agent issuing the participating carrier tariff shall be shown, arranged in numerical sequence together with the ICC or MF-ICC number of each. The list must be correct and current at all times. The tariffs which contain their own list of participating carriers must be identified and described.

(2) Each tariff listed or referred to in the participating carrier tariff shall be described in a manner sufficient and indicative enough to enable the determination of the general application of the tariff without specifically reviewing such tariff.

(d) *Cancellation of participating carrier.* When a carrier is canceled from the list of participating carriers in a participating carrier tariff or is shown as eliminated from a tariff governed thereby, unless the cancellation is in connection with the publication of a complete adoption of the rates of such carrier by another (see paragraph (f) of this section and § 1310.25 (rule 25)—*Transfer of operations; changes in name and control*) reference must be made in connection with such cancellation to an item reading substantially as follows:

APPLIES ONLY WHEN REFERENCE IS MADE HERETO

When this tariff provides that a carrier's participation in this tariff or in one or more of the tariffs governed hereby is canceled, the provisions of the tariff or tariffs from which the carrier's participation is shown as canceled do not apply for the account of such canceled carrier after such cancellation becomes effective, notwithstanding some of the provisions of such tariffs may still be shown as applying for such canceled carrier, not having been specifically canceled by publication therein.

The canceled carrier's name together with the reference must be continued in the alphabetical list of participating carriers until the participating carrier tariff (whether bound or loose-leaf) is reissued or until all provisions referring to such carrier have been amended to omit the carrier, whichever occurs first. The cancellation provision in the participating carrier tariff should be carried forward into the reissue if the canceled carrier's name appears in any effective provisions in any tariffs governed by the participating carrier tariff at time of reissue.

(e) *Reinstatement of participating carrier.* When a carrier, which was canceled from the list of participating carriers in a participating carrier tariff or was shown as eliminated from a tariff governed thereby, is reinstated, reference must be made in connection with such reinstatement to an item reading substantially as follows:

APPLIES ONLY WHEN REFERENCE IS MADE HERETO

The participation of the carrier whose listing refers hereto was canceled and was (or will be) subsequently reinstated on the dates as indicated in the tariff. In the interim period the tariffs do not apply, but upon reinstatement all provisions not specifically eliminated by publication or republication again applied (or will apply) upon the effective date of the reinstatement.

The reference must continue to be shown with the reinstated carrier's name in the alphabetical list of participating carriers until the participating carrier tariff is reissued.

(f) *Adoptions.* (1) When one carrier adopts the rates, tariffs, etc. of another carrier in full or in part (see § 1310.25 (rule 25)), such adoption must be announced in the participating carrier tariff substantially as follows:

The carrier shown in Column 2 below, by its adoption notice referred to in Column 3 below, having taken over tariffs, powers of attorney, and other instruments of the carrier shown in Column 1 below, the carrier shown in Column 2 below is hereby substituted for the carrier shown in Column 1 below wherever it appears in this tariff and in tariffs governed hereby.

Column 1	Column 2	Column 3	
		Adoption Notice	
Old Carrier	New Carrier	ICC or MF-ICC No.	Effective Date

[Here list the adoption notices, and when adopted in part, the part adopted must be shown.]

(2) If the adoption is in full, the former (old) carrier must be canceled from the list of participating carriers. If the old carrier is adopted in part only and the agent continues to publish all or some of its remaining rates, it must not be canceled from the tariff. In either event the old carrier whether continued or canceled should bear reference to the announcement of the adoption. Such cancellation and reference to the adoption must be continued in the participating carrier tariff until such tariff is reissued, and the announcement of the adoption must be carried forward from one participating carrier tariff into the reissues thereof until the adopted carrier's name no longer appears in any item, rule, or other provision in any of the tariffs governed by the participating carrier tariff. No other information (except where the adoption is partial) may be shown in connection with the adopted carrier.

(g) *Participating carrier tariff may include statements of operating rights.* One tariff may combine participating carrier provisions authorized by this section and statements of carriers' operating authority provisions authorized by § 1310.19 (rule 19) provided they are shown in separate sections.

§ 1310.21 Tariffs of joint agents (Rule 21).

(a) *May be filed.* An agent for certain carriers may join with not more than two other agents for other carriers in the issuance of tariffs. This may be done without each of such agents having powers of attorney from all of the carriers parties to the tariff as required by § 1310.6(e) (rule 6), provided each carrier is shown as participating under authority issued to one of such agents. In such cases, each agent acts for the carriers that have given it powers of attorney or have given concurrences to the carriers issuing powers of attorney and for such lines only.

(b) *Title pages and loose-leaf pages.* The title page of each tariff and supplement, and each loose-leaf page shall bear the name of each agent joining therein, bear a separate ICC (or MF-ICC) number in the series of each agent, and show at the bottom the name and title of each issuing party and the complete street and mailing address of each agent, including the postal service ZIP Code number. The name of the agent actually issu-

V 38-149 AUG 3 73 XUM

ing the publication shall be shown first followed by the words "jointly with" and then the names of the other agents joining therein. The pages (title or loose-leaf) shall be prepared in such a manner that it will be clear as to the agent for which each ICC (or MF-ICC) number and each address applies and for which agent each issuing officer (if different from the name of the agent) is acting. In all other respects, such pages (title or loose-leaf) shall be constructed in accordance with the regulations in this part.

(c) *Publications must be identical and filed under one cover.* Each of the agents shall file each and every tariff publication for and on behalf of the carriers for which it is agent, as if the publication were its individual publication on behalf of those carriers alone. The tariff filed by one agent is not a complete publication properly authorized by all carriers named therein. It is a complement of the tariff filed by each agent. Therefore, identical copies of each tariff and of each supplement or loose-leaf page thereto must be filed by each agent. As each agent will file the tariff for the carriers which it lawfully represents, the cross exchange of concurrences between all of the different carriers represented by each agent will not be necessary as to that tariff. In order to avoid complications, all copies of each publication shall be transmitted under one cover (see § 1310.1(c) (rule 1) as to letters of transmittals). A tariff filed by one agent shall not be amended to show an additional agent as participating in the issuance thereof except upon reissue of the tariff; nor shall a tariff issued by joint agents be converted into one issued by a lesser number of agents except by reissue. In either event, the old tariff shall be canceled only by a supplement issued thereto.

(d) *List of participating carriers.* Each tariff issued by two or three agents jointly shall show one complete alphabetical list of participating carriers indicating the carriers from which each of the agents has power of attorney, by showing in separate columns the form and number of the authority granted to each. The list shall also indicate the carriers that participate under concurrences to any of the carriers for which one of the agents acts, by showing in an additional column the form and number of such concurrences together with appropriate reference marks to indicate the carriers to whom the concurrences are given. If the same agents have jointly issued a participating carrier tariff, this information may be shown therein (see § 1310.20 (rule 20)).

§ 1310.22 Seasonal motor-water rates (Rule 22).

(a) *Tariffs may provide for restoration or discontinuance of service.* Tariffs containing joint motor-water rates applicable over routes upon which it is necessary to close navigation during a portion of each year shall provide for the restoration and discontinuance of service over such routes in the manner prescribed in paragraphs (b) through (f) of this section.

(b) *Notation required on title page.* The following notation shall appear on the title page of the tariff:

Transportation service in connection with [here insert name of water carrier or carriers named in the tariff] is subject to restoration and discontinuance as indicated on page ----.

(c) *When definite dates of service cannot be determined.* When definite dates for restoration and discontinuance of transportation service for each season of navigation cannot be determined, the following rule shall be published in the tariff under the heading of "Application of Rates":

Shipments will be accepted by carriers parties to this tariff during the period from [here show date approximately thirty days prior to the first sailing from port of transshipment] to [here insert date which will allow sufficient time for shipment to reach the port of transshipment prior to the last sailing] of each year, for transportation on the vessels of the [here insert name of water carrier or carriers named in the tariff]. Shipments will also be accepted from the latter date until the date announced by supplements to this tariff subject to the conditions that all freight left on hand at the port of transshipment after the closing of navigation for lack of space on vessels sailing after the arrival of such freight, and all freight reaching the port of transshipment after the last sailing of each season of navigation, will be forwarded over all-motor routes and be subject to the tariff rates applicable over such all-motor routes in effect on date of shipment from the point of origin of the shipment. In such cases shipping receipts and bills of lading shall bear notation to that effect. Supplements announcing the final date upon which shipments will be accepted for transportation under this tariff and effective supplements thereto will be filed with the Interstate Commerce Commission and posted at points where required not less than one day in advance of such date.

(d) *When definite dates of service can be determined.* When definite dates for restoration and discontinuance of transportation service for each season of navigation can be determined, the following rule shall be published in the tariff under the heading of "Application of Rates":

Shipments will be accepted by carriers parties to this tariff during the period from [here show date approximately thirty days prior to the first sailing from port of transshipment] to [here show date which will allow sufficient time for shipment to reach the port of transshipment prior to the last sailing] of each year, for transportation on the vessels of the [here insert name of water carrier or carriers named in the tariff]. Shipments will also be accepted from the latter date until [here insert final date upon which shipments will be accepted for transportation under the tariff and effective supplements thereto], subject to the condition that all freight left on hand at the port of transshipment after the closing of navigation for lack of space on vessels sailing after the arrival of such freight, and all freight reaching the port of transshipment after the last sailing of each season of navigation, will be forwarded over all-motor routes and be subject to the tariff rates applicable over such all-motor routes in effect on date of shipment from the point of origin of the shipment. In such cases shipping receipts and bills of lading shall bear notation to that effect. No supplement will be issued to this tariff announcing the date of discontinuance of transportation service.

(e) *Supplements announcing discontinuance of service.* Supplements announcing discontinuance of transportation service under paragraph (c) of this section may be filed to a bound or loose-leaf tariff on not less than one day's notice. Only one such supplement may be in effect at any time. Such supplement may not contain any other matter and may be issued without regard to the supplemental limits of this part.

(f) *Tariffs may be reissued.* Tariffs containing joint motor-water rates may be reissued or amended at any time in the regular manner, but tariffs containing the rule prescribed by paragraph (c) of this section which are made effective subsequent to the date of actual discontinuance of service shall contain a statement that "service was discontinued on ---------- as per supplement No. ---- to ICC (or MF-ICC No.) ------ (former tariff) and that a further supplement announcing discontinuance of service for that season will not be filed."

§ 1310.23 Rates prescribed by Commission (Rule 23).

Rates prescribed by the Commission in its decisions and orders in formal cases shall be promulgated by the carriers or agents to which such orders are issued in duly published, filed, and posted tariffs, loose-leaf pages, or supplements, and notice shall be furnished the Commission that its decision or order has been complied with. The notice shall refer to the docket number (when possible, the volume and page number of the report of the Interstate Commerce Commission, if printed, should also be shown) and shall identify the number of the item, page, supplement, and/or tariff where the complying rates are published. Unless otherwise specified in the decision or order in the case, the prescribed rates shall be made effective upon not less than 30 days' notice. The tariff publication shall refer to the order or decision in the manner required by the regulations in this part.

§ 1310.24 Tariff indexes (Rule 24).

(a) *Must be filed by most carriers—information required.* (1) Each motor carrier shall publish, file, and post as a tariff, under an ICC number and in its own name, a complete index of all effective and all published but not yet effective tariffs to which it is a party (including those published in its own name). A Class III carrier need not comply with this subparagraph if it does not participate in any rate tariff of an agent. A carrier participating in rate tariffs published in the name of an agent need not list the tariffs of that agent if the agent publishes a participating carrier tariff listing the carrier's participation in all such tariffs to which it is a party. In this event, the index shall state that the carrier participates in tariffs published in the name of the agent (identifying the agent) and shall refer to the agent's participating carrier tariff. Any general restriction (for example "Joint Rates only") affecting the carrier in connection with the agent's tariffs shall also be shown. If a carrier participates in any tariff of an agent not governed by a participating carrier tariff the index must list that tariff.

(2) The index shall show as to each tariff listed therein (i) the ICC (or MF-ICC) number; (ii) the carrier's or agent's tariff number, if any; (iii) the name of the carrier or agent in whose name the tariff is published; (iv) the type of tariff (such as classification, class rate, specific commodity rate, rules, etc.); (v) a description of the articles, if any, on which the tariff applies (such as general commodities, all-freight, iron or steel articles, etc.); and (vi) the actual or general territorial application, if any, of the provisions in the tariff applying for the account of the carrier in brief but reasonably complete form. Any general restriction in a tariff pertaining to the carrier (such as "joint rates only") shall be shown. In no case may the description of the application of referred to tariffs represent less than the actual application.

(b) *Arrangement.* The tariffs shall be listed under appropriate headings in the following order: specific commodity tariffs, general commodity tariffs, combined class and commodity tariffs, class tariffs, and governing tariffs. Specific commodity tariffs shall be entered alphabetically under the names of commodities or principal commodities. Tariffs applying to different kinds of the same commodity shall be grouped together—for example, "Lumber, hardwood," "lumber, yellow pine," etc. Governing tariffs shall be entered alphabetically by the type of governing tariff. In addition, all tariffs appearing within a group or grouped together under a specific heading shall be listed in an orderly manner.

(c) *Supplements or loose-leaf page amendments to tariffs listed in the index.* Supplements or loose-leaf page amendments to tariffs should not be referred to in indexes. Where supplements or loose-leaf pages have the effect of changing the application of the original tariff, the description of such tariff in the index shall be revised accordingly.

(d) *Revisions, supplements, and loose-leaf pages.* The information in the index must be maintained in a current condition, and amended concurrently with changes in tariffs. Each supplement shall bear on the title page the following notation:

Supplement (or supplements) [here show the number or the numbers of the supplements containing changes from the original index] contain all changes from original index which are in effect on the issue date hereof;

to which may be added

or which have been filed to become effective at a later date as shown herein.

Supplements (not loose-leaf page amendments) may be issued without regard to the volume limitations imposed on supplements by this part, but not more than three supplements may be in effect at any time.

(e) *Notation on title page.* Each index must bear on its title page the following notation:

This index contains a list of tariffs in effect on [here show date of issue of index];

to which may be added

or which have been filed to become effective at a later date as shown herein.

(f) *Issued date but no effective date.* The title page of each index and of each supplement or loose-leaf page amendment thereto shall bear an issue date but not an effective date. The date of issue shall not be one prior to the date filed with the Commission.

§ 1310.25 Transfer of operations—Change in name and control (Rule 25).

(a) *Different situations.* The construction and filing of tariff publications, powers of attorney, and concurrences when the name of a carrier is lawfully changed or the operating control of a carrier's properties is lawfully transferred to another party involve many different kinds of situations each of which requires different procedures to be followed. Below are summarized many kinds of situations together with a reference in each instance to the paragraph in this section containing the regulations governing that situation.

(1) For publications required to record new ownership of effective tariffs, etc.—see paragraph (b) of this section.

(2) When old carrier has no tariff provisions or other instruments or filings—see paragraph (c) of this section.

(3) When only adoption notice is required—see paragraph (d) of this section.

(4) For form of adoption notice—see paragraph (e) of this section.

(5) When combined adoption notice and adoption supplement is required—see paragraph (f) of this section.

(6) For form of combined adoption notice and adoption supplement—see paragraph (g) of this section.

(7) For series of ICC numbers to use on adoption notices and new tariffs—see paragraph (h) of this section.

(8) For effective date to show on adoption publication—see paragraph (i) of this section.

(9) For period after which adopted tariff may not be amended—see paragraph (j) of this section.

(10) When name of old carrier need not be shown in connection with series—see paragraph (k) of this section.

(11) When a carrier assumes temporary operating control of another carrier's properties—see paragraph (l) of this section.

(12) When receivers, trustees, etc. are involved—see paragraph (n) of this section.

(13) When concurrences or powers of attorney are involved—see paragraph (o) of this section.

(14) When tariffs issued by other carriers or by agents are involved—see paragraph (p) of this section.

(15) For provisions governing the amendment or cancellation of adopted tariffs—see paragraphs (q), (s), (t), and (u) of this section.

(16) For provisions governing the amending by the new carrier of a tariff adopted in part and the reservation of supplement numbers therefor—see paragraph (s) of this section.

(b) *Requirement for recording new ownerships of effective tariffs, etc.* When the name of a carrier is lawfully changed or the operating control of a carrier's properties is lawfully transferred in whole or in part to another party under authority of an order of the Commission (all hereinafter referred to as an adoption), an adoption notice is the vehicle required by this Commission for recording the new ownership of effective tariffs, tariff provisions, concurrences, powers of attorney, and other instruments and filings (see paragraph (n) of this section for exception as to receivers, etc.). An adoption supplement to a tariff is the vehicle required by this Commission to reflect the adoption notice insofar as it pertains to that tariff. The supplement also acts as a notification to the user that the ownership of the tariff has or tariff provisions therein have been transferred, and when and to what party. For purpose of this section, "old carrier" refers to the carrier whose operating authority is being transferred to a new name or another party in whole or in part, and "new carrier" refers to the new name or party to which the operating authority is being transferred in whole or in part.

(c) *If old carrier has no tariff provisions or other instruments.* If the old carrier has no tariffs, concurrences, or powers of attorney involved in the adoption, no adoption notice shall be filed. In this event, the new carrier shall immediately, but on lawful notice, provide published rates and provisions to cover the operating authorities involved in the transfer.

(d) *When only adoption notice is required.* When the old carrier has no effective tariffs of its own (or predecessor's) issue that are to be adopted but has one or more of the following categories of filings that are involved in the adoption, the new carrier shall file and post in its own name an individual adoption notice in the form of a tariff as set forth in paragraph (e) of this section.

(1) Tariffs of an agent in which old carrier participates.

(2) Tariffs of another carrier in which old carrier participates.

(3) Powers of attorney.

(4) Concurrences.

(5) Any other instruments filed with the Commission.

(e) *Form for adoption notice.* If the circumstances are as recited in paragraph (d) of this section, and the adoption is in whole, the adoption notice shall be prepared in substantially the following form (numbers and names used only for illustration purposes):

V38-149 AUG 3 73 XUM

ICC 45

JOHN DOE TRANSPORT, INC.

ADOPTION NOTICE

The above-named carrier hereby adopts, ratifies, and makes its own, in every respect, as if the same had been originally filed and posted by it, all tariffs, classifications, rules, notices, traffic agreements, statements of divisions, powers of attorney, concurrences, or other instruments or filings whatsoever, including supplements or amendments thereto, filed with the Interstate Commerce Commission by, or heretofore adopted by

Richard Roe, doing business as
Roe's Trucking

prior to the effective date shown below.
Issued: [show date prepared.]
Effective: [show date.]

(Issued under authority of Rule 25 of Tariff Circular No. MF 5 and order in ICC Docket No. MC-FC-00000—Transfer)

Issued by
William P. Doe, Traffic Manager
1111 A Street
Any town, Your state 00000

When, in the same circumstances, the adoption is in part, the notice shall read the same except the statement "insofar as said instruments and filings apply" shall be added at the end of the notice followed by a statement of the operating authority transferred or a reference to the number or numbers of the page or pages of the adoption notice where this information is shown.

(f) *When combined adoption notice and adoption supplement is required.* Where the old carrier has even one effective tariff of its own (or predecessor's) issue that is involved in the adoption, regardless of whether the adoption is in whole or in part the new carrier must file and post in its own name a combination publication which shall serve as both the adoption notice and the adoption supplement or supplements (see paragraph (s) of this section as to the new carrier amending the old carrier's tariffs when the adoption is in part). The publication shall be prepared as set forth in paragraph (g) of this section. Two copies plus two additional copies for each tariff supplemented shall be filed.

(g) *Form for combined adoption notice and adoption supplement.* (1) If the circumstances are as recited in paragraph (f) of this section, and the adoption is in whole, the combined publication shall be prepared in substantially the following form (numbers and names for illustration only):

JOHN DOE TRANSPORT, INC.

Adoption Notice Tariff-------	ICC 45
Adoption Supplement 8 to----	MF-ICC 11 [1]
Adoption Supplement 7 to----	MF-ICC 27 [1]
Adoption Supplement 3 to----	ICC 4 [1]

[1] (Richard Roe, doing business as Roe's Trucking, series).

The above-named carrier hereby adopts, ratifies, and makes its own, in every respect, as if the same had been originally filed and posted by it, all tariffs, classifications, rules, notices, traffic agreements, statements of divisions, powers of attorney, concurrences, or other instruments or filings whatsoever, including supplements or amendments thereto, filed with the Interstate Commerce Commission by, or heretofore adopted by

Richard Roe, doing business as Roe's Trucking

prior to the effective date shown below.
Effective with the effective date shown below, each tariff, or as amended, to which this is a supplement became the tariff of John Doe Transport, Inc. as stated in its adoption notice shown next above.
Issued: [show date prepared.]
Effective: [show date.]
(Issued under authority of Rule 25 of Tariff Circular No. MF 5 and order in ICC Docket No. MC-FC-00000-Transfer)

Issued by
William P. Doe, Traffic Manager
1111 A Street
Any town, your state 00000

When, in the same circumstances, the adoption is in part, the adoption notice shall read the same except (1) the statement "insofar as said instruments and filings apply" shall be added at the end of the first paragraph of the combined notice followed by a statement of the operating authority transferred or a reference to the number or numbers of the page or pages of the adoption publication where this information is shown and (ii) the statement "but only to the extent indicated" shall be added at the end of the second paragraph of the combined notice.

(2) Each adoption supplement shall be assigned the next unused supplement number to the particular tariff supplemented. If the tariff involved in an adoption is one that is adopted in part only, the old carrier shall reserve (and not use) the next two consecutive numbers for the sole use of the new carrier for adoption and cancellation purposes. The adoption supplement issued by the new carrier shall use the first of these numbers for the issuance by it of the partial-adoption supplement (and later the other for cancellation and transfer of the adopted provisions to other tariffs). See paragraph (s) of this section.

(h) *Series of ICC numbers to use on adoption notices and new tariffs.* Except as otherwise provided in this paragraph as to temporary operating control situations and appointments of receivers, etc., the ICC number assigned to an adoption notice shall be the next consecutive unused one in the ICC number series of the new carrier. If no previous tariffs have been filed, the adoption notice shall be numbered ICC 1. An adoption notice shall be assigned the next consecutive unused number in the ICC number series of the old carrier when the adoption is one where a party assumes temporary operating control of all the properties of a carrier pursuant to section 210a(b) of the Act or when the adoption is one where possession and operating control of a carrier is assumed by a court appointed receiver, trustee, executor, administrator, assignee, etc. (see paragraph (n) of this section). In this event and if the old carrier has not previously filed a tariff, the adoption notice shall be numbered ICC 1 in the old carrier's series. All subsequently filed tariffs shall continue to be published in the same series. In the event it is in the old carrier's series, the ICC designation shall be identified by naming the carrier followed by "Series."

(i) *Effective date on adoption publication.* An adoption notice or combined adoption notice and adoption supplement shall be filed and posted immediately and if possible on or before the effective date shown thereon. Copies shall be sent to each agent and carrier to which power of attorney or concurrence has been given by the old carrier. The effective date shall be the date (as shown in the body of the notice) on which the adoption occurs, except that if prior approval of such adoption by this Commission is required, the effective date shown shall not antedate that approval.

(j) *Adopted tariff may not be amended after one year.* The transfer of the old carrier's tariffs and tariff provisions is intended to be only a temporary expedient so that operations may be continued without interruption or commenced without delay. It is not intended to be a permanent solution or even one of other than short duration. The new carrier, after adopting a tariff in its entirety, has a duty to promptly establish rates and other provisions to cover in tariffs of its own issue and to cancel the adopted tariff. A tariff of the old carrier's (or predecessor's) issue which has been adopted, whether in whole or in part, may not be amended by any publication filed after one year's time from the effective date of the adoption except (1) to cancel; (2) to reissue; (3) to announce a suspension; (4) to announce another adoption; (5) to initially comply with an order of the Commission (but not continuing compliance as to a continuing order); or (6) to cancel rates or other provisions adopted by the new carrier. This paragraph does not apply where the adoption (1) is one to effect temporary operating control pursuant to section 210a(b) of the Act, (2) is to cover appointment of a receiver, trustee, etc. (see paragraph (n) of this section), or (3) is one where the old carrier reassumes control of the operation.

(k) *When name of old carrier need not be shown.* When a carrier adopts back tariffs which it had issued (and which had been adopted) there is no need to refer to those tariffs as being in its series as it would do if adopting issues of another carrier.

(l) *Temporary control.* (1) When the adoption is one where a party assumes temporary operating control of all or part of a carrier's properties pursuant to section 210a(b) of the Act, a new separate and distinct carrier is established. For example, if John Doe Transport, Inc. assumes temporary control of the properties of Richard Roe, doing business as Roe's Trucking, the name of the new carrier is as follows:

John Doe Transport, Inc.
Operator of
Richard Roe,
doing business as
Roe's Trucking

The exact name of the new carrier must be shown on or in all tariff publications, concurrences, powers of attorney, and other instruments filed by it or for its account.

(2) When permanent authority to take over the temporarily controlled operations is granted by the Commission, the new carrier shall file new adoption publi-

cations in the name specified in the permanent authority and otherwise comply with the provisions of this section. The name of the old carrier in the adoption publications must be that of the immediate predecessor ("operator of") carrier.

(3) If the temporary authority to assume operating control of the old carrier is not made permanent, the original carrier (whose operations had been temporarily controlled) must file adoption publications reassuming ownership of the rates, tariffs, etc. and otherwise comply with the provisions of this section. The effective date to be shown is the date on which the temporary authority expires or is vacated.

(m) *Adoption publications to contain no other matter.* No adoption notice or combined adoption notice and adoption supplement may contain any matter other than that authorized by the provisions of this section.

(n) *Adoption publications not required from trustees, etc.* When the appointment of a receiver, trustee, executor, administrator, or assignee is approved or directed by a court of law and such person assumes possession and operating control of a carrier's properties, the authority vested in such person or persons is accepted as notice of the change in control of both the properties and the filings with this Commission, and no adoption publications need be filed. However, if filed, the regulations of this section shall be complied with. When such possession and operating control are terminated, the party taking over the properties shall in turn comply with the regulations in this section.

(o) *Concurrences and powers of attorney.* (1) When the adoption is in whole, the new carrier takes over the effective concurrences and powers of attorney the old carrier has on file, and the authority given therein by the old carrier continues as authority given by the new carrier until replaced by new instruments or revoked or canceled. However, the new carrier has a positive duty to dispose of them promptly, and in any case must replace and cancel (or revoke) them within 120 days of the effective date of the adoption publications (see next following for exceptions). The instruments need not be replaced and canceled, or revoked, if they are taken over:

(i) By a court appointed receiver, trustee, or other court appointed officer;

(ii) In the case of temporary operating control of all a carrier's properties (under authority of section 210a(b) of the Act) being exercised; or

(iii) By the carrier that originally issued them following termination of temporary operating control by another.

When an instrument is canceled, the cancellation notice shall identify the name of the carrier having originally issued the instrument.

(2) When the adoption is in part, the authority given in an involved concurrence or power of attorney by the old carrier also serves to give authority by the new carrier until the new carrier issues new instruments (unless in the meantime the old carrier has canceled or revoked them). This is intended to continue the authority for only the shortest period of time necessary for the new carrier to execute and issue new instruments. Therefore, the new carrier must issue new instruments at the same time it issues the adoption publications (see next following sentence for exception). The new carrier shall not issue any instrument granting authority which will duplicate or conflict with the authority granted by any instrument previously issued by it.

(3) The number series of any new instrument shall be that of the new carrier, except that it shall be that of the old carrier where temporary operating control of all the properties of the old carrier (under authority of section 210a (b) of the Act) is being exercised or where control is exercised by a receiver, trustee, or other court appointed officer. The number of any instrument issued in the series of the old carrier shall be identified by naming that carrier followed by "Series."

(p) *Tariffs issued by other carriers or by agents.* (1) Where a tariff (not a participating carrier tariff) is an issue of another carrier or of an agent, has its own participating carrier list, and lists the old carrier being adopted in whole as a participant, such tariff must be amended on lawful notice to reflect the change. The old carrier's name shall be brought forward and shown as canceled. In direct connection with the cancellation shall be shown a reference to a statement in the tariff providing for the substitution of the new for the old. The latter statement referred to shall read substantially as follows:

[Here show name and trade name, if any, of the new carrier] by its adoption notice, ICC ------, which became effective on ----------, having taken over the tariffs, etc., of [here show name and trade name, if any, of the old carrier] [here show name and trade name, if any, of the new carrier] is hereby substituted for [here show name and trade name, if any, of the old carrier] wherever it appears in this tariff.

(2) In the same circumstances set forth in paragraph (p) (1) of this section, but where the adoption is in part only, each tariff involved in the adoption shall be amended to add to the list of participating carriers the name of the new carrier and to incorporate necessary changes. The old carrier's name may not be canceled from the list until such time that the tariff no longer contains provisions applicable for the account of that carrier. In direct connection with the name of the old carrier shall be shown a reference to a statement in the tariff providing for the substitution of the new for the old. The latter statement referred to shall read substantially as follows:

[Here show name and trade name, if any, of the new carrier] by its adoption notice ICC ------, having taken over tariffs, etc., of [here show name and trade name, if any, of the old carrier] insofar as they contain rates, charges, rules, or other provisions applying [here describe the operations transfered], [here show name and trade name, if any, of the new carrier] is hereby substituted for [here show name and trade name, if any, of the old carrier] wherever the latter appears in this tariff in connection with said points, routes, or territories.

(3) Where a participating carrier tariff lists the old carrier being adopted in whole or in part as a participant in a tariff involved in the adoption, the participating carrier tariff shall be amended to reflect the change in the manner set forth in § 1310.20 (rule 20).

(q) *Tariffs involved in part shall be amended.* Rates, rules, and other provisions applying locally between points on the transferred portion shall be transferred as quickly as possible to tariffs of the new carrier. Such rates, rules, and other provisions shall be canceled from the old carrier's tariffs on lawful notice and reference made to the new carrier's tariffs for provisions to apply thereafter. The new carrier shall file corresponding or different rates, rules, or other provisions on lawful notice to become effective upon the same date as the cancellation from the old carrier's tariff.

(r) *Junction point.* If, after the adoption, any point will be served both by the old carrier and by the new carrier, a statement shall be shown in connection with the name of that point reading substantially as follows:

This adoption notice does not have the effect of eliminating [here show name of point] as a point served by [here show name and trade name, if any, of the old carrier], but has the effect of establishing service at said point by [here show name and trade name, if any, of the new carrier].

(s) *New carrier may amend tariff adopted in part—reserved supplement numbers for new carrier's use.* If a tariff issued by the old carrier or its predecessor is adopted in part, in addition to filing the combined adoption notice and adoption supplement the new carrier may file another supplement to that tariff (bound or loose-leaf) for the purpose of canceling therefrom rates, routes, rules, or other provisions that belong to it by virtue of the adoption. Two unused supplement numbers to such a tariff shall be reserved for the new carriers' use. The first number shall be used as the "adoption supplement number" in connection with the listing of the tariff on the combined adoption notice and adoption supplement. The second shall be used on the cancellation supplement. The old carrier may not use the reserved numbers under any circumstances nor may it cancel the tariff provisions adopted by the new carrier. The old carrier may, however, cancel the entire tariff at any time. Both carriers should inform one another fully of their respective actions.

(t) *Subsequent supplements or loose-leaf pages.* A subsequent supplement or loose-leaf page amendment to an adopted tariff issued by the old carrier or its predecessor shall show in connection with the ICC (or MF-ICC) number the name of the carrier in whose ICC (or MF-ICC) number series the tariff was issued (see paragraph (k) of this section for exception). Each supplement or page shall be filed by the new carrier if the tariff was adopted in whole. If the tariff

V 38-149 AUG 3 73 XUM

was adopted in part, except as otherwise provided in paragraph (s) of this section supplements or loose-leaf pages shall be filed by the old carrier. Subsequent supplements shall be numbered consecutively beginning with the number following that of the adoption supplement.

(u) *Former tariff must be described when canceled.* The new carrier, when canceling any tariff issued or adopted by the old carrier, shall identify such tariff in the cancellation notice by reference to its ICC (or MF-ICC) number and to the name of the carrier that issued it, and, when tariffs have been published by the old carrier in more than one series, by reference to the particular series in which the tariff was published.

(v) *Adoption notice not to be canceled.* Unless requested by this Commission, an adoption notice may not be canceled.

(w) *Adoption supplements to be noncounting.* Adoption supplements may be filed without regard to and shall be considered exempt from the limitations imposed by the regulations in this part pertaining to the volume of supplemental matter and the number of supplements permitted to a tariff.

(x) *Carriers to which this section applies.* The regulations in this section shall apply only to carriers filing tariffs under the regulations in this part and only when the adoption is one authorized by the Interstate Commerce Commission.

§ 1310.26 Applications for special tariff authority (Rule 26).

(a) *Commission has authority to grant special tariff authority.* The Commission has the authority to permit, in its discretion and for good cause shown, the filing of tariff provisions on less than 30 days' notice, and also to permit other departure from the regulations in this part. The Commission will exercise this authority only in cases where actual emergency and real merit are shown. Desire to meet the tariff provisions of a competing carrier that has given 30 days' notice will not of itself be regarded as good cause for permitting notice of less than 30 days. Clerical or typographical errors in tariffs constitute good cause for the exercise of this authority, but every application based thereon must plainly specify the error together with a full statement of the attending circumstances and must be presented with reasonable promptness after issuance of the defective tariff, supplement, or loose-leaf page.

(b) *Special tariff authority will not be issued to modify formal orders.* When a formal order of the Commission requires publication on a stated number of days' notice, a request for special tariff authority to file on less notice is in effect a modification of the formal order. Any such request should be filed as a petition on the formal docket for modification of the order and not as an application for special tariff authority.

(c) *Filing of application by carrier—also joint agents' tariff.* A carrier may apply for authority to file tariff provisions on less than 30 days' notice or for waiver of the regulations in this part as to tariffs of its own issue, but not those of its tariff publishing agent. If an application requests authority to file provisions in a joint agents' tariff, it must state that it is filed for and on behalf of all carriers parties to the proposed change.

(d) *Where to send applications and number of copies required.* Two copies of each application tendered (including amendments thereto and exhibits made a part thereof) should be addressed

Interstate Commerce Commission
Bureau of Traffic
Washington, D.C. 20423

and every envelope marked prominently with the words "Special Tariff Authority Application." A check drawn to the order of the Interstate Commerce Commission in the amount of the required fee shall accompany each application.

(e) *Numbering and signing of applications.* Applications shall be consecutively numbered and shall be signed by a person authorized to sign a letter of transmittal for the carrier or agent. The signature need not be notarized, but the application must contain a certification as to the correctness of the statements therein and as to the authority of the person to sign it.

(f) *Form of application.* Applications shall be prepared on paper 8½ by 11 inches in size, and be in substantially the following form. Each application shall give all information required by this rule together with any other pertinent facts.

(Street address, or R.F.D. number)

(City, state, etc. and ZIP Code)

(Date)

Interstate Commerce Commission
Bureau of Traffic
Washington, D.C. 20423

Application No. ------- ---------,
(Name of carrier or agent).
by ----------, for and on behalf of all
(Name and title of person signing applications)
carriers parties to its tariff ICC (or MF-ICC) ----------,[1] does hereby petition the ICC or MF-ICC No.

Interstate Commerce Commission that it be permitted, under section 217 of the Interstate Commerce Act, and as amended, to put in force the following tariff provisions to become effective ____ days after the filing thereof with the Interstate Commerce Commission:

(Here show matter as directed by paragraph (g)(1) of this section.) Your petitioner further represents that the said [here state whether rates, charges, classification ratings, or other provisions] above mentioned will be published in [here show matter as directed by paragraph (g)(2) of this section].

1. [Here state matter as directed by paragraph (g)(3) of this section].
2. [Here state matter as directed by paragraph (g)(4) of this section].
3. [Here state fully matter as directed by paragraph (g)(5) of this section].

[1] If reference to tariff or tariffs does not exactly designate carrier involved, other methods of designating carriers should be employed.

4. [Here show justification as directed by paragraph (g)(6) of this section].

(Name of carrier or agent)
By ----------
(Signature of authorized person)

(Title)

I hereby certify that the information contained herein is to the best of my knowledge true and that I am authorized to sign and file this application.

By ----------
(Signature of authorized person)

(Date)

When the tariff involved is a local one or relief from any regulation in this part is requested, appropriate changes shall be made in the introductory paragraph of this form.

(g) *Information application shall show.* (1) The proposed tariff provisions shall be set forth clearly and completely. An accompanying exhibit may be used if identified by letter, such as "Exhibit A," and so referred to in the application. If the proposed provisions consist of rates, all points of origin and destination must be shown or definitely indicated. If the proposed provision is a rule, the exact wording must be given.

(2) The application shall show the ICC (or MF-ICC) numbers of the tariffs in which the proposed provisions will be published. If publication is to be made in supplements to tariffs already referred to, this fact shall be shown. It shall be clearly stated whether publication will be by republication of the affected matter or by statement. If waiver of any regulation in this part is required, the number of the affected section or part thereof must be identified and the reason for the waiver explained.

(3) When a request to file a new rate on less than 30 days' notice is involved, the method or formula that was used to construct the proposed rate shall be provided. When the matter to be shown is voluminous or for other reasons difficult of presentation, it may be included in an accompanying exhibit, properly identified and referred to in the application. Reference shall be made to the tariff and to the number of the supplement in which provisions to be superseded are published. If such provisions are published in items or numbered units, reference shall be made thereto by number. If they are not so published, the pages of the publication on which the provisions appear shall be shown. The extent to which and the manner in which cancellations will be made must be definitely indicated.

(4) The application shall state the names of carriers known to maintain competitive provisions between the same points or points related thereto, together with the ICC (or MF-ICC) numbers of the tariffs and the numbers of the supplements thereto containing such provisions.

(5) The application shall state whether such carriers have been advised

of the proposed provisions and whether they have been advised that it is proposed to file such provisions on less (or on not less) than 30 days' notice. If competitive carriers have expressed their views in regard to the proposed provisions, a brief statement of their views shall be given.

(6) The application shall state the special circumstances or unusual conditions which are relied upon as justifying the requested authority together with any related facts or circumstances which may aid the Commission in determining whether the requested authority is justified. If special tariff authority to give notice of less than 30 days is sought, the petitioner shall state why notice of not less than 30 days cannot be given.

(h) *The authority must be used in its entirety.* If the special tariff authority is used, it must be used in its entirety and in the manner set forth in the order of special tariff authority. If it is not desired to use all of the authority granted, and less or more extensive authority is desired, a new application complying with the provisions of this section in all respects and referring to the previous authority must be filed.

(i) *Confirmatory application.* When special tariff authority is requested by telegram because of an emergency which does not permit timely filing, the telegram must state all pertinent facts required in this section and include a statement that a written application and filing fee is being sent. An application (with the required fee) confirming the request must be transmitted on the same day. (The application and fee must be transmitted regardless of whether the request is granted or denied.)

(j) *Authority to reject publication.* The issuance and use of a special tariff authority does not restrict or remove the Commission's authority to reject a publication for reasons it deems sufficient in the circumstances.

§ 1310.27 Concurrences or powers of attorney—Transfer of agent (Rule 27).

(a) *Different situations.* The construction, filing, cancellation or revocation of powers of attorney or concurrences, and the construction and filing of publications when one agent takes over another involve many different kinds of situations each of which requires different procedures to be followed. Below are summarized many kinds of situations together with a reference in each instance to the paragraph in this section that contains the regulations governing that situation.

(1) To authorize an individual to act as agent—see paragraph (b) (1) and (2) of this section.

(2) To authorize a corporation to act as agent—see paragraph (b) (1) and (3) of this section.

(3) To limit the authority of a power of attorney—see paragraph (b) (4) and (5) of this section.

(4) To give concurrence in a particular tariff of a carrier—see paragraph (c) (1) and (2) of this section.

(5) To give general concurrence to a carrier—see paragraph (c) (1) and (3) of this section.

(6) When the principal agent dies or is disabled—see paragraphs (j), (k) (2), (3), and (l) of this section.

(7) When the alternate agent dies or is disabled—see paragraphs (k) (2), (3), and (l) of this section.

(8) When an agent takes over another agent or a corporation as agent changes its name—see paragraphs (k) (1), (3), and (l) of this section.

(9) To cancel a power of attorney or concurrence—see paragraph (o) of this section.

(10) To revoke a power of attorney or concurrence—see paragraph (p) of this section.

(b) *Forms of powers of attorney.* (1) The following forms shall be used by a carrier to give authority to an agent to publish and file tariffs, including supplements or loose-leaf pages thereto, in which such carrier participates. (Existing powers of attorney which are not otherwise objectionable need not be reissued solely to comply with the prescribed form). If common carriers by water governed by the regulations in this part desire to give powers of attorney to agents authorizing the publication of joint rates with motor carriers, the forms set forth in this paragraph may be altered by substituting for the words "common carrier of property by motor vehicle," the words, "common carrier of property by water," or appropriate words of similar import.

(2) The form to authorize an individual to act as agent shall read as follows:

POWER OF ATTORNEY

FAI No. -------
Cancels -------- No. --------

(Name of carrier)

(Street address or R.F.D. number)

(City, state, etc. and ZIP Code)

(Date)

Know all men by this instrument:
That, on the ____ day of ----------, 19____, ----------, a common carrier
(Name of carrier)
of property by motor vehicle does (do) hereby make and appoint ----------
(Name of principal agent)
attorney and agent to publish and file for such carrier freight tariffs, and supplements (or loose-leaf pages) thereto, as permitted or required of common carriers of property by motor vehicle under authority of the Interstate Commerce Act, and the regulations of the Interstate Commerce Commission issued pursuant thereto, and does (do) hereby ratify and confirm all that said attorney and agent may lawfully do by virtue of the authority herein granted and does (do) hereby assume full responsibility for the acts and failures to act of said attorney and agent.

And, further, that ----------
(Name of carrier)
does (do) hereby make and appoint ----------
(Name of alternate agent)
alternate attorney and agent to do and perform the same acts and exercise the same authority herein granted to ---------- in the event and only
(Name of principal agent)
in the event of the death or disability of ----------.
(Name of principal agent)

(Date)

V 38-149
AUG 3 73
XUM

(4) Powers of attorney, if executed without modification, confer unlimited authority to publish local rates for the carrier issuing the power of attorney and to publish joint rates for such carrier and such other carriers as shall have issued the necessary authority. If it is desired to limit the authority granted to the agent, the form may be modified by adding at the end of the first paragraph the statement:

This authority is restricted to the filing of the publications or types of publications set forth below

and by clearly and explicitly stating immediately thereafter the extent of the authority granted. Any limitation must be a general one and be specifically expressed in the instrument and must not depend on actions, circumstances, or managerial decisions not embodied therein or determinable therefrom and must not depend on future instructions or approvals. Limitations, if any, must be expressed in the instrument in such a manner that not only is it clear the authority the agent will have but also the authority it will not have if certain authority is withheld. For example, the instrument may limit the authority of an agent to publication of particular tariffs, to publication of rates from points on the carrier's lines only, to publication of rates to points on the carrier's lines only, to publication of either local or joint rates, or to publication of either class or commodity rates. The instrument may withhold authority to publish any increase in rates or charges, either local or joint, on a specified commodity or commodities, or it may withhold authority to publish general increases in rates provided the term "general increase" is defined therein. The instrument may not contain limitations that are not general ones—for example, publication of specifically named rates, origins, destinations, rules, etc.

(5) If it is desired to give to an agent authority for the publication of a classification, a classification exceptions tariff, or a rules tariff only, the form may be modified in either of two ways. Omit the words "freight tariffs" and substitute therefor the word or words, "classification," "classification exceptions tariffs" or "rules tariffs," or modify so as to authorize the publication of any or all of such tariffs, including rate tariffs. If it is desired to limit the authority granted to publication of a particular tariff or tariffs, this may be done by giving a sufficiently accurate description of the title page of each tariff to identify it and by showing the ICC (or MF-ICC) number, if known. If it is intended that the authority granted shall include reissues of specifically named tariffs, that fact should be made clear by adding in the appropriate location "and successive issues thereof."

(c) *Forms of concurrences.* (1) The following forms shall be used in giving to carriers subject to these regulations concurrences in tariffs (including supplements or loose-leaf pages thereto) which are issued and filed by such carriers or their agents and in which the carriers giving concurrences are participants. The carrier to whom concurrence is given may act as origin, intermediate, or destination carrier in joint rates and routes. A concurrence does not confer upon a carrier authority to publish local rates for another carrier. If two or more carriers execute powers of attorney authorizing an agent to publish joint rates for them, it will not be necessary for those carriers to exchange concurrences with each other as to the joint tariffs issued by that agent under that authority.

(2) Form FC1 shall be used in giving concurrence in a particular tariff that is issued and filed by another carrier. The original of form FC1 shall be forwarded to the carrier issuing the tariff and shall be transmitted by such carrier to the Commission with the tariff or the amendment adding the carrier. This form when not restricted will serve as continuing evidence of participation in the tariff described in the concurrence and in all supplements (or loose-leaf pages) thereto and successive issues thereof. If reference to successive issues be stricken out, a new concurrence will be required for each successive issue of the tariff. Except as provided in this subparagraph, this form shall not be qualified in any way but must evidence concurrence in all rates, rules, or other provisions contained in the tariff publication named therein. The form shall read as follows:

CONCURRENCE

FC1 No._____
Cancels_____No._____

_____
(Name of carrier)

_____
(Street address or R.F.D. number)

_____
(City, state, etc. and ZIP Code)

_____, 19____
(Date)

To the Interstate Commerce Commission,
Bureau of Traffic, Washington, D.C. 20423.

This is to certify that_____
(Name of carrier giving concurrence)

assents to and concurs in the publication and filing of the freight tariff described below, filed by_____
(Name of carrier to which concurrence is given)

together with supplements (or loose-leaf pages) thereto and successive issues thereof, and that such concurring carrier hereby makes itself a party thereto and bound thereby, insofar as such tariff applies from, to, via, or at points on its lines, until this authority either is revoked by formal and official notice of revocation filed with the Interstate Commerce Commission and sent to the carrier to which this concurrence is given or is canceled.

(Here give an exact description of the title page of the tariff, including the name of the issuing carrier, the ICC (or MF-ICC) number, dates on which issued and effective, and the name and title of officer shown as issuing the tariff.)

_____
(Name of carrier)

By_____
Signature of authorized person)

_____
(Title)

Attest (if a corporation):

_____, Secretary

[Corporate Seal]

(3) If general concurrence is given by a carrier in tariffs (including supplements or loose-leaf pages thereto) issued by another carrier or its agent, naming rates or other provisions from, to, via, or at points on its lines, form FC2 shall be used. Form FC2 may be executed as shown, when it will authorize publication of rates or other provisions for the concurring carrier from, to, via, or at points served by such carrier. If it is desired to limit the authority granted to exclude publication of rates in connection with which the concurring carrier would act as either origin, intermediate, or destination line, the form may be modified to that extent by use of appropriate language to effect the modification authorized. When authority is given an agent to publish rates for a carrier participating under authority of a concurrence to another carrier for which such agent acts, care must be exercised that the rates published for the concurring carrier do not exceed the scope of the authority given. The form shall read as follows:

CONCURRENCE

FC2 No._____
Cancels_____No._____

_____
(Name of carrier)

_____
(Street address or R.F.D. number)

_____
(City, state, etc. and ZIP Code)

_____
(City, state, etc. and ZIP Code)

_____
(Date)

(d) *Exact name of carrier must be shown—what individual may sign instrument.* (1) In the blank spaces on each form for the name of the carrier, there shall be shown, if the carrier be an individual, the individual name followed by the trade name, if any. If the carrier be a partnership, the correct names of all partners must be given, followed by the trade name, if any. If the carrier be a corporation, the correct corporate name must be used. In all cases, the name of the carrier shall be identical with the name as it appears in its operating certificate issued by the Commission, or, in the event that such certificate shall not have been issued, the name of the carrier shall be identical with the name as it appears in the records of the Commission.

(2) The power of attorney or concurrence shall be signed by the owner, if the carrier is an individual and shall be signed by all of the partners individually, if a partnership. If the carrier is a corporation, the power of attorney shall be signed by the president or vice-president, attested by the secretary of the corporation, and the corporate seal shall be affixed. If the state in which incorporated does not require the corporation to have a seal, the affixing of a seal may be omitted.

(e) *Official or employee may not act as agent.* Unless specifically authorized by the Commission, an official or an employee of a corporation may not act as agent when such corporation acts as agent.

(f) *Corporation as agent.* A corporation, duly authorized and acting as an attorney and agent, shall issue tariffs in the name of the corporation as agent. At the bottom of the title page of each publication filed by the corporation as agent shall be shown the name and title of the official of the corporation who has been appointed by such corporation to issue tariffs and file them with the Commission. Before the first tariff publication may be filed showing such person as the issuing officer, such corporation shall forward to the Commission a certified minute of the meeting of the board of directors thereof showing the name and title of the official who has been appointed to handle all tariff matters with the Commission.

(g) *Specifications for forms.* Powers of attorney and concurrences shall be printed on paper of durable quality, approximately 8 by 10½ (but not in excess of 8½ by 11) inches in size. Each shall be given a form and serial number which shall run consecutively for each form of instrument. The form and serial numbers shall be shown on the upper right-hand corner and immediately thereunder shall be shown the form and number of the instrument, if any, which is canceled thereby. The term "freight tariff" as used in this section means not only rate tariffs but all other freight publications which in any way affect the value of the service or the measure of the charge. Each instrument shall show under the serial number of the date of issue. All instruments, except form FC1, shall show in the lower left-hand corner the name and address of the agent or carrier to which the duplicate is sent.

(h) *Number of copies.* All instruments must be prepared in triplicate. Except when there is specific instruction in individual paragraphs to send originals to an agent or carrier, the original of the instrument shall be filed with the Commission, the duplicate sent to the agent or carrier to which such authorization is directed, and the third copy retained by the issuing carrier.

(i) *Conflicting authority must be avoided.* Powers of attorney or concurrences may not contain authority to delegate to another the authority thereby conferred. Duplicating authority to two or more agents or carriers must be avoided if the use thereof would result in conflicting rates or other provisions.

(j) *Alternate agent.* When a power of attorney is issued to an individual to act as agent, such instrument shall name an alternate agent to act in the event of the death or disability of the principal agent. On or before the date of filing of the first tariff, supplement, or loose-leaf page by the alternate agent under the authority granted in the instrument, such alternate agent shall submit to the Commission a sworn statement setting forth the facts which justify such exercise of authority. (See paragraph (l) of this section for regulations governing take-over publications.) The term "disability" as used in the instrument means resignation, permanent transfer to other duties, or other permanent absence of the principal agent, and does not mean temporary absence of the principal caused by vacation, illness, or other similar causes. After an alternate agent has once exercised the authority granted by the instrument, the principal agent may not thereafter act under that instrument.

(k) *Transfer of authority from one agent to another agent—death or disability of agent.* (1) When an agent takes over another agent (including a change of name of a corporation acting as an agent), superseding the former agent as to all such agent's effective tariffs, the transfer shall be accomplished by each carrier executing a new power of attorney naming the new agent (and alternate when the new agent is an individual) thereafter to serve, and specifically canceling the previous power of attorney. (See paragraph (l) of this section for regulations governing take-over publications.)

(2) When a power of attorney has been issued to an individual and an alternate, and the death or disability of either the principal or alternate agent occurs, new powers of attorney canceling the previously effective powers of attorney and naming the agent (and alternate when the new agent is an individual) thereafter to serve shall be filed within 180 days from the date of death or disability. (See paragraph (l) of this section for regulations governing take-over publications.)

(3) The new powers of attorney filed pursuant to this paragraph shall bear no effective date. The originals thereof shall not be sent direct to the Commission, but shall be forwarded to the principal agent named therein. After all the necessary instruments shall have been secured, the principal agent shall file the originals with the Commission all at one time. Such powers of attorney will become effective upon the date they are received by the Commission, regardless of any other date which may have inadvertently been shown thereon.

(4) If, during the period the alternate agent is functioning in place of the former principal agent, new participating carriers are to be added to the tariffs the powers of attorney from such carriers must name the present alternate agent as principal agent together with a new alternate agent. When the permanent take over is made by a new agent (which may be the former alternate agent), such powers of attorney must be replaced by new ones meeting the requirements of this paragraph.

(5) If upon the death or disability of the principal agent it is found that the alternate agent named in the powers of attorney cannot or will not take over the tariffs, the carriers have a positive duty to seek a solution. If no take over by a new agent acting for the participants is arranged for within 90 days of the Commission being advised of the situation existing, the Commission will consider striking the tariffs from the files of the Commission. If the tariffs are stricken, the carriers will be free to publish their rates elsewhere.

(l) *Take-over publications.* (1) When a new agent is appointed for a reason set forth in paragraph (k) of this section, or when an alternate agent assumes the duties of the principal agent, the new agent, immediately upon receipt of necessary authority, or the alternate agent, upon death or disability of the principal, shall issue a supplement to each of the effective tariffs (bound or loose-leaf) issued by or which had been taken over by the agent superseded. The supplement shall bear on its title page no effective date, but shall contain a statement reading substantially as follows:

On and after [show here, in the case of a new agent, the date on which authorities are filed with this Commission; or in the case of an alternate agent, the date on which the principal ceased to act] this publication shall be considered as the issue of [show here name of new agent or the alternate acting as such].

In the case of a new agent and a bound tariff, such supplement shall also contain a list of participating carriers, giving reference to the new authorities. In the case of a new agent and a loose-leaf tariff, the supplement shall not name the participating carriers, but instead one or more loose-leaf pages, canceling the previous page or pages, shall be issued containing the new list of participating carriers. Such a page shall identify the new authorities and refer to the take-over supplement, shall show the date of the take-over as the effective date, and may be filed without notice.

(2) However, if the agent whose tariffs are being taken over maintains a par-

V 38-149
AUG 3 73
XUM

ticipating carrier tariff, the take-over publications to the agent's other tariffs shall not list participants if the tariff that is being amended does not specifically list them. The take-over publication to the participating carrier tariff shall, however, provide a complete list of all participants therein and in tariffs governed thereby on the date of take-over.

(3) An agent has no authority to act for a carrier that has not issued a power of attorney in its favor. Therefore, only the names of participating carriers that have issued powers of attorney to the new agent may be shown in the take-over publication. Any updating, corrections, or deletions of the names of participating carriers must be made by the former agent (or alternate agent if authorized to act) and must become effective on lawful notice before the date of take-over.

(4) The take-over supplement must remain in effect for the life of the tariff, but the participating carrier list therein, if any, may be amended.

(5) An agent may not take over less than all of another agent's tariffs.

(6) When an agent that is superseded by a new agent or an alternate participates with another agent or agents in the issuance of a joint agency tariff, the issuing agent must arrange the issuance of a supplement announcing the change and amending the list of participating carriers to the extent necessary to correctly complement the change being effected in the tariffs issued by the superseded agent; and in the same manner.

(m) *Supplement (or loose-leaf pages) to be shown in series of former agent.* Supplements or loose-leaf pages, including ones publishing the take-over, filed by the new agent to tariffs issued by the former agent (or a predecessor thereof, if any (must show in connection with the ICC (or MF–ICC) numbers that they are in the series of the former agent (or predecessor).

(n) *New agent must start new series.* New tariffs issued by the new agent (not alternate agent) shall be in such agent's own ICC number series, and when canceling tariffs issued by the former agent shall indicate the series of the tariffs canceled. An alternate agent, after take over, shall continue to use the number series of the superseded agent and identify, in connection with the number, the series by name of such agent.

(o) *Cancellation of instruments.* A power of attorney may cancel another power of attorney (of the same or another form) if both the old and new are issued in favor of the same agent or if it is filed under circumstances set forth in paragraph (k) of this section. A concurrence may cancel another concurrence if both the old and new are issued in favor of the same carrier. In every case both the old and new instruments must be issued by the same carrier, except that the old may be one acquired from a bona-fide predecessor carrier. Under all other circumstances, powers of attorney and concurrences must be revoked as set forth in paragraph (p) of this section. If the instrument to be canceled contains more authority or is broader in scope than the new instrument, the new instrument must bear an effective date of at least 60 days after the date on which it is received by the Commission. Otherwise, no notice is required.

(p) *Revocation of instruments.* (1) A power of attorney or concurrence may be revoked upon not less than 60 days' notice to the Commission by filing a notice of revocation with the Commission, serving at the same time a copy thereof on the agent or carrier in whose favor such instrument was executed. Such notice shall not bear a separate serial number, but shall specify the form and number of the instrument to be revoked, name the agent (and alternate agent when form FA1 is being revoked) or carrier in whose favor the instrument was executed, and specify the date upon which revocation is to become effective. The effective date must not be less than 60 days subsequent to the date the notice is received by the Commission. The notice shall be executed on paper of good quality, approximately 8 by 10½ (but not in excess of 8½ by 11) inches in size.

(2) The revocation notice for a power of attorney shall read as follows:

REVOCATION NOTICE

(Name of carrier)

(Street address or R.F.D. number)

(City, state, etc. and ZIP Code)

---, 19--
(Date)

Know All Men By This Instrument:

Duplicate mailed to ---
(Name of carrier to which issued)

(Street address or R.F.D. number)

(City, state, etc. and ZIP Code)

(Date)

(4) When a power of attorney or concurrence is revoked, corresponding revision of the tariff or tariffs should be made effective upon statutory notice not later than the effective date stated in the notice of revocation. In the event of failure to so revise the applicable tariff or tariffs, the rates in such tariff or tariffs remain applicable until lawfully canceled.

(5) The provisions of paragraph (d) of this section will also apply to revocation notices.

(6) If the tariff or tariffs of a carrier are adopted, the new carrier has the duty to promptly either obtain new concurrences from the participants therein or to cancel the participation of such carriers before any changes are made effective in provisions affecting such carriers.

(7) A carrier holding a concurrence from another, or an agent holding a power of attorney from a carrier, that no longer wishes to retain or exercise such authority should notify the Commission in writing of this and state that the authority shall have no further force and effect. The files of the Commission shall be marked accordingly and the instrument considered as no longer effective. The notification shall be over the signature of the person authorized to issue the tariffs.

(8) A power of attorney or concurrence may not be revoked in part, nor may it be amended except by reissue.

§ 1310.28 Provisions which may be filed on less than 30 days' notice (Rule 28).

NOTE: See §§ 1310.14, 1310.22, 1310.24, 1310.25 and 1310.27 (rules 14, 22, 24, 25, and 27) for other provisions which may be filed on less than 30 days' notice.)

(a) *Certain provisions in connection with new temporary or new permanent operating authority.* (1) When operating authority is to be issued, the tariffs of the carrier or its agent may be amended on not less than five days' notice to add the description of such operating authority (see §§ 1310.6(g) and 1310.19 (rules 6 and 19)), to add the name of the carrier to the list of participants, to provide routing provisions in connection with such authority, and to amend the list of points served. If the authority to be issued is temporary only pursuant to section 210a(a) of the Act, the tariff provisions must be made subject to an expiration date which is not later than the date such authority is indicated to expire. If the authority is to be permanent, the effective date of the tariff provisions may not be earlier than the earliest date the certificate would be issued (the Commission will supply this information if necessary upon request).

(2) A carrier may not in its own tariff, provide rates and service for its own account beyond the authority it has been granted. Commodity rates and commodity rate tables in a tariff should properly be specific as to points, territory and commodities from, to and on which they apply. Hence addition in a carrier's own issue of a description of new operating authority should not, in itself, without any other amendment, serve to automatically extend the application of existing commodity rates to new points or territory, and the less-than-statutory authority provided in subparagraph (1) of this paragraph is not usable to so extend. This does not apply to class rates in effect, or to tariffs of agents already providing effective rates and other provisions which would cover the points, territory and commodity.

(b) *New route for existing operating authority.* A new joint route may be added upon not less than five days' notice to a rate tariff, or to its governing routing guide, if the carriers parties to the new route are participants in the rate tariff and have for not less than 30 days prior to filing of the new route held out in tariffs to serve their respective segments of the new proposed joint route. This authority may not be used to cancel any existing route, nor add a carrier or route to a particular rate, rule, item, or other provision which is limited to apply for a specifically named carrier or carriers.

(c) *Restore carrier participation.* Carriers and agents may file supplements or loose-leaf pages to their tariffs on not less than five days' notice to restore the listing of carriers as participants following published cancellation, so as to continue participation without interruption. The relisting must be indicated to become effective not later than the date upon which the cancellation is indicated to become effective. This authority may be used only when the cancellation notice was filed on not less than 30 days' notice.

(d) *Amend participating carrier list in dangerous articles tariff.* The list of participating carriers may be amended on not less than one day's notice to provide additions thereto and corrections and other changes therein in a tariff containing only rules and regulations governing the acceptance and transportation of dangerous articles (hazardous materials).

(e) *Amend participating carrier list in classification.* The list of participating carriers in classifications may be amended on not less than one day's notice to provide additions thereto and corrections and other changes therein.

(f) *Extend expiration dates or postpone effective date of comeback provisions.* Publications may be filed on less than 30 days' notice to extend the expiration date of existing provisions, or to postpone the effective date of comeback provisions (provisions paired with and published to supersede those indicated to expire with the preceding day) when the expiration date of the existing provisions is extended. As much notice as possible must be given, but in no case less than five days. No change may be made in the extended or postponed provisions. An expiration date may not be extended when such date is required by the terms of an order of the Commission or when only a portion of the provisions subject thereto is to be continued.

(g) *Change or cancel expiration dates in connection with temporary authorities.* (1) When the expiration date of a temporary operating authority is extended for a definite or an indefinite period of time for all or a portion of the authority, the carrier or its agent may file on not less than one day's notice

(i) Supplements or loose-leaf pages canceling or changing the expiration date attached to the rates and other provisions covering the operating authority to correspond with the action taken on the operating authority, provided the publication hereunder is made effective prior to the expiration of such rates and provisions; or

(ii) Tariff publications to republish without change the rates and other provisions which have expired and which cover the operating authority being continued.

(2) A supplement may be filed to a loose-leaf tariff to cancel or change the expiration date where because of the volume of publication necessary and insufficient time following notification publication cannot be made on loose-leaf pages in conformity with the regulations in this part.

(3) A supplement issued to a bound tariff for this purpose and containing no other matter shall be considered exempt from the provisions of this part limiting the number and the volume of supplements. A loose-leaf tariff which if further amended would result in violation of § 1310.10(d)(9) (rule 10) as to permissible number of canceled pages may be nevertheless amended but only to the extent necessary to effect the publication otherwise authorized under this paragraph.

(4) A supplement to a tariff (bound or loose-leaf) may direct the cancellation or amendment of an expiration date without republication of the tariff provisions. In the case of a numbered provision, the amendment shall be shown in an "Amendment to" the item or other numbered provision. If it is an item containing expiration dates only, however, it must be republished.

(h) *Postponement of tariffs or tariff matter.* (1) A carrier or its agent may postpone the effective date of a tariff, or matter in a tariff (other than "comeback provisions"—see paragraph (f) of this section), of its own issue, effective on not less than eight days' notice, subject to the provisions of paragraphs (h) (2) through (14) of this section.

(2) The effective date of the postponing provision may not be later than that of the provisions the effectiveness of which is sought to be postponed.

(3) Postponement may be effected

(i) By republication of the provisions,

(ii) By "amendment to" a numbered provision, or

(iii) By a "postponement notice" if an unnumbered provision, an entire tariff, a supplement, or two or more loose-leaf pages.

(4) When by amendment, the provision it amends shall be identified by number, including letter suffix, if any, together with its present location, and the effective dates specified; for example:

Amendment the effective date is hereby postponed from to ---------- to ----------. Item 100 (Sup. 50)

(5) When by postponement notice, and a rate or other provision only (not an entire tariff, supplement, or a group of more loose-leaf pages) is affected, the notice shall identify the provision, its present location, and specify the effective dates; for example:

The effective date of ----, on page ---- of ----, is hereby postponed from ---------- to ----------.

(6) When by postponement notice, and an entire staff, supplement, or a group of two or more loose-leaf pages is affected, the notice shall be worded as follows:

Refer to the title page of tariff (or title page of supplement ---- to tariff) and change the effective date, which now reads ---------- to read ----------.

or, in the case of loose-leaf pages:

Refer to ---- Revised Page ---- and ---- Revised Page ---- and change the effective dates thereon which now read ---------- to read ----------.

(7) When the postponement of the effective date hereunder does not suffice to automatically continue the presently effective provision for the interim period, care must be taken to also postpone the cancellation and the postponement authority in this paragraph may be used to effect this result.

(8) Where the matter to be postponed is published on a single page of a loose-leaf tariff, postponement may only be effected by republication of the page. Republication of the matter to be held in effect and of the matter being postponed may be published together, with appropriate effective and expiration dates to effect continuity.

(9) Each amendment to a numbered provision for purposes of postponing shall be published in its proper place by numerical sequence when published with other tariff provisions in the same supplement, and when the numbered provision is next republished the amend-

V 38-149
AUG 3 73
XUM

ment shall be specifically canceled. In the interim, if and when the supplement (to a bound tariff) in which an amendment appears is canceled, such amendment must be carried forward as reissued matter in the regular manner.

(10) Each postponement-notice provision shall be published in the fore part of the publishing supplement and, unless specifically canceled in a later supplement in the case of a bound tariff, it must be carried forward as reissued matter in the regular manner. In bound tariffs, cancellation of the latest postponing notice provision affecting an unnumbered tariff provision may only be accomplished by the republication of the postponed provisions or as amended, and postponing provisions affecting an entire tariff or entire supplement must be carried forward as reissued provisions for the life of the tariff. In loose-leaf tariffs, the postponing supplement may be canceled by the check sheet or by a reissue of one of the affected pages.

(11) Only one postponement and one further postponement are authorized by this paragraph, and the total period of postponement may not extend beyond 90 days from the original effective date unless the proposed new or changed provision is to be canceled. In this event a further postponement for another 30 days may be published upon not less than eight days' notice provided such cancellation is published at the same time upon full statutory or other lawful notice. When effecting such cancellation in a bound tariff, the supplement which effects the postponement may also include the cancellation of the matter but in full accord with the regulations in this part. When loose-leaf pages, the postponing supplement may include the cancellation only if the circumstances are such that cancellation by supplement is authorized in the regulations in this part. Where an amendment or notice is used for further postponement, the wording of the amendment or notice must detail the fact of the prior postponement, including the original published effective date, and the last date to which it had been postponed. The new amendment or notice shall specifically cancel the prior amendment or notice, and where the prior amendment or notice is published in a special supplement containing no other matter the new supplement must cancel it.

(12) If any matter being postponed hereunder is the subject of a petition for suspension by another party, the publishing carrier or agent, as the case may be, must at once notify each petitioner by first class mail or by telegram of the fact of postponement and must by telegram advise this Commission's Suspension and Fourth Section Board of the postponement and therein confirm that the petitioner or petitioners have been so notified.

(13) Supplements issued to bound tariffs under the regulations in this paragraph and which contain no other matter shall be exempt from the limitations of this part pertaining to the number of effective supplements and the volume of supplemental matter permitted to a tariff.

(14) The authority of this paragraph may not be used to postpone the effective date of rates or other provisions comprising part or the whole of a general adjustment of rates and charges by the carrier or its agent published by means of a conversion table.

(i) *Tariffs covering emergency transportation operating authority.* (1) Subject to the provisions of this paragraph, a carrier (not an agent) may establish rates and other tariff provisions covering emergency movements authorized by this Commission under section 210a(a) of the Interstate Commerce Act, without further notice prior to acceptance of property for transportation other than (i) posting, where required, of an individual tariff (not a loose-leaf page) containing such rates and other provisions (such a tariff may refer to one or more agents' tariffs for governing provisions), or containing provisions other than rates and referring to one or more agents' tariffs for such rates and other provisions, and (ii) having three copies of the tariff with a letter of transmittal, filed with the Commission's Bureau of Operations' field office which has jurisdiction over the point at which the carrier is domiciled or such other field office as the Commission may designate in special circumstances.

(2) A supplement may be issued to a tariff filed under this paragraph only for the purpose of extending the expiration date of the tariff to the date with which the emergency temporary authority, or an extension thereof, expires. Such a supplement shall be subject to the posting and filing requirements provided for tariffs in subparagraph (1) of this paragraph.

(3) The publications must be issued in the name of the carrier and may contain only matter pertaining to the emergency temporary authority. The ICC number assigned to the publication shall show a "W" prefix in the following manner:

ICC W (here show number)

The first "W" series tariff issued shall be assigned the number one. Subsequent tariffs shall be numbered consecutively.

(4) Each tariff must show on the title page a specific expiration date which is not later than 45 days after the effective date of the tariff.

(5) Each tariff referred to by a "W" series tariff must be identified by its ICC (or MF-ICC) number. The carrier must certify in writing to the appropriate field office of this Commission that it is a participant in each such tariff.

(6) Should the provisions of a "W" series tariff not conform to the emergency temporary authority actually granted, another "W" series tariff may be filed hereunder to cancel the first "W" series tariff and bring the provisions into conformity with the grant.

(7) Except as otherwise provided in paragraph (i) (6) of this section, the provisions of this paragraph do not authorize the cancellation of any rate or other provision, and do not authorize the establishment of any rate or other provision that will conflict with or duplicate any other rate or other provision for account of the carrier.

§ 1310.29 Commodity rates determined by the use of rate base numbers (Rule 29).

(a) *May be filed.* Commodity rates may be published which depend for their application upon the use of rate base numbers published for determination of class rates in the same or other tariffs. A tariff naming such rates need not comply with § 1310.7(i) (rule 7). Column Commodity Rates shall be the term used in captions for and references to such rates.

(b) *Reference to other tariffs for rate base numbers.* (1) A publication published in the name of a carrier and containing such rates (either local or joint) may only refer to rate base numbers in tariffs of that carrier's own issue or, in the alternative, may refer to tariffs of one or more agents. If any agent's tariff is referred to, all carriers parties to such rates must be parties to the tariff referred to and the issuing carrier must at least be a party thereto for local application of the class rates therein.

(2) A publication published in the name of an agent and containing such rates may only refer to one or more tariffs of that agent's own issue, and carriers parties to the column commodity rates must be parties as well to each other tariff referred to.

(3) Reference to a tariff for such purposes permits use of any and all rate base numbers published therein necessary for application of the column commodity rates referring thereto, regardless of effect, if any, of scope of operating authority provisions of the carriers which otherwise would limit the application of the referred to tariff for such carriers.

(c) *Other requirements.* (1) The commodity or commodities must be clearly identified, and unexplained generic terms may not be used. The application of the rates, including the territorial application thereof, must be clear and explicit.

(2) Column commodity rates, of whatever kind, may not alternate with, supersede, or be superseded by any other kind of column commodity rates.

(3) Column commodity rates shall not be published or maintained which conflict with or duplicate the application of other commodity rates. To avoid this, tariffs naming column commodity rates may publish on the title page (if all rates are of this category) or in direct connection with the rates the following notation:

Column commodity rates shown herein may be used only when no commodity rates (other than column commodity rates) have been established to apply from and to the same points over the same route, except that column commodity rates will supersede and take precedence over distance or mileage commodity rates.

§ 1310.30 Substituted service (rail for motor) (Rule 30).

(a) *Tariffs may provide for substituted service.* Provisions for the substitution of rail carrier service for available motor carrier service may be published either

in the tariffs naming line-haul rates on shipments upon which the substituted service will be performed or in a governing substituted freight service directory to which specific reference must be made by ICC (or MF-ICC) number.

(b) *Required provisions.* The provisions shall provide as a minimum the following:

(1) The points between which the substitution will be performed;

(2) The name of the rail carrier which will perform the substitution; and

(3) That the shipper will have the option of directing that substituted service shall not be provided on any shipment.

(c) *Participation of rail carrier.* The rail carrier must be a party to the rate tariff in all cases and to the substituted freight service directory when one is used. The rail carrier's name and the form and number of the concurrence must in all cases be listed in the appropriate place. The rail carrier need not be listed as a participant in other governing tariffs. This paragraph does not apply where the motor carrier employs a rail service covered by rail ramp-to-ramp trailer or container on flat car service tariffs open for use by motor carriers, but for which substitution the rail carrier has not issued a concurrence or power of attorney.

(d) *Substituted freight service directory.* Only provisions for substituted service (not rates or charges) may be published in a substituted freight service directory, which must be indicated as applicable only where reference is made thereto in rate tariffs.

(e) *Different rates prohibited.* In no case may a rate be published to apply where substitution is performed and a different rate published to apply on the same shipment where substitution is not performed.

(f) *Routing provisions not required.* Routing provisions may not be published to apply over the lines of the motor carrier and the rail carrier in connection with the performance of substituted service.

§ 1310.31 Transmission of publications to subscribers (Rule 31).

(a) (1) Except as otherwise authorized in paragraphs (a) (2) and (4) of this section, copies of each new tariff, supplement, and loose-leaf page must be transmitted to subscribers thereto not later than the time the copies for official filing are transmitted to the Commission. The letter of transmittal accompanying the copies to the Commission must contain the following certification:

I hereby certify that I have on or before this day sent copies of the publication(s) listed hereon to all subscribers thereto by (here state the exact method or combination of methods of transmission used, such as messenger service, express service, U.S. Postal Service, etc. If the U.S. Postal Service, the exact class or combination of classes of mail used must be stated).

(Signature of person transmitting publication(s))

(Date)

(2) If a new tariff or supplement is filed which in its entirety is published under an authority from the Commission to publish and file on notice of less than 10 days, and if a new loose-leaf page is filed which contains a provision published under an authority from this Commission to publish and file on notice of less than 10 days, subparagraph (1) of this paragraph need not be complied with as to such publication if it cannot be or compliance would cause excessive delay, but such copies must be transmitted to subscribers thereto within 4 calendar days after the day the copies for official filing are transmitted to the Commission, and the letter of transmittal must contain the following certification:

I hereby certify that I will within 4 calendar days after today send copies of the publication(s) listed hereon to all subscribers thereto by (here show exact method or combination of methods of transmission to be used, such as messenger service, express service, U.S. Postal Service, etc. If the U.S. Postal Service, the exact class or combination of classes of mail to be used must be stated.

(Signature of person transmitting publication(s))

(Date)

Included in this exception are supplements issued for the purpose of announcing suspensions made by the Commission, publications announcing adoptions, and publications containing only rates or provisions covering emergency transportation authorized by this Commission pursuant to section 210a(a) of the Interstate Commerce Act.

(3) When copies of different publications are transmitted to the Commission at the same time, some of which have been transmitted to subscribers in compliance with paragraph (a) (1) of this section and some of which will be transmitted to subscribers in compliance with paragraph (a) (2) of this section, two letters of transmittal must accompany the copies to the Commission one complying with paragraph (a) (1) of this section and the other complying with paragraph (a) (2) of this section.

(4) If there are no subscribers to any publication listed on a letter of transmittal accompanying the copies for official filing to the Commission, the letter of transmittal must contain the following certification:

I hereby certify that there are no subscribers to the publication(s) listed hereon.

(Signature of person transmitting publication(s))

(Date)

If copies of different publications are transmitted to the Commission at the same time, some of which are subscribed to and some of which are not, only the provisions of paragraphs (a) (1) or (2) of this section; or both, as the case may be, need be complied with.

(5) Expedited service when transmitting copies of publications must be provided to any subscriber requesting it. The cost of this service may be passed on to the subscriber.

(6) Carriers and agents shall furnish a copy of any of their tariffs to any person upon reasonable request therefor, free or at a reasonable price, not to be greater than that charged subscribers.

(7) As used herein, the term "subscriber" means a party who voluntarily or upon reasonable request is furnished copies of a particular tariff or tariffs and amendments thereto (including reissues thereof) by the publishing carrier or agent. The term does not, however, pertain to requests for a copy or copies of a tariff without a request for future amendments thereto. A reasonable charge may be made for the subscription.

DEPARTMENT OF THE TREASURY

U.S. Customs Service

[19 CFR Parts 4 and 6]

CONTAINERIZED OR PALLETIZED CARGO

Proposed Customs Regulations of Load and Count on Manifests

Notice is hereby given that under the authority of Revised Statute 251, as amended (19 U.S.C. 66), section 431, 46 Stat. 710, as amended (19 U.S.C. 1431), and section 624, 46 Stat. 759 (19 U.S.C. 1624), it is proposed to amend §§ 4.7a, 4.63, and 6.6 of the Customs Regulations to permit use of qualifying words relating to load or count information on manifests for containerized or palletized cargo. The nature of the subject cargo is such that, for the most part, only the shipper has knowledge of the inner packages of the shipment within the container. However, the master of a vessel must prepare a manifest describing his vessel's cargo. Since he may lack sufficient information to do so, it has been decided to amend the Customs Regulations to allow individuals preparing manifests for cargo carried aboard vessels or aircraft to use certain qualifying words on manifests to indicate that they are not preparing the manifests on the basis of personal knowledge as to the cargo, but rather on the basis of information received from the shipper.

Accordingly, it is proposed to amend § 4.7a of the Customs Regulations by adding a new paragraph (c) to read as follows:

§ 4.7a Inward foreign manifest; information required; alternative forms.

• • • • • •

(c) United States Customs Inward Foreign Manifest. For shipments of con-

V 38-149
AUG 3 73
XUM

tainerized or palletized cargo, Customs officers shall accept United States Customs Inward Foreign Manifest, Customs Form 7527–A, or Inward Foreign Manifest, Customs Form 7527–B, which indicate that the manifest has been prepared on the basis of information furnished by the shipper, although the use of words of qualification in no way limits the liability of a master to submit accurate manifests or in any way qualifies the oath taken by the master as to the accuracy of his manifest.

(1) If the inward manifest covers only containerized or palletized cargo, the following statement may be placed on the manifest:

The information appearing on the manifest relating to the quantity and description of the cargo is in each instance based on the shipper's load and count. I have no knowledge or information which would lead me to believe or to suspect that the information furnished by the shipper is incomplete, inaccurate, or false in any way.

(2) If the manifest covers conventional cargo and containerized or palletized cargo, or both, the use of the abbreviation "SLC" for "shipper's load and count," or an appropriate abbreviation if similar words are used, is approved provided the abbreviation is placed next to each containerized or palletized shipment on the manifest and the following statement is placed on the manifest:

The information appearing on this manifest relating to the quantity and description of cargo preceded by the abbreviation "SLC" is in each instance based on the shipper's load and count. I have no information which would lead me to believe or to suspect that the information furnished by the shipper is incomplete, inaccurate, or false in any way.

The statements specified in paragraph (c)(1) and (2) of this section shall be placed on the last page of the inward manifest. Words similar to "the shipper's load and count" may be substituted for those words in the statements, although vague expressions such as "said to contain" or "accepted as containing" are not acceptable. The use of an asterisk or other character instead of appropriate abbreviations, such as "SLC," is not acceptable.

It is also proposed to amend section 4.63 by adding a new paragraph (f) to read as follows:

§ 4.63 **Outward cargo declaration; shippers' export declarations.**

* * * * *

"(f) Customs officers shall accept an outward manifest covering containerized or palletized cargo which indicates by the use of appropriate words of qualification (see § 4.7a(c) of this part) that the manifest has been prepared on the basis of information furnished by the shipper.

It is also proposed to amend § 6.6 by adding a new paragraph (c) to read as follows:

§ 6.6 **Documents; form.**

* * * * *

(c) Customs officers shall accept an inward or outward air cargo manifest covering containerized or palletized cargo which indicates by the use of appropriate words of qualificaion (see § 4.7a(c) of this part) that the manifest has been prepared on the basis of information furnished by the shipper. However, the use of qualifying words in no way limits the liability to submit accurate manifests or in any way qualifies the declaration as to the accuracy of the manifest.

Data, views, or arguments with respect to the foregoing proposal may be addressed to the Commissioner of Customs, Attention: Regulations Division, Washington, D.C. 20229. To insure consideration of such communications, they must be received in the Bureau on or before September 4, 1973.

Written material or suggestions submitted will be available for public inspection in accordance with § 103.3(b) of the Customs Regulations (19 CFR 103.3(b)), at the Regulations Division, Bureau of Customs, Washington, D.C., during regular business hours.

[SEAL] VERNON D. ACREE,
Commission of Customs.

Approved: July 26, 1973.

EDWARD L. MORGAN,
Assistant Secretary of the Treasury.

[FR Doc.73–16067 Filed 8–2–73;8:45 am]

[19 CFR Part 24]

CUSTOMS FINANCIAL AND ACCOUNTING PROCEDURE

Proposed Customs Regulations on Official Receipt of Payment of Duties at Time of Entry and Payment of a Customs Bill

Notice is hereby given that under the authority of Revised Statute 251, as amended (19 U.S.C. 66), and section 624 of the Tariff Act of 1930 (19 U.S.C. 1624), it is proposed to amend §§ 24.3(b) and (c) of the Customs Regulations (19 CFR 24.3(b), (c)), to provide that a special receipt will not normally be given by Customs for the payment of Customs duties made at the time of entry on a dutiable consumption entry or appraisement entry, or for the payment of a Customs bill. This is in conformity with standard commercial accounting practice. Furthermore, since most of the payments to Customs are made by check, a copy of the payer's entry or his Customs bill, together with his cancelled check, will serve as the official receipt of payment.

Since payment of Customs duties at time of entry, § 24.3(c), generally occurs before payment of a Customs bill, § 24.3 (b), the contents in the two paragraphs are reversed to present a more logical order.

Accordingly, it is proposed to amend paragraphs (b) and (c) of § 24.3 to read as follows:

§ 24.3 **Bills and accounts; receipts.**

* * * * *

(b) A receipt for the payment of Customs duties made at the time of entry on a dutiable consumption entry or an appraisement entry will not normally be provided a payer. If payment is made by check, a copy of the entry and the payer's cancelled check shall constitute evidence of such payment to Customs. Should the payer desire evidence of receipt, he shall submit with his entry either an additional copy of Customs Form 5101 or an additional copy of the entry. The additional copy shall then be marked paid by the appropriate Customs official and returned to the payer.

(c) A copy of a Customs bill validated as paid will not normally be provided a payer. If a bill is paid by check, the copy of the Customs bill identified as "Payer's Copy" and the payer's cancelled check shall constitute evidence of such payment to Customs. Should a payer desire evidence of receipt, both the "Bureau of Customs Copy" and "Payer's Copy" of the bill, and, in the case of payments by mail, a stamped, self-addressed envelope shall be submitted. The "Payer's Copy" of the bill shall then be marked paid by the appropriate Customs official and returned to the payer.

* * * * *

Consideration will be given to relevant data, views, or arguments pertaining to the proposed amendment which are submitted to the Commissioner of Customs, Attention: Regulations Division, Washington, D.C. 20229, and received on or before September 4, 1973.

Written material or suggestions submitted will be available for public inspection in accordance with § 103.3(b) of the Customs Regulations (19 CFR 103.3(b)), at the Regulations Division, Bureau of Customs, Washington, D.C., during regular business hours.

[SEAL] VERNON D. ACREE,
Commissioner of Customs.

Approved: July 25, 1973.

EDWARD L. MORGAN,
Assistant Secretary of the Treasury.

Correction

FR Doc. 73–15445 appearing at page 20071 in the issue of Friday, July 27, 1973, was inadvertently published in the Rules and Regulations Section of this issue. The document should have been published in the Proposed Rules Section with the headings reading as set forth above.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

[7 CFR Part 56]

SHELL EGGS

Proposed Grading Standards

Notice is hereby given that the U.S. Department of Agriculture is considering amendments to the Regulations Governing the Grading of Shell Eggs and U.S. Standards, Grades, and Weight Classes For Shell Eggs (7 CFR Part 56), under authority of the Agricultural Marketing Act of 1946, as amended (7 U.S.C. 1621–1627).

Statement of Considerations. The shell egg standards for individual quality of eggs presently consider both the depth of the air cell and its movement as quality factors. When eggs are first laid, they do not have an air cell. However, as the egg cools, the contents contract, drawing air into the space between the outer and inner shell membranes to form an air cell. As the egg ages, there is a progressive loss of moisture and an increase in the size of the air cell. Thus, there is a correlation between air cell size and the age of the egg which is associated with quality. However, recent research indicates that there is no significant correlation between air cell movement and quality as determined by the Haugh Unit breakout test which is the most objective method of determining interior egg quality. Eggs with the same size air cells, whether fixed or moveable, do not differ significantly in quality when subjected to the breakout test. Accordingly, the Department proposes to delete all reference to air cell movement from the quality standards for individual eggs. Air cell size would remain a quality factor.

Some adjustments would be made in the consumer and procurement grade tolerances. Provision would be made for a small tolerance for Leakers and Loss eggs caused by meat or blood spots which cannot be detected in fresh, high-quality eggs by present grading techniques. The tolerance for Checks would be slightly increased (from 3 to 5 percent) in the Procurement grades and the standards would be reworded so that the terminology would be compatible between the Consumer and Procurement grades. The adjustments are minor, but will provide a more realistic basis for grading eggs, recognizing that tolerances must be in line with industry capabilities under the most efficient and advanced processing techniques.

A change is being proposed in the egg washing operations in plants using the USDA voluntary grading service. Official plants which utilize a water supply with an iron content in excess of 2 parts per million would be required to provide equipment which will reduce such supply to 2 parts per million or less. Eggs washed in water with excessive iron content are more susceptible to spoilage.

Recently, the Department established a grade standard for "Nest Run Eggs" (37 FR 22791) October 25, 1972. There has been some confusion as to the type of eggs that would qualify as "Nest Run." To clarify this matter, the proopsal includes a definition of "Nest Run Eggs." The nest run standard is designed to anticipate the grade yield of eggs which have not been washed, graded, or sized. Eggs which have been washed, graded, or sized are not eligible to be graded under this standard.

It is the Department's policy not to discriminate against anyone in the conduct of our shell egg services or the licensing of graders because of race, color, creed, sex, or national origin. So this may be clearly understood, the proposal includes a statement on nondiscrimination.

All persons who desire to submit written data, views, or comments in connection with this proposal shall file the same in duplicate with the Hearing Clerk, U.S. Department of Agriculture, Room 112, Administration Building, Washington, D.C. 20250, not later than September 4, 1973.

All written submissions made pursuant to this notice will be made available for public inspection at the Office of the Hearing Clerk during regular business hours (7 CFR 1.27(b)).

The proposed amendments are as follows:

1. In § 56.1, immediately following the definition for "National supervisor," a new definition for "Nest run eggs" would be inserted to read:

"*Nest run eggs*" means eggs which are packed as they come from the production facilities without having been washed, sized and/or candled for quality, with the exception that some Checks, Dirties, or other obvious undergrades may have been removed at the time of gathering.

2. In § 56.3, the present text would be designated paragraph (a) and a new paragraph (b) would be added to read:

§ 56.3 **Administration.**

* * * * *

(b) The conduct of all services and the licensing of graders under these regulations shall be accomplished without discrimination as to race, color, creed, sex, or national origin.

3. In § 56.42, paragraph (b)(10) would be amended to read:

§ 56.42 **Requirements for eggs packaged under Fresh Fancy quality grade mark or AA grade mark as shown in figures 4 and 5 of § 56.36.**

* * * * *

(b) Minimum requirements at packaging plant.

* * * * *

(10) Graders shall examine samples of packaged product in accordance with the provisions of § 56.4 or as determined by the National supervisor. A tolerance of 15 percent is permitted in eggs that are of B quality with respect to shell. Within the 15 percent tolerance, 5 percent in any combination may be C quality due to shell, or meat or blood spots and Checks. In addition, 0.30 percent may be Leakers and Loss (due to meat or blood spots) in any combination. No Dirties or Loss other than as specified are permitted.

4. In § 56.43, paragraph (e) would be amended to read:

§ 56.43 **Requirements for eggs packaged under the U.S. Grade mark as shown in figure 7 of § 56.36.**

* * * * *

(e) A tolerance of 5 percent is permitted in any combination for C quality with respect to shell, meat or blood spots, and Checks. In addition, 0.30 percent may be Leakers and Loss (due to meat or blood spots) in any combination. No Dirties of Loss other than as specified are permitted.

5. In § 56.76, paragraph (e)(8) would be amended to read:

§ 56.76 **Minimum facility and operating requirements for shell egg grading and packing plants.**

* * * * *

(e) *Shell egg cleaning operations.* * * *

(8) Only potable water may be used to wash eggs and each official plant shall submit certification to the National Office stating that their water supply is potable. An analysis of the iron content of the water supply, stated in parts per million, is also required and when the iron content exceeds 2 parts per million, equipment shall be provided to correct the excess iron content.

* * * * *

6. In § 56.201, the second sentence would be amended to read:

"The air cell must not exceed ⅛ inch in depth, may show unlimited movement, and may be free or bubbly."

7. In § 56.202, the second sentence would be amended to read:

"The air cell shall not exceed $\frac{3}{16}$ inch in depth, may show unlimited movement, and may be free or bubbly."

8. In § 56.204, the fourth sentence would be amended to read:

"The air cell may be over $\frac{3}{16}$ inch in depth, may show unlimited movement, and may be free or bubbly."

9. In § 56.209, paragraph (b) would be deleted and paragraphs (c) and (d) would be designated (b) and (c), respectively.

10. In § 56.216, paragraphs (b), (c), and (d) would be amended to read:

§ 56.216 **Grades.**

* * * * *

(b) *U.S. Grade AA.* (1) U.S. Consumer Grade AA (at origin) shall consist of eggs which are 85 percent AA quality. The maximum tolerance of 15 percent which may be below AA quality may consist of A or B quality in any combination, with not more than 5 percent C quality or Checks in any combination and not more than 0.30 percent Leakers or Loss (due to meat or blood spots) in any combination. No Dirties or Loss other than as specified are permitted. This grade is also applicable when the lot consists of eggs meeting the requirements set forth in § 56.42.

(2) U.S. Consumer Grade AA (destination) shall consist of eggs which are 80 percent AA quality. The maximum tolerance of 20 percent which may be below AA quality may consist of A or B in any combination with not more than 5 percent C quality or Checks in any combination and not more than 0.50 percent Leakers, Dirties, or Loss (due to meat or blood spots) in any combination, except that such Loss may not exceed 0.30 percent. Other types of Loss are not permitted. This grade is also applicable

V 38-149 AUG 3 73 XUM

when the lot consists of eggs meeting the requirements set forth in § 56.42.

(c) U.S. Grade A:

(1) U.S. Consumer Grade A (at origin) shall consist of eggs which are 85 percent A quality or better. Within the maximum tolerance of 15 percent which may be below A quality, not more than 5 percent may be C quality or Checks in any combination, and not more than 0.30 percent Leakers or Loss (due to meat or blood spots) in any combination. No Dirties or Loss other than as specified are permitted. This grade is also applicable when the lot consists of eggs meeting the requirements set forth in § 56.43.

(2) U.S. Consumer Grade A (destination) shall consist of eggs which are 80 percent A quality or better. Within the maximum tolerance of 20 percent which may be below A quality, not more than 5 percent may be C quality or Checks in any combination, and not more than 0.50 percent Leakers, Dirties, or Loss (due to meat or blood spots) in any combination, except that such Loss may not exceed 0.30 percent. Other types of Loss are not permitted. This grade is also applicable when the lot consists of eggs meeting the requirements set forth in § 56.43.

(d) U.S. Grade B:

(1) U.S. Consumer Grade B (at origin) shall consist of eggs which are 85 percent B quality or better. Within the maximum tolerance of 15 percent which may be below B quality, not more than 10 percent may be Checks and not more than 0.30 percent Leakers or Loss (due to meat or blood spots) in any combination. No Dirties or Loss other than as specified are permitted.

(2) U.S. Consumer Grade B (destination) shall consist of eggs which are 80 percent B quality or better. Within the maximum tolerance of 20 percent which may be below B quality, not more than 10 percent may be Checks and not more than 0.50 percent Leakers, Dirties, or Loss (due to meat or bood spots) in any combination, except that such Loss may not exceed 0.30 percent. Other types of Loss are not permitted.

* * * * *

11. In § 56.217, Table I would be amended by deleting the words "Not over 0.5" and "Leakers or Dirties" whenever they appear and adding footnotes [2] and [3] at the end of the table to read, respectively:

[2] For the U.S. Consumer grades (at origin), a tolerance of 0.30 percent Leakers or Loss (due to meat or blood spots) in any combination is permitted. No Dirties or other type Loss are permitted.

[3] For the U.S. Consumer grades (destination), a tolerance of 0.50 percent Leakers, Dirties, or Loss (due to meat or blood spots) in any combination is permitted, except that such Loss may not exceed 0.30 percent. Other types of Loss are not permitted.

12. In § 56.221, paragraphs (a) and (b) would be amended to read:

§ 56.221 Grades.

(a) U.S. Procurement Grade I:

(1) U.S. Procurement Grade I (at origin) shall consist of eggs which are 85 percent A quality or better. Within the maximum tolerance of 15 percent which may be below A quality, not more than 5 percent may be C quality or Checks in any combination and not more than 0.30 percent may be Dirties, Leakers, and Loss combined. Loss, other than meat or blood spots, shall not exceed 0.15 percent.

(2) U.S. Procurement Grade I (destination) shall consist of eggs which are 80 percent A quality or better. Within the maximum of 20 percent which may be below A quality, not more than 5 percent may be C quality or Checks, in any combination and not more than 0.50 percent may be Dirties, Leakers, and Loss combined. Loss, other than meat and blood spots shall not exceed 0.20 percent.

(b) U.S. Procurement Grade II:

(1) U.S. Procurement Grade II (at origin) shall consist of eggs which are 65 percent A quality or better. Within the maximum tolerance of 35 percent which may be below A quality, not more than 10 percent may be C quality or Checks in any combination, except that Checks may not exceed 5 percent and not more than 0.30 percent may be Dirties, Leakers, and Loss combined. Loss, other than meat and blood spots shall not exceed 0.15 percent.

(2) U.S. Procurement Grade II (destination) shall consist of eggs which are 60 percent A quality or better. Within the maximum tolerance of 40 percent which may be below A quality, not more than 10 percent may be C quality or Checks, in any combination, except that Checks may not exceed 5 percent and not more than 0.50 percent may be Dirties, Leakers, and Loss combined. Loss, other than meat and blood spots, shall not exceed 0.20 percent.

* * * * *

13. In § 56.222, Table I would be amended by deleting the words:

"Dirty," "Leaker," and "Loss" whenever they appear, deleting footnote 2 and adding new footnotes 2 and 3 to read, respectively:

[2] For U.S. Procurement Grades (at origin), a maximum of 5 percent Checks is permitted and not more than 0.30 percent may be Dirties, Leakers, and Loss combined. Loss other than meat and blood spots shall not exceed 0.15 percent.

[3] For U.S. Procurement Grades (destination), a maximum of 5 percent Checks is permitted and not more than 0.50 percent may be Dirties, Leakers, and Loss combined. Loss, other than meat and blood spots, shall not exceed 0.20 percent.

Done at Washington, D. C., this 30th day of July 1973.

JOHN C. BLUM,
Acting Administrator.

[7 CFR Part 989]

RAISINS PRODUCED FROM GRAPES GROWN IN CALIFORNIA

Proposed Change in List of Varietal Types

Notice is hereby given of a proposal, pursuant to the marketing agreement, as amended, and Order No. 989, as amended (7 CFR Part 989), hereinafter referred to collectively as the "order", regulating the handling of raisins produced from grapes grown in California, to change the list of varietal types of raisins set forth in § 989.10 of the order by deleting "Alicante Bouschet", "Cardinal", "Carignane", "Italia", "Malaga", and "Zinfandel" from the list. The order is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). The changed list of varietal types would be set forth as a new § 989.110 in the Subpart—Administrative Rules and Regulations (7 CFR 989.101–989.176, 38 FR 10074, 13012, 14959).

Section 989.10 defines "varietal type" to mean raisins generally recognized as possessing characteristics differing from other raisins in a degree sufficient to make necessary or desirable separate identification and classification. In addition to listing the varietal types, that section also provides that the Raisin Administrative Committee may from time to time, subject to the approval of the Secretary, change this list of varietal types.

Cardinal, Italia and Malaga grapes are primarily marketed fresh as table grapes and only limited quantities are made into raisins. The Committee has concluded that it is not necessary to have separate identifications and classifications for raisins produced from these varieties of grapes because the raisins possess characteristics which are similar to Muscat (natural (sun-dried) Muscat or Layer Muscat) or Valencia (bleached Muscat) raisins. "Natural (sun-dried) Muscat", "Layer Muscat" and "Valencia" raisins are listed as varietal types in § 989.10. Hence, the Committee unanimously recommended that the list of varietal types of raisins be changed to delete "Cardinal", "Italia", and "Malaga" from the list and that raisins produced from these varieties of grapes be considered to be the applicable Muscat or Valencia raisins for purposes of regulation under the order.

Alicante Bouschet, Carignane and Zinfandel grapes are wine variety grapes. There have been only insignificant quantities of these grapes dried to raisins since they were included in the order as varietal types of raisins (in 1960). It is not likely that production of raisins from these grape varieties will be in quantities expected to be of any commercial significance. Therefore it is also proposed that these three varietal types be deleted from the list of varietal types of raisins in § 989.10.

Consideration will be given to any written data, views, or arguments pertaining to the proposal which are received by the Hearing Clerk, U.S. Department of Agriculture, Room 112, Administration Building, Washington, D.C. 20250, not later than August 15, 1973. All written submissions made pursuant to this notice should be in quadruplicate and will be made available for public inspection at the office of the Hearing Clerk during regular business hours (7 CFR 1.27(b)).

The proposal is to add a new § 989.110 to read as follows:

§ 989.110 Changed list of varietal types.

Pursuant to § 989.10, the list of varietal types of raisins contained in that section is changed to read: Natural (sun-dried) Thompson Seedless, natural (sun-dried) Muscat, natural (sun-dried) or artificially dehydrated Sultana, natural (sun-dried) or artificially dehydrated Zante Currant, Layer Muscat, Golden Seedless, Sulfur Bleached, Soda Dipped, Valencia and Monukka.

Dated: July 31, 1973.

CHARLES R. BRADER,
Acting Deputy Director,
Fruit and Vegetable Division.

[FR Doc.73-16082 Filed 8-2-73;8:45 am]

[7 CFR Part 993]

Modified Definition of Non-French Prunes

Notice is hereby given of a proposal to modify the definition of "non-French prunes" set forth in § 993.6 by adding "Moyer" to that definition. The definition, as so modified, would be set forth as a new § 993.109 in Subpart—Administrative Rules and Regulations (7 CFR 993.101–993.174).

The proposal was unanimously recommended by the Prune Administrative Committee pursuant to the marketing agreement, as amended, and Order No. 993, as amended (7 CFR Part 993), regulating the handling of dried prunes produced in California. The amended marketing agreement and order are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674).

Section 993.6 defines the term non-French prunes to mean prunes produced from varieties of plums listed in that definition. Section 993.6 also provides that this definition may be modified by the Committee with the approval of the Secretary.

Section 993.7 of the order defines "French prunes" to mean: (a) Prunes produced from plums of the following varieties of plums: French (Prune d'Agen, Petite Prune d'Agen), Coates (Cox, Double X, Saratoga); and (b) any other prunes which possess taste, flesh texture, and other characteristics similar to those of the prunes named in that section. Thus, any prunes which do not possess characteristics similar to French prunes would be considered non-French prunes.

Because prunes made from Moyer variety of plums do not possess characteristics similar to French prunes, the Committee recommended that "Moyer" be included in the definition of non-French prunes.

Consideration will be given to any written data, views, or arguments pertaining to the proposal which are received by the Hearing Clerk, U.S. Department of Agriculture, Room 112, Administration Building, Washington, D.C. 20250, not later than August 15, 1973. All written submissions made pursuant to this notice will be made available for public inspection at the office of the Hearing Clerk during regular business hours (7 CFR 1.27(b)).

The proposal is to amend the Subpart—Administrative Rules and Regulations (7 CFR 993.101–993.174) by the addition of a new § 993.109 reading as follows:

§ 993.109 Modified definition of non-French prunes.

The definition of non-French prunes set forth in § 993.6 is modified to read as follows:

"Non-French Prunes" means prunes commonly known as Imperial, Sugar, Robe de Sargent, Burton, Standard, Jefferson, Fellenberg, Italian, President, Giant, Hungarian (Gross), and Moyer, produced from such varieties of plums. This definition may be modified by the Committee with the approval of the Secretary.

Dated: July 31, 1973.

CHARLES R. BRADER,
Acting Deputy Director,
Fruit and Vegetable Division.

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

[Docket 73-19; Notice 1]

[49 CFR Part 581]

BUMPER STANDARD

Notice of Proposed Rulemaking

The purpose of this notice is to propose a bumper standard that will reduce the damage sustained by passenger cars in low speed crashes. The proposed standard issues under Title I of the Motor Vehicle Information and Cost Savings Act, Public Law 92–513, 15 U.S.C. 1901–1991, and represents the first exercise of the authority created by the Act to regulate aspects of bumper performance in addition to the safety aspects.

The proposed standard would require passenger cars manufactured after September 1, 1974, to meet a set of damage criteria after impacting a fixed barrier in accordance with a test procedure originally developed for Motor Vehicle Safety Standard No. 215 (49 CFR 571.215). It would further require passenger cars manufactured after September 1, 1975, to meet the same damage criteria after a series of impacts by the test pendulum used for Standard No. 215. The agency's expectation is that upon the date the pendulum tests go into effect, Standard No. 215 will have been wholly included within the new standard and can be removed from the list of safety standards.

The standards-writing authority created by the Cost Savings Act is patterned upon that of the National Traffic and Motor Vehicle Safety Act, P.L. 89–563, under which the safety standards are issued. The safety standard format that has been developed over the years appears equally suitable to property loss reduction standards. Standard No. 215, which will be fully in effect for most passenger cars after September 1, 1973, contains test procedures expressly designed to evaluate the basic strength and protective characteristics of bumpers. Barrier test procedures, in particular, have been widely used and are mentioned in the text of the Cost Savings Act as among those procedures expected to be used in the standard (section 2(6)). The agency has therefore tentatively decided to establish this bumper standard in a manner parallel to Standard No. 215.

As evidenced by the passage of the Cost Savings Act, the safety authority under which the protective criteria of Standard No. 215 were established was not considered sufficient to remedy the problem of low-speed collision damage. Standard No. 215's criteria protect the safety of the vehicle's operating systems, such as its lights, brakes, cooling system, and power train, but do not prevent damage to components that do not affect the vehicle's safety. A dent in the sheet metal of the fenders or in the bumpers, or a broken grille, would not constitute a failure of Standard No. 215. Such damage is far from immaterial to the car owner, however, who must face the choice of repair, which is likely to be expensive, or nonrepair, which diminishes the resale value of the car. After reviewing extensive testimony on the prevalence of costly damage in low speed accidents, the Congress concluded that it was necessary to regulate the economic effects of such accidents and not just their safety effects. To this end, the Act directs the Secretary of Transportation to promulgate bumper standards and provides in section 102(b)(1) that any such standard shall seek to obtain the maximum feasible reduction of costs to the public and to the consumer, taking into account:

(A) The cost of implementing the standard and the benefits attainable as the result of implementation of the standard;

(B) The effect of implementation of the standard on the cost of insurance and prospective legal fees and costs;

(C) Savings in terms of consumer time and inconvenience; and

(D) Considerations of health and safety, including emission standards.

The rulemaking process under the Act thus involves the balancing of many factors to determine what level of performance is economically most beneficial to the consumer. The goal is not simply to require the most protective bumpers that can be produced. It may be that such bumpers would be so expensive to produce or replace that their use would involve a net economic loss to the consumer. In arriving at a tentative set of damage criteria, the agency has attempted to strike a balance between cost and protective capabilities. It is NHTSA's hope that, in the comments to the proposed standard and in the public meeting announced below, further information will be provided concerning the damage criteria.

In approaching the choice of damage criteria, the agency has attempted to

V 38-149 AUG 3 73 XUM

classify the types of damages that are of economic consequence to the consumer. One broad class of damage to operating systems is already included within Standard No. 215. The vehicle's lights, its hood, trunk and doors, and its fuel, cooling, exhaust, propulsion, suspension, steering, and braking systems are protected from damage under Standard No. 215's criteria. The agency's experience to date has been that these criteria provide an adequate measure of control and it is therefore proposing to incorporate them into the new standard without significant change.

The other broad class of damage consists of structural and surface anomalies that are produced when a part of the vehicle is stressed beyond its capacity to return to its original condition. Some types of damage within this class, such as internal deformation in the bumper itself, may not affect the appearance of the vehicle and are not likely to be regarded as "damage" by the consumer. The proposed criteria are therefore directed primarily toward those types of impact-related change in the vehicle that are likely to be visible and to detract from the appearance and market value of the vehicle.

Three criteria are proposed in addition to the criteria carried over from Standard No. 215. The first deals with the damage typified by the ornament that falls off in an accident, by the chrome trim strip that springs loose from the fender, and by the bumper bolt that shears off. This type of damage would be regulated by requiring the vehicle to experience no breakage or release of fasteners or joints as a result of the test impacts. The second deals with damage to covering materials, such as paint and polymeric coatings, that are bonded to the underlying surface. Chipping, flaking, and peeling of such bonded materials would be regulated by requiring the vehicle to experience no separation of bonded coverings as a result of impact. The third deals with geometric distortions in the vehicle's exterior surface—in the sheet metal, in the grille and other trim, and in the bumpers themselves, including displacement of the bumpers due to shortening of the bumper struts or mounting brackets. The proposed criteria would regulate such damage by prohibiting the occurrence of surface displacements or separations.

As proposed, the damage criteria apply to the face of the bumpers as well as to other portions of the vehicle's exterior surface. The pendulum test tends to impose highly concentrated forces on the surfaces contacted by the pendulum's impact ridge, so that the bumper faces would be particularly susceptible to dents and other surface displacements. The NHTSA requests that any comments regarding the applicability of the criteria to the bumper faces discuss: (a) The relative costs of achieving this level of bumper protection compared with lesser levels of protection, (b) the manner in which damage criteria applicable to the bumper system alone could be specified, (c) the historical cost of repairing bumper face damage, and (d) the cost to the consumer of unrepaired bumper face damage.

An additional criterion carried over from Standard No. 215 is the provision that the vehicle must not touch the pendulum during impact except on the pendulum's impact ridge. This criterion has been the basic means employed by Standard No. 215 to control the height and shape of the bumper for the purpose of reducing the tendency of cars to underride or override each other in collisions. This criterion has been the source of continuing controversy, but as yet the agency has not determined that it can be modified without sacrificing its basic goals. If changes are decided upon within the context of Standard No. 215, they will be reflected in the new standard.

The proposed standard would not have the broadest application permitted by the Act, in that it would not apply to multipurpose passenger vehicles. The agency has not concluded that there is good cause to exempt such vehicles indefinitely from the bumper standard, but it is not proposing to regulate them at this time. In view of the increasing popularity of this type, particularly as recreational vehicles, comments are invited as to the benefits to be gained from extending the standard to them.

Other considerations in the Act that are not directly incorporated in the proposed standard concern the bumper's ability to accommodate a trailer hitch and to accept a tow truck's towing device without damage. Each of these aspects of performance depend to some extent on the types of hitches and towing devices in current use. Comments are expressly requested on the characteristics of towing devices now in use and on the present and potential difficulties that may arise when they are attached to motor vehicles. Comments are also requested as to the considerations of bumper design that affect the attachment of trailer hitches. If rulemaking appears advisable upon review of such comments, it is likely that the effective date of the resulting rule would coincide with the effective date of the other bumper performance tests.

The effective dates proposed for the new standard follow the corresponding dates for the barrier and pendulum tests of Standard No. 215 by two years, with the exception of the corner impact tests, which would be effective September 1, 1975, under either standard. With respect to the barrier impact tests, most manufacturers have taken steps to meet the California and Maryland no-damage bumper tests in the 1974 models sold in those states. Introduction of similar improvements across the country by the start of the 1975 model year would appear practicable. The date for the pendulum tests may be the subject of more discussion than the barrier date, but at this point the agency considers September 1, 1975, to be reasonable.

In consideration of the foregoing, NHTSA is proposing a new bumper standard, to be designated as Part 581 of Title 49, Code of Federal Regulations. The proposed standard is set forth below.

In addition to soliciting written comments on the proposed standard, NHTSA is directed by section 102(e)(1) of the Act to give interested persons an opportunity for oral presentation of data, views, or arguments. Under the circumstances, the agency finds that a public meeting can provide an extremely useful means of discussing any controversial aspects of the rulemaking, and has therefore decided to hold a public meeting on the proposal on September 13, 1973. The administrative details of the meeting will be published shortly in a notice in the FEDERAL REGISTER.

In order to develop a comprehensive evaluation of the costs and benefits associated with the proposed bumper standard, the NHTSA requests the greatest practicable detail in the statements at the public meeting and in the docket comments. Of particular relevance is historical data on low speed (0–20 mph) crash experience during model years 1971 to 1973, as set forth below. A detailed list of questions relating to manufacturing costs is being prepared and is expected to be issued during the comment period.

(1) Frequency distribution of crashes according to impact speed

(2) Frequency distribution of crashes according to direction of impact

(3) Frequency distribution of crashes according to damage repair cost

(4) Type of damage and cost of repair following Standard No. 215 tests

(5) Equivalence between crash damage and repair costs obtained from controlled test and actual experience

(6) Rate of replacement or repair of bumpers by model year relative to each of the following: dents, damage to protective or decorative coating, deformation, and displacement of bumper

(7) Type of damage and cost of repair as a function of crash speed in actual crashes

(8) Changes in collision and property damage insurance rates ascribable to or expected from bumper standard requirements

(9) Reductions in the losses for which consumers are not compensated by insurance

(10) Effects that a reduction in the number of damage producing collisions will have upon public services and institutional activities such as police traffic services, court and legal processes, and traffic record systems

(11) Impacts on consumer factors related to convenience and time delays

(12) Effects on health and safety including emission standards, pedestrian injury severity, and struck vehicle occupant injury and property damage severity.

Interested persons are invited to submit comments on the proposal. Comments should refer to the docket number and be submitted to: Docket Section, National Highway Traffic Safety Administration, Room 5221, 400 Seventh Street, SW., Washington, D.C. 20590. It is requested but not required that 10 copies be submitted.

All comments received before the close of business on the comment closing date indicated below will be considered, and will be available for examination in the docket at the above address both before and after that date. To the extent possible, comments filed after the closing date will also be considered by the Administration. However, the rulemaking action may proceed at any time after that date, and comments received after the closing date and too late for consideration in regard to the action will be treated as suggestions for future rulemaking. The Administration will continue to file relevant material, as it becomes available in the docket after the closing date, and it is recommended that interested persons continue to examine the docket for new material.

(Section 102, Pub. L. 92–513, 86 Stat. 947, 15 U.S.C. 1912; delegation of authority at 38 FR 12147).

Comment closing date: September 14, 1973.

Proposed effective date: September 1, 1974.

Issued on July 30, 1973.

JAMES E. WILSON,
Associate Administrator,
Traffic Safety Programs.

PART 581—BUMPER STANDARD

S1. *Scope.* This standard establishes requirements for the impact resistance of vehicles in low speed front and rear collisions.

S2. *Purpose.* The purpose of this standard is to reduce physical damage to the front and rear ends of a passenger motor vehicle from low speed collisions.

S3. *Application.* This standard applies to passenger motor vehicles other than multipurpose passenger vehicles.

S4. *Definitions.* All terms defined in the Motor Vehicle Information and Cost Savings Act, P.L. 92–513, 15 U.S.C. 1901–1991, are used as defined therein.

S5. *Requirements.*

S5.1 *Vehicles manufactured on or after September 1, 1974.* Each vehicle manufactured on or after September 1, 1974, shall meet the damage criteria of S5.3.1 through S5.3.8 when it impacts a fixed collision barrier that is perpendicular to the line of travel of the vehicle, while traveling longitudinally forward at 5 m.p.h. and while traveling longitudinally rearward at 5 m.p.h., under the conditions of S6.1 and S6.3.

S5.2 *Vehicles manufactured on or after September 1, 1975.* Each vehicle manufactured on or after September 1, 1975, shall meet the damage criteria of S5.3.1 through S5.3.9 when impacted by a pendulum-type test device in accordance with the procedures of S7.1 and S7.2 followed by impacts into a fixed collision barrier that is perpendicular to the line of travel of the vehicle, while traveling longitudinally forward at 5 m.p.h. and while traveling longitudinally rearward at 5 m.p.h., under the conditions of S6.

S5.3 *Damage criteria.*

S5.3.1 Each lamp or reflective device, except license plate lamps, shall be free of cracks and shall comply with the applicable visibility requirements of S4.3.1.1 of Standard No. 108 (§ 571.108). The aim of each headlamp shall be adjustable to within the beam aim inspection limits specified in Table 2 of SAE Recommended Practice J559b, July 1970, measured with a mechanical aimer conforming to the requirements of SAE Standard J602a, July 1970.

S5.3.2 The vehicle's hood, trunk, and doors shall operate in the normal manner.

S5.3.3 The vehicle's fuel and cooling systems shall have no leaks or constricted fluid passages and all sealing devices and caps shall operate in the normal manner.

S5.3.4 The vehicle's exhaust system shall have no leaks or constrictions and shall operate in the normal manner.

S5.3.5 The vehicle's propulsion, suspension, steering, and braking systems shall remain in adjustment and shall operate in the normal manner.

S5.3.6 The vehicle's exterior surfaces shall have no separations of paint, polymeric coatings, or other covering materials from the surface to which they are bonded.

S5.3.7 There shall be no breakage or release of fasteners or joints.

S5.3.8 The vehicle's exterior surfaces shall have no deviations from their original contours and no separations of surface material.

S5.3.9 The vehicle shall not touch the test device except on the impact ridge shown in Figures 1 and 2.

S6. *Conditions.* The vehicle shall meet the requirements of S5. under the following conditions.

S6.1 *General.*

S6.1.1 The vehicle is at unloaded vehicle weight.

S6.1.2 The front wheels are parallel to the vehicle's longitudinal centerline.

S6.1.3 Tires are inflated to the vehicle manufacturer's recommended pressure for the specified loading condition.

S6.1.4 Brakes are disengaged and the transmission is in neutral.

S6.1.5 Trailer hitches are removed from the vehicle.

S6.2 *Pendulum test conditions.* The following conditions apply to the pendulum test procedures of S7.1 and S7.2.

S6.2.1 The test device consists of a block with one side contoured, as specified in Figure 1 and Figurt 2 with the impact ridge made of A1S1 4130 steel hardened to 34 Rockwell "C".

S6.2.2 With plane A vertical, the impact line shown in Figures 1 and 2 is horizontal at the same height as the test device's center of percussion.

S6.2.3 The effective impacting mass of the test device is equal to the mass of the tested vehicle.

S6.2.4 When impacted by the test device, the vehicle is at rest on a level rigid concrete surface.

S6.3 *Barrier Test Condition.* At the onset of a barrier impact, the vehicle's engine is operating at idling speed in accordance with the manufacturer's specification. Vehicle systems that are not necessary to the movement of the vehicle are not operating during impact.

S7. *Test Procedures.*

S7.1 *Longitudinal impact test procedures.* Impact the vehicle's front surface and its rear surface three times each with the impact line at the height of 20 inches, and three times each with the impact line at any height between 20 inches and 16 inches, in accordance with the following procedures.

S7.1.1 For impacts at a height of 20 inches, place the test device shown in Figure 1 so that plane A is vertical and the impact line is horizontal at the specified height.

S7.1.2 For impacts at a height between 20 inches and 16 inches, place the test device shown in Figure 2 so that plane A is vertical and the impact line is horizontal at a height within the range.

S7.1.3 For each impact, position the test device so that the impact line is at least 2 inches apart in vertical direction from its position in any prior impact, unless the midpoint of the impact line with respect to the vehicle is to be more than 12 inches apart laterally from its position in any prior impact.

S7.1.4 For each impact, align the vehicle so that it touches but does not move the test device, with the vehicle's longitudinal centerline perpendicular to the plane that includes plane A of the test device and with the test device inboard of the vehicle corner test positions specified in S7.2.

S7.1.5 Move the test device away from the vehicle, then release it so that plane A remains vertical from release until the onset of rebound, and the arc described by any point on the impact line is constant, with a radius of not less than 11 feet, and lies in a plane parallel to the vertical plane through the vehicle's longitudinal centerline.

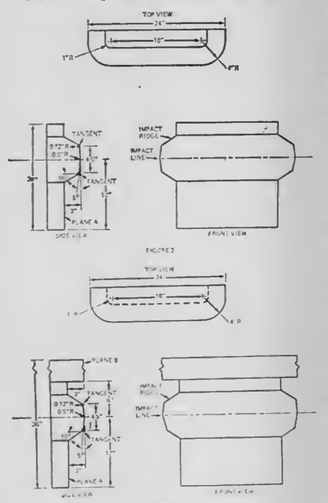
S7.1.6 Impact the vehicle at 5 mph.

S7.1.7 Perform the impacts at intervals of not less than 30 minutes.

S7.2 *Corner impact test procedure.* Impact a front corner and a rear corner of the vehicle once each with the impact line at a height of 20 inches and impact the other front corner and the other rear corner once each with the impact line at any height between 20 inches and 16 inches in accordance with the following procedure.

S7.2.1 For an impact at a height of 20 inches, place the test device shown in Figure 1 so that plane A is vertical and the impact line is horizontal at the specified height.

S7.2.2 For an impact at a height between 20 inches and 16 inches, place the test device shown in Figure 2 so that plane A is vertical and the impact line is horizontal at a height within the range.



S7.2.3 Align the vehicle so that a vehicle corner touches, but does not move, the lateral center of the test device with plane A of the test device forming an angle of 60 degrees with a vertical longitudinal plane.

S7.2.4 Move the test device away from the vehicle, then release it so that plane A remains vertical from release until the onset of rebound, and the arc described by any point on the impact line is constant, with a radius of not less than 11 feet, and lies in a vertical plane

V 38-149
AUG 3 73
XUM

at an angle of 30° to the vertical plane through the vehicle's longitudinal centerline.

S7.2.5 Impact each corner at 3 mph.

CONSUMER PRODUCT SAFETY COMMISSION

[16 CFR Part 1100]

NONCOMPLYING OR DEFECTIVE CONSUMER PRODUCT

Commission Information

The Consumer Product Safety Commission proposes to establish a regulation providing guidelines for compliance with section 15(b) of the Consumer Product Safety Act (Public Law 92-573, 86 Stat. 1221; 15 U.S.C. 2064(b)). Section 15(b) of the act deals with the responsibility of manufacturers, distributors, and retailers for informing the Commission of consumer products that fail to comply with an applicable consumer product safety rule or contain a defect which could create a substantial product hazard. Section 15(a) of the act defines "substantial product hazard."

The proposed regulation is also intended to apply to notification of a defect which could create a substantial product hazard in products subject to regulation under authority of the acts transferred to the Commission by section 30 of the Consumer Product Safety Act (15 U.S.C. 2079); namely, the Federal Hazardous Substances Act, the Poison Prevention Packaging Act of 1970, the Flammable Fabrics Act, and the Refrigerator Safety Act.

Section 15(a) and (b) of the act reads as follows:

SEC. 15. (a) For purposes of this section, the term "substantial product hazard" means—

(1) a failure to comply with an applicable consumer product safety rule which creates a substantial risk of injury to the public, or

(2) a product defect which (because of the pattern of defect, the number of defective products distributed in commerce, the severity of the risk, or otherwise) creates a substantial risk of injury to the public.

(b) Every manufacturer of a consumer product distributed in commerce, and every distributor and retailer of such product, who obtains information which reasonably supports the conclusion that such product—

(1) fails to comply with an applicable consumer product safety rule; or

(2) contains a defect which could create a substantial product hazard described in subsection (a)(2),

shall immediately inform the Commission of such failure to comply or of such defect, unless such manufacturer, distributor, or retailer has actual knowledge that the Commission has been adequately informed of such defect or failure to comply.

Notification under this proposed regulation of a failure to comply or of a possible product defect and data accompanying such notification will be made available to the public in accordance with the provisions of 5 U.S.C. 552 and section 6 of the Consumer Product Safety Act (15 U.S.C. 2055).

The Consumer Product Safety Commission's regulations will be codified in Title 16, Chapter II, of the Code of Federal Regulations. The regulation proposed herein will be a section in Part 1100 thereof.

Therefore, pursuant to provisions of the Consumer Product Safety Act (secs. 15 (a), (b) 27 (b), (e), 30, 86 Stat. 1221, 1228, 1211; 15 U.S.C. 2064 (a), (b), 2076 (b), (e), 2079), the Commission proposes to add the following section to 16 CFR Part 1100:

PART 1100—DEFINITIONS, INTERPRETATIONS, AND ADMINISTRATIVE PROCEDURES

§ 1100.25 Noncomplying or defective consumer products; informing the Commission pursuant to section 15(b) of the act.

(a) The definitions of terms set forth in section 3 of the Consumer Product Safety Act (15 U.S.C. 2052) shall apply to such terms as used in this section.

(b)(1) Pursuant to section 15(b) of the act (15 U.S.C. 2064(b)), every manufacturer of a consumer product distributed in commerce and every distributor and retailer of such product shall immediately inform the Director of the Bureau of Compliance, Consumer Product Safety Commission, Washington, D.C. 20207, upon discovery of a consumer product which fails to comply with an applicable consumer product safety rule or upon discovery of a product containing a defect which creates or could create a substantial risk of injury to the public, unless such manufacturer, distributor, or retailer has actual knowledge that the Commission has been adequately informed of such defect or failure to comply.

(2) The initial notification of the Commission shall:

(i) Identify the product;

(ii) Give the name and address of the manufacturer, or if the manufacturer is unknown, the name and address of every distributor and/or retailer of such product known to the manufacturer, distributor, or retailer making the notification.

(iii) Specify the nature and extent of the defect or the failure to comply with an applicable consumer product safety rule;

(iv) Give the name and address of the person informing the Commission; and

(v) Furnish (to the extent such information is available) the data specified in paragraph (c) of this section.

(3) The initial notification of the Commission may be by any means but should be received by the Commission within 24 hours after discovery of such a defect or failure to comply with an applicable consumer product safety rule. If the initial notification is by means other than a written communication, it shall be confirmed in writing within 48 hours of the discovery of the defect or failure to comply and shall include the data (as available) specified in paragraph (c) of this section.

(c) Complete notification of the Commission shall be made in writing and shall include, but not be limited to, the following information:

(1) Name and address of the person informing the Commission.

(2) Identification of the product and the name and address of its manufacturer.

(3) Nature of the potential product hazard.

(4) Date the potential product hazard was discovered.

(5) How the potential product hazard was discovered (consumer complaint, quality control testing, etc.).

(6) Nature of potential injury associated with the potential product hazard.

(7) Whether injuries have occurred associated with the hazard or potential product hazard.

(8) Number of products which present a hazard or potential hazard and number of units of each such product involved.

(9) Number of units of each product in the hands of consumers.

(10) Specific dates when faulty units were manufactured and distributed.

(11) An accounting of when and where such products (and the number of units of each product) were distributed.

(12) Model numbers and serial numbers affected.

(13) Location on product where model number and serial number appear.

(14) List of names and addresses of every distributor, retailer, and purchaser, if known.

(15) What corrective action has been, is being, or will be taken by the manufacturer and how long it has or will take.

(16) What advice about the product has been, is being, or will be given to purchasers and how such advice was or will be given.

(17) Whether public notice of the defect or failure to comply has been or will be given (if already given, furnish copy to the Commission).

(18) Whether notice has been or will be mailed to each person who is a manufacturer, distributor, or retailer of such product and what effort has been or will be made to notify consumers directly where such consumers are known.

(19) What tests are conducted in factories to avoid the defect and/or to comply with an applicable consumer product safety rule.

(20) What engineering changes will be made to correct the defect and/or to comply with an applicable consumer product safety rule and the timetable for accomplishing the changes.

(21) What new quality controls will be initiated to avoid the defect and/or to comply with an applicable consumer product safety rule and the timetable for changes to be placed into effect.

(22) What, if any, data submitted is entitled to protection as proprietary data under the provisions of 5 U.S.C. 552 and of section 6 of the Consumer Product Safety Act (15 U.S.C. 2055). Unavailability of any portion of this information shall not delay submission of available data.

(d) Complete notification of the Commission by a manufacturer shall be deemed to have been given whenever the information outlined in paragraph (c) of this section and any additional information requested by the Commission during the course of its investigation have been furnished.

(e) Complete notification of the Commission by a distributor or retailer shall be deemed to have been given whenever the information specified in paragraph (c) of this section (as is available to the distributor or retailer) and any additional information requested by the Commission during the course of its investigation have been furnished.

(f) A final written report by a responsible official of the manufacturer shall be submitted to the Director of the Bureau of Compliance, Consumer Product Safety Commission, Washington, D.C. 20207, when all of the information specified in paragraph (d) of this section has been furnished to the Commission and the reported potential product hazard has been corrected.

Interested persons are invited to submit on or before September 4, 1973, written comments regarding this proposal. Comments and any accompanying material or data should be submitted, preferably in sextuplicate, addressed to the Secretary, Consumer Product Safety Commission, Washington, D.C. 20207. Received comments may be seen in the Office of the Secretary, seventh floor, Air Rights Building, 7315 Wisconsin Avenue, Bethesda, Md., during working hours Monday through Friday.

Dated July 30, 1973.

GEORGE A. SMITH,
Acting Secretary, Consumer Product Safety Commission.

SECURITIES AND EXCHANGE COMMISSION

[17 CFR Part 230]

[Release No. 33-5410]

ISSUERS OF REGISTRATION STATEMENTS

Proposed Summary Requirement

The Commission is releasing for public comment a proposed new Rule 458 [17 CFR 230.458] to be adopted under section 19(a) of the Securities Act of 1933. The proposed rule would require any company filing a registration statement with the Securities and Exchange Commission other than on Form S-8 [17 CFR 239.16b] and S-12 [17 CFR 239.19] to provide in a letter but not as part of the registration statement a one-paragraph summary for the SEC News Digest as notice of the registration filing. The text of the proposed rule is as follows:

§ 230.458 Brief summary of registration statement.

(a) A letter, addressed to the Commission's Office of Public Information and containing the information described below, shall be delivered to the Commission at the same time that a registration statement on any form other than Form S-8 [17 CFR 239.16b] or S-12 [17 CFR 239.19] is filed with the Commission. Such letter shall contain a summary of the offering to which the registration statement relates, which summary shall include only the following items of information, where applicable, in the following order:

(1) The name and address of the issuer of the security;

(2) The full title of the security or securities and the amount being offered;

(3) The price of the security, or if the price is not known, the proposed maximum offering price as estimated for purposes of computing the registration fee;

(4) The name and address of the managing underwriter(s);

(5) In the case of a rights offering, the class of securities the holders of which will be entitled to subscribe, the subscription ratio, the actual or proposed record date, and the approximate subscription price;

(6) In the case of an exchange or tender offer, a brief description of the proposed exchange conforming to Section 230.135(a)(4) of this Chapter;

(7) A statement of the amount of the offering, if any, to be made by selling security holders;

(8) A brief indication of the primary business of the issuer.

(b) A letter, furnished in compliance with this section, shall be deemed not to be "filed" with the Commission and not to be a part of the registration statement. For purposes of Section 5 of the Act only, information furnished pursuant to this section and published in the News Digest of the Commission, shall be deemed not to constitute an offer when so published.

(c) Instruction: The information should be presented in a form similar to the examples which follow, as appropriate:

(1) *General.* ABC, INC., 3700 50th Avenue, Bladensburg, Md. 20710—$1,500,000 of convertible subordinated debentures and 150,000 shares of common stock, to be offered for sale in units, each consisting of a $250 debenture and 25 shares, and at $500 per unit through underwriters headed by Blank & Co., Inc., 1720 F St., NW., Washington, D.C. 20006. The company is a commercial printer, engaged in web offset lithography and book binding.

(2) *Secondary offering.* MNO COMPANY, 50 Detroit Avenue, Lakewood, Ohio 44107—72,000 shares of common stock, which may be offered for sale (or pledged) from time to time by certain shareholders at prices current at the time of sale ($38.25 per share maximum). MNO is an automotive parts manufacturer.

(3) *Exchange offer.* PQR, INC., 500 Second Ave., Cedar Rapids, Iowa 52401—168,000 shares of common stock. It is proposed to offer these shares in exchange for the outstanding common shares of Blank National Bank, Waterloo, Iowa at the rate of seven shares for each bank share. Also included in this statement are 160,000 shares of common stock, which may be issued in connection with future acquisitions of other businesses or properties. PQR is a bank holding company which controls four banks.

(4) *Rights offer.* VWX, INC., 1 Florida Ave., Tampa, Fla. 33602—409,249 shares of common stock. It is proposed to offer these shares for subscription by common stockholders of record June 15, at the rate of one share for each five shares held, and at $25 per share. Black & Co., Inc., 10 Chase Manhattan Plaza, New York, is principal underwriter. The company is a bank holding company with four banking subsidiaries.

(5) *Miscellaneous.* YZ ENTERPRISES, INC., 660 Wilshire Blvd., Los Angeles, Calif. 90057—732,812 shares of common stock. Of these shares, 276,719 were issued in connection with acquisitions made by the company; 15,000 are issuable upon exercise of options granted to Gray & Co.; 51,122 are reserved for issuance upon conversion of 5% convertible second mortgage bonds, due 1981; 119,700 were issued in private placements in 1969 and 270,271 are reserved for issuance upon conversion of outstanding 7% convertible subordinated guaranteed bonds, due 1990 of YZ International N.V., wholly-owned subsidiary of the company. The company operates 14 general hospitals.

(Sec. 19(a), 48 Stat. 85, Sec. 209, 48 Stat. 908, 15 U.S.C. 77s.)

All interested persons are invited to submit their views on the proposed rule, in writing, to Ronald F. Hunt, Secretary, Securities and Exchange Commission, Washington, D.C. 20549, to be received on or before August 22, 1973. All such communications will be available for

V 38-149
AUG 3 73
XUM

public inspection and should refer to File No. S7-487.

By the Commission.

[SEAL] RONALD F. HUNT, *Secretary.*

JULY 24, 1973.

[FR Doc.73-16019 Filed 8-2-73;8:45 am]

[Release No. 34-10297]

INDEPENDENT PUBLIC ACCOUNTANTS

Permission To Perform Preliminary Audit Procedures

The Securities and Exchange Commission announced today a proposal to amend Rule 17a-5 [17 CFR 240.17a-5] and Form X-17A-5 to permit independent public accountants to perform audit procedures prior to the audit or balance sheet date of the broker or dealer. This proposal arises out of the submission by the New York Stock Exchange of a proposal to eliminate the surprise audit requirement for its members and discussions with the NYSE and the Committee on Stockbrokerage Auditing of the AICPA.

To date all the major exchanges with the exception of the NYSE and the American Stock Exchange have made the surprise audit requirement optional for their members. Over the past several years questions have been raised regarding the value of the surprise audit as a regulatory requirement when balanced against the desirability of annual calendar or fiscal year end financial statements, which a surprise audit would normally preclude. Additionally, it has been asserted that the size of many broker-dealers, the practice of commencing a securities count a few days prior to the audit date and the existence of sophisticated electronic data processing systems have as practical matter, in many instances, eliminated the element of surprise. Finally, a number of broker-dealers, who because they are public companies, are required to file reports annually on Form 10K under the Securities Exchange Act of 1934 as well as Form X-17A-5 with the Commission and must undergo two audits annually. It is against this background that the Commission has determined to propose certain amendments to Rule 17a-5 under the Securities Exchange Act of 1934 and to the Audit Requirements of Form X-17A-5 which will alleviate the need for duplicate costs and reporting and which we believe will lead to more effective audits and more uniform reporting of financial data by brokers and dealers.

In announcing these proposed amendments, the Commission has clarified in this release the responsibilities of accountants with respect to the reporting of material inadequacies.

SUMMARY OF THE PROPOSED CHANGES

The proposed amendment to Rule 17a-5 would require the independent public accountant to notify the Regional Office of the Commission for the region in which the broker-dealer has its primary place of business any time that preliminary audit work which requires the filing of Part III of Form X-17A-5 is commenced and that forty-five (45) days thereafter the member, broker or dealer shall file a Report of Preliminary Examination with the appropriate regional office as required by paragraph (a)(2) of Rule 17a-5.

The proposal further would amend the audit requirements of Form X-17A-5 to permit the independent public accountant at his option to perform preliminary audit procedures with respect to his audit engagement. The amendment would not preclude the independent public accountant from performing such procedures on a surprise basis where in his judgment it is appropriate or otherwise limit the accountant in the scope of his preliminary procedures. The amendment would require the independent public accountant if he performed any of the audit procedures prescribed in Items 2, 3, 4, or 6(c)-(g), excluding Item 6(e)(v) of the Audit Requirements, to perform all such procedures as of the same date. Those procedures which would be required to be performed as of the same date would include the securities count and comparison of that count with the underlying books and records; verification of those items in transfer or transit; balancing of all positions in securities, spot and future commodities; and, confirming in writing customer accounts, accounts with broker-dealers or others and details of fails, securities borrowed or loaned; and, bank loans. The scope of the audit procedures would not be changed from present requirements. The proposal also requires that if the independent public accountant chooses to perform preliminary to the audit date the procedures set forth above, those procedures shall be performed not more than 100 days prior to the audit date.

Form X-17A-5 would be amended to require the member, broker or dealer to file 45 days after the date of the preliminary work Part III of Form X-17A-5 with a report signed by the independent public accountant which (1) describes the scope of the examination, (2) states that the statistical information required to be reported is fairly presented, and (3) comments upon any material inadequacies found to exist in the accounting system, the internal accounting control and procedures for safeguarding securities and indicates any corrective action taken or proposed which comments shall be based upon the scope of his preliminary work.

Part III requires the respondent member, broker or dealer to report securities differences both with and without related money differences, commodity differences, unreconciled items reflecting differences between money balances on requests for confirmations, including customers' statements and the appropriate general ledger control account and money differences reported in response to confirmation requests. In addition, the member, broker or dealer would be required to report aged fails, transfers and stock dividend data.

MATERIAL INADEQUACIES

The Audit Requirements of Form X-17A-5 as well as the proposed amendments to the Form provide that the independent public accountant shall, based upon his audit, comment upon any material inadequacies found to exist in: (a) The accounting system, (b) the internal accounting control, and (c) the procedures for safeguarding securities.

The Commission has received inquiries as to what constitutes a material inadequacy reportable under the above audit requirements. The determination of what constitutes a material inadequacy of necessity involves the application of judgment to specific factual circumstances and therefore the term is not subject to any all-encompassing or self-limiting definition. In an effort to provide some guidance to both the securities industry and the independent public accountants who serve that industry, the Commission has set forth below some tentative views in this regard. Comments are invited on the statements in the following paragraphs.

A material inadequacy which should be reported includes any material weakness which has substantially contributed to or, if appropriate corrective action is not taken, could reasonably be expected to substantially contribute to (1) severe operational problems, (2) material losses or misstatement of the broker's or dealer's financial statements, or (3) violations of the Commission's recordkeeping and financial responsibility rules.

In this regard, it is the Commission's view that both the public interest and the broker-dealer community are not properly served if weaknesses are considered material only after such inadequacies have resulted in substantial financial loss. Accordingly, it is incumbent upon the independent public accountant to report those weaknesses which the exercise of prudent judgment indicates could reasonably be expected to result in a substantially adverse impact if appropriate corrective action is not promptly taken. Further, it is the independent public accountant's responsibility to satisfy himself that the action taken or proposed is appropriate under the circumstances and if not, to reflect that opinion in his report. At a minimum, a severe operational problem is one that inhibits a broker or dealer from promptly completing securities transactions or promptly discharging his responsibilities to customers, other brokers or dealers or creditors. The Commission believes that it will normally be a rare occurrence when a severe operational problem does not have the very real potential to ultimately manifest itself in the form of either material losses, misstatements of the broker's or dealer's financial statements or violations of the Commission's recordkeeping or financial responsibility rules.

The Commission's view that material inadequacies reportable under Form X-17A-5 include those weaknesses related to operational problems and violations of the Commission's recordkeeping and financial responsibility rules takes cognizance of the independence public account ant's technical expertise and his integral functions within the regulatory framework of the securities industry. Accordingly, the Commission is of the belief that weaknesses in the practices or procedures used by a broker or dealer in complying with the recordkeeping and financial responsibility rules, shall be reported by the independent public accountant, irrespective of the financial position of the broker or dealer.

STATUTORY BASIS

The Commission proposes to adopt these amendments under the Securities Exchange Act of 1934, particularly sections 15(c)(3), 17(a), 10(b) and 23(a) thereof.

The text of the proposed amendments to Rule 17a-5 and Form X-17A-5 thereunder shall be as follows:

Paragraph (a)(2) shall be amended by adding a new subdivision (iv) at the end thereof and shall read as follows:

§ 240.17a-5 Reports to be made by certain exchange members, brokers, and dealers.

(a) Filing reports: (1) This rule shall apply to every member of a national securities exchange who transacts a business in securities directly with or for other than members of a national securities exchange, every broker or dealer registered pursuant to section 15 of the Act.

(2) Every member, broker or dealer subject to this rule shall file reports of financial condition containing the information required by Form X-17A-5, as follows: (i) A report shall be filed as of a date within each calendar year, except that (A) the first such report of a member, broker or dealer (other than one succeeding to and continuing the business of another member, broker or dealer) shall be as of a date not less than 1 nor more than 5 months after the date on which such member, broker or dealer becomes subject to this rule (in the case of a registered broker or dealer shall be the date the registration becomes effective) and (B) a member, broker or dealer succeeding to and continuing the business of another member, broker or dealer need not file a report as of a date in the calendar year in which the succession occurs if the predecessor member, broker or dealer has filed a Form X-17A-5 report in compliance with this rule as of a date in such calendar year; (ii) such reports shall be filed not more than sixty (60) days after the date of the report of financial condition; (iii) reports for any 2 consecutive years shall not be as of dates within 4 months of each other; and, (iv) the independent public accountant shall on the date on which a preliminary audit examination commences, if the audit procedures performed are required to be reported in Part III of Form X-17A-5, notify in writing the Regional Office of the Commission for the region in which the member, broker or dealer has its principal place of business that such preliminary audit examination has commenced and shall file as required by paragraph (a)(2), of this section not later than 45 days thereafter, Part III of Form X-17A-5, Report on Preliminary Audit Examination.

The Audit Requirements of Form X-17A-5 shall be amended by inserting a new paragraph after the first full paragraph of those requirements as follows. The audit shall be made in accordance with generally accepted auditing standards and shall include a review of the accounting system, the internal accounting control and procedures for safeguarding securities including appropriate tests thereof for the period since the prior examination date. It shall include all procedures necessary under the circumstances to substantiate the assets and liabilities and securities and commodities positions as of the date of the response to the financial questionnaire and to permit the expression of an opinion by the independent public accountant as to the financial condition of the respondent at that date. Based upon such audit, the accountant shall comment upon any material inadequacies found to exist in the accounting system, the internal accounting control and procedures for safe guarding securities, and shall indicate any corrective action taken or proposed. These comments may be submitted in a supplementary certificate and filed pursuant to Rule 17a-5(b)(3).

The independent public accountant may perform audit procedures at any time which he may deem appropriate; however, if the procedures prescribed in Items 2, 3, 4 and 6 (c) through (g), excluding Item 6(e)(v), are performed at a date other than the audit date, then such aforementioned procedures shall be performed as of the same preliminary audit date which shall not be more than 100 days prior to the audit date.

Form X-17A-5 shall be amended by adding after Part II a new Part III which shall be entitled Report on Preliminary Audit Examination and shall read as follows:

PART III

REPORT ON PRELIMINARY AUDIT EXAMINATION

(a) The accountant shall submit a report which (1) describes the scope of the examination, (2) states that the statistical information in the Report of Preliminary Audit Examination fairly presents the result of the physical examination and comparison of securities and confirmation of accounts and balances with customers, brokers and others, and (3) based upon the scope of his preliminary examination, comments upon any material inadequacies found to exist in the accounting system, the internal accounting control and procedures for safeguardin gsecurities and indicates any corrective action taken or proposed.

(b) The following questions shall be answered by the respondent:

1. Securities (Note 2)	No. of Items	(Note 1) Market Value Long	(Note 1) Market Value Short	(Note 1) Money Balance Debit	(Note 1) Money Balance Credit
(a) Securities differences without differences in related money balances: (i) Long (ii) Short				(b) Securities differences: (i) Long and related money (ii) Short and related money	
2. Commodities (Note 3)	No. of Items	(Note 1) Market Value Long	(Note 1) Market Value Short	(Note 1) Debit Credit Debit	(Note 1) Debit Credit Credit
(a) Number and amount of unresolved reconciling money items: (i) Debit (ii) Credit (b) Number and market value of unresolved future contract differences after comparison and balancing with proprietary and customers' positions: (i) Long (ii) Short					
3. Money Balances	No. of Items	(Note 1) Market Value Long	(Note 1) Market Value Short	(Note 1) Money Balances Debit	(Note 1) Money Balances Credit

V 38-149 AUG 3 73 XUM

(a) Unreconciled items reflecting difference between money balances on requests for confirmations, including customers' statements, and the appropriate general ledger control accounts:

(i) Debit.

(ii) Credit.

(b) Number and amount of money differences reported in response to confirmation requests:

(i) Debit

(ii) Credit

4. Aged Fails as of the date of the fail confirmations:

(a) Number of items, ledger debit balances and long security valuations of fails to deliver:

(i) 40 to 49 days old

(ii) 50 to 59 days old

(iii) 60 days or more

(b) Number of items, ledger credit balances and short security valuation of fails to receive over 30 days old.

(c) Number of items and market value of transfer positions over 40 days old which had not been confirmed in writing within such 40 day period by the transfer agent.

(d) Number of items and market value of stock dividends and similar distributions receivable outstanding more than 30 days after payable date.

Notes:

(1) The terms long and short as used in reporting securities and commodity differences shall reflect the differences on the securities or commodities records of the respondent. The terms debit and credit as used in reporting money differences shall reflect potential losses to the respondent or liability of the respondent to unknown parties, respectively.

(2) The amounts reported under securities, commodities and money balances shall be those items which have not been satisfactorily resolved as of the date of this report and with respect to security differences shall include, but not necessarily be limited to, the following:

(a) Securities count differences;

(b) Differences between the positions reflected in the requests for confirmation, including customers' accounts, and the securities record.

(c) Differences reported in response to requests for confirmation, except that immaterial differences reported in responses to confirmation of customers' accounts may be excluded;

(d) Differences between securities positions as reflected in the trading and investment accounts of the respondent and the securities record.

(e) Any securities positions which were reflected on the securities record at the preliminary examination date which were not susceptible to either count or confirmation (but shall not include dividend payable);

(3) Differences reported under commodities shall include commodities cleared on an exchange and commodities cleared through another member, broker or dealer.

Comments on the above proposal are invited and should be submitted to Ronald F. Hunt, Secretary, Securities and Exchange Commission, 500 North Capitol Street, N.W., Washington, D.C. 20549. All comments should bear the file No. S7-489 and be received no later than September 4, 1973.

By the Commission.

[SEAL] RONALD F. HUNT,
Secretary.

JULY 25, 1973.

[FR Doc.73-16021 Filed 8-2-73;8:45 am]

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[24 CFR Part 135]

[Docket No. R-73-100]

EMPLOYMENT OPPORTUNITIES FOR BUSINESSES AND LOWER INCOME PERSONS IN CONNECTION WITH ASSISTED PROJECTS

Notice of Proposed Rulemaking

The purpose of this amended proposed rulemaking is to provide further opportunity for comment upon procedures to be established by the Secretary of Housing and Urban Development for carrying out his responsibilities to provide employment opportunities for businesses and lower income persons in connection with assisted projects, under section 3 of the Housing and Urban Development Act of 1968, 12 U.S.C. 1701u. Notice of a proposed amendment to Title 24 of the Code of Federal Regulations to include a new Part 76 entitled "Employment Opportunities for Businesses and Lower Income Persons Within the Project Locale" was published in the FEDERAL REGISTER on June 18, 1971 (36 FR 11744). A large number of comments has been received from interested parties and careful consideration was given to each. This amended proposed rulemaking embodies several major changes identified below and a number of minor changes identifiable by careful comparison of the June 18, 1971 proposal and the proposal published below.

The major changes are:

1. The part number has been changed to 135 to reflect the recodification of Title 24.

2. The definitions of eligible businesses have been modified for greater specificity.

3. Section 135.5(m) has been amended to exempt certain small contracts, subcontracts and projects.

4. Section 135.15(a)(3) now explains which officials make the determination that goals cannot be met within a section 3 covered project area.

5. Since the Project Area Map of § 135.15(b) is no longer deemed necessary, all references to it have been deleted.

6. Section 135.45 has been amended to clarify that the number of trainees or apprentices for an occupation shall in no event be less than the minima established by the Secretary of Labor.

7. Section 135.70 now contains a good faith effort provision paralleling that of Subpart C, as well as a clarification of the responsibilities for notifying concerns listed on the Department's registry of businesses which meet the definitions of § 135.5 (b) and (c).

8. Section 135.125 now contains a provision expressly revoking and superseding previous Departmental regulations, procedures, and circulars purporting to implement Section 3.

9. A new § 135.135 has been added pertaining to sanctions and penalties.

Because of these changes the Department deems it necessary to republish this regulation for further comment. Interested persons are invited to participate in the making of the proposed rule by submitting written data, views or statements with regard to the proposed regulation. Communications should be filed in triplicate, using the above docket number and title, with the Rules Docket Clerk, Office of General Counsel, Room 10256, Department of Housing and Urban Development, 451 7th Street, SW., Washington, D.C. 20410. All relevant material received on or before September 5, 1973 will be considered by the Secretary before taking action on the proposal. Copies of comments submitted will be available during business hours, both before and after the specified closing date, at the above address, for examination by interested persons.

The proposed Part 135 reads as follows:

PART 135—EMPLOYMENT OPPORTUNITIES FOR BUSINESSES AND LOWER INCOME PERSONS IN CONNECTION WITH ASSISTED PROJECTS

Subpart A—General

Sec.
135.1 Purpose and scope of part.
135.5 Definitions.
135.10 Delegation to Assistant Secretary for Equal Opportunity.
135.15 Determination of the area of a section 3 covered project.
135.20 Assurance of compliance with regulations.
135.25 Bidding and negotiation requirements.
135.30 Other applicant and recipient obligations.
135.35 Effectuation of applicant obligations in direct and indirect relationships.

Subpart B—Utilization of Lower Income Area Residents as Trainees

135.40 General.
135.45 Establishing number of trainees.
135.50 Good faith effort.

Subpart C—Utilization of Lower Income Area Residents as Employees

135.55 General.
135.60 Good faith effort.

Subpart D—Utilization of Business Located in or Owned in Substantial Part by Persons Residing in the Area

135.65 General.
135.70 Development of an affirmative action plan.

Subpart E—Participation in Approved Programs

135.75 Participation as evidence of compliance with section 3 requirements.

Subpart F—Grievance and Compliance Review

135.80 Who may file grievance.
135.85 Content of grievance filings.
135.90 Form of grievance filings.
135.95 Place of filing.
135.100 Time of filing.

Sec.
135.105 Processing of grievance filings.
135.110 Hearings.
135.115 Compliance reviews and procedures.

Subpart G—Miscellaneous

135.120 Reporting and recordkeeping.
135.125 Implementing procedures and instructions.
135.130 Labor standards.
135.135 Sanctions.
135.140 Effective date.

AUTHORITY: Section 3 of the Housing and Urban Development Act of 1968, 12 U.S.C. 1701u, and sec. 7(d), Department of HUD Act, 42 U.S.C. 3535(d).

Subpart A—General

§ 135.1 Purpose and scope of part.

(a) The regulations set forth in this part contain the procedures established by the Secretary of Housing and Urban Development for carrying out his responsibilities under section 3 of the Housing and Urban Development Act of 1968, 12 U.S.C. 1701u. That section requires that: In the administration by the Secretary of Housing and Urban Development of programs providing direct financial assistance in aid of housing, urban planning, development, redevelopment, or renewal, public or community facilities, and new community development, the Secretary shall—

(1) Require, in consultation with the Secretary of Labor, that to the greatest extent feasible opportunities for training and employment arising in connection with the planning and carrying out of any project assisted under any such program be given to lower income persons residing in the area of such project; and

(2) Require, in consultation with the Administrator of the Small Business Administration, that to the greatest extent feasible contracts for work to be performed in connection with any such project be awarded to business concerns, including but not limited to individuals or firms doing business in the field of planning, consulting, design, architecture, building construction, rehabilitation, maintenance, or repair, which are located in or owned in substantial part by persons residing in the area of such project.

(b) In the development of these regulations the Secretary has consulted with the Secretary of Labor and the Administrator of the Small Business Administration and mutual agreement has been reached with respect to the coordination of employment and training efforts and contracts awards under these regulations by the Department of Housing and Urban Development, the Department of Labor, and the Small Business Administration.

(c) The regulations as set forth in this part, particularly subparts C and D of this part, shall serve to define "to the greatest extent feasible" as that term is applied in section 3 of the Housing and Urban Development Act of 1968.

(d) The Secretary will issue such further regulations in connection with his responsibilities under section 3 of the Housing and Urban Development Act of 1968, as he finds appropriate and may, as needed, amplify any regulations issued pursuant to section 3, through guidelines, handbooks, circulars, or other means.

§ 135.5 Definitions.

As used in this part—

(a) "Applicant" means any entity seeking assistance for a section 3 covered project including, but not limited to mortgagors, developers, local public bodies, nonprofit or limited dividend sponsors, builders, or property managers.

(b) "Business concerns located within the section 3 covered project area" means those individuals or firms located within the relevant section 3 covered project area as determined pursuant to § 135.15, listed on the Department's registry of eligible business concerns, and which qualify as small under the small business size standards of the Small Business Administration.

(c) "Business concerns owned in substantial part by persons residing in the section 3 covered project area" means those business concerns which are 51 percent or more owned by persons residing within the relevant section 3 covered project as determined pursuant to § 135.15, owned by persons considered by the Small Business Administration to be socially or economically disadvantaged, listed on the Department's registry of eligible business concerns, and which qualify as small under the small business size standards of the Small Business Administration.

(d) "Contracting party" means any entity which contracts with a contractor for the performance of work in connection with a section 3 covered project.

(e) "Contractor" means any entity which performs work in connection with a section 3 covered project.

(f) "Department" means the Department of Housing and Urban Development.

(g) "Lower income resident of the area" means any individual who resides within the area of a section 3 covered project and whose family income does not exceed 90 percent of the median income in the Standard Metropolitan Statistical Area (or the county if not within an SMSA) in which the section 3 covered project is located.

(h) "Political jurisdiction" means a politically organized community with a governing body having general governmental powers.

(i) "Recipient" means any entity who received assistance for a section 3 covered project including, but not limited to, mortgagors, developers, local public bodies, nonprofit or limited dividend sponsors, builders or property managers.

(j) "Secretary" means the Secretary of Housing and Urban Development.

(k) "Section 3" means section 3 of the Housing and Urban Development Act of 1968, 12 U.S.C. 1701u.

(l) "Section 3 clause" means the contract provisions set forth in § 135.20(b).

(m) "Section 3 covered project" means any nonexempt project assisted by any program administered by the Secretary in which loans, grants, subsidies, or other financial assistance are provided in aid of housing, urban planning, development, redevelopment, or renewal, public or community facilities, and new community development (except where the financial assistance available under such program is solely in the form of insurance or guaranty). Projects, contracts, and subcontracts, connected with programs administered by the Secretary under section 235 and 236 of the National Housing Act, as well as any Public Housing program and which do not exceed $500,000 in estimated cost are exempted from the requirements of this part, as is any subcontract of $50,000 or under on such projects or contracts in excess of $500,000.

(n) "Subcontractor" means any entity (other than a person who is an employee of the contractor) which has agreed or arranged with a contractor to undertake a portion of the contractor's obligation or the performance of work in connection with a section 3 covered project.

§ 135.10 Delegation to Assistant Secretary for Equal Opportunity.

Except as otherwise provided in this part, the functions of the Secretary referred to herein are delegated to the Assistant Secretary for Equal Opportunity.

§ 135.15 Determination of the area of a section 3 covered project.

(a) The area of a section 3 covered project shall be determined as follows:

(1) The boundaries of a section 3 covered project located:

(i) Within a geographic area designated as an urban renewal area pursuant to the provisions of title I of the Housing Act of 1949, 42 U.S.C. 1450; or

(ii) Within a geographic area designated as Model Cities areas or Metropolitan Development Plan areas pursuant to the provisions of title I of the Demonstration Cities and Metropolitan Development Act of 1966, 42 U.S.C. 3301, or

(iii) Within a geographic area designated as an Indian reservation (to include all territory within reservation boundaries including fee patented roads, waters, bridges and lands used for agency purposes), shall be coextensive with the boundaries of that geographic area.

(2) The boundaries of a section 3 covered project not located within a geographic area designated pursuant to title I of the Housing Act of 1949, or title I of the Demonstration Cities and Metropolitan Development Act of 1966 shall be coextensive with the boundaries of the smallest political jurisdiction in which the project is located.

(3) To the extent that goals (established pursuant to Subparts B, C, and D of this part) cannot be met within a section 3 covered project area as determined pursuant to subparagraph (1) of this paragraph, the boundaries of the smallest political jurisdiction in which the section 3 covered project is located shall be designatel as the relevant section 3 covered project area. The determination to apply this subparagraph shall be made by the Assistant Secretary for Equal Opportunity or by the same official

V 38-149 AUG 3 73 XUM

designated by the Assistant Secretary for Equal Opportunity to determine the section 3 covered project area pursuant to subparagraph (1) of this paragraph.

(b) The Department's Regional Administrator, Area Office Director, or FHA Insuring Office Director, as appropriate, shall determine the boundaries of each section 3 covered project.

§ 135.20 Assurance of compliance with regulations.

(a) Every contract or agreement for a grant, loan, subsidy, or other direct financial assistance in aid of housing, urban planning, development, redevelopment, or renewal, public or community facilities, and new community development, entered into by the Department of Housing and Urban Development with respect to a section 3 covered project shall contain provisions requiring the applicant or recipient to carry out the provisions of section 3, the regulations set forth in this part, and any applicable rules and orders of the Department issued thereunder prior to approval of its application for assistance for a section 3 covered project.

(b) Every applicant, recipient, contracting party, contractor, and subcontractor shall incorporate, or cause to be incorporated, in all contracts for work in connection with a section 3 covered project, the following clause (referred to as a section 3 clause):

A. The work to be performed under this contract is on a project assisted under a program providing direct Federal financial assistance from the Department of Housing and Urban Development and is subject to the requirements of section 3 of the Housing and Urban Development Act of 1968, as amended, 12 U.S.C. 1701u. Section 3 requires that to the greatest extent feasible opportunities for training and employment be given lower income residents of the project area and contracts for work in connection with the project be awarded to busines concerns which are located in, or owned in substantial part by persons residing in the area of the project.

B. The parties to this contract will comply with the provisions of said section 3 and the regulations issued pursuant thereto by the Secretary of Housing and Urban Development set forth in 24 CFR ____, and all applicable rules and orders of the Department issued thereunder prior to the execution of this contract. The parties to this contract certify and agree that they are under no contractual or other disability which would prevent them from complying with these requirements.

C. The contractor will send to each labor organization or representative of workers with which he has a collective bargaining agreement or other contract or understanding, if any, a notice advising the said labor organization or workers' representative of his commitments under this section 3 clause and shall post copies of the notice in conspicuous places available to employees and applicants for employment or training.

D. The contractor will include this section 3 clause in every subcontract for work in connection with the project and will, at the direction of the applicant for or recipient of Federal financial assistance, take appropriate action pursuant to the subcontract upon a finding that the subcontractor is in violation of regulations issued by the Secretary of Housing and Urban Development, 24 CFR ____. The contractor will not subcontract with any subcontractor where it has notice or knowledge that the latter has been found in violation of regulations under 24 CFR ____ and will not let any subcontract unless the subcontractor has first provided it with a preliminary statement of ability to comply with the requirements of these regulations.

E. Compliance with the provisions of section 3, the regulations set forth in 24 CFR ____, and all applicable rules and orders of the Department issued thereunder prior to the execution of the contract, shall be a condition of the Federal financial assistance provided to the project, binding upon the applicant or recipient for such assistance, its successors, and assigns. Failure to fulfill these requirements shall subject the applicant or recipient, its contractors and subcontractors, its successors, and assigns to those sanctions specified by the grant or loan agreement or contract through which Federal assistance is provided, and to such sanctions as are specified by 24 CFR ____, 135.

§ 135.25 Bidding and negotiation requirements.

(a) Every applicant and recipient shall require prospective contractors for work in connection with section 3 covered projects to provide, prior to the signing of the contract, a preliminary statement of work force needs (skilled, semiskilled, unskilled labor and trainees by category) where known; where not known, such information shall be supplied prior to the signing of any contract between contractors and their subcontractors.

(b) When a bidding procedure is used to let the contract, the invitation or solicitation for bids shall advise prospective contractors of the requirements of these regulations. When the contract is let pursuant to negotiation or methods other than formal bidding procedures, prospective contractors shall be advised by the contracting party of the requirements of these regulations as part of the contract specifications.

§ 135.30 Other applicant and recipient obligations.

Every applicant and recipient shall assist and actively cooperate with the Secretary in obtaining the compliance of their contractors and subcontractors with the requirements of these regulations, including cooperation and assistance in distributing and collecting forms and information, and in notifying contracting parties and contractors of violations of these regulations, and shall refrain from entering into any contract with any contractor after notification by the Department that the contractor has been found in violation of these regulations pursuant to § 135.110(j).

§ 135.35 Effectuation of applicant obligations in direct and indirect relationships.

(a) Where the applicant for assistance under a section 3 covered project and the recipient of such assistance are not one and the same, the recipient shall be regarded as the successor in interest of the applicant and shall have the same obligations as the applicant with respect to compliance with these regulations. These obligations shall be incorporated, specifically or by reference in the loan or grant agreement or other contract or agreement through which the assistance is provided to the recipient.

(b) Where the applicant or recipient itself will perform all or part of the work in connection with a section 3 covered project within the meaning of these regulations, with either permanent or temporary staff by force account, it will provide the Department with all forms and assurances required of a contractor or subcontractor by these regulations prior to the execution of any loan or grant agreement or other contract or agreement through which assistance is provided.

(c) Where the applicant, recipient or contractor sells, leases, transfers or otherwise conveys land upon which work in connection with a section 3 covered project within the meaning of these regulations is to be performed (for example, under the Urban Renewal or Neighborhood Development program), it shall include in each contract or subcontract for work on such land a clause requiring the purchaser, lessee, or redeveloper to assume the same obligations as a contractor for work under section 3 of these regulations (including the incorporation of the Assurance of Compliance language specified in § 135.20).

(d) Each such purchaser, lessee, or redeveloper shall be relieved of such obligations upon satisfactory completion of all work to be performed under the terms of the redevelopment contract.

Subpart B—Utilization of Lower Income Area Residents as Trainees

§ 135.40 General.

Each applicant, recipient, contractor or subcontractor undertaking work in connection with a section 3 covered project shall fulfill his obligation to utilize lower income project area residents as trainees to the greatest extent feasible by:

(a) Utilizing the maximum number of persons in the various training categories in all phases of the work to be performed under the section 3 covered project; and

(b) Filling all vacant training positions with lower income project area residents except for those training positions which remain unfilled after a good faith effort has been made to fill them with eligible lower income project area residents.

§ 135.45 Establishing number of trainees.

(a) For the building construction occupations, the number of trainees or apprentices for each occupation shall be that number which can reasonably be utilized in each occupation on each phase of a section 3 covered project and in no event shall that number be less than the number of trainees or apprentices determined pursuant to regulations issued by the Secretary of Labor for each building construction occupation.

(b) For nonconstruction occupations or for any building construction occupations for which ratios are not determined pursuant to regulations of the Secretary of Labor, the number of trainees for each occupation shall be that number which can reasonably be utilized in each occupation on each phase of a section 3 covered project. The applicant, recipient, contractor, or subcontractor shall initially determine the maximum number of trainees for each occupation and submit that determination along with its justification to the Department.

§ 135.50 Good faith effort.

(a) Each applicant, recipient, contractor, or subcontractor seeking to establish that a good faith effort as required by § 135.40 has been made to fill all training positions with lower income area residents shall, as a minimum, set forth evidence acceptable to the Secretary that it has:

(1) Ascertained from the Department's Regional Administrator, Area Office Director, or FHA Insuring Office Director having jurisdiction over the section 3 covered project, the boundaries of the section 3 covered project area; and

(2) Attempted to recruit from the appropriate areas the necessary number of lower income residents through: Local advertising media, signs placed at the proposed site for the project, and community organizations and public or private institutions operating within or serving the project area such as Service Employment and Redevelopment (SER), Opportunities Industrialization Center (OIC), Urban League, Concentrated Employment Program, or the U.S. Employment Service.

(3) Maintain a list of all lower income area residents who have applied either on their own or on referral from any source, and employ such persons, if otherwise eligible and if a trainee vacancy exists. If the contractor has no vacancies, the applicant, if otherwise eligible, shall be listed for the first available vacancy.

(b) Any applicant, recipient, contractor, or subcontractor which fills vacant § 135.45 apprentice or trainee positions in its organization immediately prior to undertaking work pursuant to a section 3 covered project shall set forth evidence acceptable to the Secretary that its actions were not an attempt to circumvent these regulations.

Subpart C—Utilization of Lower Income Area Residents as Employees

§ 135.55 General.

Each applicant, recipient, contractor or subcontractor undertaking work in connection with a section 3 covered project shall fulfill his obligation to utilize lower income project area residents as employees to the greatest extent feasible by:

(a) Identifying the number of positions in the various occupational categories including skilled, semiskilled, and unskilled labor, needed to perform each phase of the section 3 covered project;

(b) Identifying, of the positions identified in paragraph (a) of this section, the number of positions in the various occupational categories which are currently occupied by regular, permanent employees;

(c) Identifying, of the positions identified in paragraph (a) of this section, the number of positions in the various occupational categories which are not currently occupied by regular, permanent employees;

(d) Establishing, of the positions identified in paragraph (c) of this section, a goal which is consistent with the purpose of this subpart within each occupational category of the number of positions to be filled by lower income residents of the section 3 covered project area; and

(e) Making a good faith effort to fill all of the positions identified in paragraph (d) of this section with lower income project area residents.

§ 135.60 Good faith effort.

(a) Each applicant, recipient, contractor, or subcontractor seeking to establish that a good faith effort as required by paragraph (e) of § 135.55 has been made to fill all employment positions identified in paragraph (d) of § 135.55 with lower income project area residents shall, as a minimum, set forth evidence acceptable to the Secretary that it has:

(1) Ascertained from the Department's Regional Administrator, Area Office Director, or FHA Insuring Office Director having jurisdiction over the section 3 covered project the boundaries of the section 3 covered project area; and

(2) Attempted to recruit from the appropriate areas the necessary number of lower income residents through: Local advertising media, signs placed at the proposed site for the project, and community organizations and public or private institutions operating within or serving the project area such as Project Area Committees (PAC) in urban renewal areas, Model Cities citizen advisory boards, Service Employment and Redevelopment (SER), Opportunities Industrialization Center (OIC), Urban League, Concentrated Employment Program, or the U.S. Employment Service.

(b) Any applicant, recipient, contractor, or subcontractor which fills vacant § 135.55(d) employment positions in its organization immediately prior to undertaking work pursuant to a section 3 covered contract shall set forth evidence acceptable to the Secretary that its actions were not an attempt to circumvent these regulations.

(c) When lower income resident workers apply, either on their own initiative or on referral from any source, the recipient, contractor, or subcontractor shall determine the qualifications of such persons and shall employ such persons if their qualifications are satisfactory and the contractor has openings. If the recipient, contractor, or subcontractor is unable to employ the workers, such persons shall be listed for the first available opening.

Subpart D—Utilization of Business Located in or Owned in Substantial Part by Persons Residing in the Area

§ 135.65 General.

Each applicant, recipient, contractor, or subcontractor undertaking work on a section 3 covered project shall assure that to the greatest extent feasible, contracts for work to be performed in connection with the project are awarded to business concerns located within the section 3 covered project area or business concerns owned in substantial part by persons residing in the section 3 covered area. The Department, in consultation with the Small Business Administration will establish for the section 3 covered project area a registry of business concerns which meet the definition contained in § 135.5(b) and (c) of these regulations. Each applicant, recipient, contractor, or subcontractor undertaking work in connection with a section 3 covered project shall fulfill his obligations to utilize business concerns located within or owned in substantial part by persons residing in the section 3 covered project area by developing and implementing an affirmative action plan.

§ 135.70 Development of an affirmative action plan.

In developing an affirmative action plan, each applicant, recipient, contractor, and subcontractor preparing to undertake work pursuant to a section 3 covered contract shall:

(a) Set forth the approximate number and dollar value of all contracts proposed to be awarded to all businesses within each category (type or profession) over the duration of the section 3 covered project in question.

(b) Analyze the information set forth in paragraph (a) of this section and the availability of eligible business concerns within the project area doing business in professions or occupations identified as needed in paragraph (a), of this section, and set forth a goal or target number and estimated dollar amount of contracts to be awarded to the eligible businesses and entrepreneurs within each category over the duration of the section 3 covered project.

(c) Outline the anticipated program to be used to achieve the goals for each business and/or professional category identified. This program should include but not be limited to the following actions:

(1) Insertion in the bid documents, if any, of the affirmative action plan of the applicant, recipient, contractor, or subcontractor letting the contract; and

(2) Identification within the bid document, if any, of the applicable section 3 project area.

(d) Indicate the anticipated process and steps which have been taken and/or will be taken to secure the cooperation of contractors, subcontractors, and unions in meeting the goals and carrying out the affirmative action plan developed pursuant to this subpart.

(e) Take steps to insure that the appropriate business concerns included in the Department's registry for the section 3 covered project area are notified of pending contractual opportunities either personally or through locally utilized media. All applicants, recipients, contractors and subcontractors which so notify concerns included in the Department's registry of available contracts and

V 38-149 AUG 3 73 XUM

of opportunities to submit bids shall satisfy all requirements of this Part for notification of business concerns located within the section 3 covered project area and business concerns owned in substantial part by persons residing in the section 3 covered project area.

(f) Take steps to insure that contracts which are typically let on a negotiated rather than a bid basis in areas other than section 3 covered project areas, are also let on a negotiated basis, whenever feasible, when let in a section 3 covered project area.

(g) Where competitive bids are solicited, require the bidders to submit their utilization goals, and their affirmative action plans for accomplishing their goals, and in evaluating each bid, to determine its responsiveness, carefully evaluate the bidder's submission to determine whether the affirmative action plan proposed will accomplish the stated goals.

(h) Where advantageous, seek the assistance of local officials of the Department in preparing and implementing the affirmative action plan.

(i) In implementing its affirmative action plan, each applicant, recipient, contractor, or subcontractor shall make a good faith effort to achieve its goal or target number and estimated dollar amount of contracts to be awarded to the eligible businesses and entrepreneurs within each category over the duration of the section 3 covered project. Each applicant, recipient, contractor, or subcontractor seeking to establish that a good faith effort has been made to implement its affirmative action plan, as required by this paragraph, shall as a minimum, set forth evidence acceptable to the Secretary that it has implemented the steps required by paragraphs (c), (d), (e), (f), (g), and (h) of this section and has ascertained from the Department's Regional Administrator, Area Office Director, or FHA Office Director having jurisdiction over the section 3 covered project, the boundaries of the section 3 covered project area, if available, and attempted to recruit from the appropriate areas the necessary eligible business concerns through: Local advertising media, signs placed at the proposed site for the project; and community organizations and public or private institutions operating within or serving the project area such as Project Area Committees (PAC) in urban renewal areas, Model Cities citizen advisory boards, Service Employment and Redevelopment (SER), Opportunities Industrialization Center (OIC), Urban League, Concentrated Employment Program, or the U.S. Employment Service, as well as the Chamber of Commerce and any equivalent organizations in the section 3 covered project area.

Subpart E—Participation in Approved Programs

§ 135.75 Participation as evidence of compliance with section 3 requirements.

Any applicant, recipient, contractor, or subcontractor may fulfill his obligations under Subparts B, C, and D of this part, respectively, to utilize lower income project area residents as trainees or employees on section 3 covered projects, and to award contracts to business concerns located in, or owned in substantial part by residents of, section 3 covered project areas by presenting evidence satisfatory to the Secretary that he is a cooperating participant in a federally assisted or other public program approved by the Department of Housing and Urban Development which provides training, employment, and/or business opportunities to lower income persons and business concerns which meet the definition in § 135.5 (b) and (c). The Secretary shall, from time to time, make public a list of those training, employment, and/or business opportunity programs approved by the Department.

Subpart F—Grievance and Compliance Review

§ 135.80 Who may file grievance.

Any lower income resident of the project area, for himself or as a representative of persons similarly situated, seeking employment or training opportunities with an applicant, recipient, contractor, or subcontractor, or any business concern located in, or owned in substantial part by persons residing within a project area seeking contract opportunities from any applicant recipient, contractor, or subcontractor, for itself or as a representative of persons or firms similarly situated, may personally or by an authorized representative file a grievance alleging noncompliance with section 3, these regulations, or obligations undertaken pursuant thereto.

§ 135.85 Content of grievance filings.

(a) The grievance should include: (1) The name and address of the grievant, (2) the name and address of the grievant's business, if applicable, (3) the name and address of the applicant, recipient, contractor, or subcontractor (in this subpart called "respondent"), (4) a description of the acts or omissions giving rise to the grievance, and (5) the corrective action sought.

(b) Where a grievance contains incomplete information, the Secretary shall seek promptly the needed information from the grievant. In the event such information is not furnished to the Secretary within sixty (60) days of the date of such request, the grievance may be closed.

§ 135.90 Form of grievance filings.

Each grievance shall be in writing and signed.

§ 135.95 Place of filing.

A grievance may be filed by mailing it to the Assistant Secretary for Equal Opportunity, Department of Housing and Urban Development, Washington, D.C. 20410, or by presenting it at any Regional Office, Area Office, or FHA Insuring Office of the Department. Any employee of the Department receiving a grievance shall forward the same directly to the Assistant Secretary for Equal Opportunity.

§ 135.100 Time of filing.

A grievance must be filed not later than ninety (90) days from the date of the action (or omission) upon which the grievance is based, unless the time for filing is extended by the Secretary upon good cause shown.

§ 135.105 Processing of grievance filings.

(a) Upon receipt of a grievance a copy thereof shall be furnished the respondent by certified mail or through personal service.

(b) The Secretary shall conduct an investigation of each grievance filed, and shall give notice in writing to the grievant and the respondent as to whether he intends to resolve it.

(c) Notwithstanding paragraphs (a) and (b) of this section, where the allegations of a grievance on their face, or as amplified by the statements of the grievant, disclose that the grievance is not timely filed or otherwise fails to state a valid claim for relief under these regulations or any other authority within the jurisdiction of the Department, the Secretary may dismiss the grievance without further action. To the extent that Executive Order 11246 relating to Equal Opportunity in Employment applies to the subject matter of the grievance, the procedures required by applicable regulations implementing that order shall be followed.

(d) If the Secretary decides not to resolve a grievance, or to dismiss it under paragraph (c) of this section, he shall advise the grievant of the disposition of his grievance. Respondent shall also be notified in any case where he has been served with a copy of the grievance.

(e) Any party adversely affected by a determination under paragraph (b) or (c) of this section may, within 5 days of receipt of a notice of determination, request that the Secretary reconsider his action. Such requst for reconsideration will be granted only on the basis of additional material evidence not previously available to the party requesting reconsideration or for other good cause shown.

(f) If the Secretary decides to resolve a grievance, he shall endeavor to eliminate or correct the matters complained of in the grievance by informal methods of conference, conciliation, and persuasion.

(g) In conciliating a grievance, the Secretary shall attempt to achieve a just resolution of the grievance including (1) specific relief for the grievant, (2) affirmative actions by the respondent to relieve the effects of past violation and preclude the occurence of future violation, and (3) appropriate reporting requirements. Notice of a proposed disposition of a grievance and of the terms of a proposed settlement, if any, shall be given to the parties, or their representatives, by the Secretary, in writing. If satisfactory, the proposed settlement shall be signed by the grievant and the respondent or their representatives and approved by the Secretary. The Secretary may, from time to time, review compliance with the terms of any settlement

agreement and may, upon a finding of noncompliance, reopen the grievance or take such enforcement action as is provided for under the settlement agreement or as may otherwise be appropriate.

(h) Should a respondent fail or refuse to confer with the Secretary or fail or refuse to make a good faith effort to resolve the grievance, or should the Secretary find for any other reason that voluntary agreement is not likely to result, the Secretary may terminate his efforts to conciliate the dispute. In the latter event the parties shall be notified promptly, in writing, that such efforts have been unsuccessful.

(i) If the Department is unable to obtain voluntary compliance, the Secretary shall advise the grievant and the parties in writing of his proposed resolution of the grievance. Such resolution shall become final and binding on the parties, unless within 15 days after the receipt of notification, either party files with the Secretary a written request for a hearing on the matter.

§ 135.110 Hearings.

(a) Whenever a hearing is requested, reasonable notice shall be given by registered or certified mail, return receipt requested, to the parties. This notice shall advise the parties of the action proposed to be taken, the specific provision under which the proposed action is to be taken, and the matters of fact or law asserted as the basis for this action. In addition, it shall either (1) fix a date not less than 20 days after the date of such notice within which the parties may request of the Secretary that the matter be scheduled for hearing or (2) advise the parties that the matter in question has been set down for hearing at a stated time and place. The time and place so fixed shall be subject to change for cause. The requesting party may waive a hearing and in lieu thereof submit written information and argument for the record. The failure of the requesting party to appear at a hearing for which a date has been set shall be deemed to be a waiver of the right to a hearing and consent to the making of a decision on the basis of such information as is available.

(b) Hearings shall be held in or near the section 3 covered project area in question, or at such other location as will serve the convenience of parties and witnesses, at a time fixed by the Secretary. Hearings shall be held before the Secretary or, at his discretion, before a hearing examiner designated in accordance with 5 U.S.C. 3105 and 3344.

(c) In all proceedings under this section, the respondent and grievant, if any, shall have the right to be represented by counsel.

(d) The hearing, decision, and any administrative review thereof shall be conducted in conformity with 5 U.S.C. 554–557, and in accordance with such rules of procedure issued by HUD as are proper relating to the conduct of the hearing, the issuance of notice except that provided in paragraph (a) of this section, the taking of testimony, exhibits, arguments, and briefs, requests for findings, and other related matters. HUD, the respondent, and the grievant, if any, shall be entitled to introduce all relevant evidence on the issues as stated in the notice of hearing or as determined by the officer conducting the hearing at the outset of or during the hearing.

(e) Technical rules of evidence shall not apply to hearings conducted pursuant to this paragraph but rules or principles designed to assure production of the most credible evidence available and to subject testimony to test by cross-examination shall be applied where deemed reasonably necessary by the officer conducting the hearing. The hearing officer may exclude irrelevant, immaterial, or unduly repetitious evidence. All documents and other evidence offered or taken for the record shall be open to examination by the Department of Housing and Urban Development, the respondent, and the grievant, if any, and opportunity shall be given to refute facts and arguments advanced on either side of the issues. A transcript shall be made of the oral evidence except to the extent the substance thereof is stipulated for the record. All decisions shall be based upon the hearing record and written findings shall be made.

(f) If the hearing is held by a hearing examiner, he shall either render an initial decision, if so authorized, or certify the entire record, including his recommended findings and proposed decision to the Secretary for a final decision. A copy of such initial decision or certification shall be mailed to the respondent and the grievant, or their representative, by certified or registered mail, return, receipt requested. Where the initial decision is made by the hearing examiner, the respondent or grievant may within 30 days of the mailing of such notice of initial decision file with the Secretary exceptions to the initial decision, with reasons therefor. In the absence of exception, the Secretary may on his own motion, within 45 days after the initial decision, serve on the respondent and grievant, a notice that he will review the decision. Upon the filing of such exceptions or of such notice of review, the Secretary shall review the initial decision and issue his own decision thereon including the reasons therefor. If no exception is taken or notice of review issued, the initial decision shall constitute the final decision of the Secretary.

(g) Whenever a record is certified to the Secretary for decision or he reviews the decision of a hearing examiner pursuant to paragraph (f) of this section, or whenever the Secretary conducts the hearing, the respondent and grievant shall be given reasonable opportunity to file briefs or other written statements of their contentions, and a copy of the final decision of the Secretary shall be given in writing to the respondent, and to the grievant by certified or registered mail, return receipt requested.

(h) Whenever a hearing is waived pursuant to paragraph (a) of this section, a decision shall be made by the Secretary on the record and a copy of such decision shall be given in writing to the respondent, and to the grievant, by certified or registered mail, return receipt requested.

(i) Each decision of a hearing examiner or the Secretary shall set forth his ruling on each finding, conclusion, or exception presented, and shall identify the requirement or requirements of section 3 of the Housing and Urban Development Act of 1968 or the regulations which the respondent has not complied with.

(j) The final decision may contain such terms, conditions, and other provisions as are consistent with, and will effectuate the purposes of section 3 and these regulations. The decision may also include provisions designed to implement, maintain, and enforce sanctions set forth in § 135.135 until the respondent corrects its noncompliance and satisfies the Secretary that it will fully comply with section 3 and these regulations.

(k) The General Counsel shall represent the Department and shall receive copies of all notices, decisions and other documents which are forwarded to the parties.

(l) The applicant or recipient, if not a party, shall be invited to participate in the hearing and shall receive copies of all notices, decisions, and other documents which are forwarded to the parties.

§ 135.115 Compliance reviews and procedures.

In order to determine whether the responsibilities imposed upon him by section 3 and these regulations are being properly carried out, the Secretary shall periodically conduct section 3 compliance reviews of selected applicants, recipients, contractors, and subcontractors. A compliance review shall consist of a comprehensive analysis and evaluation of each aspect of the aforementioned section 3 policies, and conditions resulting therefrom. Where deficiencies are found to exist, reasonable efforts shall be made to secure compliance through the conciliation process set forth in § 135.105(g) Compliance reviews may be conducted prior to award of contracts in any case where the Secretary has reasonable grounds based on a substantial grievance, the Department's own investigation, or other substantial evidence, to believe that the applicant, recipient, contractor, or subcontractor or will be unable or unwilling to comply with section 3 and the provisions of this part.

Subpart G—Miscellaneous

§ 135.120 Reporting and recordkeeping.

In order to insure that the Secretary is kept informed of the progress being made by the applicant, recipient, contractor, and subcontractor in meeting their obligations under these regulations, each applicant, recipient, contractor, and subcontractor is required to:

(a) Maintain such records and accounts and furnish such information and reports as are required by the Secretary under these regulations or pursuant thereto and permit the Secretary access to books, records and premises for purposes of investigation in connection with

V 38-149 AUG 3 73 XUM

a grievance or to ascertain compliance with these regulations or the rules and orders of the Department issued thereunder.

(b) Advise the Secretary within 15 days of the award of any contract under a section 3 covered project of the steps which have been and will be taken to comply with the requirements of Subparts B, C, and D of this part.

§ 135.125 Implementing procedures and instructions.

Assistant Secretaries of the Department administering programs subject to this regulation may issue such procedures and instructions as are necessary to implement the provisions of section 3 and this part. A copy of such procedures and instructions shall be forwarded to the Secretary for approval prior to issuance. All regulations, procedures, and circulars previously issued by the Department designed or purporting to implement the provisions to section 3, are revoked and superseded by this part. Handbook MC 3160.1 entitled Model Cities Resident Employment and Training Requirements, is superseded to the extent that Handbook MC 3160.1 applies to occupations related to housing and urban development including the fields of construction, design, architecture, mortgage banking, rehabilitation, maintenance, repair and housing management.

§ 135.130 Labor standards.

All labor standards applicable by statute, regulations, or other administrative issuance shall apply to section 3 covered projects.

§ 135.135 Sanctions and penalties.

Failure or refusal to comply and give satisfactory assurances of future compliance with the requirements of this part shall be proper basis for applying sanctions. Such sanctions as are specified by the grant or loan agreement or contract through which Federal assistance is provided, as well as such sanctions as are specified by the rules, regulations, or applicable policy of the Department of Housing and Urban Development governing the program under which Federal assistance to the project is provided, shall be applied in accordance with the relevant regulations. Any or all of the following actions may be taken, as appropriate: cancellation, termination, or suspension in whole or in part of the contract or agreement; a determination of ineligibility or debarment from any further assistance or contracts under the program with respect to which the failure or refusal occurred until satisfactory assurance of future compliance has been received, and referral to the Department of Justice for appropriate legal proceedings.

§ 135.140 Effective date.

This part shall become effective for all applications for assistance under section 3 covered projects which are made after such date within the meaning of the program in question. However, nothing in this part shall affect requirements already imposed on applicants, recipients and contractors, and subcontractors pursuant to section 3.

Dated: July 31, 1973.

JAMES T. LYNN,
Secretary of Housing and Urban Development.

Notices

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF STATE

STUDY GROUP 7 OF THE U.S. NATIONAL COMMITTEE FOR THE INTERNATIONAL RADIO CONSULTATIVE COMMITTEE (CCIR)

Notice of Meeting

The Department of State announces that Study Group 7 of the U.S. National Committee for the International Radio Consultative Committee (CCIR) will meet on August 14, 1973, at the U.S. Naval Observatory, 34th Street and Massachusetts Avenue, NW., Washington, D.C. The meeting will begin at 9:30 a.m. in Room 300 of Building 52.

Study Group 7 deals with time-signal services. The agenda for the meeting will include the following matters:

a. Review of draft documents currently being developed as proposed U.S. contributions to the international meeting of Study Group 7 in 1974.

b. Consideration of possible U.S. positions on issues related to the international meeting of Study Group 7 in 1974.

Members of the general public will be admitted up to the limits of the capacity of the meeting room. Members of the general public who plan to attend the meeting are requested to so inform Mr. Hugh Fosque, Chairman of U.S. Study Group 7, prior to August 14, 1973; Mr. Fosque can be contacted at NASA Headquarters, telephone number (202) 755-2434.

Dated: July 27, 1973.

GORDON L. HUFFCUTT,
Chairman,
U.S. National Committee.

DEPARTMENT OF THE INTERIOR

National Park Service

NATIONAL CAPITAL PARKS—WEST

Notice of Intention To Issue a Concession Permit

Pursuant to the provisions of section 5 of the Act of October 9, 1965, (79 Stat. 969; 16 U.S.C. 20), public notice is hereby given that on September 4, 1972, the Department of the Interior, through the Superintendent, National Capital Parks—West, proposes to issue a concession permit to Capitol Cycles Corporation, authorizing it to provide concession facilities and services for the public on the Mall of National Capital Parks for a period of 5 years from January 1, 1974, through December 31, 1978.

The foregoing concessioner has performed its obligation under a prior permit to the satisfaction of the National Park Service and, therefore, pursuant to the Act cited above, is entitled to be given preference in the renewal of the permit and in the negotiation of a new permit. However, under the Act cited above, the National Park Service is also required to consider and evaluate all proposals received as a result of this notice. Any proposal to be considered and evaluated must be submitted on or before September 4, 1973.

Interested parties should contact the Superintendent, National Capital Parks—West, 1100 Ohio Drive, S.W., Washington, D.C. 20242, for information as to the requirements of the proposed permit.

Date July 6, 1973.

LUTHER C. BURNETT,
Superintendent,
National Capital Parks, West.

[Docket No. M 73-74]

GAY COAL COMPANY, INC.

Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301(c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. section 861(c) (1970), Gay Coal Company, Incorporated, has filed a petition to modify the application of 30 CFR 77.1605(k) to its No. 5 and Grays Gap No. 2 Mines, located at Anderson County, Tennessee.

30 CFR 77.1605(k) reads as follows:

(k) Berms or guards shall be provided on the outer bank of elevated roadways.

In support of its petition, petitioner states that the principal portion of the haul road from the mine opening to the main highway is maintained by the county and is an extra wide asphalt paved road. The remaining portion of the haul road is confined almost entirely to the top of the mountain and is substantially less hazardous than the steep winding portion of the county road which does not have berms or guardrails.

As an alternative method petitioner would like to maintain the road in its present condition. Petitioner states that the haul road is extra wide and loaded trucks are compelled by the traffic system to keep to the inside or ditch side of the road.

Petitioner contends that the installation of berms on the side of the road would interfere with drainage, particularly melting snow since the operator-maintained roads are at an elevation of 2,300 feet and higher. Petitioner further avers that application of the mandatory safety standard will result in a diminution of safety to the miners at the affected mines and that it has an excellent safety record concerning hauling operations due to its present system of road maintenance.

Persons interested in this petition may request a hearing on the petition or furnish comments by September 4, 1973. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

JAMES M. DAY,
Director,
Office of Hearings and Appeals.

H & B MINING, INC.

Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301(c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. section 861(c) (1970), H & B Mining, Incorporated, has filed a petition to modify the application of 30 CFR 77.1605(k) to its H & B Strip Mine located at Anderson County, Tennessee.

30 CFR 77.1605(k) reads as follows:

(k) Berms or guards shall be provided on the outer bank of elevated roadways.

In support of its petition, petitioner states that the principal portion of the haul road from the mine opening to the main highway is maintained by the county and is an extra wide asphalt paved road. The remaining portion of the haul road is confined almost entirely to the top of the mountain and is substantially less hazardous than the steep winding portion of the county road which does not have berms or guardrails.

As an alternative method petitioner would like to maintain the road in its present condition. Petitioner states that the haul road is extra wide and loaded trucks are compelled by the traffic system to keep to the inside or ditch side of the road.

Petitioner contends that the installation of berms on the side of the road

LUEKINGS' COAL CO.

Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301 (c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. section 861(c) (1970), Luekings' Coal Company, Incorporated, has filed a petition to modify the application of 30 CFR 77.1605 (k) to its No. 1 Strip Mine located at Harriman, Tennessee.

30 CFR 77.1605(k) reads as follows:

(k) Berms or guards shall be provided on the outer bank of elevated roadways.

In support of its petition, petitioner states that the principal portion of the haul road from the mine opening to the main highway is maintained by the county and is an extra wide asphalt paved road. The remaining portion of the haul road is confined almost entirely to the top of the mountain and is substantially less hazardous than the steep winding portion of the county road which does not have berms or guardrails.

As an alternative method petitioner would like to maintain the road in its present condition. Petitioner states that the haul road is extra wide and loaded trucks are compelled by the traffic system to keep to the inside or ditch side of the road.

Petitioner contends that the installation of berms on the side of the road would interfere with drainage, particularly melting snow since the operator-maintained roads are at an elevation of 2,300 feet and higher. OLIVER SPRINGS MINING COMPANY, INC.

Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301 (c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. Section 861 (c) (1970), Oliver Springs Mining Company, Incorporated, has filed a petition to modify the application of 30 CFR 77.1605(k) to its Nos. 3, 5 and 6 Mines located at Anderson County, Tennessee.

30 CFR 77.1605(k) reads as follows:

(k) Berms or guards shall be provided on the outer bank of elevated roadways.

In support of its petition, petitioner states that the principal portion of the haul road from the mine opening to the main highway is maintained by the county and is an extra wide asphalt paved road. The remaining portion of the haul road is confined almost entirely to the top of the mountain and is substantially less hazardous than the steep winding portion of the county road which does not have berms or guardrails.

As an alternative method petitioner would like to maintain the road in its present condition. Petitioner states that the haul road is extra wide and loaded trucks are compelled by the traffic system to keep to the inside or ditch side of the road.

VOLUNTEER MINING CO.

Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301 (c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. section 861(c) (1970), Volunteer Mining Corporation has filed a petition to modify the application of 30 CFR 77.1605(k) to its Volunteer No. 1 Mine, United States Bureau of Mines I.D. No. 40002550 located at Anderson County, Tennessee.

30 CFR 77.1605(k) reads as follows:

(k) Berms or guards shall be provided on the outer bank of elevated roadways.

In support of its petition, petitioner states that the principal portion of the haul road from the mine opening to the main highway is maintained by the county and is an extra wide asphalt paved road. The remaining portion of the haul road is confined almost entirely to the top of the mountain and is substantially less hazardous than the steep winding portion of the county road which does not have berms or guardrails.

As an alternative method petitioner would like to maintain the road in its present condition. Petitioner states that the haul road is extra wide and loaded trucks are compelled by the traffic system to keep to the inside or ditch side of the road.

Petitioner contends that the installation of berms on the side of the road would interfere with drainage, particularly melting snow since the operator-maintained roads are at an elevation of 2,300 feet and higher. [Docket No. M 73-75]

WALNUT MT., INC.

Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301 (c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. section 861 (c) (1970), Walnut Mt., Incorporated, has filed a petition to modify the application of 30 CFR 77.1605(k) to its Walnut Mt. No. 1 Strip Mine located at Anderson County, Tennessee.

30 CFR 77.1605(k) reads as follows:

(k) Berms or guards shall be provided on the outer bank of elevated roadways.

In support of its petition, petitioner states that the principal portion of the haul road from the mine opening to the main highway is maintained by the county and is an extra wide asphalt paved road. The remaining portion of the haul road is confined almost entirely to the top of the mountain and is substantially less hazardous than the steep winding portion of the county road which does not have berms or guardrails.

As an alternative method petitioner would like to maintain the road in its present condition. Petitioner states that the haul road is extra wide and loaded trucks are compelled by the traffic system to keep to the inside or ditch side of the road.

Petitioner contends that the installation of berms on the side of the road would interfere with drainage, particularly melting snow since the operator-maintained roads are at an elevation of 2,300 feet and higher. Petitioner further avers that application of the mandatory safety standard will result in a diminution of safety to the miners at the affected mines and that it has an excellent safety record concerning hauling operations due to its present system of road maintenance.

Persons interested in this petition may request a hearing on the petition or furnish comments within 30 days from the date of publication of this notice in the FEDERAL REGISTER. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

JAMES M. DAY,
Director, Office of Hearings and Appeals.

Office of Oil and Gas

EMERGENCY ADVISORY COMMITTEE FOR NATURAL GAS

Notice of Meeting

Pursuant to Public Law 92-463, notice is hereby given of the following meeting:

Emergency Advisory Committee for Natural Gas, August 10, 1973, 9 a.m. in the Secretary's Conference Room (5160), Department of the Interior, Washington, D.C. The agenda will include reports on an assessment of the natural gas and propane supply situation for the coming 1973-1974 winter season.

This meeting is open to the public.

Dated: August 1, 1973.

DUKE R. LIGON,
Director.

[INT DES 73-49]

PROPOSED CONTINENTAL DIVIDE/KIT CARSON NATIONAL SCENIC TRAILS

Availability of Draft Environmental Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, the Department of the Interior has prepared a draft environmental statement for the proposed authorization and designation of the Continental Divide and the Kit Carson National Scenic Trails as components of the national trails system and invites written comment September 17, 1973. Comments should be addressed to Regional Director, Mid-Continent Region, Bureau of Outdoor Recreation, Denver Federal Center, Building 41, P.O. Box 25387, Denver, Colorado 80225.

The environmental statement considers establishment of two continuous foot and horseback trails—the Continental Divide Trail extending approximately 3,100 miles generally along the Continental Divide from the Mexican border through the States of New Mexico, Colorado, Wyoming, Idaho and Montana to the Canadian border, and the Kit Carson Trail extending approximately 370 miles along the Sangre de Cristo, Sandia, and Manzano Mountains in north-central New Mexico from Cabresto Lake to a point near Abo State Monument.

Copies are available for inspection at the following locations:

Office of Communications, Office of the Secretary, Department of the Interior, Washington, D.C. 20240

CERTAIN STOCKYARDS AND LIVESTOCK MARKETS

Notice of Approval and of Withdrawal of Approval

This notice lists certain additional livestock markets to the list of those heretofore approved under the regulations in 9 CFR Part 76. It has been determined that the inspection and handling of swine at such livestock markets are adequate to effectuate the purposes of the regulations. Certain livestock markets have been removed from the list of those heretofore approved under said regulations, because it has been determined that such livestock markets no longer qualify for approval under the regulations.

Pursuant to § 76.18 of the regulations in Part 76, as amended, Title 9, Code of Federal Regulations, containing restriction on the movement of swine because of hog cholera, under the Act of May 29, 1884, as amended, the Act of March 3, 1905, as amended, the Act of September 6, 1961, and the Act of July 2, 1962 (21 U.S.C. 111–113, 114g, 115, 117, 120, 121, 123–126, 134f), notice is hereby given that the following livestock markets are approved under said regulations as indicated below:

Livestock Markets Approved Under § 7618(b), Title 9, Code of Federal Regulations, To Handle Interstate Shipments of Any Class of Swine

ALABAMA	
Cullman Feeder Pig Association	Cullman

Effective Date: August 3, 1973.

This action imposes certain restrictions necessary to prevent the spread of hog cholera and relieves certain restrictions presently imposed. It should become effective promptly in order to accomplish its purpose in the public interest and to be of maximum benefit to persons subject to the restrictions which are relieved. Accordingly, under the administrative procedure provisions of 5 U.S.C. 553, it is found upon good cause that notice and other public procedure with respect to this action are impracticable and contrary to the public interest, and good cause is found for making this notice effective less than 30 days after publication in the FEDERAL REGISTER.

Done at Washington, D.C. July 30, 1973.

E. E. SAULMON,
Deputy Administrator, Veterinary Services, Animal and Plant Health Inspection Service.

ENVIRONMENTAL STATEMENTS

Publication of Guidelines on Forest Service Manual

Notice is hereby given of publication of Title 8400 an Environmental Statements in the newly established series 8000 (ENVIRONMENTAL PLANNING, PROTECTION, AND MANAGEMENT) of the Forest Service Manual. This title replaces Forest Service Emergency Directive No. 1, FSM 1940, which was published in the FEDERAL REGISTER on December 11, 1971. Comments will be welcomed on a continuing basis and revisions will be made as necessary.

Additional chapters and titles in 8000 are being developed and will be issued in the future.

PHILIP L. THORNTON,
Deputy Chief, Forest Service.

JULY 25, 1973.

8401—Authority. The Forest Service is authorized and directed by the National Environmental Policy Act (NEPA) of 1969 (P.L. 91–190) to use all practical means and measures in a manner calculated to foster and promote the general welfare, create and maintain conditions under which man and nature can exist in productive harmony, and fulfill the social and economic and other requirements for present and future generations of Americans. The purposes of the act are to: (1) declare a national policy which will encourage productive and enjoyable harmony between man and his environment; (2) promote efforts which will prevent or eliminate damage to the environment and biosphere; (3) stimulate health and welfare of man; and (4) enrich the understanding of the ecological systems and natural resources important to the nation.

Section 102(2)(C) of the act requires environmental statements on proposed major Federal actions affecting the environment. The objective of this section is to build into a decision-making process an appropriate and careful consideration of the environmental aspects of proposed action and to assist agencies in implementing not only the letter, but the spirit of the act.

Additional authority, direction, and instructions are contained in:

1. Executive Order No. 11514.
2. Council on Environmental Quality (CEQ) Revised Guidelines for Statements on the Proposed Federal Action Affecting the Environment as published in the Federal Register, Vol. 36, No. 79, April 23, 1971, Part II.
3. Secretary's Memorandum No. 1695 and supplements.
4. Section 309 Clean Air Act Amendments of 1970.

8402—Purpose of Environmental Statements. The objective of an environmental statement is to provide a means for giving environmental quality careful and appropriate consideration in the planning and decision-making process. The environmental statement must be of sufficient detail to allow a responsible official to make an accurate decision regarding the environmental impacts to be expected from program implementation. This means environment quality must be objectively weighed with economic development and social well-being goals over both the short and the long run. The environmental statement process also provides a formalized procedure for informing and taking account of comments from other agencies, individuals, and groups having expertise or interest in the subject area under consideration.

The environmental statement should indicate what other interests and considerations of Federal policy might be found to justify those effects. The statement should also indicate the extent to which these stated countervailing benefits could be realized by following reasonable alternatives to the proposed action that would avoid some or all of the adverse environmental effects. In addition to other economic information available, benefit-cost information or other specific economic analysis should be included with the environmental statement. A sincere effort should be made to discover and discuss all major points of view in the draft environmental statement itself.

Also, it is a requirement that all environmental statements be submitted to the CEQ. While the council does not formally approve or disapprove the statements, they are an arm of the Executive Office of the President. As such, their comments on statements they choose to review must be fully recognized and considered as the voice of this office. The major purpose of Public Law 91–190 is to assure the Executive and the Congress that environmental quality is fully considered in all Federal activities affecting the environment.

8403—Policy. Forest Service policy is that the responsible official will not make a decision on a proposed action until the environmental impacts are assessed in detail. If the action requires an environmental statement, the entire process required by the NEPA must be completed prior to approval. Furthermore, the act requires that an environmental statement "accompany the proposal through the existing agency review processes." As early as possible and in all cases prior to agency decision concerning major action or recommendation or a favorable report on legislation that significantly affects the environment, the Forest Service will consult with other appropriate Federal, state, and local agencies and with the public. Alternative actions that will reduce adverse impacts or enhance positive effects will be thoroughly explored. Long- and short-range implications to man, to his physical and social surroundings, and to nature will be evaluated.

The analysis supporting an environmental statement should utilize a systematic, interdisciplinary approach integrating the natural and social sciences and the environmental design arts in planning and in decisionmaking. The analysis is described in detail in FSM 2130.

All existing policies will be periodically reviewed. If, at any time, a policy is found to be inconsistent with NEPA, the policy will be revised.

In order to more fully complement the act it is recommended that cooperative agreements with state agencies be amended to include the following clause:

> To comply with Public Law 91–190, the National Environmental Policy Act of 1969, the state and the Forest Service agree to direct their program activities covered by this agreement toward managing and enhancing the environment for the widest range of beneficial uses without its degradation or risk to health or safety or other undesirable consequences. The state further agrees to assist the Forest Service in the preparation of environmental statements as required by Section 102(2)(C) of Public Law 91–190 for all major actions taken under this agreement which might significantly affect the quality of the human environment or be controversial.

8404—Responsibility. Responsibility for preparing Forest Service environmental statements follows the delegations of authority specified in FSM 1230. The Regions, Areas, and Stations have designated environmental coordinators to help meet the requirements of the NEPA. Responsibility for the proposed action determines responsibility for the environmental statement. The procedure specified herein for forwarding statements to the CEQ does not alter these basic delegations of authority.

1. Responsible Official. Chief, Regional Foresters, Area Directors, Station Directors, Forest Supervisors, and District Rangers are responsible for determining the need for, and preparation of, environmental statements on specific Forest Service actions. Cooperators, such as states can be required to prepare analysis for statements, but the deciding Forest Service official is responsible for the environmental statement. The Washington Office will handle actions relating to legislation, appropriations, and proposed national programs.

2. Lead Agency. The "Lead Agency" is defined as the Federal agency having primary authority for committing the Federal Government to a course of action. The Forest Service will prepare an environmental statement when it is the lead agency. The WO can assist in resolving questions of lead agency designation by working through the USDA Coordinator of Environmental Quality Activities to get assistance from the CEQ. Where determination of lead agency cannot be resolved, then each agency claiming a lead role may have to require a statement adequate for its decision-making process. Where the authority of agencies is more-or-less equal and the

V 38 149 AUG 3 73 XUM

consequences are major for each agency, statements may be jointly prepared.

The CEQ states that relevant factors in determining the proper agency to assume a lead role include:

a. Relative expertise with respect to the project's environmental effects.

b. Magnitude of respect involvement for evaluation of the entire project.

c. Time sequence in which the agencies become involved in the project. Especially critical is the preparation of the environmental statement before any of the participating agencies have taken major or irreversible action with respect to the project.

These factors and considerations indicate that where National Forest System lands are involved, the Forest Service should exert a strong role in the environmental statement process.

8411—ACTIONS REQUIRING ENVIRONMENTAL STATEMENTS. The NEPA requires that environmental statements be prepared and submitted with every recommendation or report on proposals for legislation and for other major Federal actions significantly affecting the quality of the environment. Such "significant effect" may include actions which may have both beneficial and detrimental effects even if, the agency believes that the effect will be more beneficial than detrimental.

Environmental statements are required for proposed actions having major environmental impacts or which are highly controversial.

"Major" actions and "significant" environmental effects are difficult to define precisely and uniformly because of the great variation in social, political, and ecological conditions. The official responsible for taking action must use good judgment in determining when formal environmental statements are appropriate and useful in the decisionmaking and public involvement processes. The following categories of criteria should be considered by officials in determining whether or not a statement is appropriate. In applying this criteria, all lands affected must be considered, including National Forest lands, other Federal lands, state lands, and private lands.

1. Degree of ecosystem disturbance; both onsite and offsite effects should be recognized. Offsite could involve effects on private land, such as triggering land development.

2. Irreversible effects on basic resources; short-term versus long-term commitments.

3. Cumulative effects of many small actions.

4. Chain reactions or secondary effects of interrelated activities.

5. National versus regional and local importance.

6. Uniqueness or rareness of resource.

7. Scope of anticipated public involvement and controversy anticipated.

The size of scope of an administrative action is a factor which may be considered in determining whether this action is a "major" action. Usually, it will be appropriate to aggregate a number of comparable smaller actions, and consider them together in a single program environmental statement.

8411.1—Legislation. Although the act is not specific, CEQ guidelines and Office of Management and Budget (OMB) instructions indicate that environmental statements are only needed for favorable reports relating to legislation. Section (2)(C) of the act applies to both (1) agency recommendation on their own proposals for legislation and (2) agency reports on legislation initiated elsewhere. In the latter case, only the agency which has primary responsibility for the subject involved will prepare an environmental statement.

8411.2—Service-Wide Policy, Regulations, and Procedures. An environmental statement will be prepared for new regulations, policies, and procedures which have major environmental effects.

8411.3—Plans, Programs, and Major Projects. Environmental statements will be prepared on major proposed plans, programs, and major projects directly undertaken by the Forest Service, or supported in whole or in part through land use permits, leases, contracts, grants, cooperative agreements, subsidies, technical assistance, or granting of rights.

In most cases, any activity that will significantly affect the following will require an environmental statement:

1. Formally classified areas, such as Wilderness Areas, Primitive Areas, Wild and Scenic Rivers, National Recreation Areas, Natural Areas, Scenic Areas, Historical Areas, Archeological Areas, Geological Areas, and National Trails. Also areas being considered or with significant potential for classification.

2. Large roadless areas and critical smaller roadless areas.

3. Adjacent National Parks and monuments, wildlife refuges, or similar State and locally designated areas.

4. Scenic attractions.

5. Municipal watersheds.

6. Shorelines.

7. Free-flowing streams.

8. Rare and endangered species—plants or animals.

9. Key wildlife or fish areas.

10. Wetlands and estuaries.

11. Air and water quality. (This should include not only quality in terms of legal standards, but aspects for which standards may not be set.)

8411.31—Environmental Statements on Pesticide Use. Environmental statements are normally required on programs or major projects involving use of pesticides. The use of pesticides should be considered from their effect on production needs, economic changes, and other associated environmental consequences.

8411.32—Environmental Statements on Land Use Plans, Developments, and Activities. A definitive list of activities requiring environmental statements cannot be specified because of the complexity of Forest Service programs. The list below is not all-inclusive, nor will all plans and actions within the activities require statements. The responsible official must consider the criteria in FSM 8411 of this chapter and use reasonable judgment. In many cases, program statements will be appropriate, assessing the environmental effects of a number of individual actions in a given geographical area.

The need for environmental statements should be considered for the activities given below:

1. Multiple Use Plans of Area, Unit, or Forest.

2. Timber Management Plan or Timber Sale Action Plans.

3. Other Resource Management Plans.

4. Rural area development feasibility studies and proposals.

5. Mining permits and certain prospecting permits. This applies to minerals owned by the United States. May also apply to certain aspects of removal of reserved minerals (that is operating plans of mineral operator).

a. Surface mining except for minor sand, gravel, and stone excavation, and minor mineral activities (mica, feldspar, etc.)

b. Deep mining.

c. Development of major oil and gas fields with appurtenant facilities.

6. Major public service developments (for example, winter sport sites, resorts, and marinas).

7. Programs involving the use of fertilizers and other chemicals.

8. Water resources development projects.

9. Channel change projects.

10. Continuing National Cooperative programs.

11. Cooperative state program plans.

12. Large-scale, on-the-ground research activities, such as drastic treatment of sizeable areas and major change in research programs.

13. Vegetative-type conversion involving substantial acreage.

14. Transportation construction programs.

15. Major highways and bridges if not included under item 14.

16. Prescribed burning program if not included under item 2.

17. Site preparation programs, such as roller chopping, rock raking, shearing, and cabling.

18. Rights-of-way permits for major transmission lines.

19. Major sewage treatment facilities.

20. Major acquisition or exchange.

21. Followup actions associated with natural disasters.

22. Issuance of certain grazing permits.

23. Off-road vehicle use plans.

8411.4—Application of Requirements to Existing Projects and Programs. To the maximum extent practicable, the environmental statement requirements should be applied to additional major actions having a significant effect on the environment even though they arise from projects or programs initiated prior to enactment of the act on January 1, 1970. When it is not practicable to reassess the basic course of action, it is still important that additional incremental

major actions be shaped so as to minimize adverse environmental consequences. It is also important that account be taken of environmental consequences not fully evaluated at the outset of the project or program. The rationale leading to the original decision should be documented.

8412—ENVIRONMENTAL STATEMENT PREPARATION. An environmental statement is prepared in two stages. A draft environmental statement is the first formal statement for filing with the CEQ and for review and comment by other agencies and the public. A final environmental statement reflects the results of the draft review process and it is also filed with the CEQ.

The preparation of a draft environmental statement should follow an analysis of alternatives from a multiple-objective viewpoint. Preliminary consultation with other Federal, State, and local agencies and public involvement should start early in the analysis process. Public involvement will be through a variety of means, such as individual contacts, meetings, workshops, and advisory committees. The draft statement specifically focuses on the environmental aspects of the alternatives. This should be a useful document for review and comment by other agencies and the public. The statement should clearly describe the analysis process so reviewers may comment specifically. The comments received must then be considered and evaluated for preparation of the final environmental statement.

8412.1—Basis for Environmental Statements. Planning and analysis procedures will provide basic information for environmental statements. New planning and analysis procedures are under development. In the meantime, current procedures for analysis and coordination discussed in various sections of the Manual will provide some of the data necessary for environmental statements.

An environmental analysis and its documenting report is required as a basis for determining the need for an environmental statement. However, there are cases where the need for an environmental statement is apparent prior to the environmental analysis. When the environmental analysis does not indicate a significant environmental impact or controversy, the responsible official may decide that an environmental statement is not required. In these situations, the responsible official will make a written negative declaration setting forth his determination that there will be no significant impact upon the quality of the environment or controversy if the proposed action is undertaken.

When the responsible official decides an environmental statement will be prepared, an appropriate notice of this fact will be made. A list of statements under preparation will be maintained at appropriate Regions, Stations, Areas, and composite lists at the Washington Office. The composite list will be published twice annually (January and July) in the Federal Register.

Environmental statements will be documents complete enough to stand on their own. Analysis reports may be incorporated as supporting material to the environmental statement. Draft statements should indicate the underlying studies, reports, and other information obtained and considered by the agency in preparing the statement. The statement should describe how such documents may be obtained or examined. In some situations, analysis reports may be written in the same format as the environmental statement and used as the draft statement.

The complete environmental statement package will contain the following:

1. Letter of transmittal to CEQ (attached to each copy of environmental statement).

2. National Technical Information Service (NTIS), Department of Commerce, Summary Sheet (attached to each copy of environmental statement) and one completed Accession Notice, form NTIS 79.

3. Environmental Statement Summary Sheet (attached to each copy of environmental statement, plus two extra copies for distribution to OMB).

4. Environmental Statement (30 copies).

5. Federal Register Notice.

8412.2—Letter of Transmittal. Use the following sample for transmittal memo:

Subject: USDA (Draft/Final) Environmental Statement on (title of statement)

To: Honorable Russell E. Train, Chairman, Council on Environmental Quality

Through: T.C. Byerly, Coordinator of Environmental Quality Activities, USDA

Enclosed are ten copies of the (Draft/Final) environmental statement on (title) issued by U.S. Forest Service (title and name of official), (specifiy) Region. One copy is for submittal to NTIS.

The responsible official is Regional Forester Jay Craven, Eastern Region.

(Do not complete signature block)

Enclosures

Leave the signature block blank. The transmittal memorandums should clearly identify the responsible Forest Service official. A minimum of 30 copies of either draft or final statement and appended material shall be submitted to the Chief.

8412.3—National Technical Information Service (NTIS). As a public service, the NTIS will reproduce and offer for sale copies of all environmental statements. Costs will vary according to size of the environmental statement. The statements are also available in microfiche. Submit with each environmental statement a special NTIS cover sheet and Accession Notice, form NTIS 79, to facilitate their handling. The NTIS cover sheet page should follow the format as illustrated by the following sample. The report number will be assigned by Programs and Legislation Office and the date filed with CEQ inserted.

One copy of form NTIS–79 should be completed in accordance with sample and submitted along with environmental statement package. This will be returned to the Washington Office by NTIS after accession number is assigned.

V Prepared by
—U.S. Department of Agriculture
Forest Service—Northern Region
Federal Building
Missoula, Montana 59801

8412.4—Contents of an Environmental Statement. Forest Service environmental statements shall generally follow the outline below and will include information pertinent to each of the subject headings listed. The headings can be supplemented or re-arranged if a clearer presentation results. However, the Act requires that each of the main points be covered.

USDA FOREST SERVICE ENVIRONMENTAL STATEMENT

(Statement Title)

Prepared in accordance with Section 102(2)(C) of Public Law 91–190

SUMMARY SHEET

I—Draft ( ) Final ( )
II—Name of USDA Agency.
III—Administrative ( ) Legislative ( ).
IV—Brief description of action—indicating what states and counties are particularly affected.
V—Summary of environmental impact and adverse environmental effects.
VI—List of alternatives considered.
VII—(For DRAFT statements) List all Federal, state, and local agencies from which comments have been requested.
(For FINAL statements) List all Federal, state, and local agencies and other sources from which written comments have been received.
VIII—Date draft statement and final statement made available to CEQ and the public.
If it is a "Draft" environmental statement-leave blank; WO will insert date when it goes to CEQ.
If it is a final environmental statement and the draft has already been filed with CEQ, insert that data and leave date for "Final" blank.

[1] Use DES for draft—FES for final environmental statement.

[2] Assigned by Programs & Legislation Office—leave blank.

V 38-149 AUG 3 73 XUM

USDA FOREST SERVICE ENVIRONMENTAL STATEMENT

(Statement Title)

Prepared in accordance with Section 102(2) (C) of Public Law 91-190

Type of Statement: (draft or final)
Date of Transmission to CEQ: (leave blank)
Type of Action: (administrative or legislative)
Responsible Official: (name, title, and address)

CONTENTS

I—Description.
II—Environmental impacts.
III—Favorable environmental effects.
IV—Adverse environmental effects which cannot be avoided.
V—Alternatives to the proposed action.
VI—Relationship between short-term uses of man's environment and the maintenance of long-term productivity.
VII—Irreversible and irretrievable commitment of resources.
VIII—Consultation with others.

The following comments are intended to further clarify the intent of the headings in the above environmental statement outline.

I—Description. The proposed action or alternative should be clearly described by including enough information and technical data to give readers a clear understanding of the nature of the proposed action. Where relevant, maps, photographs, and other materials may be used, but publication costs and difficulty should be considered. Give the relevant background information on the project including its purpose, the origin of the proposal, the social, economic, or environmental objectives, and the demand or relative urgency of need. If appropriate, describe the present environment, location, size, landownership, and status, physiography, ecosystems, climate, and other special features.

II—Environmental Impacts. Discuss both primary and secondary effects.

A. Identify, analyze, and discuss the full range of social, physical, and biological factors which change as a result of direct or indirect effects of the proposal. Both primary and secondary consequences should be considered in the analysis. For example, the implications, if any, of the action on population distribution or concentration should be objectively estimated and an assessment made of the probable effects of such changes in population patterns upon the resource bases, including land use, and public services of the area in question. Include, also, economic impacts on employment, unemployment, and other economic factors.

The distinction between primary and secondary impacts is important for insuring consideration of all alternatives. One way to describe the distinction is that project inputs generally cause primary impacts and project outputs generally cause secondary impacts. Primary impacts are generally easier to analyze and measure, while secondary impacts may require analyses by a number of agencies because they generally are not within any single agency area of responsibility or expertise. Secondary impacts may, in fact, be more important or more damaging than primary impacts.

The material in this section should be as objective as possible leaving the value judgments of good or bad for the succeeding sections.

B. Discuss any planned measures to minimize adverse environmental impacts of the proposal.

III—Favorable Environmental Effects. Discuss the beneficial aspects of the environmental changes or disturbances by placing some relative value on the impacts described in II above. The basis for such value judgments should be as explicit as possible. Discuss the effects not only with reference to the project areas but in relation to any applicable region or ecosystem. Clearly identify the target groups involved and assess the relative differences in values to each group. Favorable environmental effects may be described as any probable beneficial effects that result from the proposed action, such as (1) improved air and water quality, (2) improved land use patterns, (3) improved life systems, (4) improved social and economic conditions, and (5) other beneficial environmental effects as set out in Section 101(b) of the Act.

IV—Adverse Environmental Effects Which Cannot Be Avoided. Identify and discuss the nature and extent of probable adverse effects and explain why they cannot be avoided. Such adverse effects may include water, air, sound, or visual pollution; undesirable land use patterns; damage to life systems; threats to health; or other urban congestion consequences adverse to the environmental goals set out in Section 101(b) of the act.

V—Alternatives to the Proposed Action. The intent of this section is to assure that the responsible officer has studied the alternatives based upon a rigorous exploration and objective evaluation of alternative actions that might avoid some or all of the adverse environmental effects. The alternatives should be described, and the analysis presented, including costs and impacts on the environment. The viable alternatives should not be foreclosed prematurely in the agency review and decision process. Creativity is required in recognizing and developing alternatives. The range of alternatives to be considered may involve other alternate means to reach the objectives of the proposed action including alternatives as to location, design, scale, sequence, timing, and combinations. All reasonable alternatives and their environmental impacts should be discussed, including those not within the authority of the agency. Examples of categories of alternatives that must be considered in connection with specific actions are as follows:

A. The alternative of taking no action.

B. Alternatives requiring actions of a significantly different nature which would provide similar benefits with different environmental impacts.

C. Alternatives related to different designs or details of the proposed action which would present different environmental impacts.

In each case, the analysis of alternatives should be sufficiently detailed and rigorous to permit independent and comparative evaluation of the benefits, costs, and environmental risks of the proposed action and each alternative.

VI—Relationship between Local Short-term Uses of Man's Environment and the Maintenance and Enhancement of Long-term Productivity. This in essence requires the agency to assess the action for cumulative and long-term effects from the perspective that each generation is trustee of the environment for succeeding generations.

VII—Irreversible and Irretrievable Commitment of Resources. This requires the agency to identify the extent to which the action curtails the range of beneficial uses of the environment.

VIII—Consultation With Appropriate Federal Agencies and Review by State and Local Agencies Developing and Enforcing Environmental Standards. This section is optional but desirable for draft statements; it is required for final statements. In the draft environmental statement, list the agencies, groups, and individuals consulted in the preliminary consultation phases and summarize the comments received. Also, list the agencies and groups to whom the draft environmental statement will be sent.

In the final environmental statement, this section will include a discussion of reviews and comments on the draft environmental statement. Particular attention should be given to making meaningful reference to opposing views. Comments received from Federal, state, and local agencies, leading national organizations, and substantive comments from individuals which influence decisionmaking must be attached.

A list and summary of meetings and hearings held should be attached to the final statement.

8412.5—Federal Register Notice. Announcement of public availability of draft and final environmental statements will be published in the FEDERAL REGISTER. Units preparing environmental statements are requested to prepare FEDERAL REGISTER notices in final form announcing the availability to the public of the environmental statement. The FEDERAL REGISTER notice will be prepared and submitted along with the environmental statement to Programs and Legislation, Washington Office.

Instruction for preparing Federal Register document are in the Federal Register Handbook on Document Drafting, January 1966, issued by the Office of the Federal Register, GSA (FSM 1023). These instructions have been condensed below:

1. Format. Use plain bond paper, allowing 1½ inch left margin, and 1 inch right, top, and bottom margin; double space. For the signature element, type Deputy Chief, Forest Service, underscored, 5 lines below the last line of the notice, as shown in the sample. Type a line for the date. On the bottom left of the yellow copies, type the originator identifications: "USDA, Forest Service, Region, Division, author, typist's initials, and date."

2. *Number of Copies.* Original and two white tissue copies for submission to Federal Register Office, one yellow for Washington Office file, one yellow for the originating field unit.

3. *Submission.* Send original, two white tissues, and two yellow tissues (assembled in that order) to the Washington Office, Programs and Legislation. After signature by the Deputy Chief, and dated, yellow file copy will be returned to the field unit. The original and two white copies will be transmitted to the Federal Register Office for publication. Usually the notice is in print approximately 5 days after signature.

Sample Federal Register Notice

DEPARTMENT OF AGRICULTURE
Forest Service
COOPERATIVE 1972 GYPSY MOTH
SUPPRESSION AND REGULATORY PROGRAM
Notice of Availability of Draft (or Final)
Environmental Statement

(triple space)

Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969, the Forest Service, Department of Agriculture, has prepared a (draft or final) environmental statement for (name of proposed action and Forest Service report number. See section 8412.3, NTIS for report number instructions).

The environmental statement concerns a proposed (brief description of proposed action).

This (draft or final) environmental statement was filed with CEQ on (leave blank).

Copies are available for inspection during regular working hours at the following locations:

USDA, Forest Service
South Agriculture Bldg., Room 3230
12th St. & Independence Ave., S.W.
Washington, D.C. 20250

(list other locations)

A limited number of single copies are available upon request to (resoponsible official, name, and address).

Copies are also available from the National Technical Information Service, U.S. Department of Commerce, Springfield, Virginia 22151. Please refer to the name and number of the environmental statement above when ordering.

Copies of the environmental statement have been sent to various Federal, state, and local agencies as outlined in the CEQ guidelines.

(THE FOLLOWING TWO PARAGRAPHS WILL BE USED FOR DRAFT STATEMENTS BUT WILL BE OMITTED FOR FINAL ENVIRONMENTAL STATEMENTS)

Comments are invited from the public, and from state and local agencies which are authorized to develop and enforce environmental standards, and from Federal agencies having jurisidiction by law or special expertise with respect to any environmental impact involved for which comments have not been requested specifically.

Comments concerning the proposed action and requests for additional information should be addressed to (responsible official name, and address). Comments must be received by (indicate specific date or number of days after filing with CEQ) in order to be considered in the preparation of the final environmental statement.

(Dateline leave blank) Deputy Chief, Forest Service

8413—CONSULTATION AND REVIEW PROCESS FOR FOREST SERVICE ENVIRONMENTAL STATEMENTS. The consultation and review process normally will involve 7 steps as follows:

1. Individual agency and public inputs and preliminary consultation leading to a development of a draft environmental statement.
2. Development of a draft statement.
3. Filing draft statement with CEQ.
4. Review of the draft statement by appropriate agencies and the public.
5. Preparation of final statement.
6. Filing final statement with CEQ.
7. Decision on proposed action.

The following flow chart shows the review points through which environmental statements must pass before a final decision is made. The chart also shows the minimum time required for review. However, responsible officials are encouraged to allow more time for review whenever possible.

8413.1—Preliminary Consultation and Advice. For Forest Service proposals, consultation with other appropriate agencies and the public should be obtained at the earliest possible time. Generally, this should be during the analysis phase and before the draft environmental statement is prepared. The approach can be varied to best fit the situation. This preliminary consultation should be documented, but early proposals and analyses should not be titled draft environmental statements.

8413.2—Draft Environmental Statement. The official review period for other agencies and the public begins when the draft environmental statement is transmitted to CEQ. Documents titled, "Draft Environmental Statement" should not be sent to other agencies and the public prior to transmission to CEQ.

After a draft environmental statement is issued, additional information may occasionally become available which could significantly influence the comments on the statement. In such cases, a supplement to the draft may be issued and given the same circulation as the draft environmental statement, with an appropriate extension in the time allowed for the submission of comments.

8413.21—Forest Service Processing. All draft environmental statements will be processed through the line officers, environmental quality coordinators, and Deputy Chiefs for transmission through the Department environmental coordinator to CEQ. The Deputy Chief for Programs and Legislation will handle the Washington Office processing and coordination. He will:

1. Forward required copies of the draft environmental statement through the Department's environmental quality coordinator, to CEQ.

2. Notify the responsible official that he may send the draft statement to appropriate agencies and groups for comment.

3. Send two copies of the summary sheet to OMB.

8413.22—Reviews Outside the Forest Service. After notification that the draft environmental statement has been officially transmitted to CEQ, the responsible official should distribute copies to, and solicit comments from, appropriate Federal, state, and local agencies and the public. State and local agencies should be contacted directly and through clearing houses as described in OMB Circular No. A-95 and FSM 1565.

Guidelines for determination of appropriate Federal agencies are found in section 8422. Regions, Stations, and Area supplements should identify Regional, state, and local agencies with jurisdiction, expertise, or interest in the proposed action and should establish review procedures with these agencies.

Draft environmental statements must also be submitted to the Environmental Protection Agency (EPA) for review and comment by the Administrator in accordance with Section 309 of the Clean Air Act, as amended. This review must be made whenever a Federal action is related to air or water quality, noise abatement and control, pesticide regulation, solid waste disposal, radiation criteria and standards, or other provisions of the authority of the EPA is involved, but all statements should be submitted

V 38-149 AUG 3 73 XUM

for their review and comment unless they specifically ask that the statement not be sent to them. For Regional actions, statements may be sent to the appropriate Regional Administrator for EPA.

The draft environmental statement can be the basis for news releases, discussion, public meetings, or hearings. The public must be informed about actions having an impact on the environment, and public comments and suggestions will be encouraged.

8413.3—Final Environmental Statement. A final environmental statement is prepared by the "Lead Agency" after careful consideration of comments received from other Federal, state, and local agencies and the public on a Forest Service draft statement. The statement should set forth major contentions and opinions even if the responsible agency finds no merit in them whatsoever. The rejection of comments or problems raised in the review process should be explained. Oral consultation with other agencies should also be documented, and copies of all substantive written comments must be attached to the final statement.

Copies of final environmental statements should be sent to those agencies, organizations, and individuals who submitted substantive comments. If appropriate, copies may also be sent to other agencies, groups, or individuals.

The final environmental statement is processed in the same manner as the draft statement.

For environmental statements concerning recommendations or reports on legislative proposals, the final text and comments should be available to the Congress and to the public. When scheduling of congressional hearing does not allow adequate time for completing the final text, a draft environmental statement may be furnished to the Congress and to the public pending transmittal of the final text and comments.

8413.4—Time Periods for Review Process. As soon as possible after being notified that the draft environmental statement has been filed with CEQ, the responsible official must make available and distribute copies of the statement for review and comment to other Federal, state, and local agencies with expertise and regulating authority in environmental matters. A time limit for comment of not less than 30 days must be permitted, except that a period of 45 days shall be allowed the EPA. Longer periods may be specified or extensions may be granted by the responsible official. The draft statement is available to the public and sufficient copies must be produced to meet anticipated demand. Copies of the Statement will be available to the public at the Washington Office, the office of the responsible official, and Forest, Region, Area, Station offices, and other locations as appropriate. If hearings are scheduled for a proposed administrative action requiring an environmental statement, the draft environmental statement should be made available to the public at least 15 days prior to the time of the relevant hearings.

No decision or administrative action should be taken sooner than 90 days after a draft environmental statement has been filed with the CEQ and circulated for comment. Neither should decisions be made or administrative action be taken sooner than 30 days after the final environmental statement is filed with CEQ and made available to the public. This 30 day period and the 90 day period may run concurrently to the extent that they overlap.

In rare cases, emergency circumstances, overriding considerations of expense to the Government or impaired program effectiveness, may make it necessary to take an action with significant environmental impact without observing the time provisions. Before taking such proposed action, the Forest Service will consult with CEQ. These consultations will be handled by the Washington Office. Written explanation and justification for the action is required by CEQ.

8413.5—Execution, Monitoring, and Evaluating. The decision reached following completion of the environmental statement process should be publicly announced through appropriate means. Programs and Legislation (P&L), WO, should be informed as to the decision reached on the proposed action.

Major Federal programs and projects which may significantly affect the environment must be carefully monitored during the life of the action to ensure that environmental safeguards are executed according to plan.

In some cases, it may be desirable to describe the planned monitoring program in the environmental statement.

As a part of general and functional inspections (FSM 1440) at all organizational levels, inspectors will review the results of plans to protect and enhance the environment. Such a review would compare actual results with planned results and would provide feedback to planners and decisionmakers.

CHAPTER 8420—REVIEW OF OTHER AGENCIES ENVIRONMENTAL STATEMENTS

CONTENTS

8421 Review Responsibility
8422 Review Coordination
8423 Distribution of Comments

8420—FOREST SERVICE REVIEW AND COMMENT ON OTHER AGENCY STATEMENTS. The Forest Service will review and comment on proposals for legislation or other major actions initiated by other agencies as requested and/or determined appropriate to do so because of jurisdiction by law or special expertise with respect to the environmental impact involved.

In those cases where another agency's proposal will involve National Forest System land, the Forest Service is obligated to participate in the review of the proposed Federal action because of jurisdiction by law, and by special expertise. Such proposals, unless fully recognized early in the planning stages could result in major Forest Service replanning of the total area involved. The proposed action will require analysis of environmental effects and the effects on social and economic values.

The Forest Service will respond to other agency statements where it has special expertise or legal jurisdiction even though no National Forest System lands are involved.

In some instances, the review time alloted by the "lead agency" may be insufficient because of the absence of key personnel or other unforeseen circumstances. In such cases, a letter should be written to the responsible official requesting additional time for review. When appropriate, WO Programs and Legislation should be advised of a request by copy of the letter.

When commenting on draft environmental statements from other agencies, the Forest Service will in their letter of transmittal to the requesting agency clearly identify the project by name and number if both are available.

8421—Review Responsibility

1. Legislative or Other Major Policy, Regulations, and National Actions. Unless otherwise assigned by the Chief, review and comment on legislative or other major policy regulations, or national program proposals will be made in the Washington Office.

2. Other Major Federal Actions. The responsible official in whose decision-making subject area or jurisdiction the proposal is located will review and prepare comments. To simplify procedures and instructions to other agencies, Regional Foresters will receive all other agency statements. However, where appropriate, statements should also be directed to the Northern Area Director. The Regional Forester and Area Director in the case of the Eastern Region will arrange coordination and forward the statement to other Forest Service officials, as appropriate.

3. Cooperative Interagency USDA Programs. Where the Forest Service has functional assignments from the Secretary of Agriculture in water and related land resource development programs, it provides input to the environmental statement.

a. Small Watersheds, Flood Prevention Programs, and Type IV River Basin Studies. The SCS, with inputs from the Forest Service at the field level, prepares a working paper of an environmental statement to accompany the draft work plan. It is forwarded to the Washington Office of the Forest Service and SCS. These working papers are labeled "Preliminary Draft" by the SCS. Views and recommendations of other Federal or state agencies that have jurisdiction by law or special expertise may also be included.

These working papers are handled in the same way as comments on the draft work plan. Incorporating comments received from the Washington Offices, the SCS at field level, with FS inputs, revises the work plan and prepares and processes a draft environmental statement. Copies of this draft statement will also be furnished by the Washington Office of the SCS to the Chief's Office (FS) for review and further comment as required. Copies will also be furnished to the Regional Foresters and Directors concerned.

For the cooperative watershed program, the responsible Federal official under the National Environmental Policy Act (NEPA) is the Administrator, SCS, for plans, revisions, or supplements requiring approval by congressional committee; or the State Conservationist for plan which can be approved administratively. For plans which were approved prior to January 1, 1970, the State Conservationist will prepare the environmental statement if one is deemed necessary.

b. River Basin Planning. Environmental statements will be prepared for Framework Studies or Assessments and Regional or River Basin Plans. Environmental statements will also be prepared for Type I and Type II Studies which have not been transmitted by the Water Resources Council (WRC) to tht President.

If the WRC coordinating committee makes the study, the WRC council chairman is designated as the Federal official responsible for preparation and review of the environmental statement. If the River Basin Commission makes the study, the commission chairman is designated as the Federal official responsible for preparation and review of the environmental statement. However, working papers for environmental statements will be prepared during the conduct of such studies by the interagency and coordinating committees. These papers will accompany the proposed study reports under established review procedures.

The Chairman of the WRC or the River Basin Commission shall transmit the draft environmental statement to CEQ at the time a proposed study report is referred to interested Federal, state, and local agencies. A copy of this draft will accompany the study report furnished by the Washington Office of the SCS to the Chief's Office (FS) for review and comment.

Based on comments received from interested agencies, the Council or Commission Chairman revises the draft statement. The final environmental statement, accompanied by all comments received on the draft, is transmitted to CEQ at the time WRC transmits recommendations to the President.

8422—Review Coordination. Agencies requesting review and comment on environmental statements are expected to coordinate review directly with the Forest Service. At the field level, contacts for consultation and environmental statement review are expected to be directly between the responsible official and the lead agency.

Exhibits 1 and 2 show the Federal agencies with jurisdiction by law or special expertise to comment on various types of environmental impacts. However, a more specific and detailed identification of expertise available in other agencies is needed and will be developed by the Washington Office. In particular, expertise in the Social Sciences available to the Forest Service must be identified and arrangements for it use developed.

Regions, Stations, and Areas should also systematically identify expertise available to them in development and review of environmental statements.

AIR

Air Quality and Air Pollution Control

Department of Agriculture—
Forest Service (effects on vegetation).
Department of Health, Education, and Welfare (Health aspects).
Environmental Protection Agency—
Air Pollution Control Office.
Department of the Interior—
Bureau of Mines (fossil and gaseous fuel combustion).
Bureau of Sport Fisheries and Wildlife (wildlife).
Department of Transportation—
Assistant Secretary for Systems Development and Technology (auto emissions).
Coast Guard (vessel emissions).
Federal Aviation Administration (aircraft emissions).

Weather Modification

Department of Commerce—
National Oceanic and Atmospheric Administration.
Department of Defense—
Department of the Air Force.
Department of the Interior—
Bureau of Reclamation.

ENERGY

Environmental Aspects of Electric Energy Generation and Transmission

Atomic Energy Commission (nuclear power).
Environmental Protection Agency—
Water Quality Office.
Air Pollution Control Office.
Department of Agriculture—
Rural Electrification Administration (rural areas).
Department of Defense—
Army Corps of Engineers (hydro-facilities).
Federal Power Commision (hydro-facilities and transmission lines).
Department of Housing and Urban Development (urban areas).
Department of the Interior—(facilities on Government lands).

Natural Gas Energy Development, Transmission and Generation

Federal Power Commission (natural gas production, transmission and supply).
Department of the Interior—
Geological Survey.
Bureau of Mines.

HAZARDOUS SUBSTANCES

Toxic Materials

Department of Commerce—
National Oceanic and Atmospheric Administration.
Department of Health, Education, and Welfare (Health aspects).
Environmental Protection Agency.
Department of Agriculture—
Agricultural Research Service.
Consumer and Marketing Service.
Department of Defense.
Department of the Interior—
Bureau of Sport Fisheries and Wildlife.

Pesticides

Department of Agriculture—
Agricultural Research Service (biological controls, food and fiber production).
Consumer and Marketing Service.
Forest Service.
Department of Commerce—
National Marine Fisheries Service.
National Oceanic and Atmospheric Administration.
Environmental Protection Agency—
Office of Pesticides.
Department of the Interior—
Bureau of Sport Fisheries and Wildlife (effects on fish and wildlife).
Bureau of Land Management.
Department of Health, Education, and Welfare (Health aspects).

Herbicides

Department of Agriculture—
Agricultural Research Service.
Forest Service.
Environmental Protection Agency—
Office of Pesticides.
Department of Health, Education, and Welfare (Health aspects).
Department of the Interior—
Bureau of Sport Fisheries and Wildlife.
Bureau of Land Management.
Bureau of Reclamation.

Transportation and Handling of Hazardous Materials

Department of Commerce—
Maritime Administration.
National Marine Fisheries Service.
National Oceanic and Atmospheric Administration (impact on marine life).
Department of Defense—
Armed Services Explosive Safety Board.
Army Corps of Engineers (navigable waterways).
Department of Health, Education, and Welfare—
Office of the Surgeon General (Health aspects).
Department of Transportation—
Federal Highway Administration Bureau of Motor Carrier Safety.
Coast Guard.
Federal Railroad Administration.
Federal Aviation Administration.
Assistant Secretary for Systems Development and Technology.
Office of Hazardous Materials.
Office of Pipeline Safety.
Environmental Protection Agency (hazardous substances).
Atomic Energy Commission (radioactive substances).

LAND USE AND MANAGEMENT

Coastal Areas: Wetlands, Estuaries, Waterfowl Refuges, and Beaches

Department of Agriculture—
Forest Service.
Department of Commerce—
National Marine Fisheries Service (impact on marine life).
National Oceanic and Atmospheric Administration (impact on marine life).
Department of Transportation—
Coast Guard (bridges, navigation).
Department of Defense—
Army Corps of Engineers (beaches, dredge and fill permits, Refuse Act permits).
Department of the Interior—
Bureau of Sport Fisheries and Wildlife.
National Park Service.
U.S. Geological Survey (coastal geology).
Bureau of Outdoor Recreation (beaches).
Department of Agriculture—
Soil Conservation Service (soil stability, hydrology).
Environmental Protection Agency—
Water Quality Office.

V 38-149 AUG 3 73 XUM

Historic and Archeological Sites
Department of the Interior—
National Park Service.
Advisory Council on Historic Preservation.
Department of Housing and Urban Development (urban areas).

Flood Plains and Watersheds
Department of Agriculture—
Agricultural Stabilization and Research Service.
Soil Conservation Service.
Forest Service.
Department of the Interior—
Bureau of Outdoor Recreation.
Bureau of Reclamation.
Bureau of Sport Fisheries and Wildlife.
Bureau of Land Measurement.
U.S. Geological Survey.

Soil Conservation Service

BURNT CREEK RC&D MEASURE FOR FLOOD PREVENTION, BURLEIGH COUNTY, NORTH DAKOTA

Availability of Final Environmental Statement

Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969, the Soil Conservation Service, Department of Agriculture has prepared a final environmental statement for the Burnt Creek RC&D Measure Plan, Burleigh County, North Dakota, USDA–SCS–ES–RD–(ADM)–73–20–(F).

The environmental statement concerns a plan for reducing floodwater damage in the lower Burnt Creek Watershed. About 0.7 mile of floodway with dikes and about 2.0 miles of dikes alone will be constructed. The project plan further provides that five acres of woody habitat will be dedicated to wildlife for the life of the project and streambanks along the present Burnt Creek channel will be protected from clearing.

The final environmental statement was transmitted to CEQ on July 23, 1973.

Copies are available for inspection during regular working hours at the following locations:

USDA, Soil Conservation Service, Washington Office, South Agriculture Building, Room 5105A, 12th Street and Independence Avenue S.W., Washington, D.C. 20250.

USDA, Soil Conservation Service, Federal Building, Rosser Avenue and Third Street, Post Office Box 1458, Bismarck, North Dakota 58501.

Copies are also available from the National Technical Information Service, U.S. Department of Commerce, Springfield, Virginia 22151. Please order by name and number of statement. The estimated cost is $4.25.

Copies of the environmental statement have been sent to various federal, state, and local agencies as outlined in the Council on Environmental Quality Guidelines.

Dated: July 27, 1973.

EARL E. FENTON,
Acting Deputy Administrator for Field Services, Soil Conservation Service.

(Catalog of Federal Domestic Assistance Program No. 10.901 and 10.904, National Archives Reference Services.)

DEPARTMENT OF COMMERCE

Maritime Administration

[Docket No. S–375]

OPERATING-DIFFERENTIAL SUBSIDY FOR CARRIAGE OF BULK CARGO PRINCIPALLY BETWEEN THE U.S. AND U.S.S.R.

Notice of Multiple Applications

Notice is hereby given that the corporations listed in Appendix A have filed applications for extension of operating-differential subsidy contracts to carry bulk cargoes to expire on December 31, 1973 (unless extended only for subsidized voyages in progress on that date). The bulk cargo carrving vessels proposed to be subsidized and a description of each of such vessels are also presented in Appendix A.

Said applications may be inspected in the Office of the Secretary, Maritime Subsidy Board, Maritime Administration, U.S. Department of Commerce, Washington, D.C., during regular working hours.

These vessels are to engage in the carriage of export bulk, raw and processed agricultural commodities in the foreign commerce of the United States (U.S.) from ports in the United States to ports in the Union of Soviet Socialist Republics (U.S.S.R.), or other permissible ports of discharge. Liquid and dry bulk cargoes may be carried from U.S.S.R. and other foreign ports inbound to U.S. ports during voyages subsidized for carriage of export bulk, raw and processed agricultural commodities to the U.S.S.R.

Full details concerning the U.S.-U.S.S.R. export bulk, raw and processed agricultural commodities subsidy program, including terms, conditions, and restrictions upon both the subsidized operators and vessels, appear in the regulations published in the FEDERAL REGISTER on October 21, 1972 (37 FR 22747).

For purposes of section 605(c), Merchant Marine Act, 1936, as amended (Act), it should be assumed that each vesssel named will engage in the trades described on a full-time basis through December 31, 1973 (with extension to termination of approved subsidized voyages in progress on that date). Each voyage must be approved for subsidy before commencement of the voyage. The Maritime Subsidy Board (Board) will act on each request for a subsidized voyage as an administrative matter under the terms of the individual operating-differential subsidy contract for which there is no requirement for further notices under section 605(c) of the Act.

The Board has previously found during fiscal year 1973, that section 605(c) was no bar to the grant of operating-differential subsidy to each of the applicants listed in Appendix A.

Any person having an interest in the granting of one or any of such applications and who would contest a finding of the Board that the service now provided by vessels of U.S. registry for the carriage of cargoes as previously specified is inadequate, must, on or before August 8, 1973, notify the Board's Secretary, in writing, of his interest and of his position, and file a petition for leave to intervene in accordance with the Board's rules of practice and procedure (46 CFR Part 201). Each such statement of interest and petition to intervene shall state whether a hearing is requested under section 605(c) of the Act and with as much specificity as possible the facts that the intervenor would undertake to prove at such hearing. Further, each such statement shall identify the applicant or applicants against which the intervention is lodged.

In the event requests for hearing and petitions regarding the relevant section 605(c) issues are received from parties with standing to be heard, a hearing has been tentatively scheduled commencing at 10 a.m., August 9, 1973, and continuing on succeeding business days if required, in Room 4896, Department of Commerce Building, 14th and E Streets, NW, Washington, D.C. 20235. The purpose of the hearing will be to receive evidence relevant to (1) whether the application(s) hereinabove described is one with respect to vessels to be operated in an essential service, served by citizens of the United States which would be in addition to the existing service, or services, and if so, whether the service already provided by vessels of U.S. registry is inadequate and (2) whether in the accomplishment of the purposes and policy of the Act additional vessels should be operated thereon. Evidence concerning each application will be heard in the order in which applicants are listed in Appendix A.

If no request for hearing and petition for leave to intervene is received within the specified time, or if the Board determines that petitions for leave to intervene filed within the specified time do not demonstrate sufficent interest to warrant a hearing, the Board will take such action as may be deemed appropriate.

Dated: August 1, 1973.

By order of the Maritime Subsidy Board.

JAMES S. DAWSON, Jr.,
Secretary.

National Bureau of Standards

PAINTS, VARNISHES AND RELATED PRODUCTS

Withdrawal of Voluntary Product Standard

In accordance with § 10.12 of the Department's "Procedures for the Development of Voluntary Product Standards" (15 CFR Part 10, as revised; 35 FR 8349 dated May 28, 1970), notice is hereby given of the withdrawal of Simplified Practice Recommendation R 144–60, "Paints, Varnishes, and Related Products." This action is taken in furtherance of the Department's announced intention, as set forth in the public notice appearing in the Federal Register of January 15, 1973 (38 FR 1524), to withdraw this standard.

The effective date for the withdrawal of this standard will be October 2, 1973. This withdrawal action terminates the authority to refer to this standard as a voluntary standard developed under the Department of Commerce Procedures.

Date: July 30, 1973.

RICHARD W. ROBERTS,
Director.

[FR Doc.73–16034 Filed 8–2–73;8:45 am]

DIAZOTYPE AND BLUEPRINT PAPER

Withdrawal of Voluntary Product Standard

In accordance with § 10.12 of the Department's "Procedures for the Development of Voluntary Product Standards" (15 CFR Part 10, as revised; 35 FR 8349 dated May 28, 1970), notice is hereby given of the withdrawal of Simplified Practice Recommendation SPR 260–57, "Diazotype and Blueprint Paper."

This action is taken in furtherance of the Department's announced intention, as set forth in the public notice appearing in the Federal Register of May 18, 1973 (38 FR 13044), to withdraw this standard.

The effective date for the withdrawal of this standard will be Oct. 2, 1973. This withdrawal action terminates the authority to refer to this standard as a voluntary standard developed under the Department of Commerce Procedures.

Date: July 30, 1973.

RICHARD W. ROBERTS,
Director.

VOLUNTARY PRODUCT STANDARDS

Notice of Withdrawal

In accordance with § 10.12 of the Department's "Procedures for the Development of Voluntary Product Standards" (15 CFR Part 10, as revised; 35 F.R. 8349 dated May 28, 1970), notice is hereby given of the withdrawal of the seven standards identified below:

CS 231A–60, "Aircraft Hangar Doors Manually-Operated Horizontal Sliding Type (Steel Frame)"

CS 231B–61, "Aircraft Hangar Doors of the Individually Power-Operated Horizontal Sliding Type (Steel Frame)"

V38-149 AUG 3 73 XUM

CS 231C-63, "Aircraft Hangar Doors of the Partial Group Power-Operated Horizontal Sliding Type (Steel Frame)"
CS 231D-63, "Aircraft Hangar Doors of the Full Group Power-Operated Horizontal Sliding Type (Steel Frame)"
CS 231E-63, "Aircraft Hangar Doors of the Power-Operated Unbraced-Canopy Type (Steel Frame)"
SPR 258-56, "One-Pound Eastern Flat Margarine Carton"
SPR 261-58, "One-Pound Elgin-Style Butter Carton Sizes"

This action is taken in furtherance of the Department's announced intention, as set forth in the public notice appearing in the FEDERAL REGISTER of March 3, 1972 (37 FR 4459), to withdraw these seven standards.

The effective date for the withdrawal of these standards will be October 2, 1973. This withdrawal action terminates the authority to refer to these standards as voluntary standards developed under the Department of Commerce Procedures.

Date: July 30, 1973.

RICHARD W. ROBERTS,
Director.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Office of the Secretary

STATEMENT OF ORGANIZATION AND FUNCTIONS

Office of Administration and Management

1R90 *Mission.* The Office of Administration and Management will provide administrative and management services to OS/HD offices. It will develop and recommend to the Assistant Secretary, policy, systems procedures, plans, organizational changes and management improvement strategies and assist with the implementation of approved strategies throughout HD. Will serve as the focal point for ASHD budget activities including consolidating, analyzing and presenting budget estimates; develop budget policies and procedures; and serves as liaison with the Assistant Secretary, Comptroller on matters related to budget, audit and accounting. Will be responsible for financial activities including the review of expenditure plans submitted by program offices and develops expenditure reports and special analysis as requested by the Assistant Secretary and program directors.

Will develop, coordinate and implement grant policy and procedures consistent with DHEW and OMB requirements. Will be responsible for grants administration including the development of procedures and requirements for processing grant applications prior to approval. Serves as liaison with OS Contract Office on matters related to procurement policies, procedures and requirements. Provides technical assistance and support to program offices in implementing, interpreting OSHD contract review procedures and requirements. Will be responsible for management analysis including management and organizational statistics, manpower utilization, methods and cost analysis, management systems and standards. Will provide leadership in the development of a unified data management system for ASHD program offices. Will serve as a focal point for special studies initiated by the Assistant Secretary, Department, OMB, and Congress. Will provide administrative support services including procurement, space management, travel requests and reimbursements claims and other general administrative duties. Will serve as the primary liaison with the OS Personnel Office.

1R90.1 *Organization.* The Office of Administration and Management consists of the following organizational elements which report to the Director: 1. Budget and Financial Management Division, 2. Grants and Contract Management Division, and 3. Administrative and Management Services Division.

1R91 *Functions.* A. *Office of the Director.* The Director of the Administration and Management unit is responsible for coordinating all of the elements of the Office of Administration and Management. The Director reports directly to the Assistant Secretary for Human Development. The Division Directors of the various organizational elements of Administration and Management report directly to him. He is responsible for all grants, budget, finance, and administrative management services for all of the offices in the Office of Human Development.

B. *Budget and Financial Management Division.* The Budget and Financial Management Division will be responsible for the consolidation, preparation, and presentation of ASHD's budget estimates. Will provide staff assistance and technical support to program offices in formulating budget estimates. Will analyze and make recommendations on budget requirements to the Assistant Secretary and program directors. Will develop, implement, and maintain a system for financial management and expenditure controls within OSHD. Serves as liaison with the OSC on matters related to budget planning and accounting. Will coordinate OSP planning with HD Planning and Analysis Staff. Prepares financial analysis and special reports at the request of the Secretary and program offices. Serves as the primary liaison with the Regional Comptroller on matters relating to HD budget.

C. *Grants and Contract Management Division.* The Grants and Contract Management Division will serve as the focal point for planning, implementing and interpreting HD's, DHEW's, and OMB's grants and contract regulations, policies and procedures. Will provide staff support and assistance to HD program offices in grant and contract review activities. Will provide assistance with grant processing for all headquarters grant awards and serve as primary liaison with OS Contract Office, DHEW Audit Agency and the Office of Grants Administration Policy on matters related to grants and contract activities.

D. *Administrative and Management Services Division.* The Administrative and Management Services Division will be responsible for planning and directing the administrative and management support activities of HD headquarters offices. Will provide technical and staff assistance in management analysis, manpower utilization and information systems development. Will serve as the focal point for DHEW and OMB initiated studies. Will be responsible for personnel liaison services, space management and planning, travel services, supplies and equipment, purchase and procurement activities and other general administrative duties. Will serve as primary liaison with OS Personnel operations and OS Office of Administrative Services.

Dated: July 27, 1973.

ROBERT H. MARIK,
Assistant Secretary for Administration and Management.

STERILIZATION GUIDELINES

Departmental Policy

Notice is hereby given that the Secretary has approved and issued the attached Guidelines for Sterilization Procedures Under HEW Supported Programs. The policies stated in the Guidelines will be implemented through regulations to be issued, after notice of proposed rule making, by the affected agencies within the Department.

Interested persons are invited to submit written comments, suggestions or objections regarding the attached Guidelines to the Assistant Secretary for Health, Attention: Deputy Assistant Secretary for Population Affairs, Room 4069, 330 Independence Avenue, SW., Washington, D.C. 20201. Comments received in response to this notice will be considered in the preparation of proposed regulations and final regulations to be hereafter issued implementing the policies stated herein. All relevant material received before the issuance of such proposed regulations will be considered.

Dated: July 23, 1973.

CHARLES C. EDWARDS,
Assistant Secretary for Health.

Dated: July 23, 1973.

To: Assistant Secretary for Health Commissioner, SSA; Administrator, SRS.
From: Frank Carlucci, for The Secretary.
Subject: Regulations for Sterilization Procedures under the HEW Supported Programs.

I have approved the attached General Guidelines Limiting Federal Financial Assistance for Sterilization of Minors and Other Legally Incompetent Individuals for all programs administered by this Department. Accordingly, you should prepare appropriate proposed regulations to implement these guidelines in each program that you administer which involves possible Federal financial assistance for sterilization of minors or other legally incompetent individuals. Your proposed regulations should be submitted to me for my review and approval by August 20, 1973. The Assistant Secretary for Health is assigned the coordination of this task.

Pending the effective date of the final regulation in any program to which the Guidelines apply, Federal financial participation should be withheld from any sterilization procedure performed on an individual who is under the age of 21 or who is himself legally incapable of consenting to the sterilization.

GENERAL GUIDELINES LIMITING FEDERAL FINANCIAL ASSISTANCE FOR STERILIZATION OF MINORS AND OTHER LEGALLY INCOMPETENT INDIVIDUALS

1. These guidelines are applicable to programs or projects supported in whole or in part by Federal financial assistance administered by the Department of Health, Education, and Welfare.

2. No HEW Agency shall provide Federal financial assistance to any program or project for the performance of a sterilization on any individual who is under the age of twenty-one or who is legally incapable of consenting to the sterilization for himself or herself unless a Review Committee (as described in paragraph 4 of these guidelines) has reviewed and approved the sterilization.

3. In addition to the procedure described in paragraph 2, if the individual involved is legally incapable of consenting, the proposed sterilization approved by the Review Committee shall not be performed until it has been determined by a court of competent jurisdiction to be in the best interest of the patient.

4. The Review Committee referred to in paragraph 2 shall be composed of not less than five members selected by responsible authorities of the program or project. The members shall be so selected that the Committee will be competent to deal with the medical, legal, social, and ethical issues involved in sterilization. No member may be an officer, employee or other representative of the program or project under which the procedure is proposed, nor may he or she be otherwise involved in the proposed procedure. Both sexes shall be represented on the Committee, and at least one member shall be a representative of the interests of the population served by the program or project.

5. The duties of the Review Committee shall be:

a. to review appropriate medical, social, and psychological information concerning the patient, including the age of the patient, alternative family planning methods, and the adequacy of consent;

b. to interview concerned individuals as well as others who in its judgment will contribute pertinent information;

c. to determine the sufficiency of any consent and whether the proposed sterilization procedure is in the best interest of the patient; and

d. to maintain records of its determinations, the reasons therefor, and supporting documentation. Such records shall be transmitted to and maintained by the program or project as part of the permanent record of the patient. The records shall be available for examination by the Secretary or his delegate to determine compliance with these guidelines.

6. Whenever the Committee determines that a sterilization on an individual described in paragraph 3 is appropriate, the program or project shall arrange to obtain the required court determination.

7. The program or project shall report to the Secretary or his delegate, at least annually, the number and nature of the sterilizations subject to the procedures set forth in paragraphs 2 and 3, the number of Committee disapprovals of such sterilizations, the number and nature of conditional Committee approvals, and such other relevant information regarding such procedures as the Secretary may request.

8. These guidelines are by way of limitation and are not intended to require any recipient to provide or arrange for the provision of sterilization.

DEPARTMENT OF TRANSPORTATION

Coast Guard

[CGD 73-159N]

TEMPORARY PONTOON BRIDGE OVER COLORADO RIVER NEAR CIBOLA, ARIZONA

Approval of Location and Plans and Operation Regulations

The First Marine Division, U.S. Marine Corps, Camp Pendleton, California, has applied for a permit to construct a temporary pontoon bridge across the Colorado River near Cibola, Arizona, immediately downstream of a site known as Taylors Ferry at mile 304.2.

The purpose of this project is to train armed forces personnel in the rapid construction and removal of a military floating bridge. The exercises will involve repetitions of construction and removal of the bridge on a weekly basis. Construction and removal operations will be conducted from 6 August 1973 through 19 September 1973. These operations will commence each Monday or Tuesday, and be completed by Friday of each week. The bridge will completely obstruct the waterway for no more than 36 hours during the period Tuesday through Thursday of each week. The bridge can be opened for the passage of emergency vessels upon notice of not less than 30 minutes.

These bridge construction training exercises are essential to the military readiness of the Seventh Engineering Battalion and the First Bridge Company of the U.S. Marine Corps to conduct their mission in support of the national defense. This time period selected has been determined to be the most suitable time for the conduct of the exercises. The personnel of the military units involved will camp and base their operations upon adjacent land under the supervision and control of the Bureau of Land Management, Department of the Interior. The selected site has been utilized for similar exercises in 1967, 1968, and 1969. Both the Bureau of Land Management and the Marine Corps prepared environmental impact analyses which generally indicate that the proposed exercises and bridge construction project will not have any significant or long-range impact on the environment.

The proposed bridge project is a military function exempted from the public participation provisions of the Administrative Procedure Act (5 U.S.C. 551-559). Notice and opportunity for public participation thereon have therefore been omitted.

Pursuant to the provisions of the General Bridge Act of 1946 (33 U.S.C. 525) the location and plans of the proposed pontoon bridge are hereby approved (Permit No. 77-73) subject to the following conditions:

1. No deviation from the approved plans may be made either before or after each recurring construction of the structure unless modification of said plans has been previously submitted to and received approval of the Commandant. However, the location of the structure, positioning of the kedge anchors, suspension cable and other component parts may vary within the immediate vicinity without further approval.

2. All work shall be so conducted that the free navigation of the waterway is not unreasonably interfered with as determined by the operation regulations herein following and the present navigable depths are not impaired. The waterway shall be promptly cleared of all obstructions upon completion of the exercise on or before 20 September 1973.

3. Issuance of this approval of location and plans does not relieve the Marine Corps of the obligation or responsibility for compliance with the provision of any other law or regulation as may be under the jurisdiction of the Bureau of Land Management or any other federal, state or local authority having cognizance of any aspect of the location, maintenance or operation of the bridge and its approaches.

4. Excepting for a 36 hour period which may occur any time from Tuesday through Thursday each week, a clear channel through the bridge shall be maintained with a minimum horizontal clearance normal to the channel of 30 feet.

5. Navigation lights as prescribed or approved by the Commander, Eleventh Coast Guard District, shall be installed and maintained in accordance with 33 CFR 68.

Pursuant to the provisions of 33 U.S.C. 499, Regulations for Drawbridges, * * *, the pontoon bridge shall be operated as follows:

1. From 6 August 1973 through 19 September 1973, Monday through Friday, the bridge shall open within 30 minutes for the passage of emergency vessels and provide a clear channel of a minimum horizontal clearance normal to the channel of 30 feet.

2. The bridge may be closed to the passage of navigation for 36 hours any time during the period Tuesday through Thursday each week.

3. The bridge shall be removed from the waterway on Saturday and Sunday each week except that pontoon sections may be moored along the banks of the waterway so as to not unreasonably protrude into the channel.

4. The Marine Corps shall publish notices weekly in local newspapers and post notices in marinas located in the general vicinity of the pontoon bridge stating the general manner of its operations. The notices shall contain sufficient information to be meaningful to vessel operators.

V 38 149 AUG 3 73 XUM

(Sec. 5, 28 Stat. 362, as amended, Sec. 6(g)(2), 80 Stat. 937; 33 U.S.C. 499, 49 U.S.C. 165J (g)(2); 49 CFR 1.46(c)(5).)

Effective Date: July 31, 1973.

W. M. BENKERT,
Rear Admiral, U.S. Coast Guard, Chief, Office of Marine Environment and Systems.

ATOMIC ENERGY COMMISSION

[Docket Nos. 40-438, 50-439]

TENNESSEE VALLEY AUTHORITY

Notice of Receipt of Application for Construction Permits and Facility Licenses and Availability of Applicant's Draft Environmental Statement

The Tennessee Valley Authority (the applicant), pursuant to Section 103 of the Atomic Energy Act of 1954, as amended, has filed an application, which was docketed June 21, 1973, for authorization to construct and operate two generating units utilizing pressurized water nuclear reactors. The application was tendered on May 14, 1973. Following a preliminary review for completeness, it was accepted on June 14, 1973 for docketing.

The proposed nuclear facility, designated by the applicant as the Bellefonte Nuclear Plant, Units 1 and 2, is located at the Bellefonte site in Jackson County, Alabama, approximately six miles northeast of Scottsboro, Alabama. Each unit is designed for initial operation at a core power level of 3413 megawatts (thermal), and a gross electrical output of 1329 megawatts.

A Notice of Hearing with opportunity for public participation is being published separately.

Any person who wishes to have his views on the antitrust aspects of the application presented to the Attorney General for consideration shall submit such views to the U.S. Atomic Energy Commission, Washington, D.C. 20545, Attention: Chief, Office of Antitrust and Indemnity, Directorate of Licensing, on or before September 4, 1973. The request should be filed in connection with Docket Nos. 50-438-A and 50-439-A.

A copy of the application is available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C. 20545, and at the Scottsboro Public Library, 1002 South Broad Street, Scottsboro, AL 35768.

The applicant has also filed, pursuant to the National Environmental Policy Act of 1969 and the regulations of the Commission in Appendix D to 10 CFR Part 50, a Draft Environmental Statement (in lieu of an environmental report) since TVA like other Federal agencies is subject to the requirements of Section 102 of the National Environmental Policy Act of 1969. The Statement (report) has been made available for public inspection at the aforementioned locations. The Statement, which discusses environmental considerations related to the proposed construction of the Bellefonte Nuclear Plant, Units 1 and 2, is also being made available at the Alabama Development Office, State Office Building, Montgomery, Alabama 36104 and Top of Alabama Regional Council of Governments, P.O. Box 308, City Hall 6th Floor, Huntsville, Alabama 35801.

After TVA's Statement has been analyzed by the Commission's Director of Regulation or his designee, an AEC Draft Environmental Statement will be prepared in accordance with the Commission's procedures in Appendix D to 10 CFR Part 50. Upon preparation of the AEC Statement, the Commission will, among other things, cause to be published in the FEDERAL REGISTER a summary notice of its availability requesting comments from interested persons. The summary notice will also state that comments of Federal agencies and State and local officials on the AEC Statement will be made available when received.

Dated at Bethesda, Maryland, this 23rd day of July 1973.

For the Atomic Energy Commission.

A. SCHWENCER,
Chief, Pressurized Water Reactors, Branch No. 4, Directorate of Licensing.

[FR Doc 73-15782 Filed 8-2-73;8:45 am]

[Docket Nos. 50-438 and 50-439]

TENNESSEE VALLEY AUTHORITY

Notice of Hearing on Application for Construction Permits

In the matter of Tennessee Valley Authority, Bellefonte Nuclear Plant, Units 1 and 2.

Pursuant to the Atomic Energy Act of 1954, as amended (the Act), and the regulations in Title 10, Code of Federal Regulations, Part 50, "Licensing of Production and Utilization Facilities," and Part 2, "Rules of Practice," notice is hereby given that a hearing will be held, at a time and place to be set in the future by an Atomic Safety and Licensing Board (Board), to consider the application filed under the Act by the Tennessee Valley Authority (the applicant), for construction permits for two pressurized water nuclear reactors designated as the Bellefonte Nuclear Plant, Units 1 and 2 (the facilities), each of which is designed for initial operation at approximately 3,413 thermal megawatts with a gross electrical output of approximately 1,329 megawatts. The proposed facilities are to be located at the Bellefonte site in Jackson County, Alabama, approximately six miles northeast of Scottsboro, Alabama. The hearing will be held in the vicinity of the site of the proposed facilities.

The Board will be designated by the Atomic Energy Commission (Commission) or the Chairman of the Atomic Safety and Licensing Board Panel. Notice as to its membership will be published in the FEDERAL REGISTER.

Upon completion by the Commission's regulatory staff of a favorable safety evaluation of the application and an environmental review and upon receipt of a report by the Advisory Committee on Reactor Safeguards, the Director of Regulation will consider making affirmative findings on Items 1–3, a negative finding on Item 4, and an affirmative finding on Item 5 specified below as a basis for the issuance of construction permits to the applicant:

ISSUES PURSUANT TO THE ATOMIC ENERGY ACT OF 1954, AS AMENDED

1. Whether in accordance with the provisions of 10 CFR § 50.35(a):

(a) The applicant has described the proposed design of the facilities including, but not limited to, the principal architectural and engineering criteria for the design, and has identified the major features or components incorporated therein for the protection of the health and safety of the public;

(b) Such further technical or design information as may be required to complete the safety analysis and which can reasonably be left for later consideration, will be supplied in the final safety analysis report;

(c) Safety features or components, if any, which require research and development have been described by the applicant and the applicant has identified, and there will be conducted a research and development program reasonably designed to resolve any safety questions associated with such features or components; and

(d) On the basis of the foregoing, there is reasonable assurance that (i) such safety questions will be satisfactorily resolved at or before the latest date stated in the application for completion of construction of the proposed facilities, and (ii) taking into consideration the site criteria contained in 10 CFR Part 100, the proposed facilities can be constructed and operated at the proposed location without undue risk to the health and safety of the public.

2. Whether the applicant is technically qualified to design and construct the proposed facilities;

3. Whether the applicant is financially qualified to design and construct the proposed facilities; and

4. Whether the issuance of permits for construction of the facilities will be inimical to the common defense and security or to the health and safety of the public.

ISSUE PURSUANT TO NATIONAL ENVIRONMENTAL POLICY ACT OF 1969 (NEPA)

5. Whether, in accordance with the requirements of Appendix D of 10 CFR Part 50, the construction permits should be issued as proposed.

In the event that this proceeding is not a contested proceeding, as defined by 10 CFR § 2.4(n), the Board will determine (1) without conducting a de novo evaluation of the application, whether the application and the record of the proceeding contain sufficient information, and the review of the application by the Commission's regulatory staff has been adequate, to support the findings proposed to be made by the Director of Regulation on Items 1–4 above, and to support, insofar as the Commission's licensing requirements under the Act are concerned, the issuance of the construction permits proposed by the Director of Regulation; and (2) determine whether the review conducted by the Commission pursuant to NEPA has been adequate. In the event that this proceeding is not contested, the Board will convene a prehearing conference of the parties at a time and place to be set by the Board. It will also set the schedule for the evidentiary hearing. Notice of the prehearing conference and the hearing will be published in the FEDERAL REGISTER.

In the event that this proceeding becomes a contested proceeding, the Board will consider and initially decide, as issues in this proceeding, Items 1–5 above as a basis for determining whether the construction permits should be issued to the applicant.

The Board will convene a special prehearing conference of the parties to the proceeding and persons who have filed petitions for leave to intervene, or their counsel, to be held at such time as may be appropriate, at a place to be set by the Board for the purpose of dealing with the matters specified in 10 CFR § 2.751a. Notice of the special prehearing conference will be published in the FEDERAL REGISTER.

The Board will convene a prehearing conference of the parties, or their counsel, to be held subsequent to any special prehearing conference, after discovery has been completed, or within such other time as may be appropriate, at a time and place to be set by the Board for the purpose of dealing with the matters specified in 10 CFR § 2.752.

With respect to the Commission's responsibilities under NEPA, and regardless of whether the proceeding is contested or uncontested, the Board will, in accordance with section A.11 of Appendix D of 10 CFR Part 50, (1) determine whether the requirements of section 102 (2) (C) and (D) of NEPA and Appendix D of 10 CFR Part 50 have been complied with in this proceeding; (2) independently consider the final balance among conflicting factors contained in the record of the proceeding with a view to determining the appropriate action to be taken; and (3) determine whether the construction permits should be issued, denied, or appropriately conditioned to protect environmental values.

For further details, see the application for construction permits dated June 19, 1973, and amendments thereto, and TVA's Draft Environmental Statement, which was submitted in lieu of an environmental report, which are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C., between the hours of 8:30 a.m. and 5:00 p.m. on weekdays. Copies of those documents will also be made available at the Scottsboro Public Library, 1002 South Broad Street, Scottsboro, Alabama for inspection by members of the public. As they become available, a copy of the safety evaluation by the Commission's Directorate of Licensing, the Commission's draft and final detailed statements on environmental considerations, the report of the Advisory Committee on Reactor Safeguards (ACRS), the proposed construction permits, other relevant documents, and the transcripts of the prehearing conferences and of the hearing will also be available at the above locations. Copies of the Directorate of Licensing's safety evaluation and the Commission's final detailed statement on environmental considerations, the proposed construction permits, and the ACRS report may be obtained, when available, by request to the Deputy Director for Reactor Projects, Directorate of Licensing, United States Atomic Energy Commission, Washington, D.C. 20545.

Any person who does not wish to, or is not qualified to become a party to this proceeding may request permission to make a limited appearance pursuant to the provisions of 10 CFR § 2.715. A person making a limited appearance may only make an oral or written statement on the record, and may not participate in the proceeding in any other way. Limited appearances will be permitted at the time of the hearing in the discretion of the Board, within such limits and on such conditions as may be fixed by the Board. Persons desiring to make a limited appearance are requested to inform the Secretary of the Commission, United States Atomic Energy Commission, Washington, D.C. 20545, not later than September 4, 1973.

A person permitted to make a limited appearance does not become a party, but may state his position and raise questions which he would like to have answered to the extent that the questions are within the scope of the hearing as specified in the issues set out above.

Any person whose interest may be affected by the proceeding, who does not wish to make a limited appearance and who wishes to participate as a party in the proceeding must file a written petition under oath or affirmation for leave to intervene in accordance with the provisions of 10 CFR § 2.714.

A petition for leave to intervene shall set forth the interest of the petitioner in the proceeding, how that interest may be affected by the results of the proceeding, and any other contentions of the petitioner including the facts and reasons why he should be permitted to intervene, with particular reference to the following factors: (1) the nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. Any such petition shall be accompanied by a supporting affidavit identifying the specific aspect or aspects of the subject matter of the proceeding as to which the petitioner wishes to intervene and setting forth with particularity both the facts pertaining to his interest and the basis for his contentions with regard to each aspect on which he desires to intervene. A petition that sets forth contentions relating only to matters outside the jurisdiction of the Commission will be denied.

A petition for leave to intervene must be filed with the Office of the Secretary of the Commission, United States Atomic Energy Commission, Washington, D.C. 20545, Attention: Chief, Public Proceedings Staff, or may be delivered to the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C., not later than September 4, 1973.

A petition for leave to intervene which is not timely will not be granted unless the Board determines that the petitioner has made a substantial showing of good cause for failure to file on time and after the Board has considered those factors specified in 10 CFR § 2.714(a)(1)–(4) and § 2.714(d).

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have all the rights of the applicant to participate fully in the conduct of the hearing, such as the examination and cross-examination of witnesses, with respect to their contentions related to the matters at issue in the proceeding.

An answer to this notice, pursuant to the provisions of 10 CFR § 2.705, must be filed by the applicant not later than August 23, 1973.

Papers required to be filed in this proceeding may be filed by mail or telegram addressed to the Secretary of the Commission, United States Atomic Energy Commission, Washington, D.C. 20545, Attention: Chief, Public Proceedings Staff, or may be filed by delivery to the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. A copy of the petition or request for limited appearance should also be sent to the Chief Hearing Counsel, Office of the General Counsel, U.S. Atomic Energy Commission, Washington, D.C. 20545 and to Robert H. Marquis, Esquire, 629 New Sprankle Building, Knoxville, Tennessee 37919, attorney for the applicant.

Pending further order of the Board, parties are required to file, pursuant to the provisions of 10 CFR § 2.708, an original and twenty (20) conformed copies of each such paper with the Commission.

With respect to this proceeding, pursuant to 10 CFR § 2.785, an Atomic Safety and Licensing Appeal Board will exercise the authority and the review function which would otherwise be exercised and performed by the Commission. Notice as to the membership of the Appeal Board will be published in the FEDERAL REGISTER.

UNITED STATES ATOMIC ENERGY COMMISSION,
GORDON M. GRANT,
Acting Secretary of the Commission.

Dated at Germantown, Maryland, July 30, 1973.

CIVIL SERVICE COMMISSION

FEDERAL EMPLOYEES PAY COUNCIL

Notice of Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act, Public Law 92-463, notice is hereby given that the Federal Employees Pay Council will meet at 2 p.m. on Friday, August 3, 1973, to continue discussions on the fiscal year 1974 comparability adjustment for the statutory pay systems of the Federal Government.

In accordance with the provisions of section 10(d) of the Federal Advisory Committee Act, it has been determined by the Director of the Office of Management and Budget and the Chairman of the Civil Service Commission, who serve jointly as the President's Agent for the purposes of the Federal pay comparability process, that this meeting of the Federal Employees Pay Council will not be open to the public.

For the President's Agent.

FRANK S. MELLOR,
Advisory Committee Management Officer for the President's Agent.

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

CERTAIN COTTON TEXTILES AND COTTON TEXTILE PRODUCTS PRODUCED OR MANUFACTURED IN NICARAGUA

Entry or Withdrawal From Warehouse for Consumption

On September 5, 1972, the United States Government, in furtherance of the objectives of, and under the terms of, the Long-Term Arrangement Regarding International Trade in Cotton Textiles done at Geneva on February 9, 1962, concluded a comprehensive bilateral cotton textile agreement with the Government of Nicaragua concerning exports of cotton textiles and cotton textile products from Nicaragua to the United States over a five-year period beginning August 1, 1972. Among the provisions of the agreement are those establishing an aggregate limit for the 64 categories and within the aggregate limit specific limits on Categories 9/10, 15/16, 22/23, and 26/27 (other than duck) for the agreement year beginning August 1, 1973.

There is published below a letter of July 27, 1973 from the Chairman of the Committee for the Implementation of Textile Agreements to the Commissioner of Customs, directing that the amounts of cotton textiles and cotton textile products in Categories 9/10, 15/16, 22/23, and 26/27 (other than duck) produced or manufactured in Nicaragua which may be entered or withdrawn from warehouse for consumption in the United States for the twelve-month period beginning August 1, 1973, be limited to the designated levels. The letter published below and the actions pursuant thereto are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

SETH M. BODNER,
Chairman, Committee for the Implementation of Textile Agreements, and Deputy Assistant Secretary for Resources and Trade Assistance.

Commissioner of Customs
Department of the Treasury
Washington, D.C. 20229

Dear Mr. Commissioner: Under the terms of the Long-Term Arrangement Regarding International Trade in Cotton Textiles done at Geneva on February 9, 1962, pursuant to the Bilateral Cotton Textile Agreement of September 6, 1972, between the Governments of the United States and Nicaragua, and in accordance with Executive Order 11651 of March 3, 1972, you are directed to prohibit, effective as soon as possible, and for the twelve-month period beginning August 1, 1973 and extending through July 31, 1974, entry into the United States for consumption and withdrawal from warehouse for consumption of cotton textiles and cotton textile products in Categories 9/10, 15/16, 22/23, and 26/27 (other than duck), produced or manufactured in Nicaragua, in excess of the following twelve-month levels of restraint:

Category	*Twelve-Month Levels of Restraint*
9/10	1,050,000 square yards
15/16	1,050,000 square yards
22/23	1,050,000 square yards
26/27 (other than duck)[1]	2,100,000 square yards

In carrying out this directive, entries of cotton textiles and cotton textile products in Categories 9/10, 15/16, 22/23, and 26/27 (other than duck), produced or manufactured in Nicaragua and which have been exported prior to August 1, 1973, shall, to the extent of any unfilled balances, be charged against the levels of restraint established for such goods during the period August 1, 1972 through July 31, 1973. In the event that the levels of restraint established for the twelve-month period have been exhausted by previous entries, such goods shall be subject to the levels set forth in this letter.

The levels of restraint set forth above are subject to adjustment pursuant to the provisions of the bilateral agreement of September 5, 1972 between the Governments of the United States and Nicaragua which provide, in part, that within the aggregate limit, the limitations on Categories 9/10, 15/16, 22/23, and 26/27 (other than duck) may be exceeded by not more than five (5) percent; for the limited carryover of shortfalls in certain categories to the next agreement year; and for administrative arrangements. Any appropriate adjustments pursuant to the provisions of the bilateral agreement referred to above will be made to you by further letter.

A detailed description of the categories in terms of TSUSA numbers was published in the FEDERAL REGISTER on April 29, 1972 (37 FR 8802), as amended on February 14, 1973 (38 FR 4436).

In carrying out the above directions, entry into the United States for consumption shall be construed to include entry for consumption into the Commonwealth of Puerto Rico.

The actions taken with respect to the Government of Nicaragua and with respect to imports of cotton textiles and cotton textile products from Nicaragua have been determined by the Committee for the Implementation of Textile Agreements to involve foreign affairs functions of the United States. Therefore, the directions to the Commissioner of Customs, being necessary to the implementation of such actions, fall within the foreign affairs exception to the rule-making provisions of 5 U.S.C. 553. This letter will be published in the FEDERAL REGISTER.

Sincerely,

SETH M. BODNER,
Chairman, Committee for the Implementation of Textile Agreements, and Deputy Assistant Secretary for Resources and Trade Assistance.

CONSUMER PRODUCT SAFETY COMMISSION

PRODUCT SAFETY ADVISORY COUNCIL

Submission of Applications for Membership

The Consumer Product Safety Commission was established by the Consumer Product Safety Act (Public Law 92-573, 86 Stat. 1207-33; 15 U.S.C. 2051-81). The Commission is charged with protecting the public against unreasonable risks of injury associated with consumer products; assisting consumers in evaluating the comparative safety of consumer products; developing uniform safety standards for consumer products; and promoting research and investigation into the causes and prevention of product-related deaths, illnesses, and injuries.

To assist the Commission in these tasks, section 28 of the act (86 Stat. 1230; 15 U.S.C. 2077) provides that the Commission shall establish a Product Safety Advisory Council. Section 28(a) prescribes that the Council shall be constituted as follows:

(1) Five members shall be selected from governmental agencies including Federal, State, and local governments;

(2) Five members shall be selected from consumer product industries including at least one representative of small business; and

(3) Five members shall be selected from among consumer organizations, community organizations, and recognized consumer leaders.

The Council shall meet not less than four times a year to advise the Consumer Product Safety Commission. The Council may also propose consumer product safety rules for the Commission's consideration.

The purpose of this notice is to insure that the Commission is aware of the best possible candidates to serve on the Council. Accordingly, anyone in one of the above-described categories of membership who is interested in serving on the Council may inform the Commission of his or her desire to serve by forwarding an application in the following format. Persons wishing to nominate another individual to serve on the Council should also use this format and should include a statement that the person nominated has agreed to serve on the Council if asked.

APPLICATION FORMAT

1. Name.
2. Address.
3. Birthdate.
4. Description of present employment.
5. Description of any extracurricular activities related to product safety.
6. Discussion of how you learned of the Product Safety Advisory Council.
7. Interest questions:
   a. Why are you interested in serving on the Council?
   b. What contribution can you make to the Council?
   c. What would be your availability to attend meetings and provide written comments to material provided by the Consumer Product Safety Commission? Frequency?
8. Representation questions:
   a. Will you represent an organization or group?
   b. Name and size of the group.
   c. How were you selected to represent the group?
   d. Previous experience in representing the group.
   e. How will you determine the group's position on issues relating to product safety?
   f. How will those positions be related to the Consumer Product Safety Commission?
   g. How will the Consumer Product Safety Commission's policies be related to the group?
9. Experience and expertise questions (answer questions applying to the group to be represented):
   a. Government:
   (i) Are you involved in product safety activities at Federal, State, or local levels? If so, give a brief description.
   (ii) Have you had experience with Federal regulatory activities? If so, describe.
   (iii) Have you worked in any capacity with citizens groups? If so, explain.
   b. Industry:
   (i) What industry do you represent?
   (ii) Describe your position.
   (iii) If your present or past experience is related to product safety, voluntary standard setting, testing, or corporate public relations, give a description.
   c. Consumer:
   (i) What consumer or community group do you represent?
   (ii) Are a majority of the people you represent above or below the level of $5,000 in annual family income, based on a family of four persons?

Applications should be submitted on or before September 17, 1973, addressed to the Secretary, Consumer Product Safety Commission, Washington, D.C. 20207.

Dated: July 30, 1973.

GEORGE A. SMITH,
Acting Secretary, Consumer Product Safety Commission.

[FR Doc.73-15989 Filed 8-2-73;8:45 am]

STANDARD FOR THE FLAMMABILITY OF MATTRESSES

Notice of Approval of Alternate Sampling Plan for Mattress Pads

The Secretary of Commerce, in the FEDERAL REGISTER of June 7, 1972 (37 FR 11362), published the Flammability Standard for Mattresses (DOC FF 4-72) pursuant to provisions of the Flammable Fabrics Act.

Effective May 14, 1973, section 30(b) of the Consumer Product Safety Act (Public Law 92-573, 86 Stat. 1231; 15 U.S.C. 2079(b)) transferred all functions under the Flammable Fabrics Act to the Consumer Product Safety Commission.

Subsequently, the Consumer Product Safety Commission amended and reissued the standard (as the Standard for the Flammability of Mattresses (FF 4-72)) in the FEDERAL REGISTER of June 8, 1973 (38 FR 15095), effective June 7, 1973. As a result of a judicially imposed temporary stay, the standard as amended became effective June 22, 1973.

The standard contains a sampling plan for the selection and testing of mattresses and mattress pads. A provision (.4(b)(1)) of the standard allows alternate sampling plans to be used provided they are approved by the Consumer Product Safety Commission. Such plans must provide at least the equivalent level of fire safety to the consumer as that provided by the standard's sampling plan.

The alternate sampling plan for mattress pads set forth below was submitted for approval in accordance with .4(b)(1) of the standard. It has been reviewed and determined to offer an equivalent level of fire safety to the consumer and to meet all technical requirements of the standard. It has operating characteristics such that the probability of unit acceptance at any percentage defective does not exceed the corresponding probability of unit acceptance of the basic sampling plan in the region of the operating characteristic curve that lies between 5 and 95 percent acceptance probability. The Commission hereby approves the plan.

Use of this alternate sampling plan, which may be cited as Alternate Sampling Plan No. 2 to FF 4-72, is restricted to mattress pads. The plan, however, is not restricted to the party submitting it but may be used by any mattress pad manufacturer.

Records of the use of this plan shall be maintained by the manufacturer in accordance with regulations established by the Consumer Product Safety Commission (see proposed 16 CFR 302.20 in the FEDERAL REGISTER of June 11, 1973 (38 FR 15373)).

All provisions of the Standard for the Flammability of Mattresses (FF 4-72, as amended) are applicable under this alternate sampling plan except as specified below.

Dated: July 30, 1973.

GEORGE A. SMITH,
Acting Secretary, Consumer Product Safety Commission.

ALTERNATE SAMPLING PLAN NUMBER 2 TO FF 4-72 MATTRESS PADS

The following substitutes for .4(b) *Specimen and sampling* of FF 4-72:

.4 *Test procedure.*

* * * * * *

(b) *Specimen and sampling.*—(1) *General.*—(i) The test criterion of .3(b) of FF 4-72 shall be used in conjunction with this Alternate Sampling Plan No. 2 (ASP No. 2). The use of this ASP No. 2 is restricted to mattress pads, but it may be used by any mattress pad manufacturer. ASP No. 2 may be used in conjunction with ASP No. 4 to FF 4-72 if desired (ASP No. 4 was published in the FEDERAL REGISTER of June 19, 1973; 38 FR 15990). When ASP No. 4 is so used, the provisions of this ASP No. 2 shall apply with respect to production testing of mattress pads. Use of this ASP No. 2 in conjunction with any other sampling plan is permitted only if the latter (A) is an approved sampling plan and (B) contains explicit provisions for such use.

(ii) It is permissible to employ differing sampling plans with respect to differing mattress pad types and/or production units; however, any sampling plan employed with respect to a specific production unit shall be so employed in its entirety.

(iii) For purposes of this ASP No. 2, "initial production quantity" means a quantity of mattress pads equalling or exceeding one-sixtieth of the quantity anticipated to be contained in the production unit to be accepted upon successful completion of the sampling requirements. Not withstanding the provisions of .1(j) of FF 4-72 and those of .4(b)(2)(i) *Basic sampling plan* of this ASP No. 2, mattress pads contained in an initial production quantity shall be deemed to be included in the production unit represented by that initial production quantity if (A) the initial production quantity is manufactured during the 30-day period preceding the nominal date of initiation of the production unit, (B) final assembly of mattress pads in the initial production quantity is accomplished on the machine or machines used in final assembly of mattress pads

V 38 149 AUG 3 73 XUM

in the production unit, and (C) no mattress pads of the type contained in the production unit are produced on said machines during the period between manufacture of the initial production quantity and the nominal date of initiation of the production unit. Alternatively, mattress pads contained in an initial production quantity shall be deemed to be included in the production unit represented by that initial production quantity if the initial production quantity is manufactured during the 30-day period preceding the nominal date of initiation of the production unit and the manufacturer stipulates that all mattress pads of prototypes represented in the production unit and manufactured between the initial production quantity and the nominal date of initiation of the production unit shall be deemed to be rejected if the production unit is rejected. Each prototype to be included in the production unit shall be represented in the initial production quantity.

(2) *Mattress pad sampling.*—The basic mattress pad sampling plan is made up of two parts: Prototype qualification (.4(b)(2)(i)(A)) and production testing (.4(b)(2)(i)(B)). In addition, a batch sampling plan (.4(b)(2)(ii)) is given that may be used for small production quantities, when shipping requirements prohibit the use of the basic plan or for other reasons at the discretion of the manufacturer.

(i) *Basic sampling plan.*—A production unit in the basic sampling plan shall consist of not more than 250 mattress pads of a mattress pad type in normal sampling (.4(b)(2)(i)(B)(*1*)) nor more than 500 mattress pads of a mattress pad type in reduced sampling (.4(b)(2)(i)(B)(2)) or the quantity produced in 1½ consecutive calendar months, whichever is smaller in either case. This production unit size may be increased to the quantity produced in 1½ consecutive calendar months or less: *Provided*, That it is either documented that each of the materials contributing to the cigarette ignition characteristics of all mattress pads in the production unit and the preceding or the following production unit came from a single manufacturing lot of such material, or 50 consecutive production units (at least 20,000 mattress pads) have all been accepted in production testing as set forth in .4(b)(2)(i)(B).

(A) *Prototype qualification.*—(*1*) For prototype qualification, the term "manufacturer" shall mean (*i*) with respect to a company having one manufacturing facility, that company; (*ii*) with respect to a company having two or more manufacturing facilities, either that company or one or more of its manufacturing facilities as it elects; or (*iii*) with respect to a company that is part of a group of companies that have elected to share in a prototype design, either that group of companies or a portion of that group or (*i*) or (*ii*) above, as that company elects.

(2) Each "manufacturer" shall select enough of each mattress pad prototype from preproduction or current production to provide six surfaces for test (three mattress pads if both sides can be tested or six mattress pads if only one side can be tested). Test each of the six surfaces according to .4(d) *Testing* of FF 4–72. If all the cigarette test locations on all six surfaces satisfy the test criterion of .3(b) of FF 4–72, accept the mattress pad prototype. If one or more of the cigarette test locations on the six surfaces fail the test criterion of .3(b), reject the mattress pad prototype.

(3) If it has been elected to include more than one company and/or more than one manufacturing facility in the term "manufacturer" for purposes of prototype qualification, each such company and each such manufacturing facility shall select enough additional prototype mattress pads from its own preproduction or current production to provide two surfaces for test. Test each of the two surfaces according to .4(d) of FF 4–72. If all the cigarette test locations on both surfaces satisfy the test criterion of .3(b) of FF 4–72, accept the mattress pad prototype for that company or manufacturing facility. If one or more of the cigarette test locations on the two surfaces fail the test criterion of .3(b), reject the mattress pad prototype for that company or manufacturing facility.

(4) Mattress pad prototype qualification may be repeated after the manufacturer has taken action to improve the resistance of the mattress pad prototype to ignition by cigarettes through mattress pad design, production, or materials selection. When mattress pad prototype qualification is repeated as a result of prototype rejection by the "manufacturer," such qualification shall be conducted as if it were an original qualification. When the mattress pad prototype qualification is repeated as a result of prototype rejection under the provisions of the preceding (3) or as a result of production unit rejection, such qualification shall be performed as if the producer of the failing mattress pad were a company having one manufacturing facility.

(5) Each mattress pad prototype must be accepted in prototype qualification prior to shipping any mattress pads to customers and prior to producing significant quantities of mattress pads. If the "manufacturer" is one manufacturing facility, the first production unit manufactured immediately after successful prototype qualification or the production unit from which the mattress pads were selected for the successful prototype qualification (not to exceed 500 mattress pads in either case) may be accepted and shipped to customers without further testing if all mattress pads in the production unit are the same as the prototype except for size.

(B) *Production testing.*—For production testing, the term "manufacturer" shall mean each manufacturing facility. Random selection for production testing shall be accomplished by use of random number tables or equivalent means as determined by the Consumer Product Safety Commission. If it is desired to use only mattress pads of a specified size (for example, twin) for testing, the drawing may be repeated until sufficient mattress pads of that size have been selected. A production unit, except for the first production unit following successful prototype qualification as specified in .4(b)(2)(i)(A), is either accepted or rejected according to the following plan:

(*1*) *Normal sampling.*—(*i*) From the initial production quantity, randomly select enough mattress pads to provide eight surfaces for test (four mattress pads if both sides can be tested or eight mattress pads if only one side can be tested). Test each of the eight surfaces according to .4(d) of FF 4–72. If all the cigarette test locations on all surfaces meet the test criterion of .3(b) of FF 4–72, accept the production unit. If two or more individual cigarette test locations fail the test criterion of .3(b), reject the production unit. If only one individual cigarette test location fails the test criterion of .3(b), select enough additional mattress pads from the initial production quantity to provide 16 additional surfaces for test. Test each of the 16 additional surfaces according to .4(d). If all the cigarette test locations on the 16 additional surfaces meet the test criterion of .3(b), accept the production unit. If one or more of the individual cigarette test locations on the 16 additional surfaces fail the test criterion of .3(b), reject the production unit.

(*ii*) Production unit rejection shall include all mattress pads in the particular production unit under test. Such rejection also results in the loss of prototype qualification (.4(b)(2)(i)(A)) for all prototypes included in the production unit under test.

(2) *Reduced sampling.*—(*i*) The level of sampling required for mattress pad production acceptance may be reduced provided that the preceding 15 consecutive production units of mattress pads (at least 500 mattress pads) have all been accepted using the normal sampling plan of this ASP No. 2 (.4(b)(2)(i)(B)(*1*)) or that of FF 4–72. The production quantity for reduced sampling under this ASP No. 2 shall consist of one production unit as defined in .4(b)(2)(i).

(*ii*) From the initial production quantity, randomly select enough mattress pads to provide eight surfaces for test. Test each of the eight surfaces according to .4(d) of FF 4–72. If all the cigarette test locations on all surfaces meet the test criterion of .3(b) of FF 4–72, accept the production unit. If two or more individual cigarette test locations fail the test criterion of .3(b), reject the production unit. If only one individual cigarette test location fails the test criterion of .3(b), accept the production unit.

(*iii*) Production unit rejection shall include all mattress pads in the particular production unit under test. Such rejection also results in the loss of prototype qualification (.4(b)(2)(i)(A)) for all prototypes included in the production unit under test. Testing after requalification shall be according to the normal sampling plan (.4(b)(2)(i)(B)(*1*)).

(ii) *Batch sampling plan.*—For the batch sampling plan, the term "manufacturer" shall mean each manufacturing facility. A production unit in the batch sampling plan shall consist of not more than 250 mattress pads or the quantity produced in one period of 30 consecutive calendar days, whichever is smaller.

(A) *Batch unit qualification and acceptance.*—(*1*) Select enough mattress pads from the initial production of the production unit to provide four surfaces for test (two mattress pads if both sides can be tested or four mattress pads if only one side can be tested). Test each of the four surfaces according to .4(d) of FF 4–72. If all the cigarette test locations on the four surfaces meet the test criterion of .3(b) of FF 4–72, accept the production unit. If one or more of the cigarette test locations on the four surfaces fail the test criterion of .3(b), reject the production unit.

(2) After rejection, production unit qualification and acceptance under this batch sampling plan may be repeated after the resistance of the mattress pad to ignition by cigarettes is improved by the manufacturer taking corrective action in mattress pad design, production, or materials selection.

(3) Acceptance of any production unit under this batch sampling plan shall not have any effect on prototype qualification (.4(b)(2)(i)(A)) or production unit acceptance of any other production unit.

(3) *Disposition of rejected units.*—Rejected production units shall not be retested, offered for sale, sold, or promoted for use as mattress pads as defined in .1(a) of FF 4–72 except after reworking to improve the resistance to ignition by cigarettes and subsequent retesting in accordance with procedures set forth in the basic sampling plan (.4(b)(2)(i)).

(4) *Records.*—Records of all production unit sizes, test results, and the disposition of rejected production units shall be maintained by the manufacturer, in accordance with regulations established by the Consumer Product Safety Commission (see proposed 16 CFR 302.20 in the FEDERAL REGISTER of June 11, 1973; 38 FR 15373).

(5) *Preparation of mattress pad samples.*—The mattress pad surface shall be divided laterally into two sections (see figure 1 of FF 4–72); one section for the bare mattress pad tests and the other for the two-sheet tests.

(6) *Sheet selection.*—The sheets shall be white, 100-percent combed cotton percale, not treated with a chemical finish which imparts a characteristic such as permanent press or flame resistance, and shall have 170–200 threads per square inch and a fabric weight of 115±14 grams per square meter (3.4±0.4 ounces per square yard), or shall be of another type approved by the Consumer Product Safety Commission. Size of sheet shall be appropriate for the mattress pad being tested.

(7) *Sheet preparation.*—The sheet shall be laundered once before use (in an automatic home washer using the hot water setting and longest normal cycle with the manufacturer's recommended quantity of a commercial detergent) and dried in an automatic home tumble dryer. The sheet shall be cut across the width into two equal parts after washing.

(8) *Cigarettes.*—Unopened packages of cigarettes shall be selected for each series of tests.

(9) *Compliance marketing sampling plans.*—(i) Sampling plans for use in market testing of items covered by the standard (FF 4–72) may be issued by the Consumer Product Safety Commission. Such plans shall define noncompliance of a production unit to exist only when it is shown, with a high level of statistical confidence, that those production units represented by tested items which fail such plans will in fact fail the standard (FF 4–72).

(ii) Production units found to be noncomplying under these provisions shall be deemed not to conform to the Standard (FF 4–72).

(iii) The Consumer Product Safety Commission will publish such plans in the FEDERAL REGISTER for public comment prior to their promulgation.

(10) *Postponement of production testing.*—Temporary suspension of production testing may be granted on a case-by-case basis by the Consumer Product Safety Commission in those instances where an individual manufacturer proves, under rules prescribed by the Commission, that he cannot acquire access to either in-house or independent testing facilities for production testing. In the event of such a suspension, the manufacturer would still be obligated to produce a mattress pad that meets all other requirements of the standard (FF 4–72).

[FR Doc.73-15990 Filed 8-2-73;8:45 am]

FEDERAL COMMUNICATIONS COMMISSION

[DOCKET NO. 19657; FCC 73R-273]

COSMOPOLITAN BROADCASTING CORP.

Memorandum Opinion and Order Modifying Issues

In re application of Cosmopolitan Broadcasting Corporation, Newark, New Jersey, for renewal of main, auxiliary & SCA license for WHBI(FM).

1. The Commission designated the application of Cosmopolitan Broadcasting Corporation (Cosmopolitan) for hearing by Order and Notice of Apparent Liability, FCC 72–1137, released December 19, 1972, on numerous issues, including inquiries into alleged violations of Commission rules 1.615 and 73.282. Presently before the Review Board is a petition to enlarge issues, filed April 2, 1973, by the Commission's Broadcast Bureau requesting addition of Rule 1.514 and misrepresentation issues and inclusion of additional matters under the existing rule 73.282 (logging rule) issue.[1]

2. The Bureau concedes that its petition to enlarge issues is late filed; however, the Bureau argues that good cause exists for accepting its pleading. Furthermore, the Bureau asserts that the substance of the requested issues raises serious public interest questions, citing *The Edgefield-Saluda Radio Company*, 5 FCC 2d 148, 8 RR 2d 611 (1966). Petitioner explains that the matters relied on to support the instant petition only came to its attention recently while it was preparing requests for admissions of facts and responses to interrogatories; also, because of other work commitments, counsel was unable to devote substantial time to this case until recently. Moreover, the Bureau asserts that the questions raised herein, *i.e.*, misrepresentations to the Commission and numerous logging violations, are of a disqualifying nature and so substantial as to require consideration under the Board's holding in *Edgefield-Saluda*.

3. In support of its requests for rule 1.514 and misrepresentation issues, the Bureau relies upon essentially the same set of facts. The Bureau explains that the Commission specified a rule 1.615 issue[2] against Cosmopolitan, in part, because of its apparent failure to advise the Commission that one William A Masi was given a five percent stock interest in the applicant corporation in a management contract dated June 27, 1962. Although the contract was executed in 1962, and Masi actually acquired the stock on December 22, 1964, the first ownership report (FCC Form 323) advising the Commission of Masi's stock ownership was dated February 25, 1966, the Bureau continues. In preparing requests for admissions of fact, petitioner recites, it checked approximately 14 applications including modifications, renewals, assignments, and amendments filed by Cosmopolitan from the time it filed for a construction permit in 1959 until it filed for renewal in 1966, and in none of these applications did Cosmopolitan divulge the existence of the 1962 management contract or the 1964 transfer of the stock to Masi. In fact, the Bureau alleges, Cosmopolitan affirmatively represented in at least five of these applications that there were no contracts affecting ownership and no ownership changes, and that, in one of them, an application filed April 3, 1964 for assignment of a 50 percent stock interest to Donald Lewis, Cosmopolitan's principal stockholder, the applicant affirmatively represented that Lewis would be the sole stockholder.[3]

[1] Also before the Review Board are following related pleadings: (a) opposition, filed April 16, 1973, by Cosmopolitan; (b) erratum to (a), filed April 17, 1973, by Cosmopolitan; and (c) Broadcast Bureau's reply, filed April 26, 1973.

[2] Designated issue (1) seeks: "To determine whether applicant failed timely to file ownership reports to the Commission in violation of § 1.615 of the Commission's Rules."

[3] The Bureau asks the Board to take official notice of these five applications.

V 38 - 149 AUG 3 73 XUM

These circumstances, the Bureau argues, raise a substantial question as to whether Cosmopolitan misrepresented facts concerning Masi's interest in applications filed with the Commission and whether Cosmopolitan's failure to report the Masi interest in ownership reports also constituted misrepresentation of facts. Furthermore, in light of Cosmopolitan's failure to disclose this interest in the applications indicated above, the Bureau argues that issue (1) should be expanded to encompass rule 1.514 violations. In support of its request to expand issue (e),[4] the Bureau alleges that Cosmopolitan has violated other subsections of rule 73.282 in addition to its failure to properly identify the political affiliation of certain candidates which prompted the Commission to designate the issue. The Bureau contends that Cosmopolitan: (1) failed to log at least seventeen political announcements in violation of § 73.282 (a)(4)(ii); (2) failed to identify the persons who paid for some thirty political announcements in violation of rule 73.282(a)(2); (3) failed to identify by program type as required by rule 73.282 (a)(ii) nine political announcements; and (4) failed to properly make corrections in program logs in accordance with rule 73.282(d)(1).[5]

4. In opposition, Cosmopolitan asserts that the Bureau's petition was filed more than three months late, and that the Bureau has shown no good cause for its untimeliness. Cosmopolitan maintains that the requested rule 1.514 and misrepresentation issues center around its alleged failure to report Masi's minority interest in ownership reports. Since the the Commission has already designated a rule 1.615 issue because of Cosmopolitan's alleged failure to report this same interest in ownership reports. Since the Bureau's instant request for an issue is obviously connected with the designated issue and the facts relied upon by the Bureau could have been determined without detailed study, Cosmopolitan maintains that the Bureau's excuse that its counsel was too busy to devote a substantial amount of time to this case until recently is specious. With respect to rule 73.282, the Commission has already designated an issue, Cosmopolitan points out, to explore alleged logging violations in connection with political announcements carried on Station WHBI during the 1968 and 1970 general election campaigns. The Bureau's request for additional issues, Cosmopolitan submits, involves logging rule violations allegedly committed during the same 1970 campaign and improper log changes made during the same period; there is no excuse, therefore, why the Bureau could not have ascertained the facts it relies upon to support the instant request prior to the expiration of time for filing a timely petition to enlarge, Cosmopolitan maintains. Furthermore, the Bureau's interpretation of *Edgefield-Saluda*, Cosmopolitan argues, would allow consideration of any untimely pleadings whenever facts are recited which indicate that the Commission's rules may have been violated. *Edgefield-Saluda*, according to Cosmopolitan's interpretation, only applies when the alleged violations are so serious in nature as to require the disqualification of the applicant if they are proved. Cosmopolitan argues that it had no intention of concealing Masi's interest, as is evidenced by the fact that it amended its Ownership Report (FCC Form 323) dated February 25, 1966, to reflect his interest, and that absent allegations of intent, such violations cannot be disqualifying. Furthermore, Cosmopolitan argues, the effect of logging violations on its qualifications to be a Commission licensee is already encompassed within the scope of the rule 73.282 issue designated by the Commission.

5. The Review Board is of the view that the Bureau has not shown good cause for the untimely filing of its petition to enlarge. The applications and program logs relied upon by the Bureau to support its allegations were available prior to the designation of this proceeding for hearing and no showing has been made that with due diligence the facts relied upon to support the instant requests could not have been discovered earlier, particularly since they relate primarily to subject matters already in issue. See *RKO General, Inc. (WNAC–TV)*, FCC 73R–249, released July 6, 1973. Moreover, with respect to the requested rule 1.514 and misrepresentation issues, we do not believe the Bureau's allegations meet the test set forth in the *Edgefield-Saluda* case. As the applicant indicates, the Bureau has not alleged any motivation on Cosmopolitan's part to conceal Masi's stock interest and we do not agree that, standing alone, failure to report the creation or transfer of a 5 percent stock interest in the applicant corporation raises substantial public interest questions in the circumstances of this case. In other words, the alleged omissions are not sufficient to overcome the inherent procedural infirmities, absent a showing that the 5 percent transfer resulted in a transfer of control of the station.[6] *Gross Broadcasting Company (KJOG–TV)*, FCC 73–684, released July 6, 1973; *A. V. Bamford*, FCC 73R–259, released July 16, 1973; *Vogel-Ellington Corporation*, FCC 73R–258, released July 17, 1973. In reaching our conclusion, we have also considered the facts that there are already numerous issues inquiring into Cosmopolitan's character qualifications, and that Cosmopolitan's apparent failure to report Masi's interest in ownership reports is already the subject of a rule 1.615 issue in this proceeding. We, accordingly, believe that the addition of two more issues inquiring into the same subject matter would serve no useful purpose. Finally, with specific reference to the Bureau's contentions regarding misrepresentation, we note that, if the 1962 management contract did not effectuate a transfer of control to Masi, the contract would not have to be reported under Section II of Form 301. *Sumiton Broadcasting Co., Inc., supra*. Accordingly, these requested issues will be denied.

6. However, we do believe that a serious question is raised with respect to the alleged logging rule violations. In this regard, the Bureau has satisfied the test set forth in *Edgefield-Saluda:* the allegations raise serious public interest questions, and are supported by substantial documentation and are not rebutted. Moreover, on the merits, the numerous additional violations alleged are, contrary to Cosmopolitan's assertion, not encompassed within the designated rule 73.282 issue. The Commission places great importance on the maintenance of accurate program logs. Failure to accurately maintain logs has led to forfeiture, short term renewals and denial of renewal licenses. See *KOKA Broadcasting Co., Inc.*, FCC 71–232, 21 RR 2d 981 (1971); and *Continental Broadcasting, Inc.*, 15 FCC 2d 120, 14 RR 2d 813 (1968), reconsideration denied 17 FCC 2d 485, 16 RR 2d 30 (1969), affirmed 142 U.S. App. D.C. 20, 439 F. 2d 580, 20 RR 2d 2126, cert. denied 402 U.S. 904 (1971). In light of the foregoing, we will modify the existing false logging issue to encompass the matters raised herein.

7. *Accordingly, it is ordered*, That the petition to enlarge issues, filed April 2, 1973, by the Broadcast Bureau, is granted to the extent indicated herein and IS DENIED in all other respects, and

8. *It is further ordered*, That issue (e) specified in the designation order is modified to read as follows:

(e) To determine whether the applicant failed to make entries in the program logs of WHBI properly identifying the political affiliations of certain candidates for public office, failed to log the broadcast of political announcements, failed to identify in the station's program logs the person(s) who paid for political announcements, failed to make program log entries identifying programs by type, and failed to properly explain and sign corrections to program logs in violation of § 73.282 of the Commission's rules.

Adopted: July 24, 1973.

Released: July 27, 1973.

FEDERAL COMMUNICATIONS COMMISSION,[7]
[SEAL] VINCENT J. MULLINS,
Acting Secretary.

[FR Doc.73-16038 Filed 8-2-73;8:45 am]

---

[4] Issue (e) seeks: "To determine whether the applicant failed to make entries in the program logs of WHBI properly identifying the political affiliation of certain candidates for public office in violation of § 73.282 of the Commission's rules."

[5] Petitioner explains that it only had time to review Cosmopolitan's program logs for the period of October 1, 1970 through November 3, 1970. The Bureau notes, however, that the Bill of Particulars cites the Station's program logs for other periods, as well, in support of the designated issues.

[6] We note that the Bureau, in paragraph 5 and note 1 of its petition, refers to the facts that the 1963 management contract provides, by its own terms that the 5 percent transfer of stock to Masi would require prior Commission approval and that such approval was never sought. However, the Bureau does not elaborate on the potentially significant questions of whether the creation of a 5 percent stock interest in Masi resulted at that time in a transfer of negative control of the applicant corporation from either of the two equal 50 percent owners or whether Masi's interest combined with the management contract resulted in his acquisition of "swing" control of the corporation. We have in the past expressed concern with an applicant's obligation pursuant to Section II of Form 301 to report contracts or understandings relating to control of the station. *Cf. Sumiton Broadcasting Co., Inc.*, 15 FCC 2d 400, 14 RR 2d 1000 (1968). However, the Bureau has not requested the addition of an unauthorized transfer of control issue, and, absent additional facts, the allegations now before the Board are insufficient to raise a substantial question warranting evidentiary inquiry into this matter.

[7] Board member Berkemeyer dissenting statement in which Board member Pincock joins, filed as part of original document.

[Docket No. 19788; FCC 73–751]

RADIO MILTON, INC.

Order Designating Application for Hearing on Stated Issues and Notice of Apparent Liability

In re application of Radio Milton, Inc., Milton, Florida for renewal of license of Station WSRA.

1. Now before the Commission are the captioned application and its inquiry into the operation of Station WSRA.

2. Information before the Commission raises serious questions as to whether the applicant possesses the qualifications to be or to remain a licensee of the captioned station. In view of these questions, the Commission is unable to find that a grant of the renewal application would serve the public interest, convenience and necessity, and must, therefore, designate the application for hearing.

3. Accordingly, *It Is Ordered*, That the application Is Designated For Hearing pursuant to section 309(e) of the Communications Act of 1934, as amended, at a time and place specified in a subsequent Order, upon the following issues:

(a) To determine whether the licensee made misrepresentations to the Commission or was lacking in candor with respect to its capitalization, the dates upon which certain stock transactions occurred in regard to the licensee's holding company (West Florida Broadcasting Co., Inc.), the figures provided as to income and expenses by the licensee's holding company in connection with the application (BALH–1349) to assign the license of Station WONF(FM) (now WBOP-FM), the circumstances and explanations surrounding the claim that Station WONF (FM) was not creating interference to Station WXBM–FM;

(b) To determine whether the licensee employed discriminatory employment practices in violation of § 73.125 of the Commission's rules;

(c) To determine whether the licensee falsified its operating logs in violation of §§ 73.111(a) and 73.113(a)(3) of the Commission's rules;

(d) To determine whether the licensee violated §§ 1.613(c), 1.615(a) and 1.615(c) by failing to seasonably file information, or changes in information, required to be filed by those sections;

(e) To determine whether the license for the station or any rights thereunder were transferred, assigned, or disposed of without a finding by the Commission that the public interest, convenience and necessity would be served thereby, in violation of section 310(b) of the Communications Act of 1934, as amended;

(f) To determine whether the licensee, at all times, has exercised control or supervision of the operation of Station WSRA in a manner consistent with the responsibilities of a licensee;

(g) To determine, in light of the evidence adduced under the preceding issues, whether the licensee possesses the requisite qualifications to be or to remain a licensee of the Commission, and whether a grant of the application would serve the public interest, convenience and necessity.

4. *It Is Further Ordered*, That if it is determined that the hearing record does not warrant an order denying the captioned application, it shall also be determined whether the applicant has repeatedly or willfully violated section 310(b) of the Communications Act and §§ 1.615(a)(3), 1.615(c), and 73.125 of the Commission's rules[1] and, if so, whether an Order of Forfeiture pursuant to Section 503(b) of the Communications Act in the amount of $10,000 or some lesser amount should be issued for violations that occurred within one year of the issuance of the Bill of Particulars.

5. *It is Further Ordered*, That this document constitutes a Notice of Apparent Liability for forfeiture for violations of those sections of the Act of the Commission's Rules set out in the preceding paragraph. The Commission has determined that, in every case designated for hearing involving revocation or denial of renewal of license for alleged violations which also come within the purview of section 503(b) of the Act, it shall, as a matter of course, include this forfeiture notice so as to maintain the fullest possible flexibility of action. Since the procedure is thus a routine or standard one, we *stress* that inclusion of this Notice is not to be taken as in any way indicating what the initial or final disposition of the case should be; that judgment is, of course to be made on the facts of each case.

6. *It Is Further Ordered*, That the Chief of the Broadcast Bureau is directed to serve upon the applicant, within thirty (30) days of the release of this Order, a Bill of Particulars with respect to issues (a) through (f), inclusive.

7. *It Is Further Ordered*, That the Broadcast Bureau proceed with the initial presentation of the evidence with respect to issues (a) through (f), inclusive and the applicant then proceed with its evidence and have the burden of establishing that it possesses the requisite qualifications to be and to remain a licensee of the Commission and that a grant of the application would serve the public interest, convenience and necessity.

8. *It Is Further Ordered*, That to avail itself of the opportunity to be heard, the applicant, pursuant to § 1.221 (c) of the Commission's rules, in person or by attorney, shall, within twenty (20) days of the mailing of this Order, file with the Commission, in triplicate, a written appearance stating an intention to appear on the date fixed for the hearing and present evidence on the issues specified in this Order.

9. *It Is Further Ordered*, That the applicant, pursuant to Section 311(a)(2) of the Communications Act of 1934, as amended, and Section 1.594 of the Commission's rules, shall give notice of the hearing within the time and in the manner prescribed in such rule and shall advise the Commission thereof as required by § 1.594(g) of the rules.

10. *It Is Further Ordered*, That the Secretary of the Commission send a copy of this Order by Certified Mail—Return Receipt Requested to Radio Milton, Inc.

Adopted: July 11, 1973.

Released: July 26, 1973.

FEDERAL MARITIME COMMISSION

BOARD OF COMMISSIONERS OF THE PORT OF NEW ORLEANS AND NEW ORLEANS COLD STORAGE & WAREHOUSE, CO., LTD

Notice of Agreement Filed

Notice is hereby given that the following agreement has been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of the agreement at the Washington office of the Federal Maritime Commission, 1405 I Street, NW., Room 1015, or may inspect the agreement at the Field Offices located at New York, N.Y., New Orleans, Louisiana, and San Francisco, California. Comments on such agreements, including requests for hearing, may be submitted to the Secretary, Federal Maritime Commission, Washington, D.C., 20573, on or before August 23, 1973. Any person desiring a hearing on the proposed agreement shall provide a clear and concise statement of the matters upon which they desire to adduce evidence. An allegation of discrimination or unfairness shall be accompanied by a statement describing the discrimination or unfairness with particularity. If a violation of the Act or detriment to the commerce of the United States is alleged, the statement shall set forth with particularity the acts and circumstances said to constitute such violation or detriment to commerce.

A copy of any such statement should also be forwarded to the party filing the agreement (as indicated hereinafter) and the statement should indicate that this has been done.

Notice of Agreement Filed by:

Cyrus C. Guidry
Port Counsel
Board of Commissioners of the Port of New Orleans
P.O. Box 60046
New Orleans, Louisiana 70160

Agreement No. T–1792–2, between the Board of Commissioners of the Port of New Orleans (Port) and the New Orleans Cold Storage & Warehouse Co., Ltd. (Company), modifies the basic agreement which provides for the Lease of the Nashville Avenue Wharf at New Orleans, Louisiana for handling and storing refrigerated cargo. The purpose of the modification is to delete from the leased premises 1.53 acres of unimproved land. The land rental under the original lease will be diminished in proportion to the area deleted. The Company will have the right, upon 120 days' advance written notice, to again lease this same area.

By order of the Federal Maritime Commission.

Dated: July 27, 1973.

FRANCIS C. HURNEY,
Secretary.

Notice of Agreement Filed for Approval by:

Mr. A. Verrueren, Secretary
French Line, Inc.
555 Fifth Avenue
New York, New York 10017

Agreement No. 10009 between Hellenic Mediterranean Lines and French Line, Incorporated provides for the appointment by Hellenic Mediterranean Lines of French Line, Incorporated as its exclusive agent to conduct throughout the Western Hemisphere the business of the sale of passenger transportation on the vessels of Hellenic Mediterranean Lines on cruises out of Western Hemisphere ports and in its Mediterranean services. Western Hemisphere is defined in the Agreement as meaning North, Central and South America, the Island of Bermuda, the Caribbean Area, the Bahamas, and the State of Hawaii. Among other things, the Agreement sets out the duties of French Line, Incorporated including consultation with Hellenic Mediterranean Lines concerning voyage and cruise itineraries of the Aquarius and the scheduling of her voyages and cruises. While providing for earlier termination, the term of the Agreement is until October, 1973 for the Mediterranean services of the vessels Aquarius, Appolonia and various car ferries services, and until March 1974 for cruises from ports in the Western Hemisphere.

By Order of the Federal Maritime Commission.

FEDERAL POWER COMMISSION

[Docket No. CI60–828, etc.]

CERTIFICATES OF PUBLIC CONVENIENCE AND NECESSITY

Notice of Applications, Abandonment of Service and Petitions To Amend [1]

JULY 23, 1973.

Take notice that each of the Applicants listed herein has filed an application or petition pursuant to section 7 of the Natural Gas Act for authorization to sell natural gas in interstate commerce or to abandon service as described herein, all as more fully described in the respective applications and amendments which are on file with the Commission and open to public inspection.

Any person desiring to be heard or to make any protest with reference to said applications should on or before August 17, 1973, file with the Federal Power Commission, Washington, D.C. 20426, petitions to intervene or protests in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure a hearing will be held without further notice before the Commission on all applications in which no petition to intervene is filed within the time required herein if the Commission on its own review of the matter believes that a grant of the certificates or the authorization for the proposed abandonment is required by the public convenience and necessity. Where a petition for leave to intervene is timely filed, or where the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[FR Doc.73-15740 Filed 8-2-73;8:45 am]

[Docket Nos. RP72-118 and RP73-14]

MICHIGAN WISCONSIN PIPE LINE CO.

Order Approving Rate Settlement

JULY 24, 1973.

On May 10, 1973, the Presiding Administrative Law Judge certified to the Commission for approval a proposed revised settlement agreement together with the record relating thereto. If approved, the revised settlement agreement would resolve all issues in the above-entitled proceedings. The proposed settlement rates would result in a reduction of approximately $8.3 million in Michigan Wisconsin's presently effective rates.

The proceeding in Docket No. RP72-118 involves a general rate increase application filed by Michigan Wisconsin on April 28, 1972, requesting an increase in rates for jurisdictional natural gas sales and services of $29.9 million annually, based on sales for the 12-month period ending January 31, 1972, as adjusted. By Commission order issued May 31, 1972, the proposed increased rates were suspended for the maximum statutory period of 5 months, following which the increased rates became effective subject to refund on November 1, 1972.

A proposed settlement in Docket No. RP72-118 was originally certified to the Commission by the Presiding Administrative Law Judge on December 7, 1972. On April 10, 1973, the Commission remanded the settlement to the Presiding Judge for failure of the settlement to incorporate a cost classification in accordance with the unmodified Atlantic Seaboard formula. The Commission also directed that certain coal option payments totalling $575,000 be eliminated from the cost of service. Upon remand, additional discussions were held among the parties to the proceeding and agreement was reached on a revised settlement proposal fully consistent with the Commission's directives. This revised settlement agreement was received in the record by the Presiding Administrative Law Judge on May 8, 1973, together with the comments of interested parties with respect thereto. The revised settlement was certified to the Commission by the Presiding Judge on May 10, 1973. Notice of the certification was issued on June 12, 1973. No additional comments have been received pursuant to the notice.

The proceeding in Docket No. RP73-14 involves a filing made by Michigan Wisconsin on March 16, 1973, for authorization to track increases totalling approximately $4 million in the cost of purchased gas and to recover approximately $518,000 representing the rate effect of advance payments made by Michigan Wisconsin to gas producers. The above increases, which are requested to be made effective on May 1, 1973, relate to costs incurred by Michigan Wisconsin subsequent to the general rate filing in Docket No. RP72-118. All parties agreed during the remanded settlement discussions that the above costs and related increase in rates should be incorporated in the proposed settlement in Docket No. RP72-118, thereby obviating the need for separate action in Docket No. RP73-14. On April 19, 1973, Michigan Wisconsin filed a motion for deferral of action on the tracking increases in Docket No. RP73-14 pending submission and Commission disposition of the present revised settlement agreement. The principal provisions of the revised settlement proposal may be summarized as follows:

(1) Articles I and III provide that Michigan Wisconsin will refund to its customers the difference between the rates presently in effect and the rates reflecting the settlement cost of service, and to be refundable on the basis of Michigan Wisconsin's historical revenue pattern, upon which the presently effective rates are designed. The rates upon which refunds are to be based are set forth in Appendix B of the proposed revised stipulation and agreement. There are two sets of rates. The rates applicable to the period November 1, 1972, through April 30, 1973, exclude the tracking increases related to purchased gas cost and advance payments filed in Docket No. RP73-14. The rates applicable to the period from May 1, 1973, until the redesigned settlement rates take effect on the first day of the second month following approval of the settlement include the subject RP73-14 tracking increases. The prospective settlement rates are set forth in Appendix C of the revised stipulation and agreement.

(2) Article II provides for inclusion of the costs and related rate effect of the tracking increases in Docket No. RP73-14 in both the Appendix B and Appendix C rates, as discussed above.

(3) Articles, IV, V, VI, and VII provide for changes in Michigan Wisconsin's rates to reflect changes in advance payments (Articles IV and V), safety program expenditures (Articles IV and VI), and federal income taxes (Article VII). Changes related to advance payments and safety program expenditures shall be made only if they amount to a mill or more per Mcf and may be made only (1) when Michigan Wisconsin makes a filing pursuant to its tariff PGA clause or (2) if no rate adjustment has been filed for a six-month period. The adjustments to rates for both advance payments and safety expenditures shall be applied solely to the commodity component of Michigan Wisconsin's rates.

(4) Article VIII provides that Michigan Wisconsin will modify its tariff provision relating to annual overrun penalties to allow a distributor to take 1/365th of its annual entitlement as annual overrun, without penalty, with the provision that the distributor's annual entitlement for the succeeding year shall be reduced by a volume equal to such overrun.

(5) Article IX provides that since Michigan Wisconsin's application to amend the certificate issued in Docket No. CP72-175 to provide increased contract demand service was approved, Michigan Wisconsin will credit its unrecovered purchased gas amount with $105,427. This accounting recognizes the increased revenues realized by Michigan Wisconsin as a result of the approved certificate amendent.

(6) Articles X and XI provide that the settlement agreement will terminate on the date the settlement rates are superseded by rates made effective pursuant to Sections 4 or 5 of the Natural Gas Act. Michigan Wisconsin is obligated not to file increased rates which will become effective prior to November 1, 1973, except for authorized tracking increases.

The settlement rates are based on a jurisdictional cost of service of $443,305,201, as shown in Appendix A of the settlement agreement. This cost of service is $575,000 less than the cost of service included in the earlier remanded settlement agreement, resulting from elimination of the previously discussed coal option payments. The settlement cost of service includes a return on net investment rate base of 8.75 percent yielding a return on equity of 11.46 percent. The settlement cost of service, capitalization, and return components are set forth in Appendix A hereto. The settlement rates as set forth in Appendix C of the agreement reflect the classification of costs and resulting development of rates strictly in accordance with the unmodified Atlantic Seaboard formula. We find the cost of service, classification of costs, design of rates, and rate of return, all as incorporated in the proposed settlement, to be reasonable and in the public interest, and they are therefore approved.

Those parties who have commented on the proposed settlement either support or do not oppose it. No party opposes the settlement. Based on our review of the settlement agreement, the entire record relating thereto, and the comments of the parties, we find that the settlement agreement represents a reasonable resolution of the issues in these proceedings in the public interest and that accordingly it should be approved and adopted.

The Commission finds.

The settlement of this proceeding on the basis of the revised stipulation and agreement certified herein by the Presiding Judge on May 10, 1973, is reasonable and proper and in the public interest in carrying out the provisions of the Natural Gas Act, and should be approved as hereinafter ordered.

The Commission orders.

(A) The revised Stipulation and Agreement certified by the Presiding Judge on May 10, 1973, is incorporated by reference and made a part hereof, and is approved and adopted.

(B) Within 30 days from the date of this order, Michigan Wisconsin shall file with the Commission revised tariff sheets in conformity with the terms of the revised Stipulation and Agreement as herein approved.

(C) This order is without prejudice to any findings or orders which have been made or which may hereafter be made by the Commission, and is without prejudice to any claims or contentions which may be made by the Commission, its staff, Michigan Wisconsin, or by any other party or person affected by this order in any proceedings now pending or hereafter instituted by or against Michigan Wisconsin or any other person or party.

(D) Nothing contained in this order shall relieve Michigan Wisconsin of any responsibility imposed by the Economic Stabilization Act of 1970, (Public Law 91-379, 84 Stat. 799, as amended by Public Law 92-15, 85 Stat. 38), or by any Executive Order or rules and regulations promulgated pursuant to such Act.

(E) The Secretary shall cause prompt publication of this order to be made in the FEDERAL REGISTER.

By the Commission.[1]

[SEAL] KENNETH F. PLUMB, *Secretary.*

[1] Commissioner Brooke concurring in the rate design aspects incorporated herein reflects only his approval of what the participating parties agreed to as constituting an essential ingredient of the total settlement package.

MIDWESTERN GAS TRANSMISSION CO.

Order Accepting Settlement Agreement and Reserving Issue for Hearing

JULY 24, 1973.

On September 30, 1970, Midwestern Gas Transmission Company (Midwestern) filed with the Commission proposed changes in its FPC Gas Tariff, reflecting a proposed increase in rates on both its Northern and Southern Systems. The proposed effective date was November 15, 1970. By order issued November 13, 1970, we accepted one set of alternate revised sheets for filing and suspended their effectiveness for five months or until April 15, 1971. Midwestern stated that the proposed rates would result in increased annual revenues of $2,605,509 from the Northern System and $19,187,113 for the Southern System, of which $15,052,559 reflected increased purchased gas costs from its Southern System supplier, Tennessee Gas Pipeline Company. These figures were based on a test year ending May 31, 1970, as adjusted.

On December 1, 1970, Midwestern filed revised tariff sheets to its FPC Gas Tariff to track an increase in the cost of gas from its Northern System supplier, Trans-Canada Pipe Lines Limited (Trans-Canada). By order issued December 22, 1970, we accepted this tracking increase for filing, with an effective date of January 1, 1971, subject to refund. On March 16, 1971, Midwestern filed a stipulation and agreement with respect to its Northern System together with tariff sheets which provided for a $1.3 million settlement increase which reflected only the above mentioned increase in purchased gas costs from Trans-Canada.

Between January 10, 1971 and November 14, 1971, various tracking increases relating to the Southern System were allowed to go into effect in Dockets Nos. RP71-16, RP71-56, RP72-3, and RP72-52.

On September 17, 1971, Midwestern filed a proposed settlement agreement as to its Southern System which reduced the proposed increase in Docket No. RP71-16 to $12.55 million. Midwestern requested that tariff sheets filed on November 8, 1971 reflecting this agreement become effective the first day of the calendar month following the date on which the Commission's order approving the agreement was to become final and unappealable.

By separate orders of January 10, 1973, the Commission remanded the proposed agreements (for the Northern and Southern systems respectively) to the Presiding Administrative Law Judge so that a record could be established from which the Commission could determine whether the proposed rates under the agreements are just and reasonable. The Presiding Administrative Law Judge was directed to then certify the complete record to the Commission for its decision.

Pursuant to the January 10 orders, the Presiding Administrative Law Judge issued an order on January 19, calling for a conference to convene on February 9 and at that time dates for reception of evidence were fixed. These were later extended from time to time to accommodate a series of settlement conferences.

On May 24, 1973, a conference was convened before the Presiding Administrative Law Judge and there was then reported and placed in the record a new and revised Settlement Agreement (Agreement) covering both Northern and Southern Systems. This Agreement with supporting data and other materials was certified to the Commission on May 30, 1973, by the Judge. The Agreement states that it supersedes the earlier settlement agreements filed in this proceeding, and further states that it reflects an agreement supported by Midwestern, the Commission's Staff and other parties resulting from conferences in March and April, 1973.

The key provisions of the proposed settlement agreement are as follows:

(1) Rates will be reduced below those now in effect subject to refund by approximately $1.26 million for the Northern System and $6.67 million for the Southern System based on the test year ended February 28, 1971. Refunds will be on an "as billed" basis for the period beginning April 15, 1971, to the effective date of Midwestern's revised tariff sheets.

(2) Tariff sheets, which we will designate Third Revised Volume No. 1 of Midwestern's FPC Gas Tariff, are proposed to be filed within ten days after the issuance of the Commission's order approving the agreement, and are proposed to become effective on the first day of the calendar month following the date upon which the Commission's order making the Agreement effective becomes final and nonappealable.

(3) A provision for flow through of certain gas supplier refunds and interest from Tennessee to Southern System customers is included.

V 38-149 AUG 3 73 XUM

(4) An increase in book depreciation and amortization rates, from 3.50 percent to 4.53 percent on the Northern System, and from 3.50 percent to 4.08 percent on the Southern System, is provided. The Agreement, however, reserves for hearing and decision the issue of whether the depreciation and amortization rates are just and reasonable and provides for refund of any amounts not found to be just and reasonable.

(5) Midwestern's tariff will include a purchased gas adjustment (PGA) clause for both the Southern System and the Northern System. Waiver of § 154.38(d)(4)(iv) of the Commission's regulations is required so that the PGA for the Southern System can provide for rate changes to reflect those of its pipeline supplier semi-annually, with appropriate deferred accounting of unrenewed gas units, rather than on the effective date of such pipeline supplier rate changes.

The placing of the agreement on the record for certification of the Commission was noticed on June 1, 1973, with comments, and protests due on or before June 12, 1973. Comments in support of the Agreement were filed by Montana-Dakota Utilities Company, Peoples Gas Light and Coke Company, Peoples Natural Gas Division of Northern Natural Gas Company, North Central Public Service Company, Northern Indiana Public Service Company, Central Illinois Light Company, Great Plains Natural Gas Company, Michigan Wisconsin Pipe Line Company, and Northern States Power Company.

The Commission Staff filed comments on June 12, 1973, indicating that they had no objection to the Agreement.

Our review of the proposed Agreement, including the settlement cost of service [1] and the capitalization and rate of return,[2] indicates that the proposed Agreement provides a reasonable and appropriate resolution of the issues herein and that the public interest will be served by our approval of the settlement. We note that, although nowhere mentioned in the Agreement, the proposed prospective rate design meets the minimal rate design requirements of settlement agreements as expressed in our order of April 10, 1973, in Michigan Wisconsin Pipe Line Company, Docket No. RP72-118. As to the requested waiver, we find that in light of the problems concerning PGA adjustments which might arise among many of Midwestern's Southern System customers who have several pipeline suppliers, such waiver should be granted. We shall therefore accept the proposed Agreement, grant the requested waiver, and set the reserved issue concerning increased book depreciation and amortization rates for hearing.

The Commission finds,

(1) Approval, as hereafter ordered, of the settlement in these proceedings on the basis of the Agreement certified May 30, 1973, is just and reasonable in the public interest in carrying out the provisions of the Natural Gas Act and should be made effective.

[1] Appendix A.
[2] Appendix B.

(2) The requested waiver of § 154.38(d)(4)(iv) of the Commission's regulations should be granted.

(3) It is necessary and proper in the public interest and to aid in the enforcement of the provisions of the Natural Gas Act that the Commission enter upon a hearing concerning the lawfulness of the rates and charges contained in Midwestern's Gas Tariff, as proposed to be amended in this docket, on the issues of the proposed changes in book depreciation and amortization rates.

The Commission orders.

(A) Midwestern's proposed Settlement Agreement is accepted and the tariff sheets included therein shall become effective as hereinafter provided while that part of the settlement rates related to increased book depreciation and amortization rates shall become effective, upon Midwestern's filing new tariff sheets, subject to refund pending the outcome of a hearing to be hereinafter ordered.

(B) Midwestern shall file within ten days of the issuance of this order new tariff sheets reflecting the terms of the Agreement, to become effective on the first day of the calendar month following the date upon which this order becomes final and nonappealable.

(C) The requested waiver of the Commission's regulations is granted to permit Midwestern to file for PGA rate increases on a semi-annual basis only.

(D) Pursuant to the authority of the Natural Gas Act, particularly sections 4 and 5 thereof, the Commission's rules of practice and procedure, and the regulations under the Natural Gas Act (18 CFR Ch. I), a public hearing shall be held, commencing with a prehearing conference on October 9, 1973, at 10:00 a.m., e.d.t. in a hearing room of the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, concerning the lawfulness of the rates, charges, classifications, and services contained in Midwestern's FPC Gas Tariff, as proposed to be amended herein as relating to the proposed increases in book depreciation and amortization rates.

(E) At the prehearing conference on October 9, 1973, Midwestern's prepared testimony shall be admitted to the record as its complete case-in-chief subject to appropriate motions, if any, by parties to the proceeding. All parties will be expected to come to this conference prepared to effectuate the provisions of §§ 1.18 and 2.59 of the Commission's rules of practice.

(F) On or before September 24, 1973, the Commission Staff shall serve its prepared testimony and exhibits. The prepared testimony and exhibits of all intervenors shall be served on or before October 16, 1973. Any rebuttal evidence by Midwestern shall be served on or before October 29, 1973. The public hearing herein ordered shall convene on October 25, 1973, at 10:00 a.m., e.d.t.

(G) A Presiding Administrative Law Judge to be designated by the Chief Administrative Law Judge for that purpose (see Delegation of Authority, 18 CFR 3.5(d)), shall preside at the hearing in this proceeding, shall prescribe relevant procedural matters not herein provided, and shall control this proceeding in accordance with the policies expressed in the Commission's rules of practice and procedure.

(H) The Intervenors previously granted intervention in these dockets shall be permitted intervention in this proceeding which shall be a continuation of Docket No. RP71-16.

(I) The proceedings in Docket Nos. RP71-56, RP72-3 and RP72-52 are hereby terminated.

(J) Nothing contained in this order shall relieve the applicant of any responsibility imposed by the Economic Stabilization Act of 1970, (Public Law 91-379, 84 Stat. 799, as amended by Public Law 92-15, 85 Stat. 38), or by any Executive Order or rules and regulations promulgated pursuant to such act.

(K) The Secretary of the Commission shall cause prompt publication of this order in the FEDERAL REGISTER.

By the Commission.[3]

[SEAL] KENNETH F. PLUMB, *Secretary.*

PHILLIPS PETROLEUM CO. ET AL.

Order Providing for Hearing On and Suspension of Proposed Changes in Rates, and Allowing Rate Changes to Become Effective Subject to Refund [1]

JULY 25, 1973.

Respondents have filed proposed changes in rates and charges for jurisdictional sales of natural gas, as set forth in Appendix A hereof.

The proposed changed rates and charges may be unjust, unreasonable, unduly discriminatory, or preferential, or otherwise unlawful.

The Commission finds: It is in the public interest and consistent with the Natural Gas Act that the Commission enter upon hearing regarding the lawfulness of the proposed changes, and that the supplements herein be suspended and their use be deferred as ordered below.

The Commission orders: (A) Under the Natural Gas Act, particularly Sections 4 and 15, the Regulations pertaining thereto [18 CFR, Chapter I], and the Commission's Rules of Practice and Procedure, public hearings shall be held concerning the lawfulness of the proposed changes.

(B) Pending hearings and decisions thereon, the rate supplements herein are suspended and their use deferred until date shown in the "Date Suspended Until" column. Each of these supplements shall become effective, subject to refund, as of the expiration of the suspension period without any further action by the Respondent or by the Commission. Each Respondent shall comply with the refunding procedure required by the Natural Gas Act and Section 154.102 of the Regulations thereunder.

(C) Unless otherwise ordered by the Commission, neither the suspended supplements, nor the rate schedules sought to be altered, shall be changed until disposition of these proceedings or expiration of the suspension period, whichever is earlier.

By the Commission.

KENNETH F. PLUMB, *Secretary.*

[1] Does not consolidate for hearing or dispose of the several matters herein.
